Item 4 – Advisory Business

Sorrento Pacific Financial, LLC ("SPF") provides financial planning and investment advisory services through individuals associated with SPF as Investment Advisor Representatives ("IARs") consistent with the individual clients' financial and tax status and risk/reward objectives. Since July 2009, SPF has been registered as an investment advisor ("RIA") with the Securities and Exchange Commission and a broker/dealer member of the Financial Industry Regulatory Authority ("FINRA"). SPF, as an investment advisory firm offers the following advisory programs: AssetMark, Inc. , CAM, Financial Planning, Morningstar, Partnervest STAR, ExpertPlanSEI and SPF Asset Management Account and SPF Advisor Directed Non-Discretionary Asset Management Account.

Sorrento Pacific Financial, LLC is a California limited liability company. SPF is owned by Avtech, Inc, a California Corporation. Avtech, Inc. is owned by BBB Family Trust, Valorie Seyfert, Trustee and CJT Family Trust, Amelia and Taylor Beattie, Trustees.

Total non-discretionary assets under management as of December 31, 2014 were \$47,080,445. SPF does not have discretion over advisory accounts.

CUSO Asset Management Program ("CAM")

The CAM Program offers clients access to mutual fund and separately managed accounts through Envestnet Portfolio Solutions, Inc. ("Envestnet"), a registered investment advisor. Envestnet acts in the capacity of service provider and Account Manager to the CAM Account (excluding CAM Direct and CAM Direct II), monitoring performance, providing statements, generating research and analysis in relation to sub-advisor selection, when applicable. SPF acts as the investment adviser for CAM

In opening a CAM account, clients complete an Investment Strategy Report to provide the IAR with the client's necessary financial data including investment goals, income requirements, time horizon and risk tolerance .The IAR then assists the client in setting appropriate investment objectives and goals. The IAR will meet with the client periodically to determine whether the investment strategy should be modified or continued and whether individual circumstances or market conditions warrant any changes in asset allocation, tax sensitivity or risk tolerance. Based on the information obtained, Envestnet will construct and manage a portfolio for the client. Envestnet periodically monitors each client's portfolio and when deemed appropriate makes changes in both asset allocation and security selection. Client shall retain the ability to modify their investment strategy at any time.

Envestnet shall have unlimited investment discretion with respect to any changes to investments in the Program Accounts, within the parameters of the selected portfolio model. This includes discretion to adjust asset allocations and replace or reduce ETFs in the Program Accounts. All transactions in the Program Accounts shall be initiated by Envestnet. Subject to the limitations described in the client's responses to the Profile or other appropriate suitability analysis (including any reasonable restrictions the client may place on Program Account investments) the Account Manager shall have full authority to supervise and direct the investment of the monies contributed by client to the Program Account without prior consultation except as set forth below. SPF and its IAR's shall not have discretionary investment authority in the Program Accounts. CAM Direct and CAM Direct II are non-discretionary accounts therefore the client must approve all transactions.

There are several different CAM Programs available, each using a different investment vehicle as follows:

CAM Program Eligible Assets

1. CAM Funds - variety of mutual funds from various fund families.
2. CAM ETF- exchange-traded funds
3. CAM Index Fund- mutual funds (including index mutual funds) and exchange-traded funds
4. CAM UMA- general securities, mutual funds, Exchange Traded Funds stocks, and bonds.
5. ActivePassive Funds-a series of third party index mutual funds as well as one or more actively managed funds from the PMC Fund Family, a proprietary fund family of Envestnet..
6. CAM Managers-Equities
7. CAM Third Party Strategists- mutual funds and ETF's whereby third party asset managers acting as a Model Provider construct an asset allocation and select the underlying investments.
8. CAM Direct and CAM Direct II
 - a) Equities, convertible preferred securities, convertible bonds, shares of closed-end investment companies, UIT's and American Depositary Receipts.
 - b) Equity index options and equity options, and any warrants or rights on equities.
 - c) Exchange Traded Funds
 - d) Front-end load fund shares that are transferred to, but were not purchased in the CAM Direct or CAM Direct II Account.
 - e) Cash, assets in deposit accounts that may be maintained or established by or for the Client, and money market fund shares.
 - f) No-load fund shares or shares that have had the front-end load waived.
 - g) Fixed income instruments such as U.S. Treasury and federal agency securities, corporate rate medium term notes and bonds, zero coupon bonds, commercial

paper, municipal bonds, mortgage-backed securities and other collateralized mortgage obligations and non-convertible preferred securities.

AssetMark, Inc.

AssetMark offers consulting services for mutual funds and exchange traded funds (ETFs) as well as AssetMark's Privately Managed Accounts. The CFS IAR obtains the necessary financial data from the client, assists the client in determining suitability of asset management and assists the client in setting the appropriate investment objective.

Mutual Funds and ETFs- AssetMark has established relationships with independent investment management firms (the Strategists), to create a variety of strategic asset allocation model portfolios (Models) comprised with mutual funds (both independent and affiliated) and ETFs. The Strategist will select and monitor the performance of the mutual funds and ETFs in their Models and will periodically adjust and rebalance the portfolios in accordance with their investment strategies.

The Strategists are selected by AssetMark to provide a wide range of investment options. Each Strategist will provide a range of Models corresponding to a specific risk-return profiles ranging from conservative to aggressive. The Models will be generally rebalanced quarterly. Any proprietary AssetMark funds will be fully identified when the client is making their model selection.

Privately Managed Accounts-Additionally, AssetMark may offer Privately Managed Accounts, in which clients will engage AssetMark to act as an overlay manager. In this situation, AssetMark will contract with institutional investment management firms (Sub-Advisors) to provide model portfolios of individual securities. As overlay manager, AssetMark has limited discretionary authority to execute transactions on behalf of clients to track the model portfolios, provide tax management transactions, or to implement client-requested restrictions. Clients will retain discretion to choose the Models, mutual funds and ETFs for their account, and will have the opportunity to periodically rebalance their portfolio, and to change investment components within the selected Models. All transactions will be effected automatically through software administered by AssetMark.

Financial Planning Services

SPF, through its IARs, provides financial plans and investment advice consistent with a client's financial status, investment objectives and tax status. IAR will obtain the necessary financial data from the client to prepare the financial plan or provide investment advice. The financial plan or advice may include information regarding retirement planning, education planning, planning for a major purchase, life and disability insurance needs, long-term care needs and estate planning issues. Client may receive a written financial plan from IAR.

IARs may also provide investment advice to clients with respect to assets held within a

participant-directed retirement account held on a third-party platform. The services are provided by the IAR on a non-discretionary basis, and include initial fund selection and asset allocation recommendations. In addition, the IAR will meet periodically with the client to discuss whether or not the funds continue to meet the client's objectives and to recommend rebalancing transactions if necessary.

SPF is not licensed to engage in the practice of law or accounting and, consequently, will not offer legal or accounting advice when preparing the personal financial plan or providing financial advice. None of the fees for services under this program relate to legal or accounting services. If such services are necessary, it shall be the responsibility of the client to obtain them. Clients are not required to implement their financial plan through SPF and may elect any broker/dealer.

Morningstar

The Morningstar Program offers clients access, through SPF IARs, to Morningstar Investment Services ("MIS") an unaffiliated investment advisor. The primary purpose of MIS' investment adviser operations is to provide discretionary investment advice on portfolios consisting of no-load and load-waived open-end mutual funds and/or exchange-traded funds ("Funds"). MIS delegates certain services to the SPF IAR such as assisting each client in completing a questionnaire and/or other applicable account opening forms for determining suitability. The questionnaire helps in determining such things as client risk tolerance, investment objectives, and financial goals and identifies any reasonable restrictions that clients wish to place on the management of their account assets. Additionally, the SPF IAR will meet periodically with clients to obtain any changes in their financial situation and acting as liaison.

Pursuant to the discretionary authority granted by the client to MIS, MIS initiates transactions in fund shares to rebalance and/or to reallocate account assets to be consistent with the client's selected portfolio and restrictions, if any, and as frequently as MIS deems necessary. The SPF IAR will not have discretion.

ExpertPlan

SPF offers web-based, daily valuation platform for self-directed retirement plans including 401(k), 403(b) and 457 plans. The platforms are operated by ExpertPlan, Inc., a third party retirement plan recordkeeper, and provides administrative and reporting functions for retirement plan sponsors ("Plan Sponsors") and their participants. The platform also makes available a selection of no load and load waived mutual funds to the retirement plans (the "Plan"). One of the programs, among others, available through ExpertPlan is Retirement Plans My Way® a proprietary SPF program. ExpertPlan also offers programs provided by third party institutions not affiliated with SPF.

Through ExpertPlan, SPF provides certain investment advisory services to the Plan Sponsors. SPF, through its IARs, will assist the Plan Sponsor in establishing a service agreement with ExpertPlan. The IAR obtains the necessary financial data, investment goals

and objectives from the Plan Sponsor. Additionally, the IAR will assist the Plan Sponsor in selecting a menu of mutual funds across diverse asset classes to be offered to the self-directed participants of the Plan by providing information to the Plan Sponsor. The final decision as to which mutual funds to offer in the Plan to participants is the responsibility of the Plan Sponsor. Neither SPF nor the IAR have any discretionary trading authority. The IAR will meet with the Plan Sponsor periodically to review investment choices, performance, plan objectives and any requested changes.

The IAR will also provide periodic educational enrollment meetings to Plan participants to acquaint them with their investment choices, online asset allocation tools provided through ExpertPlan, and enrollment procedures. All investment decisions will be self-directed by the Plan participants, and the participants are able to change their investment selections at any time either online or via telephone by contacting ExpertPlan directly. The IAR may not provide investment advice to the Plan participants and may not be involved in directing or placing any transactions on behalf of Plan participants. The IAR will be available on an ongoing basis as a resource to Plan participants to provide general investment-related educational information.

SEI

SEI is an independent and unaffiliated third party custodian. SPF acting as the investment advisor may use the SEI Asset Management Program. In the SEI Management Program, SPF (i) assists clients in completing a suitability questionnaire, (ii) educates the clients about SEI asset allocation investment styles, (iii) recommends an appropriate allocation of SEI model portfolios and (iv) provides ongoing client assistance in monitoring performance. Clients retain the authority to change the portfolio selected.

SPF Advisory Account

The SPF IAR completes a client investment suitability review and creates an asset allocation plan with the client. Once the proper allocation is determined, IARs can present the client with a wide range of investment vehicles designed to achieve their risk and allocation parameters. All trades entered per the plan are non-discretionary only. As the SPF Advisory Account is a non-discretionary account, the client acknowledges and accepts responsibility for trading privileges and investment selections used in the Program. Client and IAR may also determine that, in the case of an account transfer, existing products and allocations are appropriate at time of account opening. IAR will provide at a minimum annual account reviews and make recommendations to client regarding ongoing allocation and rebalancing.

SPF Advisor Directed Non-Discretionary Advisory Account

The Advisory Account is a non-discretionary advisory program. Therefore, the Client must review and approve each trade before it is placed. The IAR assists the Client in completing an Investment Policy Guideline based on the Client's stated financial information, investment goals, time horizon and risk tolerance. With this information, the IAR creates an

asset allocation plan. Once the proper allocation is determined the IAR can present the Client with a wide range of eligible investment vehicles designed to achieve their risk and allocation parameters.

STAR™ Program

SPF, through its IARs, offers the Partnervest Advisory Services ("Partnervest") STAR Program. STAR stands for "Strategic Tactical Allocation Risk" and denotes the general attributes of each STAR program. There are seven STAR products available through CFS: (1) STAR II Model Portfolios, (2) STAR II Conservative Income, (3) STAR II VEGA Core Plus, (4) STAR II MORE, (5) STAR III VEGA, (6) STAR III Alpha, and (7) STAR III VEGA Enhanced, (collectively, "STAR") programs. Although STAR differs in their specific approach, the programs invest in a variety of securities but mostly Exchange Traded Funds ("ETF"s) and mutual funds. STAR accounts are managed by Partnervest and their subadvisors: Fusion Investment Group, LLC and Cinque Partners, LLC on a discretionary basis. Neither CFS nor the IAR will have trading discretion. All CFS clients opening a STAR account will also receive a copy of the Form ADV Part 2A, or relevant substitute disclosure document, for Partnervest. Please refer to Item 8 below and the Partnervest disclosure document for further information about the STAR program.

All SPF clients opening a STAR account will also receive a copy of the Form ADV Part 2A, or relevant substitute disclosure document, for Partnervest. Please refer to the Partnervest disclosure document for further information about the STAR program.

Item 5 – Fees and Compensation

All advisory fees may be subject to negotiation. SPF retains a portion of the advisory fee and pays a portion to the IAR managing the account.

Specific program fees are discussed below. In general, the fee charged by SPF is established in a client's written agreement with SPF. SPF will bill its fees on a monthly or quarterly basis depending on the program. Clients will be billed in either in advance or arrears each calendar month or quarter depending on the program selected. . These programs charge fees in advance as specified in the advisory agreement. Clients will be billed directly for fees by authorizing SPF to directly debit fees from client accounts. Management fees shall be prorated for each capital contribution and withdrawal made during the applicable calendar month or quarter (with the exception of de minimis contributions and withdrawals). Accounts initiated or terminated during a calendar month or quarter will be charged a prorated fee. Upon termination of any account, any prepaid, unearned fees will be promptly refunded, and any earned, unpaid fees will be due and payable. Accounts may be terminated by providing written notice to SPF.

Some programs may include transaction fees., SPF's fees are exclusive of brokerage commissions, transaction fees, and other related costs and expenses, which shall be incurred by the client. Clients may incur certain charges imposed by custodians, brokers, third party investment advisors and other third parties such as fees charged by managers, custodial fees, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions.

When Pershing is the custodian and executing broker/dealer, SPF receives a portion of the following fees: outgoing transfers, wired funds, inactive accounts, stop payments, direct registration of securities, margin extensions, ticket charges, IRA maintenance and termination fees, as well as asset-based fees on money market positions, uninvested cash balances, margin balances and cash sweeps to bank accounts. The IAR does not receive a portion of these fees.

In addition to the investment advisory fees and transaction charges, accounts may also incur certain charges imposed by third parties in connection with investments made through the program. These may include, but are not limited to, the following: mutual fund or money market 12b-1 fees, mutual fund, money market or ETF management fees and administrative expenses, mutual fund transaction fees, other transaction charges and service fees, IRA and qualified plan fees, and other charges required by law. SPF and IAR may receive a portion of these fees. Further information regarding charges and fees assessed by a mutual fund are available in the appropriate prospectus.

Mutual funds and exchange-traded funds also charge internal management fees, which are disclosed in a fund's prospectus. Such charges, fees and commissions are exclusive of and in addition to SPF's fee, and SPF shall not receive any portion of these commissions, fees, and costs. Clients may generally avoid additional fees by purchasing funds directly from a fund family and not receiving investment advice.

A customized program account may cost the client more or less than purchasing program services separately. Factors that bear upon the cost of the account in relation to the cost of the same services purchased separately include: the type and size of the account, the historical and/or expected size or number of trades for the account, and the number and range of supplementary advisory and client related services provided to the account.

The costs associated with a program account may be more than costs associated with a traditional brokerage account arrangement where the client pays a commission for each transaction but does not receive ongoing investment advice. This is particularly true for clients that intend to have a low number of transactions or follow a buy-and-hold approach. If the client intends to follow a buy and hold investment strategy, or does not wish to purchase ongoing investment advice or management services, the client should consider opening a commission-based brokerage account rather than an advisory account

In advisory accounts, the client is paying for ongoing investment advice from the IAR. The IAR recommending a program account to the client receives a portion of the advisory fee as a result of the client's participation in the program. This compensation may be more than what the IAR would receive if the client participated in brokerage accounts available through SPF and the IAR. As a result, there may be a financial incentive to recommend advisory programs or services over brokerage programs or services. Notwithstanding, SPF and its IARs take their responsibility to clients seriously, and will recommend an advisory program or service to a client only if it is believed to be in the client's best interest.

The compensation to the IAR also varies between advisory programs and services. Therefore, there may also be a financial incentive to recommend one advisory program or service over other advisory programs or services. As stated above, recommendations will be made based on the best interests of the client and not based on the potential compensation to be received.

IARs may also be registered representatives with SPF. In such capacity, he or she may sell securities through SPF and receive normal and customary commission as a result of purchases and sales as well as 12b-1 fees from mutual funds held in client accounts. To the extent that the IAR recommends that a client invest in a security, which results in a commission being paid to IAR in their capacity as a registered representative, this presents a potential conflict of interest. SPF conducts ongoing review of IAR commission and advisory fees to ensure suitability for source of funds for new advisory deposits. The focus of the review includes the IAR's past compensation on the advisory assets.

CAM Fees

CAM clients pay an annualized fee ("Account Fee") not to exceed 2.3% and is based on the type of CAM account and the total assets under management (AUM). Please refer to the grids below for clarification. The Program Fee is shared between SPF and Envestnet. There is also a statement surcharge fee of 75 cents per statement plus a \$5 confirm fee.

Mutual Fund Exchanges (per trade)	\$5.00
Systematic Purchase and Redemptions	\$2.00
Short Term Redemption Fee	\$50.00
Foreign Securities	\$85.00

The Account Fee is negotiable with minimums and is payable monthly in arrears based on the average daily balance of the aggregate client accounts during the preceding calendar month. For purposes of calculating Account Fees and providing performance reports, the account month begins on the day on which the account is funded. The initial Account Fee is due at the end of the calendar month following execution of the CAM Investment Advisory Agreement and may include a prorated fee for the initial quarter. Subsequent Account Fee payments are due and assessed at the end of each month based on the average daily value of the assets under management as of the close of business on the last business day of that month as valued by an independent pricing service, where available, or otherwise in good faith reflected on the client's quarterly performance report.

AssetMark

A quarterly fee on assets under management will be assessed by SPF to the client's account or accounts based on the Fee Schedule below. The fee will be calculated and charged in advance on the aggregate account balance at the end of each calendar quarter. If the program selected includes only AssetMark or their affiliate's proprietary mutual funds, there is no Program Fee since AssetMark will receive a management fee from the underlying funds. In addition to the below fees, the account will also be charged a custodian fee the amount of which varies per custodian. The custodian fee may be a fixed amount ranging from 0-\$250. Other custodians charge a percent of assets under management ranging from 0-.28%.

Program Fee Range	3rd Party Manager Range (if applicable)	Maximum IAR Fee	Total Fee Range
0-.90%	.35%-.60%	1.45%	1.45%-2.95%

Financial Planning Fees

The fee for Financial Planning Services is \$250 per hour up to a maximum of \$2,500. Fees and services for financial planning are agreed upon with the customer prior to the commencement of the planning process. Fees for financial planning services are determined as a flat fee or as an hourly fee and are negotiable and charged as services are rendered. Financial Planning services may be terminated upon written notice without penalty. There are no provisions for refunds since the fee is paid as services are provided. However, for certain programs/advisors, the financial planning fee may be refunded to clients who open an investment account through their IAR within 12 months of payment.

Financial plans or investment advice may include generic recommendations as to general types of investment products or specific securities, which may be appropriate for the Client to purchase given his financial situation and objectives. The Client is under no obligation to purchase such securities through SPF and the IAR in his/her capacity as a registered representative of SPF. However, if Client desires to purchase securities or advisory services in order to implement the financial plan, this may result in the payment of normal and customary commissions or advisory fees to SPF and IAR. To the extent that IAR recommends that the Client invest in products that will result in compensation being paid to the IAR, this presents a conflict of interest. SPF conducts periodic reviews of the IAR commissions received from financial planning clients to ensure that all fees and compensation are reasonable.

Participant Directed Retirement Account Fees

A quarterly fee on assets under management will be assessed by CFS to the client's account or accounts based on the Fee Schedule below. The fee will be calculated and charged in arrears on the aggregate account balance at the end of each calendar quarter. The fee may be assessed to one account if multiple accounts exist.

The fees are based on a flat rate with a maximum Fee of 1.5% or on a sliding scale below:

Account Balance	Annual Fee
\$0-\$500,000	1.50%
\$500,001-\$1,000,000	1.25%
Over \$1,000,000	1.00%

ExpertPlan

The Plan will pay fees to ExpertPlan and SPF in connection with self-directed retirement plan programs.. The fees paid to and retained by ExpertPlan are listed below, and are subject to agreement between the Plan Sponsor and ExpertPlan in the service agreement. The fees due to ExpertPlan and applicable to the Plan Sponsor are billed separately by ExpertPlan to the Plan Sponsor as incurred. The fees due to ExpertPlan and applicable to the Plan participants are deducted from participant's account on a quarterly basis by ExpertPlan.

In addition to the fees noted above, ExpertPlan will receive subtransfer/transfer agent fees on average of 25 basis points from the mutual funds in which Plan assets are invested. For those mutual funds that do not pay ExpertPlan a subtransfer/transfer agent fee, ExpertPlan will assess an annual asset based wrap fee of 25 basis points.

The fees paid to SPF and IAR are listed below.

Plan Participants pay an annualized asset based advisory fee according to the following schedule. The fee is charged quarterly, in arrears, and is deducted on a proportionate basis from each Plan participant's individual account. The total amount of the fee paid to SPF will not exceed 1.25% of the Plan's total assets in the program.

	Fee
\$0-\$500,000	1.25%
\$500,000-\$1 Million	1.00%
\$1 Million-\$3 Million	0.75%
Over \$3 Million	0.50%

SEI

A quarterly fee on assets under management will be assessed by SPF to the client's account or accounts based on the Fee Schedule below. SEI does not charge a program fee on their mutual fund portfolios since they are using proprietary fund family within their models.

The fee will be calculated and charged in arrears on the aggregate account balance at the end of each calendar quarter.

Maximum Fee	Amount Invested
1.75%	For the first \$1 Million assets under management
1.10%	For the next \$2 Million assets under management
1.00%	For the next \$2 Million assets under management

SPF Advisory Account

<i>Eligible Assets</i>	FEES	
	Annual Fee	Max
Equities, Mutual Funds, ETF's, Options, Fixed Income, Cash, Money Market	.40%	1.5%

The Program Fee will be paid every calendar quarter in advance, based on the value of Eligible Assets in the Account on the average of the last business days of the prior three month-ends, and it will be due within the first 5 business days of the calendar quarter. If billable asset values for three month-ends are not available, the most recent month-end will be used. The minimum annual Program Fee under this Agreement will be \$125.00. There will be a \$15 flat fee ticket charge for all transactions.

SPF Advisor Directed Non-Discretionary Advisory Account

The below annual asset-based fee is prorated and payable quarterly in arrears.

<i>Eligible Assets</i>	FEES	
	Annual Fee	Max
Equities, Mutual Funds, ETF's, Options, Fixed Income, Cash, Money Market, CD's	.40%	1.5%

Although clients do not pay a charge for transactions in the Program, client should understand that SPF pays a fee to Pershing for each transaction in a client's Program account. The transaction charges vary based on the type of transaction (e.g., mutual fund, equity, options, etc.). The fact that SPF is responsible for the cost of the transaction charge is a conflict of interest. Clients should understand that the cost of the transaction charges may be a factor that IAR considers when deciding which securities to recommend and how frequently to recommend transactions in a client's account.

STAR™ Program

A quarterly fee on assets under management will be assessed by SPF to the client's account or accounts based on the Fee Schedule below. The fee will be calculated and charged in arrears on the aggregate account balance at the end of each calendar quarter.

STAR™ II

Conservative, Balanced, Moderate and Growth

Amount Invested	Program Fee	IAR Fee	Total Fee Range
For the first \$250,000	0.6%	1.00%-1.65%	1.60% - 2.25%
\$250,000 - \$500,000	.55%	.95%-1.5%	1.50% - 2.05%
\$500,000-\$1,000,000	.50%	.85%-1.4%	1.35% - 1.90%
\$1,000,000-\$2,500,000	.45%	.80%-1.3%	1.25% - 1.75%
\$2,500,000-\$5,000,000	.40%	.70%-1.00%	1.10% - 1.40%

Conservative Income

Amount Invested	Program Fee	IAR Fee	Total Fee Range
All Assets	0.25%	.25%-.50%	.50%-.75%

VEGA Core Plus Fees

Amount Invested	Program Fee	IAR Fee	Total Fee Range
All Assets	0.60%	1.00%-1.65%	1.60%-2.25%

Partnervest will receive a sub-advisory fee of 85 basis points (0.85%) from the Global Buy-Write ETF, based upon the client's assets in the ETF. Partnervest does not charge the program management fee of 60 basis points (0.60%) on any client assets invested in the Global Buy-Write ETF in the VEGA Core Plus strategy. The net result is that Partnervest receives an additional 25 basis points (0.25%) on any client assets invested in the Global Buy-Write ETF based on their standard program management fee. These additional fees help to offset the fixed costs of operating the Global Buy-Write ETF and making it available to clients, which would otherwise be borne by Partnervest. If the assets grow large enough in the Global Buy-Write ETF then Partnervest would receive the amount exceeding the cost of operating the Global Buy-Write ETF as profit. Partnervest believes clients benefit by this investment in the Global Buy-Write ETF as it allows a client to participate in the full VEGA separately managed account strategy with a lower minimum investment with increased positions and diversification, volatility based reinvestment, diversification of strike prices and option maturities for each position, lower transaction fees and greater diversification with the satellite investments while all being held to the same stringent selection criteria as other funds in STAR II.

Partnervest will receive a sub-advisory fee of 85 basis points (0.85%) from the Global Buy-Write ETF, based upon the client's assets in the ETF. Partnervest believes clients benefit by this investment in the Global Buy-Write ETF as it allows a client to participate in the full VEGA separately managed account strategy with a lower minimum investment with increased positions and diversification,

volatility based reinvestment, diversification of strike prices and option maturities for each position, lower transaction fees and greater diversification with the satellite investments while all being held to the same stringent selection criteria as other funds in STAR II.

STAR™ III

VEGA

Amount Invested	Program Fee	IAR Fee	Total Fee Range
All Assets	1.00%	.75%-1.5%	1.75%-2.50%

Alpha

Amount Invested	Program Fee	IAR Fee	Total Fee Range
All Assets	.75%	1.0%-1.75%	1.75%-2.50%

There is an additional 0.25% Fee per year for a STAR III VEGA Enhanced account that selects an additional management service known as a Reinvestment Option Election as described above.

In addition to the Fees, STAR accounts will pay a transaction charge to the custodian to cover the cost of trade execution. Neither the IAR nor Partnervest will receive any portion of the transaction charges. SPF may receive a portion of these fees. The transaction charges are as follows:

Trade Execution	Transaction Charge
Equities	\$15.00
Options	\$15.00 plus \$0.75/contract
Fixed Income	\$30.00
Mutual Funds	\$14.00
Mutual Fund Surcharge	\$10.00
Mutual Fund Exchanges (per trade)	\$5.00

Systematic Purchase and Redemptions	\$2.00
Short Term Redemption Fee	\$50.00
Foreign Securities	\$85.00

The Mutual Fund Surcharge applies to a transaction in any mutual fund where Pershing as custodian does not receive networking fees. This is in addition to the transaction charge noted above for Mutual Funds.

The STAR™ III Account will be charged by the custodian for margin interest on any credit extended to the account. Partnervest will not receive a portion of the margin interest. SPF will receive a portion of the margin interest. This is in addition to the investment advisory fee charged for the STAR™ Account. The investment advisory fee will be charged on the account's total Account value, including the margined securities.

STAR accounts without any transactions during a 12-month period based on anniversary will also be responsible for paying an annual inactive account fee of \$25.00 for accounts holding solely mutual funds and \$50.00 for accounts holding a combination of mutual funds and other securities. There is also a statement surcharge fee of 75 cents per statement plus a \$5 confirm fee.

SPF Margin Interest Rates

Margin Account Balance	SPF Margin Interest Rates
Less than \$24,999	1.50% above Base Lending Rate
\$25,000 to \$49,999.99	1.00% above Base Lending Rate
\$50,000 and up	0.50% above Base Lending Rate

Advisory programs offer varying pricing structures, which may or may not result in a higher fee to the client. For additional program information, please refer to Item 12 – Brokerage Practices.

Item 6 – Performance-Based Fees

SPF does not charge any performance-based fees (fees based on a share of capital gains on or capital appreciation of the assets of a client).

Item 7 – Types of Clients

SPF provides portfolio management services to individuals, corporate pension and profit-sharing plans, charitable institutions, corporations, foundations, endowments, and trusts.

Minimum Account Size

None	ExpertPlan, Financial Planning
\$10,000	SPF Advisor Directed Non-Discretionary Advisory Account (N6Y)
\$25,000	CAM ActivePassive, STAR II Conservative Income, STAR II VEGA Core Plus
\$50,000	CAM Funds, CAM ETF, CAM Index Plus, STAR II, AssetMark Mutual Funds, Morningstar
\$100,000	CAM Direct, CAM Direct II, STAR III Alpha, AssetMark ETF's,
\$200,000	SPF Advisor Directed Non-Discretionary Advisory Account (QQA)
\$250,000	CAM UMA, SEI SMA, STAR III VEGA, AssetMark GPS
\$750,000	CAM Managers

CAM Direct should not be used for day trading or other high volume or extremely speculative trading activity, including, without limitation, excessive options trading or trading in mutual funds based on market timing. If SPF, in its sole discretion, determines that the trading activity in a CAM Direct Account is excessive, SPF reserves the right to restrict trading or terminate the account if the quantity of trades exceeds sixty (60) trades per annum, and to impose a surcharge equal to the maximum commission rate on those trades beyond the maximum stated above that would have applied based on rates applicable if the trades had been made in a standard SPF brokerage account.

Item 8 – Methods of Analysis, Investment Strategies and Risk of Loss

Analysis and Strategies

Advisors may utilize varying techniques in formulating investment advice or managing assets for clients. The third party managers determine the method and source of their analysis and investment strategies. Please refer below and to the ADV brochure for the third party managers for more information.

CAM

IARs obtain detailed financial and other pertinent data from clients. This assists in determining the appropriate investment strategy for the account. All security analysis methods, sources of information with respect to securities, and investment strategies are determined by SPF IARs for the CAM Direct Program and Financial Planning Services.

CAM Direct and CAM Direct II

Clients may elect to purchase and sell equity options and/or equity index options within the CAM Direct and CAM Direct II account. All CAM Direct and CAM Direct II accounts that wish to invest in options of any type must be approved for option trading in advance of any option transactions. Buying and selling options entails additional risks. These risks will be disclosed in writing to clients prior to signing an option approval form to receive approval for options. Clients should fully understand and agree to the risks associated with the type of option transactions that they will authorize in the CAM Direct and CAM Direct II account prior to signing the option approval form.

Clients may also elect to purchase structured products within the CAM Direct and CAM Direct II account. Structured products are securities derived from or based on a single security, a basket of securities, an index, a commodity, a debt issuance and/or a foreign currency. Structured products have a fixed maturity, but typically contain two components – a note and a derivative (which may be an option). Structured products are issued by financial institutions, such as investment banks, and are senior, unsecured debt of the issuing institution. As such, structured products are subject to the credit worthiness of the issuer even if they are structured to offer principal protection, and any payments due at maturity are dependent on the issuer's ability to make payment. In addition to this credit risk, other risks of investing in structured products include, but are not limited to, liquidity risk, limitations on upside participation, and the tax treatment may be different from other investments in the CAM Direct and CAM Direct II account.

Financial Planning Services

SPF, through its IARs, provides financial plans and investment advice consistent with a client's financial status, investment objectives and tax status. IAR will obtain the necessary financial data from the client to prepare the financial plan or provide investment advice.

ExpertPlan

Through ExpertPlan Retirement Plans My Way™, SPF provides certain investment advisory services to the Plan Sponsors. SPF, through its IARs, will assist the Plan Sponsor in establishing a service agreement with ExpertPlan. The IAR obtains the necessary financial data, investment goals and objectives from the Plan Sponsor. Additionally, the IAR will

assist the Plan Sponsor in selecting a menu of mutual funds across diverse asset classes to be offered to the self-directed participants of the Plan by providing information to the Plan Sponsor. The final decision as to which mutual funds to offer in the Plan to participants is the responsibility of the Plan Sponsor. Neither SPF nor the IAR have any discretionary trading authority. The IAR will meet with the Plan Sponsor periodically to review investment choices, performance, plan objectives and any requested changes.

SEI

SEI provides asset allocation advice to Clients based on the financial objectives, investment objectives, risk tolerance and investment restrictions of the Client. SEI uses a proprietary asset allocation model to make its recommendation. The model uses estimates developed by SEI of the long-term rates of return, volatility and correlations of various asset classes. SEI also provides comparisons of performance to relevant benchmarks. Client's assets are invested in pooled investment vehicles, including the SEI Funds, and collective funds and partnerships to which affiliates of SEI Investment Management Corporation provide services or are separately managed by other registered investment advisers who have contracted with SEI. SEI performs quarterly rebalancing based on standard variances.

SPF Asset Management Account

The SPF IAR completes a client investment suitability review and creates an asset allocation plan with the client. Once the proper allocation is determined, IARs can present the client with a wide range of investment vehicles designed to achieve their risk and allocation parameters. All trades entered per the plan are non discretionary only. IAR will provide at a minimum annual account reviews and make recommendations to client regarding ongoing allocation and rebalancing.

STAR™ Program

The following describes the investment strategy and methodology used by Partnervest and its subadvisors in managing assets within each of the various STAR™ programs. For further information, client should refer to the Form ADV Part 2A or other relevant disclosure document for Partnervest.

STAR™ II – Model Portfolios

There are four STAR II Model Portfolios available: Conservative; Balanced; Moderate and Growth. Based on the client's investment objectives, time horizon, and risk tolerance, Partnervest determines an appropriate mix of asset classes and investment styles. The resulting strategic asset allocation model provides target ranges for each asset class or investment style. A wide variety of securities may be used in each investment style, including potentially, no load or load-waived mutual funds, Exchange Traded Funds (ETFs), individual equities, fixed-income securities, and other securities.

The securities are sorted and ranked according to Partnervest's investment model comprising several criteria which may include: rates of return, fund inception, correlations, Sharpe Ratio, maximum drawdown, standard deviation, and other factors. Portfolio allocations are dynamic and can vary depending upon several factors, including client needs and circumstances, market conditions, and other factors. Partnervest uses a tactical asset allocation to obtain a Mean-Variance optimization and identify the optimal portfolios on the efficient frontier curve. Partnervest then selects the proper mix of the asset classes. *STAR II Conservative Income*

The STAR II Conservative Income program incorporates the basic STAR II program outlined above but refines it so that the strategy's focus is to maximize short term current income, consistent with preservation of capital and need for liquidity. The portfolio consists of actively managed short term fixed income ETF's with tax advantages and inflation protection. The duration of the Conservative Income portfolio is very short term and is designed to attempt to adjust quickly to a rise in interest rates. ETF selections are intended to capitalize on investment opportunities that arise as a result of economic, financial, or other prevailing conditions.

STAR™ II -VEGA Core Plus

The STAR II VEGA Core Plus strategy is managed by Fusion Investment Group, LLC, a subadvisor to Partnervest. In its role as subadvisor to Partnervest, Fusion provides regular and continuous supervisory management services for some or all of Partnervest's client assets invested in the Core Plus strategy. This includes full discretion to determine what investments shall be purchased, sold, or exchanged and what portion of assets shall be held not invested, in accordance with the client's Investment Advisory Agreement, suitability information, and Investment Policy Guidelines, as well as the subadvisory agreement signed with Partnervest. Fusion will determine which broker dealers will effect transactions, seeking best execution.

The Core Plus STAR II strategy seeks long-term growth of capital, a steady income stream, and is designed to minimize costs and reduce volatility. The portfolio consists of a non-traditional "core" comprised of an ETF that contains a diversified basket of ETFs, that may be managed by Partnervest, surrounded by a select group of actively managed satellite and fixed-income investments. The ETF strategy purchases a diversified basket of ETFs and simultaneously writes (sells) call options against each position in order to seek cumulative price appreciation from the portfolio's global exposure, while generating an additional income stream from the sale of covered calls. The ETF may also purchase protective puts to reduce the downside risk.

Investors in VEGA Core Plus benefit from the lower costs and operational efficiencies of a pooled investment vehicle, coupled with participation in an actively

managed portfolio. In addition, the VEGA Core Plus strategy comprises separate satellite investments selected by Partnervest as part of its proprietary qualitative and quantitative investment process. Securities selected as satellites are intended to capitalize on investment opportunities that arise as a result of economic or financial conditions.

STAR™ III - Structured Target Returns

STAR™ III comprises Partnervest's proprietary directly managed investment strategies. Currently, there are four strategies within STAR™ III; Alpha, VEGA and VEGA Enhanced.

STAR™ III Alpha

The Alpha Strategy combines three non-correlated Exchange Traded Funds (ETF's), Exchange Traded Notes (ETN's), and other securities or options on these securities (collectively "securities") in the same portfolio, seeking to ensure the protection of principal across all market cycles. In attempting to achieve this goal, a majority of the assets are placed in a fixed income security using the iShares 20+ year Treasury Bond ETF (TLT) or similar securities. A portion of the account is provided market appreciation potential from both the S&P 500 and Gold securities, or other securities, while at the same time seeking to reduce the price volatility. There may be times when an account does not purchase all desired securities, for example when Partnervest deems a particular security to be overvalued or trading at a premium. There may also be times when more than three securities are purchased in order to achieve the objectives of the strategy.

Alpha is designed to generate quarterly income from options. Call options are sold on the securities held in the Account. As call option positions are closed and/or expire, a new strike price is calculated for each security and additional options on the underlying securities are sold.

As an alternative or in addition to purchasing securities and selling covered call options, Partnervest may sell cash-secured puts as a means to receive income premium. Partnervest, at its discretion, may also utilize the purchase of puts.

STAR™ III VEGA

The STAR III VEGA strategy is managed by a subadvisor to Partnervest, Cinque Partners, LLC. The VEGA strategy consists of Exchange Traded Funds (ETF's), Exchange Traded Notes (ETN's) or other securities (collectively "securities") designed to mimic certain global indices. There may be times when an account does not purchase all desired securities.

Call options are sold on the securities held in the Account. As call option positions are closed and/or expire, a new strike price is calculated for each security and additional options on the underlying securities are sold. As an alternative or in addition to purchasing securities and selling covered call options, Partnervest may sell cash-secured puts as a means to receive income.

VEGA is designed to generate quarterly income in the form of premiums received from the sale of covered calls and/or cash-secured puts. Certain premium amounts may be required for transactional and portfolio management purposes, or a client specific request for systematic withdrawals of income. The default choice for premium accumulation is a money market fund or FDIC deposit sweep account selected by Partnervest.

The Principal Protection feature is intended as a means to protect against potential price declines of 20% or greater in the client's VEGA Enhanced Account. The cost of the protection is expected to be derived from accumulated option premium but principal may be used. The use of this enhancement entails the purchase of put options on a security representing some or all of the market holdings of a client's Account.

STAR™ III VEGA Enhanced

The VEGA Enhanced strategy consists of an equally-weighted portfolio of Exchange Traded Funds (ETF's), Exchange Traded Notes (ETN's) or other securities (collectively "securities") designed to mimic certain global indices. There may be times when an Account does not purchase all desired securities. Call options are sold on the securities held in the Account. As an alternative or in addition to purchasing securities and selling covered call options, Partnervest may sell cash-secured puts as a means to receive income premium while setting a lower underlying security purchase price.

VEGA Enhanced is designed to generate quarterly income in the form of premiums received from the sale of covered calls and/or cash-secured puts.

The Principal Protection feature is intended as a means to protect against potential price declines of 20% or greater in the client's VEGA Enhanced Account. The cost of the protection is expected to be derived from accumulated option premium but principal may be used. The use of this enhancement entails the purchase of put options on a security representing some or all of the market holdings of a client's Account.

Except for premium amounts required for transactional and portfolio management purposes, Partnervest, in its discretion, will allocate the accumulated premium in the VEGA Enhanced strategy which includes Principal Protection, and may include Reinvestment Option Elections described below if selected by client on the Investment Policy Guideline.

1) Treasury Option Income Election: Periodic reinvestment of accumulated premium into the representative Treasury ETF, and sale of periodic call options on the same.

2) Volatility-Based Reinvestment Election: May be implemented on a systematic or periodic basis, by reinvesting accumulated option premium back into the underlying VEGA Enhanced account as the level of implied volatility rises and/or securities' prices decline. The CBOE Volatility Index (VIX) is used as a measure of current volatility.

Except for premium amounts required for transactional and portfolio management purposes, Partnervest usually does not reinvest the premium back into the original securities, unless client requests one of the elections described below. In normal circumstances, the use and/or investment of accumulated premium is determined by client selected Reinvestment Option elections. Unless otherwise specified, the default choice for premium accumulation is a money market fund or FDIC deposit sweep account selected by Partnervest. Due to minimum 100 share lot purchase requirement per security, total account equity per Account can be a factor considered by Partnervest when determining premium reinvestment elections.

As stated above, the STAR™ II and STAR™ III Accounts use Exchange Traded Funds ("ETFs"). Although ETFs are typically registered under the Investment Company Act of 1940, similar to a mutual fund, ETFs differ from traditional mutual funds. In particular, an ETF is listed on a securities exchange and can be bought and sold during the trading day similar to equity securities. In addition, ETFs may be traded at a premium or discount to their net asset value. Many ETFs that invest in commodities are not registered under the Investment Company Act of 1940.

The STAR™ III programs also invest in Exchange Traded Notes ("ETNs"). An ETN is a senior, unsecured, unsubordinated debt security issued by an underwriting bank. An ETN is designed to track the performance of a market index or benchmark, less investor fees. ETNs are traded on an exchange at the prevailing market price; they are not mutual funds and they do not have a net asset value. Similar to other debt securities, ETNs have a maturity date and are backed only by the credit of the issuer. Payments upon maturity are dependent upon the issuer's ability to pay and the value of an ETN will be negatively impacted if there is a reduction in the credit rating of the issuer.

The STAR™ III Account requires margin approval (non-qualified accounts only). Client will be required to sign a margin approval form to receive the approval. There are additional risks associated with margin borrowing including; greater losses if the securities on margin go down in value and greater gains if the securities on margin go up in value.

STAR™ II -VEGA Core Plus

The STAR II VEGA Core Plus strategy is managed by Fusion Investment Group, LLC, a subadvisor to Partnervest. In its role as subadvisor to Partnervest, Fusion provides regular and continuous supervisory management services for some or all of Partnervest's client assets invested in the Core Plus strategy. This includes full discretion to determine what investments shall be purchased, sold, or exchanged and what portion of assets shall be held not invested, in accordance with the client's Investment Advisory Agreement, suitability information, and Investment Policy Guidelines, as well as the subadvisory agreement signed with Partnervest. Fusion will determine which broker dealers will effect transactions, seeking best execution.

The Core Plus STAR II strategy seeks long-term growth of capital, a steady income stream, and is designed to minimize costs and reduce volatility. The portfolio consists of a non-traditional "core" comprised of an ETF that contains a diversified basket of ETFs, that may be managed by Partnervest, surrounded by a select group of actively managed satellite and fixed-income investments. The ETF strategy purchases a diversified basket of ETFs and simultaneously writes (sells) call options against each position in order to seek cumulative price appreciation from the portfolio's global exposure, while generating an additional income stream from the sale of covered calls. The ETF may also purchase protective puts to reduce the downside risk.

Investors in VEGA Core Plus benefit from the lower costs and operational efficiencies of a pooled investment vehicle, coupled with participation in an actively managed portfolio. In addition, the VEGA Core Plus strategy comprises separate satellite investments selected by Partnervest as part of its proprietary qualitative and quantitative investment process. Securities selected as satellites are intended to capitalize on investment opportunities that arise as a result of economic or financial conditions.

Investment Characteristics

Clients need to be aware that investing in securities involves risk of loss that the client needs to be prepared to bear. Risks related to investing include, but are not limited to, the possible loss of principal. The risk of specific investments and strategies are described below.

Margin Accounts

If an account is approved for trading on margin and the client enters into a margin agreement with the account custodian, the client will be charged margin interest on any credit extended to or maintained by the client. SPF will retain a portion of any margin interest charged for accounts custodied at Pershing on behalf of CFS. . This interest charge is in addition to the annual investment advisory fee charged. Moreover, the total account value including the margined securities is used to determine the annual advisory fee.

Clients should be aware that borrowing on margin involves additional risks. Margin borrowing will result in increased gain if the value of the securities go up, but will result in increased losses if the value of the securities in the account go down. The custodian, acting as the client's creditor, will have the authority to liquidate all or part of the account to repay any portion of the margin loan, even if timing would be disadvantage to the client.

Option Trading

Partnervest employs the use of options in its management strategy and, thus, all STAR™ III Accounts must be approved for option trading. Option trading may be highly speculative in nature. On certain days, option trading may cease which could result in financial loss. The risks of covered call writing include the potential for the market to rise sharply. Writing or selling an option contract (such as call, put, or straddle) without depositing the underlying security, the risk of loss is potentially unlimited. The risks of cash-secured put writing include when the underlying security declines significantly and the put writer is assigned, the purchase price for the shares can be above current market price. The client must be willing and able to assume the financial risks and hazards of option trading. The risk of buying long puts is limited to the loss of the premium paid for the purchase of the put. Option Transactions are subject to the rules, regulations, customs, and usages of The Options Clearing Corporation and of the registered national securities exchange, national securities association, clearing organization, or market where such transaction was executed.

Structured Products

The risks associated with many structured products, especially those products that present risks of loss of principal due to market movements, are similar to those risks involved with options. In the case of a "principal protected" product, these products may only be insured by the issuer, and thus have the potential for loss of principal in the case of solvency problems with the issuing company. Additionally, there may be a relative lack of liquidity due to the highly customized nature of the investment.

Exchange Traded Funds

ETFs are typically registered investment companies whose shares represent an interest in a portfolio of securities that track an underlying benchmark or index. Unlike traditional mutual funds, shares of ETFs typically trade throughout the day on a securities exchange at prices established by the market. An ETF is only as good as the index it tracks. Equity-based exchange traded funds are subject to risks similar to those of stocks; fixed income-based ETFs are subject to risks similar to those of bonds. Investment returns will fluctuate and are subject to market volatility, so that an investor's shares, when redeemed or sold, may be worth more or less than their original cost. Foreign investments have unique and greater risks than domestic investments.

Performance

There is no assurance that any advisory program strategy will be successful or result in a profit for the client.

Item 9 – Disciplinary Information

SPF is required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of SPF or the integrity of SPF's management. SPF has no information applicable to this Item.

Item 10 – Other Financial Industry Activities and Affiliations

SPF is a registered broker-dealer and a member of FINRA (CRD 127787). This is the primary business of SPF. In addition, a SPF is qualified to sell insurance products in California and various states. SPF has financial services agreements ("FSA") with other institutions that include banks whereby SPF provides advisory services to bank clients through Investment Advisory Representatives. Pursuant to the FSA, SPF shares a portion of advisory fees with the bank.

SPF entered into a services agreement for back office support with an affiliated entity, CUSO Financial Services, LP ("CFS") which is a FINRA broker/dealer and a SEC Registered Investment Advisor. SPF and CFS share some common owners and officers.

SPF recommends the service of a third party manager who has agreed to share a portion of its management fee with and/or provide additional advisory services and discounts ("benefits") to SPF as opposed to other managers who have not agreed to the same. IARs do not receive any of these fees. Compensation and benefits provided to SPF from third party managers may vary. The fees for such third party managed programs may be higher or lower than if clients directly obtained the services of the third party manager if available, or

if clients obtained the advisory services separately. Additionally, SPF currently offers IAR's enhanced benefits on advisory fees earned whereby IAR's may obtain non-cash benefits such as reimbursement of expenses to attend educational and sales conferences.

IARs may also be registered representatives with SPF. SPF conducts ongoing review of IAR commission and advisory fees to ensure suitability for source of funds for new advisory deposits. The focus of the review includes the IAR's past compensation on the advisory assets.

Item 11 – Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

SPF places significant value on ethical conduct for all advisory business. In addition to SPF's obligation to comply with the federal securities laws, SPF has also established a standard of business conduct required of all our Supervised Personnel in the SPF Code of Ethics. The SPF Code of Ethics is designed to protect clients by deterring misconduct and preventing fraud by reinforcing fiduciary principles that must govern the conduct of SPF and our personnel. An Adviser, as a fiduciary to its clients, is responsible for providing professional, continuous, and unbiased investment advice. Fiduciaries owe their clients a duty of honesty, good faith, and fair dealing. In order to ensure that our IARs and employees strictly adhere to the highest of conduct and integrity in conducting business on behalf of our clients, we require that each sign our Code of Ethics.

In addition, the Code of Ethics governs personal trading by each employee of SPF deemed to be an Access Person and is intended to ensure that securities transactions effected by Access Persons of SPF are conducted in a manner that avoids any actual or potential conflict of interest between such persons and clients of the adviser or its affiliates. SPF collects and maintains records of securities holdings and securities transactions effected by Access Persons. These records are reviewed to identify and resolve potential conflicts of interest.

SPF will furnish a copy of its Code of Ethics to clients upon request. Clients can contact their IAR or the SPF home office at 858-530-7900.

On occasion, IARs may recommend a security in which they or SPF own shares or have some other financial interest. When the IAR recommends a security, SPF's procedures require the IAR to determine that the investment is suitable to the client's needs and risk profile. In the event that a IAR wishes to buy or sell for himself/herself a security that has also been recommended to a client, the client's order(s) are given priority.

No agency cross transactions or principal trades will be effected in an advisory account.

Item 12 – Brokerage Practices

Depending on the advisory program selected by the client, the broker/dealer for execution of trades varies. There are three possible scenarios. First, SPF may require a specific broker/dealer as with CAM, STAR and SPF Asset Management Account. Second, the third party managers may select the broker/dealer. Third, clients may have the option to elect a broker/dealer as with AssetMark

SPF is also a broker/dealer, and in such capacity clears its securities transaction through Pershing, LLC. (“Pershing”). Pershing is a BNY Mellon company and is located at One Pershing Plaza, Jersey City, NJ 07399. For the CAM and STAR programs, SPF requires that the client appoint SPF as the broker/dealer for trade execution. The client should understand that not all advisors require their clients to direct brokerage. This presents a conflict of interest because of the clearing relationship between SPF and Pershing. By directing brokerage to SPF, SPF may not be able to achieve most favorable execution of client transactions, and this practice may cost the client more money.

SPF makes every reasonable attempt to obtain the best execution possible, but it may not be possible given the requirement to trade through Pershing. Best execution is the full range and quality of a broker's services in placing brokerage, encompassing not only the overall cost of a client's trade, but also qualitative factors such as the broker's areas of expertise, the price at which the trade was executed relative to other trades in the security, and the broker's integrity and responsiveness. To carry out this ongoing evaluation of best execution practices, the SPF Pricing and Best Execution Committee investigates and evaluates the costs and services available from other clearing or execution firms in an effort to secure lower trading costs and more efficient and accurate clearing services. As part of our obligation to providing our clients with exemplary service, our Committee regularly reviews SPF reports, and produces an annual best execution report that reviews execution quality and execution speed of SPF and its clearing firm.

In the CAM and STAR Programs, SPF is appointed sole and exclusive broker-dealer with respect to handling of securities transactions for client accounts as directed by the IAR. No agency cross transactions or principal trades will be effected in the CAM Program.

Advisor may combine orders into block trades when more than one account is participating in the trade. This blocking or bunching technique must be equitable and potentially advantageous for each such account (e.g. for the purposes of reducing brokerage commissions or obtaining a more favorable execution price). Block trading is performed when it is consistent with the duty to seek best execution and is consistent with the terms of Advisor's investment advisory agreements. Equity trades are blocked based upon fairness to client, both in the participation of their account, and in the allocation of orders for the accounts of more than one client. Allocations of all orders are performed in a timely and efficient manner. All managed accounts participating in a block execution receive the same

execution price (average share price) for the securities purchased or sold in a trading day. Any portion of an order that remains unfilled at the end of a given day will be rewritten on the following day as a new order with a new daily average price to be determined at the end of the following day. Due to the low liquidity of certain securities, broker availability may be limited. Open orders are worked until they are completely filled, which may span the course of several days. If an order is filled in its entirety, securities purchased in the aggregated transaction will be allocated among the accounts participating in the trade in accordance with the allocation statement. If an order is partially filled, the securities will be allocated pro rata based on the allocation statement. Advisor may allocate trades in a different manner than indicated on the allocation statement (non-pro rata) only if all managed accounts receive fair and equitable treatment.

ExpertPlan provides all transaction capability for Retirement Plans My Way™ and similar programs. The Plan Sponsor, through execution of the service agreement with ExpertPlan, will appoint MG Trust Company as the custodian of Plan assets. All transactions placed by Plan participants will be processed through Matrix Settlement and Clearing Services (MSCS). MG Trust and MSCS are subsidiaries of Matrix Capital Bank, but are not affiliated with ExpertPlan or SPF.

SPF does not have soft dollar arrangements.

Item 13 – Review of Accounts

For asset management accounts, each IAR is responsible for reviewing copies of periodic account statements and quarterly performance reports for his/her clients. The accounts are reviewed to ensure that the allocations and selected investments continue to fit the risk profile and investment objective of each client. Changes to asset allocations or investments are made when deemed appropriate by the IAR or the third party investment advisor responsible for managing the account as described in the relevant program description in Items 4 and 8 above.

SPF also reviews CUSO Asset Management (“CAM”) Direct and CAM Direct II Program accounts using exception reports triggered by various criteria such as number of trades, percent stock allocation, percent cash allocation, position concentration, and account performance. The reviews are conducted on a quarterly basis by Compliance Department Analysts. Analysts are not assigned a specific number of exceptions or accounts to review.

Financial planning services terminate upon delivery of the financial plan. Thus, there are no ongoing reviews conducted by SPF. However, Advisor offers clients the opportunity for reviews as desired. The client may also choose to engage SPF for subsequent services to review and update the written plan at any time due to major life events or changes in the economic environment. Upon re-engaging SPF for an updated plan, the client would enter

into a new investment advisory agreement for services. All financial planning updates or reviews are conducted by an IAR.

Clients will receive, at a minimum, quarterly account statements describing positions and activity. SPF does not provide the statements. All statements are provided by the custodian of the account. SPF urges you to carefully review such statements and compare such official custodial records to the account statements that we may provide to you. Performance reports are provided by the third party manager. For any month there is additional activity in the account, the client will receive monthly statements detailing that month's activity. Moreover, clients will receive quarterly performance reports detailing asset allocation and returns.

Item 14 – Client Referrals and Other Compensation

Solicitation Activities and Receipt of Referral Fee

SPF also acts as a solicitor for various third party investment advisors pursuant to solicitation agreements. In connection with these arrangements, SPF and IAR will receive solicitation compensation for referring clients to the third party investment advisors for investment advisory services. The amount of compensation is disclosed to the client in writing at the time of the referral.

Other Compensation

SPF receives compensation (sometimes referred to as revenue sharing) from certain Third Party Advisors to assist in paying for ongoing marketing and sales support activities including, but not limited to, training, educational meetings, due diligence reviews, and day-to-day marketing and/or promotional activities. Not all Third Party Advisors pay such compensation. Participating Third Party Advisors may change over time. Current participating Third Party Advisors are: Curian, Envestnet, AssetMark, Morningstar, Partnervest and SEI.

The compensation arrangements vary, and may generally be structured as follows:

- A stated percentage of gross sales generally not exceeding .03% of gross sales with the Third Party Advisor.
- A stated percentage of assets under management generally not exceeding .02% of assets under management with the Third Party Advisor.
- A stated percentage of net cash flow generally not exceeding .04% net cash flow with the Third Party Advisor.
- A stated percentage of the management fee charged by the Third Party Advisor generally not exceeding 20%.

- A flat fee, fixed payment generally not exceeding \$20,000.
- A combination of the above.

A potential conflict of interest may exist where SPF receives such compensation because there may be an incentive to recommend these Third Party Advisors over other investment opportunities in order to generate additional revenue for the firm. However, our IARs are not required to recommend any Third Party Advisor providing additional compensation, nor do they directly share in any of this compensation.

Item 15 – Custody

Pershing, LLC serves as a qualified custodian of assets for all CAM, SPF Asset Management Account, and STAR advisory accounts. While SPF does not hold client funds or securities, SPF assists in effecting client requests on behalf of Pershing, which deems SPF to have custody per the definitions of securities regulations. Such activity includes the withdrawal of advisory fees, withdrawal or transfer of funds and securities from the account and transfers of funds and securities between SPF accounts requested by clients. Requests for withdrawals and account asset transfers to third parties must be made in writing by the client. Additionally, clients are reminded to make all checks and securities payable/endorsed to Pershing, the qualified custodian of the advisory program, and not to SPF.

Clients will receive at least quarterly statements from the broker-dealer, third party advisor or other qualified custodian that holds and maintains client's investment assets. See below for specific programs. SPF urges clients to carefully review such statements and compare such official custodial records to the account statements that we may provide to you. Our statements may vary from custodial statements based on accounting procedures, reporting dates, or valuation methodologies of certain securities. Please keep in mind that these reports do not take replace the official statements received from the custodian of your Program account assets.

CAM

Clients will receive statements Pershing monthly and quarterly performance reports from Envestnet. For accounts opened after January 1, 2013 clients will receive a monthly statement from Pershing and access to an online quarterly performance report produced by Envestnet.

ExpertPlan

The custodians vary depending on the program selected. Plan Sponsor and Plan participants can view account information (i.e., account balances, transactions, and performance) via the

online system made available by ExpertPlan. In addition, ExpertPlan provides the Plan Sponsor and Plan participants with a statement at the address of record maintained on the system on an annual basis.

AssetMark

For the AssetMark program, clients may elect one the following custodians: Pershing, Asset Mark Trust and TD Ameritrade. Statements may be monthly or quarterly depending on the selected custodian. AssetMark provides a quarterly performance report.

SEI

SEI will act as the custodian of assets. Clients will receive monthly account statements and quarterly performance reports.

SPF Asset Management Account

Clients will receive statements from the custodian either monthly or quarterly depending on whether there is activity in the account. Clients will also receive quarterly performance reports from Pershing.

STAR

SPF will be listed on the STAR account as broker/dealer of record. Clients will receive periodic accounts statements directly from Pershing on a monthly or quarterly basis, depending on activity. Clients will receive quarterly performance reports from Partnervest.

Item 16 – Investment Discretion

SPF does not exercise discretion over client assets. Third party advisors may be granted the authority to select investments for customers on a discretionary basis. Discretionary authority includes the authority to determine the security and the amount to be bought or sold without obtaining the prior consent of the client. This discretionary authority is obtained by the third party as part of a written client agreement and is signed by the client.

Item 17 – Voting Client Securities

Neither SPF nor the IAR will vote proxies for any advisory program. Clients retain the responsibility for receiving and voting proxies for any and all securities maintained in client portfolios except on CAM separate managed accounts under which a client may elect to have proxies voted by the designated separate account manager. For the CAM UMA Program, the client may elect to have proxies voted by Envestnet.

Clients will receive proxy solicitations from their custodian and/or transfer agent. Clients should contact the person identified by the issuer in the proxy materials with any questions about a particular solicitation.

Item 18 – Financial Information

Registered investment advisors are required in this Item to provide you with certain financial information or disclosures about SPF's financial condition. SPF has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to clients, and has not been the subject of a bankruptcy proceeding.
