Item 4. Advisory Business

A. Description of Your Advisory Firm

Pactolus Private Wealth Management, LLC ("Pactolus" and/or the "firm"), is organized as a Delaware limited liability company and is principally owned by Pactolus Holdings, LLC ("PH"). Alan Harter is the Managing Member of Pactolus, which is an investment adviser offering fee-based personalized family office advisory services to a select group of families and individuals, high-net-worth individuals, related trusts, charitable entities, investment companies, corporations, and other business entities. Pactolus has been providing services since January 2011.

B. Description of Advisory Services Offered

Pactolus's advisory services may include financial planning, investment strategy, portfolio management, estate planning, financial administration, and project consulting.

Pactolus has four primary service offerings, which include:

- Financial Planning & Administration
- Investment Advisory
- Investment-Related Tax Planning
- Concierge

B.1. Financial Planning & Administration Services

The client will receive a written or oral report (depending on the client's preference) that provides a detailed financial plan designed to help achieve the client's stated financial goals and objectives. Based on the client's needs, financial planning services may include (but are not limited to) the following:

- Preparation of a consolidated assessment of financial condition, which may include:
 - annual budgeting
 - cash flow monitoring
 - account reconciliations
 - personal financial statement preparation
 - debt management
- Establishment of objectives over relevant time frames, which may include:
 - retirement objectives
 - philanthropy
 - estate planning
 - wealth transition
 - other related issues

- Preparation of a recommended asset allocation that serves to diversify the client's portfolio among different categories of investments, such as:
 - small, medium, and large capitalization securities
 - corporate and government fixed income (short-, intermediate-, and long-term maturities)
 - developed international and emerging market securities (i.e., foreign issuers)
 - such other asset categories that are suitable in light of the client's investment goals, objectives, and risk tolerance
- Preparation of a retirement plan that serves to identify whether the client is saving enough and investing in a way that meets retirement objectives in light of the client's financial circumstances and risk tolerance.
- Risk analysis and preparation of an insurance plan to meet the needs of the client, taking into account family, business, and other financial objectives of the client.
- Liability management, which entails creating a portfolio of assets that can be appropriately matched as to liquidity, timing, and safety to retire liabilities at applicable due dates.
- In coordination with the client's team of specialized advisors (estate attorneys, CPAs, etc.), Pactolus may prepare an estate plan to ensure wealth transition, tax, and related issues are met in accordance with the client's wishes. In many instances, Pactolus may need to refer clients to outside counsel if they do not have a relationship with the requisite expert (accountant, attorney, etc.) needed to create a plan and draft documents pertaining to one or more of the following planning services as well as others that may be needed:
 - Estate planning
 - Estate administration
 - Charitable/philanthropic planning
 - Advice on wills and trust agreements
 - Business succession planning
 - Retirement and distribution planning

Pactolus gathers required information through in-depth personal interviews and questionnaires. Information gathered includes the client's current financial status, investment objectives, future goals, and attitudes toward risk. Related documents supplied by the client are carefully reviewed, and a report may be prepared covering one or more of the above-mentioned topics as directed by the client. Financial planning and administrative services may be offered on a stand-alone basis.

B.2. Investment Advisory Services

Pactolus provides clients with multi-family office advisory services, which includes holistic balance sheet management when applicable. The investment advisory service provided by Pactolus may include an allocation to traditional investments such as stocks, bonds, mutual funds, separately managed accounts, etc., and may include an allocation to alternative investments such as private equity, hard money lending, hedge funds, precious metals, etc.

Should Pactolus encounter a client need that is outside the scope of our expertise, we may engage the assistance of outside counsel. For example, if we are reviewing private equity opportunities in commercial real estate, Pactolus may seek additional guidance from experts with experience specific to the market opportunity being reviewed.

Resulting from our due diligence review, we may identify situations where our client would benefit from an introduction to other Pactolus clients or outside advisors, which we may facilitate upon receiving permission from the respective parties. Further, Pactolus may encounter situations where specific clients may be interested in participating in "Club Deals." Pactolus will assist clients in the due diligence process of reviewing and executing specific opportunities that may arise.

In addition to providing Pactolus with information regarding their personal financial circumstances, investment objectives and tolerance for risk, clients are required to provide the firm with any reasonable investment restrictions that should be imposed on the management of their portfolio, and to promptly notify the firm of any changes in such restrictions or in the client's personal financial circumstances, investment objectives, goals and tolerance for risk. Pactolus meets with clients at least annually to discuss the client's financial situation and determine whether there have been any changes in a client's personal financial circumstances, investment objectives and tolerance for risk.

B.3. Tax Planning Services

Pactolus will provide assistance and work with clients' tax specialists in helping structure investment strategies that are designed to maximize after-tax returns and to otherwise ensure optimal tax efficiency. These services may include the following:

- Annual tax planning (with tax advisor)
- Harvesting investment gains or losses for tax efficiency
- Estate and fiduciary tax planning
- Tax planning for client's charitable foundation

B.4. Concierge Services

Pactolus may provide one or more of the following concierge services as mutually agreed upon with the client. Pactolus provides assistance to the client and coordinates the activities enumerated below with the client and any third parties, specialists, or contractors hired by the client. Pactolus may engage a third-party service provider to provide certain services requested by the client, such as bill payment and related services. Other than having custody as the General Partner of a private fund, Pactolus does not act as the client's agent or take custody of assets. (See Item 5.B. of this Brochure.) The following services will be provided by Pactolus:

- Multiple household management
 - Occupancy preparation
- Management of household inventories & appraisal of valuables
- Coordination of property & casualty insurance
- Project management

- General contractor oversight
- Assistance with personal property acquisition/disposition
- Other concierge services as mutually agreed upon with the client

B.5. Structured Products - Loan Recommendation and Due Diligence Services

Pactolus may perform initial due diligence and ongoing monitoring services on certain structured products which will primarily consist of loans to residential or commercial real estate developers ("borrower"). Pactolus may recommend to appropriately suited clients that they make short to intermediate term loans to such borrower. Generally, such loans would be used as operating and or development capital by the borrower and would generally remain outstanding for a period of six to twenty-four months. Pactolus does not guarantee repayment of such loans by the borrower. Clients should be aware that Pactolus has an economic incentive to recommend such loans because the fee for monitoring such loans is higher than the Pactolus standard investment advisory fee.

B.6. Real Estate Services

Pactolus may provide real estate services to its advisory clients. Services include the following:

- Identify, from time to time, real estate investment opportunities for the client's consideration, including but not limited to unimproved land suitable for residential and/or commercial development, and income-producing residential and/or commercial properties, whether located in or outside the United States (each, a "property" and collectively, the "properties").
- Perform financial due diligence on each property to assist the client in determining the potential economic opportunity presented by acquiring the property. This financial due diligence includes an analysis of the acquisition cost, taxes, income (current or potential), operating expenses, depreciation, and other items Pactolus in its sole discretion deems appropriate.
- Analyze the development potential of each property or, if currently income producing, the viability of current or alternative uses of the property.
- Visually inspect each property in connection with the client's acquisition of a property. The client will bear the reasonable travel and other expenses incurred by Pactolus in performing these inspections.
- Retain service providers, which generally will be independent third parties unless otherwise approved by client, to the extent Pactolus deems necessary or appropriate in performing the services hereunder and/or in connection with the acquisition, disposition, or other transaction relating to any property. The cost of such service providers will be borne by the client, unless otherwise agreed to by Pactolus, and will be explained to the client in advance of the services being performed.
- Provide the client with periodic reports on each property acquired by the client as Pactolus deems appropriate in its sole discretion, unless the client requests and Pactolus agrees to a specific form or frequency of report.

C. Client-Tailored Services and Client-Imposed Restrictions

Each client's account will be managed on the basis of the client's financial situation and investment objectives, and in accordance with any reasonable restrictions imposed by the client on the management of the account.

D. Wrap Fee Programs

Pactolus sponsors and acts as a portfolio manager in its proprietary wrap fee program. Please refer to Appendix 1: Pactolus Wrap Fee Program Brochure for information.

E. Client Assets Under Management

As of December 31, 2014, Pactolus has \$269,189,819 of discretionary and \$70,237,058 of non-discretionary assets under management.

Item 5. Fees and Compensation

A. Methods of Compensation and Fee Schedule

A.1. Advisory Fees for Comprehensive Services

Pactolus will generally provide clients with a full range of services in exchange for an asset-based fee computed on the value of managed assets as mutually agreed upon with the client and Pactolus. Pactolus's fee schedule is itemized below and is computed on the basis of the value of managed assets, payable in advance, and computed on the last business day of the preceding quarter.

The quarterly fee is charged at one-fourth the specified annual rate. The initial quarterly fee is payable on the date the account is considered accepted (all client assets are in and the client and Pactolus mutually agree on the date of acceptance) and is computed on the value of managed assets on the date of such account acceptance. A pro rata refund will be made for clients who terminate services otherwise than at quarter end. The client may terminate an individually managed account by giving 30 days' written notice. As noted in the schedule below, the fee charged on assets in excess of \$25 million will be negotiated with the specific client. In addition, Pactolus may negotiate a modified fee schedule based upon certain criteria (e.g., level of service required, anticipated future assets, associated accounts, portfolio composition, etc.).

Accounts Managed By Third-Party Advisors (SMAs)

Equity Accounts Less Than \$2,000,000	0.50 %
Equity Accounts \$2,000,000 or Greater	0.35 %
Fixed Income Accounts Less Than \$2,000,000	0.25 %
Fixed Income Accounts \$2,000,000 or Greater	0.20 %
Specialized Accounts: (for example, options accounts that are billed on the notional value of the option contracts) will incur a customized fee pursuant to the pricing agreement between Pactolus and the specialized third party advisor.	

Pactolus Advised Accounts

Pactolus Advisory Accounts Less Than \$10,000,000	0.75 %
Pactolus Advisory Accounts \$10,000,000 or Greater	0.50 %

Pactolus Advised Accounts – Fixed Income Only

Pactolus Advisory Accounts Less Than \$10,000,000	0.30 %
Pactolus Advisory Accounts \$10,000,000 or Greater	0.20 %

Please be advised that the fees for third-party separately managed accounts when added to the fees charged by Pactolus may be greater than those accounts managed by Pactolus. As such, it may be more economically advantageous for clients to select Pactolus as opposed to third-party managers, even though the third-party managers may provide superior investment services relative to those provided by Pactolus.

A.2. Financial Planning Fees

Financial planning fees (if no other services provided) will range from \$350 to \$500 per hour. In the absence of an hourly fee arrangement, a fixed fee mutually agreed upon by the client and Pactolus will be negotiated prior to signing an advisory agreement. Invoices will be mailed out on a periodic basis reflecting completed work performed. Clients seeking to terminate this service must do so in writing.

A.3. Private Fund Advisory Fees

Asset-based advisory fees for affiliate feeder private funds are currently charged to the applicable private fund and disclosed in such private fund offering documents. Pactolus's advisory fees are in addition to any master fund with which Pactolus affiliate feeder private funds invest. Please note that Pactolus excludes any investment in an affiliate private fund from its advisory fee calculation detailed in Item 5.A.1. above.

In addition, for affiliate feeder funds, Pactolus may charge advisory clients a due diligence fee that would be prorated amongst all Pactolus advisory clients participating in such fund. Such due diligence fee is in addition to the advisory fees detailed in Item 5.A.1. above. Due diligence fees concerning a particular fund are described either in the offering materials or a separate written addendum to the advisory agreement requiring client written acknowledgment.

For certain funds in which Pactolus may recommend an investment to advisory clients, Pactolus charges an advisory fee referenced in Item 5.A.1 above and may charge a due diligence fee which is paid by the issuer. Please be advised this may be viewed as a conflict of interest in that payment of the due diligence fee by the issuer to Pactolus may create an economic incentive for Pactolus to recommend to advisory clients an investment in such fund. Compensation arrangements and specific disclosure concerning a particular fund are further disclosed either in the offering materials or an addendum to the advisory agreement requiring client written acknowledgment.

In addition to the advisory and due diligence fees discussed above, Pactolus may earn performance-based fees as further described in Item 6 of this brochure.

Please be advised that partnership interests are valued in accordance with the criteria detailed in the applicable offering documents and are subject to both subjective and objective valuation criteria. As such there may be an economic incentive for the manager and adviser of such feeder and master funds, including Pactolus, to value such investments as high as possible.

A.4. Structured Products - Loan Recommendation and Due Diligence Services Fees

Pactolus will charge an annual 2% fee billed quarterly in arrears on the outstanding balance of the loan at the end of the billing quarter. Clients should be aware that Pactolus has an economic incentive to recommend such loans versus other available investments because the fee for monitoring such loans is higher than the Pactolus standard investment advisory fee.

A.5. Real Estate Services Fees

Due to the highly customized nature of the service offering, fees are negotiated between the client and Pactolus prior to the commencement of services and are described in either the client advisory agreement or an addendum to the advisory agreement which requires the client's written acknowledgment.

B. Client Payment of Fees

Pactolus will deduct fees directly from the client's account provided that (i) the client provides written authorization, and (ii) the qualified custodian sends the client a statement, at least quarterly, indicating all amounts disbursed from the account.

In certain instances subject to approval by Pactolus, clients may elect to be billed for services rendered. In such cases the fees will be billed quarterly. In the event of termination any unearned, prepaid fees will be immediately due and payable and any earned, unpaid fees will be immediately due and payable.

The client is responsible for verifying the accuracy of the fee calculation, as the client's custodian will not verify the calculation.

C. Additional Client Fees Charged

The fees charged by Pactolus do not include fees charged by any mutual fund or separate account manager selected by the client or in any privately pooled investment vehicle. Similarly, the fees charged by Pactolus do not include any fees charged by a broker-dealer or custodian retained by a client to implement Pactolus's advice or to otherwise hold the client's portfolio securities. The management fees for investment managers are generally disclosed in each investment manager's disclosure brochure and brochure supplement or, in the case of a mutual fund, the fund's prospectus, or in the case of the privately pooled investment vehicle, the confidential private placement memorandum and applicable subscription documents. Clients are advised to read these materials carefully before investing. If a mutual fund also imposes sales charges, a client may pay an initial or deferred sales charge as further described in the mutual fund's prospectus. A client may be precluded from using certain mutual funds or separate account managers because they may not be offered by the client's custodian. For its real estate services, the client will bear the reasonable travel and other expenses incurred by Pactolus in performing the due diligence inspections.

See Item 12 of this Brochure for a more detailed discussion on brokerage arrangements.

D. Prepayment of Client Fees

Pactolus requires the prepayment of its asset-based investment advisory fees on a quarterly basis. If the client terminates during the quarter, Pactolus will promptly refund any prepaid, unearned fees. Pactolus's fees will either be paid directly by the client or disbursed to Pactolus by the qualified custodian of the client's investment accounts, subject to prior written consent of

the client. The qualified custodian will deliver directly to the client an account statement, at least quarterly, showing all investment and transaction activity for the period, including fee disbursements from the account.

Pactolus or the client may terminate the agreement for services within five days of the date of acceptance without penalty to the client. After the five-day period, either party, upon 30 days' written notice to the other, may terminate the agreement. In the event of termination, Pactolus's fees will be prorated for the quarter in which the cancellation notice was given, and any prepaid, unearned fees will be refunded to the client.

E. External Compensation for the Sale of Securities to Clients

Pactolus's advisory professionals are compensated primarily through a salary and bonus structure. Pactolus's advisory professionals may receive commission-based compensation for the sale of insurance products. Please see Item 10.C. for detailed information and conflicts of interest.

Although Pactolus is not paid any sales, service, or administrative fees for the sale of mutual funds or any other investment products, the firm or its affiliates may be paid management fees and performance-based fees. Such performance-based fees create an economic incentive for the investment manager to take additional risks in the management of a client portfolio that may be in conflict with the client's current investment objectives and tolerance for risk. Please refer to Item 6 for more information on performance-based fees.

Item 6. Performance-Based Fees and Side-by-Side Management

Pactolus may receive performance fees from funds as described in the applicable funds' offering documents or as otherwise contained in the client's advisory agreement and addendum, if applicable.

Pactolus may charge performance-based fees to qualified investors who are defined as:

- A natural person who or a company that immediately after entering into the contract has at least \$1,000,000 under the management of the investment adviser;
- A natural person or a company that the investment adviser entering into the contract (and any person acting on his behalf) reasonably believes, immediately prior to entering into the contract, either:
 - Has a net worth (together, in the case of a natural person, with assets held jointly with a spouse) of more than \$2,000,000 at the time the contract is entered into, exclusive of the value of their primary residence; or
 - Is a qualified purchaser as defined in section 2(a)(51)(AA) of the Investment Company Act of 1940 (15U.S.C. 80a-2(51)(A)) at the time the contract is entered into; or
 - A natural person who immediately prior to entering into the contract is:
 - An executive officer, director, trustee, general partner, or person serving in similar capacity of the investment adviser; or
 - An employee of the investment adviser (other than an employee performing solely clerical, secretarial, or administrative functions with regard to the investment adviser) who, in connection with his or her regular functions or duties, participates in the investment activities of such investment adviser, provided that such employee has been performing such functions and duties for or on behalf of the investment adviser, or substantially similar functions or duties for or on behalf of another company for at least 12 months.

Performance-based fees for the applicable fund are set forth in the fund's offering materials. Performance-based fees may create an incentive for the adviser of such funds to take additional risks in order to create higher investment returns and advisory fees. Please review the fund offering document for additional risk disclosure.

Item 7. Types of Clients

Pactolus offers personalized family office advisory services to a select group of families and individuals, high-net-worth individuals, related trusts, charitable entities, investment companies, corporations, and other business entities. There are no minimum criteria imposed by Pactolus.

In addition, Pactolus offers advisory services to affiliate private funds. The minimum investment for such funds is \$250,000 and can only be offered to accredited investors as defined in Regulation D of the Securities Act of 1933 or to qualified purchasers as defined under Section 3(c)7 of the Investment Company Act of 1940.

Item 8. Methods of Analysis, Investment Strategies, and Risk of Loss

A. Methods of Analysis and Investment Strategies

Pactolus uses a variety of sources of data to conduct its economic, investment and market analysis, such as financial newspapers and magazines, economic and market research materials prepared by others, conference calls hosted by mutual funds, corporate rating services, annual reports, prospectuses, and company press releases. It is important to keep in mind that there is no specific approach to investing that guarantees success or positive returns; investing in securities involves risk of loss that clients should be prepared to bear.

Pactolus and its investment adviser representatives are responsible for identifying and implementing the methods of analysis used in formulating investment recommendations to clients. The methods of analysis may include quantitative methods for optimizing client portfolios, computer-based risk/return analysis, technical analysis, and statistical and/or computer models utilizing long-term economic criteria.

- Optimization involves the use of mathematical algorithms to determine the appropriate mix of assets given the firm's current capital market rate assessment and a particular client's risk tolerance.
- Quantitative methods include analysis of historical data such as price and volume statistics, performance data, standard deviation and related risk metrics, how the security performs relative to the overall stock market, earnings data, price to earnings ratios, and related data.
- Technical analysis involves charting price and volume data as reported by the exchange where the security is traded to look for price trends.
- Computer models may be used to attempt the future value of a security based on assumptions of various data categories such as earnings, cash flow, profit margins, sales, and a variety of other company specific metrics.

Pactolus may employ independent third parties to work in conjunction with its executive management team to provide input and guidance for the investment direction communicated by the firm. Such third-party providers will function as a de facto investment committee. In addition, Pactolus may utilize third-party software to assist in formulating investment recommendations to clients.

A.1. Mutual Funds, Exchange-Traded Funds ("ETFs"), Independent Investment Managers, Pooled Investment Vehicles, and Structured Products

Pactolus may recommend (i) separate account managers to manage client assets; (ii) no-load and load-waived mutual funds and individual securities (including fixed income instruments); and (iii) pooled investment vehicles, including funds sponsored, managed, and controlled by a Pactolus affiliate. Such management styles will include, among others, large-cap, mid-cap, and small-cap value, growth, and core; international and emerging markets; and alternative investments. Pactolus may also assist the client in selecting one or more appropriate manager(s) for all or a portion of the client's portfolio. Such managers will typically manage assets for clients

who commit to the manager a minimum amount of assets established by that manager—a factor that will be taken into account when recommending managers to clients.

A description of the criteria to be used in formulating an investment recommendation for mutual funds, ETFs, individual securities (including fixed-income securities), managers, and pooled investment vehicles is set forth below.

Pactolus has formed relationships with third-party vendors that

- provide a technological platform for separate account management
- prepare performance reports
- perform due diligence monitoring of mutual funds, managers, and pooled investment vehicles, specifically any master funds with which a Pactolus sponsored, managed, and controlled feeder fund invests
- perform billing and certain other administrative tasks

Pactolus may utilize additional independent third parties to assist in recommending and monitoring individual securities, mutual funds, managers, and pooled investment vehicles to clients as appropriate under the circumstances, specifically any master funds with which a Pactolus sponsored, managed, and controlled feeder fund invests.

Pactolus reviews certain quantitative and qualitative criteria related to mutual funds and managers to formulate investment recommendations to its clients. Quantitative criteria may include

- the performance history of a mutual fund or manager evaluated against that of its peers and other benchmarks
- an analysis of risk-adjusted returns
- an analysis of the manager's contribution to the investment return (e.g., manager's alpha), standard deviation of returns over specific time periods, sector and style analysis
- the fund, sub-advisor, or manager's fee structure
- the relevant portfolio manager's tenure

Qualitative criteria used in recommending mutual funds or managers include the investment objectives and/or management style and philosophy of a mutual fund or manager; a mutual fund or manager's consistency of investment style; and employee turnover and efficiency and capacity. Pactolus will discuss relevant quantitative and qualitative factors pertaining to its recommendations with clients prior to a client's determination to retain a mutual fund or manager.

Quantitative and qualitative criteria related to mutual funds and managers are reviewed by Pactolus on a quarterly basis or such other interval as mutually agreed upon by the client and Pactolus. In addition, mutual funds or managers are reviewed to determine the extent to which their investments reflect efforts to time the market, or evidence style drift such that their portfolios no longer accurately reflect the particular asset category attributed to the mutual fund or manager identified by Pactolus (both of which are negative factors in implementing an asset

allocation structure). Based on its review, Pactolus will make recommendations to clients regarding the retention or discharge of a mutual fund or manager.

Pactolus may negotiate reduced account minimum balances and reduced fees with managers under various circumstances (e.g., for clients with minimum level of assets committed to the manager for specific periods of time, etc.). There can be no assurance that clients will receive any reduced account minimum balances or fees, or that all clients, even if apparently similarly situated, will receive any reduced account minimum balances or fees available to some other clients. Also, account minimum balances and fees may significantly differ between clients. Each client's individual needs and circumstances will determine portfolio weighting, which can have an impact on fees given the funds or managers utilized. Pactolus will endeavor to obtain equal treatment for its clients with funds or managers, but cannot assure equal treatment.

Pactolus will regularly review the activities of mutual funds and managers selected by the client. Clients that engage managers or who invest in mutual funds should first review and understand the disclosure documents of those managers or mutual funds, which contain information relevant to such retention or investment, including information on the methodology used to analyze securities, investment strategies, fees, and conflicts of interest. Similarly, clients qualified to invest in pooled investment vehicles should review the private placement memoranda or other disclosure materials relating to such vehicles before making a decision to invest.

Pactolus has an extensive due diligence process regarding the hard money loans. Pactolus works with real estate specialists, routinely visits the sites, and has done background and reference checks on the developers. Pactolus has access to the annual financial statements of the developers. Pactolus consistently communicates with the real estate specialist and has periodic meetings with the developers to discuss current and future projects.

A.2. Material Risks of Investment Instruments

Pactolus will frequently purchase shares of open-end mutual funds and ETFs. Many of these investments can be purchased directly by clients without utilizing the services of an advisor. Registered investment companies charge their own management fees and expenses. These fees and expenses are detailed in each respective mutual fund's prospectus and are in addition to any fees charged by Pactolus.

In addition to purchasing shares of mutual funds and ETFs, Pactolus may effect transactions in the following types of securities:

- Equity securities
- Warrants and rights
- Mutual fund securities
- Exchange-traded funds
- Fixed income securities
- Corporate debt securities, commercial paper, and certificates of deposit
- Municipal securities
- U.S. government securities

- Private placements
- Pooled investment vehicles
- Structured products
- Option contracts on securities
- Option contracts on commodities
- Forward currency contracts

A.2.a. Equity Securities

Investing in individual companies involves inherent risk. The major risks relate to the company's capitalization, quality of the company's management, quality and cost of the company's services, the company's ability to manage costs, efficiencies in the manufacturing or service delivery process, management of litigation risk, and the company's ability to create shareholder value (i.e., increase the value of the company's stock price). Foreign securities, in addition to the general risks of equity securities, have geopolitical risk, financial transparency risk, currency risk, regulatory risk and liquidity risk.

A.2.b. Warrants and Rights

Warrants are securities, typically issued with preferred stock or bonds that give the holder the right to purchase a given number of shares of common stock at a specified price and time. The price of the warrant usually represents a premium over the applicable market value of the common stock at the time of the warrant's issuance. Warrants have no voting rights with respect to the common stock, receive no dividends, and have no rights with respect to the assets of the issuer.

Investments in warrants and rights involve certain risks, including the possible lack of a liquid market for the resale of the warrants and rights, potential price fluctuations due to adverse market conditions or other factors and failure of the price of the common stock to rise. If the warrant is not exercised within the specified time period, it becomes worthless.

A.2.c. Mutual Fund Securities

Investing in mutual funds carries inherent risk. The major risks of investing in a mutual fund include the quality and experience of the portfolio management team and its ability to create fund value by investing in securities that have positive growth, the amount of individual company diversification, the type and amount of industry diversification, and the type and amount of sector diversification within specific industries. In addition, mutual funds can be tax inefficient in certain circumstances, which may result in clients paying capital gains taxes on fund investments while not having yet sold the fund.

A.2.d. Exchange-Traded Funds ("ETFs")

ETFs are investment companies whose shares are bought and sold on a securities exchange. An ETF holds a portfolio of securities designed to track a particular market segment or index. Some examples of ETFs are SPDRs[®], streetTRACKS[®], DIAMONDSSM, NASDAQ 100 Index Tracking StockSM ("QQQsSM"), iShares[®] and VIPERs[®]. The funds could purchase an ETF to gain

exposure to a portion of the U.S. or foreign market. The funds, as a shareholder of another investment company, will bear their pro-rata portion of the other investment company's advisory fee and other expenses, in addition to their own expenses.

Investing in ETFs involves risk. Specifically, ETFs, depending on the underlying portfolio and its size, can have wide price (bid and ask) spreads, thus diluting or negating any upward price movement of the ETF or enhancing any downward price movement. Also, ETFs require more frequent portfolio reporting by regulators and are thereby more susceptible to actions by hedge funds that could have a negative impact on the price of the ETF. Certain ETFs may employ leverage, which creates additional volatility and price risk depending on the amount of leverage utilized, the collateral, and the liquidity of the supporting collateral.

Further, the use of leverage (i.e., employing the use of margin) generally results in additional interest costs to the ETF. Certain ETFs are highly leveraged and therefore have additional volatility and liquidity risk. Volatility and liquidity can severely and negatively impact the price of the ETF's underlying portfolio securities, thereby causing significant price fluctuations of the ETF.

A.2.e. Fixed Income Securities, Corporate Debt, Commercial Paper, and Certificates of Deposit

Fixed income securities carry additional risks than those of equity securities described above. These risks include the company's ability to retire its debt at maturity, the current interest rate environment, the coupon interest rate promised to bondholders, legal constraints, jurisdictional risk (U.S. or foreign) and currency risk. If bonds have maturities of 10 years or greater, they will likely have greater price swings when interest rates move up or down. The shorter the maturity the less volatile the price swings. Foreign bonds also have liquidity and currency risk.

Commercial paper and certificates of deposit are generally considered safe instruments, although they are subject to the level of general interest rates, the credit quality of the issuing bank, and the length of maturity. With respect to certificates of deposit, depending on the length of maturity there can be prepayment penalties if the client needs to convert the certificate of deposit to cash prior to maturity.

A.2.f. Municipal Securities

Municipal securities carry additional risks than those of corporate and bank-sponsored debt securities described above. These risks include the municipality's ability to raise additional tax revenue or other revenue (in the event the bonds are revenue bonds) to pay interest on its debt and to retire its debt at maturity. Municipal bonds are generally tax free at the federal level, but may be taxable in individual states other than the state in which both the investor and municipal issuer is domiciled.

A.2.g. U.S. Government Securities

U.S. government securities include securities issued by the U.S. Treasury and by U.S. government agencies and instrumentalities. U.S. government securities may be supported by the full faith and credit of the United States.

A.2.h. Private Placements

Private placements carry significant risk in that companies using the private placement market conduct securities offerings that are exempt from registration under the federal securities laws, which means that investors do not have access to public information and such investors are not provided with the same amount of information that they would receive if the securities offering was a public offering. Moreover, many companies using private placements do so to raise equity capital in the start-up phase of their business, or require additional capital to complete another phase in their growth objective. In addition, the securities issued in connection with private placements are restricted securities, which means that they are not traded on a secondary market, such as a stock exchange, and they are thus illiquid and cannot be readily converted to cash.

A.2.i. Pooled Investment Vehicles

A pooled investment vehicle, such as a commodity pool or investment company, is generally offered only to investors who meet specified suitability, net worth, and annual income criteria. Pooled investment vehicles sell securities through private placements and thus are illiquid and subject to a variety of risks that are disclosed in each pooled investment vehicle's confidential private placement memorandum or disclosure document. Investors should read these documents carefully and consult with their professional advisors prior to committing investment dollars. Because many of the securities involved in pooled investment vehicles do not have transparent trading markets from which accurate and current pricing information can be derived, or in the case of private equity investments where portfolio security companies are privately held with no publicly traded market, Pactolus may be unable to monitor or verify the accuracy of such performance information.

A.2.j. Structured Products

Structured products are designed to facilitate highly customized risk-return objectives. While structured products come in many different forms, they typically consist of a debt security that is structured to make interest and principal payments based upon various assets, rates, or formulas. Many structured products include an embedded derivative component. Structured products may be structured in the form of a security, in which case these products may receive benefits provided under federal securities law, or they may be cast as derivatives, in which case they are offered in the over-the-counter market and are subject to no regulation.

Investment in structured products includes significant risks, including valuation, liquidity, price, credit, and market risks. One common risk associated with structured products is a relative lack of liquidity due to the highly customized nature of the investment. Moreover, the full extent of returns from the complex performance features is often not realized until maturity. As such, structured products tend to be more of a buy-and-hold investment decision rather than a means of getting in and out of a position with speed and efficiency.

Another risk with structured products is the credit quality of the issuer. Although the cash flows are derived from other sources, the products themselves are legally considered to be the issuing financial institution's liabilities. The vast majority of structured products are from high

investment grade issuers only. Also, there is a lack of pricing transparency. There is no uniform standard for pricing, making it harder to compare the net-of-pricing attractiveness of alternative structured product offerings than it is, for instance, to compare the net expense ratios of different mutual funds or commissions among broker-dealers.

A.2.k. Options Contracts on Securities

Options entail greater risk but allow an investor to have market exposure to a particular security or group of securities without the capital commitment required to purchase the underlying security or groups of securities. In addition, options allow investors to hedge security positions held in the portfolio. For detailed information on the use of options and option strategies, please contact the Options Clearing Corporation for the current Options Risk Disclosure Statement.

A.2.l. Options Contracts on Commodities

Commodities are hard assets such as crops, minerals, or metals that are generally extracted from the ground. Investing in commodities carries significant risks that are predominantly out of anyone's control (e.g., acts of nature, geopolitical risk). Investing in commodities requires the use of margin leverage. In addition, commodities are subject to extreme price volatility, which can result in the investor losing more than the amount invested.

A.2.m. Futures Contracts

Futures are investment contracts that investors use to speculate on the future value of an underlying commodity or monetary instrument. Futures are highly speculative, involve the use of margin leverage, and like commodities can be subject to extreme price volatility.

B. Investment Strategy and Method of Analysis Material Risks

B.1. Margin Leverage

Although Pactolus, as a general business practice, does not utilize leverage, there may be instances in which exchange-traded funds, other separate account managers and, in limited circumstances, Pactolus will utilize leverage. In this regard please review the following:

The use of margin leverage enhances the overall risk of investment gain and loss to the client's investment portfolio. For example, investors are able to control \$2 of a security for \$1. So if the price of a security rises by \$1, the investor earns a 100% return on their investment. Conversely, if the security declines by \$.50, then the investor loses 50% of their investment.

The use of margin leverage entails borrowing, which results in additional interest costs to the investor.

Broker-dealers who carry customer accounts require a minimum equity requirement when clients utilize margin leverage. The minimum equity requirement is stated as a percentage of the value of the underlying collateral security with an absolute minimum dollar requirement. For example, if the price of a security declines in value to the point where the excess equity used to

satisfy the minimum requirement dissipates, the broker-dealer will require the client to deposit additional collateral to the account in the form of cash or marketable securities. A deposit of securities to the account will require a larger deposit, as the security being deposited is included in the computation of the minimum equity requirement. In addition, when leverage is utilized and the client needs to withdraw cash, the client must sell a disproportionate amount of collateral securities to release enough cash to satisfy the withdrawal amount based upon similar reasoning as cited above.

Regulations concerning the use of margin leverage are established by the Federal Reserve Board and vary if the client's account is held at a broker-dealer versus a bank custodian. Broker-dealers and bank custodians may apply more stringent rules as they deem necessary.

B.2. Option Strategies

Various option strategies give the holder the right to acquire or sell underlying securities at the contract strike price up until expiration of the option. Each contract is worth 100 shares of the underlying security. Options entail greater risk but allow an investor to have market exposure to a particular security or group of securities without the capital commitment required to purchase the underlying security or groups of securities. In addition, options allow investors to hedge security positions held in the portfolio. For detailed information on the use of options and option strategies, please contact the Options Clearing Corporation for the current Options Risk Disclosure Statement.

Pactolus as part of its investment strategy may employ the following option strategies:

- Covered call writing
- Long call options purchases
- Long put options purchases
- Option spreading
- Short call option strategy
- Short put option strategy
- Equity collars
- Long straddles

B.2.a. Covered Call Writing

Covered call writing is the sale of in-, at-, or out-of-the money call option against a long security position held in the client portfolio. This type of transaction is used to generate income. It also serves to create downside protection in the event the security position declines in value. Income is received from the proceeds of the option sale. Such income may be reduced to the extent it is necessary to buy back the option position prior to its expiration. This strategy may involve a degree of trading velocity, transaction costs and significant losses if the underlying security has volatile price movement. Covered call strategies are generally suited for companies with little price volatility.

B.2.b. Long Call Option Purchases

Long call option purchases allow the option holder to be exposed to the general market characteristics of a security without the outlay of capital necessary to own the security. Options are wasting assets and expire (usually within nine months of issuance), and as a result can expose the investor to significant loss.

B.2.c. Long Put Option Purchases

Long put option purchases allow the option holder to sell or “put” the underlying security at the contract strike price at a future date. If the price of the underlying security declines in value, the value of the long put option increases. In this way long puts are often used to hedge a long stock position. Options are wasting assets and expire (usually within nine months of issuance), and as a result can expose the investor to significant loss.

B.2.d. Option Spreading

Option spreading usually involves the purchase of a call option and the sale of a call option at a higher contract strike price, both having the same expiration month. The purpose of this type of transaction is to allow the holder to be exposed to the general market characteristics of a security without the outlay of capital to own the security, and to offset the cost by selling the call option with a higher contract strike price. In this type of transaction, the spread holder “locks in” a maximum profit, defined as the difference in contract prices reduced by the net cost of implementing the spread. There are many variations of option spreading strategies; please contact the Options Clearing Corporation for a current Options Risk Disclosure Statement that discusses each of these strategies.

B.2.e. Short Call Option Strategy

Short call option strategy is highly speculative and has theoretical potential for unlimited loss. The seller (writer) of the call option receives proceeds (premium) from the sale of the option. The expectation is that the value of the underlying security will remain below the contract strike price and the option will expire worthless, allowing the option writer to keep the entire amount of the sale proceeds (premium). Should the value of the underlying security increase above the contract strike price, then the option writer can either purchase the call option at a loss, or through a process of exercise and assignment be forced to sell the stock at the contract strike price. If this happens, the option writer will have to go in the open market and buy an equivalent amount of stock to cover the sale at prices that can be materially higher than the amount received from the sale.

B.2.f. Short Put Option Strategy

Short put option strategy is highly speculative and has theoretical potential for significant loss. The seller (writer) of the put option receives proceeds (premium) from the sale of the option. The expectation is that the value of the underlying security will remain above the contract strike price and the option will expire worthless, allowing the option writer to keep the entire amount of the sale proceeds (premium). Should the value of the underlying security decrease below the contract strike price, the option writer can either purchase the put option at a loss,

or through a process of exercise and assignment be forced to buy the stock at the contract strike price. If this happens, the option writer will be purchasing the underlying security at a price potentially well above its then-current market value, exposing the investor to potential loss.

B.2.g. Equity Collar

A collar combines both a cap and a floor. A cap gives the purchaser of the cap the right (for a premium payment), but not the obligation, to receive the difference in the cost on some amount when a specified index rises above the specified “cap rate.” A floor is the opposite of a cap—it gives the purchaser of the floor the right (for a premium payment), but not the obligation, to receive the difference in interest payable on an amount when a specified index falls below the specified “floor rate.” A collar involving stock is called an “equity collar.”

B.2.h. Long Straddle

A long straddle is the purchase of a long call and a long put with the same underlying security, expiration date, and strike price. This is a speculative trade that may be profitable when volatility is high and will result in a loss when prices of the underlying security are relatively stable.

C. Security-Specific Material Risks

There is an inherent risk for clients who have their investment portfolios heavily weighted in one security, one industry or industry sector, one geographic location, one investment manager, one type of investment instrument (equities versus fixed income). Clients who have diversified portfolios, as a general rule, incur less volatility and therefore less fluctuation in portfolio value than those who have concentrated holdings. Concentrated holdings may offer the potential for higher gain, but also offer the potential for significant loss.

Item 9. Disciplinary Information

A. Criminal or Civil Actions

There is nothing to report on this item.

B. Administrative Enforcement Proceedings

There is nothing to report on this item.

C. Self-Regulatory Organization Enforcement Proceedings

There is nothing to report on this item.

Item 10. Other Financial Industry Activities and Affiliations

A. Broker-Dealer or Representative Registration

Neither Pactolus nor its investment advisor representatives are either registered as broker-dealers or registered representatives of broker-dealers and do not have an application to register pending.

B. Futures or Commodity Registration

Neither Pactolus nor its affiliates are registered as a commodity firm, futures commission merchant, commodity pool operator, or commodity trading adviser and do not have an application to register pending.

C. Material Relationships Maintained by this Advisory Business and Conflicts of Interest

C.1. Pactolus Series Fund, LLC

The Pactolus Series Fund, LLC (the "Company"), is a private investment company that has authority to invest in a variety of investments, including one or more unaffiliated private funds ("Master Funds"). Pactolus Private Wealth Management, LLC ("Adviser"), and its affiliates sponsor, manage, and control the operations of the Company, and the Adviser receives fees from the Company for providing it with investment advisory services. The advisory fees may be different for each series within the Company and may be in the form of either or both an asset-based management fee and an allocation to the Adviser of a percentage of the Company's net profits. A performance-based fee allocation may create an incentive for the Adviser to cause the Company to make investments that are riskier or more speculative than would be in the best interest of investors in the Company. The Adviser manages this potential conflict primarily by observing significant limitations on the identity of the assets in which the Company will invest and providing investors with disclosure concerning any changes in such limitations.

The Adviser may recommend that eligible clients invest in either the Company or directly in a Master Fund. The Adviser does not believe that either arrangement (including the amount of advisory fees that the Adviser would receive) is necessarily more beneficial to clients or to the Adviser. Accordingly, the Adviser manages any potential conflict of interest primarily by consulting with each affected client to determine whether investment in the Company or (if the client is eligible) investment directly in a Master Fund would be more consistent with the client's best interest and preferences.

Pactolus currently has three outstanding series funds within the Pactolus Series Fund, LLC. They are as follows:

- Pactolus/U.S. Farming Series of the Pactolus Series Fund, LLC
- Pactolus/G4 Capital Partners Series of Pactolus Series Fund, LLC
- Pactolus/Cranmere Series of Pactolus Series Fund, LLC

C.2. Pactolus Private Wealth Management, LLC

Pactolus Private Wealth Management, LLC, is the “Managing Member” of the Company and the Adviser. The Managing Member has the power to take actions that could directly or indirectly provide advantages to the Managing Member, potentially to the disadvantage of investors in the Company. This includes certain authority of the Managing Member to modify, interpret, or limit the terms of the documents that define the rights and obligations of investors, the Managing Member, and the Adviser in connection with the Company. The Managing Member addresses such potential conflicts of interest primarily by disclosing them to investors, as well as seeking to avoid exercising such authority in a way that would unfairly disadvantage any investors.

C.3. Envestnet

Pactolus has formed a strategic relationship with Envestnet Asset Management (“EAM”) whereby EAM will function as the Platform Manager in its Separately Managed Account and Unified Managed Account Program. EAM will make available through this platform various third-party managers to manage Pactolus advisory clients’ portfolio assets. Envestnet acts as Platform Manager, with Pactolus as adviser and various third-party managers acting as sub-advisers. The third-party sub-advisers and EAM receive a portion of the advisory fee. Pactolus has investment discretion to select the appropriate sub-adviser for the client.

C.4. Insurance Affiliations

Certain managers, members, and registered employees of Pactolus are agents for certain insurance carriers. With respect to the provision of financial planning services, Pactolus professionals may recommend insurance products offered by such carriers for whom they function as agents and receive a commission for doing so. Please be advised there is a potential conflict of interest in that there is an economic incentive to recommend insurance and other investment products of such carriers. Also be advised that Pactolus professionals strive to put their clients’ interests first and foremost. Other than for insurance products that require a securities license, such as variable insurance products, clients may utilize any insurance carrier or insurance agency they desire.

C.5. APN Family Group Partners, LLLP

Pactolus has secured a credit facility from APN Family Group Partners, LLLP, a partnership (“APN”) controlled by an advisory client of Pactolus. There are no restrictions or conditions on this credit facility so, in effect, Pactolus may use this credit facility for any purpose as Pactolus sees fit, including making investments either on its own, with advisory clients, or in advisory client-controlled entities. To the extent monies are used for investments, investment losses could be incurred, which could stress Pactolus’s financial condition and hinder the firm’s ability to meet its financial obligations. Moreover, Pactolus’s credit facility may be viewed as creating a conflict of interest in that operating decisions that Pactolus makes may be influenced by the advisory client that controls APN, particularly as it relates to the ongoing use and maintenance of the credit facility. In addition, this credit line facility may give the appearance that Pactolus may be economically incentivized to favor the interests of this particular client versus other

Pactolus clients. Pactolus does not believe that a conflict of interest exists, and it will endeavor to make sure that Pactolus's operating decisions are not influenced by the aforementioned advisory client and that the advisory client is not favored by Pactolus as a result of the credit line facility.

D. Recommendation or Selection of Other Investment Advisors and Conflicts of Interest

Pactolus does not receive any remuneration from advisers, investment managers, or other service providers that it recommends to clients.

Item 11. Code of Ethics, Participation or Interest in Client Transactions, and Personal Trading

A. Code of Ethics Description

In accordance with the Advisers Act, Pactolus has adopted policies and procedures designed to detect and prevent insider trading. In addition, Pactolus has adopted a Code of Ethics (the "Code"). Among other things, the Code includes written procedures governing the conduct of Pactolus's advisory and access persons. The Code also imposes certain reporting obligations on persons subject to the Code. The Code and applicable securities transactions are monitored by the chief compliance officer of Pactolus. Pactolus will send clients a copy of its Code of Ethics upon written request.

Pactolus has policies and procedures in place to ensure that the interests of its clients are held in preference over those of Pactolus, its affiliates, and its employees. For example, there are policies in place to prevent the misappropriation of material non-public information, and such other policies and procedures reasonably designed to comply with federal and state securities laws.

B. Investment Recommendations Involving a Material Financial Interest and Conflicts of Interest

Pactolus does not engage in principal trading (i.e., the practice of selling stock to advisory clients from a firm's inventory or buying stocks from advisory clients into a firm's inventory). Pactolus does recommend securities to advisory clients in which it has a proprietary or ownership interest.

C. Advisory Firm Purchase of Same Securities Recommended to Clients and Conflicts of Interest

Pactolus, its affiliates, employees and their families, trusts, estates, charitable organizations, and retirement plans established by it may purchase the same securities as are purchased for clients in accordance with its Code of Ethics policies and procedures. The personal securities transactions by advisory representatives and employees may raise potential conflicts of interest when they trade in a security that is:

- owned by the client, or
- considered for purchase or sale for the client.

Such conflict generally refers to the practice of front-running (trading ahead of the client), which Pactolus specifically prohibits. Pactolus has adopted policies and procedures that are intended to address these conflicts of interest. These policies and procedures:

- require our advisory representatives and employees to act in the client's best interest,
- prohibit front-running, and

- provide for the review of transactions to discover and correct any trades that result in an advisory representative or employee benefitting at the expense of a client.

Advisory representatives and employees must follow Pactolus's procedures when purchasing or selling the same securities purchased or sold for the client.

D. Client Securities Recommendations or Trades and Concurrent Advisory Firm Securities Transactions and Conflicts of Interest

Pactolus, its affiliates, employees and their families, trusts, estates, charitable organizations, and retirement plans established by it may effect securities transactions for their own accounts that differ from those recommended or effected for other Pactolus clients. Pactolus will make a reasonable attempt to trade securities in client accounts at or prior to trading the securities in its affiliate, corporate, employee, or employee-related accounts. Trades executed the same day will likely be subject to an average pricing calculation. It is the policy of Pactolus to place the client's interests above those of Pactolus and its employees.

Item 12. Brokerage Practices

A. Factors Used to Select Broker-Dealers for Client Transactions

A.1. Custodian Recommendations

Schwab Pactolus may recommend that clients establish brokerage accounts with the Schwab Advisor Services division of Charles Schwab & Co., Inc. ("Schwab"), a FINRA-registered broker-dealer, member SIPC, to maintain custody of clients' assets and to effect trades for their accounts. Pactolus may recommend both a wrap and non-wrap program to Schwab clients; should the client choose the wrap program, Pactolus charges a bundled fee for all of the services provided by Schwab. Pactolus gains access to Schwab as well as other custodians through Dynasty Financial Partners ("Dynasty"). Pactolus has a negotiated agreement with Dynasty to gain preferred pricing for custodial services through Schwab and/or other custody service providers. Pactolus pays Dynasty for various services in addition to access to Schwab's custody services. Pactolus charges clients a bundled fee for all of the services provided by Dynasty and Schwab. As such, any accounts held at Schwab and incurring a bundled fee by the client shall constitute participation in the Pactolus Wrap Fee Program. Please refer to Appendix 1: Pactolus Wrap Fee Program Brochure for detailed disclosure on participation in this program.

Fidelity Pactolus may recommend that clients establish brokerage accounts with Fidelity Institutional Wealth Services, a FINRA-registered broker dealer, member SIPC ("Fidelity"), to maintain custody of clients' assets and to effect trades for their accounts. Pactolus gains access to Fidelity as well as other custodians through Dynasty Financial Partners ("Dynasty"). Pactolus has a negotiated agreement with Dynasty to gain preferred pricing for custodial services through Fidelity and/or other custody service providers. Pactolus pays Dynasty for various services in addition to access to Fidelity's custody services. Pactolus charges clients a bundled fee for all of the services provided by Dynasty and Fidelity. As such, any accounts held at Fidelity and incurring a bundled fee by the client shall constitute participation in the Pactolus Wrap Fee Program. Please refer to Appendix 1: Pactolus Wrap Fee Program Brochure for detailed disclosure on participation in this program.

Although Pactolus may recommend that clients establish accounts at Schwab or Fidelity ("custodian"), it is the client's decision to custody assets with a particular custodian. Pactolus is independently owned and operated and not affiliated with the custodian. Clients may elect any custodian of their choice and there can be no assurance that the rates paid by clients will either be more or less than would apply through the Pactolus Wrap Fee Program. Factors that a client should consider in choosing a recommended custodian versus other custodians are the size of client's portfolio, minimum custodian fees, level and amount of transaction-based fees, excessive trading fees, third-party manager portfolio turnover, number of portfolio securities, and Pactolus's ability to service non-custodian accounts.

In certain instances and subject to approval by Pactolus, Pactolus will recommend to clients certain other broker-dealers and/or custodians based on the needs of the individual client, taking into consideration the nature of the services required, the experience of the broker-dealer or custodian, the cost and quality of the services, and the reputation of the broker-dealer or

custodian. The final determination to engage a broker-dealer or custodian recommended by Pactolus will be made by and in the sole discretion of the client. The client recognizes that broker-dealers and/or custodians have different cost and fee structures and trade execution capabilities. As a result, there may be disparities with respect to the cost of services and/or the transaction prices for securities transactions executed on behalf of the client. Clients are responsible for assessing the commissions and other costs charged by broker-dealers and/or custodians.

A.1.a. How We Select Brokers/Custodians to Recommend

Pactolus seeks to recommend a custodian/broker who will hold client assets and execute transactions on terms that are overall most advantageous when compared to other available providers and their services. We consider a wide range of factors, including, among others, the following:

- combination of transaction execution services along with asset custody services (generally without a separate fee for custody)
- capability to execute, clear, and settle trades (buy and sell securities for client accounts)
- capabilities to facilitate transfers and payments to and from accounts (wire transfers, check requests, bill payment, etc.)
- breadth of investment products made available (stocks, bonds, mutual funds, exchange-traded funds (ETFs), etc.)
- availability of investment research and tools that assist us in making investment decisions
- quality of services
- competitiveness of the price of those services (commission rates, margin interest rates, other fees, etc.) and willingness to negotiate them
- reputation, financial strength, and stability of the provider
- their prior service to us and our other clients
- availability of other products and services that benefit us, as discussed below

A.1.b. Client's Custody and Brokerage Costs

For client accounts that the firm maintains, the custodian generally does not charge clients separately for custody services but is compensated by charging commissions or other fees on trades that it executes or that settle into the custodian's accounts. The custodian's commission rates applicable to the firm's client accounts were negotiated based on the firm's commitment to maintain a certain minimum amount of client assets at the custodian. This commitment benefits the client because the overall commission rates paid are lower than they would be if the firm had not made the commitment. In addition to commissions, the custodian charges a flat dollar amount as a "prime broker" or "trade away" fee for each trade that the firm has executed by a different broker-dealer but where the securities bought or the funds from the securities sold are deposited (settled) into the client's custodian account. These fees are in addition to the commissions or other compensation the client pays the executing broker-

dealer. Because of this, in order to minimize the client's trading costs, the firm has the custodian execute most trades for the account.

A.1.c. Soft Dollar Arrangements

Pactolus does not utilize soft dollar arrangements. Pactolus does not direct brokerage transactions to executing brokers for research and brokerage services.

A.1.d. Institutional Trading and Custody Services

The custodian provides Pactolus with access to its institutional trading and custody services, which are typically not available to the custodian's retail investors. These services generally are available to independent investment advisors on an unsolicited basis, at no charge to them so long as a certain minimum amount of the advisor's clients' assets are maintained in accounts at a particular custodian. These services are not contingent upon Pactolus committing to a custodian any specific amount of business (assets in custody or trading commissions). The custodian's brokerage services include the execution of securities transactions, custody, research, and access to mutual funds and other investments that are otherwise generally available only to institutional investors or would require a significantly higher minimum initial investment.

A.1.e. Other Products and Services

The custodian also makes available to Pactolus other products and services that benefit Pactolus but may not directly benefit its clients' accounts. These benefits may include national, regional, or Pactolus-specific educational events organized and/or sponsored by the custodian. Other potential benefits may include occasional business entertainment of personnel of Pactolus by the custodian's personnel, including meals, invitations to sporting events, including golf tournaments, and other forms of entertainment, some of which may accompany educational opportunities. Many of these products and services may be used to service all or some substantial number of Pactolus's accounts, including accounts not maintained at the custodian. Other of these products and services assist Pactolus in managing and administering clients' accounts. These include software and other technology (and related technological training) that:

- provide access to client account data (such as trade confirmations and account statements)
- facilitate trade execution and allocate aggregated trade orders for multiple client accounts
- provide research, pricing information, and other market data
- facilitate payment of Pactolus's fees from its clients' accounts
- assist with back-office training and support functions, recordkeeping, and client reporting

The custodian also offers other services intended to help Pactolus manage and further develop its business enterprise. These services may include

- professional compliance, legal, and business consulting

- publications and conferences on practice management, information technology, business succession, regulatory compliance, employee benefits providers, human capital consultants, insurance, and marketing

While, as a fiduciary, Pactolus endeavors to act in its clients' best interests, Pactolus's recommendation that clients maintain their assets in accounts at the custodian may be based in part on the benefit to Pactolus of the availability of some of the foregoing products and services and other arrangements, and not solely on the nature, cost, or quality of custody and brokerage services provided by the custodian, which may create a potential conflict of interest.

A.1.f. Additional Compensation Received from Custodians

Pactolus participates in institutional customer programs sponsored by broker-dealers or custodians. Pactolus may recommend these broker-dealers or custodians to clients for custody and brokerage services. There is no direct link between Pactolus's participation in such programs and the investment advice it gives to its clients, although Pactolus receives economic benefits through its participation in the programs that are typically not available to retail investors. These benefits may include the following products and services (provided without cost or at a discount):

- Receipt of duplicate client statements and confirmations
- Research-related products and tools
- Consulting services
- Access to a trading desk serving Pactolus participants
- Access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to client accounts)
- The ability to have advisory fees deducted directly from client accounts
- Access to an electronic communications network for client order entry and account information
- Access to mutual funds with no transaction fees and to certain institutional money managers
- Discounts on compliance, marketing, research, technology, and practice management products or services provided to Pactolus by third-party vendors

The custodian may also pay for business consulting and professional services received by Pactolus's related persons, and may pay or reimburse expenses (including travel, lodging, meals, and entertainment expenses for Pactolus's personnel to attend conferences). Some of the products and services made available by such custodian through its institutional customer programs may benefit Pactolus but may not benefit its client accounts. These products or services may assist Pactolus in managing and administering client accounts, including accounts not maintained at the custodian as applicable. Other services made available through the programs are intended to help Pactolus manage and further develop its business enterprise. The benefits received by Pactolus or its personnel through participation in these programs do not depend on the amount of brokerage transactions directed to the broker-dealer.

Pactolus also participates in similar institutional advisor programs offered by other independent broker-dealers or trust companies, and its continued participation may require Pactolus to maintain a predetermined level of assets at such firms. In connection with its participation in such programs, Pactolus will typically receive benefits similar to those listed above, including research, payments for business consulting and professional services received by Pactolus's related persons, and reimbursement of expenses (including travel, lodging, meals, and entertainment expenses for Pactolus's personnel to attend conferences sponsored by the broker-dealer or trust company).

As part of its fiduciary duties to clients, Pactolus endeavors at all times to put the interests of its clients first. Clients should be aware, however, that the receipt of economic benefits by Pactolus or its related persons in and of itself creates a potential conflict of interest and may indirectly influence Pactolus's recommendation of broker-dealers such as Fidelity for custody and brokerage services.

A.1.g. The Firm's Interest in Schwab's Services

The availability of these services from the custodian benefits the firm because the firm does not have to produce or purchase them. The firm does not have to pay for the custodian's services so long as a certain minimum of client assets is kept in accounts at the custodian. These services are not contingent upon the firm committing any specific amount of business to the custodian in trading commissions or assets in custody. This minimum of client assets may give the firm an incentive to recommend that clients maintain their accounts with the custodian based on the firm's interest in receiving the custodian's services that benefit the firm's business rather than based on the client's interest in receiving the best value in custody services and the most favorable execution of client transactions. This is a potential conflict of interest. The firm believes, however, that the selection of the custodian as custodian and broker is in the best interest of clients. It is primarily supported by the scope, quality, and price of the custodian's services and not the custodian's services that benefit only the firm.

A.2. Brokerage for Client Referrals

Pactolus does not engage in the practice of directing brokerage commissions in exchange for the referral of advisory clients.

A.3. Directed Brokerage

A.3.a. Pactolus Recommendations

Pactolus typically recommends Fidelity or Schwab as custodian for clients' funds and securities and to execute securities transactions on its clients' behalf.

A.3.b. Client-Directed Brokerage

Occasionally, clients may direct Pactolus to use a particular broker-dealer to execute portfolio transactions for their accounts or request that certain types of securities not be purchased for their accounts. Clients who designate the use of a particular broker-dealer should be aware that they will lose any possible advantage Pactolus derives from aggregating transactions.

Such client trades are typically effected after the trades of clients who have not directed the use of a particular broker-dealer. Pactolus loses the ability to aggregate trades with other Pactolus advisory clients, potentially subjecting the client to inferior trade execution prices as well as higher commissions.

B. Aggregating Securities Transactions for Client Accounts

B.1. Best Execution

Pactolus, pursuant to the terms of its investment advisory agreement with clients, has discretionary authority to determine which securities are to be bought and sold, the amount of securities, and the executing broker. Pactolus recognizes that the analysis of execution quality involves a number of factors, both qualitative and quantitative. Pactolus will follow a process in an attempt to ensure that it is seeking to obtain the most favorable execution under the prevailing circumstances when placing client orders. These factors include but are not limited to the following:

- The financial strength, reputation, and stability of the broker
- The efficiency with which the transaction is effected
- The ability to effect prompt and reliable executions at favorable prices (including the applicable dealer spread or commission, if any)
- The availability of the broker to stand ready to effect transactions of varying degrees of difficulty in the future
- The efficiency of error resolution, clearance, and settlement
- Block trading and positioning capabilities
- Performance measurement
- Online access to computerized data regarding customer accounts
- Availability, comprehensiveness, and frequency of brokerage and research services
- Commission rates
- The economic benefit to the client
- Related matters involved in the receipt of brokerage services

Consistent with its fiduciary responsibilities, Pactolus seeks to ensure that clients receive best execution with respect to the client's transactions by blocking client trades to ensure consistent execution across multiple client accounts when applicable. To the best of Pactolus's knowledge, these custodians provide high-quality execution, and Pactolus's clients do not pay higher transaction costs in return for such execution.

Commission rates and securities transaction fees charged to effect such transactions are established by the client's independent custodian and/or broker-dealer. Based upon its own knowledge of the securities industry, Pactolus believes that such commission rates are competitive within the securities industry. Lower commissions or better execution may be able to be achieved elsewhere.

B.2. Security Allocation

Since Pactolus may be managing accounts with similar investment objectives, Pactolus may aggregate orders for securities for such accounts. In such event, allocation of the securities so purchased or sold, as well as expenses incurred in the transaction, is made by Pactolus in the manner it considers to be the most equitable and consistent with its fiduciary obligations to such accounts.

Pactolus's allocation procedures seek to allocate investment opportunities among clients in the fairest possible way, taking into account the clients' best interests. Pactolus will follow procedures to ensure that allocations do not involve a practice of favoring or discriminating against any client or group of clients. Account performance is never a factor in trade allocations.

Pactolus's advice to certain clients and entities and the action of Pactolus for those and other clients are frequently premised not only on the merits of a particular investment, but also on the suitability of that investment for the particular client in light of his or her applicable investment objective, guidelines, and circumstances. Thus, any action of Pactolus with respect to a particular investment may, for a particular client, differ or be opposed to the recommendation, advice, or actions of Pactolus to or on behalf of other clients.

B.3. Order Aggregation

Orders for the same security entered on behalf of more than one client will generally be aggregated (i.e., blocked or bunched) subject to the aggregation being in the best interests of all participating clients. Subsequent orders for the same security entered during the same trading day may be aggregated with any previously unfilled orders. Subsequent orders may also be aggregated with filled orders if the market price for the security has not materially changed and the aggregation does not cause any unintended duration exposure. All clients participating in each aggregated order will receive the average price.

To minimize performance dispersion, "strategy" trades should be aggregated and average priced. However, when a trade is to be executed for an individual account and the trade is not in the best interests of other accounts, then the trade will only be performed for that account. This is true even if Pactolus believes that a larger size block trade would lead to best overall price for the security being transacted.

B.4. Allocation of Trades

All allocations will be made prior to the close of business on the trade date. In the event an order is "partially filled," the allocation will be made in the best interests of all the clients in the order, taking into account all relevant factors including, but not limited to, the size of each client's allocation, clients' liquidity needs, and previous allocations. In most cases, accounts will get a pro forma allocation based on the initial allocation. This policy also applies if an order is "over-filled."

Pactolus acts in accordance with its duty to seek best price and execution and will not continue any arrangements if Pactolus determines that such arrangements are no longer in the best interest of its clients.

Item 13. Review of Accounts

A. Schedule for Periodic Review of Client Accounts or Financial Plans and Advisory Persons Involved

The review of accounts of ultra high-net-worth and affluent clients, including corporations, partnerships, and trusts, are conducted in the first instance by the Pactolus investment advisor representative servicing the client relationship. Such professionals are subject to the general authority of Pactolus's Manager ("Manager"). The Manager must review and approve the opening of each new advisory relationship and oversee reviews of client accounts. The Manager is also responsible for ensuring that any significant change in a client's investment strategy or in the concentration of a client's assets is appropriate for and has been reviewed with the client. All such reviews are performed at least quarterly.

B. Review of Client Accounts on Non-Periodic Basis

Pactolus's Manager may perform ad hoc reviews on an as-needed basis if there have been material changes in the client's investment objectives or risk tolerance, or a material change in how Pactolus formulates investment advice.

C. Content of Client-Provided Reports and Frequency

In addition to monthly statements (no less frequently than quarterly) provided by the client's custodian, which detail transaction activity, holdings, and portfolio value, Pactolus engages a third party to produce quarterly client performance reports. Such performance reports detail account performance and risk metrics including standard deviation, investment-style drift metrics, comparison of account performance against appropriate benchmarks, and other such measures designed to identify the risk and performance of the client's investment portfolio.

The client's independent custodian also provides regular account statements directly to the client. The custodian's statement is the official record of the client's account and supersedes any statements or reports created on behalf of the client by Pactolus.

Item 14. Client Referrals and Other Compensation

A. Economic Benefits Provided to the Advisory Firm from External Sources and Conflicts of Interest

Pactolus does not receive economic benefits for referring clients to third-party service providers.

B. Advisory Firm Payments for Client Referrals

Pactolus does not make payment for client referrals.

Item 15. Custody

Pactolus has custody of client funds as the General Partner of a private fund. In addition, certain Pactolus executives act as trustee for certain advisory client trusts. As such, the firm is deemed to have custody of client assets and therefore subject to a surprise annual audit by an independent certified public accounting firm.

Clients will receive at least quarterly account statements directly from their custodian containing a description of all activity, cash balances, and portfolio holdings in the client's account. Pactolus urges that clients compare the account balance(s) shown on their Pactolus Quarterly Portfolio Review to the quarter-end balance(s) on their custodian's monthly statement. The custodian's statement is the official record of the account.

Item 16. Investment Discretion

Clients may grant a limited power of attorney to Pactolus with respect to trading activity in their accounts by signing the appropriate custodian limited power of attorney form. In those cases, Pactolus will exercise full discretion as to the nature and type of securities to be purchased and sold, the amount of securities for such transactions, and the executing broker to be used. Investment limitations may be designated by the client as outlined in the investment advisory agreement.

Item 17. Voting Client Securities

Pactolus does not take discretion with respect to voting proxies on behalf of its clients. Pactolus will endeavor to make recommendations to clients on voting proxies regarding shareholder vote, consent, election or similar actions solicited by, or with respect to, issuers of securities beneficially held as part of Pactolus supervised and/or managed assets. In no event will Pactolus take discretion with respect to voting proxies on behalf of its clients.

Except as required by applicable law, Pactolus will not be obligated to render advice or take any action on behalf of clients with respect to assets presently or formerly held in their accounts that become the subject of any legal proceedings, including bankruptcies.

From time to time, securities held in the accounts of clients will be the subject of class action lawsuits. Pactolus has no obligation to determine if securities held by the client are subject to a pending or resolved class action lawsuit. Pactolus also has no duty to evaluate a client's eligibility or to submit a claim to participate in the proceeds of a securities class action settlement or verdict. Furthermore, Pactolus has no obligation or responsibility to initiate litigation to recover damages on behalf of clients who may have been injured as a result of actions, misconduct, or negligence by corporate management of issuers whose securities are held by clients.

Where Pactolus receives written or electronic notice of a class action lawsuit, settlement, or verdict affecting securities owned by a client, it will forward all notices, proof of claim forms, and other materials to the client. Electronic mail is acceptable where appropriate and where the client has authorized contact in this manner.

Item 18. Financial Disclosures

A. Balance Sheet

Pactolus does not require the prepayment of fees of \$1,200 or more, six months or more in advance, and as such is not required to file a balance sheet.

B. Financial Conditions Reasonably Likely to Impair Advisory Firm's Ability to Meet Commitments to Clients

Pactolus does not have any financial issues that would impair its ability to provide services to clients.

C. Bankruptcy Petitions During the Past Ten Years

There is nothing to report on this item.
