OceanIQ Capital, LLC Wrap Program

Sponsored By:

OceanIQ Capital, LLC
333 Twin Dolphin Dr., Suite 100
Redwood Shores, CA 94065
www.oceaniqcapital.com

This brochure provides information about the qualifications and business practices of OceanIQ Capital, LLC (CRD # 168062). If clients have any questions about the contents of this brochure, please contact Kai Chen by at (415) 432-7580 or kai@oceaniqcapital.com. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any State Securities Authority. Additional information about our firm is also available on the SEC's website at www.adviserinfo.sec.gov.

Please note that the use of the term "registered investment adviser" and description of our firm and/or our associates as "registered" does not imply a certain level of skill or training. Clients are encouraged to review this Brochure and Brochure Supplements for our firm's associates who advise clients for more information on the qualifications of our firm and our employees.

Item 2: Material Changes

OceanIQ Capital, LLC is required to make clients aware of information that has changed since the last annual update to the Wrap Brochure ("Wrap Brochure") and that may be important to them. Clients can then determine whether to review the brochure in its entirety or to contact us with questions about the changes.

At this time we are converting from SEC to California Department of Business Oversight registration.

Item 8: Client Contact with Portfolio Manager(s).....	12
Item 9: Additional Information.....	12
Item 10: Requirements for State-Registered Advisers	15

Item 4: Services, Fees & Compensation

Our firm manages assets for many different types of clients to help meet their financial goals while remaining sensitive to risk tolerance and time horizons. As a fiduciary it is our duty to always act in the client's best interest. This is accomplished in part by knowing the client. Our firm has established a service-oriented advisory practice with open lines of communication. Working with clients to understand their investment objectives while educating them about our process, facilitates the kind of working relationship we value.

Our wrap fee program allows clients to pay a single fee for investment advisory services and associated custodial transaction costs. Because our firm absorbs client transaction fees, an incentive exists to limit trading activities in client accounts. Custodial transaction costs, however, are not included in the advisory fee charged by our firm for non-wrap services, and are to be paid by the client to their chosen custodian. Depending on the client's account or portfolio trading activity, clients may pay more for using our wrap fee services than they would for using our non-wrap services. All material conflicts of interest under CCR Section 260.238 (k) are disclosed below regarding our firm, our representatives or our employees, which could be reasonably expected to impair the rendering of unbiased and objective advice. To comply with CCR Section 260.238(j), we disclose that lower fees for comparable services may be available from other sources.

Our Wrap Advisory Services

Wrap Comprehensive Portfolio Management:

As part of our Wrap Comprehensive Portfolio Management service clients will be provided asset management and financial planning or consulting services. This service is designed to assist clients in meeting their financial goals through the use of a financial plan or consultation. Our firm conducts client meetings to understand their current financial situation, existing resources, financial goals, and tolerance for risk. Based on what is learned, an investment approach is presented to the client, consisting of individual stocks, bonds, ETFs, options, mutual funds and other public and private securities or investments. Once the appropriate portfolio has been determined, portfolios are continuously and regularly monitored, and if necessary, rebalanced based upon the client's individual needs, stated goals and objectives. Upon client request, our firm provides a summary of observations and recommendations for the planning or consulting aspects of this service.

Annualized fees are calculated on a flat fee or blended tiered approach (see fee schedule below) against the aggregate net market value of the account as of the close of business on the last business day in the preceding quarter. Fee arrangements will be negotiated and memorialized in the client advisory agreement. Fees are billed on a pro-rata quarterly basis and will be deducted from client account(s) unless other arrangement have been mutually agreed upon. Adjustments will be made for deposits and withdrawals during the quarter. In rare cases, our firm will agree to direct bill clients.

Aggregate Net Market Value	Annual Percentage of Assets Charge
\$0 to \$4,999,999	1.00%
\$5,000,000 to \$9,999,999	0.90%
\$10,000,000 to \$24,999,999	0.80%
Over \$25,000,000	Negotiable

Clients must provide our firm with written authorization permitting direct payment of advisory fees from their account(s) maintained by a custodian who is independent of our firm. Our firm sends quarterly statements to the client showing the fee amount, the value of the assets upon which the fee is based, and the specific manner in which the fee is calculated as well as disclosing that it is the client's responsibility to verify the accuracy of fee calculation, and that the custodian does not determine its accuracy. The account custodian sends a statement to the client, at least quarterly, showing all account disbursements, including advisory fees.

Other Types of Fees & Expenses:

The fees not included in the advisory fee for our wrap services are custodial transaction fees, charges imposed directly by a mutual fund, index fund, or exchange traded fund which shall be disclosed in the fund's prospectus (i.e., fund management fees and other fund expenses), mark-ups and mark-downs, spreads paid to market makers, wire transfer fees and other fees and taxes on brokerage accounts and securities transactions.

In addition to the firm's fee, clients may also incur certain charges from Pershing Advisor Solutions ("Pershing") (other than transaction costs) imposed by third parties. Such charges may include, but are not limited to, charges imposed directly by a mutual fund, index fund, or exchange-traded fund ("ETF") in the account, as disclosed in the fund's prospectus (e.g., fund management fees and other fund expenses), fees imposed by variable annuity providers and disclosed in the annuity contract, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions.

Wrap Fee Program Recommendations

Our firm recommends the use of approved money managers on Pershing's platform. Some of these managers may have act managers for other wrap programs. Whether or not the portfolio is managed in-house or by other managers, our firm will ensure the appropriateness of their placement in a wrap program. We receive compensation by referring you to outside managers. the amount of this compensation may be more than what the person would receive if the client participated in your other programs or paid separately for investment advice, brokerage, and other services. therefore, we may have a financial incentive to recommend the wrap fee program over other programs or services.

Item 5: Account Requirements & Types of Clients

Our firm does not impose requirements for opening and maintaining accounts or otherwise engaging us.

Our firm has the following types of clients:

- Individuals and High Net Worth Individuals;
- Trusts, Estates or Charitable Organizations;
- Pension and Profit Sharing Plans;
- Corporations, Limited Liability Companies and/or Other Business Types.

Item 6: Portfolio Manager Selection & Evaluation

Selection of Portfolio Managers

Our firm utilizes our in-house portfolio managers as well as a selection of outside portfolio managers. In-house accounts are managed by licensed investment adviser representatives ("IAR"s) of our firm. A conflict arises in that other investment advisory firms may charge the same or lower fees than our firm for similar services. Our investment adviser representatives ("IAR"s) are subject to individual licensing requirements as imposed by state securities divisions. Our firm is required to confirm or update each IAR's Form U4 on an annual basis. IAR supervision is conducted by our Chief Compliance Officer or management personnel.

Prior to becoming licensed with our firm, each IARs industry experience, licensure, outside business activities, client complaints (if any), disciplinary or regulatory history (if any) and financial well-being will be reviewed. Each IAR will then have a Form U4 and ADV Part 2B on file with our firm. Outside portfolio managers, either individually or firm-wide, are selected based on past performance, investment philosophy, market outlook, experience of associated portfolio managers and executive team, disciplinary, legal and regulatory histories of the firm and its associates, and/or whether compliance procedures are in place to address at a minimum, insider trading, conflicts of interest, and/or anti-money laundering.

Performance returns of wrap portfolios are reviewed at least quarterly. The nature of these reviews is to learn whether client accounts are in line with their investment objectives and appropriately positioned based on market conditions. If these standards fall below the client objectives, our firm will discuss the review with the portfolio manager for proactive action to realign the investment strategy.

Advisory Business:

Information about our wrap fee services can be found in Item 4 of this brochure. Our firm offers individualized investment advice to our Wrap Comprehensive Portfolio Management clients.

Each Wrap Comprehensive Portfolio Management client has the opportunity to place reasonable restrictions on the types of investments to be held in the portfolio. Restrictions on investments in certain securities or types of securities may not be possible due to the level of difficulty this would entail in managing the account.

Participation in Wrap Fee Programs:

Our firm does not manage wrap fee accounts in a different fashion than non-wrap fee accounts. All accounts are managed on an individualized basis according to the client's investment objectives, financial goals, risk tolerance, etc.

Performance-Based Fees & Side-By-Side Management:

Our firm does not charge performance-based fees.

Methods of Analysis, Investment Strategies & Risk of Loss:

The following methods of analysis are utilized by our firm when formulating investment advice and/or managing client assets:

Charting: In this type of technical analysis, we review charts of market and security activity in an attempt to identify when the market is moving up or down and to predict when how long the trend may last and when that trend might reverse.

Cyclical Analysis: In this type of technical analysis, we measure the movements of a particular stock against the overall market in an attempt to predict the price movement of the security.

Fundamental Analysis: We attempt to measure the intrinsic value of a security by looking at economic and financial factors (including the overall economy, industry conditions, and the financial condition and management of the company itself) to determine if the company is underpriced (indicating it may be a good time to buy) or overpriced (indicating it may be time to sell). Fundamental analysis does not attempt to anticipate market movements. This presents a potential risk, as the price of a security can move up or down along with the overall market regardless of the economic and financial factors considered in evaluating the stock.

Technical Analysis: We analyze past market movements and apply that analysis to the present in an attempt to recognize recurring patterns of investor behavior and potentially predict future price movement. Technical analysis does not consider the underlying financial condition of a company. This presents a risk in that a poorly-managed or financially unsound company may underperform regardless of market movement.

Asset Allocation: Rather than focusing primarily on securities selection, we attempt to identify an appropriate ratio of securities, fixed income, and cash suitable to the client's investment goals and risk tolerance. A risk of asset allocation is that the client may not participate in sharp increases in a particular security, industry or market sector. Another risk is that the ratio of securities, fixed income, and cash will change over time due to stock and market movements and, if not corrected, will no longer be appropriate for the client's goals.

Mutual Fund and/or ETF Analysis: We look at the experience and track record of the manager of the mutual fund or ETF in an attempt to determine if that manager has demonstrated an ability to

invest over a period of time and in different economic conditions. We also look at the underlying assets in a mutual fund or ETF in an attempt to determine if there is significant overlap in the underlying investments held in another fund(s) in the client's portfolio. We also monitor the funds or ETFs in an attempt to determine if they are continuing to follow their stated investment strategy. A risk of mutual fund and/or ETF analysis is that, as in all securities investments, past performance does not guarantee future results. A manager who has been successful may not be able to replicate that success in the future. In addition, as we do not control the underlying investments in a fund or ETF, managers of different funds held by the client may purchase the same security, increasing the risk to the client if that security were to fall in value. There is also a risk that a manager may deviate from the stated investment mandate or strategy of the fund or ETF, which could make the holding(s) less suitable for the client's portfolio.

Third-Party Money Manager Analysis: We examine the experience, expertise, investment philosophies, and past performance of independent third-party investment managers in an attempt to determine if that manager has demonstrated an ability to invest over a period of time and in different economic conditions. We monitor the manager's underlying holdings, strategies, concentrations and leverage as part of our overall periodic risk assessment. Additionally, as part of our due-diligence process, we survey the manager's compliance and business enterprise risks. A risk of investing with a third-party manager who has been successful in the past is that he/she may not be able to replicate that success in the future. In addition, as we do not control the underlying investments in a third-party manager's portfolio, there is also a risk that a manager may deviate from the stated investment mandate or strategy of the portfolio, making it a less suitable investment for our clients. Moreover, as we do not control the manager's daily business and compliance operations, we may be unaware of the lack of internal controls necessary to prevent business, regulatory or reputational deficiencies.

Quantitative Analysis: We use quantitative analysis that may include mathematical analysis in an attempt to identify the impact of interest rate changes on individual securities and portfolios of securities. The results of our quantitative analysis are taken into consideration in the decision to buy or sell securities and in the management of portfolio characteristics. A risk in using quantitative analysis is that the methods or models used may be based on assumptions that prove to be incorrect.

Qualitative Analysis: We use qualitative analysis to evaluate individual securities, focusing on non-quantifiable factors such as quality of management and others not readily subject to measurement, and incorporate that analysis into our security selection process. A risk in using qualitative analysis is that our subjective judgment may prove incorrect.

Asset Allocation: We generally focus on identifying an appropriate allocation of securities, maturities, market sectors and yield curve positioning suitable for the client's investment goals and risk tolerance. While asset allocation is recognized by professional investment advisers as a prudent approach, a risk of asset allocation is that the client may not participate in sharp increases in a particular security, industry or market sector. Another risk is that the allocation will change over time due to market movements in the various sectors, which, if not corrected, may no longer be appropriate for the client's goals.

Risks for All Forms of Analysis: Our securities analysis methods rely on the assumption that the companies whose securities we purchase and sell, the rating agencies that review these securities, and other publicly-available sources of information about these securities, are providing accurate and unbiased data. While we are alert to indications that data may be incorrect, there is always a risk that our analysis may be compromised by inaccurate or misleading information.

The following investment strategies are used managing client accounts, provided that such strategies are appropriate to the needs of the client and consistent with the client's investment objectives, risk tolerance, and time horizons, among other considerations:

Long-Term Purchases: When utilizing this strategy, we may purchase securities with the idea of holding them for a relatively long time (typically held for at least a year). A risk in a long-term purchase strategy is that by holding the security for this length of time, we may not take advantages of short-term gains that could be profitable to a client. Moreover, if our predictions are incorrect, a security may decline sharply in value before we make the decision to sell. Typically we employ this sub-strategy when we believe the securities to be well valued; and/or we want exposure to a particular asset class over time, regardless of the current projection for this class. The potential risks associated with this investment strategy involve a lower than expected return, for many years in a row. Lower-than-expected returns that last for a long time and/or that are severe in nature would have the impact of dramatically lowering the ending value of your portfolio, and thus could significantly threaten your ability to meet financial goals.

Short-Term Purchases: When utilizing this strategy, we may also purchase securities with the idea of selling them within a relatively short time (typically a year or less). We do this in an attempt to take advantage of conditions that we believe will soon result in a price swing in the securities we purchase. The potential risk associated with this investment strategy is associated with the currency or exchange rate. Currency or exchange rate risk is a form of risk that arises from the change in price of one currency against another. The constant fluctuations in the foreign currency in which an investment is denominated vis-à-vis one's home currency may add risk to the value of a security. Currency risk is greater for shorter term investments, which do not have time to level off like longer term foreign investments.

Trading: We purchase securities with the idea of selling them very quickly (typically within 30 days or less). We do this in an attempt to take advantage of our predictions of brief price swings. Trading involves risk that may not be suitable for every investor, and may involve a high volume of trading activity. Each trade generates a commission and the total daily commission on such a high volume of trading can be considerable. Active trading accounts should be considered speculative in nature with the objective being to generate short-term profits. This activity may result in the loss of more than 100% of an investment.

Short Sales: We borrow shares of a stock for your portfolio from someone who owns the stock on a promise to replace the shares on a future date at a certain price. Those borrowed shares are then sold. On the agreed-upon future date, we buy the same stock and return the shares to the original owner. We engage in short selling based on our determination that the stock will go down in price after we have borrowed the shares. If we are correct and the stock price has gone down since the shares were purchased from the original owner, the client account realizes the profit. The two primary perceived risks of short selling are that the in the long term, markets trend upward and short selling can expose investors to potentially unlimited risk. Due to the "upside gap", sellers risk not being able to react until after a significant loss has already been incurred.

Margin Transactions: We will purchase stocks for your portfolio with money borrowed from your brokerage account. This allows you to purchase more stock than you would be able to with your available cash, and allows us to purchase stock without selling other holdings. Margin accounts and transactions are risky and not necessarily for every client. The potential risks associated with these transactions are (1) You can lose more funds than are deposited into the margin account; (2) the force sale of securities or other assets in your account; (3) the sale of securities or other assets

without contacting you; and (4) you may not be entitled to choose which securities or other assets in your account(s) are liquidated or sold to meet a margin call.

Option Writing: We may use options as an investment strategy. An option is a contract that gives the buyer the right, but not the obligation, to buy or sell an asset (such as a share of stock) at a specific price on or before a certain date. An option, just like a stock or bond, is a security. An option is also a derivative, because it derives its value from an underlying asset. The two types of options are calls and puts. A call gives us the right to buy an asset at a certain price within a specific period of time. We will buy a call if we have determined that the stock will increase substantially before the option expires. A put gives us the holder the right to sell an asset at a certain price within a specific period of time. We will buy a put if we have determined that the price of the stock will fall before the option expires. We will use options to "hedge" a purchase of the underlying security; in other words, we will use an option purchase to limit the potential upside and downside of a security we have purchased for your portfolio. We use "covered calls", in which we sell an option on security you own. In this strategy, you receive a fee for making the option available, and the person purchasing the option has the right to buy the security from you at an agreed-upon price. We use a "spreading strategy", in which we purchase two or more option contracts (for example, a call option that you buy and a call option that you sell) for the same underlying security. This effectively puts you on both sides of the market, but with the ability to vary price, time and other factors. The potential risks associated with these transactions are that (1) all options expire. The closer the option gets to expiration, the quicker the premium in the option deteriorates; and (2) Prices can move very quickly. Depending on factors such as time until expiration and the relationship of the stock price to the option's strike price, small movements in a stock can translate into big movements in the underlying options.

Fixed Income Portfolio Management Investment Strategies:

We believe that a conservative, risk-averse approach to fixed income management will provide both steady incremental outperformance, and low relative volatility. The disciplined process we employ in an effort to realize this philosophy is generally grounded in four key decisions:

1. Constraint of portfolio duration within a narrow range relative to the benchmark in order to limit exposure to market and interest rate risk.
2. Strategic allocations to key sectors to add value relative to the benchmark.
3. Proactive management of term structure to add value in different yield curve environments.
4. Security selection based on rigorous credit and relative value analysis and broad diversification of nongovernment issuers.

Within our Fixed Income strategy, we use the following sub-strategies in managing client accounts, provided that such sub-strategies are appropriate to the needs of the client and consistent with the client's investment objectives, risk tolerance, and time horizons, among other considerations.

Duration Constraints: We adhere to a discipline of generally maintaining duration within a narrow band around benchmark duration in order to limit exposure to market risk. Our portfolio management team rebalances client portfolios to their current duration targets on a periodic basis. The risk of constraining duration is that the client may not participate fully in a large rally in bond prices.

Sector Allocation: We allocate client assets to various sectors of the fixed income market, including US Treasury obligations, federal agency securities, corporate notes, mortgage-backed securities and others, based on our quantitative and qualitative analysis in order to manage client exposure to a

given sector and to provide exposure to sectors we believe have good value. The risk of sector allocation is that clients may not participate fully in an increase in value in any specific sector.

Security Selection: A proprietary credit evaluation process drives our security selection process. The system uses both internally and externally generated credit research to evaluate securities we are considering for purchase. Based on research we conduct internally, our Credit Committee selects securities for our Approved list. The ultimate decision to purchase or sell a security is based on the firm's evaluation of the current price for the security. The risk of security selection is that the methods of analysis employed will not provide accurate measurement of the risk association with each individual security.

Please Note: Investing in securities involves risk of loss that clients should be prepared to bear. While the stock market may increase and your account(s) could enjoy a gain, it is also possible that the stock market may decrease and your account(s) could suffer a loss. It is important that you understand the risks associated with investing in the stock market, are appropriately diversified in your investments, and ask us any questions you may have.

Voting Client Securities:

Our firm does not accept the proxy authority to vote client securities. Clients will receive proxies or other solicitations directly from their custodian or a transfer agent. In the event that proxies are sent to our firm, our firm will forward them to the appropriate client and ask the party who sent them to mail them directly to the client in the future. Clients may call, write or email us to discuss questions they may have about particular proxy votes or other solicitations.

Third party money managers selected or recommended by our firm may vote proxies for clients. Except in the event a third party money manager votes proxies, clients maintain exclusive responsibility for: (1) directing the manner in which proxies solicited by issuers of securities beneficially owned by the client shall be voted, and (2) making all elections relative to any mergers, acquisitions, tender offers, bankruptcy proceedings or other type events pertaining to the client's investment assets. Therefore (except for proxies that may be voted by a third party money manager), our firm and/or the client shall instruct the qualified custodian to forward to copies of all proxies and shareholder communications relating to the client's investment assets.

Item 7: Client Information Provided to Portfolio Manager(s)

Our firm communicates with your portfolio manager(s) on a regular basis as needed to ensure your most current investment goals and objectives are understood by your portfolio manager(s). In most cases, our firm will communicate such information as part of our regular investment management duties. Nevertheless, our firm will also communicate information to your portfolio manager(s) when you ask us to, when market or economic conditions make it prudent to do so, etc.

Item 8: Client Contact with Portfolio Manager(s)

Clients are always free to directly contact their portfolio manager(s) with any questions or concerns about their portfolios or other matters.

Item 9: Additional Information

Disciplinary Information

Mr. Chen was involved in a verbal customer complaint on February 27, 2008, which led to a settlement in the amount of \$2,500,000.00. This verbal complaint arose from the sale of an auction rate security (ARS) that was made prior to the unprecedented illiquidity in the ARS market that occurred in February 2008. Mr. Chen did not cause, contribute or have any control whatsoever over these market events. The firm reached agreement with regulators, pursuant to their repurchasing ARS for their full par value from clients, whether they complained or not. The settlement amount reflected the par value of the repurchased ARS. Mr. Chen was not a party to that agreement, did not make any payment to the client, and was not asked to and did not contribute to the repurchase amount. Mr. Chen was also involved in a customer complaint on June 26, 2008, which led to a settlement in the amount of \$8,350,000.00. This complaint arose after the auction rate security (ARS) market suffered widespread auction failures and illiquidity. Customers alleged they were informed ARS were “Frozen” and they did not give instruction to invest in such securities. Mr. Chen did not cause, contribute or have any control whatsoever over these market events. The firm reached agreement with regulators, pursuant to their repurchasing ARS for their full par value from clients, whether they complained or not. The settlement amount reflected the par value of the repurchased ARS. Mr. Chen was not a party to that agreement, did not make any payment to the client, and was not asked to and did not contribute to the repurchase amount. More information is available on the SEC’s website at www.adviserinfo.sec.gov by searching CRD#2916984.

Our firm and management persons have not been found liable in any civil, self-regulatory organization or administrative proceedings or have any relationships with issuers or securities apart from what is disclosed above.

Financial Industry Activities & Affiliations

OceanIQ Capital is under common control with OceanIQ Partners. OceanIQ Partners is the investment manager for two venture capital funds (OceanIQ Partners/Base Venture Series LLC and OceanIQ Partners/Paxata Series LLC). As well as always acting in the clients best interest, in order to mitigate the risk of this potential conflict of interest, OceanIQ Capital has engaged a third-party, independent auditor to provide an annual, unqualified review of the fund’s holdings. Our firm does not charged performance based fees. Our firm and management persons have not been involved in any arbitration awards, found liable in any civil, self-regulatory organization or administrative proceedings or have any relationships with issuers or securities apart from what is disclosed above.

Our firm does not have compensation arrangements connected with advisory services which are in addition to our advisory fees. As a fiduciary, our firm always put our Client’s interest above our own.

Information regarding participation of interest in client transactions can be found in our Code of Ethics as well as Item 11 of our Firm's ADV 2A Brochure. Clients may obtain a copy of our Code of Ethics by contacting Kai Chen, Chief Compliance Officer at (415) 432-7580.

Code of Ethics, Participation or Interest in Client Transactions & Personal Trading

As a fiduciary, it is an investment adviser's responsibility to provide fair and full disclosure of all material facts and to act solely in the best interest of each of our clients at all times. Our fiduciary duty is the underlying principle for our firm's Code of Ethics, which includes procedures for personal securities transaction and insider trading. Our firm requires all representatives to conduct business with the highest level of ethical standards and to comply with all federal and state securities laws at all times. Upon employment with our firm, and at least annually thereafter, all representatives of our firm will acknowledge receipt, understanding and compliance with our firm's Code of Ethics. Our firm and representatives must conduct business in an honest, ethical, and fair manner and avoid all circumstances that might negatively affect or appear to affect our duty of complete loyalty to all clients. In accordance with this, our firm engages Advanced Regulatory Compliance to provide regulatory compliance support, to assist with best practices, maintenance of our Code of Ethics and compliance audits. This disclosure is provided to give all clients a summary of our Code of Ethics. If a client or a potential client wishes to review our Code of Ethics in its entirety, a copy will be provided promptly upon request.

Our firm recognizes that the personal investment transactions of our representatives demands the application of a Code of Ethics with high standards and requires that all such transactions be carried out in a way that does not endanger the interest of any client. At the same time, our firm also believes that if investment goals are similar for clients and for our representatives, it is logical, and even desirable, that there be common ownership of some securities.

In order to prevent conflicts of interest, our firm has established procedures for transactions effected by our representatives for their personal accounts¹. In order to monitor compliance with our personal trading policy, our firm has pre-clearance requirements and a quarterly securities transaction reporting system for all of our representatives.

Neither our firm nor a related person recommends, buys or sells for client accounts, securities in which our firm or a related person has a material financial interest without prior disclosure to the client.

Related persons of our firm may buy or sell securities and other investments that are also recommended to clients. In order to minimize this conflict of interest, our related persons will place client interests ahead of their own interests and adhere to our firm's Code of Ethics, a copy of which is available upon request.

Likewise, related persons of our firm buy or sell securities for themselves at or about the same time they buy or sell the same securities for client accounts. In order to minimize this conflict of interest, our related persons will place client interests ahead of their own interests and adhere to our firm's Code of Ethics, a copy of which is available upon request. Further, our related persons will refrain from buying or selling the same securities prior to buying or selling for our clients in the same day. If related persons' accounts are included in a block trade, our related persons will always trade personal accounts last.

¹ For purposes of the policy, our associate's personal account generally includes any account (a) in the name of our associate, his/her spouse, his/her minor children or other dependents residing in the same household, (b) for which our associate is a trustee or executor, or (c) which our associate controls, including our client accounts which our associate controls and/or a member of his/her household has a direct or indirect beneficial interest in.

Review of Accounts

Our Chief Compliance Officer, Kai Chen, reviews accounts on at least a quarterly basis for our Wrap Comprehensive Portfolio Management clients. The nature of these reviews is to learn whether clients' accounts are in line with their investment objectives, appropriately positioned based on market conditions, and investment policies, if applicable.

Our firm may review client accounts more frequently than described above. Among the factors which may trigger an off-cycle review are major market or economic events, the client's life events, requests by the client, etc.

Our firm does not provide written reports to clients, unless asked to do so. Verbal reports to clients take place on at least an annual basis when our Wrap Comprehensive Portfolio Management clients are contacted.

Client Referrals

Our firm pays referral fees (non-commission based) to independent solicitors (non-registered representatives) for the referral of their clients to our firm in accordance with relevant state statutes and rules. Such referral fee represents a share of our investment advisory fee charged to our clients. This arrangement will not result in higher costs to the referred client. In this regard, our firm maintains Solicitors Agreements in compliance with relevant state statutes and rules and applicable state and federal laws. All clients referred by Solicitors to our firm will be given full written disclosure describing the terms and fee arrangements between our firm and Solicitor(s). In cases where state law requires licensure of solicitors, our firm ensures that no solicitation fees are paid unless the solicitor is registered as an investment adviser representative of our firm. If our firm is paying solicitation fees to another registered investment adviser, the licensure of individuals is the other firm's responsibility.

Software and Support Provided by Financial Institutions

OceanIQ Capital may receive from a Pershing without cost to OceanIQ Capital, computer software and related systems support, which allow the firm to better monitor client accounts maintained at Pershing. OceanIQ Capital may receive the software and related support without cost because the firm renders investment management services to clients that maintain assets at Pershing. The software and support is not provided in connection with securities transactions of clients (i.e. not "soft dollars"). The software and related systems support may benefit OceanIQ Capital, but not its clients directly. In fulfilling its duties to its clients, OceanIQ Capital endeavors at all times to put the interests of its clients first. Clients should be aware, however, that the firm's receipt of economic benefits from a broker-dealer creates a conflict of interest since these benefits may influence OceanIQ Capital's choice of broker-dealer over another broker-dealer that does not furnish similar software, systems support, or services. Additionally, OceanIQ Capital may receive the following benefits from Pershing through its Pershing Advisor Solutions division: receipt of duplicate client confirmations and bundled duplicate statements; access to a trading desk that exclusively services its Pershing Advisor Solutions participants; access to block trading which provides the ability to aggregate securities transactions and then allocate the appropriate shares to client accounts; and access to an electronic communication network for client order entry and account information.

Other Economic Benefits

In addition, OceanIQ Capital is required to disclose any relationship or arrangement where it receives an economic benefit from a third party (non-client) for providing advisory services. This type of relationship poses a conflict of interest and any such relationship is disclosed in Item 6, above.

Financial Information

Our firm is not required to provide financial information in this Brochure because:

- Our firm does not require the prepayment of more than \$500 in fees and six or more months in advance.
- Our firm does not take custody of client funds or securities.
- Our firm does not have a financial condition or commitment that impairs our ability to meet contractual and fiduciary obligations to clients.

Our firm has never been the subject of a bankruptcy proceeding.

Item 10: Requirements for State-Registered Advisers

Our firm is State registered and has responded to this Item in Item 9 of this Brochure.
