**This brochure provides information about the qualifications and business practices of Taconic Capital Advisors UK LLP (“Taconic UK”). If you have any questions about the contents of this brochure, please contact us at +44 20 7518 2500 or [FundInvestments@taconiccap.com](mailto:FundInvestments@taconiccap.com). The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority. Taconic is a registered investment adviser, but such designation does not imply a certain level of skill or training.**

**Additional information about Taconic UK also is available on the SEC’s website at [www.adviserinfo.sec.gov](http://www.adviserinfo.sec.gov).**

## **Item 2 Material Changes**

This brochure dated April 28, 2017, serves as an update to our brochure dated April 29, 2016. The Material Changes section of this brochure will be updated when material changes occur since the previous release of the brochure. The last update was April 29, 2016. This brochure contains routine annual updates to the prior brochure, as well as certain other updates, including those regarding new share class interests in new private investment funds managed by the firm. Because this Item 2 discusses only those changes to this brochure that have been made since the prior brochure, this document should be reviewed in its entirety.

## Item 4 - Advisory Business

Taconic Capital Advisors UK LLP (“Taconic UK”) provides investment advice on a discretionary basis to onshore and offshore private investment funds (each, a “Fund” and together, the “Funds”) that are offered to high net worth, financially sophisticated, individual and institutional investors that may include banks or thrift institutions, investment companies, pension and profit sharing plans, government plans, trusts, estates or other business entities. Taconic Capital Advisors L.P. (“TCA”) has entered into a subadvisory agreement with Taconic UK pursuant to which Taconic UK serves as a subadvisor to TCA in respect of all of the Funds identified below. TCA and Taconic UK are referred to collectively as “Taconic” in this Brochure. Taconic UK is both registered as an investment adviser with the SEC and authorized and regulated by the Financial Conduct Authority of the United Kingdom (the “FCA”), which replaced the Financial Services Authority on April 1, 2013. Taconic UK is managed by Frank P. Brosens through Taconic Capital Services UK Ltd., a wholly owned subsidiary of TCA. As of March 31, 2017, Taconic managed approximately \$6.1 billion, of which Taconic UK subadvised approximately \$5.9 billion. Taconic focuses on event investing, or investing in securities and instruments of companies undergoing extraordinary events that are expected to affect the value of one or more securities of a company. The Event-Driven and Opportunity Funds currently invest in mergers and acquisitions, corporate restructurings and spin-offs, credit investments and/or capital structure arbitrage, as well as special situations. In addition, Taconic manages a number of opportunistic funds (including the Sidecar I Funds, the Sidecar II Funds, the Sidecar III Funds and the ECDF Funds) designed to capitalize on specific investment opportunities.

In 1999, Kenneth D. Brody and Frank P. Brosens, along with a financial investor, launched Taconic and formed the first of Taconic’s event-driven funds (the “Event-Driven Funds”) to invest a substantial portion of their assets and to give third-party investors the opportunity to invest alongside them. The Event-Driven Funds currently comprise:

- Taconic Capital Partners 1.5 L.P. (“TCP 1.5”), a Delaware limited partnership, which invests using a master-feeder structure through Taconic Master Fund 1.5 L.P. (the “Event Master Fund”), an exempted limited partnership registered under the Exempted Limited Partnership Law (2014 Revision) of the Cayman Islands (the “ELP Law”); and
- Taconic Offshore Fund 1.5 Ltd. (“TOF 1.5”), a Cayman Islands exempted company, which invests using a modified master-feeder structure through the Event Master Fund indirectly through Taconic Offshore Intermediate Fund 1.5 L.P. (the “Event Intermediate Fund”), an exempted limited partnership registered under the ELP Law.

In 2004, Taconic launched the first of Taconic’s opportunity funds (the “Opportunity Funds”), which are managed in Taconic’s event-driven style, but are free from some of the event, timing, liquidity and risk constraints that have been placed on the Event-Driven Funds. The Opportunity Funds are:

- Taconic Opportunity Fund L.P. (“TOP”), a Delaware limited partnership, which invests using a master-feeder structure through Taconic Opportunity Master Fund L.P. (the “Opportunity Master Fund”), an exempted limited partnership registered under the ELP Law ; and
- Taconic Opportunity Offshore Fund Ltd. (“TOPOFF”), a Cayman Islands exempted company, which invests using a modified master-feeder structure through the Opportunity Master Fund indirectly through Taconic Opportunity Offshore Intermediate Fund L.P. (the “Opportunity Intermediate Fund”), an exempted limited partnership registered under the ELP Law.

In February 2013, Taconic launched the first Taconic Sidecar Funds (the “Sidecar I Funds”) in an attempt to capitalize on investment opportunities in trade claims of two Icelandic banks created by the recent financial crisis. Unlike the Event-Driven Funds and the Opportunity Funds, the Sidecar I Funds were capital commitment funds offered in two offerings, having set investment and harvest periods. The investment period ended in March 2014, and as of December 31, 2016, the Sidecar I Funds liquidated all of its investments. Taconic is the process of preparing an audit of the Sidecar I Funds and will distribute the final audited financial statements to investors upon the conclusion of the audit. The Sidecar I Funds are:

- Taconic Sidecar Fund I L.P., a Delaware limited partnership, and Segregated Portfolio I of Taconic Sidecar Offshore Fund SPC (the “Sidecar Offshore Fund”), an exempted Cayman Islands segregated portfolio company, both of which invest using a master-feeder structure through Segregated Portfolio I of Taconic Sidecar Master Fund SPC (the “Sidecar Master Fund”), an exempted Cayman Islands segregated portfolio company.

In March 2016, Taconic launched additional Sidecar Funds (the “Sidecar II Funds”) in an attempt to capitalize on investment opportunities in convertible notes and attached shares issued by an Icelandic bank. The Sidecar II Funds are:

- Taconic Sidecar II Fund L.P., a Delaware limited partnership, and Segregated Portfolio II of the Sidecar Offshore Fund SPC, both of which invest using a master-feeder structure through Segregated Portfolio II of the Sidecar Master Fund.

In November 2016, Taconic launched additional Sidecar Funds (the “Sidecar III Funds”) in an attempt to capitalize on investment opportunities in an expected private placement of equity securities in an Icelandic bank. The Sidecar III Funds are:

- Taconic Sidecar Fund III L.P, a Delaware limited partnership, and Segregated Portfolio III of the Sidecar Offshore Fund, both of which invest using a master-feeder structure through Segregated Portfolio III of the Sidecar Master Fund SPC.

In August 2014, Taconic launched the Taconic European Credit Dislocation Funds (“ECDF”) in an attempt to capitalize on credit opportunities arising from the economic and financial crisis in Europe. Unlike the Event-Driven Funds and the Opportunity Funds, the ECDF Funds are capital commitment funds offered in a single offering, having set investment and harvest periods. The ECDF Funds are no longer open to new investments. The ECDF Funds are:

- Taconic European Credit Dislocation Fund L.P., a Delaware limited partnership; and Taconic European Credit Dislocation Offshore Fund L.P., a Cayman Islands exempted limited partnership registered under the ELP Law, both of which invest using a master-feeder structure through Taconic European Credit Dislocation Master Fund L.P. (the “Dislocation Master Fund”), an exempted limited partnership registered under the ELP Law.

## **Item 5 - Fees and Compensation**

### Management and Performance Fees

For its services to each of the Funds, TCA receives the following fees:

- **Opportunity Funds**
  - Management Fee
    - Non Lock-Up Option: 1.5% of net assets
    - Two Year Lock-Up Option: 1.0% of net assets
    - Three Year Lock-Up Option: 0.75% of net assets
  - Performance Allocation: 20% of each investor’s annual profits deducted yearly. Under the Three Year Lock-Up Option, no performance fee is earned until a particular hurdle rate has been exceeded, at which point the General Partner receives a 100% catch-up allocation (and thereafter 20%).
- **Event-Driven Funds**
  - Management Fee
    - Non Lock-Up Option: 1.5% of net assets
    - Two Year Lock-Up Option: 1.0% of net assets
    - Three Year Lock-Up Option: 0.75% of net assets
  - Performance Allocation: 20% of each investor’s annual profits. Under the Three Year Lock-Up Option, no performance fee is earned until a particular hurdle rate has been exceeded, at which point the General Partner receives a 100% catch-up allocation (and thereafter 20%).
- **Sidecar I Funds.**

The Sidecar I Funds are liquidated.

- Management Fee: 0.25%
- Performance Allocation: 20% carried interest with an 8% preferred return

- **Sidecar II Funds.**

The Sidecar II Funds are no longer open for investment.

- Management Fee: 0.25%
- Performance Allocation: 20% carried interest with an 8% preferred return and catch-up

- **Sidecar III Funds**

The Sidecar III Funds are no longer open for investment.

- Management Fee: 0.25%
- Performance Allocation: 20% carried interest with an 8% preferred return and catch-up

Taconic may launch additional Sidecar funds in the future with different management and performance fee structures.

- **ECDF Funds**

The ECDF Funds are no longer open for investment.

- Management Fee: 0.75%
- Performance Allocation: 17% carried interest with an 8% preferred return and catch-up

For the ECDF Funds, Taconic charges management fees on called capital adjusted for distributions of principal and permanent write-downs or write offs. Taconic does not charge a fee on committed but uncalled capital.

The base currency of all the Funds is U.S. Dollars and all Funds offer share classes denominated in U.S. Dollars. In addition to the U.S. dollar-denominated share classes, the Event-Driven and Opportunity offshore funds have certain classes denominated in British Pounds Sterling and the Euro.

With respect to each Fund, Taconic UK receives a fee, calculated and payable monthly in an amount equal to a percentage of the expenses incurred by Taconic UK for that month and a portion of the management fee earned by TCA and of the performance allocation paid by investors in such Funds.

While Taconic earns management fees without regard to the overall success or income earned by any fund, generally if you suffer losses you will not pay a performance allocation on subsequent

profits until Taconic recoups your prior losses. Taconic invoices management fees on a semi-annual basis with respect to the Sidecar II Funds, the Sidecar III Funds, the TCRED Funds and the ECDF Funds and a quarterly basis with respect to the Sidecar I Funds in arrears, respectively. Performance Allocations for the Opportunity Funds and Event-Driven Funds are generally determined as of the end of each calendar year (or upon an investor's withdrawal). If Taconic earns a performance allocation in a given year, Taconic deducts that fee from a fee-paying investor's account as of the last day of the year (or three-year period), or earlier with respect to a portion of an investment that has been withdrawn. Taconic may waive fees in its discretion, and does so for affiliates, principals and employees. In addition, Taconic has entered into side letters with certain investors in the Opportunity and Event-Driven Funds whereby it has reduced the management fee rate for each lock-up option so long as the investor (individually or together with certain related investors) maintains managed assets in the Opportunity Funds and/or Event-Driven Funds of at least \$150m, \$300m, \$500m, \$600m or \$700m, as applicable (and would be willing to grant similar terms to any other investor at that asset level). With respect to the ECDF Funds, Sidecar I Funds, Sidecar II Funds and the Sidecar III Funds the Performance Allocation is made as carried interest only after distributions (or redemption proceeds) have been made to investors representing repayment of their called capital and management fees paid. The investment management agreements between the Funds and TCA, and the subadvisory agreement between TCA and Taconic UK, have not been negotiated at arms' length.

For more information about Taconic's fees with respect to a particular Fund, please see that Fund's Confidential Private Offering Memorandum, which describes the fee arrangements in greater detail.

#### Additional Expenses Borne by the Funds

In addition to the fees described above, each Fund bears all of its own expenses (and each investor in a Fund bears its share), including, but not limited to:

- Transaction-related expenses, including brokerage, mark ups and mark downs, clearing expenses, margin interest expenses, currency hedging and custodial expenses;
- Fees and expenses of professionals retained by Taconic to advise it in connection with the Partnership's investment activities, including legal, accounting and fund administrator expenses;
- auditing and tax preparation expenses; and
- other expenses (including without limitation expenses related to particular portfolio positions or strategies) and extraordinary fees and expenses arising in connection with the

conduct of the Fund's activities, including litigation expenses and any other expenses not arising in the ordinary course of business.

Fund expenses generated in the course of evaluating and making investments (including proposed investments that are not ultimately consummated) are allocated among the Fund(s) for which the investment is being considered by Taconic in its good faith discretion and in accordance with the relevant Fund's Offering Memorandum and the Trade Allocation Procedures set forth in Taconic's Compliance Manual where applicable. Fees and expenses incurred in connection with investment opportunities are generally allocated in the same way Taconic has allocated that particular investment opportunity among the Funds. To the extent fees and expenses are incurred solely in connection with the offer for sale of an investment by one Taconic Fund to another Taconic Fund, such fees and expenses shall be allocated solely to the purchaser or prospective purchaser of such investment. For the avoidance of doubt, to the extent fees or expenses would have been incurred by a Taconic Fund in connection with an investment that is sold (or proposed to be sold) to another Taconic Fund even in the absence of such a sale (or proposed sale), such fees and expenses will be allocated as set forth in the first two sentences of this paragraph.

Routine operational and administrative expenses incurred by Taconic in the operation of its businesses (*e.g.*, salaries, office space, utilities, telephone and computer equipment and services) are generally borne by Taconic.

For more information on the transaction-related expenses that the Funds may incur, as well as on our broker selection process, please see Item 12 (the "Brokerage Practices" section of this Brochure).

### Layering of Fees

Taconic may enter into joint venture arrangements, co-invest with third parties or otherwise participate in pooled investment vehicles with others, or may allocate discrete portions of the Funds' assets to independent managers to manage on a discretionary basis, if Taconic determines that such an arrangement represents the best way to access a particular investment opportunity or otherwise expands the investment expertise otherwise available to the Funds. The Funds may incur various costs relating to such ventures, including additional performance-based or asset-based fees payable or allocable to the promoters, managers or sub-advisers of such ventures.

To the extent Taconic gives an unaffiliated investment manager discretionary authority over a specific portion of a Fund's assets pursuant to a sub-advisory arrangement, Taconic will pay any management fee or performance fee due to such sub-adviser out of the management fee Taconic receives from that Fund. If Taconic changes this policy, Taconic will give prompt notice to Fund investors. In other situations, however, Taconic will determine whether such fees shall be

deducted from its management fee or charged to the Fund as an additional fee. As a general rule, Taconic does not favor the layering of fees when investing in actively managed pooled vehicles. Sometimes, however, such layering may be appropriate. For example, Taconic may invest in certain opportunities where the investment thesis is based not only on the skills of an underlying manager, but also on such manager's ability to access a difficult market, and where the investment trades in a recognized public or private market. In such cases, Taconic may determine that it is appropriate for the affected Funds to bear the relevant performance-based or fixed asset-based fees.

### Withdrawal Fees

As an investor in an Opportunity Fund or Event-Driven Fund may incur withdrawal fees if that investor redeems from the Fund on a date other than an annual anniversary of his or her investment. While these fees are paid to the relevant Fund and not to Taconic, they can be significant, and should be taken into account by anyone considering an investment in a Fund.

Investors in a non-lock-up class in the Opportunity Funds and Event-Driven Funds may redeem 100% of their capital account or of the net asset value of their shares on each annual anniversary of their investment without penalty. Non-lock-up investors are also permitted to redeem up to 25% of their capital account or of the net asset value of their shares on each quarterly anniversary of their investment date without penalty. Withdrawals of greater than 25% on a quarterly anniversary are subject to a 2% withdrawal fee. Two-Year Lock-up investors in the Opportunity Funds and Event-Driven Funds may redeem, in the aggregate, 25% of their initial investment over the two-year lock-up period without penalty and may, in very limited circumstances, be eligible to convert their Two-Year Lock-Up investments to Non-Lock-Up investments prior to the expiration of the applicable Two-Year Lock-Up Period. All Opportunity and Event-Driven investors except for Three-Year Lock-up investors may also withdraw any portion of their capital account or of the net asset value of their shares as of any month end, subject to a 5% fee on any withdrawal in excess of the above withdrawals. Withdrawal fees are allocated to the remaining Fund investors. Three-Year Lock-up investors in the Opportunity Funds and Event-Driven Funds may not withdraw any capital or redeem shares during the three-year lock-up period, except in certain very limited circumstances, as set forth in their respective Confidential Private Offering Memoranda.

Certain investor withdrawals may be limited if more than 10% of the combined net asset value of all similarly-managed Funds (Opportunity Funds or Event-Driven Funds) advised by Taconic is requested to be redeemed as of any month-end. Taconic may in its sole discretion expressly waive or reduce any requirements or restrictions on withdrawals, including without limitation, the imposition of a withdrawal fee. Each Fund's withdrawal provisions are described in more detail in such Fund's Confidential Offering Memorandum.

Investors in the Sidecar I Funds were, and investors in the Sidecar II Funds are, subject to a 1.0% Withdrawal Fee on any withdrawals made (i) during the first 18 months following the Final Closing Date for the Sidecar I Funds and (ii) during the first 12 months following the Closing Date for the Sidecar II Funds. No withdrawals have been made or withdrawal fees paid with respect to the Sidecar I Funds or the Sidecar II Funds.

## **Item 6 - Performance-Based Allocation and Side-By-Side Management**

As stated above, Taconic is entitled to earn performance-based compensation with respect to certain Funds. Taconic enters into Performance Allocation arrangements with clients as outlined in Item 5. The potential Performance Allocations available to Taconic in connection with a particular Fund may be higher than those available to Taconic in connection with another Fund, whether in percentage or absolute dollar amounts. Taconic may have an incentive to devote more research and other activities, and/or allocate favorable investment opportunities, to such Funds with a higher fee structure. In addition, a Performance Allocation may give Taconic an incentive to cause a Fund (or permit a Fund) to make investments that are riskier or more speculative than would be the case if it were compensated solely based on a flat percentage of capital or net asset value. This presents a conflict between Taconic and its clients, but Taconic manages all client portfolios in a way that adheres to the fiduciary duty it owes to such clients. Taconic allocates resources fairly among clients and has implemented a trade aggregation and allocation policy that requires all accounts to be treated fairly and equitably over time with respect to the allocation of trades. The Compliance Department reviews trade allocations regularly for any deviation from this policy of equitable trade allocations.

The Performance Allocations were not the product of an arm's length negotiation with any third party, and because the Performance Allocations are calculated on a basis that includes unrealized appreciation of a Fund's assets (other than with respect to Side Pocket Investments, except in the event of a deemed liquidation or permanent impairment), such compensation may be greater than if it were based solely on realized gains.

## **Item 7 - Types of Clients**

Taconic provides investment advice on a discretionary basis to onshore and offshore Funds that are offered to high net worth, financially sophisticated, individual and institutional investors that may include banks or thrift institutions, investment companies, pension and profit sharing plans, governmental plans, trusts, estates or other business entities. Taconic does not manage any separate accounts for individual clients.

The minimum capital contribution or subscription amount in a Fund is typically \$1 million, although Taconic has the discretion to accept smaller investments or to set higher investment minimums. The Funds must offer their interests or shares only to persons who meet certain qualifications. Each U.S. Investor (taxable or tax-exempt) in a Fund (onshore or offshore) must

be an “Accredited Investor” within the meaning of the Securities Act of 1933 and a “Qualified Purchaser” within the meaning of the Investment Company Act of 1940, and may also be required to be a “Qualified Eligible Person” within the meaning of the Commodity Exchange Act in the case of certain Funds. Non-U.S. investors in any U.S.-organized (onshore) Fund must also be “Qualified Purchasers” and “Accredited Investors.” Non-U.S. investors may be subject to additional suitability requirements imposed by such investors’ home jurisdictions. The fact that an Investor may meet the regulatory requirements to be eligible to invest in a Fund, however, does not necessarily mean that such Fund is a suitable investment for such investor. Taconic has adopted subscription procedures that are intended to ensure that Taconic has a reasonable belief that investors who are accepted into a particular Fund are both eligible and suitable to invest in such Fund. The Funds are privately offered in reliance upon exemptions from the registration requirements of the Securities Act of 1933; accordingly investment in the Funds is not open to the general public.

## **Item 8 - Methods of Analysis, Investment Strategies and Risk of Loss**

### Event-Driven and Opportunity Funds

The Event-Driven Funds and the Opportunity Funds focus on event investing, which Taconic defines as investing in securities and instruments of companies undergoing extraordinary events that are expected to affect the value of one or more securities of a company. While both the Event-Driven Funds and Opportunity Funds currently invest in credit investments, equity investments with a catalyst and capital structure arbitrage/hedged credit investments, the Opportunity Funds are free from some of the event, timing, liquidity and risk constraints that have been placed on the Event-Driven Funds. In credit investment activities, the Event-Driven Funds and Opportunity Funds currently focus on liquidations, complex distressed credit, structured credit and short-dated credit. The Event-Driven Funds and Opportunity Funds’ catalyst equity investment strategy currently comprises merger arbitrage, post-reorganization securities, volatility and other catalyst-driven investment opportunities. The capital structure arbitrage/hedged credit strategy currently focuses on basis trades and relative value investing. The areas of focus of Taconic may change over time. The Event-Driven Funds and Opportunity Funds invest in both U.S. and non-U.S. companies.

The Funds employ a bottom-up, research-driven, distributed decision-making approach to probabilistic investing. Probabilistic investing involves developing judgments about probabilities and prices of possible outcomes, then using expected value and risk analysis to determine if the return justifies the risk. Key to the process is the uncovering of all relevant available information, valuation of companies, securities and instruments, and an understanding of the behaviors of corporate executives, boards of directors, judges and juries, governments and regulators, securities, markets, institutional investors and hedge funds. Taconic uses probabilistic investing across a broad array of markets and considers it to be Taconic’s cornerstone for investing in securities that Taconic believes are mispriced.

In event investing, Taconic generally realizes profits from the difference between the purchase price of the security or other instrument of the company undergoing a specified event and the sales price obtained upon completion of the event. Taconic employs a research-based investment approach that depends on analysis, judgment and experience. Taconic evaluates four factors with respect to each potential investment:

- the probability that the anticipated event will occur;
- the expected value of the investment if the anticipated event does occur;
- the expected value of the investment if the anticipated event does not occur; and
- the timing of the anticipated event.

Decision-making is highly dynamic as Taconic evaluates and acts on changes in information and market prices on a real time basis.

Taconic has broad investment discretion in seeking to achieve the Funds' objectives, and the Funds may invest in the broadest range of securities and instruments (pre-existing or to be issued), including claims, obligations and derivatives such as swaps. Both the Event-Driven Funds and the Opportunity Funds are subject to diversification requirements and risk limitations that are set forth in more detail in each Fund's Confidential Private Offering memorandum.

Taconic pursues a flexible investment style and employs investment techniques and strategies that it believes help the Funds pursue their investment objectives. Taconic cannot assure that any Fund will ultimately achieve the investment objectives described herein or that any investment technique or strategy Taconic employs will be successful.

#### Sidecar Funds

The Sidecar I Funds were designed to capitalize on investment opportunities in trade claims of two Icelandic banks created by the recent financial crisis.

The Sidecar II Funds are designed to capitalize on investment opportunities in convertible notes and attached shares issued by an Icelandic bank.

The Sidecar III Funds are designed to capitalize on investment opportunities in an expected private placement of equity securities in an Icelandic bank.

Taconic may launch additional Sidecar funds in the future with different investment strategies.

#### ECDF Funds

The ECDF Funds are designed to capitalize on investment opportunities arising from the economic and financial crisis in Europe. The ECDF Funds focus on illiquid opportunities,

including direct lending transactions to small- and medium-sized enterprises (“SMEs”) that are too small to access high-yield markets and not large enough to be of interest to major banks, and distressed debt investments including debt and equity transactions to take ownership of underlying assets. Although the ECDF Funds may make investments throughout Europe, it focuses on opportunities in Spain. The ECDF Funds focus on direct lending to SMEs and on investing in distressed debt secured by commercial real estate, as well as distressed debt investments in renewable energy assets, non-performing loans and receivables factoring. The ECDF Funds seek to take advantage of the best of these opportunities (regardless of the liquidity profile of these investments) by utilizing a structure that is designed to minimize liquidity risk.

### Risk of Loss

An investment in any Fund involves a high degree of risk, including the risk that the entire amount invested may be lost. Further, event investing generally involves relatively small profits on a large number of investments and relatively large losses when an event goes wrong, either because the anticipated event does not happen or the terms are adversely changed. Taconic analyzes and makes judgments regarding the probability of events including:

- the consummation or delay of, or failure to consummate, a merger and the price at which it occurs;
- the success or failure of a tender or exchange offer;
- the success, failure or delay of a corporate reorganization; and
- various bankruptcy related events.

In addition, successful event investing requires that Taconic analyze and evaluate the unique set of facts and circumstances of each event and to make judgments on:

- the price expected to be realized;
- the time to completion;
- the probability of success; and
- the loss if the investment is unsuccessful.

Taconic attempts to mitigate the risk of large losses by adjusting the position size in each investment by the likely expected loss if the anticipated event does not happen, by diversifying a Fund’s portfolio and by investing at what Taconic believes to be the high quality end of available investment opportunities. However, if there are an unexpected number of failed events or incorrect judgments, a Fund could suffer substantial losses. Additionally, in prolonged periods

of very low short-term interest rates, the Funds' performance will likely suffer. Taconic cannot guarantee that any Fund will ultimately achieve its investment objective.

In addition the Funds are subject to the risks inherent in the wide range of opportunities in which they may invest. These generally include the following risks:

#### Equity Risk

The market price of securities owned by a Fund may go up or down, sometimes rapidly or unpredictably. The values of equity securities may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also decline due to factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. In addition, securities that Taconic believes are fundamentally undervalued or incorrectly valued may not ultimately be valued in the capital markets at prices and/or within the time frame the Funds anticipate. As a result, a Fund may lose all or substantially all of its investment in any particular instance.

#### Fixed-Income Securities

The Funds may invest in bonds or other fixed-income securities, including, without limitation, commercial paper and "higher yielding" (and, therefore, higher risk) debt securities. Such securities may be below "investment grade" and may face ongoing uncertainties and exposure to adverse business, financial or economic conditions that could lead to the issuer's inability to meet timely interest and principal payments. The market values of certain of these lower-rated debt securities tend to reflect individual corporate developments to a greater extent than do higher-rated debt securities, which react primarily to fluctuations in the general level of interest rates, and tend to be more sensitive to economic conditions than higher-rated securities. Companies that issue lower-rated debt securities often are highly leveraged and may not have access to more traditional methods of financing. Trading in such securities may be limited or disrupted by an economic recession, resulting in an adverse impact on the value of such securities. In addition, it is likely that any such economic downturn could adversely affect the ability of the issuers of such securities to repay principal and pay interest thereon and, therefore, increase the incidence of default for such securities.

#### Distressed Investments

Investment in the securities and other instruments of financially and/or operationally troubled issuers involves a high degree of credit and market risk. Securities and other instruments of such issuers are typically more volatile and less liquid than securities or instruments of companies not experiencing such difficulties.

If a company is in bankruptcy, bondholders' and other creditors' claims are subject to factors such as deterioration of collateral during a stay in bankruptcy, challenges and/or possible invalidation of security interests, and disallowance or subordination of claims, all of which may be difficult to predict. Failure to accurately assess these situations could have a detrimental effect on the Funds' distressed investments.

### Private Debt Transactions

The Funds may also invest in bank loans, make loans directly to creditors and engage in other types of private debt investments. Such investments are not traded on regulated exchanges, are not registered with U.S. or other governmental authorities and are not subject to the rules of any self-regulatory organization. Investment in bank loans may be in the form of either a participation or an assignment, although Taconic generally expects most bank loan investments to be assignments.

There are varying sources of statistical default rate data for term bank loans and numerous methods for measuring default rates. The historical performance of the term loan market is not necessarily indicative of its future performance. Should increases in default rates occur with respect to the bank loans in which the Funds invest, the Funds will suffer greater losses or reduced profits. Such information may be limited or unavailable with respect to other debt investments made by the Funds.

The Funds may also invest in bank loan participations, which involve certain risks in addition to those associated with direct loans. A bank loan participant has no contractual relationship with the borrower of the underlying bank loan. As a result, the participant is generally dependent upon the lender to enforce its rights and obligations under the agreement in the event of a default and may not have the right to object to amendments or modifications of the terms of such agreement. A participant in a syndicated bank loan generally does not have voting rights, which are retained by the lender. In addition, a bank loan participant is subject to the credit risk of the lender as well as the borrower, since a bank loan participant is dependent upon the lender to pay its percentage of payments of principal and interest received on the underlying loan.

### Short Sales

Taconic may engage in a significant amount of short selling. Short selling, which involves selling securities not owned by the Funds, necessarily involves certain risks. These transactions expose the Funds to the risk of loss in an amount greater than the initial investment, and the losses can increase rapidly and without an effective limit. There is the risk that the securities borrowed by the Funds in connection with a short sale must be returned to the securities lender on short notice. If a request for return of borrowed securities occurs at a time when other short sellers of the security are receiving similar requests, a "short squeeze" can occur, and the Funds may be compelled to replace borrowed securities previously sold short with purchases on the

open market at a very disadvantageous time, possibly at prices significantly in excess of the proceeds received in originally selling the securities short.

### Derivatives in General; Hedging

The Funds may use a variety of financial instruments, such as short sales, options, swaps, caps and floors, and futures and forward contracts and similar derivatives, both for investment and risk management purposes. The use of derivative instruments involves a variety of material risks, including the extremely high degree of leverage sometimes embedded in such instruments. While the Funds may enter into derivative transactions to seek to reduce risk, such transactions may not be fully effective in mitigating the risks in all market conditions or against all types of risk (including unanticipated risks), incurring losses to the Funds. The pricing relationships between derivatives and the instruments underlying such derivatives may not correlate with historical patterns, resulting in unexpected losses. Accordingly, such derivative transactions may result in poorer overall performance for the Funds than if they had not engaged in such transactions.

Use of derivatives and other techniques such as short sales for hedging purposes involves certain additional risks, including (i) dependence on the ability to predict movements in the price of the securities hedged; (ii) imperfect correlation between movements in the securities on which the derivative is based and movements in the assets of the underlying portfolio; and (iii) possible impediments to effective portfolio management or the ability to meet short-term obligations because of the percentage of a portfolio's assets segregated to cover its obligations. In addition, by hedging a particular position, any potential gain from an increase in the value of such position may be limited. Furthermore, to the extent that any hedging strategy involves the use of "over-the-counter" ("OTC") derivatives transactions, it would be affected by implementation of the various regulations adopted pursuant to the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank"). Finally, Taconic may decide not to hedge against, or may not anticipate, certain risks and the Funds will remain exposed to certain risks that cannot be hedged in some instances.

### Swaps and Other Derivatives

The Funds may enter into swap and similar derivative transactions involving or relating to interest rates, credit risks, non-U.S. currencies, commodities, securities, investment fund interests, indices, prices or other items. A bilateral swap transaction is an individually negotiated, non-standardized agreement between two parties to exchange cash flows (and sometimes principal amounts) measured by different interest rates, commodity prices, exchange rates, indices or prices, with payments generally calculated by reference to a principal ("notional") amount or quantity. Bilateral swap contracts and similar derivative contracts are not traded on exchanges; rather, banks and dealers act as principals in these markets. As a result, the Funds are subject to the risk of the inability or refusal to perform with respect to such contracts

on the part of the counterparties with which the Funds trade. Speculative position limits are not currently applicable to swap transactions, although the counterparties with which the Funds deal may limit the size or duration of positions available to the Funds as a consequence of credit considerations. However, Dodd-Frank significantly expands the CFTC's authority to impose position limits with respect to swaps that are traded on a regulated exchange and certain swaps that perform a significant price discovery function. In response to this expansion of its authority, in 2012 the CFTC proposed a series of new speculative position limits with respect to futures and options on futures on so-called "exempt commodities: (which includes most energy and metals contracts) and with respect to agricultural commodities. Those proposed speculative position limits were vacated by a United States District Court, but the CFTC has again proposed a new set of speculative position rules which are not yet finalized (or effective). If the CFTC is successful in this second try, the counterparties with which the Funds deal may further limit the size or duration of positions available to the Funds. All accounts owned or managed by Taconic are likely to be combined for speculative position limit purposes. The Funds could be required to liquidate positions it holds in order to comply with such limits, or may not be able to fully implement trading instructions, in order to comply with such limits. Any such liquidation or limited implementation could result in substantial losses to a Fund.

#### Investment in Small Companies

Although the Funds focus generally on larger capitalization stocks, there is no limitation on the size or operating experience of the companies in which the Funds may invest. Some small companies in which the Funds may invest may lack management depth or the ability to generate internally or obtain externally the funds necessary for growth. Companies with new products or services could sustain significant losses if projected markets do not materialize. Further, such companies may have, or may develop, only a regional market for products or services and may be adversely affected by purely local events. Such companies may be small factors in their industries and may face intense competition from larger companies and entail a greater risk than investment in larger companies.

#### Non-U.S. Investments

The Funds may make non-U.S. investments, including in emerging and frontier markets. Such investments may be subject to a greater risk than U.S. investments due to non-U.S. economic, political and legal developments, including favorable or unfavorable changes in currency exchange rates, abandonment of a common currency, withdrawal of one or more countries from a common currency, exchange control regulations (including currency blockage), expropriation of assets or nationalization, imposition of taxes on dividends, interest payments or capital gains, the need for approval by government or other authorities to make investments, governmental corruption and lack of transparency and possible difficulty in obtaining and enforcing judgments against non-U.S. entities and other factors beyond the control of the Funds. Furthermore, issuers of non-U.S. securities are subject to different, often less comprehensive accounting, reporting or

disclosure requirements than U.S. issuers. The securities markets of some countries in which the Funds may invest have substantially less volume than those in the United States, and securities of certain companies in non-U.S. countries are less liquid and more volatile than securities of comparable U.S. companies. Accordingly, non-U.S. markets may be subject to greater influence by adverse events generally affecting the market, and by large investors trading significant blocks of securities, than is usual in the United States. Brokerage commissions and other transaction costs on securities exchanges in non-U.S. countries are generally higher than in the United States. Non-U.S. securities settlements may in some instances be subject to delays and related administrative uncertainties. These risks are heightened in emerging markets.

#### Reliance on Corporate Management and Financial Reporting

Taconic relies on the financial information made available by the issuers in which the Funds invest. Taconic has no ability to independently verify the financial information disseminated by the numerous issuers in which the Funds may invest and is dependent on the integrity of both the management of these issuers and the financial reporting process in general. Corporate mismanagement, fraud and accounting irregularities relating to the Funds' positions may result in material losses. Equity prices are particularly vulnerable to corporate mismanagement.

#### Options

The Funds may invest in options. Purchasing put and call options, as well as writing such options, are highly specialized activities and entail greater than ordinary investment risks. Although an option buyer's risk is limited to the amount of the original investment for the purchase of the option, an investment in an option may be subject to greater fluctuation than is an investment in the underlying securities. In theory, an uncovered call writer's loss is potentially unlimited. The risk for a writer of a put option is that the price of the underlying securities may fall below the exercise price. The ability to trade in or exercise options may be restricted in the event that trading in the underlying securities becomes restricted.

The Funds may take advantage of opportunities with respect to swaps, options on various underlying instruments and swaptions and certain other customized "synthetic" derivative instruments, including instruments which are not presently contemplated or available for use by the Funds, which may involve special and unforeseeable risks.

#### Futures and Options on Futures Contracts

In entering into futures contracts and options on futures contracts, there is a credit risk that counterparty will not be able to meet its obligations. The counterparty for futures contracts and options on futures contracts traded in the United States and on most foreign futures exchanges is the clearinghouse associated with such exchange. In general, clearinghouses are backed by the corporate members of the clearinghouse who are required to share any financial burden resulting from the non-performance by one of its members and, as such, should significantly reduce this

credit risk. In cases where the clearinghouse is not backed by the clearing members (*i.e.*, some foreign exchanges), it is normally backed by a consortium of banks or other financial institutions. There can be no assurance that any counterparty, clearing member or clearinghouse will be able to meet its obligations.

In addition, under the Commodity Exchange Act, futures commission merchants are required to maintain customers' assets on a segregated basis. If a Fund engages in futures and options contract trading and the futures commission merchants with whom that Fund maintains accounts fail to so segregate that Fund's assets or are not required to do so, the Fund will be subject to a risk of loss in the event of the bankruptcy of any of its futures commission merchants. Even where customers' funds are properly segregated, a Fund might be able to recover only a *pro rata* share of its property pursuant to a distribution of a bankrupt futures commission merchant's assets.

Futures contracts gains and losses are marked-to-market daily for purposes of determining margin requirements. Option positions generally are not, although short option positions will require additional margin if the market moves against the position. Due to these differences in margin treatment between futures and options, there may be periods in which option positions on both sides must be closed down prematurely due to short-term cash flow needs. Were this to occur during an adverse move in the spread or straddle relationships, a substantial loss could occur.

Under certain circumstances, futures exchanges may establish daily limits on the amount that the price of a futures contract or an option on a futures contract can vary from the previous day's settlement price; once that limit is reached, no trades may be made that day at a price beyond the limit. Daily price limits do not limit potential losses because prices could move to the daily limit for several consecutive days with little or no trading, thereby preventing liquidation of unfavorable positions.

#### Regulation of Over-the-Counter Transactions

Some of the markets in which the Funds may effect transactions are OTC or "interdealer" markets. Dodd-Frank includes provisions that comprehensively regulate the OTC derivatives markets. Dodd-Frank will ultimately require that a substantial portion of OTC derivatives must be executed in regulated markets and be submitted for clearing to regulated clearinghouses. OTC trades submitted for clearing will be subject to minimum initial and variation margin requirements set by the relevant clearinghouses, as well as possible margin requirements mandated by the CFTC, SEC and/or federal prudential regulators. OTC derivatives dealers typically demand the unilateral ability to increase a Fund's collateral requirements for cleared OTC trades beyond any regulatory and clearinghouse minimums. The regulators also have broad discretion to impose margin requirements on non-cleared OTC derivatives and new requirements apply to the holding of customer collateral by OTC derivative dealers. These requirements may

increase the amount of collateral a Fund is required to provide and the costs associated with providing it.

OTC derivative dealers are required to post margin to the clearinghouses through which they clear their customers' trades instead of using such margin in their operations, as was widely permitted before Dodd-Frank. This has increased and will continue to increase the dealers' costs, which are generally passed through to other market participants in the form of higher fees, less favorable dealer marks and the imposition of new or increased fees, including clearing account maintenance fees.

With respect to cleared OTC derivatives, Taconic will not face a clearinghouse directly but rather will do so through an OTC derivatives dealer that is registered with the CFTC or SEC that acts as a clearing member. Taconic may face the indirect risk of the failure of another clearing member customer to meet its obligations to its clearing member. Such scenario could arise due to a default by the clearing member on its obligations to the clearinghouse, triggered by a customer's failure to meet its obligations to the clearing member.

The SEC and CFTC also now require certain derivative transactions that were previously executed on a bi-lateral basis in the OTC markets to be executed through a regulated securities, futures, or swap exchange or execution facility. Certain CFTC-regulated derivatives trades have been subject to these rules since February 2014. The SEC is also expected to impose similar requirements on certain security-based derivatives in the near future, though it is not clear yet when these parallel SEC requirements will go into effect. Such requirement may make it more difficult and costly for investment funds to enter into highly tailored or customized transactions. They may also render certain strategies in which the Funds might otherwise engage impossible or so costly that they will no longer be economical to implement. If Taconic decides to execute derivative transactions through such exchanges or execution facilities and especially if it decides to become a direct member of one or more of these exchanges or execution facilities, Taconic would be subject to all of the rules of the exchange or execution facility, which would bring additional risk and liabilities, and potential additional regulatory requirements under applicable regulations and under rules of the relevant exchange or execution facility.

OTC derivative dealers are now required to register with the CFTC and will ultimately be required to register with the SEC. Registered swap dealers will also be subject to new minimum capital and margin requirements and are subject to business conduct standards, disclosure requirements, reporting and recordkeeping requirements, transparency requirements, position limits, limitations on conflicts of interest and other regulatory burdens. These requirements further increase the overall costs for OTC derivative dealers and other market participants, which costs may be passed along, at least partially, to market participants, such as the Funds, as market changes continue to be implemented. The overall impact of Dodd-Frank on the Funds remains highly uncertain and it is unclear how the OTC derivatives markets will adapt to this new

regulatory regime, along with additional sometimes overlapping regulatory requirements imposed by non-U.S. residents.

### Mortgage-Backed Securities

The Funds may invest in mortgage-backed securities or “MBS.” MBS are securities that entitle the holders thereof to receive payments that depend on the cash flow from mortgage loans secured by real estate (except for rights or other assets designed to ensure the servicing or timely distribution of proceeds to holders of such securities). MBS have yield and maturity characteristics corresponding to their underlying assets. Unlike traditional debt securities, which may pay a fixed rate of interest until maturity when the entire principal amount comes due, payments on certain MBS (principally relating to residential mortgages) include both interest and a partial payment of principal. This partial payment of principal may comprise both a scheduled principal payment as well as an unscheduled payment from the voluntary prepayment, refinancing or foreclosure of the underlying loans. As a result of these unscheduled payments of principal, or prepayments on the underlying securities, the price and yield of MBS can be adversely affected. For example, during periods of declining interest rates, prepayments can be expected to accelerate, and the Funds would be required to reinvest the proceeds at the lower interest rates then available. Prepayments of mortgages that underlie securities purchased at a premium could result in capital losses because the premium may not have been fully amortized at the time the obligation is prepaid. In addition, like other interest-bearing securities, the values of MBS generally fall when interest rates rise, but when interest rates fall, their potential for capital appreciation is limited due to the existence of the prepayment option. There is no geographic, credit or other restrictions with respect to the mortgage collateral which may be collateralized.

Commercial mortgage-backed securities and asset-backed securities are also subject to comparable risks.

### Securities Lending

As a means of earning additional income or for other reasons, the Funds may lend securities from their portfolios to brokers, dealers and other financial institutions that need to borrow securities to complete certain transactions. Each Fund’s lending of securities is generally governed by a master securities loan agreement, which, among other things, requires the borrower to pledge collateral to that Fund to secure the return of the loaned securities and the borrower’s other obligations under the master securities loan agreement. In general, the collateral provided by the borrower may consist of certain types of securities, cash or irrevocable letters of credit. The Funds are entitled to payments in amounts equal to the interest, dividends or other distributions payable on the loaned securities, which affords the Funds an opportunity to earn interest on the amount of the loan and current income on the loaned securities themselves. However, Taconic does not vote proxies on securities that are lent. In addition, the Funds might experience a loss of any institution with which the Funds have engaged in a portfolio loan

transaction breaches its agreement with the Funds. If the borrower becomes insolvent or bankrupt, the Funds could experience delays and costs in recovering loaned securities. To the extent that, in the meantime, the value of the loaned securities declines, the Funds could experience further losses.

#### Activist Investing and Special Situations

Taconic from time to time seeks to effect change in companies in which it invests in order to increase the value of such investment. Such changes may involve mergers, acquisitions, liquidations, spin-offs, reorganizations, bankruptcies and similar transactions. In addition, Taconic may make investments in companies based on their involvement in (or their being a target of) acquisition attempts, tender offers, work-outs, liquidations, spin-offs, reorganizations, bankruptcies and similar transactions. In any such investment, there exists the risk that the anticipated changes or transactions will be unsuccessful, take considerable time or result in a distribution of cash or a new security the value of which will be less than the purchase price to the Funds of the security or other financial instrument in respect of which such distribution is received. Similarly, if an anticipated transaction does not in fact occur, the Funds may be required to sell its investment at a loss. Because there is substantial uncertainty concerning the outcome of these transactions, there is a potential risk of loss by the Funds of its investment in such companies.

The Funds may also seek to work constructively with management of certain of the Funds' investments. There can be no assurance that the management of any company will agree or acquiesce to the Funds' involvement in the affairs of the company, or that the strategies that the Funds hope to implement will be effective. Portfolio companies may respond to the Funds' proposals by litigation or other defensive measures, which may adversely affect the value of the Funds' investment and may result in high transaction expenses, particularly if the Funds resort to measures to protect the value of its investment. If the Funds resort to protective measures, such activity could also produce negative publicity for the Funds, which may itself have adverse consequences.

Activist investing may expose a Fund to significant legal and regulatory risk. Such investing may also subject a Fund to filing fees and other additional expenses, may require the Fund to publicly disclose certain of its positions and may adversely affect the Fund's ability to acquire or dispose of investment positions.

The Principals or any other officers or employees of Taconic may serve as executive officers or directors of certain companies in which the Fund invests. The exercise of control or influence over the management and policies of a company through such service could expose the assets of the Fund to claims by the portfolio company, its security holders and creditors, or could impose additional risks of liability for environmental damage, product defects, failure to supervise

management, violation of governmental regulations and other types of liability. If these liabilities were to occur, the Fund could suffer losses in their investments.

### Markets with Limited Liquidity

Some of the securities and other assets in which the Funds invest are thinly traded, which means that they may have limited liquidity and may be disposed of quickly only at substantial discounts or losses. The limited liquidity of a Fund's portfolio may affect the ability of investors to receive cash withdrawal proceeds. If withdrawals or other distributions are affected in kind, investors may be required to bear the economic risk of ownership of such investments for an indefinite period. In addition, investments held as side pocket investments may not be withdrawn until such investments are liquidated or another realization or deemed realization event occurs.

These and other risks are described in more detail in the each Fund's Confidential Private Offering Memorandum. Investing in securities involves a risk of loss that you should be prepared to bear.

### Supply of Investment Opportunities and Demand for Such Investments

Among other factors, the returns on investments available in the marketplace are a function of the supply of investment opportunities and the amount of capital investing in such opportunities. The Fund's returns fluctuate with the supply of, and demand for, investment opportunities available in the marketplace.

### Leverage

The Funds may leverage its securities positions by borrowing funds from securities broker-dealers, banks or others, by trading on margin, and by trading derivative instruments that are inherently leveraged. In addition, the Funds may incur financing charges relating to such borrowing.

The unavailability of debt financing at favorable terms, whether from prime brokers, banks or others, may have a negative impact on the Fund's returns. There is no assurance that the Funds will continue to be able to secure sufficient debt financing for its current investment strategy, or that debt financing, if available, will be available at favorable terms.

### General Real Estate Risks

The Funds may invest in real estate, either directly or in debt secured by real estate and other hard assets. The value of real estate fluctuates depending on conditions in the general economy and the real estate business. The factors that affect the value of real estate investments include, among other things: national, regional and local economic conditions; the condition of financial markets; developments or trends in a particular industry; competition from other available space; local conditions such as an oversupply of space or a reduction in demand in the area; management of properties; the development and/or redevelopment of properties; changes in market rental and occupancy rates; the timing and costs associated with property improvements

and rentals; changes in operating expenses; the financial condition of tenants; availability of obtaining financing on acceptable terms; fluctuations in interest rates; changes in zoning laws and taxation; government regulation; potential liability under environmental or other laws or regulations; and acts of God, terrorist attacks, social unrest and civil disturbances. The value of a Fund's investments directly in real estate or in debt secured thereby may decline as a result of adverse changes in any of these factors. In addition, adverse changes in the real estate market increase the probability of default, as the equity in the underlying property declines.

Investing in real estate and real estate-related instruments is subject to cyclicity and other uncertainties. There can be no assurance as to a Fund's performance in a weaker market or weakened economy. The cyclicity and leverage associated with real estate and real estate-related investments have historically resulted in periods, including significant periods, of adverse performance, including performance that may be materially more adverse than the performance associated with other investments.

#### Risk of Litigation

In the ordinary course of business, the Funds may be subject to litigation from time to time. In addition, the Funds may accumulate substantial positions in the securities of issuers that become involved in proxy contests or other litigation. As a result of such investments, the Funds could be named as a defendant in a lawsuit or regulatory action. The outcome of such proceedings, which may materially adversely affect the value of the Funds, may be impossible to anticipate, and such proceedings may continue without resolution for long periods of time. Any litigation may result in substantial expense to the Fund and may consume substantial amounts of Taconic's time and attention, and such expense, time and devotion of resources to litigation may, at times, be disproportionate to the amounts at stake in the litigation.

#### Cybersecurity Breaches

The Funds are subject to risks associated with a breach in its cybersecurity. Cybersecurity is a generic term used to describe the technology, processes and practices designed to protect networks, systems, computers, programs and data from "hacking" by other computer users, other unauthorized access and the resulting damage and disruption of hardware and software systems, loss or corruption of data as well as misappropriation of confidential information. If a cybersecurity breach occurs, the Funds may incur substantial costs, including those associated with: forensic analysis of the origin and scope of the breach; increased and upgraded cybersecurity; investment losses from sabotaged trading systems; identity theft; unauthorized use of proprietary information; litigation; adverse investor reaction; the dissemination of confidential and proprietary information; and reputational damage. Any such breach could expose both Taconic and the Funds to civil liability as well as regulatory inquiry and/or action. In addition, any such breach could cause substantial withdrawals from the Funds. In addition, Fund investors could be exposed to additional losses as a result of unauthorized use of their personal information.

## **Item 9 - Disciplinary Information**

Taconic has not been involved in any legal or disciplinary events since its inception that would be material to your evaluation of Taconic, the Funds, or any of Taconic's personnel. In addition, none of Taconic's principals or employees has been involved in any legal or disciplinary events in the past ten years (or, to our knowledge, prior to that ten-year period) that would be material to your evaluation of Taconic, the Funds or any of Taconic's personnel.

## **Item 10 - Other Financial Industry Activities and Affiliations**

Neither Taconic nor any of its principals or employees has any relationships or arrangements with a related financial services company or other service provider that pose material conflicts of interest.

As previously noted, Taconic provides investment management services to the private investment funds identified at Item 4 of this Brochure. In addition, Taconic has formed a number of entities to serve as General Partner to Taconic and to the Funds that are structured as Delaware limited partnerships or Cayman limited partnerships. Those General Partner entities are identified below:

<b>Name of Entity</b>	<b>Serves as General Partner to</b>
Taconic Capital Performance Partners LLC	Taconic Capital Advisors L.P.
Taconic Capital Partners LLC	Taconic Capital Partners 1.5 L.P. Taconic Offshore Intermediate Fund 1.5 L.P. Taconic Master Fund 1.5 L.P.
Taconic Associates LLC	Taconic Opportunity Fund L.P. Taconic Opportunity Intermediate Fund L.P. Taconic Opportunity Master Fund L.P.
Taconic ECDF LLC	Taconic European Credit Dislocation Fund L.P. Taconic European Credit Dislocation Fund Offshore Fund L.P. Taconic European Credit Dislocation Master Fund L.P.
Taconic Sidecar GP LLC	Taconic Sidecar Fund II L.P. Taconic Sidecar Fund III L.P.

Finally, as mentioned previously, TCA is a related SEC-registered investment adviser located in the United States. TCA is managed through Taconic Capital Performance Partners LLC, its General Partner. TCA serves as investment manager to all of the Funds identified at Item 4 of this Brochure, as well as to Taconic CRE Dislocation Fund L.P., Taconic CRE Dislocation Onshore Fund L.P. and Taconic Employee Fund L.P., all of which are described more fully in the TCA Brochure, and is paid the fees described at Item 5 of this Brochure. You can find more information about TCA at its Form ADV and Brochure. Taconic will deliver a copy of the TCA Brochure with every copy of this Brochure that is delivered to a Fund or a Fund investor or prospective investor.

TCA is registered with the Commodity Futures Trading Commission as a commodity pool operator. TCA is also a member of the National Futures Association.

## **Item 11 - Code of Ethics, Participation or Interest in Client Transactions and Personal Trading**

Taconic principals and certain Taconic employees generally invest some of their personal assets in the Funds, and therefore hold indirect interests in the same underlying securities as other investors in the Funds. In addition, Taconic principals and employees may hold positions in, and sell for their own accounts (although only after preclearance) the same securities that Taconic buys and sells for the Funds. Taconic has adopted a Code of Ethics pursuant to the U.S. Investment Advisers Act of 1940 that limits the ability of Taconic personnel to trade in securities for their personal accounts and requires all personnel to preclear certain personal securities transactions with the Taconic Compliance Department. The Code also requires all personnel to report their personal trading activity to the Compliance Department. To reduce the potential conflicts between the personal trading of Taconic principals and employees and the trading of the Funds, the Code generally does not permit any Taconic principal or employee to purchase any single name publicly traded stocks or corporate bonds, and allows sales of such securities only after such person requests preclearance of such trades. As a practical matter, principals and employees are limited to trading in pooled vehicles such as mutual funds, closed-end investment companies, ETFs and private investment funds, as well as certain private securities, municipal bonds, government securities, and other high quality, short-term debt securities that Taconic has determined are not likely to cause a conflict with the Funds' trading.

The Code also explains each person's duty to maintain the confidentiality of Taconic's proprietary information as well as a policy against insider trading and restrictions with respect to giving or receiving of gifts and entertainment or making political contributions. Taconic provides all principals and employees with annual Code of Ethics training, and Taconic provides supplemental training with respect to the issues surrounding the use of material, non-public information from time to time, as needed. Upon request, Taconic will send you a copy of the Code of Ethics free of charge.

Taconic does not engage in principal transactions or agency cross transactions. To the extent permitted by applicable law, Taconic may enter into transactions and invest in securities, instruments or other investments (including other forms of financing) on behalf of the Funds in which Taconic or its affiliates acts as agent on behalf of the Fund and the other Taconic-affiliated party to the transaction. Cross transactions enable Taconic to purchase or sell a block of securities or other investments for the Funds at a set price and possibly avoid an unfavorable price movement that may be created through entrance into the market with such purchase or sell order. The relevant affiliate may have a potentially conflicting division of responsibilities to both parties to such cross transaction. Taconic will only consider engaging in a cross transaction with an affiliate of Taconic to the extent permitted by applicable law, including, if required or appropriate, the making of appropriate disclosure to and compliance with the policies set forth below under “Offer of Instruments Held by the Taconic Funds.”

Also, from time to time, for business reasons Taconic may prefer to transfer the economic performance of portfolio assets (without transferring the actual assets) or to purchase or sell assets among certain Funds within the same Fund family by using swap agreements, participation agreements and other arrangements. As with the purchase or sale of assets among the Funds, Taconic has a potential conflict of interest in determining the economic terms of these arrangements. Taconic will also have a conflict of interest should any of these arrangements suffer a default. Taconic acts in what Taconic believes to be the best interests of all entities, basing pricing determinations on identical valuation procedures for each of such entities.

Because both Taconic’s principals and employees and its General Partner entities invest in the Funds, there may be an incentive to allocate investments in the Funds in a way that favors Taconic. Taconic has adopted allocation procedures that are designed to ensure that all allocations are made in the best interests of the Funds. Please see Multiple Clients; Trade Aggregation and Allocation under Item 12 – Brokerage Practices, for a summary of these procedures.

#### Offer of Instruments Held by the Taconic Funds

Taconic from time to time offers to one or more Funds, other Taconic Funds and/or other funds or accounts managed or advised by third party managers, participations in, and/or assignments or sales of, loans (or interests therein) or other assets that Taconic has acquired (whether at original issuance or otherwise). Such offers will usually be made after Taconic has held such investment (including the portion offered) for a period of time. In the event that there are significant losses in respect of such investment prior to such sale or assignment, the vehicle that originally purchased such investment would bear all such losses. If such an offer is made to any Fund, the price of the participation or assigned or sold interest (as the case may be) will be based upon the fair value as determined in accordance with Taconic’s Valuation Policy. To the extent there is no observable market price or exchange price, such valuation will be established based in accordance with Taconic’s Valuation Policy (including, if necessary, third-party valuations) and

reviewed by Taconic's Valuation Committee. Further, the decision by Taconic to offer participations in and/or assignments or sales of investments (or interests therein) will be made by certain Principals of Taconic, and the decision by the other Funds to accept or reject such offer will similarly be made by certain other Principals of Taconic in accordance with Taconic's policies.

## **Item 12 - Brokerage Practices**

### Brokerage Selection, Best Execution and Use of Soft Dollars

Taconic is authorized, without limitation, to determine the broker or dealer to be used for each securities transaction for the Funds and to determine the commission rates paid on equity trades, and the final price paid on fixed income or other trades where a spread is built in the price in lieu of commission. In placing orders, Taconic seeks the most favorable execution terms reasonably available given the specific circumstances of each trade. Taconic considers the overall reputation and the level of service provided in selecting brokers to execute transactions. While Taconic generally seeks the most competitive rate, Taconic may select brokers who have a superior level of service rather than the lowest commission rate available on equity trades. Similarly, in the fixed income context factors other than price may factor into the execution decision.

Where best price and execution may be obtained from more than one dealer, Taconic may purchase and sell securities through dealers who provide research, statistical and other information. Taconic uses soft dollar benefits to service all of the Funds, not just the particular Fund or Funds that generated the soft dollars, although within any particular transaction the Fund generating the soft dollar benefit may not benefit from the research or other information obtained. In general, brokers may provide the following research or general assistance:

- General economic and market reviews;
- Industry and company reviews;
- Evaluations of investments and recommendations as to the purchase and sale of investments; and
- Assistance in obtaining access to corporate executives, including on-site corporate visits, as well as access to industry experts and invitations to industry seminars.

When Taconic uses brokers who also provide us with research or services, a portion of the commission the Funds pay to such brokers pays for such research or services. In these cases, Taconic receives a benefit because Taconic does not pay for such research or services. Taconic may have an incentive to select or recommend a broker-dealer based on its interest in receiving particular research or services, rather than on the Funds' interest in receiving the most favorable execution. In selecting brokers, Taconic makes a good faith determination that the amount of

transaction fees charged by a broker are reasonable in comparison to the value of the research services provided. Taconic accepts research from brokers in accordance with the provisions of Section 28(e) of the U.S. Securities Exchange Act of 1934, as amended. Taconic largely accepts proprietary research, but also have entered into client commission arrangements under which Taconic agrees with a broker executing trades for the Funds that a portion of the commissions paid by the Funds will be used to pay third party research providers. Taconic structures all such arrangements in accordance with SEC guidance in this area. Taconic also reviews the level of trading allocated to each of its client commission arrangement brokers to determine that such allocation is appropriate in light of the quality of the execution provided and the amount of research obtained, and that research credits earned through such relationships are promptly spent to acquire research.

In accordance with the requirements of the FCA, as part of its analysis of the commissions paid, Taconic UK segregates commissions between research fees and execution fees. Taconic UK periodically discloses its commission analysis to the Funds. The research that Taconic UK purchases assists in the evaluation of current and potential investments within the Funds, and is not likely to interfere with Taconic UK's duty to act in the best interests of the Funds.

A conflict of interest may exist in that certain brokers that execute transactions for a Fund may also provide prime brokerage services, including capital introductions, for that Fund. In addition, affiliates of certain executing brokers may invest in one or more Funds. Taconic does not consider whether a broker provides prime brokerage services or whether its affiliate invests in the Funds when Taconic evaluates such broker's execution quality or select brokers to execute trades.

#### Multiple Clients; Trade Aggregation and Allocation

Taconic manages and provides investment advice to the Funds and/or other investment entities, including vehicles established to participate in co-investment opportunities, and may in the future provide investment advice to additional investment entities and separately managed accounts with investment strategies and policies similar in many respects to, or very different from, the Funds. There are no restrictions on the ability of Taconic and its affiliates to manage accounts of other clients following the same or different investment objectives, philosophies and strategies as those used for the Funds. The results of the Funds' activities may differ significantly from the results achieved by Taconic for any other accounts or clients for which it may manage or provide investment advisory services. Such vehicles or accounts may provide compensation to Taconic that is greater than that provided by the Funds, and Taconic may have financial or other incentives to favor such vehicles or accounts over the Funds.

Taconic may aggregate orders of Funds Taconic manages for trade execution and thereafter allocate the securities on an average price to such Funds. This does not necessarily result in reduced brokerage commission rates. In some cases, average pricing may result in higher or lower execution prices than those otherwise obtainable by a single Fund. Taconic believes that

its policy for aggregating and allocating Fund orders is consistent with statements made by the SEC with respect to aggregation. Taconic also believes that aggregation is consistent with its duty to seek best execution for all clients.

A conflict could arise in the allocation of investment opportunities among Funds. To the extent a particular investment is suitable for multiple Funds, Taconic intends to allocate investment opportunities in a fair and reasonable manner that Taconic believes will be in the best interests of all the Funds involved over time, but Taconic can make no assurances of equal treatment. Taconic may allocate an investment opportunity wholly or primarily to some, but not all Funds, and certain Funds may not participate at all in such investment or may participate only on a limited basis.

Taconic may take the following factors (among others) into account in allocating investments among the Funds:

- the nature of the security to be allocated and the size of the available position;
- each Fund's investment objective and strategies;
- each Fund's risk profile;
- each Fund's tax status;
- each Fund's size;
- the total portfolio invested position;
- supply or demand for a security at a given price level;
- current market conditions, timing of cash flows and account liquidity; and
- any other information deemed to be relevant to the fair allocation of securities.

In addition, because the Funds may at times take conflicting positions, there may be instances where Taconic takes an action with respect to one Fund that is beneficial to that Fund but not to others and may negatively affect the value of investments held in such other Funds.

To the extent that a Fund allocates an investment opportunity arising out of a position held by the Fund to another Fund, such other Fund will generally, to the extent practicable, reimburse the originating Fund for the cost of participating in such investment opportunity, if any, as will be determined by Taconic in accordance with its allocation policies.

### Trade Errors

Taconic has adopted a formal trade error policy that includes a process for tracking and resolving such errors. An overriding principle in dealing with trade errors made by Taconic is that the Funds never pay for losses that are deemed to be material resulting from such errors. Taconic will correct each error promptly, equitably and in the best interests of its clients. In adherence to Section 28(e) of the U.S. Securities Exchange Act of 1934, Taconic does not use "soft dollar" trading to compensate for errors nor will Fund accounts be charged in correcting trading errors.

In general, when Taconic discovers a trade error and identifies the responsible party, Taconic addresses the error the same day. Taconic reimburses the Fund for the amount of the loss, if it is deemed to be material. Taconic defines a material error as an error that in the aggregate across all affected Funds is more than \$10,000.

### **Item 13 - Review of Accounts**

The Portfolio Manager of a Fund reviews the holdings of that Fund on a daily basis. Each Portfolio Manager monitors holdings in light of the Fund's investment guidelines and restrictions, as well as trading activity, significant corporate events, significant economic and general business conditions, and other activities that may dictate a change in portfolio positions. In addition, the Compliance Department uses a compliance system to monitor the portfolio of each Fund on a pre-trade and post-trade basis to ensure that Taconic has not violated the investment restrictions or guidelines of any Fund.

Investors in the Funds receive weekly and month-end performance estimates via e-mail. As well, investors in the Funds receive a statement of their account on a monthly basis, which includes both monthly and year-to-date performance information, where such information is available, portfolio information sheets on a monthly basis and a quarterly letter, which updates investors on the Funds' performance and any developments at Taconic during the previous quarter. Taconic also provides all Fund investors with that Fund's audited financial statements and K-1's (if applicable) on an annual basis and with access to a password-protected website, at which they can access account and performance information. Fund investors may also obtain lagged portfolios upon request, provided that they sign a confidentiality agreement covering such information.

### **Item 14 - Client Referrals and Other Compensation**

Taconic does not receive any economic benefit other than the fees described above for providing investment advice and advisory services to the Funds. From time to time, Taconic enters into arrangements with third parties to raise capital for the Funds. Such placement agents typically receive a flat fee or in some cases a percentage of the investments they bring to the relevant Fund. There is a conflict of interest created by a placement agent's compensation being based on the investor's decision to invest. The placement agent may have incentive to recommend the Funds to its clients even if an investment in the Funds may not be in the best interest of its clients.

## **Item 15 - Custody**

An adviser has custody if it acts in any capacity that gives the adviser legal ownership of, or access to, the client funds or securities. Hence, Taconic has custody of Fund assets because it or one of its affiliates either (1) acts as general partner of a Fund with the authority to dispose of funds and securities in such Fund's account or (2) is deemed to have custody because of its ability to withdraw its fees directly from the Funds. Taconic maintains the majority of Fund assets at a prime broker, or custodial bank, all of whom are qualified custodians, as that term is defined under the custody rule under the Investment Advisers Act. Taconic self-custodies certain private, non-certificated investments such as bank debt and swaps in accordance with the private securities exemption of the custody rule. There is an independent agent for each bank debt position that maintains the ownership registers. In lieu of providing the quarterly custodial reports required by the custody rule, and in order to qualify for the private securities exemption described above, Taconic provides all Fund investors with audited financial statements of the relevant Fund within 120 days of such Fund's fiscal year end.

## **Item 16 - Investment Discretion**

Taconic has complete investment discretion over the portfolios of the Funds, and is only limited by the investment restrictions set forth in each Fund's Confidential Private Offering Memorandum.

## **Item 17 - Voting Client Securities**

Taconic generally vote proxies on the Funds' behalf and Taconic's policy is to do so in the interest of maximizing shareholder value. To that end, Taconic will vote in a way that Taconic believes is consistent with its fiduciary duty, will cause the relevant position to increase the most or decline the least in value. Taconic considers both the short and long term implications of the relevant proposal in determining how to vote.

Taconic has not identified any conflicts of interest between the Funds' interests and its own within the proxy voting process. Nevertheless, if Taconic determines that a material conflict of interest exists in voting a proxy, the appropriate persons will meet and decide how to resolve the situation, including, where necessary, by hiring a third party to help resolve the conflict. Taconic may, on occasion, determine to abstain from voting a proxy or a specific proxy item when Taconic concludes that the potential benefit of voting is significantly outweighed by the costs of such vote. Examples of such situations are described in Taconic's proxy voting policies and procedures.

In addition, if Taconic receives "Class Action" documents on behalf of any Fund, Taconic will ensure that such Fund either participates in, or opts out of, any class action settlements received. Taconic will determine if it is in the best interest of the Funds to recover monies from a class action. The Portfolio Manager or other member of the Investing Desk covering the company

will determine the action to be taken when receiving class action notices. In the event Taconic opts out of a class action settlement, Taconic will maintain documentation of any cost/benefit analysis that was performed to support such decision.

Taconic's complete proxy voting policy and procedures, including its policy with respect to class actions, are available for review. In addition, Taconic's complete proxy voting record is available to Fund investors, and only to Fund investors. Please contact us at [FundInvestments@taconiccap.com](mailto:FundInvestments@taconiccap.com) if you have any questions or if you would like to review either of these documents.

## **Item 18 - Financial Information**

Taconic has never filed for bankruptcy and is not aware of any financial condition that is expected to affect its ability to manage client accounts or meet contractual commitments to clients.
