Item 4: Advisory Business

A. Description of the Advisory Firm

Brainvest Wealth Management LLC (hereinafter “Brainvest”) is a Limited Liability Company organized in the State of Florida. The firm was formed in July 2017, and the principal owner is Brainvestor Inc. which is controlled by Mount Rose Ltd.

B. Types of Advisory Services

Portfolio Management Services

Brainvest offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. Brainvest creates an Investment Policy Statement for each client, which outlines the client’s current situation (income, tax levels, and risk tolerance levels) and then constructs a plan to aid in the selection of a portfolio that matches each client's specific situation. Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

Brainvest evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. Brainvest will request discretionary authority from clients in order to select securities and execute transactions without permission from the client prior to each transaction. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

Brainvest seeks to provide that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of Brainvest’s economic, investment or other financial interests. To meet its fiduciary obligations, Brainvest attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, Brainvest’s policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is Brainvest’s policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent, including initial public offerings ("IPOs") and other investment opportunities that might have a limited supply, among its clients on a fair and equitable basis over time.

BRAINVEST

WEALTH MANAGEMENT

Services Limited to Specific Types of Investments

Brainvest generally limits its investment advice to mutual funds, fixed income securities, real estate funds (including REITs), insurance products including annuities, equities, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds, commodities, non-U.S. securities, venture capital funds and private placements. Brainvest may use other securities as well to help diversify a portfolio when applicable.

C. Client Tailored Services and Client Imposed Restrictions

Brainvest will tailor a program for each individual client. This will include an interview session to get to know the client's specific needs and requirements as well as a plan that will be executed by Brainvest on behalf of the client. Brainvest may use model allocations together with a specific set of recommendations for each client based on their personal restrictions, needs, and targets. Clients may impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs. However, if the restrictions prevent Brainvest from properly servicing the client account, or if the restrictions would require Brainvest to deviate from its standard suite of services, Brainvest reserves the right to end the relationship.

D. Wrap Fee Programs

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees, transaction costs, fund expenses, and other administrative fees. Brainvest does not participate in any wrap fee programs.

E. Assets Under Management

Brainvest has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$123,361,593.00	\$0	March 2019

Item 5: Fees and Compensation

A. Fee Schedule

Portfolio Management Fees

Total Assets Under Management	Annual Fees
US \$0 to US\$ 999,999	1.50%
US \$1,000,000 to US \$4,999,000	1.00%
US \$5,000,000 to US \$9,999,999	0.85%
US \$10,000,000 to US \$19,999,999	0.65%
US \$20,000,000 and above	0.50%

Braininvest will charge a management fee on a per annum basis of the Client's net assets under management, according as per agreed schedule. The management fee will be calculated quarterly, based on the average of month's end values of the previous three months and charged during the month following the end of the quarter.

These fees are generally negotiable and the final fee schedule is attached as Exhibit II of the Investment Advisory Contract. Clients may terminate the agreement without penalty for a full refund of Braininvest's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract generally with 5 days' written notice.

B. Payment of Fees

Payment of Portfolio Management Fees

Asset-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid in arrears.

BRAINVEST

WEALTH MANAGEMENT

C. Client Responsibility For Third Party Fees

Clients are responsible for the payment of all third party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by Brainvest. Please see Item 12 of this brochure regarding broker-dealer/custodian.

D. Prepayment of Fees

Brainvest collects its fees in arrears. It does not collect fees in advance.

E. Outside Compensation For the Sale of Investment Products to Clients

Brainvest is a licensed insurance agency and receives compensation for the sale of life insurance products sold by its licensed agents. In his role as an insurance agent (see Item 10 below) of Brainvest, Ronny Spiewak is licensed to accept compensation for the sale of investment products on behalf of Brainvest.

- This presents a conflict of interest and gives the supervised person an incentive to recommend products based on the compensation received rather than on the client's needs. When recommending the sale of investment products for which the supervised persons receives compensation, Brainvest will document the conflict of interest in the client file and inform the client of the conflict of interest.
- Clients always have the right to decide whether to purchase Brainvest recommended products and, if purchasing, have the right to purchase those products through other agents that are not affiliated with Brainvest.
- Commissions are not Brainvest's primary source of compensation for advisory services.

Advisory fees that are charged to clients are not reduced to offset the commissions or markups on securities or investment products recommended to clients.

Item 6: Performance-Based Fees and Side-By-Side Management

Brainvest will charge a management fee on a per annum basis of the Client's net assets under management, according to the schedule below. This management fee will be calculated quarterly,

based on the average of month's end values of the previous three months and charged during the month following the end of the quarter.

Fee Schedule (depends on account size)	
US\$1,000,000 to US\$4,999,999	0.60%
US\$5,000,000 to US\$9,999,999	0.50%
US\$10,000,000 to US\$19,999,999	0.40%
US\$20,000,000 and above	0.30%
Minimum p.a.	\$6,000
Performance Fee	15.00%

The performance fee will be calculated and accrued monthly on a pro rata basis and will be payable semi-annually in arrears, as of the tenth valuation day of January and July ("Performance Fee Period").

The "US Dollar Libor factor" established for the calculation of the performance fee for each Performance Fee Period shall be equivalent to the six-months US Dollar Libor rate as quoted on the Bloomberg "<INDEX> BBAM 1" page as of 11.00am London Time, on the first day of each Performance Fee Period, calculated pro-rata temporis by the actual number of days elapsed. In the event that the offered rates for semi-annual US Dollar deposits are not available on the Bloomberg page at such time, Brainvest will determine a comparable basis for calculating the semi-annual US Dollar Libor rate.

The amount of the Performance Fee shall equal the product of 15% (fifteen per cent) of the positive difference, if any, between: (i) the assets under management prior to the deduction of the Performance Fee determined at the end of a given valuation day and (ii) the assets under management at the end of the previous valuation day increased by 100% of the relevant "US Dollar Libor Factor", (subject to the loss carry forward provision detailed in the next paragraph).

In the event assets under management suffers an accumulated loss in any of the Performance Fee Periods, no performance fee shall be charged until such net losses are fully recovered (High Water

Mark). Accumulated losses will not carry the accrual of any Performance Hurdle beyond any calendar year-end.

Item 7: Types of Clients

Braininvest generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals

There is an account minimum of \$1,000,000 which may be waived at the option of Braininvest.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

Braininvest's methods of analysis include Charting analysis, Cyclical analysis, Fundamental analysis, Modern portfolio theory, Quantitative analysis and Technical analysis.

Charting analysis involves the use of patterns in performance charts. Braininvest uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Cyclical analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

Brainvest uses long term trading and short-term trading.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short-term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Cyclical analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Quantitative analysis Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Short term trading risks include liquidity, economic stability, and inflation, in addition to the long-term trading risks listed above. Frequent trading can affect investment performance, particularly through increased brokerage and other transaction costs and taxes.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The

value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best-known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Annuities are a retirement product for those who may have the ability to pay a premium now and want to guarantee they receive certain monthly payments or a return on investment later in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance

policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

Private placements carry a substantial risk as they are subject to less regulation than are publicly offered securities, the market to resell these assets under applicable securities laws may be illiquid, due to restrictions, and the liquidation may be taken at a substantial discount to the underlying value or result in the entire loss of the value of such assets.

Venture capital funds invest in start-up companies at an early stage of development in the interest of generating a return through an eventual realization event; the risk is high as a result of the uncertainty involved at that stage of development.

Commodities are tangible assets used to manufacture and produce goods or services. Commodity prices are affected by different risk factors, such as disease, storage capacity, supply, demand, delivery constraints and weather. Because of those risk factors, even a well-diversified investment in commodities can be uncertain.

Non-U.S. securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

BRAINVEST
WEALTH MANAGEMENT

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

Neither Brainvest nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither Brainvest nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Brainvest also operates as a licensed insurance agency. Ronny Spiewak is a licensed insurance agent for Brainvest, and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. Brainvest always acts in the best interest of the client; including the sale of commissionable products to advisory clients. Clients are in no way required to utilize the services of any representative of Brainvest in connection with such individual's activities outside of Brainvest.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

Brainvest does not utilize nor select third-party investment advisers. All assets are managed by Brainvest management.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

Braininvest has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. Braininvest's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

Braininvest does not recommend that clients buy or sell any security in which a related person to Braininvest or Braininvest has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of Braininvest may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of Braininvest to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. Braininvest will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of Braininvest may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of Braininvest to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, Braininvest will never engage in trading that operates to the client's disadvantage if representatives of Braininvest buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Brainvest does not recommend brokers/custodians. Clients are responsible for selecting the brokers/custodians to be used for their accounts.

1. Research and Other Soft-Dollar Benefits

While Brainvest has no formal soft dollars program in which soft dollars are used to pay for third party services, Brainvest may receive research, products, or other services from custodians and broker-dealers in connection with client securities transactions ("soft dollar benefits"). Brainvest may enter into soft-dollar arrangements consistent with (and not outside of) the safe harbor contained in Section 28(e) of the Securities Exchange Act of 1934, as amended. There can be no assurance that any particular client will benefit from soft dollar research, whether or not the client's transactions paid for it, and Brainvest does not seek to allocate benefits to client accounts proportionate to any soft dollar credits generated by the accounts. Brainvest benefits by not having to produce or pay for the research, products or services, and Brainvest will have an incentive to recommend a broker-dealer based on receiving research or services. Clients should be aware that Brainvest's acceptance of soft dollar benefits may result in higher commissions charged to the client.

2. Brokerage for Client Referrals

Brainvest receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

Brainvest may permit clients to direct it to execute transactions through a specified broker-dealer. If a client directs brokerage, then the client will be required to acknowledge in writing that the client's direction with respect to the use of brokers supersedes any authority granted to Brainvest to select brokers; this direction may result in higher commissions, which may result in a disparity between free and directed accounts; and trades for the client and other directed accounts may be executed after trades for free accounts, which may result in less favorable prices, particularly for illiquid securities or during volatile market conditions. Not all investment advisers allow their clients to direct brokerage.

BRAINVEST
WEALTH MANAGEMENT

B. Aggregating (Block) Trading for Multiple Client Accounts

Brainvest does not aggregate or bunch the securities to be purchased or sold for multiple clients. This may result in less favorable prices, particularly for illiquid securities or during volatile market conditions.

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

All client accounts for Brainvest's advisory services provided on an ongoing basis are reviewed at least Annually by Ronny Spiewak, Manager, with regard to clients' respective investment policies and risk tolerance levels. All accounts at Brainvest are assigned to this reviewer.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

C. Content and Frequency of Regular Reports Provided to Clients

Each client of Brainvest's advisory services provided on an ongoing basis will receive a quarterly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian. Brainvest will also provide at least quarterly a separate written statement to the client.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

Brainvest does not receive any economic benefit, directly or indirectly from any third party for advice rendered to Brainvest's clients.

BRAINVEST

WEALTH MANAGEMENT

B. Compensation to Non – Advisory Personnel for Client Referrals

Brainvest does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, Brainvest will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Item 16: Investment Discretion

Brainvest provides discretionary and non-discretionary investment advisory services to clients. The advisory contract established with each client sets forth the discretionary authority for trading. A separate LPOA document required by each financial institution will be provided for client signatures which will grant discretion to Brainvest. Where investment discretion has been granted, Brainvest generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell, or the price per share. In some instances, Brainvest's discretionary authority in making these determinations may be limited by conditions imposed by a client (in investment guidelines or objectives, or client instructions otherwise provided to Brainvest).

Item 17: Voting Client Securities (Proxy Voting)

Brainvest will accept voting authority for securities in certain cases. When voting proxies Brainvest will always hold the interests of the clients above its own interests. Clients may obtain the voting record of Brainvest on securities by contacting Brainvest at phone number or e-mail address listed on the cover page of this brochure. Clients may obtain a copy of Brainvest's proxy voting policies and procedures upon request.

BRAINVEST
WEALTH MANAGEMENT

Item 18: Financial Information

A. Balance Sheet

Brainvest neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither Brainvest nor its management has any financial condition that is likely to reasonably impair Brainvest's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

Brainvest has not been the subject of a bankruptcy petition in the last ten years.
