Item 4: Advisory Business

A. Description of the Advisory Firm

Old Slip Registered Investment Advisors, LLC (hereinafter “OLRIA”) is a Limited Liability Company organized in the State of Delaware. The firm was formed in May 2016, and the principal owner is James Joseph Lukezic.

B. Types of Advisory Services

Pension Consulting Services

OLRIA offers consulting services to pension or other employee benefit plans (including but not limited to 401(k) plans). Pension consulting may include, but is not limited to:

- identifying investment objectives and restrictions
- providing guidance on various assets classes and investment options
- recommending money managers to manage plan assets in ways designed to achieve objectives
- monitoring performance of money managers and investment options and making recommendations for changes
- recommending other service providers, such as custodians, administrators and broker-dealers
- creating a written pension consulting plan

These services are based on the goals, objectives, demographics, time horizon, and/or risk tolerance of the plan and its participants.

Services Limited to Specific Types of Investments

OLRIA generally limits its investment advice to mutual funds, fixed income securities, real estate funds, insurance products including annuities, equities and treasury inflation protected/inflation linked bonds, although OLRIA primarily recommends growth and income / conservative, retirement minded investing. OLRIA may use other securities as well to help diversify a portfolio when applicable.

C. Client Tailored Services and Client Imposed Restrictions

OLRIA offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client’s current situation (income, tax levels, and risk tolerance levels). Clients may not impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs.

D. Wrap Fee Programs

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees, transaction costs, and certain other administrative fees. OLRIA does not participate in wrap fee programs.

E. Assets Under Management

OLRIA has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$25,456, 258.00	\$270,596,533.00	August 2019

Item 5: Fees and Compensation

A. Fee Schedule

Pension Consulting Services Fees

Asset-Based Fees for Pension Consulting

Total Assets Under Management	Annual Fee
\$2,000,000 – And Up	Up to .40%

OLRIA uses the value of the account as of the last business day of the billing period, after taking into account deposits and withdrawals, for purposes of determining the market value of the assets upon which the advisory fee is based.

These fees are generally negotiable and the final fee schedule will be memorialized in the client's advisory agreement.

Clients may terminate the agreement without penalty for a full refund of OLRIA's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the pension consulting agreement generally with 30 days' written notice. OLRIA uses an average of the daily balance in the client's account throughout the billing period, after taking into account deposits and withdrawals, for purposes of determining the market value of the assets upon which the advisory fee is based.

Fixed Fees

The rate for creating client pension consulting plans is between \$7,500 and \$60,000. The final fee schedule will be memorialized in the client's advisory agreement. This service may be canceled with 30 days' notice.

Hourly Fees

The hourly fee for these services is between \$450 and \$850. The final fee schedule will be memorialized in the client's advisory agreement.

B. Payment of Fees

Payment of Pension Consulting Fees

Asset-based pension consulting fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis, or may be invoiced and billed directly to the client on a quarterly basis. Clients may select the method in which they are billed. Fees are paid in arrears.

Fixed pension consulting fees are paid via check. These fees are paid in arrears upon completion.

Hourly pension consulting fees are paid in arrears upon completion.

C. Client Responsibility For Third Party Fees

Clients are responsible for the payment of all third party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by OLRIA. Please see Item 12 of this brochure regarding broker-dealer/custodian.

D. Prepayment of Fees

OLRIA collects its fees in arrears. It does not collect fees in advance.

E. Outside Compensation For the Sale of Securities to Clients

James Joseph Lukezic is a registered representative of a broker-dealer and an insurance agent and in these roles, accepts compensation for the sale of investment products to OLRIA clients.

1. This is a Conflict of Interest

Supervised persons may accept compensation for the sale of investment products, including asset based sales charges or service fees from the sale of mutual funds to OLRIA's clients. This presents a conflict of interest and gives the supervised person an incentive to recommend products based on the compensation received rather than on the client's needs. When recommending the sale of investment products for which the supervised persons receives compensation, OLRIA will document the conflict of interest in the client file and inform the client of the conflict of interest.

2. Clients Have the Option to Purchase Recommended Products From Other Brokers

Clients always have the option to purchase OLRIA recommended products through other brokers or agents that are not affiliated with OLRIA.

3. Commissions are not OLRIA's primary source of compensation for advisory services

Commissions are not OLRIA's primary source of compensation for advisory services.

4. Advisory Fees in Addition to Commissions or Markups

Advisory fees that are charged to clients are not reduced to offset the commissions or markups on investment products recommended to clients.

Item 6: Performance-Based Fees and Side-By-Side Management

OLRIA does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Item 7: Types of Clients

OLRIA generally provides advisory services to the following types of clients:

- ❖ High-Net-Worth Individuals
- ❖ Pension and Profit Sharing Plans

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

OLRIA's methods of analysis include Charting analysis, Fundamental analysis, Modern portfolio theory, Quantitative analysis and Technical analysis.

Charting analysis involves the use of patterns in performance charts. OLRIA uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

OLRIA uses long term trading.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Charting analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Quantitative analysis Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment

returns. The funds can be of bond “fixed income” nature (lower risk) or stock “equity” nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Annuities are a retirement product for those who may have the ability to pay a premium now and want to guarantee they receive certain monthly payments or a return on investment later in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

As a registered representative of Purshe Kaplan Sterling, James Joseph Lukezic accepts compensation for the sale of securities.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither OLRIA nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

James Joseph Lukezic is a registered representative of Old Slip Capital Management and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. OSCM always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are in no way required to implement the plan through any representative of Old Slip Registered Investment Advisors, LLC in such individual's capacity as a registered representative.

James Joseph Lukezic is an independent licensed insurance agent for Old Slip Benefits and Insurance Services and from time to time, will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. Old Slip Registered Investment Advisors, LLC always acts in the best interest of the client; including the sale of commissionable products to advisory clients. Clients are in no way required to utilize the services of any representative of Old Slip Registered Investment Advisors, LLC in connection with such individual's activities outside of Old Slip Registered Investment Advisors, LLC's individual's capacity as a registered representative.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

OLRIA does not utilize nor select third-party investment advisers.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

OLRIA has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. OLRIA's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

OLRIA does not recommend that clients buy or sell any security in which a related person to OLRIA or OLRIA has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of OLRIA may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of

OLRIA to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. OLRIA will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of OLRIA may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of OLRIA to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, OLRIA will never engage in trading that operates to the client's disadvantage if representatives of OLRIA buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on OLRIA's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent.

OLRIA will recommend clients to use TD Ameritrade Institutional, a division of TD Ameritrade, Inc. Member FINRA/SIPC.

1. Research and Other Soft-Dollar Benefits

OLRIA does not trade client's accounts and therefore receives no research, product, or services from a broker-dealer ("soft dollar benefits").

2. Brokerage for Client Referrals

OLRIA receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

OLRIA does not trade client's accounts.

B. Aggregating (Block) Trading for Multiple Client Accounts

OLRIA does not trade clients' accounts and therefore does not have the ability to block trade purchases across accounts.

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

All client accounts for OLRIA's advisory services provided on an ongoing basis are reviewed at least Monthly by James J Lukezic, Executive Managing Director, with regard to clients' respective investment policies and risk tolerance levels. All accounts at OLRIA are assigned to this reviewer.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

C. Content and Frequency of Regular Reports Provided to Clients

Each client of OLRIA's advisory services provided on an ongoing basis will receive a quarterly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian. OLRIA will also provide at least quarterly a separate written statement to the client.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

OLRIA participates in the institutional advisor program (the "Program") offered by TD Ameritrade. TD Ameritrade offers to independent investment advisor services which include custody of securities, trade execution, clearance and settlement of transactions. OLRIA receives some benefits from TD Ameritrade through its participation in the Program.

As disclosed above, OLRIA participates in TD Ameritrade's institutional advisor program and OLRIA may recommend TD Ameritrade to clients for custody and brokerage

services. There is no direct link between OLRIA's participation in the Program and the investment advice it gives to its clients, although OLRIA receives economic benefits through its participation in the Program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving OLRIA participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to client accounts); the ability to have OLRIA's fees deducted directly from client accounts; access to an electronic communications network for client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to OLRIA by third party vendors. TD Ameritrade may also pay for business consulting and professional services received by OLRIA's related persons. Some of the products and services made available by TD Ameritrade through the Program may benefit OLRIA but may not benefit its client accounts. These products or services may assist OLRIA in managing and administering client accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help OLRIA manage and further develop its business enterprise. The benefits received by OLRIA or its personnel through participation in the Program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of its fiduciary duties to clients, OLRIA endeavors at all times to put the interests of its clients first. Clients should be aware, however, that the receipt of economic benefits by OLRIA or its related persons in and of itself creates a conflict of interest and may indirectly influence the OLRIA's choice of TD Ameritrade for custody and brokerage services.

B. Compensation to Non – Advisory Personnel for Client Referrals

OLRIA does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, OLRIA will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Item 16: Investment Discretion

OLRIA does not have discretion over client accounts at any time.

Item 17: Voting Client Securities (Proxy Voting)

OLRIA will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

OLRIA neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither OLRIA nor its management has any financial condition that is likely to reasonably impair OLRIA's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

OLRIA has not been the subject of a bankruptcy petition in the last ten years.
