Wrap Fee Program Brochure

Date of Brochure Appendix: March 2022

This wrap fee program brochure provides information about the qualifications and business practices of Tennessee Valley Asset Management Partners, LLC (also referred to as we, us and TVAMP throughout this disclosure brochure). If you have any questions about the contents of this disclosure brochure, please contact Jeffrey B. Foster at 865-577-1922 or jeffrey.foster@lpl.com. The information in this disclosure brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Additional information about TVAMP is also available on the SEC's website at www.adviserinfo.sec.gov. You can view our firm's information on this website by searching for Tennessee Valley Asset Management Partners, LLC or our firm's CRD number 160321.

*Registration as an investment advisor does not imply a certain level of skill or training.

Item 2 – Material Changes

Since our last ADV annual amendment filed in March 2021, the following changes have been made to disclosure brochure:

- The firm has added the ability to compensate solicitors for referring clients to TVAMP. Please refer to **Item 9 – Additional Compensation** for more specific information.

We will ensure that you receive a summary of material changes, if any, to this and subsequent disclosure brochures within 120 days after our fiscal year ends. Our fiscal year ends on December 31 so you will receive the summary of material changes, if any, no later than April 30 each year. At that time we will also offer a copy of the most current disclosure brochure. We may also provide other ongoing disclosure information about material changes, as necessary.

Item 4 – Services, Fees and Compensation

Tennessee Valley Asset Management Partners, LLC (“TVAMP” or “we”) is the sponsor of the TVAMP Asset Management Program (“TVAMP Program”), a wrap fee program developed through an arrangement using LPL Financial Corporation’s (“LPL”) Strategic Wealth Management platform. Through the TVAMP Program, we provide investment management services, including providing continuous investment advice to and making investments for you based on your individual needs. Through this service, we offer a customized and individualized investment program. A specific asset allocation strategy and suitability profile is crafted to focus on your specific goals and objectives. Your information should be updated regularly, but at a minimum every 2 years.

TVAMP Program accounts are custodied at LPL in its capacity as a registered broker/dealer, member FINRA/SIPC. LPL is also an investment advisor registered with the SEC, but does not serve as an investment advisor for you through the TVAMP Program. LPL provides clearing, custody and other brokerage services for accounts established through the TVAMP Program. Therefore, you are required to establish a brokerage account(s) through LPL’s Strategic Wealth Management platform. Separate accounts are maintained for you, and you retain all rights of ownership of your accounts (e. g., the right to withdraw securities or cash, exercise or delegate proxy voting, and receive transaction confirmations).

TVAMP Program accounts allow you to authorize us to purchase and sell, on a discretionary or non-discretionary basis, portfolios consisting of securities and investments. We may limit our discretion with respect to your account and the securities eligible to be purchased for your account. See, **Limits Advice to Certain Types of Investments** under **Item 4 - Advisory Business** relative to possible securities and investments utilized. See **Item 16 - Investment Discretion** for information concerning discretionary authority.

During any month that there is activity in the TVAMP Program account, you receive a monthly account statement from LPL showing account activity as well as positions held in the account at month end. Additionally, you receive a confirmation of each transaction that occurs within the TVAMP Program account unless the transaction is the result of a systematic purchase, redemption or exchange. You also receive a detailed quarterly report showing performance, positions, and activity. All account data and statements are also available on-line through the account view portal through LPL.

For our asset management services, we provide two options for billing our clients. Clients can be charged a flat annual fee of up to 2.0% dependent upon the investment adviser representative providing the services, the type of client, the complexity of the client's situation, the composition of the client's account, the potential for additional account deposits, and the relationship of the client and the investment adviser representative, or the client can enter into the tiered fee schedule:

<u>Allowable Fee, %</u>	<u>Account Value</u>
Up to 2.00%	on first \$100,000
Up to 1.75%	on next \$200,000
Up to 1.5%	on next \$450,000
Up to 1.25%	on next \$750,000
Up to 1.00%	on all other assets

There is a minimum account size of \$50,000. However exceptions to the minimum account requirements may be granted at the sole discretion of the advisor.

Fees charged for our asset management services are negotiable based on the investment adviser representative providing the services, the type of client, the complexity of the client's situation, the composition of the client's account, the potential for additional account deposits, and the relationship of the client and the investment adviser representative.

Fees charged for our asset management services are charged based on a percentage of assets under management, billed in Advance (at the start of the billing period) on a quarterly calendar basis and calculated based on the fair market value of your account as of the last business day of the previous billing period. Fees are prorated (based on the number of days service is provided during the initial billing period) for your account opened at any time other than the beginning of the billing period. If asset management services are commenced in the middle of a billing period, the prorated fee for the initial billing period is billed in advance at the same time as the account is established. LPL is responsible for calculating and debiting all fees from your accounts with your written authorization. Those advisory fees are then paid directly to us. Fees are based on the account's asset value as of the last business day of the prior calendar quarter. Fees for accounts opened at any time other than the beginning of a quarter are prorated based on the number of days remaining in the initial quarter.

TVAMP believes that its annual fee is reasonable in relation to: (1) services provided and (2) the fees charged by other investment advisers offering similar services/programs. However, our annual investment advisory fee may be higher than that charged by other investment advisers offering similar services/programs. In addition to our compensation, you may also incur charges imposed at the mutual fund level (e.g., advisory fees and other fund expenses).

Prior to engaging us to provide investment management services, you are required to enter into a formal investment advisory agreement with us setting forth the terms and conditions, including the amount of investment advisory fees, under which we manage your assets and also a separate custodial/clearing agreement with LPL.

If you choose to have the investment advisory fees deducted from your account, you must authorize the qualified custodian(s) of your account to deduct fees from your account and pay such fees directly to TVAMP. Our firm will send you a billing statement prior to the time that fee deduction instruction is sent to the qualified custodian(s) of your account. The billing statement will detail the formula used to calculate the fee, the assets under management and the time period covered.

You should review your account statements received from the qualified custodian(s) and verify that appropriate investment advisory fees are being deducted. The qualified custodian(s) will not verify the accuracy of the investment advisory fees deducted.

If you choose to pay the fees after receiving a statement, fees are due upon your receipt of a billing notice sent directly to you. The billing notice will detail the formula used to calculate the fee, the assets under management and the time period covered. Fees for the services of our firm will be due immediately after your receipt of the billing notice.

The TVAMP Program account is a wrap fee account, meaning you do not pay transaction charges associated with trade execution. The TVAMP Program may cost you more or less than if the assets were held in a traditional brokerage account. In a brokerage account, you are charged commissions for each transaction, and the representative has no duty to provide ongoing advice with respect to the account. If you plan to follow a buy and hold investment strategy for the account or do not wish to purchase ongoing investment advice or management services, you should consider opening a brokerage account rather than a TVAMP Program account.

TVAMP does not receive any portion of such commissions or fees from you or the qualified custodian. In addition, you may incur certain charges imposed by third parties other than TVAMP in connection with investments made through your account including, but not limited to, mutual fund sales loads, 12(b)-1 fees and surrender charges, variable annuity fees and surrender charges, IRA and qualified retirement plan fees, and charges imposed by the qualified custodian(s) of your account. Management fees charged by TVAMP are separate and distinct from the fees and expenses charged by investment company securities that may be recommended to you. A description of these fees and expenses are available in each investment company security's prospectus.

Retirement Plan Rollover Recommendations – TVAMP does not recommend rollovers to our clients or prospects. The firm's activities will be strictly limited to educating clients and prospects as to their options.

Participation in Wrap Fee Programs

TVAMP offers asset management services, through our Asset Management Services Program, which is a wrap fee management program. In our wrap fee management program, the fee for advisory services (including portfolio management or advice regarding selecting other investment advisers) and transaction services are provided for one fee. Whenever a fee is charged to a client for services described in this Wrap Fee Program Brochure, we will receive all of a portion of the fee charged. In our wrap fee management program, you may elect to pay expenses under a "traditional" payment option meaning that advisory services are provided for a fee but transaction services are billed separately on a per-transaction basis, or you may elect the bundled "wrap fee" payment option meaning that advisory services (including portfolio management or advice regarding selecting other investment advisers) and transaction services are provided for one fee. Our Asset Management Services are considered a wrap fee program. Whenever a fee is charged to a client for services described in this Wrap Fee Program Brochure, we will receive all of a portion of the fee charged.

From a management perspective, there is not a fundamental difference in the way we manage accounts that have elected the traditional payment option versus those that have elected the bundled wrap fee payment option. The only significant difference is the way in which transaction costs are paid.

LPL Financial is the custodian for all WRAP Accounts Managed by TVAMP. As the custodian LPL is responsible for the custody, pricing of assets and tracking the performance of the accounts.

From time to time, we may receive expense reimbursement for travel and/or marketing expenses from distributors of investment products. Travel expense reimbursements are typically a result of attendance at due diligence and/or investment training events hosted by product sponsors. Marketing expense reimbursements are typically the result of informal expense sharing arrangements in which product sponsors may underwrite costs incurred for marketing such as advertising, publishing and seminar expenses. Although receipt of these travel and marketing expense reimbursements are not predicated upon specific sales quotas, the product sponsor reimbursements are typically made by those sponsors for whom sales have been made or it is anticipated sales will be made. We endeavor at all times to put your interests first as a part of our fiduciary duty. However, you should be aware that receiving additional compensation through nominal sales awards, expense reimbursements, etc. creates a conflict of interest that may impact our judgment when making advisory recommendations.

Item 5 – Account Requirements and Types of Clients

Minimum Investment Amounts Required

TVAMP requires a minimum of \$50,000 in order to open an account. To reach this account minimum, clients can aggregate all household accounts. Exceptions may be granted to this minimum based on the investment adviser representative providing the services, the type of client, the complexity of the client's situation, the composition of the client's account, the potential for additional account deposits, and the relationship of the client and the investment adviser representative. You are required to execute a written agreement with TVAMP specifying the particular services in order to establish a client arrangement with TVAMP.

Types of Clients

TVAMP provides advisory services to Individuals and Pension and Profit Sharing plans.

Item 6 – Portfolio Manager Selection and Evaluation

TVAMP and its Investment Adviser Representatives act as the portfolio manager(s) for accounts receiving our Asset Management Services. Our Asset Management Service is considered a wrap fee program. For this service, we do not allow the use of portfolio managers that are not associated with TVAMP. In other words, the only portfolio managers selected for managing client assets for our Asset Management Services are Investment Adviser Representatives of TVAMP. Therefore, conflicts of interest present in other wrap fee programs that make available both affiliated and unaffiliated portfolio managers are not present in our wrap fee program. Because our Asset Management Services program does not provide for outside portfolio managers, we do not have procedures designed to select or review the performance of outside portfolio managers.

Types of Advisory Services

In addition to the management services described above, we provide financial planning services, consultation services, advisement services and pension consulting services. Our financial planning services include:

- Written financial plans that can be full or modular (segmented) in nature. Fees are billed as either a fixed or hourly fee charge. Full financial plans include one-year of ongoing financial planning services at no additional fee. These on-going services can include consultations, reviews and updates regarding any topic found in the original financial plan.
- Consultation services can be on any topic(s) of interest to you and are billed at an hourly or fixed fee rate.
- Advisement consultations to participants in benefit plans (401(k) plans, profit sharing plans, etc.) provided on a one-time or on-going (one-year) basis. We make recommendations regarding asset allocation and investment selections for the investment portfolio in the plan. There is no fee charged.
- Periodic newsletters that are educational and informational in nature provided to clients and prospective clients free of charge.

- Workshops that are educational, informational and motivational in nature. Workshops are always offered free of charge and are provided on an impersonal basis and do not focus on the individual needs of the participants.
- Seminars in areas such as financial planning, retirement planning, estate planning and charitable planning. No fees are charged, although we reserve the right to charge a fee to cover expenses if seminars are provided to larger groups such as corporations.

Please refer to our separate Disclosure Brochure for full details concerning our advisory services, fees, billing procedures and termination provisions.

Limits Advice to Certain Types of Investments

TVAMP provides investment advice on the following types of investments:

- Mutual Funds
- Exchange Traded Funds (ETFs)
- Exchange-listed Securities
- Securities Traded Over-the-Counter
- Foreign Issues
- Warrants
- Corporate Debt Securities
- Commercial Paper
- Certificates of Deposit
- Municipal Securities
- Variable Annuities that have been approved for inclusion in the LPL Platform
- US Government Securities
- Options Contracts on Securities
- Interests in Partnerships Investing in Real Estate
- Interests in Partnerships Investing in Oil and Gas Interests

TVAMP primarily recommends Mutual funds and although we generally provide advice only on the products previously listed, we reserve the right to offer advice on any investment product that may be suitable for each client's specific circumstances, needs, goals and objectives.

When providing asset management services, TVAMP typically constructs each client's account holdings using Mutual funds to build diversified portfolios. It is not our typical investment strategy to attempt to time the market, but we may increase cash holdings modestly as deemed appropriate, based on your risk tolerance and our expectations of market behavior. We may modify our investment strategy to accommodate special situations such as low basis stock, stock options, legacy holdings, inheritances, closely held businesses, collectibles, or special tax situations.

You have the ability to place reasonable restrictions on the types of investments that may be purchased in your account.

Advisory Services Tailored to Individual Needs of Clients

TVAMP's services are always provided based on the individual needs of each client. This means, for example, that clients are given the ability to impose restrictions on the accounts we manage for them, including specific investment selections and sectors. We work with each client on a one-on-one basis through interviews and questionnaires to determine their investment objectives and suitability information. However, we reserve the right to not enter into an investment advisor relationship with a prospective client whose investment objectives may be considered incompatible with our investment philosophy or strategies or where the prospective client seeks to impose unduly restrictive investment guidelines.

Wrap-Fee Program versus Portfolio Management Program

We offer services through both wrap-fee programs and non-wrap fee programs. A wrap fee program is defined as any advisory program under which a specified fee or fees not based directly upon transactions in a client's account is charged for investment advisory services (which may include portfolio management or advice concerning the selection of other investment advisers) and the execution of client transactions. Whenever a fee is charged to a client for services described in this brochure (whether wrap fee or non-wrap fee), we will receive all or a portion of the fee charged.

WRAP Fee Program Disclosure

As representative of LPL Financial, LLC, the investment advisor representatives of TVAMP have the ability to offer the WRAP account services conducted under the TVAMP MAP Program II though the LPL though the SWM II program. Although clients do not pay a transaction charge for transactions in a SWM II account, clients should be aware that TVAMP pays LPL transaction charges for those transactions. The transaction charges paid by TVAMP vary based on the type of transaction (e.g., mutual fund, equity or ETF) and for mutual funds based on whether or not the mutual fund pays 12b-1 fees and/or recordkeeping fees to LPL. Transaction charges paid by the Advisor for equities and ETFs are \$9. For mutual funds, the transaction charges range from \$0 to \$26.50. Because TVAMP pays the transaction charges in SWM II accounts, there is a conflict of interest in cases where the mutual fund is offered at both \$0 and \$26.50. Clients should understand that the cost to Advisor of transaction charges may be a factor that TVAMP considers when deciding which securities to select and how frequently to place transactions in a SWM II account.

In many instances, LPL makes available mutual funds in a SWM II account that offer various classes of shares, including shares designated as Class A Shares and shares designed for advisory programs, which can be titled, for example, as "Class I," "institutional," "investor," "retail," "service," "administrative" or "platform" share classes ("Platform Shares"). The Platform Share class offered for a particular mutual fund in SWM II in many cases will not be the least expensive share class that the mutual fund makes available, and was selected by LPL in certain cases because the share class pays LPL compensation for the administrative and recordkeeping services LPL provides to the mutual fund. Client should understand that another financial services firm may offer the same mutual fund at a lower overall cost to the investor than is available through SWM II. In other instances, a mutual fund may offer only Class A Shares, but another similar mutual fund may be available that offers Platform Shares. Class A Shares typically pay LPL a 12b-1 fee for providing shareholder services, distribution, and marketing expenses ("brokerage-related services") to the mutual funds. Platform Shares generally are not subject to 12b-1 fees. As a result of the different expenses of the mutual fund share classes, it is generally more expensive for a client to own Class A Shares than Platform Shares. An investor in Platform Shares will pay lower fees over time, and keep more of his or her investment returns than an investor who holds Class A Shares of the same fund. Other financial services firms may offer the same mutual fund at a lower overall cost to the investor than is available through the LPL Programs.

TVAMP has a financial incentive to recommend Class A Shares in cases where both Class A and Platform Shares are available. This is a conflict of interest which might incline TVAMP, consciously or unconsciously, to render advice that is not disinterested. Although the client will not be charged a transaction charge for transactions, Advisor pays LPL a per transaction charge for mutual fund purchases and sales in the account. TVAMP generally does not pay transaction charges for Class A Share mutual fund transactions accounts, but generally does pay transaction charges for Platform Share mutual fund transactions. The cost to TVAMP of transaction charges generally may be a factor Advisor considers when deciding which securities to select and whether or not to place transactions in the account.

Performance-Based Fees

Performance-based fees are defined as fees based on a share of capital gains on or capital appreciation of the assets held in a client's account. We do not receive performance-based fees.

Methods of Analysis

TVAMP uses the following methods of analysis in formulating investment advice:

Charting - The set of techniques used in technical analysis in which charts are used to plot price movements, volume, settlement prices, open interest, and other indicators, in order to anticipate future price movements. Users of these techniques, called chartists, believe that past trends in these indicators can be used to extrapolate future trends.

Charting is likely the most subjective analysis of all investment methods since it relies on proper interpretation of candlesticks and chart patterns. The risk of reliance upon candlestick data is that the next day's data can always negate the conclusions reached from prior days' candlesticks. Also, reliance upon chart patterns bears the risk of a certain pattern being negated by a larger, more encompassing pattern that has not shown itself yet.

Cyclical - Analyzes the investments sensitive to business cycles and whose performance is strongly tied to the overall economy. For example, cyclical companies tend to make products or provide services that are in lower demand during downturns in the economy and higher demand during upswings. Examples include the automobile, steel, and housing industries. The stock price of a cyclical company will often rise just before an economic upturn begins, and fall just before a downturn begins. Investors in cyclical stocks try to make the largest gains by buying the stock at the bottom of a business cycle, just before a turnaround begins.

While most economists and investors agree that there are cycles in the economy that need to be respected, the duration of such cycles is generally unknown. An investment decision to buy at the bottom of a business cycle may actually turn out to be a trade that occurs before or after the bottom of the cycle. If done before the bottom, then downside price action can result prior to any gains. If done after the bottom, then some upside price action may be missed. Similarly, a sell decision meant to occur at the top of a cycle may result in missed opportunity or unrealized losses.

Fundamental - A method of evaluating a security by attempting to measure its intrinsic value by examining related economic, financial and other qualitative and quantitative factors. Fundamental analysts attempt to study everything that can affect the security's value, including macroeconomic factors (like the overall economy and industry conditions) and individually specific factors (like the financial condition and management of companies). The end goal of performing fundamental analysis is to

produce a value that an investor can compare with the security's current price in hopes of figuring out what sort of position to take with that security (underpriced = buy, overpriced = sell or short). This method of security analysis is considered to be the opposite of technical analysis. Fundamental analysis is about using real data to evaluate a security's value. Although most analysts use fundamental analysis to value stocks, this method of valuation can be used for just about any type of security.

The risk associated with fundamental analysis is that it is somewhat subjective. While a quantitative approach is possible, fundamental analysis usually entails a qualitative assessment of how market forces interact with one another in their impact on the investment in question. It is possible for those market forces to point in different directions, thus necessitating an interpretation of which forces will be dominant. This interpretation may be wrong, and could therefore lead to an unfavorable investment decision.

Technical - A method of evaluating securities by analyzing statistics generated by market activity, such as past prices and volume. Technical analysts do not attempt to measure a security's intrinsic value, but instead use charts and other tools to identify patterns that can suggest future activity. Technical analysts believe that the historical performance of stocks and markets are indications of future performance.

Technical analysis is even more subjective than fundamental analysis in that it relies on proper interpretation of a given security's price and trading volume data. A decision might be made based on a historical move in a certain direction that was accompanied by heavy volume; however, that heavy volume may only be heavy relative to past volume for the security in question, but not compared to the future trading volume. Therefore, there is the risk of a trading decision being made incorrectly since future trading volume is an unknown. Technical analysis is also done through observation of various market sentiment readings, many of which are quantitative. Market sentiment gauges the relative degree of bullishness and bearishness in a given security, and a contrarian investor utilizes such sentiment advantageously. When most traders are bullish, then there are very few traders left in a position to buy the security in question, so it becomes advantageous to sell it ahead of the crowd. When most traders are bearish, then there are very few traders left in a position to sell the security in question, so it becomes advantageous to buy it ahead of the crowd. The risk in utilization of such sentiment technical measures is that a very bullish reading can always become more bullish, resulting in lost opportunity if the money manager chooses to act upon the bullish signal by selling out of a position. The reverse is also true in that a bearish reading of sentiment can always become more bearish, which may result in a premature purchase of a security.

There are risks involved in using any analysis method.

To conduct analysis, TVAMP gathers information from financial newspapers and magazines, inspection of corporate activities, research materials prepared by others, corporate rating services, timing services, annual reports, prospectuses and filings with the SEC and company press releases.

Investment Strategies

We use the following investment strategies when managing client assets and/or providing investment advice:

Long term purchases. Investments held at least a year.

Short term purchases. Investments sold within a year.

Trading. Investments sold within 30 days.

Short sales. A short sale is generally the sale of a stock not owned by the investor. Investors who sell short believe the price of the stock will fall. If the price drops, the investor can buy the stock at the lower price and make a profit. If the price of the stock rises and the investor buys it back later at the higher price, the investor will incur a loss. Short sales require a margin account.

Margin transactions. When an investor buys a stock on margin, the investor pays for part of the purchase and borrows the rest from a brokerage firm. For example, an investor may buy \$5,000 worth of stock in a margin account by paying for \$2,500 and borrowing \$2,500 from a brokerage firm. Clients cannot borrow stock from TVAMP.

Primarily Recommend One Type of Security

TVAMP primarily recommends Mutual funds including Exchange Traded Funds.

Different mutual fund categories have different risk characteristics and investors should not compare different categories. For example, a bond fund and a stock fund that both have below average risk still have different risk/return potential (stock funds traditionally have higher risk/return potential). Risks are based on the investments held in the fund. For example, a bond fund faces interest rate risk and income risk and income is affected by the change in interest rates. A sector fund (investing in a single industry) is at risk that its price will decline due to industry developments. The following are some risks to consider when investing in mutual funds:

- **Call Risk:** A bond issuer may redeem high-yield bonds before maturity date due to falling interest rates.
- **Default Risk:** A bond issuer may fail to repay interest and principal.
- **Income Risk:** Dividends in a fixed income fund may decline due to falling interest rates.
- **Geology Risk:** Political events, natural disasters or financial problems may weaken a country or state's economy and cause investments to decline.
- **Industry Risk:** Stocks in a single industry may decline due to developments in that industry.
- **Inflation Risk:** Increases in the cost of living can reduce or eliminate a fund's actual returns when adjusted for inflation.
- **Manager Risk:** A manager may not execute the fund's investment strategy in a timely or effective manner.

Risk of Loss

Past performance is not indicative of future results. Therefore, you should never assume that future performance of any specific investment or investment strategy will be profitable. Investing in securities (including stocks, mutual funds, and bonds) involves risk of loss. Further, depending on the different types of investments there may be varying degrees of risk. You should be prepared to bear investment loss including loss of original principal.

Because of the inherent risk of loss associated with investing, our firm is unable to represent, guarantee, or even imply that our services and methods of analysis can or will predict future results, successfully identify market tops or bottoms, or insulate you from losses due to market corrections or declines. There

are certain additional risks associated when investing in securities through our investment management program.

- Market Risk – Either the stock market as a whole, or the value of an individual company, goes down resulting in a decrease in the value of client investments. This is also referred to as systemic risk.
- Equity (stock) market risk – Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. If you held common stock, or common stock equivalents, of any given issuer, you would generally be exposed to greater risk than if you held preferred stocks and debt obligations of the issuer.
- Company Risk. When investing in stock positions, there is always a certain level of company or industry specific risk that is inherent in each investment. This is also referred to as unsystematic risk and can be reduced through appropriate diversification. There is the risk that the company will perform poorly or have its value reduced based on factors specific to the company or its industry. For example, if a company's employees go on strike or the company receives unfavorable media attention for its actions, the value of the company may be reduced.
- Fixed Income Risk. When investing in bonds, there is the risk that issuer will default on the bond and be unable to make payments. Further, individuals who depend on set amounts of periodically paid income face the risk that inflation will erode their spending power. Fixed-income investors receive set, regular payments that face the same inflation risk.
- Options Risk. Options on securities may be subject to greater fluctuations in value than an investment in the underlying securities. Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary investment risks.
- ETF and Mutual Fund Risk – When investing in an ETF or mutual fund, you will bear additional expenses based on your pro rata share of the ETF's or mutual fund's operating expenses, including the potential duplication of management fees. The risk of owning an ETF or mutual fund generally reflects the risks of owning the underlying securities the ETF or mutual fund holds. Clients will also incur brokerage costs when purchasing ETFs.
- Management Risk – Your investment with our firm varies with the success and failure of our investment strategies, research, analysis and determination of portfolio securities. If our investment strategies do not produce the expected returns, the value of the investment will decrease.
- Margin Risk - When you purchase securities, you may pay for the securities in full or borrow part of the purchase price from your account custodian or clearing firm. If you intended to borrow funds in connection with your Account, you will be required to open a margin account, which will be carried by the clearing firm. The securities purchased in such an account are the clearing firm's collateral for its loan to you.

If those securities in a margin account decline in value, the value of the collateral supporting this loan also declines, and as a result, the brokerage firm is required to take action in order to maintain the necessary level of equity in your account. The brokerage firm may issue a margin call and/or sell other assets in your account.

It is important that you fully understand the risks involved in trading securities on margin, which are applicable to any margin account that you may maintain, including any margin account that may be established as part of the Asset Management Agreement established between you and TVAMP and held by the account custodian or clearing firm.

These risks include the following:

- You can lose more funds than you deposit in your margin account
- The account custodian or clearing firm can force the sale of securities or other assets in your account
- The account custodian or clearing firm can sell your securities or other assets without contacting you
- You are not entitled to choose which securities or other assets in your margin account may be liquidated or sold to meet a margin call
- The account custodian or clearing firm may move securities held in your cash account to your margin account and pledge the transferred securities
- The account custodian or clearing firm can increase its “house” maintenance margin requirements at any time and are not required to provide you advance written notice
- You are not entitled to an extension of time on a margin call

Voting Client Securities

TVAMP does not vote proxies on your behalf. You should read through the information provided with the proxy-voting documents and make a determination based on the information provided. If requested, we may provide limited clarifications of the issues presented in the proxy voting materials based on our understanding of issues presented in the proxy-voting materials. However, you have the ultimate responsibility for making all proxy-voting decisions.

With respect to assets managed by any outside money manager, we do not vote the proxies associated with these assets. You need to refer to each outside money manager’s disclosure brochure to determine whether the outside money manager will vote proxies on your behalf. You may request a complete copy of sub-advisor’s proxy voting policies and procedures as well as information on how your proxies were voted by contacting us at the address or phone number indicated on Page 1 of this disclosure document.

Item 7 – Client Information Provided to Portfolio Managers

Periodically we may need to provide certain financial information about clients to a portfolio manager. This requirement may be necessary when working with an investment that has certain net worth or income requirements. This information may be supplied to the portfolio manager each year as necessary. The information is only provided to establish financial suitability/wherewithal for the specific investment.

Item 8 - Client Contact with Portfolio Managers

Our TVAMP Program primarily utilizes pooled investment vehicles which have investment/portfolio managers. These managers are not typically available to our clients for direct contact. We have relationships with those managers’ companies and each provides us with points of contact so that we can obtain important information, updates and analysis necessary and relevant for our portfolio decision making process. Periodically we may be in direct contact with an investment’s manager to obtain their view on certain market events. This meeting usually does not include clients.

Sometimes however, we may offer a workshop or seminar in which we bring in a portfolio manager. That manager may give his/her overall market outlook and discuss some attributes of the portfolio. These workshops or seminars are for general educational purposes only.

Item 9 - Additional Information

Disciplinary Information

We have no legal or disciplinary events that are material to your evaluation of our business or the integrity of our management. Therefore, this item is not applicable to our brochure.

Other Financial Industry Activities and Affiliations

TVAMP is **not** and does **not** have a related person that is a broker/dealer, municipal securities dealer, government securities dealer or broker, an investment company or other pooled investment vehicle (including a mutual fund, closed-end investment company, unit investment trust, private investment company or "hedge fund," and offshore fund), another investment adviser or financial planner, a futures commission merchant, commodity pool operator, or commodity trading advisor, a banking or thrift institution, an accountant or accounting firm, a lawyer or law firm, a pension consultant, a real estate broker or dealer, and a sponsor or syndicator of limited partnerships.

We are an independent registered investment registered advisor and only provide investment advisory services. We are not engaged in any other business activities and offer no other services except those described in this Disclosure Brochure. However, while we do not sell products or services other than investment advice, our representatives may sell other products or provide services outside of their role as investment advisor representatives with us.

Registered Representative of a Broker-Dealer

Our representatives are also registered representatives of LPL Financial, a securities broker-dealer. You may work with your investment adviser representative in his or her separate capacity as a registered representative of LPL Financial. When acting in his or her separate capacity as a registered representative, your investment adviser representative may sell, for commissions, general securities products such as stocks, bonds, mutual funds, exchange-traded funds, and variable annuity products to you. As such, your investment adviser representative may suggest that you implement investment advice by purchasing securities products through a commission-based brokerage account in addition to or in lieu of a fee-based investment-advisory account. This receipt of commissions creates an incentive to recommend those products for which your investment adviser representative will receive a commission in his or her separate capacity as a registered representative of a securities broker-dealer. Consequently, the objectivity of the advice rendered to you could be biased.

You are under no obligation to use the services of our representatives in this separate capacity or to use LPL Financial and can select any broker/dealer you wish to implement securities transactions. If you select our representatives to implement securities transactions in their separate capacity as registered representatives, they must use LPL Financial. Prior to effecting any transactions, you are required to enter into a new account agreement with LPL Financial. The commissions charged by LPL Financial may be higher or lower than those charged by other broker/dealers.

TVAMP Advisor Representatives Other Business Activities – Banking or Thrift Institutions

TVAMP has established and will continue to establish marketing arrangements with banks and other depository institutions whereby investment advisory services of TVAMP may be marketed through these banks and other depository institutions, provided that such marketing is done in compliance with applicable SEC and state regulations. Further, TVAMP may have investment adviser representatives conducting business from and/or affiliated with a bank or other depository institution. These relationships may create compliance issues relative to consumer protection.

Third-Party Money Managers

TVAMP will develop programs designed to allow us to recommend and select third-party money managers for you. Once you select the third-party money manager to manage all or a portion of your assets, the third-party money manager will pay us a portion of the fees you are charged. Please refer to *Item 5* of the TVAMP ADV Part 2A for full details regarding the programs, fees, conflicts of interest and materials arrangements when select other investment advisers.

Insurance Agent

In January 2017 TVAMP became licensed as an Insurance Agency with the state of Tennessee.

You may work with your investment adviser representative in his or her separate capacity as an insurance agent through the TVAMP agency. You may work with your investment adviser representative in his or her separate capacity as an insurance agent. When acting in his or her separate capacity as an insurance agent, the investment adviser representative may sell, for commissions, general disability insurance, life insurance and annuities to you. As such, your investment adviser representative in his or her separate capacity an insurance agent, may suggest that you implement recommendations of TVAMP by purchasing disability insurance, life insurance or annuities. This receipt of commissions creates an incentive for the representative to recommend those products for which your investment adviser representative will receive a commission in his or her separate capacity as an insurance agent. Consequently, the advice rendered to you could be biased. You are under no obligation to implement any insurance or annuity transaction through your investment adviser representative.

Code of Ethics Summary

An investment advisor is considered a fiduciary and has a fiduciary duty to all clients. TVAMP has established a Code of Ethics to comply with the requirements of the securities laws and regulations that reflects its fiduciary obligations and those of its supervised persons. The Code of Ethics also requires compliance with federal securities laws. TVAMP's Code of Ethics covers all individuals that are classified as "supervised persons". All employees, officers, directors and investment adviser representatives are classified as supervised persons. TVAMP requires its supervised persons to consistently act in your best interest in all advisory activities. TVAMP imposes certain requirements on its affiliates and supervised persons to ensure that they meet the firm's fiduciary responsibilities to you. The standard of conduct required is higher than ordinarily required and encountered in commercial business.

This section is intended to provide a summary description of TVAMP's Code of Ethics. If you wish to review the Code of Ethics in its entirety, you should send a written request and upon receipt of your request, a copy of the Code of Ethics will promptly be provided to you.

Affiliate and Employee Personal Securities Transactions Disclosure

TVAMP or associated persons of the firm may buy or sell for their personal accounts, investment products identical to those recommended to clients. This creates a potential conflict of interest. It is the express policy of TVAMP that all persons associated in any manner with our firm must place clients' interests ahead of their own when implementing personal investments. TVAMP and its associated persons will not buy or sell securities for their personal account(s) where their decision is derived, in whole or in part, by information obtained as a result of employment or association with our firm unless the information is also available to the investing public upon reasonable inquiry.

We are now and will continue to be in compliance with applicable state and federal rules and regulations. To prevent conflicts of interest, we have developed written supervisory procedures that include personal investment and trading policies for our representatives, employees and their immediate family members (collectively, associated persons):

- Associated persons cannot prefer their own interests to that of the client
- Associated persons cannot purchase or sell any security for their personal accounts prior to implementing transactions for client accounts
- Associated persons cannot buy or sell securities for their personal accounts when those decisions are based on information obtained as a result of their employment, unless that information is also available to the investing public upon reasonable inquiry
- Associated persons are prohibited from purchasing or selling securities of companies in which any client is deemed an "insider"
- Associated persons are discouraged from frequent personal trading
- Associated persons are generally prohibited from serving as board members of publicly traded companies unless an exception has been granted TVAMP's Chief Compliance Officer.

Any associated person not observing our policies is subject to sanctions up to and including termination.

Account Reviews and Reviewers

Account reviews are made on a regular basis during a calendar year. Account reviews will include investment strategy and objectives review and making a change if strategy and objectives have changed. Reviews are conducted by the investment advisor representative assigned to the account with reviews performed in accordance with your investment goals and objectives.

Managed accounts are reviewed at least quarterly. While the calendar is the main triggering factor, reviews can also be conducted at your request.

Accounts established and maintained with other third-party money managers are reviewed at least quarterly, usually when statements and/or reports are received from the money manager.

Our financial planning services terminate upon the presentation of the written plan. Our financial planning and consulting services do not include monitoring the investments of your account(s), and therefore, there's no ongoing review of your account(s) under such services.

Statements and Reports

For our asset management services, you are provided with transaction confirmation notices and regular quarterly account statements directly from the qualified custodian. Additionally, TVAMP may provide position or performance reports to you quarterly and upon request.

Whether reports by outside money manager are provided to you will depend upon the outside money manager.

Financial planning clients do not receive any report other than the written plan originally contracted for by you and our firm.

You are encouraged to always compare any reports or statements provided by us, a sub-advisor or third-party money manager against the account statements delivered from the qualified custodian. When you have questions about your account statement, you should contact our firm and the qualified custodian preparing the statement.

Client Referrals and Other Compensation

TVAMP has entered into agreements with various parties (Referring Parties) to refer clients to TVAMP. If a referred client enters into an investment advisory agreement with TVAMP, a cash referral fee is paid to the referring party, which is based upon a percentage of the client advisory fees that are generated. The referral agreements between any referring party and TVAMP will not result in any charges to clients in addition to the normal level of advisory fees charged.

When a client is referred to us by a referring party, the referring party provides the client with a copy of our Disclosure Brochure as required by the *Investment Advisers Act of 1940*. The client also will complete a Solicitor's Disclosure Statement document. If the referring party is an unaffiliated registered investment adviser firm, then the client will also receive a copy of the referring party's Form ADV Part 2 Disclosure Brochure. If a referred client enters into an investment advisory agreement with TVAMP, a referral fee is paid to the referring party. The referral relationship will not result in clients being charged any fees over and above the normal advisory fees charged for the advisory services provided.

The referral agreements between TVAMP and referring parties are in compliance with state and federal securities rules regarding paid solicitor arrangements

Marketing Arrangements with Financial Institutions

TVAMP has established and will continue to establish marketing arrangements with banks, credit unions and other financial institutions. In certain circumstances, investment advisory services of TVAMP may also be marketed through these banks, credit unions and other financial institutions, provided that such marketing is done in compliance with applicable SEC and state regulations. Further, TVAMP may have Advisor Representatives conducting business from and/or affiliated with a bank or other financial institution. As a result of these marketing agreements, the financial institution may receive compensation representing payment for the use of the facilities and equipment of the financial institution(s), in the form of program support or rent payment and/or a portion of advisory fees or securities commissions paid to the representatives for sales to customer/members of the financial institution.

These relationships may create compliance issues relative to consumer protection.

The joint guidelines of regulators of the depository institution call for, at a minimum, both written and verbal disclosure at or prior to the time securities products are purchased or sold that such securities products:

- Are not insured by the Federal Deposit Insurance Corporation (FDIC) or National Credit Union Share Insurance Fund, the Federal Deposit Insurance Corp., the National Credit Union Administration, or any other federal or state deposit guarantee fund or other government agency;
- Not endorsed or guaranteed by the bank or credit union or their affiliates;
- Are not deposits or obligations of the depository institutions and are not guaranteed by the depository institutions;
- Investments and securities are subject to investment risks, including possible loss of principal invested.

Broker Dealer Additional Compensation

TVAMP and/or its Dually Registered Persons are incented to join and remain affiliated with LPL Financial and to recommend that clients establish accounts with LPL Financial through the provision of Transition Assistance (discussed in Item 12 above). LPL also provides other compensation to TVAMP and its Dually Registered Persons, including but not limited to, bonus payments, repayable and forgivable loans, stock awards and other benefits.

The receipt of any such compensation creates a financial incentive for your representative to recommend LPL Financial as custodian for the assets in your advisory account. We encourage you to discuss any such conflicts of interest with your representative before making a decision to custody your assets at LPL Financial.

Additional Compensation

The only compensation received from advisory services is the fees charged for providing investment advisory services as described in Item 5 of this Disclosure Brochure. TVAMP receives no other forms of compensation in connection with providing investment advice.

Please see Item 5, Fees and Compensation, Item 10, Other Financial Industry Activities and Affiliations and Item 12, Brokerage Practices, for additional discussion concerning other compensation.

We may from time to time receive expense reimbursement for travel and/or marketing expenses from distributors of investment and/or insurance products. Travel expense reimbursements are typically a result of attendance at due diligence and/or investment training events hosted by product sponsors. Marketing expense reimbursements are typically the result of informal expense sharing arrangements in which product sponsors may underwrite costs incurred for marketing such as client appreciation events, advertising, publishing, and seminar expenses. Although receipt of these travel and marketing expense reimbursements are not predicated upon specific sales quotas, the product sponsor reimbursements are typically made by those sponsors for whom sales have been made or it is anticipated sales will be made. This creates a conflict of interest in that there is an incentive to recommend certain products and investments based on the receipt of this compensation instead of what is in the best interest of our clients. We attempt to control for this conflict by always basing investment decisions on the individual needs of our clients.

Financial Information

This item is not applicable to this brochure. TVAMP does not require or solicit prepayment of more than \$500 in fees per client, six months or more in advance. Therefore, we are not required to include a balance sheet for the most recent fiscal year. We are not subject to a financial condition that is reasonably likely to impair our ability to meet contractual commitments to clients. Finally, TVAMP has not been the subject of a bankruptcy petition at any time.
