Item 4: Advisory Business

Description of KeyQuant SAS

- A. KeyQuant SAS is a systematic investment manager, based in Paris (France), launched on December 17, 2009, and licensed by the *Autorité des Marchés Financiers* (“AMF”) in France on December 24, 2009. KeyQuant initiated its principal investment strategy, the Key Trends Program, via a Separately Managed Account, on January 8, 2010.

The principal owners are:

- I. KQ Founders SAS (80%)
 - a. 50% owned by Raphaël Gelrubin
 - b. 50% owned by Robert Baguenault de Viéville.
 - II. KQ Partners SAS (20%)
 - a. 49.53% owned by Raphaël Gelrubin
 - b. 49.53% owned by Robert Baguenault de Viéville
 - c. 0.94% owned by a pool of employees
- B. The primary investment strategy is the Key Trends Program, a diversified portfolio of listed futures contracts, rebalanced daily, on commodities, currencies, rates, bonds, and equity indices. We currently invest investors funds in cash, futures, and forwards.
- C. KeyQuant offers limited tailoring of advisory services to investors. This is limited to excluding certain markets traded from holdings and adjusting the leverage from an annual standard deviation (volatility target) from 10% to 20%.
- D. KeyQuant does not currently offer *wrap fee programs*.
- E. As of December 31, 2023, KeyQuant managed US\$40 million in investors notional assets, on a discretionary basis.

Item 5: Fees and Compensation

- A. KeyQuant charges a 2% management fee and a 20% performance fee on accounts and/or private funds which employ a risk target of 20% volatility.

Fee Schedule

Risk Level	Management Fee	Performance Fee
10%	1.25%	20%
15%	1.50%	20%
20%	2.00%	20%

The fees are negotiable.

- B. Fee deduction:
- a. Key Trends 15 Fund LLC: Fees are invoiced by KeyQuant on a monthly basis (in arrears) to the fund, and settled via bank wire from the fund to KeyQuant
 - b. Key Trends 15 Fund Limited: Fees are invoiced by KeyQuant on a monthly basis (in arrears) to the fund, and settled via bank wire from the fund to KeyQuant
 - c. Separately Managed Accounts: Fees are invoiced by KeyQuant on a monthly basis or quarterly basis (in arrears), and settled via bank wire to KeyQuant
- C. Other Types of Fees or Expenses:
- a. Key Trends 15 Fund LLC: The fund charges an annual performance allocation equal to 20% of net profits, subject to a high-water mark. Other fund expenses include, but are not limited to:
 - i. Brokerage (execution, clearing, & exchange fees)
 - ii. Administration
 - iii. Custody
 - iv. Regulatory fees
 - v. Audit
 - vi. Organizational costs

- b. Key Trends 15 Fund Limited: The fund charges an annual performance fee equal to 20% of net profits, subject to a high-water mark. Other fund expenses include, but are not limited to:
 - i. Brokerage (execution, clearing, & exchange fees)
 - ii. Administration
 - iii. Custody
 - iv. Regulatory fees
 - v. Audit
 - vi. Director fees
 - vii. Organizational costs
 - c. SMAs: Accounts are charged a quarterly or annual performance fee (no hurdle), subject to a high-water mark. Accounts will incur brokerage costs related to trading futures and forward contracts. The responsibility of administration, custody, audit, and legal are born directly by the investor, and thus these expenses will vary based upon the service providers chosen by the investor.
- D. Investors do not pay fees in advance.
- E. Supervised sales personnel are paid a fixed salary and an annual discretionary bonus.

Item 6: Performance-Based Fees and Side-By-Side Management

As discussed in Item 5 (“Fees and Compensation”) of this Brochure, KeyQuant may earn, with respect to certain investors and in addition to management fees, performance-based fees/allocations. Where applicable, performance fees are charged:

- i) On a quarterly or annual basis
- ii) At the time of withdrawal or redemption with respect to the amount withdrawn and/or redeemed

For Separately Managed Accounts and certain private funds, KeyQuant currently charges performance fees/allocations based on the relevant net profits without regard to any index or performance hurdle. These arrangements may be subject to a high-water mark or other provisions intended to assure that prior losses are recouped before giving effect to any performance fees or allocations.

Item 7: Types of Clients

KeyQuant's investment management services are offered to investment companies, single-investor funds, discretionary and non-discretionary advisory programs, commingled investment vehicles and institutional investors through separate account management.

KeyQuant's investors may include, but are not limited to financial institutions, registered investment companies, private investment funds, profit sharing plans, ERISA plan assets, pension funds and other retirement accounts, insurance companies, charitable and endowment organizations, corporations, banks and thrift institutions, and other institutional type accounts (both taxable and tax-exempt).

KeyQuant advises both US and non-US investors.

Before opening an account or accepting subscriptions into a commingled fund vehicle, to abide with AML and KYC rules and regulations (including money laundering activities), KeyQuant may seek to obtain, verify, and record information that identifies each investor who retains KeyQuant to manage its account or who invests in a fund managed by KeyQuant. In this regard, when an investor or investor seeks to open an account, KeyQuant may ask for information, including name of business, contact person, address, and other reasonably required information that will allow the KeyQuant to identify the investor. KeyQuant may ask for information and documentation regarding source of funds to be invested. KeyQuant also reserves the right to ask for more information regarding the beneficial owners of the investor and/or the ones who exercise control over the investor.

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss

KeyQuant's principal investment strategy, the Key Trends Program, is fully systematic, from market data to execution. Key Trends is a medium to long term trend following system whereby the model is 100% technical (Decisions are based solely on price data). The system analyzes trends, performs various risk calculations, and calculates the correlation to determine the optimal portfolio. The Key Trends Program investment strategy can be obtained via a Separately Managed Account or a Private Fund.

The Key Trends Program invests primarily in futures contracts on commodities, rates, bonds, equity indices, and currencies. In addition, the program may also invest in forward contracts.

Investors should be aware that the value of a Separately Managed Account or a Private Fund may fall as well as rise. Investment in the Key Trends Program involves significant risks. Whilst it is the intention of the Manager to implement strategies which are designed to minimize potential losses, there can be no assurance that these strategies will be successful. It is possible that an investor may lose a substantial proportion or all its investment in the Separately Managed Account or Private Fund. As a result, each investor should carefully consider whether it can afford to bear the risks of investing in the Key Trends Program. The following discussion of risk factors does not purport to be a complete explanation of the risks involved in investing in the Key Trends Program.

Prospective investors should carefully consider the following risks before investing. The risk of loss in investing in the Key Trends Program can be substantial. Investors should therefore carefully consider whether such type of investment is suitable for them in light with their financial condition and the fact that the value of their Separately Managed Account or Private Fund may fall as well as rise. Investment in the securities, commodities or financial derivatives markets (or a short sale thereof) carries number of risks. As with other investments, there can be no assurance that trading in the markets will be profitable.

Before investing in the Key Trends Program, investors should be aware of the following risk factors.

Strategy Risk:

- i. Duration of Investment: Investments in the markets may experience periods of volatility or loss. For this reason, investors should plan to commit funds for at least two years, although this is not an obligation.
- ii. Income: An investment in the Key Trends Program is not suitable for an investor seeking an income from such investment.

- iii. Regulation: Changes in securities regulations, tax laws, accounting standards, financing regulations or political climate can affect the number of investment opportunities and the profitability of the Key Trends Program.
- iv. Possible Adverse Effect of Large Redemptions: The investment strategy of the Key Trends Program could be disrupted by large number of redemptions of the Shares. As a matter of large number of redemptions, the Company may have to prematurely liquidate securities positions that have not yet adequately matured.

Investment Risk:

- i. Volatility: Movements in the Net Asset Value of the Key Trends Program may on occasion be volatile from month to month. The portfolio positions dealt by the Manager are based upon its expectation of price movements over a period of several months following the trade. In the meantime, the market value of the positions may not increase, and, indeed, may decrease and this will be reflected in the Net Asset Value of a Separately Managed Account or Private Fund.
- ii. Futures and Options: The Key Trends Program will be investing in futures, either directly or through managed accounts in which there is inherent gearing. Small adverse price or interest rate movements can give rise to an immediate and substantial loss. In addition, adverse price movements may give rise to margin calls which could result in the Separately Managed Account or Private Fund having to liquidate or unwind positions at an inappropriate time or on unfavorable terms. The writing or selling of options involves the Separately Managed Account or Private Fund assuming obligations as well as rights on assets.
- iii. Leverage: The use of leverage creates special risks and may significantly increase the Key Trends Program's investment risk. Leverage creates an opportunity for greater yield and total return but, at the same time, will increase the Company's exposure to capital risk. The use of leverage means that losses (as well as gains) may be exaggerated and accordingly may be greater than would be the case if no leverage mechanisms were employed.
- iv. Short Selling: The Key Trends Program, either directly or through or managed accounts, may engage in short selling. In selling short, the Separately Managed Account or Private Fund bears the risk of an increase in the value of the instrument sold short above the price at which it was sold. Such an increase could lead to a substantial (theoretically unlimited) loss.

- v. **Market Risk:** The Separate Managed Account or Private Fund will bear the risk of trading halts in the Markets for securities and other instruments in which it trades, which could affect the Manager's ability to initiate or close out positions. The ability to initiate or close out positions may also be adversely affected due to insufficient trading activity in the market concerned. In addition, certain futures contracts and other derivative instruments have daily price fluctuation limits, and once those limits are reached on the relevant market, positions cannot be taken out or liquidated. These risks may be accentuated where the Separate Managed Account or Private Fund is required to liquidate positions to meet redemption requests, margin calls or other funding requirements. The Key Trends Program, however, will only trade on major government regulated world exchanges, with liquid markets.
- vi. **Counterparty and Settlement Risk:** The Separate Managed Account or Private Fund will assume credit risk on parties with whom it trades and will also bear the risk of settlement default. The Manager will seek so far as is practicable to ensure that all securities and other assets deposited by the Custodian with sub-custodians or brokers are clearly identified as being assets of the Separate Managed Account or Private Fund and hence the Separate Managed Account or Private Fund should not be exposed to credit risk on such parties. However, it may not always be possible to achieve this and there may be operation or timing problems associated with enforcing the Separate Managed Account or Private Fund's rights to its assets in the case of an insolvency of any such party.
- vii. **Exchange Rate Fluctuations:** Certain of the investments of the Key Trends Program may be in currencies other than US Dollars. Accordingly, adverse exchange rate fluctuations may cause the value of the investments of the Separate Managed Account or Private Fund to diminish.
- viii. **Reliance on Models/Information Technology:** The investment approach of the Key Trends Program will be based on mathematical models, which are implemented as automated computer algorithms, and valuation models which investment professionals at the Manager have developed over time. The Manager commits substantial resources to the updating and maintenance of existing models and algorithms as well as to the ongoing development of new models and algorithms. The successful operation of the automated computer algorithms on which the investment approach of the Key Trends Program will be based is reliant upon the information technology systems of the Manager and its ability to ensure those systems remain operational and that appropriate disaster recovery procedures are in place. Further, as market dynamics shift over time, a previously highly successful model may become outdated, perhaps

without the Manager recognizing that fact before substantial losses are incurred. There can be no assurance that the Manager will be successful in maintaining effective mathematical and valuation models and automated computer algorithms.

Management Risk:

- i. Dependence on the Manager: The Manager has complete discretion in investing the Separate Managed Account or Private Fund's capital and the Separate Managed Account or Private Fund's success depends, on a large extent, on its ability to utilize the investment strategy effectively. Although the Manager has contractual obligations, should any of the principals of the Manager cease to participate in the operation of the Separate Managed Account or Private Fund for any reason, the operations, objectives and activities of the Separate Managed Account or Private Fund may be adversely affected. Although the officers of the Manager will devote as much time to the Key Trends Program as they believe is necessary to assist the Key Trends Program in achieving its investment objectives and to administer the Separate Managed Account or Private Fund's operations, none of them will devote substantially all their working time to the affairs of the Separate Managed Account or Private Fund, as they must devote a portion of their time to other funds and investments.
- ii. Competition for Investments: The Key Trends Program expects to encounter competition from other persons or entities having similar investment objectives. Competition would include other funds, banks and investment bankers, insurance companies and large industrial and financial companies investing directly or through affiliates and individuals. There is substantial competition for good investment opportunities from large and small institutions and wealthy investors.
- iii. The price of the Participating Shares may fall as well as rise. There can be no assurance that The Key Trends Program will achieve its investment objective or that a Shareholder will recover the full amount invested in a Company. The capital return and income of The Key Trends Program are based on the capital appreciation and income on the securities it holds, less expenses incurred. Therefore, each Company's return may be expected to fluctuate in response to changes in such capital appreciation or income.

Liquidity and Settlement Risk:

- iv. The Separate Managed Account or Private Fund will be exposed to a credit risk on parties with whom it trades and will also bear the risk of settlement default. Market practices in relation to the settlement of certain securities transactions and the custody of assets could provide increased risks.

Item 9: Disciplinary Information

There are no criminal or civil actions, administrative proceeding before the SEC, and/or self-regulatory organization (SRO) proceeding currently being held against KeyQuant.

Item 10: Other Financial Industry Activities and Affiliations

- A. No current broker-dealer registrations pending.
- B. KeyQuant is currently registered with the NFA as a CTA and CPO. There are no registrations pending otherwise.
- C. The owners of the two holding companies (KQ Partners & KQ Founders) of KeyQuant do not have a material relationship or arrangement as it relates to:
 - a. broker-dealer, municipal securities dealer, or government securities dealer or broker
 - b. investment company or other pooled investment vehicle (including a mutual fund, closed-end investment company, unit investment trust, private investment company or "hedge fund," and offshore fund)
 - c. other investment adviser or financial planner
 - d. futures commission merchant, commodity pool operator, or commodity trading advisor
 - e. banking or thrift institution
 - f. accountant or accounting firm
 - g. lawyer or law firm
 - h. insurance company or agency
 - i. pension consultant
 - j. real estate broker or dealer
 - k. sponsor or syndicator of limited partnerships
- D. KeyQuant does not select other investment advisers for its investors.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

KeyQuant maintains a strong and ethical culture and continues to enhance the controls it has in place to address potential conflicts of interest. These controls include KeyQuant Code of Conduct, compliance procedures and professional best practices (collectively, the “Codes”) that apply to each KeyQuant officer. The Codes include specific restrictions and discussions regarding the steps KeyQuant takes to manage potential conflicts of interests. In addition, KeyQuant maintains compliance and risk management teams. Finally, KeyQuant acts to ensure that potential conflicts are identified, prudently managed and, as appropriate, disclosed to investors and other interested parties.

Item 12: Brokerage Practices

Where KeyQuant or its related persons manage securities directly, the determination of the investments to be bought and sold (including the amount to be bought and sold) is made by reference to investment guidelines and restrictions agreed upon with the investor.

Best Execution

KeyQuant seeks best execution in all trading activity.

KeyQuant defines best execution as the trading process that seeks to maximize the value of a investor's portfolio within the investor's stated investment objectives and constraints.

KeyQuant's approach to evaluating best execution is based on guidance from various regulators and industry associations in global financial markets. Among other factors, this guidance recognizes that Best Execution:

- is intrinsically tied to portfolio investment objectives, guidelines and risk controls, and cannot be evaluated independently of those factors,
- is a prospective, statistical, and qualitative concept that cannot be known with certainty ex-ante,
- has aspects that may be measured and analyzed over time on an ex-post basis, although such measurement may not always be meaningful, especially in isolation, and
- is interwoven into repetitive and continuing practices and relationships.

KeyQuant approach to evaluating best execution is adapted to KeyQuant trade implementation process, as modified from time to time.

Order Aggregation

KeyQuant is committed to conducting its business with high ethical and fiduciary standards. To that end KeyQuant does not aggregate trade orders within and across trading mandates. As brokerage, clearing and market fee are negotiated per lot, there is no additional cost to investors of not aggregating.

Research and Soft Dollars

KeyQuant does not receive research or other soft dollar benefits, products or services other than execution from a Futures Clearing Merchant in connection to investor securities transactions. All research is performed internally.

Item 13: Review of Accounts

KeyQuant monitors the investment activities of the funds it advises or sub-advises on a daily, weekly, monthly, and/or quarterly basis. KeyQuant conducts in-depth quarterly reviews related to the investment activities associated with its investment company investors and managed account programs. These activities include, but are not limited to quarterly Board presentations, investor presentations, quarterly investment reviews and special investment adviser reviews as events warrant.

KeyQuant separate account investors receive information monthly on their accounts detailing account performance. In addition, for KeyQuant institutional investors, investor account executives are in contact on a regular and recurring basis as investor demand dictates or as KeyQuant deems necessary.

Investor account reviews are conducted by various KeyQuant personnel including Portfolio Managers, Consultants and Investor Account Executives.

Item 14: Client Referrals and Other Compensation

KeyQuant does not receive “economic benefits” from someone who is not an investor.

KeyQuant does not appoint any entities to solicit investors for and refer investors to KeyQuant.

Item 15: Custody

KeyQuant investors should receive at least quarterly statements from the qualified custodian that holds and maintains investors' investment assets. KeyQuant urges you to carefully review such statements.

KeyQuant will not provide any account statements to you.

Item 16: Investment Discretion

KeyQuant does not accept discretionary authority to manage securities accounts on behalf of investors.

Item 17: Voting Client Securities

KeyQuant currently trades futures, FX spot, FX forward contracts and bonds. Consequently, KeyQuant does not exercise any proxy authority over investors securities.

Item 18: Financial Information

KeyQuant is required in this Item to provide you with certain financial information or disclosures about KeyQuant financial condition. KeyQuant has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to investors and has not been the subject of a bankruptcy proceeding.
