Item 4 Advisory Business

Farrell Financial is an investment advisor firm registered with the U.S. Securities and Exchange Commission, since June 2022.

The principal owner of Farrell Financial is Neil Farrell, President.

Advisory Services

Farrell Financial's (or "Advisor") principal service is providing fee-based investment advisory services and comprehensive financial planning services. The Advisor practices custom management of portfolios, on a discretionary basis, according to the client's objectives. The Advisor's primary approach is to use a tactical allocation strategy aimed at reducing risk and increasing performance. The Advisor may use any of the following: exchange listed securities, over-the-counter securities, foreign securities, corporate debt securities, CDs, variable annuities, municipal securities, mutual funds, and United States government securities to accomplish this objective. The Advisor measures and selects mutual funds by using various criteria, such as the fund manager's tenure, and/or overall career performance. The Advisor may recommend, on occasion, redistributing investment allocations to diversify the portfolio in an effort to reduce risk and increase performance. The Advisor may recommend specific stocks to increase sector weighting and/or dividend potential. The Advisor may recommend employing cash positions as a possible hedge against market movement which may adversely affect the portfolio. The Advisor may recommend selling positions for reasons that include, but are not limited to, harvesting capital gains or losses, business or sector risk exposure to a specific security or class of securities, overvaluation or overweighting of the position(s) in the portfolio, change in risk tolerance of client, or any risk deemed unacceptable for the client's risk tolerance.

For some clients, Farrell Financial may use a third-party platform to facilitate management, on a discretionary basis, of held away assets such as defined contribution plan participant accounts (e.g., 401(k) plan accounts). Farrell Financial will avoid being deemed to have custody of client funds because Farrell Financial will not have direct access to client login credentials to effect trades. A link will be provided to the client allowing them to connect accounts to the platform, and once the client accounts are connected to the platform Farrell Financial will have the ability to review and manage account allocations. We regularly review the available investment options in these accounts, monitor them, and rebalance and implement our strategies in the same way we do other accounts, though using different tools as necessary. When deemed necessary, Farrell Financial will rebalance the account considering client investment goals and risk tolerance, and any change in allocations will consider current economic and market trends. The goal is to improve account performance over time, minimize loss during difficult markets, and manage internal fees that harm account performance. Client account(s) will be reviewed at least annually and allocation changes will be made as deemed necessary. As it is impossible to directly debit Farrell Financial's investment advisory fees from these accounts, those fees will be assigned to the client's taxable accounts on a pro-rata basis. If the client does not have a taxable account, those fees will be billed directly to the client.

Financial Planning

In addition to investment advisory services, Farrell Financial offers all clients comprehensive financial planning services based on the client's investment needs and objectives. The Advisor's financial planning services may include recommendations for portfolio customization based on the client's investment objectives, goals and financial situation, recommendations relating to investment strategies as well as tailored investment advice. Financial planning may also include non-investment advice such as developing strategies to achieve retirement or other financial goals, tax optimization strategies, cash flow and budgeting analysis and recommendations, financing and financial education, estate planning, and asset protection strategies. The Advisor provides financial planning as a complement to its clients and does not charge a separate financial planning services fee.

Farrell Financial will tailor its advisory services to its client's individual needs based on meetings and conversations with the client. If clients wish to impose certain restrictions on investing in certain securities or types of securities, the Advisor will address those restrictions with the client to have a clear understanding of the client's requirements.

Farrell Financial does not provide portfolio management services to wrap fee programs.

As of December 31, 2023, Farrell Financial had \$142 million in discretionary, and \$0 in non-discretionary, client assets under management.

Item 5 Fees and Compensation

Asset Management Fees

Pursuant to an investment advisory contract signed by each client, the client will pay Farrell Financial a management fee of up to 1.0% per annum, payable monthly in advance, based on the value of portfolio assets of the account managed by the Advisor as of the opening of business on the first business day of each month. New account fees will be prorated from the inception of the account to the end of the first month.

Fees will be calculated on a breakpoint schedule. These fees may be negotiated at the sole discretion of the Advisor. Asset management fees will be directly deducted from the client account on a monthly basis by the qualified custodian. The client will give written authorization permitting the Advisor to be paid directly from their account held by the custodian. The custodian will send a statement at least quarterly to the client.

All fees paid to Farrell Financial for investment advisory services are separate and distinct from the expenses charged by mutual funds to their shareholders and the product sponsor in the case of variable insurance products. These fees and expenses are described in each fund's or variable product's prospectus. These fees will generally include a management fee and other fund expenses. Client is responsible for all custodial and securities execution fees charged by the custodian and executing broker-dealer. The Advisor's fee is separate and distinct from the custodian and execution fees.

At no time will Farrell Financial accept or maintain custody of a client's funds or securities except for authorized fee deduction.

Farrell Financial's management fee is payable in advance. Upon termination, any fees paid in advance will be prorated to the date of termination and any unearned fees will be refunded to client.

Where acting in the capacity of an insurance agent, investment advisor representatives of Farrell Financial may as broker or agent effect insurance transactions for typical and customary compensation. This practice may present a conflict of interest by creating an incentive to recommend insurance products based on the compensation received, rather than on a client's needs. Clients are not obligated to use investment advisor representatives of Farrell Financial to execute such insurance transactions. However, in such instances, there is no advisory fee associated with these insurance products and clients will be made aware of all commissions associated with the products prior to the transactions. A client may be able to invest in products recommended by the firm directly, without the services of Farrell Financial. In that case, the client would not receive the services provided by Farrell Financial which are designed, among other things, to assist the client in determining which products or services are most appropriate to each client's financial condition and objectives.

Item 6 Performance-Based Fees and Side-by-Side Management

Farrell Financial does not charge performance-based fees.

Item 7 Types of Clients

The Advisor will offer its services to individuals, trusts, estates, or charitable organizations, corporations, and other business entities.

The Advisor does not have any minimum requirements for opening or maintaining an account.

Item 8 Methods of Analysis, Investment Strategies and Risk of Loss

The Advisor utilizes fundamental analysis techniques in formulating investment advice or managing assets for clients.

Fundamental analysis of businesses involves analyzing its financial statements and health, its management and competitive advantages and its competitors and markets. Fundamental analysis is performed on historical and present data but with the goal of making financial forecasts. There are several possible objectives; to conduct a company stock valuation and predict its probable price evolution; to make a projection on its business performance; to evaluate its management and make internal business decisions and to calculate its credit risk.

The investment strategies the Advisor will implement may include long term purchases of securities held at least for one year, short term purchases for securities sold within a year, and trading of securities sold within 30 days.

The methods of analysis and investment strategies followed by the Advisor are utilized across all of the Advisors clients, as applicable. One method of analysis or investment strategy is not more significant than the other as the Advisor is considering the client's portfolio, risk tolerance, time horizon and individual goals. However, the client should be aware that with any trading that occurs in the client account, the client will incur transaction and administrative costs.

Investing includes the risk that the value of an investment can be negatively affected by factors specifically related to the investment (e.g., capability of management, competition, new inventions by other companies, lawsuits against the company, labor issues, patent expiration, etc.), or to factors related to investing and the markets in general (e.g., the economy, wars, civil unrest or terrorism around the world, concern about oil prices or unemployment, etc.).

Risks of fundamental analysis may include risks that market actions, natural disasters, government actions, world political events or other events not directly related to the price or valuation of a specific company's fundamental analysis can adversely impact the stock price of a company causing a portfolio containing that security to lose value. Risks may also include that the historical data and projections on which the fundamental analysis is performed may not continue to be relevant to the operations of a company going forward, or that management changes or the business direction of management of the company may not permit the company to continue to produce metrics that are consistent with the prior company data utilized in the fundamental analysis, which may negatively affect the Advisor's estimate of the valuation of the company.

All investments involve some degree of risk. In finance, risk refers to the degree of uncertainty and/or potential financial loss inherent in an investment decision. In general, as investment risks rise, investors seek higher returns to compensate themselves for taking such risks. Clients need to be aware that investing in securities involves risk of loss that clients need to be prepared to bear.

Every saving and investment product have different risks and returns. Differences include how readily investors can get their money when they need it, how fast their money will grow, and how safe their money will be. The primary risks faced by investors include:

Business Risk

With a stock, you are purchasing a piece of ownership in a company. With a bond, you are loaning money to a company. Returns from both of these investments require that the company stays in business. If a company goes bankrupt and its assets are liquidated, common stockholders are the last in line to share in the proceeds. If there are assets, the company's bondholders will be paid first, then holders of preferred stock. If you are a common stockholder, you get whatever is left, which may be nothing.

The business risk in purchasing an annuity is that the financial strength of the insurance company issuing the annuity may decline and not be able to pay out the annuity obligation. In addition, variable annuities are subject to market risk.

Volatility Risk

Even when companies aren't in danger of failing, their stock price may fluctuate up or down. Large company stocks as a group, for example, have lost money on average about one out of every three years. A stock's price can be affected by factors inside the company, such as a faulty product, or by events the company has no control over, such as political or market events.

Inflation Risk

Inflation is a general upward movement of prices. Inflation reduces purchasing power, which is a risk for investors receiving a fixed rate of interest. The principal concern for individuals investing in cash equivalents is that inflation will erode returns.

Interest Rate Risk

Interest rate changes can affect a bond's value. If bonds are held to maturity the investor will receive the face value, plus interest. If sold before maturity, the bond may be worth more or less than the face value. Rising interest rates will make newly issued bonds more appealing to investors because the newer bonds will have a higher rate of interest than older ones. To sell an older bond with a lower interest rate, you might have to sell it at a discount.

Liquidity Risk

This refers to the risk that investors won't find a market for their securities, potentially preventing them from buying or selling when they want. This can be the case with the more complicated investment products. It may also be the case with products that charge a penalty for early withdrawal or liquidation such as a certificate of deposit (CD).

The Advisor does not primarily recommend a particular type of security. However, clients are advised that many unexpected broad environmental factors can negatively impact the value of portfolio securities causing the loss of some or all of the investment, including changes in interest rates, political events, natural disasters, and acts of war or terrorism. Further, factors relevant to specific securities may have negative effects on their value, such as competition or government regulation. Also, the factors for which the company was selected for inclusion in a client portfolio may change, for example, due to changes in management, new product introductions, or lawsuits.

Item 9 Disciplinary Information

Neither Farrell Financial nor its management persons have had any legal or disciplinary events, currently or in the past.

Item 10 Other Financial Industry Activities and Affiliations

Neither Farrell Financial nor any of its management persons are registered, or have an application pending to register, as a broker-dealer or a registered representative of a broker-dealer.

Neither Farrell Financial nor any of its management persons are registered or have an application pending to register, as a futures commission merchant, commodity pool operator, a commodity trading advisor, or an associated person of the foregoing entities.

Neil Farrell, President, is also licensed and registered as an insurance agent to sell life, accident and other lines of insurance for various insurance companies. Therefore, he will be able to purchase insurance products for any client in need of such services and will receive separate, yet typical compensation in the form of commissions for the purchase of insurance products. This creates a conflict of interest because Mr. Farrell may be incentivized to make recommendations based upon the compensation received rather than upon the client's best interests. Clients are not obligated to use Mr. Farrell for insurance products services. However, in such instances, there is no advisory fee associated with these insurance products and clients will be made aware of all commissions associated with the products prior to the transactions.

Farrell Financial does not recommend or select other investment advisers for clients.

Item 11 Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Farrell Financial is registered with the U.S. Securities and Exchange Commission and maintains a Code of Ethics pursuant to SEC rule 204A-1. Farrell Financial has adopted a Code of Ethics that sets forth the basic policies of ethical conduct for all managers, officers, and employees of the adviser. In addition, the Code of Ethics governs personal trading by each employee of Farrell Financial deemed to be an Access Person and is intended to ensure that securities transactions effected by Access Persons of Farrell Financial are conducted in a manner that avoids any conflict of interest between such persons and clients of the adviser or its affiliates. Farrell Financial collects and maintains records of securities holdings and securities transactions effected by Access Persons. These records are reviewed to identify and resolve conflicts of interest. Farrell Financial will provide a copy of the Code of Ethics to any client or prospective client upon request.

Farrell Financial does not recommend to clients, or buy or sell for client accounts, securities in which the firm or a related person has a material financial interest.

Farrell Financial and/or its investment advisor representatives may from time to time purchase or sell products that they may recommend to clients. This practice creates conflicts of interest in that personnel of Farrell Financial can take advantage of the advance knowledge of firm securities trading and trade their personal accounts ahead of the client trades or recommend trades in client accounts that may affect the price of the securities owned by the Investment Advisor Representatives. To mitigate these conflicts, Farrell Financial has adopted a Code of Ethics as noted above. Farrell Financial's Code of Ethics is available upon request. Finally, supervised persons of registered investment advisors are fiduciaries by law and are required to put the client's interest before those of the firm and themselves.

Farrell Financial requires that its investment advisor representatives follow its basic policies and ethical standards as set forth in its Code of Ethics.

Investment advisor representatives of Farrell Financial may trade for their own accounts securities that are being traded for client accounts at or about the same time. To mitigate the conflict of interest in such circumstances, Farrell Financial's policy is to require the trading of all relevant

client accounts prior to the trading of their own accounts. The Chief Compliance Officer examines personal trading activities of Farrell Financial's personnel to verify compliance with this policy.

Item 12 Brokerage Practices

If requested by the client, Farrell Financial may suggest brokers or dealers to be used based on execution and custodial services offered, cost, quality of service and industry reputation. Farrell Financial will consider factors such as commission price, speed and quality of execution, client management tools, and convenience of access for both the Advisor and client in making its suggestion. Farrell Financial intends to recommend that our clients use Charles Schwab & Co., Inc., a registered broker-dealer, member SIPC, as the qualified custodian.

The custodian and brokers we use

Farrell Financial does not maintain custody of your assets, although we are deemed to have custody of your assets if you give us authority to withdraw assets from your account (see Item 15 – Custody, below). Your assets must be maintained in an account at a “qualified custodian,” generally a broker-dealer or bank. We recommend that our clients use Charles Schwab & Co., Inc. (“Schwab”), a registered broker-dealer, member SIPC, as the qualified custodian. We are independently owned and operated and are not affiliated with Schwab. Schwab will hold your assets in a brokerage account and buy and sell securities when we instruct them to. While we recommend that you use Schwab as custodian/broker, you will decide whether to do so and will open your account with Schwab by entering into an account agreement directly with them. We do not open the account for you, although we may assist you in doing so. Not all advisors require their clients to use a particular broker-dealer or other custodian selected by the advisor. Even though your account is maintained at Schwab, we can still use other brokers to execute trades for your account as described below (see “Your brokerage and custody costs”).

How we select brokers/custodians

We seek to recommend a custodian/broker that will hold your assets and execute transactions on terms that are overall most advantageous when compared with other available providers and their services. We consider a wide range of factors, including:

- Combination of transaction execution services and asset custody services (generally without a separate fee for custody)
- Capability to execute, clear, and settle trades (buy and sell securities for your account)
- Capability to facilitate transfers and payments to and from accounts (wire transfers, check requests, bill payment, etc.)
- Breadth of available investment products (stocks, bonds, mutual funds, exchange-traded funds (ETFs), etc.)
- Availability of investment research and tools that assist us in making investment decisions
- Quality of services
- Competitiveness of the price of those services (commission rates, margin interest rates, other fees, etc.) and willingness to negotiate the prices
- Reputation, financial strength, security and stability
- Prior service to us and our clients

- Availability of other products and services that benefit us, as discussed below (see “Products and services available to us from Schwab”)

Your brokerage and custody costs

For our clients’ accounts that Schwab maintains, Schwab generally does not charge you separately for custody services but is compensated by charging you commissions or other fees on trades that it executes or that settle into your Schwab account. Certain trades (for example, many mutual funds, ETFs, and online stock and options trades) may not incur Schwab commissions or transaction fees. Schwab is also compensated by earning interest on the uninvested cash in your account in Schwab’s Cash Features Program. For some accounts, Schwab may charge you a percentage of the dollar amount of assets in the account in lieu of commissions. In addition to commissions and asset-based fees, Schwab charges you a flat dollar amount as a “prime broker” or “trade away” fee for each trade that we have executed by a different broker-dealer but where the securities bought or the funds from the securities sold are deposited (settled) into your Schwab account. These fees are in addition to the commissions or other compensation you pay the executing broker/dealer. Because of this, in order to minimize your trading costs, we have Schwab execute most trades for your account. We have determined that having Schwab execute most trades is consistent with our duty to seek “best execution” of your trades. Best execution means the most favorable terms for a transaction based on all relevant factors, including those listed above (see “How we select brokers/custodians”).

Products and services available to us from Schwab

Schwab Advisor Services™ is Schwab’s business serving independent investment advisory firms like us. They provide our clients and us with access to their institutional brokerage services (trading, custody, reporting and related services), many of which are not typically available to Schwab retail customers. Schwab also makes available various support services. Some of those services help us manage or administer our clients’ accounts, while others help us manage and grow our business. Schwab’s support services are generally available on an unsolicited basis (we don’t have to request them) and at no charge to us. Following is a more detailed description of Schwab’s support services:

Services that benefit you

Schwab’s institutional brokerage services include access to a broad range of investment products, execution of securities transactions, and custody of client assets. The investment products available through Schwab include some to which we might not otherwise have access or that would require a significantly higher minimum initial investment by our clients. Schwab’s services described in this paragraph generally benefit you and your account.

Services that may not directly benefit you

Schwab also makes available to us other products and services that benefit us but may not directly benefit you or your account. These products and services assist us in managing and administering our clients’ accounts. They include investment research, both Schwab’s own and that of third parties. We may use this research to service all or a substantial number of our clients’ accounts, including accounts not maintained at Schwab. In addition to investment research, Schwab also makes available software and other technology that:

- provide access to client account data (such as duplicate trade confirmations and account statements)
- facilitate trade execution and allocate aggregated trade orders for multiple client accounts
- provide pricing and other market data
- facilitate payment of our fees from our clients' accounts
- assist with back-office functions, recordkeeping, and client reporting

Services that generally benefit only us

Schwab also offers other services intended to help us manage and further develop our business enterprise. These services include:

- Educational conferences and events
- Consulting on technology, compliance, legal, and business needs
- Publications and conferences on practice management and business succession
- Access to employee benefits providers, human capital consultants, and insurance providers
- Marketing consulting and support

Schwab may provide some of these services itself. In other cases, it will arrange for third-party vendors to provide the services to us. Schwab may also discount or waive its fees for some of these services or pay all or a part of a third party's fees. Schwab may also provide us with other benefits such as occasional business entertainment of our personnel.

Our interest in Schwab's services

The availability of these services from Schwab benefits us because we do not have to produce or purchase them. We don't have to pay for Schwab's services. These services are not contingent upon us committing any specific amount of business to Schwab in trading commissions or assets in custody. This creates an incentive to recommend that you maintain your account with Schwab, based on our interest in receiving Schwab's services that benefit our business and Schwab's payment for services for which we would otherwise have to pay rather than based on your interest in receiving the best value in custody services and the most favorable execution of your transactions. This is a potential conflict of interest. We believe, however, that our selection of Schwab as custodian and broker is in the best interests of our clients. Our selection is primarily supported by the scope, quality, and price of Schwab's services (see "How we select brokers/custodians") and not Schwab's services that benefit only us.

For any such products and services Farrell Financial receives from Schwab or other custodians, it will follow procedures which ensure compliance with Section 28(e) of the Securities Exchange Act of 1934 or applicable state securities rules.

Farrell Financial does not receive client referrals from any broker-dealer or third party as a result of the firm selecting or recommending that broker-dealer to clients.

Farrell Financial recommends that all clients use a particular broker-dealer for execution and/or custodial services. The broker-dealer is recommended based on criteria such as, but not limited to, reasonableness of commissions charged to the client, tools and services made available to the client and the Advisor, and convenience of access to the account trading and reporting. The client will provide authority to Farrell Financial to direct all transactions through that broker-dealer in the investment advisory agreement.

As an investment advisory firm, Farrell Financial has a fiduciary duty to seek best execution for client transactions. While best execution is difficult to define and challenging to measure, there is some consensus that it does not solely mean the achievement of the best price on a given transaction. Rather, it appears to be a collective consideration of factors concerning the trade in question. Such factors include the security being traded, the price of the trade, the speed of the execution, apparent conditions in the market, and the specific needs of the client. Farrell Financial's primary objectives when placing orders for the purchase and sale of securities for client accounts is to obtain the most favorable net results taking into account such factors as 1) price, 2) size of order, 3) difficulty of execution, 4) confidentiality and 5) skill required of the broker. Farrell Financial may not necessarily pay the lowest commission or commission equivalent as specific transactions may involve specialized services on the part of the broker.

Farrell Financial does not permit clients to direct brokerage.

Farrell Financial may combine orders into block trades when more than one account is participating in the trade. This blocking or bunching technique must be equitable and potentially advantageous for each such account (e.g. for the purposes of reducing brokerage commissions or obtaining a more favorable execution price). Block trading is performed when it is consistent with the duty to seek best execution and is consistent with the terms of Farrell Financial's investment advisory agreements. Equity trades are blocked based upon fairness to client, both in the participation of their account, and in the allocation of orders for the accounts of more than one client. Allocations of all orders are performed in a timely and efficient manner. All managed accounts participating in a block execution receive the same execution price (average share price) for the securities purchased or sold in a trading day. Any portion of an order that remains unfilled at the end of a given day will be rewritten on the following day as a new order with a new daily average price to be determined at the end of the following day. Due to the low liquidity of certain securities, broker availability may be limited. Open orders are worked until they are completely filled, which may span the course of several days. If an order is filled in its entirety, securities purchased in the aggregated transaction will be allocated among the accounts participating in the trade in accordance with the allocation statement. If an order is partially filled, the securities will be allocated pro rata based on the allocation statement. Farrell Financial may allocate trades in a different manner than indicated on the allocation statement (non-pro rata) only if all managed accounts receive fair and equitable treatment.

Item 13 Review of Accounts

The firm reviews client accounts and financial plans on an annual basis, or when conditions would warrant a review based on market conditions or changes in client circumstances. Triggering factors may include Farrell Financial becoming aware of a change in client's investment objective,

a change in market conditions, change of employment, or a change in recommended asset allocation weightings in the account that exceed a predefined guideline. Client accounts and financial plans are reviewed by Neil Farrell, President.

The client is encouraged to notify the Advisor and investment advisor representative if changes occur in his/her personal financial situation that might materially affect his/her investment plan.

The client will receive written statements no less than quarterly from the custodian. In addition, the client will receive other supporting reports from mutual funds, asset managers, trust companies or other custodians, insurance companies, broker-dealers and others who are involved with client accounts. Farrell Financial does not deliver separate client reports.

Item 14 Client Referrals and Other Compensation

As disclosed under Item 12 above, Advisor participates in TD Ameritrade's institutional customer program and Advisor may recommend TD Ameritrade to Clients for custody and brokerage services. There is no direct link between Advisor's participation in the program and the investment advice it gives to its Clients, although Advisor receives economic benefits through its participation in the program that are typically not available to TD Ameritrade retail investors. These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate Client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving Advisor participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to Client accounts); the ability to have advisory fees deducted directly from Client accounts; access to an electronic communications network for Client order entry and account information; access to mutual funds with no transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to Advisor by third party vendors. TD Ameritrade may also have paid for business consulting and professional services received by Advisor's related persons. Some of the products and services made available by TD Ameritrade through the program may benefit Advisor but may not benefit its Client accounts. These products or services may assist Advisor in managing and administering Client accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help Advisor manage and further develop its business enterprise. The benefits received by Advisor or its personnel through participation in the program do not depend on the amount of brokerage transactions directed to TD Ameritrade. As part of its fiduciary duties to clients, Advisor endeavors at all times to put the interests of its clients first. Clients should be aware, however, that the receipt of economic benefits by Advisor or its related persons in and of itself creates a potential conflict of interest and may indirectly influence the Advisor's choice of TD Ameritrade for custody and brokerage services.

Farrell Financial does not directly or indirectly compensate any person who is not a supervised person for client referrals.

Item 15 Custody

Farrell Financial does not have custody of client funds or securities, except for the withdrawal of advisory fees directly from client accounts (please see Item 5 which describes the safeguards around direct fee deduction). However, as noted in Item 13 above, clients will receive statements not less than quarterly from the qualified custodian, and we encourage you to review those statements carefully. Any discrepancies should be immediately brought to the firm's attention.

Item 16 Investment Discretion

Farrell Financial generally has discretion over the selection and amount of securities to be bought or sold in client accounts without obtaining prior consent or approval from the client for each transaction. However, these purchases or sales may be subject to specified investment objectives, guidelines, or limitations previously set forth by the client and agreed to by Farrell Financial.

Discretionary authority will only be provided upon full disclosure to the client. The granting of such authority will be evidenced by the client's execution of an Investment Advisory Agreement containing all applicable limitations to such authority. All discretionary trades made by Farrell Financial will be in accordance with each client's investment objectives and goals.

Item 17 Voting Client Securities

Farrell Financial will not vote, nor advise clients how to vote, proxies for securities held in client accounts. The client clearly keeps the authority and responsibility for the voting of these proxies. Also, Farrell Financial cannot give any advice or take any action with respect to the voting of these proxies. The client and Farrell Financial agree to this by contract. Clients will receive proxy solicitations from their custodian and/or transfer agent.

Item 18 Financial Information

Farrell Financial does not require or solicit prepayment of more than \$1,200 in fees per client, six months or more in advance, and is not required to file a balance sheet.

Farrell Financial has discretionary authority over client accounts and is not aware of any financial condition that will likely impair its ability to meet contractual commitments to clients. If Farrell Financial does become aware of any such financial condition, this brochure will be updated and clients will be notified.

Farrell Financial has never been subject to a bankruptcy petition.
