Item 4: Advisory Business

A. Description of the Advisory Firm

IFS Group (hereinafter “IFS LLC”) is the sponsor and manager of a wrap fee program, the IFS Group Wrap Fee Program (“Program”). The Program operates under LPL Financial’s (“LPL”) Strategic Wealth Management Platform (“SWM II”).

Although clients do not pay a transaction charge for transactions in a SWM II account, clients should be aware that IFS LLC pays LPL transaction charges for those transactions. The transaction charges paid by IFS LLC vary based on the type of transaction (e.g., mutual fund, equity or ETF) and for mutual funds based on whether or not the mutual fund pays 12b-1 fees and/or recordkeeping fees to LPL. Transaction charges paid by the Advisor for equities and ETFs are \$9. For mutual funds, the transaction charges range from \$0 to \$26.50. Because IFS LLC pays the transaction charges in SWM II accounts, there is a conflict of interest in cases where the mutual fund is offered at both \$0 and \$26.50. Clients should understand that the cost to Advisor of transaction charges may be a factor that IFS LLC considers when deciding which securities to select and how frequently to place transactions in a SWM II account.

In many instances, LPL makes available mutual funds in a SWM II account that offer various classes of shares, including shares designated as Class A Shares and shares designed for advisory programs, which can be titled, for example, as “Class I,” “institutional,” “investor,” “retail,” “service,” “administrative” or “platform” share classes (“Platform Shares”). The Platform Share class offered for a particular mutual fund in SWM II in many cases will not be the least expensive share class that the mutual fund makes available, and was selected by LPL in certain cases because the share class pays LPL compensation for the administrative and recordkeeping services LPL provides to the mutual fund. Client should understand that another financial services firm may offer the same mutual fund at a lower overall cost to the investor than is available through SWM II. In other instances, a mutual fund may offer only Class A Shares, but another similar mutual fund may be available that offers Platform Shares. Class A Shares typically pay LPL a 12b-1 fee for providing shareholder services, distribution, and marketing expenses (“brokerage-related services”) to the mutual funds. Platform Shares generally are not subject to 12b-1 fees. As a result of the different expenses of the mutual fund share classes, it is generally more expensive for a client to own Class A Shares than Platform Shares. An investor in Platform Shares will pay lower fees over time, and keep more of his or her investment returns than an investor who holds Class A Shares of the same fund.

IFS LLC has a financial incentive to recommend Class A Shares in cases where both Class A and Platform Shares are available. This is a conflict of interest which might incline IFS LLC, consciously or unconsciously, to render advice that is not disinterested. Although the client will not be charged a transaction charge for transactions, Advisor pays LPL a per transaction charge for mutual fund purchases and sales in the account. IFS LLC generally does not pay transaction charges for Class A Share mutual fund transactions

accounts, but generally does pay transaction charges for Platform Share mutual fund transactions. The cost to IFS LLC of transaction charges generally may be a factor Advisor considers when deciding which securities to select and whether or not to place transactions in the account.

The lack of transaction charges to IFS LLC for Class A Share purchases and sales, together with the fact that Platform Shares generally are less expensive for a client to own, presents a significant conflict of interest between IFS LLC and the client. In short, it costs IFS LLC less to recommend and select Class A share mutual funds than Platform shares, but Platform shares will generally outperform Class A mutual fund shares on the basis of internal cost structure alone. Clients should understand this conflict and consider the additional indirect expenses borne as a result of the mutual fund fees when negotiating and discussing with your Advisor the advisory fee for management of an account.

Total Assets Under Management	Annual Fee
\$100,000 - \$500,000	1.50%
\$500,001 - \$1,000,000	1.25%
\$1,000,001 - \$3,000,000	1.00%
\$3,000,001 - \$5,000,000	0.90%
\$5,000,001 - AND UP	0.80%

These fees are generally negotiable and the final fee schedule will be memorialized in the client's advisory agreement. Fees are paid in advance. The advisory fee is calculated using the value of the assets on the last business day of the prior billing period.

Portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis.

Refunds for any fees paid in advance but not yet earned will be refunded on a prorated basis and returned within fourteen days to the client via check or return deposit back into the client's account. For all asset-based fees paid in advance, the fee refunded will be equal to the balance of the fees collected in advance minus the daily rate* times the number of days elapsed in the billing period up to and including the day of termination. (*The daily rate is calculated by dividing the annual asset-based fee rate by 365.)

Clients may terminate the agreement without penalty, for a full refund of IFS LLC's fees, within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract immediately upon written notice.

B. Contribution Cost Factors

The program may cost the client more or less than purchasing such services separately. There are several factors that bear upon the relative cost of the program, including the trading activity in the client's account, the adviser's ability to aggregate trades, and the cost of the services if provided separately (which in turn depends on the prices and specific services offered by different providers).

C. Additional Fees

IFS LLC will wrap third party fees (i.e., custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.) for wrap fee portfolio management accounts. IFS LLC will charge clients one fee, and pay all transaction fees using the fee collected from the client. Accounts participating in the wrap fee program are not charged higher advisory fees based on trading activity, but clients should be aware that IFS LLC has an incentive to limit trading activities for those accounts since the firm absorbs those transaction costs.

Certain other fees are not included in the wrap fee and are paid for separately by the client. These include, but are not limited to, margin costs, charges imposed directly by a mutual fund or exchange traded fund, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions. IFS LLC will require that clients use LPL Financial LLC, CRD#6413 to execute transactions and therefore trade-away costs (brokerage and transactions costs when a different broker-dealer is selected to execute the transactions) are not applicable.

D. Compensation of Client Participation

Neither IFS LLC, nor any representatives of IFS LLC receive any additional compensation beyond advisory fees for the participation of clients in the wrap fee program. However, compensation received may be more than what would have been received if client paid separately for investment advice, brokerage, and other services. Therefore, IFS LLC may have a financial incentive to recommend the wrap fee program to clients.

Item 5: Types of Clients

IFS LLC generally offers advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals
- ❖ Corporations or Business Entities

There is an account minimum of \$100,000, which may be waived by IFS LLC in its discretion.

Item 6: Portfolio Manager Selection and Evaluation

A. Selecting/Reviewing Portfolio Managers

IFS LLC will not select outside portfolio managers for management of this wrap fee program. IFS LLC will be the sole portfolio manager for this wrap fee program.

IFS LLC will use industry standards to calculate portfolio manager performance.

IFS LLC reviews the performance information to determine and verify its accuracy and compliance with presentation standards. The performance information is quarterly and is reviewed by IFS LLC.

B. Related Persons

IFS LLC and its personnel serve as the portfolio managers for all wrap fee program accounts. This is a conflict of interest in that no outside adviser assesses IFS LLC's management of the wrap fee program. However, IFS LLC addresses this conflict by acting in its clients' best interest consistent with its fiduciary duty as sponsor and portfolio manager of the wrap fee program.

C. Advisory Business

IFS Group (hereinafter "IFS LLC") is the sponsor and manager of a wrap fee program, the IFS Group Wrap Fee Program ("Program"). The Program operates under LPL Financial's ("LPL") Strategic Wealth Management Platform ("SWM II").

Portfolio management accounts participating in the wrap fee program will not have to pay for transaction or trading fees. IFS LLC will charge clients one fee, and pay transaction fees using the advisory fee collected from the client. Certain other fees are not included in the wrap fee and are paid for separately by the client. These include, but are not limited to, margin costs, charges imposed directly by a mutual fund or exchange traded fund, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions.

Accounts participating in the wrap fee program are not charged higher advisory fees based on trading activity, but clients should be aware that IFS LLC has an incentive to limit trading activities for those accounts since the firm absorbs those transaction costs. To address this conflict, IFS LLC will always act in the best interest of its clients consistent with its fiduciary duty as an investment adviser.

Services Limited to Specific Types of Investments

IFS LLC generally limits its investment advice to mutual funds, equities, fixed income securities, ETFs, ETFs in the gold and precious metal sectors, real estate funds, REITs, non-U.S. securities, Commodities, venture capital funds, insurance products including

annuities, and private placements. IFS LLC may use other securities as well to help diversify a portfolio when applicable.

Written Acknowledgement of Fiduciary Status

When we provide investment advice to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule's provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice);
- Never put our financial interests ahead of yours when making recommendations (give loyal advice);
- Avoid misleading statements about conflicts of interest, fees, and investments;
- Follow policies and procedures designed to ensure that we give advice that is in your best interest;
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

Client Tailored Services and Client Imposed Restrictions

IFS LLC offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client's current situation (income, tax levels, and risk tolerance levels). Clients are not permitted to impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs.

Wrap Fee Programs

As discussed herein, IFS LLC sponsors and acts as portfolio manager for this wrap fee program. IFS LLC manages the investments in the wrap fee program, and will manage wrap fee accounts differently than non-wrap fee accounts in that management of wrap fee accounts does not differ from management of non-wrap accounts. The fees paid to the wrap account program will be given to IFS LLC as a management fee.

Amounts Under Management

IFS LLC has the following assets under management:

Discretionary Amounts:	Non-Discretionary Amounts:	Date Calculated:
\$0	\$0	January 2023

Performance-Based Fees and Side-By-Side Management

IFS LLC does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Clients paying a performance-based fee should be aware that investment advisers have an incentive to invest in riskier investments when paid a performance-based fee due to the higher risk/higher reward attributes.

Methods of Analysis and Investment Strategies

Methods of Analysis

IFS LLC's methods of analysis include charting analysis, charting analysis, charting analysis, charting analysis, charting analysis and charting analysis.

Charting analysis involves the use of patterns in performance charts. IFS LLC uses this technique to search for patterns used to help predict favorable conditions for buying and/or selling a security.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Technical analysis involves the analysis of past market data; primarily price and volume.

Cyclical analysis involves the analysis of business cycles to find favorable conditions for buying and/or selling a security.

Quantitative analysis deals with measurable factors as distinguished from qualitative considerations such as the character of management or the state of employee morale, such as the value of assets, the cost of capital, historical projections of sales, and so on.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various assets.

Investment Strategies

IFS LLC uses long term trading, margin transactions and options trading (including covered options, uncovered options, or spreading strategies).

IFS LLC always consider tax ramifications of investment actions and strategies. We look to ensure that investment strategies can easily be changed if warranted for retirement income or Special Planning needs.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Material Risks Involved

Methods of Analysis

Charting Analysis strategy involves using and comparing various charts to predict long and short term performance or market trends. The risk involved in using this method is that only past performance data is considered without using other methods to crosscheck data. Using charting analysis without other methods of analysis would be making the assumption that past performance will be indicative of future performance. This may not be the case.

Fundamental Analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Technical Analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Cyclical Analysis assumes that the markets react in cyclical patterns which, once identified, can be leveraged to provide performance. The risks with this strategy are two-fold: 1) the markets do not always repeat cyclical patterns; and 2) if too many investors begin to implement this strategy, then it changes the very cycles these investors are trying to exploit.

Quantitative Analysis: Investment strategies using quantitative models may perform differently than expected as a result of, among other things, the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models.

Modern Portfolio Theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Investment Strategies

IFS LLC's use of margin transactions and margin transactions generally holds greater risk, and clients should be aware that there is a material risk of loss using any of those strategies.

Long Term investing is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Margin Transactions use leverage that is borrowed from a brokerage firm as collateral. When losses occur, the value of the margin account may fall below the brokerage firm's threshold thereby triggering a margin call. This may force the account holder to either allocate more funds to the account or sell assets on a shorter time frame than desired.

Options Transactions involve a contract to purchase a security at a given price, not necessarily at market value, depending on the market. This strategy includes the risk that an option may expire out of the money resulting in minimal or no value, as well as the possibility of leveraged loss of trading capital due to the leveraged nature of stock options.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Risks of Specific Securities Utilized

IFS LLC's use of margin transactions and margin transactions generally holds greater risk of capital loss. Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best-known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury

inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Because ETFs use "authorized participants" (APs) as agents to facilitate creations or redemptions (primary market), there is a risk that an AP decides to no longer participate for a particular ETF; however, that risk is mitigated by the fact that other APs can step in to fill the vacancy of the withdrawing AP [an ETF typically has multiple APs] and ETF transactions predominantly take place in the secondary market without need for an AP. Like other liquid securities, ETF pricing changes throughout the trading day and there can be no guarantee that an ETF is purchased at the optimal time in terms of market movements. Moreover, due to market fluctuations, ETF brokerage costs, differing demand and characteristics of underlying securities, and other factors, the price of an ETF can be lower than the aggregate market price of its cash and component individual securities (net asset value – NAV). An ETF is subject to the same market risks as those of its underlying individual securities, and also has internal expenses that can lower investment returns.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Real Estate exposure (including REITs) entails several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Specifically, revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Annuities are retirement products for those who may have the ability to pay a premium now and want to guarantee they receive certain payments or a return on investment in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

Private placements carry a substantial risk as they are subject to less regulation than are publicly offered securities, the market to resell these assets under applicable securities laws may be illiquid, due to restrictions, and liquidation may be taken at a substantial discount to the underlying value or result in the entire loss of the value of such assets.

Venture Capital Funds invest in start-up companies at an early stage of development in the interest of generating a return through an eventual realization event; the risk is high as a result of the uncertainty involved at that stage of development.

Commodities are tangible assets used to manufacture and produce goods or services. Commodity prices are affected by different risk factors, such as disease, storage capacity, supply, demand, delivery constraints and weather. Because of those risk factors, even a well-diversified investment in commodities can be uncertain.

Options are contracts to purchase a security at a given price, risking that an option may expire out of the money resulting in minimal or no value. An uncovered option is a type of options contract that is not backed by an offsetting position that would help mitigate risk. The risk for a “naked” or uncovered put is not unlimited, whereas the potential loss for an uncovered call option is limitless. Spread option positions entail buying and selling multiple options on the same underlying security, but with different strike prices or expiration dates, which helps limit the risk of other option trading strategies. Option transactions also involve risks including but not limited to economic risk, market risk, sector risk, idiosyncratic risk, political/regulatory risk, inflation (purchasing power) risk and interest rate risk.

Non-U.S. securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Voting Client Securities (Proxy Voting)

IFS LLC will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 7: Client Information Provided to Portfolio Managers

All client information material to managing the portfolio (including basic information, risk tolerance, sophistication level, and income level) is provided to the portfolio manager. The portfolio manager will also have access to that information as it changes and is updated.

Item 8: Client Contact with Portfolio Managers

IFS LLC does not restrict clients from contacting portfolio managers. IFS LLC's representatives can be contacted during regular business hours using the information on the Form ADV Part 2B cover page.

Item 9: Additional Information

A. Disciplinary Action and Other Financial Industry Activities

Criminal or Civil Actions

There are no criminal or civil actions to report.

Administrative Proceedings

There are no administrative proceedings to report.

Self-Regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Registration as a Broker/Dealer or Broker/Dealer Representative

As registered representatives of LPL Financial, Joseph E. Krichten, Martin E. Leonard, Brent R. Guthrie, Joseph A. Perretta, Kenneth W. Fry, Andrew K. Fry, and Kevin Doyle accepts compensation for the sale of securities.

Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither IFS LLC nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Joseph E. Krichten, Martin E. Leonard, Brent R. Guthrie, Joseph A. Perretta, Kenneth W. Fry, Andrew K. Fry, and Kevin Doyle are independent licensed insurance agents and from time to time may offer clients advice or products from those activities. Clients should be aware that these services may involve a conflict of interest; however, IFS LLC always acts in the best interest of the client. Clients are free to obtain these services or products

through another provider and always have the right to utilize or decline the services of any IFS LLC representative in such individual's outside capacity.

Joseph E. Krichten, Martin E. Leonard, Brent R. Guthrie, Joseph A. Perretta, Kenneth W. Fry, Andrew K. Fry, and Kevin Doyle are registered representatives of LPL and from time to time will offer clients advice or products from those activities. Clients should be aware that these services pay a commission or other compensation and involve a conflict of interest, as commissionable products conflict with the fiduciary duties of a registered investment adviser. IFS LLC always acts in the best interest of the client, including with respect to the sale of commissionable products to advisory clients. Clients are free to obtain these services or products through another provider and always have the right to utilize or decline the services of any IFS LLC representative in such individual's outside capacity.

Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

IFS LLC does not select third-party investment advisers.

B. Code of Ethics, Client Referrals, and Financial Information

Code of Ethics

IFS LLC has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. IFS LLC's Code of Ethics is available free upon request to any client or prospective client.

Recommendations Involving Material Financial Interests

IFS LLC does not recommend that clients buy or sell any security in which IFS LLC or a related person has a material financial interest.

Investing Personal Money in the Same Securities as Clients

From time to time, representatives of IFS LLC may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of IFS LLC to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. IFS LLC will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are

being bought or sold.

Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of IFS LLC may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of IFS LLC to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, IFS LLC will never engage in trading that operates to the client's disadvantage if representatives of IFS LLC buy or sell securities at or around the same time as clients.

Frequency and Nature of Periodic Reviews

Accounts are reviewed at least quarterly by Joseph E Krichten, Managing Member, with regard to clients' respective investment policies and risk tolerance levels.

Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

Content and Frequency of Regular Reports Provided to Clients

Each client will receive a quarterly account statement from the custodian.

Economic Benefits Provided by Third Parties for Advice Rendered to Clients

IFS LLC requires clients to use LPL Financial.

IFS LLC receives support services and/or products from LPL Financial, many of which assist the IFS LLC to better monitor and service program accounts maintained at LPL Financial; however, some of the services and products benefit IFS LLC and not client accounts. These support services and/or products may be received without cost, at a discount, and/or at a negotiated rate, and may include the following:

- investment-related research
- pricing information and market data
- software and other technology that provide access to client account data
- compliance and/or practice management-related publications
- consulting services
- attendance at conferences, meetings, and other educational and/or social events
- marketing support
- computer hardware and/or software
- other products and services used by IFS LLC in furtherance of its investment advisory business operations

LPL Financial may provide these services and products directly, or may arrange for third party vendors to provide the services or products to Advisor. In the case of third party vendors, LPL Financial may pay for some or all of the third party's fees.

These support services are provided to IFS LLC based on the overall relationship between IFS LLC and LPL Financial. It is not the result of soft dollar arrangements or any other express arrangements with LPL Financial that involves the execution of client transactions as a condition to the receipt of services. IFS LLC will continue to receive the services regardless of the volume of client transactions executed with LPL Financial. Clients do not pay more for services as a result of this arrangement. There is no corresponding commitment made by IFS LLC to LPL or any other entity to invest any specific amount or percentage of client assets in any specific securities as a result of the arrangement. However, because IFS LLC receives these benefits from LPL Financial, there is a potential conflict of interest. The receipt of these products and services presents a financial incentive for IFS LLC to recommend that its clients use LPL Financial's custodial platform rather than another custodian's platform.

IFS LLC and/or its Dually Registered Persons are incented to join and remain affiliated with LPL Financial and to recommend that clients establish accounts with LPL Financial through the provision of Transition Assistance. LPL also provides other compensation to IFS LLC and its Dually Registered Persons, including but not limited to, bonus payments, repayable and forgivable loans, stock awards and other benefits.

The receipt of any such compensation creates a financial incentive for your representative to recommend LPL Financial as custodian for the assets in your advisory account. We encourage you to discuss any such conflicts of interest with your representative before making a decision to custody your assets at LPL Financial.

LPL Financial makes available to IFS LLC various products and services designed to assist IFS LLC in managing and administering client accounts. Many of these products and services may be used to service all or a substantial number of IFS LLC's accounts, including accounts not held with LPL Financial. These include software and other technology that provide access to client account data (such as trade confirmation and account statements); facilitate trade execution (and aggregation and allocation of trade orders for multiple client accounts); provide research, pricing information and other market data; facilitate payment of IFS LLC's fees from its clients' accounts; and assist with back-office functions; recordkeeping and client reporting.

LPL Financial also makes available to IFS LLC other services intended to help IFS LLC manage and further develop its business. Some of these services assist IFS LLC to better monitor and service program accounts maintained at LPL Financial, however, many of these services benefit only IFS LLC, for example, services that assist IFS LLC in growing its business. These support services and/or products may be provided without cost, at a discount, and/or at a negotiated rate, and include practice management-related publications; consulting services; attendance at conferences and seminars, meetings, and other educational and/or social events; marketing support; and other products and services used by IFS LLC in furtherance of the operation and development of its

investment advisory business.

Where such services are provided by a third party vendor, LPL Financial will either make a payment to IFS LLC to cover the cost of such services, reimburse IFS LLC for the cost associated with the services, or pay the third party vendor directly on behalf of IFS LLC.

The products and services described above are provided to IFS LLC as part of its overall relationship with LPL Financial. While as a fiduciary IFS LLC endeavor to act in its clients' best interests, the receipt of these benefits creates a conflict of interest because IFS LLC's requirement that clients custody their assets at LPL Financial is based in part on the benefit to IFS LLC of the availability of the foregoing products and services and not solely on the nature, cost or quality of custody or brokerage services provided by LPL Financial. IFS LLC's receipt of some of these benefits may be based on the amount of advisory assets custodied on the LPL Financial platform.

Transition Assistance Benefits

LPL Financial provides various benefits and payments to Dually Registered Persons that are new to the LPL Financial platform to assist the representative with the costs (including foregone revenues during account transition) associated with transitioning his or her business to the LPL Financial platform (collectively referred to as "Transition Assistance"). The proceeds of such Transition Assistance payments are intended to be used for a variety of purposes, including but not necessarily limited to, providing working capital to assist in funding the Dually Registered Person's business, satisfying any outstanding debt owed to the Dually Registered Person's prior firm, offsetting account transfer fees (ACATs) payable to LPL Financial as a result of the Dually Registered Person's clients transitioning to LPL Financial's custodial platform, technology set-up fees, marketing and mailing costs, stationary and licensure transfer fees, moving expenses, office space expenses, staffing support and termination fees associated with moving accounts.

The amount of the Transition Assistance payments are often significant in relation to the overall revenue earned or compensation received by the Dually Registered Person at his prior firm. Such payments are generally based on the size of the Dually Registered Person's business established at his prior firm and/or assets under custody on the LPL Financial. Please refer to the relevant Part 2B brochure supplement for more information about the specific Transition Payments your representative receives.

Transition Assistance payments and other benefits are provided to associated persons of IFS LLC in their capacity as registered representatives of LPL Financial. However, the receipt of Transition Assistance by such Dually Registered Persons creates conflicts of interest relating to IFS LLC's advisory business because it creates a financial incentive for IFS LLC's representatives to recommend that its clients maintain their accounts with LPL Financial. In certain instances, the receipt of such benefits is dependent on a Dually Registered Person maintaining its clients' assets with LPL Financial and therefore IFS LLC has an incentive to recommend that clients maintain their account with LPL

Financial in order to generate such benefits.

IFS LLC attempts to mitigate these conflicts of interest by evaluating and recommending that clients use LPL Financial's services based on the benefits that such services provide to our clients, rather than the Transition Assistance earned by any particular Dually Registered Person. IFS LLC will evaluate LPL Financial with respect to best execution when recommending or requiring that clients maintain accounts with LPL Financial. However, clients should be aware of this conflict and take it into consideration in making a decision whether to custody their assets in a brokerage account at LPL Financial.

Compensation to Non - Advisory Personnel for Client Referrals

IFS LLC does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Balance Sheet

IFS LLC neither requires nor solicits prepayment of more than \$1,200 / \$500.

Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

IFS LLC does not have any financial condition that would impair its ability to meet contractual commitments to clients.

Bankruptcy Petitions in Previous Ten Years

IFS LLC has not been the subject of a bankruptcy petition.
