Item 4: Advisory Business

A. Description of the Advisory Firm

Presidio Wealth Management (hereinafter "PWM") is a Corporation organized in the State of Utah. The firm was formed in October 2003 and became registered as an investment adviser in November 2024. The principal owner is Shane "Parker" Christiansen.

B. Types of Advisory Services

Portfolio Management Services

PWM offers ongoing portfolio management services based on the individual goals, objectives, time horizon, and risk tolerance of each client. PWM creates an Investment Policy Statement for each client, which outlines the client's current situation (income, tax levels, and risk tolerance levels). Portfolio management services include, but are not limited to, the following:

- Investment strategy
- Asset allocation
- Risk tolerance
- Personal investment policy
- Asset selection
- Regular portfolio monitoring

PWM evaluates the current investments of each client with respect to their risk tolerance levels and time horizon. PWM will request discretionary authority from clients in order to select securities and execute transactions without permission from the client prior to each transaction. Risk tolerance levels are documented in the Investment Policy Statement, which is given to each client.

PWM seeks to provide that investment decisions are made in accordance with the fiduciary duties owed to its accounts and without consideration of PWM's economic, investment or other financial interests. To meet its fiduciary obligations, PWM attempts to avoid, among other things, investment or trading practices that systematically advantage or disadvantage certain client portfolios, and accordingly, PWM's policy is to seek fair and equitable allocation of investment opportunities/transactions among its clients to avoid favoring one client over another over time. It is PWM's policy to allocate investment opportunities and transactions it identifies as being appropriate and prudent, including initial public offerings ("IPOs") and other investment opportunities that might have a limited supply, among its clients on a fair and equitable basis over time.

PWM has discretion to choose third-party investment advisers to manage all or a portion of the client's assets. Before selecting other advisers for clients, PWM will always ensure those other advisers are properly licensed or registered as an investment adviser. PWM conducts due diligence on any third-party investment adviser, which may involve one or more of the following: phone calls, meetings and review of the third-party adviser's

performance and investment strategy. PWM then makes investments with a third-party investment adviser by investing with the third-party adviser. These investments may be allocated either through the third-party adviser's fund or through a separately managed account managed by such third party adviser on behalf of PWM's client. PWM may also allocate among one or more private equity funds or private equity fund advisers. PWM will review the ongoing performance of the third-party adviser as a portion of the client's portfolio.

Pension Consulting Services

PWM offers consulting services to pension or other employee benefit plans (including but not limited to 401(k) plans). Pension consulting may include, but is not limited to:

- identifying investment objectives and restrictions
- providing guidance on various assets classes and investment options
- recommending money managers to manage plan assets in ways designed to achieve objectives
- monitoring performance of money managers and investment options and making recommendations for changes
- recommending other service providers, such as custodians, administrators and broker-dealers
- creating a written pension consulting plan

These services are based on the goals, objectives, demographics, time horizon, and/or risk tolerance of the plan and its participants.

Services Limited to Specific Types of Investments

PWM generally limits its investment advice to mutual funds, fixed income securities, real estate funds (including REITs), insurance products including annuities, equities, hedge funds, private equity funds, ETFs (including ETFs in the gold and precious metal sectors), treasury inflation protected/inflation linked bonds, non-U.S. securities and venture capital funds. PWM may use other securities as well to help diversify a portfolio when applicable.

Written Acknowledgement of Fiduciary Status

When we provide investment advice to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. We also have a fiduciary duty under the Investment Advisers Act of 1940 with respect to all client accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule's provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice);
- Never put our financial interests ahead of yours when making recommendations (give loyal advice);
- Avoid misleading statements about conflicts of interest, fees, and investments;
- Follow policies and procedures designed to ensure that we give advice that is in your best interest;
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

C. Client Tailored Services and Client Imposed Restrictions

PWM offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client Investment Policy Statement which outlines each client's current situation (income, tax levels, and risk tolerance levels). Clients may impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs. However, if the restrictions prevent PWM from properly servicing the client account, or if the restrictions would require PWM to deviate from its standard suite of services, PWM reserves the right to end the relationship.

D. Wrap Fee Programs

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees and transaction costs. PWM does not participate in wrap fee programs.

E. Assets Under Management

PWM has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$0	\$0	October 2024

Item 5: Fees and Compensation

A. Fee Schedule

Portfolio Management Fees

Total Assets Under Management	Annual Fees
\$0 - \$500,000	1.30%
\$500,001 - \$1,000,000	1.15%
\$1,000,001 - \$2,000,000	1.00%
\$2,000,001 - \$3,000,000	0.85%
\$3,000,001 - AND UP	0.00%

**Legacy accounts may have different fee schedules.*

The advisory fee is calculated using the value of the assets in the Account on the last business day of the prior billing period.

These fees are generally negotiable and the final fee schedule will be memorialized in the client's advisory agreement. Clients may terminate the agreement without penalty for a full refund of PWM's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract immediately upon written notice.

There is a \$45 admin fee per account per year.

Selection of Other Advisers Fees

Clients will pay PWM its standard fee in addition to the standard fee for the advisers to which it directs those clients. The fees will not exceed any limit imposed by any regulatory agency. Specifically, PWM has discretion to choose JP Morgan.

These fees are negotiable.

Pension Consulting Services Fees

Asset-Based Fees for Pension Consulting

Total Assets Under Management	Annual Fee
\$0 - \$500,000	0.75%

Total Assets Under Management	Annual Fee
\$500,001 - \$1,000,000	0.60%
\$1,000,001 - \$2,000,000	0.50%
\$2,000,001 - \$3,000,000	0.40%
\$3,000,001 - \$5,000,000	0.40%
\$5,000,001 - \$7,000,000	0.25%
\$7,000,001 - \$10,000,000	0.20%
\$10,000,001 - AND UP	0.00%

PWM uses the value of the account as of the last business day of the billing period, after taking into account deposits and withdrawals, for purposes of determining the market value of the assets upon which the advisory fee is based.

These fees are generally negotiable and the final fee schedule will be memorialized in the client's advisory agreement. Clients may terminate the agreement without penalty for a full refund of PWM's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the pension consulting agreement immediately upon written notice.

B. Payment of Fees

Payment of Portfolio Management Fees

Asset-based portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid in advance.

Payment of Pension Consulting Fees

Asset-based pension consulting fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid in arrears.

Payment of Selection of Other Advisers Fees

Fees for selection of JP Morgan as third-party adviser may be invoiced and billed directly to the client. Fees are paid quarterly in advance.

C. Client Responsibility For Third Party Fees

Clients are responsible for the payment of all third party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and

distinct from the fees and expenses charged by PWM. Please see Item 12 of this brochure regarding broker-dealer/custodian.

D. Prepayment of Fees

PWM collects certain fees in advance and certain fees in arrears, as indicated above. Refunds for fees paid in advance but not yet earned will be refunded on a prorated basis and returned within fourteen days to the client via check, or return deposit back into the client's account.

For all asset-based fees paid in advance, the fee refunded will be equal to the balance of the fees collected in advance minus the daily rate* times the number of days elapsed in the billing period up to and including the day of termination. (*The daily rate is calculated by dividing the annual asset-based fee rate by 365.)

Fixed fees that are collected in advance will be refunded based on the prorated amount of work completed at the point of termination.

E. Outside Compensation For the Sale of Securities to Clients

Parker Christiansen is an insurance agent. In this role, he accepts compensation for the sale of insurance products to PWM clients.

1. This is a Conflict of Interest

Supervised persons may accept compensation for the sale of investment products, including asset based sales charges or service fees from the sale of mutual funds to PWM's clients. This presents a conflict of interest and gives the supervised person an incentive to recommend products based on the compensation received rather than on the client's needs. When recommending the sale of investment products for which the supervised persons receives compensation, PWM will document the conflict of interest in the client file and inform the client of the conflict of interest.

2. Clients Have the Option to Purchase Recommended Products From Other Brokers

Clients always have the option to purchase PWM recommended products through other brokers or agents that are not affiliated with PWM.

3. Commissions are not PWM's primary source of compensation for advisory services

Commissions are not PWM's primary source of compensation for advisory services.

4. Advisory Fees in Addition to Commissions or Markups

Advisory fees that are charged to clients are not reduced to offset the commissions or markups on investment products recommended to clients.

Item 6: Performance-Based Fees and Side-By-Side Management

PWM does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Item 7: Types of Clients

PWM generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals
- ❖ Pension and Profit Sharing Plans

There is no account minimum for any of PWM's services.

Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

A. Methods of Analysis and Investment Strategies

Methods of Analysis

PWM's methods of analysis include Fundamental analysis, Modern portfolio theory and Technical analysis.

Fundamental analysis involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

Technical analysis involves the analysis of past market data; primarily price and volume.

Investment Strategies

PWM uses long term trading.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

B. Material Risks Involved

Methods of Analysis

Fundamental analysis concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Technical analysis attempts to predict a future stock price or direction based on market trends. The assumption is that the market follows discernible patterns and if these patterns can be identified then a prediction can be made. The risk is that markets do not always follow patterns and relying solely on this method may not take into account new patterns that emerge over time.

Investment Strategies

Long term trading is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Selection of Other Advisers: Although PWM will seek to select only money managers who will invest clients' assets with the highest level of integrity, PWM's selection process cannot ensure that money managers will perform as desired and PWM will have no control over the day-to-day operations of any of its selected money managers. PWM would not necessarily be aware of certain activities at the underlying money manager level, including without limitation a money manager's engaging in unreported risks, investment "style drift" or even regulatory breaches or fraud.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

C. Risks of Specific Securities Utilized

Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below (leaving aside Treasury Inflation Protected/Inflation Linked Bonds) are not guaranteed or insured by the FDIC or any other government agency.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond “fixed income” nature (lower risk) or stock “equity” nature.

Equity investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

Fixed income investments generally pay a return on a fixed schedule, though the amount of the payments can vary. This type of investment can include corporate and government debt securities, leveraged loans, high yield, and investment grade debt and structured products, such as mortgage and other asset-backed securities, although individual bonds may be the best known type of fixed income security. In general, the fixed income market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk, and credit and default risks for both issuers and counterparties. The risk of default on treasury inflation protected/inflation linked bonds is dependent upon the U.S. Treasury defaulting (extremely unlikely); however, they carry a potential risk of losing share price value, albeit rather minimal. Risks of investing in foreign fixed income securities also include the general risk of non-U.S. investing described below.

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Risks in investing in ETFs include trading risks, liquidity and shutdown risks, risks associated with a change in authorized participants and non-participation of authorized participants, risks that trading price differs from indicative net asset value (iNAV), or price fluctuation and disassociation from the index being tracked. With regard to trading risks, regular trading adds cost to your portfolio thus counteracting the low fees that one of the typical benefits of ETFs. Additionally, regular trading to beneficially “time the market” is difficult to achieve. Even paid fund managers struggle to do this every year, with the majority failing to beat the

relevant indexes. With regard to liquidity and shutdown risks, not all ETFs have the same level of liquidity. Since ETFs are at least as liquid as their underlying assets, trading conditions are more accurately reflected in implied liquidity rather than the average daily volume of the ETF itself. Implied liquidity is a measure of what can potentially be traded in ETFs based on its underlying assets. ETFs are subject to market volatility and the risks of their underlying securities, which may include the risks associated with investing in smaller companies, foreign securities, commodities, and fixed income investments (as applicable). Foreign securities in particular are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. ETFs that target a small universe of securities, such as a specific region or market sector, are generally subject to greater market volatility, as well as to the specific risks associated with that sector, region, or other focus. ETFs that use derivatives, leverage, or complex investment strategies are subject to additional risks. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors. The return of an index ETF is usually different from that of the index it tracks because of fees, expenses, and tracking error. An ETF may trade at a premium or discount to its net asset value (NAV) (or indicative value in the case of exchange-traded notes). The degree of liquidity can vary significantly from one ETF to another and losses may be magnified if no liquid market exists for the ETF’s shares when attempting to sell them. Each ETF has a unique risk profile, detailed in its prospectus, offering circular, or similar material, which should be considered carefully when making investment decisions.

Real estate funds (including REITs) face several kinds of risk that are inherent in the real estate sector, which historically has experienced significant fluctuations and cycles in performance. Revenues and cash flows may be adversely affected by: changes in local real estate market conditions due to changes in national or local economic conditions or changes in local property market characteristics; competition from other properties offering the same or similar services; changes in interest rates and in the state of the debt and equity credit markets; the ongoing need for capital improvements; changes in real estate tax rates and other operating expenses; adverse changes in governmental rules and fiscal policies; adverse changes in zoning laws; the impact of present or future environmental legislation and compliance with environmental laws.

Annuities are a retirement product for those who may have the ability to pay a premium now and want to guarantee they receive certain monthly payments or a return on investment later in the future. Annuities are contracts issued by a life insurance company designed to meet requirement or other long-term goals. An annuity is not a life insurance policy. Variable annuities are designed to be long-term investments, to meet retirement and other long-range goals. Variable annuities are not suitable for meeting short-term goals because substantial taxes and insurance company charges may apply if you withdraw your money early. Variable annuities also involve investment risks, just as mutual funds do.

Hedge funds often engage in leveraging and other speculative investment practices that may increase the risk of loss; can be highly illiquid; are not required to provide periodic pricing or valuation information to investors; May involve complex tax structures and delays in distributing important tax information; are not subject to the same regulatory requirements as mutual funds; and often charge high fees. In addition, hedge funds may invest in risky securities and engage in risky strategies.

Private equity funds carry certain risks. Capital calls will be made on short notice, and the failure to meet capital calls can result in significant adverse consequences, including but not limited to a total loss of investment.

Venture capital funds invest in start-up companies at an early stage of development in the interest of generating a return through an eventual realization event; the risk is high as a result of the uncertainty involved at that stage of development.

Non-U.S. securities present certain risks such as currency fluctuation, political and economic change, social unrest, changes in government regulation, differences in accounting and the lesser degree of accurate public information available.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Item 9: Disciplinary Information

A. Criminal or Civil Actions

There are no criminal or civil actions to report.

B. Administrative Proceedings

There are no administrative proceedings to report.

C. Self-regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Registration as a Broker/Dealer or Broker/Dealer Representative

Neither PWM nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither PWM nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Connie Halverson Christiansen is an accountant and from time to time, may offer clients advice or products from those activities and clients should be aware that these services may involve a conflict of interest. PWM always acts in the best interest of the client and clients are in no way required to utilize the services of any representative of PWM in connection with such individual's activities outside of PWM.

Parker Christiansen is a licensed insurance agent with Highland Capital Brokerage. This activity creates a conflict of interest since there is an incentive to recommend insurance products based on commissions or other benefits received from the insurance company, rather than on the client's needs. Additionally, the offer and sale of insurance products by supervised persons of PWM are not made in their capacity as a fiduciary, and products are limited to only those offered by certain insurance providers. PWM addresses this conflict of interest by requiring its supervised persons to act in the best interest of the client at all times, including when acting as an insurance agent. PWM periodically reviews recommendations by its supervised persons to assess whether they are based on an objective evaluation of each client's risk profile and investment objectives rather than on the receipt of any commissions or other benefits. PWM will disclose in advance how it or its supervised persons are compensated and will disclose conflicts of interest involving any advice or service provided. At no time will there be tying between business practices and/or services (a condition where a client or prospective client would be required to accept one product or service conditioned upon the selection of a second, distinctive tied product or service). No client is ever under any obligation to purchase any insurance product. Insurance products recommended by PWM's supervised persons may also be available from other providers on more favorable terms, and clients can purchase insurance products recommended through other unaffiliated insurance agencies.

Parker Christiansen is an investment adviser representative with OneDigital Investment Advisors. From time to time, he may offer clients advice or products from those activities and clients should be aware that these services may involve a conflict of interest. PWM always acts in the best interest of the client and clients always have the right to decide whether or not to utilize the services of any PWM representative in such individual's outside capacities.

Chad Anderson is an investment adviser representative with OneDigital Investment Advisors. From time to time, he may offer clients advice or products from those activities

and clients should be aware that these services may involve a conflict of interest. PWM always acts in the best interest of the client and clients always have the right to decide whether or not to utilize the services of any PWM representative in such individual's outside capacities.

Elijah Royal Christensen is an investment adviser representative with OneDigital Investment Advisors. From time to time, he may offer clients advice or products from those activities and clients should be aware that these services may involve a conflict of interest. PWM always acts in the best interest of the client and clients always have the right to decide whether or not to utilize the services of any PWM representative in such individual's outside capacities.

D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

PWM has discretion to choose third-party investment advisers to manage all or a portion of the client's assets. Clients will pay PWM its standard fee in addition to the standard fee for the advisers to which it directs those clients. This relationship will be memorialized in each contract between PWM and each third-party advisor. The fees will not exceed any limit imposed by any regulatory agency. PWM will always act in the best interests of the client, including when determining which third-party investment adviser to recommend to clients. PWM will ensure that all recommended advisers are licensed or notice filed in the states in which PWM is recommending them to clients.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

PWM has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. PWM's Code of Ethics is available free upon request to any client or prospective client.

B. Recommendations Involving Material Financial Interests

PWM does not recommend that clients buy or sell any security in which a related person to PWM or PWM has a material financial interest.

C. Investing Personal Money in the Same Securities as Clients

From time to time, representatives of PWM may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of PWM to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. PWM will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

D. Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of PWM may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of PWM to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, PWM will never engage in trading that operates to the client's disadvantage if representatives of PWM buy or sell securities at or around the same time as clients.

Item 12: Brokerage Practices

A. Factors Used to Select Custodians and/or Broker/Dealers

Custodians/broker-dealers will be recommended based on PWM's duty to seek "best execution," which is the obligation to seek execution of securities transactions for a client on the most favorable terms for the client under the circumstances. Clients will not necessarily pay the lowest commission or commission equivalent, and PWM may also consider the market expertise and research access provided by the broker-dealer/custodian, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers that may aid in PWM's research efforts. PWM will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian.

PWM will require clients to use Schwab Institutional, a division of Charles Schwab & Co., Inc..

1. Research and Other Soft-Dollar Benefits

While PWM has no formal soft dollars program in which soft dollars are used to pay for third party services, PWM may receive research, products, or other services from

custodians and broker-dealers in connection with client securities transactions (“soft dollar benefits”). PWM may enter into soft-dollar arrangements consistent with (and not outside of) the safe harbor contained in Section 28(e) of the Securities Exchange Act of 1934, as amended. There can be no assurance that any particular client will benefit from soft dollar research, whether or not the client’s transactions paid for it, and PWM does not seek to allocate benefits to client accounts proportionate to any soft dollar credits generated by the accounts. PWM benefits by not having to produce or pay for the research, products or services, and PWM will have an incentive to recommend a broker-dealer based on receiving research or services. Clients should be aware that PWM’s acceptance of soft dollar benefits may result in higher commissions charged to the client.

2. Brokerage for Client Referrals

PWM receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

3. Clients Directing Which Broker/Dealer/Custodian to Use

PWM will require clients to use a specific broker-dealer to execute transactions. Not all advisers require clients to use a particular broker-dealer.

B. Aggregating (Block) Trading for Multiple Client Accounts

If PWM buys or sells the same securities on behalf of more than one client, then it may (but would be under no obligation to) aggregate or bunch such securities in a single transaction for multiple clients in order to seek more favorable prices, lower brokerage commissions, or more efficient execution. In such case, PWM would place an aggregate order with the broker on behalf of all such clients in order to ensure fairness for all clients; provided, however, that trades would be reviewed periodically to ensure that accounts are not systematically disadvantaged by this policy. PWM would determine the appropriate number of shares and select the appropriate brokers consistent with its duty to seek best execution.

Item 13: Review of Accounts

A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews

All client accounts for PWM's advisory services provided on an ongoing basis are reviewed at least annually by Parker Christiansen, President, with regard to clients’ respective investment policies and risk tolerance levels. All accounts at PWM are assigned to this reviewer.

B. Factors That Will Trigger a Non-Periodic Review of Client Accounts

Reviews may be triggered by material market, economic or political events, or by changes in client's financial situations (such as retirement, termination of employment, physical move, or inheritance).

C. Content and Frequency of Regular Reports Provided to Clients

Each client of PWM's advisory services provided on an ongoing basis will receive a quarterly report detailing the client's account, including assets held, asset value, and calculation of fees. This written report will come from the custodian. PWM will also provide at least quarterly a separate written statement to the client.

Item 14: Client Referrals and Other Compensation

A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)

Other than soft dollar benefits as described in Item 12 above, PWM does not receive any economic benefit, directly or indirectly from any third party for advice rendered to PWM's clients.

With respect to Schwab, PWM receives access to Schwab's institutional trading and custody services, which are typically not available to Schwab retail investors. These services generally are available to independent investment advisers on an unsolicited basis, at no charge to them so long as a total of at least \$10 million of the adviser's clients' assets are maintained in accounts at Schwab Advisor Services. Schwab's services include brokerage services that are related to the execution of securities transactions, custody, research, including that in the form of advice, analyses and reports, and access to mutual funds and other investments that are otherwise generally available only to institutional investors or would require a significantly higher minimum initial investment. For PWM client accounts maintained in its custody, Schwab generally does not charge separately for custody services but is compensated by account holders through commissions or other transaction-related or asset-based fees for securities trades that are executed through Schwab or that settle into Schwab accounts.

Schwab also makes available to PWM other products and services that benefit PWM but may not benefit its clients' accounts. These benefits may include national, regional or PWM specific educational events organized and/or sponsored by Schwab Advisor Services. Other potential benefits may include occasional business entertainment of personnel of PWM by Schwab Advisor Services personnel, including meals, invitations to sporting events, including golf tournaments, and other forms of entertainment, some of which may accompany educational opportunities. Other of these products and services

assist PWM in managing and administering clients' accounts. These include software and other technology (and related technological training) that provide access to client account data (such as trade confirmations and account statements), facilitate trade execution (and allocation of aggregated trade orders for multiple client accounts, if applicable), provide research, pricing information and other market data, facilitate payment of PWM's fees from its clients' accounts (if applicable), and assist with back-office training and support functions, recordkeeping and client reporting. Many of these services generally may be used to service all or some substantial number of PWM's accounts. Schwab Advisor Services also makes available to PWM other services intended to help PWM manage and further develop its business enterprise. These services may include professional compliance, legal and business consulting, publications and conferences on practice management, information technology, business succession, regulatory compliance, employee benefits providers, human capital consultants, insurance and marketing. In addition, Schwab may make available, arrange and/or pay vendors for these types of services rendered to PWM by independent third parties. Schwab Advisor Services may discount or waive fees it would otherwise charge for some of these services or pay all or a part of the fees of a third-party providing these services to PWM. PWM is independently owned and operated and not affiliated with Schwab.

B. Compensation to Non - Advisory Personnel for Client Referrals

PWM does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Item 15: Custody

When advisory fees are deducted directly from client accounts at client's custodian, PWM will be deemed to have limited custody of client's assets and must have written authorization from the client to do so. Clients will receive all account statements and billing invoices that are required in each jurisdiction, and they should carefully review those statements for accuracy.

Custody is also disclosed in Form ADV because PWM has authority to transfer money from client account(s), which constitutes a standing letter of authorization (SLOA). Accordingly, PWM will follow the safeguards specified by the SEC rather than undergo an annual audit.

Item 16: Investment Discretion

PWM provides discretionary and non-discretionary investment advisory services to clients. The advisory contract established with each client sets forth the discretionary authority for trading. Where investment discretion has been granted, PWM generally manages the client's account and makes investment decisions without consultation with the client as to when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, what securities to buy or sell, or the price per share.

Item 17: Voting Client Securities (Proxy Voting)

PWM will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 18: Financial Information

A. Balance Sheet

PWM neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Neither PWM nor its management has any financial condition that is likely to reasonably impair PWM's ability to meet contractual commitments to clients.

C. Bankruptcy Petitions in Previous Ten Years

PWM has not been the subject of a bankruptcy petition in the last ten years.
