1.5	Reporting No Activity	2
1.6	Validation	2
2	Daily Market Data Report Definitions	3
3	References	5
4	Change Log	6
5	Schema	6

1 OVERVIEW

1.1 Goal

This document provides the technical specification for how a Security-Based Swap Execution Facility (SBSEF) would provide the Daily Market Data Report (DMDR) required under 17 CFR 242.825(c).

The Technical Specification defines syntax of data elements, their contents, element arrangements, validation methods and dissemination methods for the DMDR.

This Technical Specification has been created for a technical audience for conforming daily market data to the Schema for DMDR. This specification does not provide guidance on any rule.

Please provide any comments on the DMDR Schema via email to **StructuredData (at) sec.gov** and include “DMDR Schema” in the “General Subject Matter” section.

1.2 Notation

Literal technical syntax appears in a **fixed width font**.

1.3 Concept Definition Tables

The headers of a concept definition table are as follows:

Ref. provides the citation to the relevant section within 17 CFR 242.825(c) (Regulation SE Rule 825(c)).

Concept is a brief title for the data element.

D denotes the depth of nesting within the XML report that the element occurs.

denotes the number of occurrences allowed for a given element. “1” indicates the element is required; “1..n” indicates that at least 1 and at most n occurrences are allowed, with “*” indicating an unlimited number of occurrences.

Element is the abbreviation used in the schema and in schema-valid instance files. For example, “Version” is a concept, while **version** is the element name.

Definition: When the concept is defined in the rule that definition is provided here. Simple elements may be described as numbers, text, time stamps, etc., but some elements are composed of other elements.

1.4 Abbreviations Used Within Element Names

The abbreviations are drawn from conventional XML element names.

Abbr.	Meaning	Abbr.	Meaning (cont.)
Amt	Amount	Mnrr	Manner
Apld	Applied	Mtd	Method
Authrty	Authority	Nm	Name
Ccy	Currency	Nmnl	Nominal
Clng	Closing	Ntnl	Notional
Cnt	Count	Opng	Opening
Desc	Description	Prc	Price
Dscrtn	Discretion	Sttlm	Settlement
Dscrtnry	Discretionary	Tnr	Tenor
Dtrmn	Determine	Tradd	Traded
Expltn	Explanation	Trad	Trades
Frmt	Format	Ttl	Total
Ftnt	Footnote	Typ	Type
Hgst	Highest	Upi	Universal Product Identifier
Lwst	Lowest	Usd	US Dollar

1.5 Reporting No Activity

Some numeric fields are constrained to be non-negative numbers. The number of Trades is constrained to be a nonnegative whole number.

Security-Based Swaps and tenors thereof that had no activity require no data, but if they are included, use 0 to indicate the absence of activity. Some fields are optional, as shown below.

1.6 Validation

XML Schema validation will signal errors such as missing or misplaced elements, negative values where a nonnegative value is required, and text fields with too many characters.

2 DAILY MARKET DATA REPORT DEFINITIONS

Ref.	Concept	D	#	Element	Format														
(c)	Daily market data report.	0	1	dailyMarketDataReport	Root element.														
N/A	Version of this DMDR schema	1	1	version	Fixed value 1.														
(c)(1)	SBSEF Name	1	1	sbsef	From 1 to 100 characters.														
(c)(1)	Business date of data in the report	1	1	date	ISO 8601 date format YYYY-MM-DD.														
(c)(1)	Optional date and time report generated	1	0..1	generated	ISO 8601 format with time zone.														
(c)(1)	SBS/Tenor item	1	0..*	sbsTnr	(Container for level 2 elements)														
(c)(1)	SBS Name	2	1	sbsNm	Text up to 100 characters.														
(c)(1)	UPI	2	0..1	upi	ISO 4914 UPI of 12 alphanumeric characters, optional.														
(c)(1)	Period until expiration of the contract traded (Tenor)	2	1	tenor	ISO 8601 duration, in the format P#Y#M#D#, where # is a whole number. Longer periods are preferred and mixed units discouraged, e.g., P1Y meaning 12 months preferred over P12M, and P30M preferred over P2Y6M or P1Y18M, although all are allowed.														
(c)(1)	Currency	2	1	ccy	ISO 4217 three letter code.														
(c)(1)	Price Format, one of seven pricing conventions.	2	1	prcFrmt	<table><tr><td>SprdCcy</td><td>Spread (currency)</td></tr><tr><td>SprdDcml</td><td>Spread (decimal)</td></tr><tr><td>SprdBsisPts</td><td>Spread (basis points)</td></tr><tr><td>BdPricPctg</td><td>Bond price (percentage)</td></tr><tr><td>PrmCcy</td><td>Premium (currency)</td></tr><tr><td>PrmPctNtnl</td><td>Premium as percentage of Notional</td></tr><tr><td>FxdRateDcml</td><td>Fixed rate (decimal)</td></tr></table>	SprdCcy	Spread (currency)	SprdDcml	Spread (decimal)	SprdBsisPts	Spread (basis points)	BdPricPctg	Bond price (percentage)	PrmCcy	Premium (currency)	PrmPctNtnl	Premium as percentage of Notional	FxdRateDcml	Fixed rate (decimal)
SprdCcy	Spread (currency)																		
SprdDcml	Spread (decimal)																		
SprdBsisPts	Spread (basis points)																		
BdPricPctg	Bond price (percentage)																		
PrmCcy	Premium (currency)																		
PrmPctNtnl	Premium as percentage of Notional																		
FxdRateDcml	Fixed rate (decimal)																		

Ref.	Concept	D	#	Element	Format				
(c)(1)(i)	Trade Count	2	1	tradCnt	Number of trades, a whole non-negative number.				
(c)(1)(ii)	Total notional amount traded (USD)	2	1	ttlNtnlAmtTraddUsd	A non-negative decimal.				
(c)(1)(iii)	Total notional amount of block trades (USD)	2	1	ttlNtnlAmtBlckTradsUsd	A non-negative decimal.				
(c)(1)(iv)	Opening price	2	1	opngPric	Decimal.				
(c)(1)(iv)	Closing price	2	1	clsqPric	Decimal.				
(c)(1)(v)	Settlement price	2	0..1	sttlmPric	If the settlement price differs from the closing price, a decimal, otherwise omitted.				
(c)(1)(vi)	Lowest price of a sale or offer, whichever is lower, that the SBSEF reasonably determines accurately reflects market conditions.	2	1	lwstPric	Decimal.				
(c)(1)(vi)	Lowest price (type), indicating whether the lowest price represents a sale or an offer.	2	1	lwstPricTyp	<table><tr><td>s</td><td>Sale</td></tr><tr><td>o</td><td>Offer</td></tr></table>	s	Sale	o	Offer
s	Sale								
o	Offer								
(c)(1)(vi)	Highest price of a sale or bid, whichever is higher, that the SBSEF reasonably determines accurately reflects market conditions.	2	1	hgstPric	Decimal.				

Ref.	Concept	D	#	Element	Format				
(c)(1)(vi)	Highest price (type), indicating whether the highest price represents a sale or a bid.	2	1	hgstPricType	<table><tr><td>S</td><td>Sale</td></tr><tr><td>B</td><td>Bid</td></tr></table>	S	Sale	B	Bid
S	Sale								
B	Bid								
(c)(2)(ii)	Discretionary authority applied	2	0..1	dscrtnryAuthrtyApld	Fixed value ‘Y’, present if and only if discretion was applied.				
(c)(2)(ii)	Discretionary authority applied (footnote)	2	0..1	dscrtnryAuthrtyApldFtnt	Footnote corresponding to "Y" indicates that SBSEF used discretion in determining this price.				
(c)(2)(i)	Method used to determine nominal prices	1	1	mtdUsedToDtrmnNmnlPric	Text up to 5000 characters.				
(c)(2)(i)	Method used to determine settlement prices	1	1	mtdUsedToDtrmnSttlmPric	Text up to 5000 characters.				
(c)(2)(ii)	Explanation that the SBSEF may use certain discretion in determining the opening and/or closing ranges of the settlement prices.	1	0..1	dscrtnExpltn	Text up to 5000 characters. Include only if SBSEF uses discretion.				
(c)(2)(ii)	Description of how the SBSEF may use discretion in determining the opening and/or closing ranges or the settlement prices.	1	0..1	dscrtnMnnrDesc	Text up to 5000 characters. Include (with dscrtnExpltn) only if SBSEF uses discretion.

4 CHANGE LOG

April, 2024	First public draft.
September, 2024	First version corresponding to schema <code>dmdr-20240331.xsd</code>
March, 2025	Add change log. Permit negative prices in updated schema <code>dmdr-20250331.xsd</code>
