

# EDGAR® SBS Entity Forms XML Technical Specification

---

~~October 2025~~ June 2026

## Notice

This is a DRAFT of the EDGAR® SBS Entity Forms XML Technical Specifications. The Securities and Exchange Commission (“SEC” or “Commission”) has not approved, may approve or disapprove, and may revise any of the changes noted in this document.

This draft technical specification is being provided as a service to the filing community to assist filers, agents, and software developers in their preparation of responses to potential changes to the EDGAR® system which are scheduled to be deployed in EDGAR Release 26.2 on June 15, 2026. The posting of this draft technical specification does not indicate Commission approval of any proposed changes relating to the EDGAR system as reflected in the draft.

The final version of the EDGAR® SBS Entity Forms XML Technical Specifications will be made available, if approved by the Commission, on or about June 15, 2026, at [www.sec.gov](http://www.sec.gov).

# 1 INTRODUCTION

## 1.1 Purpose

This document details the valid structure and content of the SBS Entity Forms Electronic Data Gathering, Analysis, and Retrieval (EDGAR) Extensible Markup Language (XML) submission types. The following table lists the submission types for the SBS Entity Forms.

**Table 1-1: SBS Entity Forms Submission Types**

SUBMISSION TYPE	DESCRIPTION
SBSE	Application for Registration of Security-based Swap Dealers and Major Security-based Swap Participants
SBSE/A	Amendment to an Application for Registration of Security-based Swap Dealers and Major Security-based Swap Participants
SBSE-A	Application for Registration of Security-based Swap Dealers and Major Security-based Swap Participants that are Registered or Registering with the Commodity Futures Trading Commission as a Swap Dealer or Major Swap Participant
SBSE-A/A	Amendment to an Application for Registration of Security-based Swap Dealers and Major Security-based Swap Participants that are Registered or Registering with the Commodity Futures Trading Commission as a Swap Dealer or Major Swap Participant
SBSE-BD	Application for Registration of Security-based Swap Dealers and Major Security-based Swap Participants that are Registered Broker-dealers
SBSE-BD/A	Amendment to an Application for Registration of Security-based Swap Dealers and Major Security-based Swap Participants that are Registered Broker-dealers
SBSE-C	Certifications for Registration of Security-based Swap Dealers and Major Security-based Swap Participants
SBSE-W	Request for Withdrawal from Registration as a Security-based Swap Dealer or Major Security-based Swap Participant
SBSE-CCO-RPT	Chief Compliance Officer's Annual Compliance Report of Security-Based Swap Dealer or Major Security-Based Swap Participant pursuant to Rule 15Fk-1
SBSE-CCO-RPT/A	Amendment to Chief Compliance Officer's Annual Compliance Report of Security-Based Swap Dealer or Major Security-Based Swap Participant pursuant to Rule 15Fk-1

This specification provides the basis for creating the aforementioned submission types for the SBS Entity Forms XML submissions. Filers must use this technical specification to generate a SBS Entity Form XML submission that can be successfully parsed by the EDGAR system.

The SBS Entity Form submission file must conform to the EDGAR SBS Entity Form Submission Taxonomy. This taxonomy is comprised of a collection of XML Schema Definition (.xsd) files that define the structures of EDGAR SBS Entity Forms submissions.

The SBS Entity Forms XML submissions can be transmitted to the SEC via the EDGAR Filing (<https://www.edgarfiling.sec.gov/>) or the “Transmit XML Submission” option from the EDGAR OnlineForms website (<https://www.onlineforms.edgarfiling.sec.gov/>).

To access the EDGAR Filing and EDGAR OnlineForms websites, you must have a Central Index Key (CIK) and a current EDGAR password and CIK confirmation code (CCC).

If you do not have a CIK, password and/or CCC, please consult How Do I Understand and Utilize EDGAR CIKs, Passphrases and Access Codes on SEC.gov.

For further information about EDGAR Filing and EDGAR OnlineForms, specifically with respect to the transmission of filer-constructed submissions, refer to the “Filer Constructed XML Submission” section of the EDGAR Filer Manual, Volume II (EDGAR Filing).

## 1.2 Summary of Changes

On June 15, 2026, EDGAR Release 26.2 introduced the following changes:

- Tables 3.6 and 3.8:
  - Updated Address Street1 and Address Street2 fields to increase their maximum length from 40 to 150 characters within the *serviceOfProcess* section of SBSE-BD and within the *personAddress* and *locAddress* sections of SBSE-W.
- Updated section 8 (SBSE-BD Schema Data Value Constraints) to add 8.8 LIVE\_TEST\_TYPE and 8.9 BASE\_DOCUMENT\_TYPE.
- Updated section 10 (SBSE-W Schema Data Value Constraints) to add 10.6 LIVE\_TEST\_TYPE.
- Updated section 11 (SBSE-CCO-RPT Schema Data Value Constraints) to add 11.2 LIVE\_TEST\_TYPE and 11.3 BASE\_DOCUMENT\_TYPE.
- Updated table 3.4 to correct a typo in the element name, changing filerCik to filerCcc.
- Corrected Tables 3.6, 3.8 and 3.9 for the flags and overrideInternetFlag fields, updating them from m to o for form types SBSE-BD, SBSE-W and SBSE-CCO-RPT to accurately reflect the system behavior.
- Updated the documented max-length values for fields in Tables 3.6 and 3.8 to reflect the correct limits based on system’s schema and functionality, including firstName (40 → 30), suffix (30 → 10), phone (9 → 20), signerTitle (150 → 60), and irsEmplIdentNo (150 → 9).
- Updated Table 3.6 to correct requirement indicators for several elements, including changes from *m#* to *m#1* for registeredAs, registeringAs, scheduleF, serviceOfProcess, firmOrIndividual, individualName, foreignFinancialReg, and regulatoryAuthName; updated prudentialRegulators from *m* to *m#1*; and updated prudentialRegulator from *m#1* to *m*.
- Updated Table 3.8 to correct requirement indicators, including changes from *m#* to *m#1* for mailingAddress, description, numberOfCounterparties, amountOfMoney, marketValue, describeArrangements, and individualName; updated firmName from *m* to *m#1*; updated locAddress from *m* to *o*; and updated street1, city, stateOrCountry, and zipCode from *o* to *m#*.
- Updated Table 3.9 to correct requirement indicator for description, changing it from *m* to *o*.

~~On October 14, 2025, EDGAR Release 25.3 introduced the following changes:~~

- ~~• Tables 3.4 and 3.5:~~
  - ~~○ Address Street 1 and Street 2 Max Lengths values were stated or increased for the designated fields~~
  - ~~○ Max Occur values were increased for the designated fields~~

## 2 EDGAR SCHEMA FILES

Table 2-1: SBS Entity Forms Schema Files

Table 2-1 describes the schema files that the EDGAR system uses to validate SBS Entity Forms submissions. These schemas are considered part of this specification and are distributed with this document.

Table 2-1: SBS Entity Forms Schema Files

XML Schema File	Scope of File
eis_SBSE_Filer_X1.xsd	Defines the elements for a SBSE submission
eis_SBSE_DRP.xsd	Defines the elements for a SBSE-DRP submission
eis_SBSE_A_Filer_X1.xsd	Defines the elements for a SBSE-A submission
eis_SBSE_A_DRP.xsd	Defines the elements for a SBSE_A_DRP submission
eis_SBSE_BD_Filer.xsd	Defines the elements for a SBSE-BD submission
eis_SBSE_C_Filer.xsd	Defines the elements for a SBSE-C submission
eis_SBSE_W_Filer.xsd	Defines the elements for a SBSE-W submission
eis_SBSE_CCO_RPT_Filer.xsd	Defines the elements for a SBSE-CCO-RPT submission
eis_Common.xsd	Defines all the elements common for all SBSE submissions
eis_stateCodes.xsd	Defines the country and state codes for all SBSE submissions

The schema files define the valid data elements for a SBS Entity Form submission, the hierarchy and sequencing of these elements, data types, valid values, maximum lengths, and number of occurrences, etc.

It is recommended that you download these files and use them for your own validation prior to filing a submission. This will greatly reduce the likelihood of receiving an EDGAR Suspend error. These schema files contain several annotations that describe the nature of the content of some of the elements.

EDGAR performs several validation checks that are not related to the schema files, so it is possible for a submission to meet all the schema constraints and still be SUSPENDED or BLOCKED. For instance, EDGAR verifies that each CIK/CCC pair is valid.

### 2.1 Schema Table Column Definitions

We assume the filer is familiar with the basics of the XML language, Namespaces, and the XML Schema Definition language. If not, you can find numerous references on the World Wide Web. One recommended website that provides several useful tutorials and examples is <http://www.w3schools.com/>.

The table below highlights the schema language features used most heavily in the EDGAR SBS Entity Form submission schema files. These are:

Table 2-2: Schema Language

Indicator	Purpose
<sequence>	Specifies that child elements must appear in a specific order. This indicator is used with each element hierarchy. Elements must always appear in the order shown in Section 3.4.
<choice>	Specifies that only one of the child elements can be present within the containing element.

<minOccurs>	Specifies the minimum number of times that an element can occur.
<maxOccurs>	Specifies the maximum number of times that an element can occur.

### 3 XML SCHEMAS

This section summarizes the restrictions and constraints imposed on the content of the SBS Entity Forms submission types. These rules are enforced by the schema files and by EDGAR submission processing applications.

The schema files cannot enforce all the rules concerning data content, so it is possible for a submission to satisfy all the schema constraints and still be **SUSPENDED** or **BLOCKED** by EDGAR.

#### 3.1 Schema Table Column Definitions

The following table defines the columns in the two schema summation tables provided in Sections 3.4:

Table 3-1: Column Definitions for the Tables in Section 3-4

Column Name	Description
Level	Depth of element in the XML node hierarchy.
Order	Order in which elements must appear.
Data Type	See Table in Section 3.2 for a detailed description.
Element Name	Name of the XML element. This is case-sensitive.
Max Length	Maximum length for elements. EDGAR database stores up to this number of characters. "Unlimited" means no maximum length constraint for the element value.
Data Value Constraint	The paragraph that describes the data value constraint for the element. The values specified are case sensitive.
Max Occur	Maximum times a set of elements may be repeated. The maximum occurrence is 1, if not specified.
Applicability of Element	Indicates applicability of the element. m = Mandatory, o = Optional, NA = Does Not Apply. EDGAR uses this element for server-side processing. Do not provide a value for this element.

#### 3.2 Data Type Constraints

Each entry in the "Data Type" column of these tables will be one of these values:

Data Type	Constraints
Boolean	Indicate a "true" value with the word "true". Indicate a "false" value with the word "false". A Boolean element may not have a null or blank value. This is a schema violation and will cause a SUSPENSE error.
date	Must be of the format MM-DD-YYYY. A date element may not have a null or blank value. This is a schema violation and will cause a SUSPENSE error. Do not include a date element at all if your goal is to not provide an optional date.
integer	Only valid characters are 0-9. Cannot contain commas, a minus sign, a dollar sign, or parentheses. An integer element may not have a null or blank value. This is a schema violation and will cause a SUSPENSE error.

Data Type	Constraints										
Decimal	Only valid characters are 0-9 and a period. Cannot contain commas, dollar sign, or parentheses. EDGAR stores two and four decimal places depending on the actual type. A decimal element may not have a null or blank value. This is a schema violation and will cause a SUSPENSE error. Do not include a decimal element at all if your goal is to not provide an optional number.										
String	<p>Should be no longer than the length shown in the tables in Section 3.4.</p> <p>EDGAR stores values in the &lt;signatureName&gt;, and &lt;contactEmailAddress&gt; elements exactly as provided. All other values are stored in the database as uppercase.</p> <p>You must use special escape sequences to represent these four characters:</p> <table> <tr> <th>Character</th><th>Escape Sequence</th></tr> <tr> <td>&lt;</td><td>&amp;lt; or &amp;#60;</td></tr> <tr> <td>&gt;</td><td>&amp;gt; or &amp;#62;</td></tr> <tr> <td>&amp;</td><td>&amp;amp; or &amp;#38;</td></tr> <tr> <td>"</td><td>&amp;quot; or &amp;#34;</td></tr> </table>	Character	Escape Sequence	<	&lt; or &#60;	>	&gt; or &#62;	&	&amp; or &#38;	"	&quot; or &#34;
Character	Escape Sequence										
<	&lt; or &#60;										
>	&gt; or &#62;										
&	&amp; or &#38;										
"	&quot; or &#34;										
NV	These fields cannot have a value. They are parent element nodes that contain other XML elements. These elements need to be present for proper validation.										
attr	Attribute property for an XML element.										

### 3.3 Applicability of Schema Elements

Each entry in the submission/document type column in Section 3.4 will have one of these values:

Value	Description
m	Mandatory.
m#	Conditional Mandatory. The element is mandatory if its parent element is included. The element cannot be included if its parent is not included.
m#1	Conditional Mandatory. The element is mandatory if specific values are provided for other elements.
m#2	This element is required for correct processing of the submission type.
O	Optional.
o#	Optional in the Schema. The value will be populated by EDGAR. Any value provided will be overwritten and a WARNING generated.
NA	Does not apply to the submission type. EDGAR uses this field for server-side processing. Do not provide a value for this element.
blank	Does not apply to submission type.

## 12 BASIC SUBMISSION CONSTRUCTION

### 12.1 General Formatting of XML Files

The following rules apply to the submission file of an XML-format SBS Entity Form submission:

1. The filename must end with an “.xml” extension.
2. The file cannot be compressed in any fashion.
3. We strongly recommend you format the submission as shown in the provided sample files. This makes the raw XML files easier to view in a text editor. The submission of ASCII XML files with no line breaks, while legal XML is strongly discouraged. XML filings are required to be posted on public websites. While usually formatted via style sheets, the raw XML is frequently available for inspection and should be readable by a person. A single line XML file is not viewer-friendly and should be avoided.
4. The `<?xml version="1.0"?>` declaration line is optional; however, if it is included it must be the first line in the file. Any text entered before this line, even white space, will cause a SUSPENSE error. The version value must be “1.0”. Any other value for version will cause a SUSPENSE error.
5. For an XML element with a data value, keep the begin tag, data value, and end tag on the same line of text. Otherwise, you could get a schema violation error. As an example, for a filer ID value which cannot be longer than 10 characters, this specification is correct:

```
<cik>1212121212</cik>
```

6. The specification below will result in a parsing error because the extraneous white space and line feeds will be counted as part of the length of the data value. In other words, the CIK value will be regarded as longer than 10 characters.

```
<cik>
1212121212
</cik>
```

### 12.2 XML Submission File Rules

The following rules apply to the supporting document XML-format:

1. The `<?xml version="1.0"?>` declaration line is optional; however, if it is included it must be the first line in the file. Any text entered before this line, even white space, will cause an error. The version value must be “1.0”. Any other value for version will cause an error.
2. The XML elements cannot have any namespaces.  
For e.g.: It has to be `<contactName>` and not `<ns1:contactName>`
3. The order of any `<notificationEmailAddress>` elements does not matter.

4. The submission file must conform to the XML schema files. Any violation of this schema will result in the suspension of the filing.

### 12.2.1 Enclosing a Document

1. Allowable file extensions are .pdf, .txt, .htm, .jpg, .xml and .gif.
2. The names of attached document files must follow the EDGAR file naming conventions:
  - File names cannot exceed 32 characters, including the file extension.
  - Valid characters are lowercase letters, digits 0-9, up to one underscore, up to one hyphen, and up to one period.
  - First character must be a letter.
  - Spaces are not allowed.
  - File name must have a file type extension of .xml.
3. The <description> is optional, but all other elements must be present and must have a value.
4. The <contents> element must contain a MIME encoded document. You can use any standard 64-character set based MIME encoding algorithm to create a MIME document.
5. The XML for an enclosed supporting document looks like this:

```
<documents>
  <document>
    < conformedName>test1.txt</ conformedName>

## 13 ERROR REPORTING

EDGAR will generate an error for each violation of an XML schema constraint, as well as for each violation of a SBS Entity Form filing business rule. The schema files do not enforce all error checks, so it is possible to construct a submission that meets all the schema constraints yet is still SUSPENDED.

This table summarizes the errors that can result from violations of schema constraints and EDGAR business rules. This is not an all-inclusive list.

**Table 12-1: Submission Errors and Severity**

Error Condition	Severity
Elements not in sequence prescribed in Section 3.4	SUSPENDED
Inclusion of XML-style sheet reference or any other Processing Instruction	SUSPENDED
Inclusion of an element not prescribed in the schema	SUSPENDED
String value exceeds maximum length constraint	SUSPENDED
Element constrained by a Choice List has an invalid value	SUSPENDED
Mandatory element has no value or an invalid value	SUSPENDED
Special character (&, <, >) not provided as escape sequence	SUSPENDED
Date, Boolean, or Decimal element does not have a value	SUSPENDED
Duplicate Notification Address	WARNING
"NA" or blank field has a value	WARNING
Invalid Issuer CIK	SUSPENDED
Improperly formatted email address	SUSPENDED
Exceeding a "Max Occur" limit from Section 3.4	SUSPENDED

You may sometimes get multiple error messages reporting the same error. The XML parser EDGAR used to process a SBS Entity Form submission generates messages that are rather technical in nature and require an understanding of the XML schema language. Whenever possible, EDGAR generates a more "friendly" error message to give a precise description of the error.
