**ADMINISTRATIVE PROCEEDING  
File No. 3-15580**

**In the matter of:**

**ANTHONY CHIASSON**

**ANTHONY CHIASSON'S PETITION FOR REVIEW OF INITIAL DECISION**

Pursuant to Rule 410 of the Commission's Rules of Practice, 17 C.F.R. § 201.410, Anthony Chiasson hereby submits a petition for review of the Initial Decision issued on April 18, 2014 in the above-captioned proceeding ("Initial Decision").

**INTRODUCTION**

The United States Court of Appeals for the Second Circuit (the "Second Circuit") is currently considering Mr. Chiasson's appeal of his criminal conviction, so we renew our assertion that this Initial Decision is premature. A successful appeal will vacate the criminal conviction and invalidate the basis for the judgment in a civil case, thereby vitiating the factual predicates for any industry bar of Mr. Chiasson. It would appear at this time that the SEC recognizes the Court's interest in this issue and recently agreed to stay summary judgment against Mr. Steinberg in a related case. *See SEC v. Steinberg*, No. 13-cv-2082 (HB), Docket No. 29. Mr. Chiasson, accordingly, respectfully asks the Commission to review the Initial Decision

and stay the entry of a final order until after the Second Circuit rules on Mr. Chiasson's appeal (if a basis for a final order still exists).

### **BACKGROUND**

As more fully outlined in Mr. Chiasson's Memorandum of Points and Authorities in Response to the Division of Enforcement's Motion for Summary Disposition, Mr. Chiasson was convicted of insider trading in the securities of Dell, Inc. and NVIDIA Corporation on December 17, 2012. On October 4, 2013, the United States District Court for the Southern District of New York entered a consent judgment, permanently enjoining Mr. Chiasson from future violations of Section 17(a) of the Securities Act of 1933, Section 10(b) of the Exchange Act and Rule 10b-5 thereunder. *See SEC v. Adondakis*, No. 12-cv-409 (HB), Docket No. 92. On April 18, 2014, the Honorable Cameron Elliott, Administrative Law Judge, granted the Division's motion for summary disposition and imposed a collateral industry bar on Mr. Chiasson.

### **ARGUMENT**

The basis for the imposed collateral industry bar may very well soon be mooted by the Second Circuit. That Court heard oral argument on Mr. Chiasson's appeal on April 22, 2014. The argument focused on whether The Honorable Richard J. Sullivan of the United States District Court for the Southern District of New York erred by declining to instruct the jury that to be found guilty of insider trading, a tippee must know the relevant company insiders breached their fiduciary duties by disclosing confidential information in exchange for personal gain. The Second Circuit previously acknowledged that Mr. Chiasson's appeal raised a substantial question of law that could result in a new trial or a judgment of acquittal. *See United States v. Newman*, Nos. 13-1837(L), 13-917(Con), attached hereto as Exhibit A. As the letter from Mr. Steinberg's counsel which was joined by the SEC noted, during oral argument, the questions posed by

Judges Peter Hall, Barrington Parker, and Ralph Winter “appeared to express skepticism as to the sufficiency of Judge Sullivan’s jury instructions regarding downstream tipples.”<sup>1</sup> *See SEC v. Steinberg*, No. 13-cv-2082 (HB), Docket No. 29. Indeed, for this very reason, just yesterday, the Division requested the Honorable Harold Baer, Jr. stay the summary judgment briefing schedule in Mr. Steinberg’s case, which has virtually identical facts to Mr. Chiasson’s, pending the Second Circuit’s disposition of Mr. Chiasson’s appeal. *See Id.*

Mr. Chiasson similarly requested the Division agree to stay summary disposition pending his appeal. The Division declined Mr. Chiasson’s request and summary judgment was entered against him. Subsequent to that entry, the Division apparently realized it would be more efficient to wait for the Second Circuit’s decision on Mr. Chiasson’s appeal before moving for summary judgment against Mr. Steinberg, a defendant convicted of insider trading on the basis of the same jury instructions as Mr. Chiasson. *See Id.* Mr. Chiasson, the man who brought that issue to the Second Circuit, should also benefit from the Division’s realization; the Commission should review the Initial Order and refrain from entering a final one until the Second Circuit issues its opinion on Mr. Chiasson’s appeal.

If Mr. Chiasson wins his appeal, and accordingly the basis for the Initial Order is vitiated, Mr. Chiasson, the Division, and the Court will need to expend resources on additional motion practice in a matter where there is essentially no dispute. It would be more efficient and a better use of resources for the Commission to review the Initial Order and refrain from entering a final order against Mr. Chiasson until after the Second Circuit issues a decision (if there is even still a basis for a final order). In essence, Mr. Chiasson is requesting the SEC treat his matter in the same manner as it has agreed to treat Mr. Steinberg’s.

---

<sup>1</sup> An unofficial transcription of the oral argument is attached hereto as Exhibit B. Mr. Chiasson will provide an audio recording of the argument should the Commission so request.

Furthermore, there are no other consequences to the Commission refraining from entering a final order until after the Second Circuit issues its decision. Indeed, Mr. Chiasson is effectively already barred. He is currently not working in the securities industry, nor could he attempt to enter the industry during the pendency of his very public appeal.

### CONCLUSION

For the reasons above, Mr. Chiasson respectfully requests that the Commission review the Initial Order and refrain from entering a final judgment until after the Second Circuit rules on Mr. Chiasson's appeal.

Dated: May 9, 2014

Respectfully submitted,

United States of America,

Appellee,

v.

Todd Newman, Anthony Chiasson,

Defendants - Appellants.

---

**ORDER**

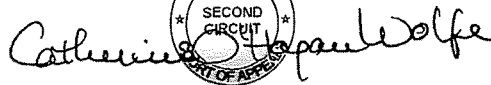

Docket Nos. 13-1837(L)  
13-1917(Con)

Appellants Todd Newman and Anthony Chiasson filed motions for bail pending appeals pursuant to FRAP Rule 9(b). The Government opposes bail. Following argument of the motions on June 18, 2013 the panel ruled from the bench as follows:

IT IS ORDERED that bail pending appeal is granted on the terms previously set by the district court. The case is remanded to the district court for the purpose of adjusting the bail conditions as may be necessary during the pendency of the appeal. The mandate shall issue forthwith for these limited bail-related purposes.

For the Court:

Catherine O'Hagan Wolfe,  
Clerk of Court

United States v. Newman,  
Nos. 13-1837-cr, 13-1917-cr  
April 22, 2014 Oral Argument  
Before the U.S. Court of Appeals for the Second  
Circuit

1  
 2 JUDGE WINTER: Okay.  
 3 JUDGE HALL: The next case is United  
 4 States versus Newman and Chiasson.  
 5 MARK POMERANTZ: May it please the  
 6 Court, I'm Mark Pomerantz. I represent the  
 7 appellant, Anthony Chiasson. I'd like to get  
 8 right to the main legal issue that we've raised  
 9 for the Court.  
 10 Anthony Chiasson is a remote tippee. He  
 11 had no involvement with the insiders at Dell and  
 12 NVIDIA. He received information fourth-hand. And,  
 13 when it reached him, he knew simply that it came  
 14 from inside those companies. He did not know that  
 15 the insiders had disclosed the information in  
 16 exchange for career advice, friendship, or indeed  
 17 any other form of personal benefit.  
 18 The trial judge held, over objection,  
 19 that proof of his knowledge was not required.  
 20 When Judge Sullivan instructed the jury, he did  
 21 tell the jury that the insiders had to receive or  
 22 anticipate receiving some personal benefit. But  
 23 he held that the defendants did not have to know  
 24 about the receipt of the personal benefit. And  
 25 so, the jury was not required to find that

1 knowledge.  
 2 We believe this was error. Five  
 3 district judges in this circuit--Judge Sweet in  
 4 State Teachers against Fluor, then-District Judge  
 5 McLaughlin in the Santoro case, Judge Holwell in  
 6 Rajaratnam, Judge Rakoff in the Whitman case, and  
 7 most recently Judge Gardephe in the Martoma case--  
 8 have held that a tippee does have to know that  
 9 insiders exchanged information for personal  
 10 benefit, and that jurors have to be so  
 11 instructed.  
 12 JUDGE PARKER: Am I correct that in  
 13 Martoma, the government went along with that  
 14 charge.  
 15 MARK POMERANTZ: I believe, Your Honor,  
 16 that, in Martoma, the government submitted a  
 17 different charge, and Judge Gardephe went with  
 18 the version of the charge that we believe was the  
 19 correct version. But I--  
 20 JUDGE PARKER: Which is that the  
 21 defendant had to know of the--  
 22 MARK POMERANTZ: That the defendant had  
 23 to know. To our knowledge, Your Honor, Judge  
 24 Sullivan is the only judge to have held to the  
 25 contrary. And that's because--

1 JUDGE HALL: Sorry, back to that point,  
 2 the reason that the defendant has to know that is  
 3 because that's how--Dirks tells us that that's  
 4 the only way to prove breach of duty?  
 5 MARK POMERANTZ: No, Dirks tells us that  
 6 tippee liability is derivative. I'll retreat for  
 7 a moment; I know that Your Honor is familiar with  
 8 this, but, of course, there's no generalized duty  
 9 to the marketplace. Chiasson is a stranger to  
 10 those who are on the other side of his trades.  
 11 He's a stranger to Dell and NVIDIA. He owes no  
 12 duties of his own to refrain from trading.  
 13 And, indeed, the law is clear that the  
 14 mere receipt of material nonpublic information,  
 15 even material nonpublic information that comes to  
 16 a person from an insider, doesn't give rise to  
 17 any duty to abstain from trading.  
 18 Because liability for the tippee is  
 19 derivative, it means there has to be a guilty  
 20 tipper. If the tipper engages in a fraudulent  
 21 fiduciary breach, of which the tippee has  
 22 knowledge, the tippee, in effect, becomes an  
 23 accessory after the fact in the tipper's  
 24 fraudulent fiduciary breach.  
 25 And the relevance of personal benefit

1 and the knowledge of personal benefit is that not  
 2 every breach of duty opens the door to insider  
 3 trading liability. Dirks is quite clear on this.  
 4 Dirks says--  
 5 JUDGE HALL: So your answer to my  
 6 question is basically yes.  
 7 MARK POMERANTZ: Yes. Dirks says there  
 8 has to be a fraudulent fiduciary breach. And  
 9 Dirks goes on to define a fraudulent fiduciary  
 10 breach in terms of the tipper's exchange of  
 11 information for personal knowledge.  
 12 And that, after all, was precisely the  
 13 fraudulent fiduciary breach that the government  
 14 was attempting to prove in this case. And it's  
 15 precisely that fraudulent fiduciary breach that  
 16 Judge Sullivan submitted to the jurors and said,  
 17 "You have to find first that the tipper engaged  
 18 in a fraudulent fiduciary breach." And he defined  
 19 it correctly.  
 20 When he told the jury, "You have to  
 21 find the tipper has engaged in a fraudulent  
 22 fiduciary breach," he incorporated all of the  
 23 ingredients of a fraudulent fiduciary breach  
 24 identified by the Dirks court: the existence of a  
 25 confidential relationship, a relationship of

Page 6

1 trust and confidence, the breach of a duty of  
2 confidentiality, and the anticipation or the  
3 receipt of personal benefit.  
4 So, that's what constitutes the  
5 fraudulent fiduciary breach that was alleged. But  
6 when it came to the tippee's knowledge of a  
7 fraudulent fiduciary breach, Judge Sullivan left  
8 a piece out of the equation. He left out of the  
9 equation the knowledge that the tipper was  
10 receiving some form of personal benefit. And that  
11 is what the Dirks court says takes a breach of  
12 confidentiality and transforms it into a  
13 fraudulent fiduciary breach.  
14 JUDGE HALL: So, is that the only--  
15 excuse me; go ahead.  
16 JUDGE PARKER: You had proved--help me  
17 recall this--that there were other disclosures of  
18 nonpublic information from Dell that was routine.  
19 What--flesh that out for me.  
20 MARK POMERANTZ: Yeah. The record was  
21 replete, Your Honor, with the fact that Dell and  
22 NVIDIA were leaky companies, and that all kinds  
23 of material information reached the defendants,  
24 information that related to earnings, that  
25 related to margin.

Page 8

1 our argument.  
2 Where you have a defendant like  
3 Chiasson, who is alleged to be a secondary actor,  
4 to be guilty of a crime because he was a  
5 participant in the insider's crime, then it's--I  
6 won't say hornbook law, but I think well settled  
7 law that what the secondary actor has to know are  
8 all of the circumstances that make his  
9 participation participation in a crime.  
10 And one of those circumstances was the  
11 exchange for personal benefit. If the insiders  
12 had not exchanged information for personal  
13 benefit, the government concedes there is no  
14 crime here. But the disjuncture, the oddity, is,  
15 although the government acknowledges that receipt  
16 of personal benefit, or the anticipation of  
17 personal benefit, has to be an ingredient of the  
18 tipper liability. That's what makes the tipper's  
19 conduct criminal.  
20 And even though the government concedes  
21 that the tippee has to know of the fraudulent  
22 fiduciary breach, they say it's okay to leave  
23 that piece out of the equation. And we say it's  
24 not okay. It's not okay under Dirks; it's not  
25 okay under general principles of criminal law;

Page 7

1 JUDGE PARKER: So, how does this  
2 information differ from the information that they  
3 got indicted on?  
4 MARK POMERANTZ: Well, I think that was  
5 the point of the defense, Your Honor, is that  
6 there was no significant difference. And what it  
7 illustrates is that information--confidential  
8 information, material information--is the coin of  
9 the real in the securities business. And much  
10 information reaches portfolio managers like Mr.  
11 Chiasson, like Mr. Newman, without any indication  
12 that it has been exchanged for personal benefit.  
13 So, the relevance of it was: you can't  
14 infer from simply the fact that information,  
15 indeed sensitive information, indeed confidential  
16 information--you cannot infer from the fact that  
17 it has reached a third party, a portfolio  
18 manager--you can't infer from that fact alone  
19 that some form of personal benefit to the insider  
20 was exchanged for that information.  
21 And that's the touchstone here. It's  
22 the touchstone not only under Dirks and follow-on  
23 cases, Bateman Eichler, which we cite in the  
24 brief. It's not only the securities law. It's  
25 general principles of criminal law that support

Page 9

1 and it's not okay under principles of willfulness  
2 in cases like X-citement Video and Morissette  
3 that we cite in the brief. I see my bell is--  
4 JUDGE PARKER: Answer me this: Obus and  
5 Dirks, as I recall, were civil cases.  
6 MARK POMERANTZ: Yes.  
7 JUDGE PARKER: So, is the principle  
8 different with respect to civil cases as opposed  
9 to criminal prosecutions?  
10 MARK POMERANTZ: We think that the  
11 arguments we're making apply equally in the civil  
12 context, with one caveat: there is the  
13 formulation in Dirks where the Dirks court speaks  
14 of the tippee's knowing or should-have-known of  
15 the tipper's fraudulent fiduciary breach. It may  
16 be that, in a civil case, a should-have-known is  
17 sufficient.  
18 But for purposes of criminal liability--  
19 --and this is, I think, undisputed here--Judge  
20 Sullivan charged the jury with the government's  
21 consent that the standard of knowledge was  
22 knowledge, not should-have-known. And what he  
23 listed was what the defendant has to know.  
24 He did charge the jury that a defendant  
25 has to know of a simple breach of

1 confidentiality. But, when he made that charge,  
 2 he's saying that a defendant has to know facts  
 3 that don't constitute a fraud and don't  
 4 constitute a crime.  
 5 JUDGE HALL: Is the only way to have a  
 6 fraudulent breach of the duty that the tipper  
 7 receives something of value?  
 8 MARK POMERANTZ: Well, that is certainly  
 9 the breach and the definition of the breach  
 10 that's identified in Dirks. And in--  
 11 JUDGE HALL: Yeah. Does Dirks give an  
 12 example? Or is Dirks the [UNINTEL] the profits on  
 13 that?  
 14 MARK POMERANTZ: Yeah. For purposes of  
 15 this case, Your Honor, the answer doesn't matter,  
 16 because that--it's the Dirks definition of a  
 17 fraudulent fiduciary breach that was the  
 18 fraudulent fiduciary breach that got tried in  
 19 this case.  
 20 That's the fraudulent fiduciary breach  
 21 that the government attempted to prove; that's  
 22 why you've had all the evidence about career  
 23 advice and friendship. That's the fraudulent  
 24 fiduciary breach of the tipper that was given to  
 25 the jury as an essential ingredient.

1 So, if--I can't conceive readily of a  
 2 fraudulent fiduciary breach in the insider  
 3 trading context by an insider that would qualify  
 4 without the exchange of personal benefit that  
 5 Dirks contemplates. But even if, theoretically,  
 6 there's another flavor of fraudulent fiduciary  
 7 breach that qualifies, that's not the one that  
 8 was at issue in this case. At issue in this case  
 9 was--  
 10 JUDGE HALL: So, what if the--  
 11 MARK POMERANTZ: Classic Dirks.  
 12 JUDGE HALL: What if the defendant, the  
 13 tippee or the derivative tippee, thinks, "Boy,  
 14 you know, I've found a well here. This--great  
 15 information keeps flowing, and we get it  
 16 periodically. This is too good to be true."  
 17 Does that approach knowledge of the  
 18 source being--doing something that is a  
 19 fraudulent breach of confidential duty? Or is he  
 20 just talking in his sleep and his wife's passing  
 21 it on to somebody?  
 22 MARK POMERANTZ: Well, we can certainly  
 23 imagine cases where the circumstantial evidence  
 24 is so compelling that the government can credibly  
 25 argue that a defendant did know that the insider

1 must have exchanged this information for personal  
 2 gain. But, two points.  
 3 One: this is not such a case, and that  
 4 is where the relevance of the other information  
 5 comes in. And second, even if it were such a  
 6 case, that theory was just never given to the  
 7 jury. We could never litigate the issue of  
 8 whether Mr. Chiasson knew about personal benefit,  
 9 because Judge Sullivan said, "It's not a defense;  
 10 I'm not submitting it to the jury," so we  
 11 couldn't try it; we couldn't sum up on it; we  
 12 couldn't litigate the issue.  
 13 So, even if one could imagine a set of  
 14 circumstances that kind of take this to the edge,  
 15 that's not this case and it's not the basis on  
 16 which the basis on which the [UNINTEL].  
 17 JUDGE PARKER: Did the government try to  
 18 prove that he knew about some sort of personal  
 19 benefit?  
 20 MARK POMERANTZ: The government did not  
 21 try and prove that Mr. Chiasson knew about  
 22 personal benefit, because--well, A, there was no--  
 23 whether they wanted to try or they didn't, there  
 24 was no such proof. I mean, you know, the evidence  
 25 just wasn't there.

1 I'm not suggesting that the government  
 2 had proof of knowledge of personal benefit that  
 3 it kept in its pockets. It didn't prove it. And  
 4 Judge Sullivan didn't require the government to  
 5 prove it. So, the issue, you know, dropped out of  
 6 the case when the charge was given to the jury.  
 7 And it is an unfortunate circumstance,  
 8 because we believe that the evidence was  
 9 undisputed that Chiasson didn't know and couldn't  
 10 have known. The government's main cooperator as  
 11 Chiasson, Sam Adondakis, testified that he didn't  
 12 know that the tippers, the insiders, were  
 13 exchanging information for any form of personal  
 14 benefit.  
 15 It was undisputed that all of the  
 16 information that came to Chiasson came through  
 17 Adondakis. So, if Adondakis didn't know, it's  
 18 hard to understand how Chiasson would know. And  
 19 it's impossible to understand the government's  
 20 harmless error argument. But I'll leave that.  
 21 JUDGE HALL: Thank you, Mr. Pomerantz.  
 22 JUDGE PARKER: Thank you. Thank you, Mr.  
 23 Pomerantz.  
 24 JUDGE HALL: You've reserved two minutes  
 25 for rebuttal. Mr. Fishbein?

1 STEPHEN FISHBEIN: Thank you. May it  
 2 please the Court, Stephen Fishbein. I represented  
 3 Todd Newman at trial and on this appeal. The  
 4 evidence at trial was insufficient, under the  
 5 correct legal standard, to convict my client. And  
 6 I'm going to address both knowledge of the  
 7 benefit and also whether there was a breach or a  
 8 benefit in the first place.

9 Starting with knowledge of benefit,  
 10 there was no proof--Judge Parker, I think you  
 11 asked the question--that Todd Newman knew of any  
 12 benefit to any of the corporate insiders. And I  
 13 should point out that we made clear at the  
 14 beginning of this case what the correct legal  
 15 standard was. We put it in our jury charge; we  
 16 argued it to the judge.

17 The government knew full well,  
 18 throughout this trial, that we would be pressing  
 19 that issue. They knew full well that every  
 20 District Court had required knowledge of benefit.  
 21 The judge did not decide what the jury charge  
 22 would be until the close of the government's  
 23 case.

24 So, the government had every incentive  
 25 to put on every piece of evidence it had to show

1 that Todd Newman knew about a benefit, and it  
 2 came up with nothing. There was no direct  
 3 evidence of that.

4 On appeal, they shift gears and they  
 5 argue for what's in effect a double inference.  
 6 They say that the circumstances suggest that the  
 7 information was confidential and that it was not  
 8 authorized to be disclosed. They then want to  
 9 take a leap and say that, if you know that  
 10 information came from the inside, and that it  
 11 wasn't authorized, you must know about a benefit.

12 JUDGE PARKER: What was the government's  
 13 theory about how you can tell the difference  
 14 between nonpublic material information that you  
 15 can trade on and nonpublic material information  
 16 that you go to jail if you trade on? How did they  
 17 offer that?

18 STEPHEN FISHBEIN: My interpretation  
 19 was, "I know it when I see it." We did not think  
 20 there was any bright line, and that was really  
 21 our point. And I'd like to get into some detail  
 22 on that.

23 You know, they say that the information  
 24 that you can't trade on that came through Goyal  
 25 and Tortora, you know, was quarterly information.

1 Well, the leaks, where there was no dispute that  
 2 there wasn't any personal benefit, that was also  
 3 quarterly information. It was accurate.

4 Let me give some specific examples. We  
 5 proved leaks in this case. And, again, the  
 6 premise here--it was agreed by everyone, the  
 7 witnesses and everyone, that these leaks were not  
 8 in exchange for personal benefit. And yet there  
 9 were specific numbers: gross margin, 18 percent.  
 10 Operating expense, 12 percent.

11 I'll give one ex--one of the leaks was  
 12 an earnings-per-share number of \$0.30 for the  
 13 quarter. Now, Mr. Tortora, the government's star  
 14 witness, said that, when he got this supposedly  
 15 bad information from--on Dell, he never got  
 16 earnings-per-share. He only got the ingredients  
 17 for earnings-per-share. And yet we have an email  
 18 that went to my client saying that a specific  
 19 earnings-per-share number came out of Dell from  
 20 an insider six days before the earnings release.

21 And what that shows is that, if you're  
 22 a portfolio manager and you're receiving  
 23 information that maybe you believe that not  
 24 everybody has, and that it came from the inside,  
 25 that is at least equally consistent with a leak

1 for which there is no personal benefit as there  
 2 being a personal benefit.

3 And I think the law is very, very well  
 4 established that, if facts are equally consistent  
 5 with an innocent explanation and a guilty one,  
 6 that does not support proof or an inference  
 7 beyond a reasonable doubt.

8 And just to put a point on this, I  
 9 would urge the Court to take a look at trial  
 10 transcript page 688. It's Appendix 597. And  
 11 there, again, the star witness, Jesse Tortora,  
 12 who was the conduit for this information, he said  
 13 it was routine. It happened repeated times where  
 14 he would be with management of a company, not  
 15 only investor relations but management,  
 16 executives, anybody, and he would--he said, "I  
 17 got confidential information."

18 He even said, in his words, "It was  
 19 information that I knew they shouldn't disclose."  
 20 And he was asked a very direct question. "Did you  
 21 give a personal benefit for that?" Answer: "No."

22 So, in light of the reality that was  
 23 proved at this case, where inside confidential  
 24 information comes out of a company not for  
 25 personal benefit, but for other reasons, you

1 cannot infer beyond a reasonable doubt that it's  
 2 only for personal benefit.  
 3 Now, I'm sure the government, as they  
 4 did in their brief, they're going to say, "But  
 5 Mr. Newman, you know, paid as a consultant one of  
 6 the intermediaries, Mr. Goyal." That, of course,  
 7 does not establish that the money was then  
 8 transferred from Goyal to the insider. And, in  
 9 fact, in this case, we proved that that was not  
 10 the case.

11 JUDGE HALL: Does it only have to be  
 12 money?

13 STEPHEN FISHBEIN: It does not only have  
 14 to be money, no. The Supreme Court says, you  
 15 know, a reputational benefit that will translate  
 16 into future earnings. The government's theory  
 17 with respect to Rob Ray was that it was career  
 18 advice. But there was zero--zero--testimony that  
 19 Mr. Tortora ever told Newman, or that Newman knew  
 20 in any way, shape, or form, that Goyal was given  
 21 career advice. And I'll come to the sufficiency  
 22 of the benefit in a minute.

23 But I think the point that I want to  
 24 make is that here we know for a fact that Goyal  
 25 did not give any money to Rob Ray. In fact, he

1 didn't even tell Rob Ray that he was getting  
 2 paid.

3 So, certainly the fact that Diamondback  
 4 is employing consultants, which they did on a  
 5 regular course--Goyal's consulting arrangement  
 6 was set up before Rob Ray was in the picture, so  
 7 there was nothing suspicious about it when it was  
 8 originated. So, none of that supports this double  
 9 inference the government is trying to make to the  
 10 effect that you can infer a knowledge of a  
 11 personal benefit.

12 Let me shift now to sufficiency of the  
 13 breach to begin with. And let me start with the  
 14 fact that neither insider here, neither Rob Ray  
 15 nor Chris Choi, the insider at NVIDIA, has been  
 16 charged criminally, civilly, or administratively.  
 17 And, to my knowledge, in the recent spate of  
 18 insider trading cases by the Southern District,  
 19 this is the only one in which the insider was not  
 20 charged with something.

21 And the reason for that is because, as  
 22 Mr. Pomerantz said, it's derivative liability.  
 23 Their whole theory is that the insiders are  
 24 guilty of a terrible crime. And yet they haven't  
 25 charged them. And I respectfully submit that the

1 reason they haven't done that is because, in  
 2 fact, when you really drill down into the  
 3 evidence, there is no sufficient evidence of  
 4 breach or sufficient evidence of benefit.

5 Now, on breach, the government put in  
 6 broad confidentiality policies with Dell and  
 7 NVIDIA saying that all quarterly information is  
 8 confidential. Now, we know that companies didn't  
 9 abide by that, because we see all the evidence of  
 10 leaks.

11 And in this Court's decision in the  
 12 Mahaffy case, the Court made very clear that you  
 13 don't only take into consideration the broad  
 14 corporate policy, but also if the company took  
 15 steps to actually keep the information  
 16 confidential.

17 Now, here we have the benefit that Rob  
 18 Ray's boss, the boss of the insider at Dell,  
 19 testified. And he testified about what's allowed  
 20 and what's not. And he specifically said that, in  
 21 the case of modeling, discussions about analyst  
 22 models, that company insiders are free to sort of  
 23 give hints and help analysts with their models by  
 24 saying, "Your model's too high; your model's too  
 25 low." He said, "We talk about the quarter. We

1 talk about specific line items."

2 Now look at what Sandy Goyal testified  
 3 as to how he got this information from Dell. His  
 4 testimony was very, very clear. He said, "I  
 5 called up Rob Ray. I told him I was working on a  
 6 model. And that's when I got the information. I  
 7 didn't tell him I was trading. I just told him I  
 8 needed help on a model to know whether I'm too  
 9 high or too low."

10 So, if you compare what Sandy Goyal  
 11 said to Rob Ray, and they were compared against  
 12 what Rob Ray's boss said was permissible--and  
 13 this is transcript page 2926, which the  
 14 government also cites. But I respectfully submit  
 15 that those--that page and the next one fully  
 16 support our position. Rob Williams said he was  
 17 authorized to talk to an analyst about the models  
 18 and whether the assumptions and their numbers  
 19 were too high or too low.

20 I see I've run out of time, but I'll  
 21 save the rest for rebuttal.

22 JUDGE HALL: Thank you, Mr. Fishbein.  
 23 You've reserved two minutes. Ms. Apps?

24 ANTONIA APPS: May it please the Court,  
 25 I represent the government on this appeal and I

1 represented the government below. The District  
 2 Court properly instructed the jury that they had  
 3 to find the defendants knew--  
 4 JUDGE PARKER: Well, before you get into  
 5 that, I have something else to ask you. I looked  
 6 at the--some of the docket sheets in the records  
 7 and the indictments involving some of the players  
 8 in this case. So, Adondakis was indicted before  
 9 Judge Keenan. Tortora was indicted before Judge  
 10 Pauley; Goyal, I believe, before Judge Forrest,  
 11 and then Martoma before Judge Gardephe. And then,  
 12 finally, we get to the men of the cases before--  
 13 the defendants, who were before Judge Sullivan.  
 14 Can you--and I notice a pattern of when  
 15 you indict individuals and when you supersede.  
 16 Can you allay my concern that what the government  
 17 did was move these indictments around until they  
 18 got up before--they could get their main case  
 19 before their preferred venue, which is Judge  
 20 Sullivan?  
 21 ANTONIA APPS: Your Honor, it is not  
 22 uncommon for the U.S. Attorney's office, when an  
 23 individual cooperator is going to plead guilty  
 24 ahead of time, to put it in the wheel and wheel  
 25 out, which is what we did with every cooperator

1 before the four defendants were charged in  
 2 January of 2012.  
 3 At that time, again, it went into the  
 4 wheel. And the judge that was drawn from the  
 5 wheel was Judge Sullivan. And that is the judge  
 6 who presided over the case. It is quite common  
 7 for the office to, when they have cooperating  
 8 witnesses, simply to put them in the wheel as  
 9 they did in this case.  
 10 JUDGE PARKER: Then, once you got Judge  
 11 Sullivan, you superseded with Mr. Steinberg.  
 12 ANTONIA APPS: We did, Your Honor. That,  
 13 I think, was a different situation. The analyst  
 14 who was the main cooperator against the  
 15 subsequent defendant, Mr. Steinberg, was an  
 16 analyst who was part of the conspiracy and who  
 17 was charged initially and wheeled out to Judge  
 18 Sullivan.  
 19 There were a whole host of reasons as  
 20 to why it made sense to supersede Mr. Steinberg  
 21 into the existing case before Judge Sullivan, not  
 22 the least of which was judicial efficiencies, in  
 23 that Mr. Sullivan had--Judge Sullivan, I beg your  
 24 pardon, had presided over not only a course of  
 25 the pretrial, enormous amount of pretrial

1 litigation, but of course a six-week trial in  
 2 which the issues were the same.  
 3 Mr. Steinberg was alleged to be part of  
 4 the same conspiracy that was tried in front of  
 5 Judge Sullivan. And many of the witnesses were  
 6 the same. Jesse Tortora, a cooperating witness,  
 7 testified in both trials, as did the corporate  
 8 witnesses. It was a very similar--the evidence  
 9 that the government put forward in both cases  
 10 involved a lot of overlapping witnesses, a lot of  
 11 overlapping testimony, and common issues of law  
 12 and fact.  
 13 JUDGE WINTER: Were you trying these  
 14 people together? You're talking about  
 15 efficiencies that are a benefit [UNINTEL] trial.  
 16 Was there any attempt to try Steinberg with  
 17 somebody else? There's no [UNINTEL PHRASE].  
 18 ANTONIA APPS: There was not enough time  
 19 to try Steinberg with the two defendants Newman  
 20 and Chiasson who were tried--  
 21 JUDGE WINTER: Where are the  
 22 efficiencies then?  
 23 ANTONIA APPS: Your Honor, the same  
 24 judge who has presided over the trial, and which  
 25 involved--was a lengthy, complex trial for six

1 weeks, presided over the same issues and had--  
 2 JUDGE WINTER: I'm not an expert. I've  
 3 been connected with the Second Circuit for almost  
 4 all of my professional life a lot of [UNINTEL  
 5 PHRASE] there were issues that were United States  
 6 against Rosenberg, where the government marked a  
 7 criminal case as related.  
 8 And at some point, the Southern  
 9 District changed the rule there, which you can  
 10 mark a criminal case related, and thereby pick  
 11 your judge. It caused a great deal of controversy  
 12 in the Rosenberg case. Now you're trying--you're  
 13 doing the same thing by superseding the  
 14 indictments.  
 15 So, under the Rosenberg case, the  
 16 finding was there was a witness in common, which  
 17 in the prior case Judge Kaufman had trial  
 18 [UNINTEL] the Rosenbergs. But you're just  
 19 [UNINTEL] the rule, right?  
 20 ANTONIA APPS: I respectfully disagree,  
 21 Judge Winter. We did--I'm not familiar with the  
 22 case that you mentioned, but there was not just  
 23 one overlapping witness. There were numerous  
 24 overlapping witnesses. This was the same case.  
 25 There were certain efficiencies that,

1 to put it into--to supersede Mr. Steinberg into  
2 the existing case, which, of course, the  
3 defendants had not at that time been sentenced,  
4 it is--the United States Attorney's Office  
5 occasionally does exactly this.

6 Of course, Judge Sullivan, who was  
7 presiding, indicated on the record that he had  
8 consulted with Chief Judge Preska about whether  
9 the supersede--it was appropriate to proceed on  
10 the superseder with Michael--the defendant  
11 Michael Steinberg, and ultimately ruled that it  
12 was appropriate under the local rules to do so.

13 JUDGE PARKER: And it was just  
14 coincidence that the judge--these cases [UNINTEL]  
15 sheer coincidence was the one judge on this list  
16 who had bought into the government's theory on  
17 knowledge of personal gain.

18 ANTONIA APPS: Your Honor, first of all,  
19 if I may--

20 JUDGE PARKER: --All the other judges on  
21 the list had rejected it, and the government had  
22 given it up in the case before Judge Gardephe.

23 ANTONIA APPS: I'm not sure I  
24 understand, Judge Parker, what you mean by  
25 "list." But in fact there were other judges in

1 cases that the defendants routinely in large  
2 ignore: Judge Keenan in Thrasher.

3 There was a case in Musella where it's  
4 clear that the judges in those cases held that  
5 the government did not need to prove, for  
6 purposes of establishing tippee liability, that  
7 the defendant knows the circumstances of the  
8 initial--of the breach by the original tipper.  
9 And so, it is, respectfully, not true that Judge  
10 Sullivan is out there alone.

11 Also, just to address a question that  
12 Your Honor, Judge Parker, raised with respect to  
13 Martoma, of course, Martoma was a case where the  
14 defendant was the first-level tippee who gave  
15 their benefit to the tipper. And the fact that  
16 the government acquiesced in an instruction and  
17 thereby avoided an appellate issue should not be  
18 seen as in any way a signal that the government  
19 concedes its position.

20 And clearly, it makes sense for  
21 District Judges mindful of not having to retry  
22 cases that, when an issue is pending before the  
23 Circuit, to adopt a conservative jury  
24 instruction--

25 JUDGE PARKER: But the conservative

1 instruction was the opposite of what you were  
2 insisting in this case was required by the law.

3 ANTONIA APPS: But--

4 JUDGE PARKER: And so, I don't  
5 understand why anyone is doing a service, I mean  
6 to a jurist, where it looks like the government  
7 is taking completely inconsistent views on  
8 critical information, a critical point of law--  
9 and you can see how important it is because we're  
10 all concerned about it--for some--

11 ANTONIA APPS: Wait--

12 JUDGE PARKER: Very difficult to  
13 understand tactical benefit.

14 ANTONIA APPS: Your Honor, we--

15 JUDGE PARKER: Ms. App.

16 ANTONIA APPS: Sorry, Judge Parker. But  
17 we often take--accept a burden that is higher in  
18 a particular case when there's a pending issue  
19 for appeal.

20 For example, in this very case, the  
21 jury was instructed that they had to find that  
22 the information was a substantial factor as a  
23 basis for trading, notwithstanding that, on  
24 appeal in the Rajatnaram case, not decided at the  
25 time of the Newman trial, the government had

1 taken the position that it need only be a factor.  
2 And so, we often do that.

3 JUDGE PARKER: You can understand how  
4 we're--or at least I'm concerned that the  
5 government's position on these key points of law  
6 seems to be varying according to which judge  
7 you're talking to.

8 ANTONIA APPS: I respectfully disagree  
9 that that is the way it works, Your Honor. We  
10 selectively--we may select which issues to  
11 litigate in any particular case. Why would--it  
12 would make no sense to insist on a jury  
13 instruction in Martoma when the defendant is the  
14 one who paid the tipper. And that is--it is  
15 clearly established that there would be no reason  
16 to take that issue on appeal.

17 JUDGE PARKER: [UNINTEL PHRASE] on the  
18 point of law, you'll no doubt win on appeal.

19 ANTONIA APPS: Well, and--

20 JUDGE PARKER: Right?

21 ANTONIA APPS: But we often don't. We  
22 often are risk-averse in these situations.  
23 There's an enormous amount of resources that go  
24 into litigating a particular case.

25 There are sometimes--for some cases, we

1 select an issue to take up on appeal that we may  
2 not do so in another case, just as I indicated we  
3 accepted the higher burden on the known  
4 possession of information in this very case,  
5 notwithstanding in Rajatnaram, that preceded it,  
6 we had opted to challenge the lower burden.

7 If I may, Your Honor, though, at the  
8 end of the day, it does turn on what the answer  
9 to the fundamental underlying legal question is.  
10 And we think that the District Court properly  
11 instructed the jury that they had to find the  
12 defendants knew the information was disclosed in  
13 breach of a duty of trust and confidence.

14 And the evidence overwhelmingly  
15 supported that finding. The defendants were told  
16 they were receiving secret earnings numbers from  
17 company insiders before those numbers were  
18 released to the public, numbers which were at  
19 times accurate to the decimal point.

20 They received those numbers quarter  
21 after quarter after quarter. And they pressed  
22 their analysts to get the updates from the  
23 company insiders. They were told that the  
24 information originated from individuals,  
25 employees inside the company with access to the

1 internal rolled-up numbers. And, while Newman  
2 seeks to--

3 JUDGE PARKER: [UNINTEL] is this  
4 argument pointed in the direction that, if the  
5 charge were inaccurate, the error would be  
6 harmless?

7 ANTONIA APPS: Your Honor, we certainly  
8 make the harmless error analysis. And, in  
9 particular, on that point, Newman paid Goyal  
10 \$175,000 for the information. There is absolutely  
11 an inference that he knew Goyal, who was getting  
12 the information from someone inside the company,  
13 understood that that employee was receiving some  
14 kind of benefit. Newman knew that the--Goyal's  
15 contact, [UNINTEL]--

16 JUDGE PARKER: How are we to--help me  
17 understand: if this information--if information  
18 concerning Dell's earnings is routinely leaked  
19 and can be traded on, how do we know--what's the  
20 principle--

21 ANTONIA APPS: I--

22 JUDGE PARKER: That criminalizes some  
23 information, some of this information, and makes  
24 virtually indistinguishable information  
25 innocuous?

1 ANTONIA APPS: I'm glad you brought that  
2 up, Judge Parker, because the arguments on the  
3 leaks are just plain wrong on the facts. And  
4 Tortora--to answer some of the questions, the--  
5 what the company--Tortora testified that Dell  
6 didn't leak the top-level earnings numbers.

7 You asked Mr. Pomerantz, I believe,  
8 "How did the information that the insiders like  
9 Rob Ray provided differ from the information that  
10 the companies disseminated to the public in an  
11 authorized fashion?" And they differed markedly.

12 Companies routinely talk about general  
13 business trends, long-term outlook. Sometimes  
14 they use numbers. But sophisticated market  
15 professionals like Chiasson and Newman know full  
16 well that that is not the same as receiving the  
17 revenue or gross margin number before it is  
18 released in that quarterly announcement.

19 And we went through in our briefs and  
20 we outlined why those claims that the defendants  
21 made were wrong. And, in fact, they, in some  
22 sense, an acknowledgement of their own weaknesses  
23 when they feel they need to cite information  
24 outside the record in order to support that  
25 claim.

1 JUDGE HALL: So, was the [UNINTEL]--

2 ANTONIA APPS: And it wasn't our--beg  
3 your pardon, Judge Hall.

4 JUDGE HALL: Is the argument that the  
5 nature of the information, as you've described  
6 it, the specificity and the granularity of it,  
7 somehow is proof that it was fraudulently leaked?

8 ANTONIA APPS: That is one of the  
9 factors and one of the elements in this  
10 particular case, because, in addition to those  
11 factors--and, by the way, it was quarter after  
12 quarter after quarter, inconsistent with any  
13 notion of accident or mistake by the original  
14 tipper. The defendants pressed for that  
15 information. They paid for the information.

16 JUDGE PARKER: Help me understand how  
17 that theory is at all [UNINTEL], because it seems  
18 to me that it turns most fundamentally on the  
19 sophistication and the experience of the tippee.  
20 So, if I've been in the business 15 minutes,  
21 there's a different criminal standard than if  
22 I've been in the business for 15 years, because  
23 I'm a relatively young analyst; I don't fully  
24 perceive the significance of this.

25 It may sound--you know, it may be a

1 little bit unusual, but it doesn't seem criminal  
2 to me because it's just like the information  
3 that's been flowing over the Autex or flowing  
4 over the Bloomberg or what have you all the time.

5 But then, if I've been in the business  
6 for 15-20 years, I'm a supervisor, I'm a--you  
7 know, I'm a managing director or an officer,  
8 there seems to be a different standard, a  
9 different criminal exposure.

10 I don't know how we can operate--I  
11 don't know how we can really go with a regime  
12 like that, because, at the end of the day, what--  
13 if you follow your position to its logical  
14 conclusion, at the end of the day, the person  
15 who's likely to be guilty is the person who the  
16 government decides to indict.

17 ANTONIA APPS: Your Honor, first of all,  
18 sophistication is clearly not a one-size-fits-  
19 all--it's not the only thing that matters. But  
20 courts have repeatedly recognized--

21 JUDGE PARKER: I was taking--I was  
22 teeing off on the answer you gave us.

23 ANTONIA APPS: It is but one factor. And  
24 courts have repeatedly recognized that the  
25 sophistication of the defendant is a factor to

1 take into account. It was taken into account in  
2 Obus. It was taken into account in Judge Winter's  
3 decision in Libera. It is a factor that's  
4 continually taken into account.

5 In this case, though, that was just one  
6 small factor. We didn't even--we barely even  
7 touched on sophistication in closing arguments.  
8 What we focused on were the facts, the facts of  
9 the payments, the fact that Newman was told it  
10 came from a company insider who was disclosing it  
11 at nights and on weekends, the fact that Chiasson  
12 directed his analysts to conceal the source of  
13 the information from official company reports.

14 And, by the way, you know, Mr. Fishbein  
15 talked about nights and weekends not being  
16 unusual. But if you look at the exhibits the  
17 government put into evidence of the calls,  
18 Government's Exhibits 26 and 27, for a two-year  
19 period, there are 68 calls between Ray and Goyal,  
20 and all save one was at night or on a weekend.

21 And just also there were a couple of  
22 matters that the--Judge Parker, that you brought  
23 up in--

24 JUDGE PARKER: Let me ask you this. Why  
25 is it, on the issue of whether the tippee's got

1 to know the personal benefit--explain why Judge  
2 Sullivan is right and all of his half-dozen  
3 colleagues are wrong.

4 ANTONIA APPS: Your Honor, as this  
5 Court--

6 JUDGE PARKER: Help me understand that.

7 ANTONIA APPS: Yes. Your Honor, at this--  
8 -as this Court held in Obus, and it is consistent  
9 with Dirks; this Court held it in Libera; it has  
10 held it for decades: the elements of tippee  
11 liability are different from the elements of  
12 tipper liability.

13 And what the Court of Appeals in Obus  
14 held was, in order to establish tippee liability--  
15 -and this stems back to Libera--that the tipper  
16 breached a fiduciary duty and that the tippee  
17 knew of the breach of the fiduciary duty. And  
18 that is exactly what the government proved in  
19 this case. And, were it otherwise, were there a  
20 contrary rule--

21 JUDGE PARKER: The SEC itself takes the  
22 position that Dirks requires knowledge of  
23 personal gain.

24 ANTONIA APPS: I don't believe the SEC  
25 has ever taken the position that downstream

1 tippee requires knowledge of a personal gain.  
2 And--but--Your Honor, by the way, since I think  
3 what you're alluding to is the defendant's  
4 argument about Reg FD, and the [UNINTEL], that's  
5 another point, to come back to the leaks.

6 It's clear that they had no faith--the  
7 defendants had no faith in the record, which was  
8 rejected by the jury, as to whether these  
9 companies leaked information, because they  
10 continually resort to references outside of the  
11 record, such as the Regulation FD and its  
12 enacting statutes.

13 But--and one more point on harmless  
14 error, Your Honor. With respect to NVIDIA, all  
15 you need to do is look at Government Exhibit 806,  
16 which is in the record 2109. Mr. Newman received  
17 an email the day before an earnings announcement  
18 for NVIDIA which said this information,  
19 information correct to the decimal point, was  
20 coming from an accounting manager at NVIDIA  
21 through a friend of mine. That right there is  
22 benefit under Jiau.

23 JUDGE PARKER: What's the benefit?

24 ANTONIA APPS: Friendship is a benefit  
25 under Jiau.

1 JUDGE PARKER: Friendship is the  
 2 benefit?  
 3 ANTONIA APPS: And so, that is count  
 4 five for Newman and count 10 for Chiasson. And  
 5 Chiasson--Sam Adondakis testified, at transcript  
 6 1878-79, that there was benefit--that the--excuse  
 7 me, that the information came through a friend.  
 8 Right there is benefit.

9 JUDGE PARKER: How does career advice--  
 10 what's--explain--help me understand the  
 11 government's career advice.

12 ANTONIA APPS: Career--the benefit that  
 13 the government actually proved at trial, the  
 14 career advice, was far higher than the benefit  
 15 that was found sufficient in Jiau.

16 In Jiau, a tipper joined a--was  
 17 recruited to join an investment opportunity, an  
 18 investment club, and didn't in fact receive a  
 19 single tip in that investment club. And the Court  
 20 of Appeals held that the mere opportunity to  
 21 receive a tip in the future--here we had far  
 22 more, helping with the resume--

23 JUDGE PARKER: [UNINTEL] Ms. Apps, what  
 24 you should do is stand closer to the microphone  
 25 and keep your voice up. And that way, arguments--

1 this is just hypothetical because you're doing a  
 2 fine job--because that way, your arguments go  
 3 better. Is that career advice?

4 ANTONIA APPS: I'm not sure that that's  
 5 good career advice, Your Honor. But, in this  
 6 case--

7 JUDGE HALL: Well, don't insult him now  
 8 that he's giving you advice.

9 ANTONIA APPS: Apparently I was talking  
 10 too loudly. But in this case, there was so much  
 11 more. And it was assisting with resumes, putting  
 12 good words in, sending across stock pitches,  
 13 which would be used in investment interviews,  
 14 sending a resume to a recruiter. It is clear that  
 15 it well passes the Jiau--

16 JUDGE PARKER: I'm sorry. I apologize  
 17 for being facetious. But the underlying problem  
 18 is that--and this may be, you know, our Court's  
 19 problem and not yours. But the benefit standard  
 20 is so soft. You get cases maybe like this one,  
 21 where it just doesn't seem to amount to anything.

22 ANTONIA APPS: In which case, it makes  
 23 no sense to impose--to have liability turn--of  
 24 the downstream tippee turn on whether they  
 25 received a benefit. And this point--this is a

1 really important point, because--

2 JUDGE WINTER: Excuse me, on this point,  
 3 isn't it the case that the tipper who  
 4 deliberately leaks information always find that  
 5 it's in the tipper's self-interest to do so? And  
 6 that seems to be the government's position, the  
 7 act itself. That will be the next case, the act  
 8 itself shows the tipper thought the tipper was  
 9 getting some benefit.

10 ANTONIA APPS: That is not the  
 11 government's position, and certainly not the  
 12 facts of this case, where the defendants pressed  
 13 for the information themselves and the tipper  
 14 disclosed it three to five times a quarter for  
 15 eight quarters in a row.

16 JUDGE WINTER: [UNINTEL PHRASE] the  
 17 defendants might not have to press for it if they  
 18 were actually bribing to get it.

19 ANTONIA APPS: But they were bribing the  
 20 first-level tippee to get it.

21 JUDGE WINTER: [UNINTEL PHRASE]

22 ANTONIA APPS: The--

23 JUDGE WINTER: Then, I mean, we're  
 24 [UNINTEL] Dirks. If you read the Dirks opinion  
 25 fairly it uses the word "guiding principle," has

1 to establish a guiding principle for people who  
 2 have--who trade all the time.

3 ANTONIA APPS: And with that--

4 JUDGE WINTER: [UNINTEL] nonpublic  
 5 information. It wants to protect analysts. And,  
 6 unless there's some kind of concrete,  
 7 demonstrable benefit coming to a tipper, there's  
 8 no guiding principle at all. The tipper will  
 9 always find it in his or her self-interest to be  
 10 doing what they're doing. It may be misguided,  
 11 but they'll find it in there.

12 ANTONIA APPS: Your Honor, the guiding  
 13 principle be that when--that the government  
 14 should prove knowledge of a breach of trust. When  
 15 you have a case like this one, when that's  
 16 precisely what the government proved, because  
 17 Newman paid for the information--you talk about  
 18 bribing? Newman bribed the first-level tippee.  
 19 The clear inference from that is that the  
 20 original tipper was receiving some kind of  
 21 benefit as well. And--

22 JUDGE HALL: Could you--

23 ANTONIA APPS: It's a really important  
 24 point, too, members of the Court and Judge  
 25 Winter, Mark Pomerantz opened his argument by

1 saying that there was no evidence that the tipper  
 2 knew what information--what the benefit was, so  
 3 the downstream tippees didn't know what the  
 4 benefit was that the tipper received.  
 5 But as I understand the defendants,  
 6 they're not even abdicating that the downstream  
 7 tippee needs to know the kind of the benefit,  
 8 whether it's chocolates or flowers, only that a  
 9 benefit is received. And they make the same error  
 10 in their briefs.  
 11 In the reply brief, at pages 24-25 for  
 12 Chiasson's reply brief, it claims that Adondakis  
 13 did not know whether the initial tipper benefit,  
 14 and therefore Chiasson didn't know whether the  
 15 initial tipper benefit--and again, I think that  
 16 goes potentially to--  
 17 JUDGE WINTER: Can I ask a couple  
 18 questions going through your charge, the legal  
 19 issues and putting aside the facts--? What does  
 20 the government, in the case of the derivative  
 21 tippee, in a classical insider trading case--I'm  
 22 not interested misappropriation cases where a  
 23 theft [UNINTEL] crime. In the cases you cited  
 24 there was no issue as to whether or not they knew  
 25 about the theft, they knew about it.

1 fairly understood, means knowledge of fraud.  
 2 JUDGE WINTER: [UNINTEL PHRASE] I  
 3 understand you feel there was much more here. I  
 4 was talking about the legal instructions.  
 5 [UNINTEL PHRASE] the instructions [UNINTEL]  
 6 delivered by Judge Sullivan, the government's  
 7 proof would be sufficient for proof of what I  
 8 just said?  
 9 ANTONIA APPS: I'm not sure if we would  
 10 agree that the "probably came from the company"  
 11 is sufficient. It depends on the case. But I  
 12 think it is critical to show that the defendants  
 13 knew the information was sourced to the company  
 14 and came directly from company insiders, which  
 15 was true of every tip in this case, unlike the  
 16 example--  
 17 JUDGE PARKER: [UNINTEL]  
 18 ANTONIA APPS: That Mr. Fishbein--sorry.  
 19 JUDGE PARKER: [UNINTEL] information is  
 20 going to come from Dell. So, that's pretty self-  
 21 evident.  
 22 ANTONIA APPS: Not necessarily. There--  
 23 it's not necessarily true that it comes from  
 24 Dell, and that there could come from--as an  
 25 argument the defendants made was that this came

1 What does the government have to prove,  
 2 beyond the fact that a derivative tippee, a  
 3 downstream tippee, let's say four levels down,  
 4 has to believe that the information is nonpublic,  
 5 in the sense that it's more accurate to the  
 6 [UNINTEL], that the pricing [UNINTEL] does not  
 7 accurately reflect the information this [UNINTEL]  
 8 tippee has?  
 9 Second, go through [UNINTEL] fact  
 10 [UNINTEL] that [UNINTEL] material. Third, that  
 11 the numbers probably came from the company, and  
 12 that the company had a confidentiality policy  
 13 regarding the information. Under the legal theory  
 14 and instructions [UNINTEL] prove more than that?  
 15 ANTONIA APPS: Well, Your Honor, the  
 16 government has to prove knowledge of the breach.  
 17 And here, of course, the defendants were told  
 18 that it came from inside the company.  
 19 JUDGE WINTER: Knowledge of the breach  
 20 is that it most probably came from the company  
 21 and the company had some confidentiality policy.  
 22 ANTONIA APPS: It depends on--I mean,  
 23 that may or may not be sufficient in the  
 24 circumstances. Here, of course, there was much  
 25 more. But knowledge of the breach, I think,

1 from some kind of modeling or sell-side analyst.  
 2 But there was direct evidence that this  
 3 information came from Dell of every tip that came  
 4 from the Dell insider. And for NVIDIA, the same  
 5 is true. Unlike the example that Mr. Fishbein  
 6 gave, where he talks about the \$0.30, that wasn't  
 7 sourced.  
 8 JUDGE WINTER: [UNINTEL PHRASE] in  
 9 regard to [UNINTEL], I take it my description of  
 10 what you--what these instructions required as  
 11 proof is accurate?  
 12 ANTONIA APPS: Again, I think that we  
 13 view it as a higher burden that we actually had  
 14 from down--the District Court below.  
 15 JUDGE WINTER: How is that?  
 16 ANTONIA APPS: Again, I think that, when  
 17 you have to show that it comes--the defendants  
 18 know that the downstream tippee--excuse me, the  
 19 defendants know that the tipper breached a  
 20 fiduciary duty of trust or duty of trust and  
 21 confidence, I think you have to show more than it  
 22 probably came from the company.  
 23 JUDGE WINTER: What do you [UNINTEL]  
 24 that it came from the company? That he believes  
 25 it came from the company, or most probably came

1 from the company, company had a confidentiality  
2 policy?

3 ANTONIA APPS: More than a  
4 confidentiality policy. They have to show--we  
5 have to show that, in fact, it was adhered to.  
6 And the defendants argued, transcript 3815, that  
7 it wasn't enough to show that there was policy  
8 but there had to be a breach in fact.

9 And when companies--what--the argument  
10 they made to the jury, when the companies  
11 selectively disclose, there's no breach, and they  
12 didn't make--they weren't successful.

13 JUDGE WINTER: But on legal--I'm talking  
14 about legal instructions and you're talking about  
15 the proof.

16 ANTONIA APPS: I'm simply saying I think  
17 the burden is--that we actually had in the jury  
18 charge was slightly higher than as articulated by  
19 Your Honor. I don't think we need--we ultimate--  
20 at the end of the day, no Court in this Circuit--  
21 and, respectfully, Obus set forth the legal  
22 elements that we need to prove for tippee  
23 liability.

24 And so, those separate elements--and  
25 they specifically addressed the level of

1 knowledge in order to be a participant after the  
2 fact, and held that we only need to know of the  
3 breach of duty, because that is synonymous with  
4 fraud, as was shown in this case. Just to this  
5 point of--

6 JUDGE PARKER: So, why does the Supreme  
7 Court, in Dirks, give us a touchstone which says,  
8 "This is how you prove breach, actionable  
9 breach"?

10 ANTONIA APPS: For purposes of tipper  
11 liability, one must prove benefit. But, as the  
12 Seventh Circuit recognized in Evans, at page 324,  
13 despite the derivative nature of the liability,  
14 tipper and tippee liability differ. They have  
15 different elements. That is fundamental, that  
16 they have different elements. Every Court that  
17 has interpreted Dirks has found separate elements  
18 for tipper and tippee liability.

19 And Dirks itself failed to take the  
20 opportunity the defendants so wish they had of  
21 saying that knowledge by the tippee of benefit is  
22 required, notwithstanding Dirks addressed that  
23 you have to have benefit for tipper. It did not  
24 go additionally and say you have to have  
25 knowledge of the benefit. It said only knowledge

1 of the breach of trust.

2 One point--this is very--the--I want to  
3 come back to the chocolates and flowers point,  
4 because, in the brief, at pages 24-25, in saying  
5 that--

6 JUDGE WINTER: Doesn't Dirks say that  
7 the breach of trust involves getting a benefit?

8 ANTONIA APPS: For purposes of tipper  
9 liability, Your Honor. But, you know, the  
10 element--and O'Hagan talked about what it is.

11 Although a misappropriation case, O'Hagan talked  
12 about the fact that the deception was in the--

13 JUDGE PARKER: Judge Winter's--

14 ANTONIA APPS: Sorry, Judge Winter. I  
15 didn't see.

16 JUDGE WINTER: I'm sorry.

17 ANTONIA APPS: I apologize. I couldn't  
18 see you talking there.

19 JUDGE WINTER: Oh, no, don't apologize.  
20 Talk about what you're talking about.

21 ANTONIA APPS: Did you have a question,  
22 Your Honor? I--

23 JUDGE WINTER: No. [UNINTEL]

24 ANTONIA APPS: Okay. To this point, they  
25 say that Adondakis didn't know whether there was

1 a benefit received. But, in fact, the question  
2 in--at the appendix cite that they put in there,  
3 at 1190, was whether Adondakis knew what the  
4 tipper received, a fundamentally different  
5 proposition, and not even one advanced--

6 JUDGE PARKER: [UNINTEL PHRASE] the  
7 government is resisting so much on the  
8 proposition that the person you're trying to  
9 convict has to know of the breach?

10 Because, you know, there--we sit in the  
11 financial capital of the world. And the amorphous  
12 theory that you have, that you've tried this case  
13 on, gives precious little guidance to all of  
14 these institutions, all of these hedge funds out  
15 there who are trying to come up with some bright  
16 line rules about what can and what cannot be  
17 done.

18 And your theory leaves all of these  
19 institutions at the mercy of the government,  
20 whoever the government chooses to indict, you  
21 know, how big the fund is. You know, it's a  
22 billion-dollar fund, so the gain was \$50 million,  
23 it looks huge, and the jury will--eyes will  
24 [UNINTEL] over and so forth.

25 Isn't the whole community, the legal

1 community and the financial community, served by  
2 having a rule that says the person you all want  
3 to send to jail has to know of the benefit?

4 ANTONIA APPS: Your Honor, the bright  
5 line that the legal community currently has, and  
6 has had since the 1990s, is that the defendant,  
7 the downstream tippee, know of the breach of  
8 trust. That is the bright line that the country--  
9 that New York has been operating under for  
10 decades, and it is the appropriate bright line in  
11 this case. To apply another--

12 JUDGE HALL: So, what [UNINTEL] the  
13 breach of trust?

14 ANTONIA APPS: For purposes of tipper  
15 liability--

16 JUDGE HALL: [UNINTEL]

17 ANTONIA APPS: For purposes of tipper  
18 liability, the government must establish that--

19 JUDGE HALL: What are the elements of  
20 breach of trust that the downstream tippee has to  
21 know?

22 ANTONIA APPS: That the--

23 JUDGE HALL: And I will agree, it was  
24 charged-- you have to know there was a breach of  
25 trust.

1 ANTONIA APPS: That--

2 JUDGE PARKER: How does the government  
3 prove the breach of trust that the downstream  
4 tippee has to know?

5 ANTONIA APPS: That the disclosure of  
6 the information was unauthorized in contravention  
7 of the policies and the way they operate in  
8 principle, as written and in fact. And so, the  
9 argument that the defendants make on appeal, that  
10 they unsuccessfully made below, that a company  
11 like Dell leaks everywhere in selective  
12 disclosures, that goes to whether or not the  
13 company actually insists that the information is  
14 not disclosed.

15 It wasn't proved--the government proved  
16 that Dell didn't commit those kinds of  
17 disclosures, didn't disclose the topline earnings  
18 numbers. Yes, Dell talks to investors, all  
19 investors, about low-level information. But very  
20 different from the high-level information that  
21 was in fact disclosed in this case. And that is  
22 critical.

23 The defendants attempted to confuse the  
24 jury by saying that all this information was  
25 leaked, and it is--it was not. And we rebut each

1 of those points in our briefs, Your Honor.

2 JUDGE: Now--

3 ANTONIA APPS: But fundamentally, the  
4 tips here were so--the defendants were told,  
5 "This information came from company insiders." It  
6 was, again, information that was accurate to the  
7 decimal point.

8 And an example--just an example of the--  
9 to show that this information was not leaked, on  
10 the quarter in question that is part of the  
11 substantive, August of 2008, when Dell released  
12 its earnings numbers, the stock plummeted by 14  
13 percent in a single day based on that  
14 information, showing that there wasn't a  
15 selective disclosure, as the defendants contend,  
16 of the information.

17 There was a couple of other points I  
18 wanted to address. I know I'm--I see that I'm out  
19 of time. But fundamentally, Your Honor, if I may  
20 just say that, you know, Obus set forth the  
21 elements of tippee liability, which differ from  
22 the elements of tipper liability.

23 JUDGE WINTER: Wasn't Obus a  
24 misappropriation case?

25 ANTONIA APPS: It was, but it explicitly

1 held that it applied to misappropriation and  
2 classical. And, by the way, Your Honor, the  
3 Courts have not--Obus was not alone in that,  
4 because Dirks, which was a classical case, has  
5 often been looked at as creating the elements for  
6 tippee liability.

7 It only makes sense to harmonize that  
8 and have those elements of tippee liability be  
9 the same for classical and for misappropriation.  
10 Otherwise, we're left with a rule--to come back  
11 to Judge--

12 JUDGE WINTER: Well, that's fine. That's  
13 fine. Except that, in misappropriation cases, the  
14 crime [UNINTEL PHRASE] of the information  
15 [UNINTEL] by the tipper.

16 ANTONIA APPS: I--

17 JUDGE WINTER: The tipper is not the  
18 owner of the information. They're not an owner or  
19 agent of the owner. And no one ever said in a  
20 misappropriation case that the tippee doesn't  
21 have to know of the misappropriation or the  
22 theft.

23 There's no such holding. There are  
24 cases that don't mention that because it's  
25 obvious that it occurred. Libera. I wrote one of

1 them. Libera was a case of the--where the  
2 defendant made money press [UNINTEL] advance  
3 copies of Business Week. [UNINTEL PHRASE] There  
4 was no issue as to whether the defendant knew of  
5 the misappropriation.

6 ANTONIA APPS: Right. There certainly  
7 was issues about the defendant's knowledge that  
8 were raised in Obus, of course, Your Honor. And  
9 fundamentally, to have a different rule for  
10 downstream tippee liability comes back to Judge  
11 Parker's question about a concern for having a  
12 bright-line rule, because you cannot achieve a  
13 bright-line rule if the downstream tippee  
14 liability rule is different for misappropriation  
15 versus classical cases.

16 Let's just take--if you posit slightly  
17 different facts here, if, instead of Ray  
18 intentionally breaching by disclosing the numbers  
19 to Goyal, if you'd posited that Goyal duped Ray,  
20 the--not even the defendants would claim they had  
21 a leg to stand on to argue that, as downstream  
22 tippees, they would be required to know of any  
23 benefit to the original tipper.

24 And so, that is--in order to have a  
25 uniform rule, as Obus recognized, explicitly

1 saying it applies to classical and  
2 misappropriation--

3 JUDGE HALL: Thank you.

4 ANTONIA APPS: You should have a set of  
5 -oh, [UNINTEL]. Thank you.

6 JUDGE HALL: Thank you very much, Ms.  
7 App.

8 ANTONIA APPS: Thank you, Your Honor.

9 JUDGE HALL: Mr. Pomerantz?

10 MARK POMERANTZ: First, I'd like to go  
11 back to what the District Court actually did  
12 require the government to prove here in terms of  
13 tippee knowledge. This is from the charge, at  
14 page 4033 of the transcript.

15 The defendant's knowledge was, as  
16 stated by the Court, "He must have known that it  
17 was originally disclosed by the insider in  
18 violation of the duty of confidentiality." That's  
19 what Judge Sullivan charged the jury. And the  
20 government's position is--

21 JUDGE PARKER: Is that all he charged  
22 them?

23 MARK POMERANTZ: Well, on the critical  
24 point of what a tippee has to know, the operative  
25 language is "a violation of the duty of

1 confidentiality." So, the government's position  
2 is: it's okay; all you need is a knowledge by the  
3 defendant that there has been a breach of  
4 confidentiality.

5 And look at the slipperiness of this  
6 slope. The government concedes, because it has  
7 to, because the Supreme Court has said it time  
8 and time again, it's okay, it's legal, to trade  
9 on material nonpublic information that comes from  
10 an issuer. Dirks, after all, traded on material  
11 nonpublic information that he knew had come from  
12 an issuer, Seacrist at Equity Funding.

13 The notion of nonpublic information is,  
14 I would submit--it's the same as confidential  
15 information. Indeed, the government proves  
16 information is nonpublic by showing the steps the  
17 company took to maintain confidentiality.

18 So, the government's posture is: it's  
19 okay to trade on material and confidential  
20 information known to come from an issuer, but you  
21 go to jail if you trade and you know there's been  
22 a breach of confidentiality. That is a  
23 distinction without a difference.

24 And, in any case, the bright line that  
25 Your Honor is quite right, people in this

1 business, like Chiasson and Newman, are entitled  
2 to--the bright line is the line that was set by  
3 the Supreme Court in Dirks. In Dirks, the Court  
4 put it in language that is just unequivocal:  
5 "Whether disclosure is a breach of duty therefore  
6 depends in large part on the purpose of the  
7 disclosure."

8 The test is whether the insider  
9 personally will benefit, directly or indirectly,  
10 from the disclosure. Absent some personal gain,  
11 there has been no breach of duty to stockholders.

12 So, that's the test. That's the test  
13 the Supreme Court has given us. And if that's the  
14 test for a fraudulent fiduciary breach by an  
15 insider, how can it be that a jury doesn't have  
16 to find knowledge of that aspect of a fraudulent  
17 fiduciary breach when you're considering tippee  
18 liability?

19 JUDGE PARKER: So, your position is that  
20 that quantum of knowledge is the only thing that  
21 meaningfully separates the ability to trade and  
22 the threat of jail if you do?

23 MARK POMERANTZ: Well, and it is a very-  
24 -you know, the question whether personal benefit  
25 exists is a squishy one, and it's particularly

1 squishy in this case when you get into concepts  
2 of career advice, friendship, and so on. But--  
3 but--you have to remember, however squishy the  
4 notion of personal benefit may be, it wasn't even  
5 given to the jury to consider here. The jury  
6 never even was told it had to find it.

7 So, you know, as a first point, the  
8 charge is insufficient. Then you get into the  
9 question of the sufficiency of the evidence. And  
10 I need to point out, of course, that, with  
11 respect to Mr. Chiasson, there's no evidence in  
12 the record, none, that he knew anybody was being  
13 paid, that he paid anyone.

14 And, when the government cites an  
15 exhibit to say, "Well, the knowledge of  
16 friendship was apparent," they're talking about  
17 the wrong link in the chain. There is no proof  
18 that the friendship between the NVIDIA insider  
19 and the first NVIDIA tippee was known to the  
20 defendants.

21 The document to which Ms. Apps refers  
22 is a friendship between the first-line tippee and  
23 the next tippee. And, of course, Mr. Chiasson is  
24 even further down the chain. So, it's even--  
25 JUDGE HALL: Let me just take you back

1 to my personal--I'm sorry, my first question, Mr.  
2 Pomerantz. And that is: is it Mr. Chiasson's  
3 view, the defendant's view in this case, that  
4 only demonstrating personal benefit is  
5 sufficient, the knowledge of personal benefit is  
6 sufficient to prove knowledge of fraudulent  
7 breach?

8 MARK POMERANTZ: I think I would answer  
9 it this way: there are three components that the  
10 defendant has to know. One is the existence of a  
11 relationship of trust and confidence between the  
12 insider and the issuer. The second is a breach of  
13 the duty of confidence. And the third is personal  
14 benefit. You need all three. Those are the  
15 components of a fraudulent fiduciary breach,  
16 identified in Dirks but not only Dirks. And the  
17 notion that it--

18 JUDGE HALL: Doesn't Dirks tie the  
19 personal benefit to the breach?

20 MARK POMERANTZ: Yes. Yes.

21 JUDGE HALL: Not as a separate  
22 component. But you don't have a breach unless you  
23 have a personal benefit. Isn't--

24 MARK POMERANTZ: That's exactly the  
25 point. And that's where--

1 JUDGE HALL: [UNINTEL] is that  
2 exclusive? That's the question I'm trying to--is  
3 that the only way you can prove, the government  
4 can prove, fraudulent breach?

5 MARK POMERANTZ: In a classic insider  
6 trading case such as this one, I believe--and if  
7 you take Dirks to mean what it said, and of  
8 course it was reiterated by the Supreme Court in  
9 later cases; it's never been retreated from--  
10 personal benefit is a defining aspect, a  
11 necessary aspect, of a fraudulent fiduciary  
12 breach.

13 Bearing in mind, of course, as the  
14 Court has emphasized, not every breach opens the  
15 door. This, although there is no statute, we're  
16 dealing here with a judge-made offense, this has  
17 to be fraudulent conduct.

18 So, the first question always has to  
19 be: where is the fraud? And the Supreme Court in  
20 Dirks said we can find the fraud if you have a  
21 relationship of trust and confidence and if you  
22 have an insider who betrays that relationship of  
23 trust and confidence for personal benefit.

24 And, again, I come back to the notion  
25 that, even if I'm wrong, and there are other

1 forms of fiduciary breach that open the door to  
2 insider trading liability for tippees, the  
3 particular fraudulent fiduciary breach that the  
4 government attempted to prove here, and the one  
5 that was submitted to the jury when it--when the  
6 issue was, "Had the tippees done something  
7 wrong?" and then we'll deal separately with the  
8 tippees.

9 But for tipper wrongdoing, for tipper  
10 criminality, the breach that the government  
11 alleged, the breach they say they proved, the  
12 breach that was submitted to the jury, is a  
13 fraudulent fiduciary breach contemplating  
14 personal benefit. It's just that a necessary  
15 component of that fiduciary breach, i.e. the  
16 contemplation of the receipt of benefit, drops  
17 out when you get to tippee knowledge.

18 And we're saying that's wrong. We're  
19 saying you can't--you know, it's like trying to  
20 have an egg sandwich but there's no eggs. You  
21 know, if the crime's tippee--you've consumed an  
22 egg sandwich, you can't say, "But we'll forget  
23 about whether the government has proved the  
24 existence of eggs." It just doesn't work.

25 It's an essential part of the fiduciary

1 breach that there be personal benefit. That's the  
 2 teaching of Dirks. And that wasn't here. And the-  
 3 -  
 4 JUDGE HALL: Thank you. Thank you, Mr.  
 5 Pomerantz.  
 6 MARK POMERANTZ: Thank you, Your Honor.  
 7 JUDGE HALL: Mr. Fishbein?  
 8 STEPHEN FISHBEIN: Judge Hall, it's  
 9 certainly our position that a fraudulent self-  
 10 dealing by the insider is essential for the  
 11 tipper's breach, and then the tippee has to know  
 12 about it. And my point on sufficiency is that the  
 13 government just didn't prove that.  
 14 And I take issue with the prosecutor  
 15 saying that the leaks were somehow different than  
 16 the charged information that my client was  
 17 charged with. The leaks were very specific.  
 18 Earnings per share of \$0.30, contrary to what she  
 19 said, that was attributed to an insider at Dell.  
 20 So, when Todd Newman gets the email,  
 21 it's Dell Investor Relations saying 30-percent  
 22 EPS. That's indistinguishable. Or, similarly, 18-  
 23 percent gross margin, that was a specific leak  
 24 from inside Dell. Everybody knew it was coming  
 25 from inside Dell. It's a specific number, 18

1 percent. Same with 12-percent opex or missing  
 2 revenues by a country mile.  
 3 And, in every one of those cases, the  
 4 government concedes there was no personal  
 5 benefit. There was no allegation of personal  
 6 benefit.  
 7 So, from my client's perspective, you  
 8 cannot go from, "It comes from the inside; it's  
 9 specific," and then take the leap and say you  
 10 must know about a personal benefit, especially  
 11 when you look at the actual charge, the charge  
 12 supposed tips. Jesse Tortora is constantly  
 13 saying, "I guess," you know, "Maybe," "I think."  
 14 It's always couched with uncertainty. And so, you  
 15 put that all together, and, Judge Parker, to your  
 16 point, it's just--it's not distinguishable.  
 17 Second, Ms. Apps said that my client  
 18 paid a bribe. Nowhere in the trial record will  
 19 you see that characterized as a bribe. That's a  
 20 first time on appeal. The payment to Sandy Goyal  
 21 was a consulting payment.  
 22 It is undisputed that, when they hired  
 23 Sandy Goyal as a consultant, they hired numerous  
 24 other consultants. He was hired to do legitimate  
 25 work. That's what he said and that's what Jesse

1 Tortora said. When he was hired and they--the  
 2 amount of money--  
 3 JUDGE PARKER: Was there some visa  
 4 problem there?  
 5 STEPHEN FISHBEIN: Yes, yes. Exactly. In  
 6 other words, Goyal had a visa problem, and that's  
 7 why he said, "Pay my wife instead." But the  
 8 undisputed evidence was, when they set that up,  
 9 it was for Sandy Goyal to do legitimate  
 10 consulting for Tortora and for Diamondback.  
 11 So, to say now that it's a bribe, when  
 12 they never argued that at trial, they never  
 13 argued even in their appellate briefs that this  
 14 consulting payment supports an inference of a  
 15 benefit, a benefit to Rob Ray, when they know for  
 16 a fact that none of the money that Sandy Goyal  
 17 got went to Rob Ray. Goyal said, "I did not  
 18 transfer any of the money to Rob Ray. I didn't  
 19 even tell him he was getting paid."  
 20 And if I could just illustrate it like  
 21 this, it's a very common instruction in this  
 22 courthouse. You see somebody walk into the  
 23 courtroom, dripping wet; you can infer that it's  
 24 raining. But if I prove for a fact at trial that  
 25 there's somebody downstairs spraying people with

1 hoses when they come into the courthouse, you  
 2 wouldn't give that inference, because you know  
 3 that it's not true.  
 4 And that's exactly what's going on  
 5 here. We proved unequivocally that none of the  
 6 money went to Rob Ray. He didn't get that kind of  
 7 benefit. And so, to infer it is just a specious  
 8 inference. Thank you.  
 9 JUDGE PARKER: Thank you.  
 10 JUDGE HALL: Thank you.  
 11 JUDGE PARKER: Thank you all.  
 12 JUDGE HALL: Thanks, everyone. We will  
 13 reserve decision.  
 14
