

Dear Secretary,

I am submitting this petition requesting a rule that bans the commercial sale of algorithmic trading systems that use APIs to place trades.

As technology and AI advance, more individuals are building these tools and selling them to the public. When enough people run the same algorithm across enough accounts, it creates the conditions for a GameStop-type reaction across any market — futures, equities, or otherwise. This risk grows as these tools become cheaper and easier to build and sell commercially.

For reference, I have filed a related complaint with the CFTC.
TCR Confirmation Number: 2607-0417-5016-09

Respectfully submitted,

Owusu Achiaw
