Rules of Cboe C2 Exchange, Inc.

* * * * *

Rule 1.1. Definitions

* * * * *

Complex Order

The term "complex order" means an order involving the concurrent execution of two or more different series in the same class (the "legs" or "components" of the complex order), for the same account, occurring at or near the same time in a<u>ny</u> ratio [greater than or equal to one-to-three (.333) and less than or equal to three-to-one (3.00)] and for the purpose of executing a particular investment strategy with no more than the applicable number of legs (which number the Exchange determines on a class-by-class basis). The Exchange determines in which classes complex orders are eligible for processing.

Rule 5.33. Complex Orders

Trading of complex orders is subject to all other Rules applicable to trading of orders, unless otherwise provided in this Rule 5.33.

* * * * *

(f) *Minimum Increments and Execution Prices.*

> (1) No change.

> (2) The System does not execute a complex order pursuant to this Rule 5.33 at a net price<u>:</u>

>> ([1]<u>A</u>) that would cause any component of the complex strategy to be executed at a price of zero;

>> [(2) worse than the SBBO; (3)]<u>(B)</u> that would cause any component of the complex strategy to be executed at a price worse than the individual component price on the Simple Book;

>> ([4]<u>C</u>) worse than the price that would be available if the complex order Legged into the Simple Book; or

([5]D) worse than the SBBO and:

(i) if a complex order has a ratio equal to or greater than one-to-three (.333) and less than or equal to three-to-one (3.00), [ahead of orders on the Simple Book without improving the BBO on] at least one component of the complex [strategy]order must execute at a price that improves the BBO for that component [by at least $0.01]; or

(ii) if the complex order has a ratio less than one-to-three (.333) or greater than three-to-one (3.00), the component(s) of the complex order for the leg(s) with a Customer order at the BBO must execute at a price that improves the price of that Customer order(s) on the Simple Book.

(3) The System executes complex orders without consideration of any prices for the complex strategy that might be available on other exchanges trading the same complex strategy; provided, however, that such complex order price may be subject to the drill-through price protection described in Rule 5.34(b).

(g) *Legging.* A complex order may execute against orders and quotes in the Simple Book pursuant to subparagraphs (d)(5)(A)(i) and (e)(1) if it can execute in full or in a permissible ratio and if it has no more than a maximum number of legs (which the Exchange determines on a class-by-class basis and may be [two, three or four]up to 16) ("Legging"), subject to the following:
