AX[12]	Routed to EDGX using ALLB routing strategy	0.00290
	* * * * *	

Definitions:

* * * * *

- All references to "per share" mean "per share executed."

- "ADAV" means average daily volume calculated as the number of shares added per day and "ADV" means average daily volume calculated as the number of shares added or removed, combined, per day. ADAV and ADV are calculated on a monthly basis.

    o The Exchange excludes from its calculation of ADAV and ADV shares added on any day that the Exchange's system experiences a disruption that lasts for more than 60 minutes during regular trading hours ("Exchange System Disruption"), on any day with a scheduled early market close and on the last Friday in June (the "Russell Reconstitution Day").

    o Routed shares are not included in ADAV or ADV calculation.

o With prior notice to the Exchange, a Member may aggregate ADAV or ADV with other Members that control, are controlled by, or are under common control with such Member (as evidenced on such Member's Form BD).

- "Auction ADV" means average daily auction volume calculated as the number of shares executed in an auction per day.
- "Step-Up ADAV" means ADAV in the relevant baseline month subtracted from current ADAV.
- "Step-Up Auction ADV" means Auction ADV in the relevant baseline month subtracted from current Auction ADV.
