

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-103427; File No. SR-CboeBZX-2025-083]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Introduce a Small Retail Broker Hosted Solutions Program and to Update the Existing Eligibility Requirements for the Small Retail Brokerage Distribution Program for the Cboe One Summary Feed

July 9, 2025.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on June 30, 2025, Cboe BZX Exchange, Inc. (the “Exchange” or “BZX”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the “Exchange” or “BZX”) proposes to introduce a Small Retail Broker Hosted Solutions Program and to update the existing eligibility requirements for the Small Retail Brokerage Distribution Program for the Cboe One Summary Feed. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s website (http://markets.cboe.com/us/equities/regulation/rule_filings/BZX/), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt a Small Retail Broker Hosted Solutions Program (the “Program”) for Cboe One Summary Data (collectively, the “Applicable Feed”).³ This Program will provide fee waivers and lower data costs for both (i) Small Retail Brokers (as defined herein) that provide the Applicable Feed to other Small Retail Brokers via its hosted solutions (the “Hosting Small Retail Broker Distributor”) and (ii) the Small Retail Brokers that receive this data from a Hosting Small Retail Broker Distributor as set forth herein.

Further, the Exchange proposes to increase the allowed maximum Non-Professional Data User subscriber count for the existing Small Retail Broker Program for Cboe One Summary Feed.

By way of background, the Exchange currently offers the BZX Top Data Feed, which is a data feed that offers top-of-book quotations and last sale information based on orders entered into the Exchange’s System. The BZX Top Data Feed benefits investors by facilitating their

³ The Exchange initially submitted the proposed rule change on May 8, 2025 (SR-CboeBZX-2025-065). On May 19, 2025, the Exchange withdrew that filing and submitted SR-CboeBZX-2025-071. On June 30, 2025, the Exchange withdrew that filing and submitted this filing.

prompt access to real-time top-of-book information contained in BZX Top Data. The Exchange's affiliated equities exchanges (i.e., Cboe EDGA, Inc. ("EDGA"), Cboe BYX Exchange, Inc. ("BYX"), and Cboe EDGX Exchange, Inc. ("EDGX") (collectively, "Affiliates" and together with the Exchange, "Cboe Equities Exchanges") also offer similar top-of-book data feeds. Particularly, each of the Exchange's Affiliates offer top-of-book quotation and last sale information based on their own quotation and trading activity that is substantially similar to the information provided by the Exchange through the BZX Top Data Feed. Additionally, the Exchange also offers Cboe One Summary Data Feed that disseminates, on a real-time basis, the aggregate BBO of all displayed orders for securities traded on BZX and its Affiliates and also contains individual last sale information for the BZX and its Affiliates. The Cboe One Summary Data Feed is created using the data from the Exchange and its Affiliates' Top data feeds.

Currently, the Exchange offers a Small Retail Broker Distribution Program⁴ for the Applicable Feed. This program provides a discounted Distribution Fee of \$3,500/month for Cboe One Summary Data Feed as well as a discounted Data Consolidation Fee⁵ of \$350/month for Cboe One Summary Data for eligible participants.⁶ Participants of the existing Small Retail Broker Distribution Program must be an External Distributor that meets the following criteria: (i) Distributor is a broker-dealer distributing the Applicable Feed to Non-Professional Data Users with whom the broker-dealer has a brokerage relationship; (ii) At least 90% of the Distributor's total subscriber population must consist of Non-Professional subscribers, inclusive of any subscribers not receiving the Applicable Feed; and (iii) Distributor distributes the Applicable

⁴ See Cboe BZX Equities Fee Schedule.

⁵ This fee reflects the value of the aggregation and consolidation function the Exchange performs in creating the Cboe One Summary Feed.

⁶ See Cboe BZX Equities Fee Schedule.

Feed to no more than 5,000 Non-Professional Data Users (the Exchange notes that it is proposing to increase this to 10,000 Non-Professional Data Users as described further herein).⁷ The Exchange introduced this program to allow small retail brokers that purchase top of book market data from the Exchange to benefit from discounted fees for access to such market data. The Small Retail Broker Distribution Program reduces the distribution and consolidation fees paid by small broker-dealers that operate a retail business. In turn, the Small Retail Broker Distribution Program is intended to increase retail investor access to real-time U.S. equity quote and trade information, and allow the Exchange to better compete for this business with competitors⁸ that offer similar optional products.⁹

The Exchange now proposes to create a new Program based on the proposed eligibility criteria for Small Retail Brokers to specifically support Small Retail Brokers who are operating platforms on behalf of other Small Retail Brokers. Based on customer feedback, there are Small Retail Brokers who would like to provide this data via a hosted solution as a White Label Service¹⁰ to other Small Retail Brokers, who then provide this data to their retail clients (an “External Hosted Subscriber”).¹¹ Unfortunately, under the existing structure, both the External

⁷ Id.

⁸ Such as NYSE Arca BBO feed or Nasdaq Basic.

⁹ See Securities Exchange Act Release No. 88218 (February 14, 2020), 85 FR 9827 (February 20, 2020) (SR-CboeBZX-2020-014).

¹⁰ A “White Label Service” is a type of hosted display solution in which an External Distributor hosts or maintains a website or platform on behalf of the External Hosted Subscriber. The service allows the External Distributor to make the applicable data (i.e., Cboe One Summary Data) available on a platform that is branded with the External Hosted Subscriber, or co-branded with the External Hosted Subscriber and the External Distributor. The External Distributor maintains control of the application's data, entitlements and display.

¹¹ An External Hosted Subscriber of an Exchange Market Data product is a Distributor that receives the Exchange Market Data product from an External Distributor through a hosted display solution where the External Hosted Subscriber's Users are hosted by the External Distributor and data is distributed for display use only to one or more Users outside the External Hosted Subscriber's own entity. The Exchange proposes to add this definition into its Fee Schedule.

Hosted Subscriber and the Hosting Small Retail Broker Distributor are eligible for the standard discounted Distribution Fee and the discounted Data Consolidation Fee under the existing Small Retail Broker Program. These fees are in addition to the standard Professional and Non-Professional User fees. Therefore, the existing fee structure under the Small Retail Broker Program does not allow for any additional benefits for Hosting Small Retail Broker Distributors for providing the valuable service of operating platforms that External Hosted Subscribers may use for their clients, and furthermore, does not account for the fact that Hosting Small Retail Broker Distributors are also billed for the fees of their External Hosted Subscribers (which Small Retail Brokers under the original program do not have).

Of further note, the Hosting Small Retail Broker Distributor is responsible for reporting its External Hosted Subscribers and their users, and ultimately the Hosting Small Retail Broker is responsible for payment of all data fees for both its External Hosted Subscribers and itself. While the Exchange is not privy to pass-through costs between Hosting Small Retail Broker Distributors and External Hosted Subscribers, this proposed pricing allows Hosting Small Retail Broker Distributors the freedom to charge or not charge External Hosted Subscribers while also appropriately charging for a service provided to an External Hosted Subscriber that is benefitting from an infrastructure developed and supported by the Hosting Small Retail Broker Distributor. The Exchange notes that the current Small Retail Broker Program prevents the Hosting Small Retail Broker Distributor from packaging this waiver as part of their overall service to their External Hosted Subscribers (as External Hosted Subscribers would be billed directly under the existing Small Retail Broker Program). Given that External Hosted Subscribers are smaller relative to other Small Retail Brokers currently participating in the Program, the costs associated with the Applicable Fees are inherently prohibitive to the External Hosted Subscriber.

Under the proposed program, a Hosting Small Retail Broker providing the data to at least one External Hosted Subscriber would be eligible for a credit of its Distribution Fee (a credit of \$3,500/month for Cboe One Summary Feed) that it is normally responsible for under the existing Small Retail Broker Program. Additionally, the External Hosted Subscriber shall also receive a waiver of the Distribution Fee (a credit of \$3,500/month for Cboe One Summary Feed). The External Hosted Subscriber will also receive a waiver of the Data Consolidation Fee (a credit of \$350/month) and in lieu of paying the Non-Professional User fees, it shall be a set monthly fee \$850 for Cboe One Summary Data.¹² The Professional User fees shall remain the same. Once an External Hosted Subscriber exceeds the Non-Professional Data User maximum (no more than 10,000 Non-Professional Data Users for Cboe One Summary Data), the External Hosted Subscriber shall no longer be eligible for the program and will be required to directly license with the Exchange for the Applicable Feed.¹³ The Exchange notes that the 10,000 Non-Professional Data User count eligibility requirement is looked at on a firm level (i.e., the counts of the Non-Professional Data Users for each of the Hosting Small Retail Broker Distributor and each of its External Hosted Subscribers will be looked at separately). Additionally, the Hosting Small Retail Broker Distributor shall continue to remain eligible for this Program so long as it has at least one External Hosted Subscriber (i.e., if it has two External Hosted Subscribers and one External Hosted Subscriber exceeds the 10,000 Non-Professional Data User threshold, the

¹² As the Program is capped at 10,000 users for Cboe One Summary Feed this equates to a maximum, savings of \$1,650 (10,000 Users x 0.25/Non-Professional = \$2,500 and \$2,500 – 850 = \$1,650) for Cboe One Summary Feed.

¹³ The Exchange notes that it will include a clarifying note in its Fee Schedule to specify that in the event a Hosting Small Retail Broker Distributor joins this program mid-month, that its fees shall be prorated for the month based on the initial date of the subscription; however, the External Hosted Subscriber's fees shall not be prorated.

Hosting Small Retail Broker Distributor and the other External Hosted Subscriber may still continue under this Program).

In addition to the changes set forth above, the Exchange also proposes to modify the existing Small Retail Broker Program for Cboe One Summary Feed to increase the number of Non-Professional Data User maximum from 5,000 to 10,000 to be consistent with the proposed threshold for External Hosted Subscribers. As previously discussed, the Exchange proposes to also use the cap of 10,000 Non-Professional Data Users for the proposed Program. The Exchange proposes to increase this in support of increased participation across both retail and investor markets in order to facilitate the growth of smaller retail brokers on a global scale.

As mentioned above, the Program's existing fee structure makes it costly for both Hosting Small Retail Broker Distributors and its External Hosted Subscribers to provide data to the External Hosted Subscribers retail clients as Distribution Fees are assessed on both Small Retail Brokers. With this fee proposal, the Exchange hopes to make its data more widely accessible for retail users who receive their data from External Hosted Subscribers.

The Exchange believes that this proposal will (i) further increase the competitiveness of the Exchange's top of book market data products compared to competitor offerings that may currently be cheaper for firms with a limited subscriber base that do not yet have the scale to take advantage of the lower subscriber fees offered by the Exchange; and (ii) provide additional incentives for Hosting Small Retail Broker Distributors to provide hosted solution services for other Small Retail Brokers in order to make data more widely available to retail investors. In turn, the Exchange believes that this change may benefit market participants and investors by spurring additional competition and increasing the accessibility of the Exchange's top of book data.

The Exchange notes that at least one other exchange has a similar offering. For example, the New York Stock Exchange has a Redistribution Fee Waiver for NYSE Trades, for which redistributors of data may have their redistribution fee waived so long as they provide the data to at least one data feed recipient and reports such data feed recipient or recipients to the Exchange.¹⁴ Additionally, the Access Fee that is charged is reduced by more than 93% for redistributors of NYSE BBO and NYSE Trades that subscribe to only such data feeds and do not subscribe to any other market data product listed on the Fee Schedule other than NYSE BQT, and/or the NYSE OpenBook data feed, and/or the NYSE Aggregated Lite data feed, and/or the NYSE Pillar Depth data feed, and such market data products are used in a display-only format for internal or external use only.¹⁵ This means that a redistributor that meets the above requirements will both (i) pay a Per User Access Fee¹⁶ and (ii) have its redistribution fee waived. A Redistributor that receives a data feed of NYSE BBO and NYSE Trades and uses the market data products for any other purpose (such as internal use) or that subscribes to any other products listed on the Fee Schedule (other than NYSE BQT, and/or the NYSE OpenBook data feed, and/or the NYSE Aggregated Lite data feed, and/or the NYSE Pillar Depth data feed) would continue to pay the \$1,500 per month General Access Fee (as opposed to the lower Per User Access Fee).¹⁷ Accordingly, the fee changes are not designed for redistributors that are existing customers of specific NYSE market data products, that use NYSE BQT for internal purposes, or if the data is provided as non-display. The fee reductions in NYSE BBO and NYSE Trades were

¹⁴ See Securities Exchange Act Release No. 90407 (November 12, 2020), 85 FR 73570 (November 18, 2020) (SR-NYSE-2020-91).

¹⁵ See NYSE Proprietary Market Data Fees. The Exchange notes that NYSE American and NYSE Arca also implement this same incentive.

¹⁶ The Exchange notes that this is the equivalent to the fixed Non-Professional User charge it has proposed for the External Hosted Subscriber under the Program.

¹⁷ See *supra* note 14.

intended to incentive eligible redistributors to subscribe to the NYSE BQT data feeds so that such product would be available to their customers, which have expressed an interest in subscribing to NYSE BQT.¹⁸ The Exchange notes that these same discounts exists for NYSE Americas and NYSE Arca as well.¹⁹

Without these discounts, a redistributor of NYSE Trades would pay the General Access Fee of \$1,500/month in addition to the Redistribution Fee of \$1,000/month and the applicable Professional User Fee (\$4/month/User) and Non-Professional User Fee (\$0.20/month/User).²⁰ Under these discounts, that same redistributor now only pays the Per User Access Fee of \$100/month.²¹ The Exchange notes that in order to receive the NYSE BQT data feed (which is comparable to the Cboe One Summary Feed), a subscriber must pay the applicable fees for the following data feeds: NYSE BBO, NYSE Trades, NYSE Arca BBO, NYSE Arca Trades, NYSE American BBO, NYSE American Trades, NYSE National BBO, NYSE National Trades, NYSE Texas BBO and NYSE Texas Trades.²² The cost of the Per User Access fees for each of these applicable data feeds (including NYSE BQT) totals \$850, the equivalent to the Cboe One Summary proposed fee.

While the eligibility requirements of the NYSE program and the proposed Program differ, both programs are intended to incentivize redistribution of applicable data feeds by providing enhanced discounts and both programs target different segments for a specific

¹⁹ See e.g., NYSE Americas Proprietary Market Data Fees.

²⁰ See NYSE Proprietary Market Data Fees.

²¹ Id.

²² Id.

purpose. The proposed discounts under this Program are intended to make the Exchange's offering competitively priced relative to alternative options that participants may have.

Without the proposed pricing discounts, the Exchange believes that (i) prospective customers may not be interested in purchasing top of book data from the Exchange, and may instead purchase such data from other national securities exchanges or the SIPs, potentially at a higher cost than would be available pursuant to the proposed program and (ii) that Hosting Small Retail Broker Distributors are not incentivized to make the Applicable Feed available via a hosted solution for retail investors of its External Hosted Subscribers. Similar to the existing Small Retail Broker Program, the Exchange believes that this Program will continue to increase competition for such market data, and that enhanced competition could help to further reduce data fees as providers compete for subscribers, as well as help diversify the availability and quality of data offerings available to retail investors through their Hosting Small Retail Broker Distributors. Ultimately, the Exchange believes that it is critical that it be allowed to compete by offering attractive pricing to customers as increasing the availability of such products ensures continued competition with alternative offerings. Such competition may be constrained when competitors are impeded from offering alternative and cost-effective solutions to customers.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,²³ in general, and furthers the objectives of Section 6(b)(4),²⁴ in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its members and other recipients of Exchange data.

²³ 15 U.S.C. 78f.

²⁴ 15 U.S.C. 78f(b)(4).

The Exchange also believes that the proposed rule change is consistent with Section 11(A) of the Act.²⁵ Specifically, the proposed rule change supports (i) fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets, and (ii) the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities. In addition, the proposed rule change is consistent with Rule 603 of Regulation NMS,²⁶ which provides that any national securities exchange that distributes information with respect to quotations for or transactions in an NMS stock do so on terms that are not unreasonably discriminatory.

In adopting Regulation NMS, the Commission granted SROs and broker-dealers increased authority and flexibility to offer new and unique market data to the public. It was believed that this authority would expand the amount of data available to consumers, and also spur innovation and competition for the provision of market data. The Exchange believes that the proposed fee change would further broaden the availability of U.S. equity market data to investors, and in particular retail investors, consistent with the principles of Regulation NMS.

The Exchange operates in a highly competitive environment. Indeed, there are sixteen registered national securities exchanges that trade U.S. equities and offer associated top of book market data products to their customers. The national securities exchanges also compete with the SIPs for market data customers. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current

²⁵ 15 U.S.C. 78k-1.

²⁶ See 17 CFR 242.603.

regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”²⁷

The proposed fee change is a result of the competitive environment, as the Exchange seeks to amend its fees to attract additional subscribers for its proprietary top of book data offerings.

Making alternative data products available to market participants ultimately ensures increased competition in the marketplace, and constrains the ability of exchanges to charge prohibitive fees. In the event that a market participant views one exchange’s top of book data fees as more or less attractive than the competition they can, and frequently do, switch between competing products. In fact, the competitiveness of the market for such top of book data products is one of the primary factors animating this proposed rule change, which is designed to allow the Exchange to further compete for this business. As mentioned above, at least one other Exchange provides a similar waiver for redistribution of market data.²⁸

The Exchange notes that the Applicable Feed is distributed and purchased on a voluntary basis, in that neither the Exchange nor market data distributors are required by any rule or regulation to make these data products available. Distributors (including vendors) and Users can therefore discontinue use at any time and for any reason, including due to an assessment of the reasonableness of fees charged. Further, the Exchange is not required to make any proprietary data products available or to offer any specific pricing alternatives to any customers.

The Commission has long stressed the need to ensure that the equities markets are structured in a way that meets the needs of ordinary investors. For example, the Commission's strategic plan for fiscal years 2018-2022 touts “focus on the long-term interests of our Main

²⁷ See Securities Exchange Act Release No. 51808 (June 9, 2005), [70 FR 37496, 37499](#) (June 29, 2005) (“Regulation NMS Adopting Release”).

²⁸ See supra note 10.

Street investors” as the Commission's number one strategic goal.²⁹ The Program would be consistent with the Commission's stated goal of improving the retail investor experience in the public markets. Furthermore, national securities exchanges commonly charge reduced fees and offer market structure benefits to retail investors, and the Commission has consistently held that such incentives are consistent with the Act. The Exchange believes that the Program is consistent with longstanding precedent indicating that it is consistent with the Act to provide reasonable incentives to retail investors that rely on the public markets for their investment needs.

The Exchange proposes that the proposed waivers for the Applicable Fee only apply to Hosting Small Retail Broker Distributors and its External Hosted Subscribers for three reasons. First, the Hosting Small Retail Broker Distributor is creating a full-service offering for External Hosted Subscribers in contrast to the Small Retail Brokers under the current Program, which only provide services directly to its own retail clients. Maintaining an additional platform for External Hosted Subscribers’ clients is an additional workstream for Hosted Subscribers (in contrast to Small Retail Brokers that only provide data and services directly to their retail clients) as they support additional ecosystems of business, each with its own book of retail clients. In order to incentivize the Hosting Small Retail Broker Distributors to take on the additional duties associated with hosting External Hosted Subscribers (such as managing the data, entitlements, and display of the application provided to the External Hosted Subscriber), the Exchange believes it is not unfairly discriminatory to provide a waiver of the Distribution Fee for the Hosting Small Retail Broker, as opposed to the standard discounted Distribution Fee it would normally pay under the Small Retail Broker Program.

²⁹ See U.S. Securities and Exchange Commission, Strategic Plan, Fiscal Years 2018-2022, available at https://www.sec.gov/files/SEC_Strategic_Plan_FY18-FY22_FINAL_0.pdf.

Second, by creating this program, the Exchange is further able to reach additional retail investors. By waiving Distribution Fees for both the Hosting Small Retail Broker Distributor and its External Hosted Subscriber, both parties are incentivized to work together to provide data to retail investors. Third, as mentioned previously, the Hosting Small Retail Broker is responsible for the fees and reporting for both its own activity and that of its External Hosted Subscriber. While the Exchange is not privy to pass-through costs between Hosting Small Retail Broker Distributors and External Hosted Subscribers, this proposed pricing allows Hosting Small Retail Broker Distributors the freedom to charge or not charge External Hosted Subscribers while also appropriately charging for a service provided to an External Hosted Subscriber that is benefitting from an infrastructure developed and supported by the Hosting Small Retail Broker Distributor. The Exchange notes that the current Small Retail Broker Program prevents the Hosting Small Retail Broker Distributor from packaging this waiver as part of their overall service to their External Hosted Subscribers (as External Hosted Subscribers would be billed directly under the existing Small Retail Broker Program). Given that External Hosted Subscribers are smaller relative to other Small Retail Brokers currently participating in the Program, these costs associated with the Applicable Fees are inherently prohibitive to the External Hosted Subscriber. Through this program, fees will not be a deterrent for Hosting Small Retail Brokers and External Hosted Subscribers to establish platforms that reach a wider scope of retail investors.

Furthermore, while this Program would be effectively limited to smaller firms in accordance with the proposed eligibility requirements, the Exchange does not believe that this limitation makes the fees inequitable or unfairly discriminatory. The Exchange notes that large broker-dealers and/or vendors that distribute the Exchange's data products to a sizeable number

of investors benefit from the current fee structure, which includes lower subscriber fees and Enterprise licenses. Due to lower subscriber fees, distributors that provide the Applicable Feed to more than the proposed capped amounts of Users permitted under either the Small Retail Broker Program or this Program already enjoy cost savings compared to competitor products. The Program, in addition to the existing Small Retail Broker Program, would therefore continue to ensure that small retail brokers that distribute top of book data to their retail investor customers could also benefit from reduced pricing, and would aid in increasing the competitiveness of the Exchange's data products for this key segment of the market.

The Exchange believes that the proposed cap of 10,000 for the Cboe One Summary Data Feed for this Program, as well as increasing this cap to 10,000 for the Cboe One Summary Data Feed for the Small Retail Broker Program is reasonable and not unfairly discriminatory as the Exchange believes it is in the best interest of all market participants to more broadly expand this in support of inclusion for more retail investors by participation in both programs by small retail brokers on a global scale.

Distribution Fee Waiver

The Exchange believes that the Distribution Fee Waivers for both the External Hosted Subscriber and the Hosting Small Retail Broker Distributor are reasonable as they represent a significant cost reduction for the Hosting Small Retail Broker Distributor to provide a hosted solution for the External Hosted Subscriber, to ultimately provide the data to the External Hosted Subscriber's retail investors. While the existing fee structure does provide a benefit of a discounted waiver for Small Retail Brokers that externally distribute the data, the discounted Distribution Fees are still incurred by both the External Hosted Subscriber and the Hosting Small Retail Broker Distributor. In an attempt to alleviate these costs, and make this data more

available to retail investors, the Exchange proposes to waive the Distribution Fees for both the Hosting Small Retail Broker Distributor and the External Hosted Subscriber. With this Program, the Exchange believes it will increase market accessibility and data to investors on a global scale. Exchange Hosted Subscribers may not have the infrastructure or technical capabilities to offer market data and/or execution services to its retail investors. Through waiving these fees for the External Hosted Subscriber, the Exchange hopes to reach a broader scale of retail investors globally. Further, as discussed above, the Exchange also believes it is appropriate and not unfairly discriminatory to limit this specific credit to the External Hosted Subscriber and the Hosting Small Retail Broker Distributor given the development and maintenance the Hosting Small Retail Broker Distributor acquires to provide this data to the External Hosted Subscriber's end users.

Data Consolidation Fee Waiver

The Exchange believes it is reasonable to not charge the External Hosted Subscriber the Data Consolidation Fee for Cboe One Summary Data for the duration of the time that they are eligible for this program. As previously discussed, the waiver of fees for the External Hosted Subscriber is intended to make this data more available to retail investors. The Exchange also believes it is appropriate and not unfairly discriminatory to limit this specific credit to the External Hosted Subscriber because, as described above, the Exchange believes by alleviating some of the barriers to entry, that Exchange Hosted Subscribers are able to bring this data and execution services to their retail investors. Of further note, the Exchange believes it is reasonable to maintain this cost for the Hosting Small Retail Broker Distributor as the Hosting Small Retail Broker Distributor is the party receiving this data from the Exchange where it is consolidated for the benefit of the Hosting Small Retail Broker Distributor.

Fixed Cost of Non-Professional Users

The Exchange believes it is reasonable to set a fixed cost for Non-Professional Users fees for External Hosted Subscribers by charging a flat, fixed cost instead of charging per user to allow for additional savings. Under this structure, the External Hosted Subscriber shall still be responsible by paying the standard per User fee of a Professional Users under the Applicable Feed. The Exchange does not believe this is unfairly discriminatory as the program is based around making the Applicable Feed available for Non-Professional Users. The Exchange also notes that it has taken a similar approach here to the NYSE Per User Access Fee, which sets a fixed cost where the data is used only for display purposes.³⁰

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange operates in a highly competitive environment, and its ability to price these data products is constrained by: (i) Competition among exchanges that offer similar data products to their customers; and (ii) the existence of inexpensive real-time consolidated data disseminated by the SIPs. Top of book data is disseminated by both the SIPs and the sixteen equities exchanges. There are therefore a number of alternative products available to market participants and investors. In this competitive environment potential subscribers are free to choose which competing product to purchase to satisfy their need for market information. Often, the choice comes down to price, as broker-dealers or vendors look to purchase the cheapest top of book data product, or quality, as market participants seek to purchase data that represents significant market liquidity. In order to better compete for this segment of the market, the Exchange is

³⁰ See NYSE Proprietary Market Data Pricing Guide, April 1, 2025.

proposing to reduce the cost of top of book data provided by Hosting Small Retail Broker Distributors to its External Hosted Subscribers, and in turn, their retail investors. The Exchange believes that this would facilitate greater access to such data, ultimately benefiting the retail investors that are provided access to such market data.

The Exchange does not believe that this price reduction would cause any unnecessary or inappropriate burden on intermarket competition as other exchanges and data vendors are free to lower their prices to better compete with the Exchange's offering. Indeed, as explained in the basis section of this proposed rule change, the Exchange's decision to (i) waive the Distribution Fee for the Hosting Small Retail Broker and the External Hosted Subscriber and (ii) waiving the Consolidation Fee (when applicable) for the External Hosted Subscriber and (iii) setting a fixed cost for the Non-Professional Users for the External Hosted Subscriber is itself a competitive response to different fee structures available on competing markets. The Exchange therefore believes that the proposed rule change is pro-competitive as it seeks to offer pricing incentives to customers to better position the Exchange as it competes to attract additional market data subscribers. The Exchange also believes that the proposed reduction in fees the Hosting Small Retail Broker and the External Hosted Subscriber would not cause any unnecessary or inappropriate burden on intramarket competition. Although the proposed fee discount would be largely limited to small retail broker subscribers, larger broker-dealers and vendors can already purchase top of book data from the Exchange at prices that represent a significant cost savings when compared to competitor products that combine higher subscriber fees with lower fees for distribution. In light of the benefits already provided to this group of subscribers, the Exchange believes that additional discounts to small retail brokers would increase rather than decrease competition among broker-dealers that participate on the Exchange. Furthermore, as discussed

earlier in this proposed rule change, the Exchange believes that offering pricing benefits to brokers that represent retail investors facilitates the Commission's mission of protecting ordinary investors, and is therefore consistent with the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act³¹ and paragraph (f) of Rule 19b-4³² thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

Electronic Comments:

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number

³¹ 15 U.S.C. 78s(b)(3)(A).

³² 17 CFR 240.19b-4(f).

SR-CboeBZX-2025-083 on the subject line.

Paper Comments:

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeBZX-2025-083. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright

protection. All submissions should refer to file number SR-CboeBZX-2025-083 and should be submitted on or before [INSERT DATE 21 DAYS AFTER DATE OF PUBLICATION IN THE *FEDERAL REGISTER*].

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³³

Sherry R. Haywood,

Assistant Secretary.

³³ 17 CFR 200.30-3(a)(12).
