Rule 11.11. Routing to Away Trading Centers

Unless the terms of the order direct the Exchange not to route such order away, if a Market Order or marketable Limit Order has not been executed in its entirety pursuant to 11.10(a)(4) above, the order shall be eligible for routing away pursuant to one or more of the routing options listed under paragraph (g) below.

(a) – (f) No change.

(g) Routing Options. The System provides a variety of routing options. Routing options may be combined with all available order types and Times-in-Force instruction, with the exception of order types and Times-in-Force instruction whose terms are inconsistent with the terms of a particular routing option. The System will consider the quotations only of accessible Trading Centers. The term "System routing table" refers to the proprietary process for determining the specific trading venues to which the System routes orders and the order in which it routes them. The Exchange reserves the right to maintain a different System routing table for different routing options and to modify the System routing table at any time without notice. The System routing options are:

(1) – (7) No change.

(8) ROOC. ROOC is a routing option for orders that the entering firm wishes to designate for participation in the opening, re-opening (following a halt, suspension, or pause), or closing process of a primary listing market [(Cboe BZX, NYSE, Nasdaq, NYSE American, or NYSE Arca)] if received before the opening/re-opening/closing time of such market. If shares remain unexecuted after attempting to execute in the opening, re-opening, or closing process, they are either posted to the EDGX Book, executed, or routed to destinations on the System routing table.

(9) – (12) No change.

(13) A User may designate their order for participation in the re-opening (following a halt, suspension, or pause) of a primary listing market [(Cboe BZX, NYSE, Nasdaq, NYSE MKT, or NYSE Arca)] if received before the re-opening time of such market. If shares remain unexecuted after attempting to execute in the re-opening process, they are either posted to the EDGX Book, executed, or routed to destinations on the System routing table.
