Rules of EDGA Exchange, Inc.

Rule 11.5. Orders and Modifiers

Users may enter into the System the types of orders listed in this Rule 11.5, subject to the limitations set forth in this Rule or elsewhere in these Rules.

(a) – (b) (No changes)

(c) Other Types of Orders and Order Modifiers. Unless an order's instructions require it to be displayed on the Exchange or routed to an away trading center(s), an order may include instructions to be non displayed. All order types and modifiers listed below, except for those set forth in Rules 11.5(c)(2), (9)-(10) may also include instructions to be non displayed.

(1) – (14) (No changes)

(15) NBBO Offset Peg Order. An NBBO Offset Peg Order is a limit order that, upon entry, is automatically priced by the System at the Designated Percentage (as defined in Rule 11.21(d)(2)(D)) away from the then current NBB (in the case of an order to buy) or NBO (in the case of an order to sell), or if there is no NBB or NBO at such time, at the Designated Percentage away from the last reported sale from the responsible single plan processor. Users may submit NBBO Offset Peg Orders to the Exchange starting at the beginning of the Pre-Opening Session, but the order is not executable or automatically priced until [the beginning of Regular Trading Hours] after the first regular way transaction on the primary listing market in the security, as reported by the responsible single plan processor and expires at the end of Regular Trading Hours. Upon reaching the Defined Limit (as defined in Rule 11.21(d)(2)(F)), the price of an NBBO Offset Peg Order bid or offer will be automatically adjusted by the System to the Designated Percentage away from the then current NBB or NBO, respectively, or if there is no NBB or NBO at such time, to the Designated Percentage away from the last reported sale from the responsible single plan processor. If an NBBO Offset Peg Order bid or offer moves a specified number of percentage points away from the Designated Percentage toward the then current NBB or NBO, the price of such bid or offer will be automatically adjusted by the System to the Designated Percentage away from the then current NBB and NBO. If there is no NBB or NBO at such time, the order will be automatically adjusted by the System to the Designated Percentage away from the last reported sale from the responsible single plan processor. In the event that pricing an NBBO Offset Peg Order at the Designated Percentage away from the then current NBB or NBO, or, if there is no NBB or NBO, to the Designated Percentage away from the last reported sale from the responsible single plan processor, would result in the order exceeding its limit price, the order will be cancelled or rejected. In the absence of an NBB or NBO and last reported sale, the order will be cancelled or rejected. If, after entry, the NBBO

Offset Peg Order is priced based on the consolidated last sale and such NBBO Offset Peg Order is established as the NBB or NBO, the NBBO Offset Peg Order will not be subsequently adjusted in accordance with this rule until either there is a new consolidated last sale, or a new NBB or new NBO is established by a national securities exchange. NBBO Offset Peg Orders are not eligible for routing pursuant to Rule 11.9(b)(2) and are always displayed on the Exchange. Notwithstanding the availability of the NBBO Offset Peg Order functionality, a User acting as a Market Maker remains responsible for entering, monitoring, and re-submitting, as applicable, quotations that meet the requirements of Rule 11.21(d). A new timestamp is created for the order each time that it is automatically adjusted.

(16) - (19) (No changes)

(d) – (e) (No changes)
