Rules of EDGA Exchange, Inc.

CHAPTER XI. Trading Rules

* * * * *

Rule 11.9. Order Execution

(a) (No change).

(b) Routing

(1) (No change).

(2) Routing Options. The System provides a variety of routing options. Routing options may be combined with all available order types and times-in-force, with the exception of order types and times-in-force whose terms are inconsistent with the terms of a particular routing option. The System will consider the quotations only of accessible markets. The term “System routing table” refers to the proprietary process for determining the specific trading venues to which the System routes orders and the order in which it routes them. The Exchange reserves the right to route orders simultaneously or sequentially, maintain a different System routing table for different routing options and to modify the System routing table at any time without notice. The System routing options are:

(a) – (m) (No change).

(n) ROOC. ROOC is a routing option for orders that the entering firm wishes to designate for participation in the opening, re-opening (following a halt, suspension, or pause), or closing process of a primary listing market (NYSE, Nasdaq, NYSE MKT[Amex], or NYSE Arca) if received before the opening/re-opening/closing time of such market. If shares remain unexecuted after attempting to execute in the opening, re-opening, or closing process, they are either posted to the EDGA [b]Book, executed, or routed like a ROUT routing option, as described in paragraph (c), above.

(o) – (q) (No change).

(c) – (g) (No change).
