MX2 Membership Fee Schedule
(EFFECTIVE NOVEMBER 2, 2026)

MX2 charges the following monthly fees to maintain active membership. Membership Fees are assessed to each active Member at the close of business on the first day of each month. If a Member is pending voluntary termination of rights as a Member pursuant to Rule 2.8 prior to such fee being assessed and the Member does not utilize the facilities of the Exchange while such voluntary termination of rights is pending, then the Member will not be obligated to pay the monthly membership fee. MX2 does not return pro-rated fees if a membership is not active for an entire month.

Fee applicable to all Members

Member Type	**Monthly Fee**
All Members	$200*

*Fee waived until January 1, 2027.

Additional Membership Fees

Member Type	**Monthly Fee**
Options Order Entry Firm	$1,000*
Market Maker	$7,000

*Fee waived until January 1, 2027.

The Market Maker Membership Fee is assessed to Market Makers not appointed as an LMM. LMM's are assessed separate (not additional) Membership Fees according to the table below.

Lead Market Maker ("LMM") Membership Fee

Member Type	**Monthly Fee**	**Lead Market Maker Appointments % of TCV in all Equity and ETF Option Classes**
Lead Market Maker	$8,000.00	Up to 1% of classes by volume
	$10,000.00	1% - 15% of classes by volume
	$12,500.00	Over 15% of classes by volume

For the calculation of the monthly LMM Membership Fee, the classes by volume percentage is the percentage that the TCV in the classes in which the Member is appointed as LMM represents of the TCV in all ETF and equity options classes from the prior month. Newly listed option classes are excluded from the calculation until the month following their listing, at which time the newly listed option classes will be included in the overall TCV and the LMM's appointed class percentage of that TCV, as applicable.
