Chapter VI Trading Systems

* * * * *

Sec. 11 Order Routing

(a) NOM offers two routing strategies, SEEK and SRCH. Each of these routing strategies will be explained in more detail below. An order may in the alternative be marked Do Not Route or “DNR”. The Exchange notes that for purposes of this rule the System will route SEEK and SRCH Orders with no other contingencies. The System checks the Order Book for available contracts for potential execution against the SEEK or SRCH orders. After the System checks the Order Book for available contracts, orders are sent to other available market centers for potential execution. For purposes of this rule, a Route Timer shall not exceed one second and shall begin at the time orders are accepted into the System, and the System will consider whether an order can be routed at the conclusion of each Route Timer. For purposes of this rule, NOM’s opening process is governed by Chapter VI, Section 8 and includes an opening after a trading halt (“Opening Process”).

Routing instructions may be combined with all available order types and times-in-force, with the exception of order types and times-in-force whose terms are inconsistent with the terms of a particular routing instruction. The term “System routing table” refers to the proprietary process for determining the specific trading venues to which the System routes orders and the order in which it routes them. The Exchange reserves the right to maintain a different System routing table for different routing instructions and to modify the System routing table at any time without notice. The order routing process shall be available to Participants from 9:30 a.m. Eastern Time until market close and shall route orders as described below. Participants can designate orders as either available for routing or not available for routing. All routing of orders shall comply with Chapter XII, Options Order Protection and Locked and Crossed Market Rules.

(i) **Priority of Routed Orders.** Orders sent to other markets do not retain time priority with respect to other orders in the System and the System shall continue to execute other orders while routed orders are away at another market center. Once routed by the System, an order becomes subject to the rules and procedures of the away market including, but not limited to, order cancellation. A routed order can be for less than the original incoming order's size. If a routed order is subsequently returned, in whole or in part, that routed order, or its remainder, shall receive a new

time stamp reflecting the time of its return to the System, unless any portion of the original order remains on the System, in which case the routed order shall retain its timestamp and its priority.

(ii) Options Participants whose orders are routed to away markets shall be obligated to honor such trades that are executed on away markets to the same extent they would be obligated to honor a trade executed on the Exchange.

(A) NOM shall route orders in options via Nasdaq Execution Services, LLC ("NES"), a broker-dealer that is a member of an unaffiliated SRO which is the designated examining authority for the broker-dealer. NES serves as the Routing Facility of NOM. The sole function of the Routing Facility will be to route orders in options listed and open for trading on NOM to away markets either directly or through one or more third-party unaffiliated routing broker-dealers pursuant to NOM rules on behalf of NOM. The Exchange and NES may not use a routing broker for which the Exchange or any affiliate of the Exchange is the designated examining authority. The Routing Facility is subject to regulation as a facility of Nasdaq, including the requirement to file proposed rule changes under Section 19 of the Act.

(B) Use of NES to route orders to other market centers is optional. Parties that do not desire to use NES must designate orders as not available for routing (a DNR Order), as described in subparagraph (iii)(A) below.

(C) NOM shall establish and maintain procedures and internal controls reasonably designed to adequately restrict the flow of confidential and proprietary information between the Exchange and its facilities (including the Routing Facility), and any other entity; or, where there is a routing broker, the Exchange, the Routing Facility and any routing broker, and any other entity, including any affiliate of the routing broker (and if the routing broker or any of its affiliates engages in any other business activities other than providing routing services to the Exchange, between the segment of the routing broker or affiliate that provides the other business activities and the segment of the routing broker that provides the routing services).

(D) The books, records, premises, officers, directors, agents, and employees of the Routing Facility, as a facility of the Exchange, shall be deemed to be the books, records, premises, officers, directors, agents, and employees of the Exchange for purposes of and subject to oversight pursuant to the Exchange Act. The books and records of the Routing Facility, as a facility of the Exchange, shall be subject at all times to inspection and copying by the Exchange and the Commission.

(E) Market Access. In addition to the Exchange Rules regarding routing to away trading centers, NES has, pursuant to Rule 15c3-5 under the Act, implemented certain tests designed to mitigate risks associated with providing the Exchange's Members with access to such away trading centers. Pursuant to the policies and procedures developed by NES to comply with Rule 15c3-5, if an order or series of orders are deemed to be violative of applicable pre-trade requirements under Rule 15c3-5, the order will be rejected prior to routing and/or NES will seek to cancel the order if it has been routed.

(F) The Exchange will determine the logic that provides when, how, and where orders are routed away to other exchanges. Except as provided in subparagraph (f) below, the routing broker(s) cannot change the terms of an order or the routing instructions, nor does the routing broker have any discretion about where to route an order.

(iii) The following order types are available:

(A) DNR Order. A DNR Order will never be routed outside of the Exchange regardless of the prices displayed by away markets. A DNR Order may execute on the Exchange at a price equal to or better than, but not inferior to, the best away market price but, if that best away market remains, the DNR Order will remain in the Exchange book and be displayed at a price one minimum price variation ("MPV") away from that ABBO. Any incoming order interacting with such a resting DNR Order will execute at the ABBO price, unless (1) the ABBO is improved to a price which crosses the DNR's displayed price, in which case the incoming order will execute at the previous ABBO price; (2) the ABBO is improved to a price which locks the DNR's displayed price, in which case the incoming order will execute at the DNR's displayed price. Should the best away market move to an inferior price level, the DNR Order will automatically re-price from its one MPV inferior to the original away best bid/offer price to one MPV away from the new away best bid/offer price or its original limit price.

(B) SEEK Order. SEEK is a routing option pursuant to which an order will first check the System for available contracts for execution, and then is sent to other available market centers for potential execution.

(1) If a SEEK is received during the Opening Process it may route as part of the Opening Cross pursuant to Chapter VI, Section 8(b)(7).

(2) A SEEK Order received after the Opening Process that is marketable against the ABBO will route immediately after exhausting all Exchange BBO interest at the same or better price.

(3) If the SEEK Order still has remaining size after an initial route attempt, it may: (i) trade at the next Exchange BBO price (or prices) if the SEEK Order price is locking or crossing that price (or prices) up to the next

ABBO price, and/or (ii) be entered into the Order Book at its limit price if not locking or crossing the Exchange BBO or the ABBO, except a Price Improving SEEK Order will book at its limit price and display one MPV inferior to its limit price. If the SEEK Order trades at the next Exchange BBO price (or prices) and the SEEK Order still has remaining size after the execution, then it may start a Route Timer if the SEEK Order is locking or crossing the ABBO, provided the SEEK Order is not booked at its limit price.

(4) If during the Route Timer, the ABBO markets move such that the SEEK Order is no longer marketable against the ABBO, it may: (i) trade at the next Exchange BBO price (or prices) if the SEEK Order price is locking or crossing that price (or prices), and/or (ii) be entered into the Order Book at its limit price (or one MPV inferior to its limit price for Price Improving Orders) if not locking or crossing the Exchange BBO. A SEEK Order will be included in the displayed Exchange BBO, unless the SEEK Order locks or crosses the ABBO, in which case it will be entered into the Order Book at the ABBO price and displayed one MPV inferior to the ABBO. If there exists a locked ABBO when the SEEK Order is entered onto the Order Book, the SEEK Order will display at the locked ABBO price. If during the Route Timer any new interest arrives opposite the SEEK Order that is marketable against the SEEK Order, such interest will trade against the SEEK Order at the ABBO price unless the ABBO is improved to a price which crosses the SEEK Order's displayed price, in which case the incoming order will execute at the previous ABBO price. When checking the Order Book, the System will seek to execute at the price at which it would send the order to an away market. Eligible unexecuted orders will continue to be routed as described in paragraph (B)(3).

(5) SEEK Orders booked at their limit price will subsequently be treated as DNR and will not be eligible for routing until the next time the option series is subject to an Opening Process pursuant to Chapter VI, Section 8.

(C) **SRCH Order.** SRCH Order is a routing option pursuant to which an order will first check the System for available contracts for execution, and then is sent to other available market centers for potential execution.

(1). If a SRCH Order is received during the Opening Process it may route as part of the Opening Cross pursuant to Chapter VI, Section 8(b)(7).

(2) A SRCH Order received after the Opening Process that is marketable against the ABBO will route immediately after exhausting all Exchange BBO interest at the same or better price.

(3) If the SRCH Order still has remaining size after an initial route attempt, it may: (i) trade at the next Exchange BBO price (or prices) if the SRCH Order price is locking or crossing that price (or prices) up to the next ABBO price, and/or (ii) be entered into the Order Book at its limit price if not locking or crossing the Exchange BBO or the ABBO, except a Price Improving SRCH Order will book at its limit price and display one MPV inferior to its limit price. If the SRCH Order trades at the next Exchange BBO price (or prices) and the SRCH Order still has remaining size after the execution, then it may start a Route Timer if the SRCH Order is locking or crossing the ABBO.

(4) If during the Route Timer, the ABBO markets move such that the SRCH Order is no longer marketable against the ABBO, it may: (i) trade at the next Exchange BBO price (or prices) if the SRCH Order price is locking or crossing that price (or prices), and/or (ii) be entered into the Order Book at its limit price (or one MPV inferior to its limit price for Price Improving Orders) if not locking or crossing the Exchange BBO. A SRCH Order will be included in the displayed Exchange BBO, unless the SRCH Order locks or crosses the ABBO, in which case it will be entered into the Order Book at the ABBO price and displayed one MPV inferior to the ABBO. If there exists a locked ABBO when the SRCH Order is entered onto the Order Book, the SRCH Order will display at the locked ABBO price. If during the Route Timer any new interest arrives opposite the SRCH Order that is marketable against the SRCH Order, such interest will trade against the SRCH Order at the ABBO price, unless the ABBO is improved to a price which crosses the SRCH Order's displayed price, in which case the incoming order will execute at the previous ABBO price. When checking the Order Book, the System will seek to execute at the price at which it would send the order to an away market. Eligible unexecuted orders will continue to be routed as described in paragraph (C)(3).

(5) While on the Order Book at the limit price, should the SRCH Order subsequently be locked or crossed by another market center, it may attempt to route at the conclusion of the Route Timer.

[(a) For System securities, the order routing process shall be available to Participants from 9:30 a.m. Eastern Time until market close and shall route orders as described below. Participants can designate orders as either available for routing or not available for routing. All routing of orders shall comply with Chapter XII, Options Order Protection and Locked and Crossed Market Rules.

(1) The system provides a number of routing options pursuant to which orders are sent to other available market centers for potential execution, per the entering firm's instructions. Routing options may be combined with all available order types and times-in-force, with the exception of order types and times-in-force whose terms are inconsistent with the terms of a particular routing option. The term "System routing table" refers to the proprietary process for determining the specific trading venues to

which the System routes orders and the order in which it routes them. The Exchange reserves the right to maintain a different System routing table for different routing options and to modify the System routing table at any time without notice. The system routing options are:

(A) SEEK is a routing option pursuant to which an order will first check the System for available contracts for execution. After checking the System for available contracts, orders are sent to other available market centers for potential execution, per the entering firm's instructions. When checking the book, the System will seek to execute at the price at which it would send the order to a destination market center. Eligible unexecuted orders will continue to be routed as described in paragraph (a)(1)(C). If contracts remain un-executed after routing, they are posted on the book at its limit price. While on the book, should the order subsequently be locked or crossed by another market center, the System will not route the order to the locking or crossing market center. SEEK orders will not be eligible for routing until the next time the option series is subject to a new opening or reopening.

(B) SRCH is a routing option pursuant to which an order will first check the System for available contracts for execution. After checking the System for available contracts, orders are sent to other available market centers for potential execution, per the entering firm's instructions. When checking the book, the System will seek to execute at the price at which it would send the order to a destination market center. Eligible unexecuted orders will continue to be routed as described in paragraph (a)(1)(C). If contracts remain un-executed after routing, they are posted on the book. Once on the book, should the order subsequently be locked or crossed by another market center, it will re-route.

(C) After an order is initially routed, pursuant to either the SEEK or SRCH routing option the order will post to the book and will be routed after a time period ("Route Timer") not to exceed one second as specified by the Exchange on its website provided that the order's limit price would lock or cross other market center(s). If, during the Route Timer, any new interest arrives opposite the order that is equal to or better than the ABBO price, the order will trade against such new interest at the ABBO price. Eligible unexecuted orders will be routed at the end of the Route Timer provided the order was not filled and the order's limit price would continue to lock or cross the ABBO. If an order was routed with either the SEEK or SRCH routing option, and has size after such routing, it will execute against contra side interest in the book, post in the book, and route again pursuant to the process described above, if applicable, if the order's limit price would lock or cross another market center(s).

(b) Reserved.

(c) Priority of Routed Orders. Orders sent by the System to other markets do not retain time priority with respect to other orders in the System and the System shall continue to execute other orders while routed orders are away at another market center. Once routed

by the System, an order becomes subject to the rules and procedures of the destination market including, but not limited to, order cancellation. A routed order can be for less than the original incoming order's size. If a routed order is subsequently returned, in whole or in part, that routed order, or its remainder, shall receive a new time stamp reflecting the time of its return to the System, unless any portion of the original order remains on the System, in which case the routed order shall retain its timestamp and its priority.

(d) Options Participants whose orders are routed to away markets shall be obligated to honor such trades that are executed on away markets to the same extent they would be obligated to honor a trade executed on NOM.

(e) NOM shall route orders in options via Nasdaq Execution Services, LLC ("NES"), a broker-dealer that is a member of an unaffiliated SRO which is the designated examining authority for the broker-dealer. NES serves as the Routing Facility of NOM. The sole function of the Routing Facility will be to route orders in options listed and open for trading on NOM to away markets either directly or through one or more third-party unaffiliated routing broker-dealers pursuant to NOM rules on behalf of NOM. The Exchange and NES may not use a routing broker for which the Exchange or any affiliate of the Exchange is the designated examining authority. The Routing Facility is subject to regulation as a facility of Nasdaq, including the requirement to file proposed rule changes under Section 19 of the Act.

Use of NES to route orders to other market centers is optional. Parties that do not desire to use NES must designate orders as not available for routing.

The Exchange will determine the logic that provides when, how, and where orders are routed away to other exchanges. Except as provided in subparagraph (f) below, the routing broker(s) cannot change the terms of an order or the routing instructions, nor does the routing broker have any discretion about where to route an order.

NOM shall establish and maintain procedures and internal controls reasonably designed to adequately restrict the flow of confidential and proprietary information between the Exchange and its facilities (including the Routing Facility), and any other entity; or, where there is a routing broker, the Exchange, the Routing Facility and any routing broker, and any other entity, including any affiliate of the routing broker (and if the routing broker or any of its affiliates engages in any other business activities other than providing routing services to the Exchange, between the segment of the routing broker or affiliate that provides the other business activities and the segment of the routing broker that provides the routing services).

The books, records, premises, officers, directors, agents, and employees of the Routing Facility, as a facility of the Exchange, shall be deemed to be the books, records, premises, officers, directors, agents, and employees of the Exchange for purposes of and subject to oversight pursuant to the Exchange Act. The books and records of the Routing Facility,

as a facility of the Exchange, shall be subject at all times to inspection and copying by the Exchange and the Commission.

(f) *Market Access*. In addition to the Exchange Rules regarding routing to away trading centers, NES has, pursuant to Rule 15c3-5 under the Act, implemented certain tests designed to mitigate risks associated with providing the Exchange's Members with access to such away trading centers. Pursuant to the policies and procedures developed by NES to comply with Rule 15c3-5, if an order or series of orders are deemed to be violative of applicable pre-trade requirements under Rule 15c3-5, the order will be rejected prior to routing and/or NES will seek to cancel the order if it has been routed.]

([g]b) Cancellation of Orders and Error Account

(1) – (4) No change.
