Rule 980NY. Electronic Complex Order Trading

For purposes of this Rule, an "Electronic Complex Order" means any Complex Order as defined in Rule 900.3NY (e) that is entered into the System.

* * * * *

Commentary:

.01 - **.05** No Change.

.06 Debit/Credit Price Reasonability Checks:

(a) Upon entry into the System, the Exchange will reject any incoming Electronic Complex Order that has one of the following strategies (each, a "Reasonability Check"):

(1) any complex strategy where all legs are to sell (buy) if it is entered at a price that is less (more) than the minimum (maximum) price, which is calculated as the sum of the ratio on each leg of the complex order multiplied by $0.01 (-$0.01) per leg (e.g., an order to sell (buy) 2 calls and sell (buy) 1 put would have a minimum (maximum) price of $0.03 (-$0.03)).

(2) any vertical spread strategy (i.e., an order to sell a call (put) option and to buy another call (put) option in the same security with the same expiration but at a higher (lower) strike price) when entered with a net debit price of -$0.01 or less.

(3) any calendar spread strategy (i.e., an order to sell a call (put) option with a longer expiration and to buy another call (put) option with a shorter expiration in the same security at the same strike price) when entered with a net debit price of -$0.01 or less.

(i) The Exchange may deactivate the Reasonability Check for calendar spread strategies when it believes it is necessary in the interest of a fair and orderly market, which deactivation (or re-activation) the Exchange will announce by electronic message to ATP Holders that request to receive such messages. The Reasonability Check for calendar spread strategies will not apply to Electronic Complex Orders that are entered on the Trading Floor.

(b) Any incoming Electronic Complex Order that passes the Reasonability Checks would still be subject to the Price Protection Filter, per Commentary .05 of this Rule.
