places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NYSE Arca Rules [sic] 5.3(j) designates the listing and trading of options on equity index-linked securities (“Equity Index-Linked Securities”), commodity-linked securities (“Commodity-Linked Securities”), currency-linked securities (“Currency-Linked Securities”), fixed income index-linked securities (“Fixed Income Index-Linked Securities”), futures-linked securities (“Futures-Linked Securities”) and multifactor index-linked securities (“Multifactor Index-Linked Securities”), collectively known as “Index-Linked Securities” (as defined in NYSE Arca Equities Rule 5.2(j)(6)) that are principally traded on a national securities exchange and an “NMS Stock” (as defined in Rule 600 of Regulation NMS under the Securities and Exchange Act of 1934). The Exchange proposes to amend the definition of Futures-Linked Securities for the trading of options on Index-Linked Securities to include products linked to CBOE Volatility Index (VIX) Futures. This proposal is substantially similar to the previously approved NYSE Arca Equities Rule 5.2(j)(6)(v).⁴

Specifically, the Exchange proposes to add the CBOE Volatility Index (VIX) Futures to the definition of a Futures Reference Asset in NYSE Arca Rule 5.3(j)(1)(E).

Index-Linked Securities are designed for investors who desire to participate in a specific

market segment by providing exposure to one or more identifiable underlying securities, commodities, currencies, derivative instruments or market indexes of the foregoing ("Underlying Index" or "Underlying Indexes"). Index-Linked Securities are the non-convertible debt of an issuer that have a term of at least one (1) year but not greater than thirty (30) years. Despite the fact that Index-Linked Securities are linked to an underlying index, each trade as a single, exchange-listed security. Accordingly, rules pertaining to the listing and trading of standard equity options apply to Index-Linked Securities.

Currently, the Exchange will consider listing and trading options on Index-Linked Securities provided the Index-Linked Securities meet the criteria for underlying securities set forth in Rule 5.3(a)-(b).

Index-Linked Securities must meet the criteria and guidelines for underlying securities set forth in Rule 5.3(a); or the Index-Linked Securities must be redeemable at the option of the holder at least on a weekly basis through the issuer at a price related to the applicable underlying Reference Asset.⁵ In addition, the issuing company is obligated to issue or repurchase the securities in aggregation units for cash or cash equivalents satisfactory to the issuer of Index-Linked Securities which underlie the option as described in the Index-Linked Securities prospectus.

Options on Index-Linked Securities will continue to be subject to all Exchange rules governing the trading of equity options. The current continuing or maintenance listing standards for options traded on NYSE Arca will continue to apply.

⁵ For the purposes of Rule 5.3(j), Equity Reference Assets, Commodity Reference Assets, Currency Reference Assets, Fixed Income Reference Assets, Futures Reference Assets and Multifactor Reference Assets, will be collectively referred to as "Reference Assets", as defined in NYSE Arca Equities Rule 5.2(j)(6).

The VIX

The information in this filing relating to the VIX was taken from the Web site of the Chicago Board Options Exchange (the “CBOE”).

The VIX was originally developed by the CBOE in 1993 and was calculated using S&P 100® Index options. The current methodology for the VIX was introduced by the CBOE in September 2003 and it is now an index that uses the quotes of certain S&P 500® Index (“SPX”) option series to derive a measure of the volatility of the U.S. equity market. The VIX measures market expectations of near term volatility conveyed by the prices of options on the SPX. It provides investors with up-to-the-minute market estimates of expected stock market volatility over the next 30 calendar days by extracting implied volatilities from real-time index option bid/ask quotes.

VIX Futures

Information regarding VIX Futures can be found on the Web site of the CBOE Futures Exchange (the “CFE”).

The CFE began listing and trading VIX Futures since March 26, 2004 under the ticker symbol VX. VIX Futures trade between the hours of 8:30 a.m. - 3:15 p.m. Central Time (Chicago Time).

2. Statutory Basis

practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanisms of a free and open market and a national market system, and, in general, to protect investors and the public interest. The Exchange believes that the proposed rules applicable to trading pursuant to generic listing and trading criteria, together with the Exchange's surveillance procedures applicable to trading in the securities covered by the proposed rules, serve to foster investor protection.
