expirations in the same class are not counted as part of the maximum numbers of Monthly Option Series expirations for a class.

(3) Settlement. Monthly Options Series will be P.M.-settled.

(4) Initial Series. The strike price of each Monthly Options Series will be fixed at a price per share, with at least two, but no more than five, strike prices above and at least two, but no more than five, strike prices below the value of the underlying index or price of the underlying security at about the time that a Monthly Options Series is opened for trading on the Exchange. .07 Short Term Option Series Program.

(a) After an option class has been approved for listing and trading on the Exchange, the Exchange may open for trading on any Thursday or Friday that is a business day ("Short Term Option Opening Date") series of options on that class that expire on each of the next five Fridays that are business days and are not Fridays in which standard expiration options series, [m]Monthly [o]Options [s]Series, or Quarterly Options Series expire ("Friday Short Term Option Expiration Dates"). The Exchange may have no more than a total of five Friday Short Term Option Expiration Dates ("Short Term Option Weekly Expirations"). If the Exchange is not open for business on the respective Thursday or Friday, the Short Term Option Opening Date for Short Term Option Weekly Expirations will be the first business day immediately prior to that respective Thursday or Friday. Similarly, if the Exchange is not open for business on the Friday of the following business week, the Short Term Option Expiration Date for Short Term Weekly Expirations will be the first business day immediately prior to that Friday. Short Term Option Series shall be P.M. settled, except for Short Term Option Series on indexes. Short Term Option Series on indexes shall be A.M. settled.

For each option class eligible for participation in the Short Term Option Series Program, the Exchange may open up to 30 Short Term Option Series for each expiration date in that class. The Exchange may also open Short Term Option Series that are opened by other securities exchanges in option classes selected by such exchanges under their respective short term option rules.

No Short Term Option Series (with the exception of Short Term Option Daily Expirations) may expire in the same week in which [monthly options series]standard expiration options series on the same class expire or, in the case of Monthly Options Series or Quarterly Options Series, on an expiration that coincides with an expiration of Monthly or Quarterly Option Series on the same class.

(f) Strike Interval Limitations. When Short Term Option Series in equity options (excluding options on Exchange-Traded Fund Shares and Index- Linked Securities) have an expiration more than 21 days from the listing date, the table below, which specifies the applicable interval for listing, will apply. To the extent there is a conflict between applying Commentary .07(e) and the below table, the greater interval would apply.

Tier	Average Daily Volume	Share Price					
		<u>Less than \$2.50</u>	<u>\$2.50 to Less than \$25</u>	\$25 to less than \$75	\$75 to less than \$150	\$150 to less than \$500	\$500 or greater

1	Greater than 5,000	<u>\$0.50</u>	\$0.50	\$1.00	\$1.00	\$5.00	\$5.00
2	Greater than 1,000 to 5,000	<u>\$0.50</u>	\$1.00	\$1.00	\$1.00	\$5.00	\$10.00
3	0 to 1,000	<u>\$0.50</u>	\$2.50	\$5.00	\$5.00	\$5.00	\$10.00

(1) The Share Price is the closing price on the primary market on the last day of the calendar quarter. In the event of a corporate action, the Share Price of the surviving company is utilized.

(2) The Average Daily Volume is the total number of option contracts traded in a given security for the applicable calendar quarter divided by the number of trading days in the applicable calendar quarter. Beginning on the second trading day in the first month of each calendar quarter, the Average Daily Volume is calculated by utilizing data from the prior calendar quarter based on Customer cleared volume at OCC. For options listed on the first trading day of a given calendar quarter, the Average Daily Volume is calculated using the quarter prior to the last trading calendar quarter.

(3) Options that are newly eligible for listing pursuant to Rule 5.3-O and designated to participate in the Short Term Option Program will not be subject to this subparagraph (f) until after the end of the first full calendar quarter following the date the option class was first listed for trading on any options market.

(g) Short Term Option Daily Expirations. In addition to the above, the Exchange may open for trading series of options on the symbols provided in Table 1 below that expire at the close of business on each of the next two Mondays, Tuesdays, Wednesdays, and Thursdays, respectively, that are business days beyond the current week and are not business days on which standard expiration options series, [m]Monthly [o]Options [s]Series, or Quarterly Options Series expire (“Short Term Option Daily Expirations”). The Exchange may have no more than a total of two Short Term Option Daily Expirations beyond the current week for each of Monday, Tuesday, Wednesday, and Thursday expirations at one time. Short Term Option Daily Expirations would be subject to this paragraph (g).
