* The amount of the charge for Connectivity to Trading Floor may differ based on the connectivity chosen: (a) a virtual control circuit between the Mahwah data center and a single Trading Floor (“VCC”), or (b) a virtual routing and forwarding service between the Mahwah data center and one or more Trading Floors (“VRF”). Specifically, if the User chooses VCCs or combination of a VCC and VRF for connectivity to several Trading Floors, it will be charged separately for each connection. If the User chooses one VRF for connectivity to multiple trading floors, the User will be charged for one connection.
