Subject: Re: [chai-finance/api-server] ** [12/12/2019] Columbus-3 patch (#544)

@devilcode approved this pull request.

Checked – there would be almost no impact on the Chai service as you said.

Great job on responding to Col-3 at Chai in such a short time!**

Also, could you make an Asana task related to this task and upload it on the backend board? I intend to manage all tasks to be released through quests! Once you make it and send it over to the backend board, I will pick it up from there.

In src/lib/payment/confirm.ts:

```
> @@ - 103,10+106,9 @@ async function processConfirm(payment: PaymentEntity, merchant: MerchantEntity):

        });

    });

- // tempura transaction

- if (payment.billingAmount > 0) {

-   await lp.claimDON(payment.user.id, merchant.id, payment.billingAmount) ;

- }

+ // tempura payment

+ await lp.claimDON(payment.user.id, 'm:${merchant.id}', payment.billingAmount); // payment approval (user > merchant)

+ await lp.ClaimDON ( 'lp', 'm:${merchant.id}', payment.discountAmount); // promotion approval (lp > merchant)
```

I guess you added 'm:' in front of the merchant uuid in order to prevent the user uuid and the merchant uuid from overlapping just in case!

But it might be a good idea to put it as a function in the lp if it could be used in many places.

In src/user/registration.ts:

D1215, Page 2 of 3

> @@ - 251,8 + 251,9 @@ export async function register (data: RegisterInterface): Promise<ActiveUser I Us

```
            }

        );
```

- // make 0 KRW transaction to create wallet

- await lp.claimDON(userEntity.id, '6ccbeea2-ac0f-42e0-b7ab-eebc4f7e9bd7', 0);

+ // tempura creation (charge 1 KRW, withdraw 1 KRW)

+ await lp.claimDON('lp', userEntity.id, 1); // charge (lp>user)

I wonder if 'lp' should also be in the lp module as a constant along with the function for formatting merchant uuid.
