CONFIDENTIAL PURSUANT TO PROTECTIVE ORDER

Messages in chronological order (times are shown in GMT +00:00)

dev-old-station – 2019/09/08

S **Sim <sim@terra.money>** 9/8/2019, 8:48 AM  
I've completed the deployment to the staging environment after addressing the following three issues:  
\*Resolved the issue where the list of denominations for Issuance cards was displayed in two rows on certain browser widths.  
\*Fixed the issue where resizing the browser caused the layout of the chart to be misaligned.  
\*Changed the title from "Tax proceeds" to "Daily tax proceeds".  
- Regarding this issue, there doesn't seem to be any disagreement about specifying it as "Daily," so I went ahead and changed the title.  
- Once we confirm what data users might be interested in or what we want to show, we can adjust the work accordingly.

D **Do Kwon <do@terra.money>** 9/8/2019, 8:53 AM  
^ Showing "daily" for tax proceeds might not be suitable... I don't think users are particularly interested in how much daily tax revenue was generated.

D **Do Kwon <do@terra.money>** 9/8/2019, 8:53 AM  
The cumulative tax proceeds for the specified time period are important.

S **Sim <sim@terra.money>** 9/8/2019, 8:55 AM  
Or how about showing both cumulative and daily tax proceeds, similar to the Account growth chart? The default could be cumulative. Do Kwon

D **Do Kwon <do@terra.money>** 9/8/2019, 8:57 AM  
Is this lp-server not running as we expected it to be? Paul Kim

D **Do Kwon <do@terra.money>** 9/8/2019, 8:57 AM  
If these graphs are correct, it seems we're not growing much.

D **Do Kwon <do@terra.money>** 9/8/2019, 8:57 AM  
Haha

D **Do Kwon <do@terra.money>** 9/8/2019, 8:57 AM  
is this a loading issue?

D **Do Kwon <do@terra.money>** 9/8/2019, 8:58 AM  
This is the chai metric

D **Do Kwon <do@terra.money>** 9/8/2019, 8:58 AM  
and it represents the amount being sent from LP to Columbus

D **Do Kwon <do@terra.money>** 9/8/2019, 8:58 AM  
I'm not sure what "active" means... facepalm

D **Do Kwon <do@terra.money>** 9/8/2019, 8:59 AM  
Why is active different from total?

D **Do Kwon <do@terra.money>** 9/8/2019, 8:59 AM  
from genesis active /= from genesis total???

P **Paul Kim <paul@terra.money>** 9/8/2019, 9:42 AM  
It's not a loading issue with the lp server

P **Paul Kim <paul@terra.money>** 9/8/2019, 9:43 AM  
It was not running because transactions were failing in the middle, but it's now running almost in real-time

P **Paul Kim <paul@terra.money>** 9/8/2019, 9:45 AM  
Even when it wasn't running, transactions were being queued, so after resolving the issue, we processed the accumulated queue in just one day, resulting in a

CONFIDENTIAL PURSUANT TO PROTECTIVE ORDER

high volume.

P **Paul Kim <[redacted]>** 9/8/2019, 9:55 AM  
Our chai revenue is being recorded as the discounted payment amount, not directly as Terra transactions.

D **Do Kwon <[redacted]>** 9/8/2019, 10:28 AM  
I see

D **Do Kwon <[redacted]>** 9/8/2019, 10:29 AM  
You haven't applied bolt yet, right?

D **Do Kwon <[redacted]>** 9/8/2019, 10:29 AM  
I'll work on writing the upgrade spec.

P **Paul Kim <[redacted]>** 9/8/2019, 10:53 AM  
Okay

S **Sim <[redacted]>** 9/8/2019, 6:32 PM  
<<https://station.terra-project.now.sh>>  
Tax proceeds have been updated in FCD to display the cumulative value.  
Please take a look and provide feedback! Do Kwon Brian Jung

A **Aiden Lee <[redacted]>** 9/8/2019, 6:40 PM  
Also, apart from staking return, we can fetch historical data from transactions, so I've filled it up to the genesis. We can't calculate staking return because we can't estimate the staking ratio, so FCD will show data from the day it started fetching data onwards.
