ADVISORY SERVICES OFFERED

RECOMMENDATION AND MONITORING OF THIRD-PARTY INVESTMENT ADVISER SERVICES

We will recommend the services of a third-party investment adviser (“Co-adviser”) to manage your account(s). We work with you to select a model portfolio based upon your objectives, time frame risk parameters, and other investment considerations. Once we have this suitability information, we will recommend one or several of the Co-adviser’s model portfolios to you. You are never obligated to use a recommended Co-Adviser.

Before recommending the Co-adviser, we review the following factors fees, reputation, performance, financial strength, management, price, reporting capabilities, and your financial situation, goals, needs, and investment objectives. After we engage the Co-advisor, we continue to monitor them and your financial situation.

With a Co-advisor relationship, the Co-adviser is responsible for portfolio management, best execution, portfolio reporting, trading, trade error resolution, fee billing and custodian reconciliations. We maintain our relationship with you by monitoring the status of your accounts with the Co-adviser, making recommendation about the Co-adviser, meeting with you in person or by telephone on annually, and acting as your primary financial adviser. Additionally, we retain the discretion to establish or termination the Co-adviser and any model on their platforms.

When you are referred to a Co-adviser, you will receive full disclosure, including services rendered and fee schedules, at the time of the referral, by delivery of a copy of the relevant Co-adviser’s Form ADV Part 2A or equivalent disclosure document before receiving investment advisory services from the Co-adviser. The Co-adviser offers separate services that are outlined in their ADV Part 2A.

Item 5 – Fees and Compensation

RECOMMENDATION AND MONITORING OF THIRD-PARTY INVESTMENT ADVISERS

We charge an annual management fee based on a percentage of assets under management in your account. Our annual fee ranges from 0.10% to 2.00%. The Co-adviser's fee is included in our management. The fee is negotiable and varies based on the size of the account. The management fee is calculated and billed by the Co-adviser monthly in arrears based upon the average daily balance of the assets held in the account over the calendar month. We will rely upon the valuations provided by the custodian without independent verification.

We will ask you to authorize the Co-adviser to instruct the custodian to withdraw our management fee and the Co-adviser's management fee directly from your account. You may terminate this authorization at any time. Please see Item 15 for additional details regarding fee deduction.

Our management fee does not include brokerage commissions, transaction fees, or other related costs and expenses that are incurred by you. You may incur certain charges imposed by custodians, brokers, third-party investment advisers, and other third parties such as fees charged by managers, custodial fees, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions. Mutual funds and exchange traded funds also charge internal management fees, which are disclosed in a fund's prospectus. These charges, fees, and commissions are exclusive of and in addition to our fee and we will not receive any portion of these charges, fees, or commissions.

TERMINATION OF SERVICES

You may terminate our any service for any reason with the first five (5) business days after signing the contract without any cost or penalty. Thereafter, the contract may be terminated at any time by giving ten (10) days' written notice to Senior Tax Advisory Group, Inc., 6775 Rangewood Dr., Colorado Springs, CO 80918 or you may contact the Co-adviser directly at the address located on its ADV Part 2A and Investment Management Agreement. You will be charged the fee up to and including the date of termination on a prorate basis.

OTHER SECURITIES COMPENSATION

As established in Item 10.D – Other Industry Affiliations, earning commissions for the sale of insurance products creates a conflict of interest for the firm. The commissions a financial incentive to recommend and sell you the insurance products. We attempt to mitigate the conflict of interest to the best of our ability by placing your interests ahead of our own and through the implementation of policies and procedures that address the conflict.

RETIREMENT ROLLOVER CONFLICTS OF INTEREST

When we recommend you rollover a retirement account for us to manage, this creates a financial incentive because we charge a fee for our services. We attempt to mitigate the conflict of interest by acting in your best interest and applying an impartial conduct standard to all rollovers. Please note that you are not under any obligation to roll over a retirement account to an account

managed by us.

Item 6 – Performance-Based Fees and Side by Side Management

We do not charge any performance-based fees (fees based on a share of capital gains on or capital appreciation of your assets) or provide side by side management.

Item 7 – Types of Clients

We offer our services to individuals and high net worth individuals. We do not require a minimum account size.

Item 8 – Methods of Analysis, Investment Strategies and Risk of Loss

METHODS OF ANALYSIS AND INVESTMENT STRATEGIES

We use asset allocation as our investment strategy to create your portfolio. Asset allocation is an investment strategy that aims to balance risk and reward by apportioning a portfolio's assets according to an individual's goals, risk tolerance and investment horizon. The asset classes typically include exchange-traded funds that consist of equities, fixed-income, international equity or fixed-income securities, or cash and equivalents. The benefit of asset allocation is that each class have different levels of risk and return, so each will behave differently over time. The risk associated with asset allocation is that there is no guarantee that diversification among asset classes will grow a portfolio.

INVESTMENT RISKS

All investment programs have certain risks that are born by you and **investing in securities involves risk of loss that you should be prepared to bear**. Our goal is to reduce the risk of loss, but not at the expense of portfolio growth. A recommended subadvisor's investment strategies seek to balance risks and rewards to achieve your investment objectives. You should feel free to ask us questions about risks that you do not understand.

RECOMMENDED SECURITIES

Several types of securities will be used in your account. These include, but are not limited to, exchange traded funds (ETFs). Risks associated with these types of securities include:

- **Credit Risk:** This is the risk that an issuer of a bond in an exchanged traded fund could suffer an adverse change in financial condition that results in a payment default, security downgrade, or inability to meet a financial obligation.
- **Inflation Risk:** This is the risk that inflation will undermine the performance of an investment or the future purchasing power of your assets.
- **Interest Rate Risk:** The chance that bond prices overall will decline because of rising interest rates.
- **International Investing Risk:** Investing in the securities of non-U.S. companies involves special risks not typically associated with investing in U.S. companies. Foreign securities tend to be more volatile and less liquid than investments in U.S. securities, and may lose

value because of adverse political, social, or economic developments overseas or due to changes in the exchange rates between foreign currencies and the U.S. dollar. In addition, foreign investments are subject to settlement practices, as well as regulatory and financial reporting standards, that differ from those of the U.S.

- **Exchange Traded Funds (ETFs) Risk:** ETFs are typically investment companies that are legally classified as open end mutual funds or UITs, however, they differ from traditional mutual funds because ETF shares are listed on a securities exchange. Shares can be bought and sold through the trading day like shares of other publicly traded companies. ETF shares may trade at a discount or premium to their net asset value. This difference between the bid price and the asking price is often referred to as the “spread”. The spread varies overtime based on the ETF’s trading volume and market liquidity and is generally lower if the ETF has a lot of trading volume and market liquidity and higher if the ETF has little trading volume and market liquidity. Although, many ETFs are registered as investment companies under the Investment Company Act of 1940 like traditional mutual funds, some ETFs, including those that investment in commodities or alternative investments, are not registered as investment companies.
- **Manager Risk:** The chance that the proportions allocated to the various securities will cause your account to underperform relevant to benchmarks or other accounts with a similar investment objective.
- **Stock market risk:** The chance that stock prices overall will decline. Stock markets tend to move in cycles, with periods of rising stock prices and periods of falling stock prices.

The commissions give them a financial incentive to recommend and sell you insurance products. However, they attempt to mitigate any conflicts of interest to the best of their ability by acting in your best interest and by implementing policies and procedures that address the conflict. Additionally, we inform you that you always

have the right to choose whether to act on the recommendation and that you always have the right to purchase recommended insurance through any licensed insurance agent or agency.
