Item 18: Financial Information.....	11

## **Item 4: Advisory Business**

### **A. Description of the Advisory Firm**

Finfare Advisors LLC (hereinafter “FA”) is a Limited Liability Company organized in the State of Delaware. The firm was formed in July 2023, and the principal owner is Finfare Wealth LLC.

### **B. Types of Advisory Services**

#### ***Robo-Advisory Portfolio Management Services***

FA provides “robo-advisory” portfolio management services through a mobile app. This entails the use of algorithm-based portfolio management advice, rather than in-person investment advice. Clients will upload their statements to the portal/platform. The mobile app will make recommendations based on the information uploaded to the portal/platform by the client. These automated investment solutions are customized to each client and based on individual characteristics, such as the client’s age, risk tolerance, income, and current assets, among others. FA’s investment advisory personnel oversee the algorithm but may not monitor each client’s account. Clients are encouraged to update their account/questionnaire with any change in their objectives, risk tolerance, or other pertinent information, as that information factors into the portfolio’s composition.

#### ***Services Limited to Specific Types of Investments***

FA generally limits its investment advice to mutual funds, equities and ETFs (including ETFs in the gold and precious metal sectors). FA may use other securities as well to help diversify a portfolio when applicable.

#### ***Written Acknowledgement of Fiduciary Status***

When we provide investment advice to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule’s provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice);
- Never put our financial interests ahead of yours when making recommendations (give loyal advice);
- Avoid misleading statements about conflicts of interest, fees, and investments;

- Follow policies and procedures designed to ensure that we give advice that is in your best interest;
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

### C. Client Tailored Services and Client Imposed Restrictions

FA provides online “robo-advisory” portfolio management. Client accounts are generally invested into a target allocation depending on the client’s individual profile. This automated approach factors in client financial situation and risk tolerance, although the algorithms used to provide advisory services are designed to be utilized by FA across multiple clients. Clients may not impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs.

### D. Wrap Fee Programs

A wrap fee program is an investment program where the investor pays one stated fee that includes management fees and transaction costs. FA does not participate in wrap fee programs.

### E. Assets Under Management

FA has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$0	\$0	February 2024

## Item 5: Fees and Compensation

### A. Fee Schedule

#### *Robo-Advisory Portfolio Management Services Fees*

FA provides robo-advisory portfolio management services via a mobile app.

Total Assets Under Management	Annual Fees
All Assets	0.30%

FA uses an average of the daily balance in the client's account throughout the billing period, after taking into account deposits and withdrawals, for purposes of determining the market value of the assets upon which the advisory fee is based.

The final fee schedule will be memorialized in the client's advisory agreement. Clients may terminate the agreement without penalty for a full refund of FA's fees within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract immediately upon written notice.

## **B. Payment of Fees**

### ***Payment of Robo-Advisory Portfolio Management Fees***

Asset-based robo-advisory portfolio management fees are withdrawn directly from the client's accounts with client's written authorization on a quarterly basis. Fees are paid in arrears.

## **C. Client Responsibility For Third Party Fees**

Clients are responsible for the payment of all third-party fees (i.e. custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.). Those fees are separate and distinct from the fees and expenses charged by FA. Please see Item 12 of this brochure regarding broker-dealer/custodian.

## **D. Prepayment of Fees**

FA collects its fees in arrears. It does not collect fees in advance.

## **E. Outside Compensation For the Sale of Securities to Clients**

Neither FA nor its supervised persons accept any compensation for the sale of investment products, including asset-based sales charges or service fees from the sale of mutual funds.

# **Item 6: Performance-Based Fees and Side-By-Side Management**

FA does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

# **Item 7: Types of Clients**

FA generally provides advisory services to the following types of clients:

- ❖ Individuals
- ❖ High-Net-Worth Individuals

There is no account minimum for any of FA's services.

## Item 8: Methods of Analysis, Investment Strategies, & Risk of Loss

### A. Methods of Analysis and Investment Strategies

#### *Methods of Analysis*

FA's methods of analysis include Fundamental analysis and Modern portfolio theory.

**Fundamental analysis** involves the analysis of financial statements, the general financial health of companies, and/or the analysis of management or competitive advantages.

**Modern portfolio theory** is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various asset.

#### *Investment Strategies*

FA uses long term trading.

**Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.**

### B. Material Risks Involved

#### *Methods of Analysis*

**Fundamental analysis** concentrates on factors that determine a company's value and expected future earnings. This strategy would normally encourage equity purchases in stocks that are undervalued or priced below their perceived value. The risk assumed is that the market will fail to reach expectations of perceived value.

**Modern portfolio theory** assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

## *Investment Strategies*

**Long-term trading** is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

**Robo-advisory services** use algorithms as the basis of the management process. Risks of this approach include, but are not limited to, that the algorithm might rebalance client accounts without regard to market conditions, that the accounts may be automatically rebalances on a more frequent basis or a less frequent basis than the client might expect, and that the algorithm may not address prolonged changes in market conditions. Additionally, clients should be aware that responses to the adviser's suitability questionnaire are typically the sole basis for the portfolio's allocation.

**Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.**

### **C. Risks of Specific Securities Utilized**

Clients should be aware that there is a material risk of loss using any investment strategy. The investment types listed below are not guaranteed or insured by the FDIC or any other government agency.

**Mutual Funds:** Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

**Equity** investment generally refers to buying shares of stocks in return for receiving a future payment of dividends and/or capital gains if the value of the stock increases. The value of equity securities may fluctuate in response to specific situations for each company, industry conditions and the general economic environments.

**Exchange Traded Funds (ETFs):** An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Risks in investing in ETFs include trading risks, liquidity and shutdown risks, risks associated with a change in authorized participants and non-participation of authorized participants, risks that trading price differs from indicative net asset value (iNAV), or price fluctuation and disassociation from the index being tracked. With regard to trading risks, regular trading adds cost to your portfolio thus counteracting the low fees that one of the typical benefits of ETFs.

Additionally, regular trading to beneficially “time the market” is difficult to achieve. Even paid fund managers struggle to do this every year, with the majority failing to beat the relevant indexes. With regard to liquidity and shutdown risks, not all ETFs have the same level of liquidity. Since ETFs are at least as liquid as their underlying assets, trading conditions are more accurately reflected in implied liquidity rather than the average daily volume of the ETF itself. Implied liquidity is a measure of what can potentially be traded in ETFs based on its underlying assets. ETFs are subject to market volatility and the risks of their underlying securities, which may include the risks associated with investing in smaller companies, foreign securities, commodities, and fixed income investments (as applicable). Foreign securities in particular are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. ETFs that target a small universe of securities, such as a specific region or market sector, are generally subject to greater market volatility, as well as to the specific risks associated with that sector, region, or other focus. ETFs that use derivatives, leverage, or complex investment strategies are subject to additional risks. Precious Metal ETFs (e.g., Gold, Silver, or Palladium Bullion backed “electronic shares” not physical metal) specifically may be negatively impacted by several unique factors, among them (1) large sales by the official sector which own a significant portion of aggregate world holdings in gold and other precious metals, (2) a significant increase in hedging activities by producers of gold or other precious metals, (3) a significant change in the attitude of speculators and investors. The return of an index ETF is usually different from that of the index it tracks because of fees, expenses, and tracking error. An ETF may trade at a premium or discount to its net asset value (NAV) (or indicative value in the case of exchange-traded notes). The degree of liquidity can vary significantly from one ETF to another and losses may be magnified if no liquid market exists for the ETF’s shares when attempting to sell them. Each ETF has a unique risk profile, detailed in its prospectus, offering circular, or similar material, which should be considered carefully when making investment decisions.

**Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.**

## **Item 9: Disciplinary Information**

### **A. Criminal or Civil Actions**

There are no criminal or civil actions to report.

### **B. Administrative Proceedings**

There are no administrative proceedings to report.

### **C. Self-regulatory Organization (SRO) Proceedings**

There are no self-regulatory organization proceedings to report.

## **Item 10: Other Financial Industry Activities and Affiliations**

### **A. Registration as a Broker/Dealer or Broker/Dealer Representative**

Neither FA nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

### **B. Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor**

Neither FA nor its representatives are registered as or have pending applications to become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

### **C. Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests**

Neither FA nor its representatives have any material relationships to this advisory business that would present a possible conflict of interest.

### **D. Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections**

FA does not utilize nor select third-party investment advisers.

## **Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading**

### **A. Code of Ethics**

FA has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. FA's Code of Ethics is available free upon request to any client or prospective client.

## **B. Recommendations Involving Material Financial Interests**

FA does not recommend that clients buy or sell any security in which a related person to FA or FA has a material financial interest.

## **C. Investing Personal Money in the Same Securities as Clients**

From time to time, representatives of FA may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of FA to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. FA will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

## **D. Trading Securities At/Around the Same Time as Clients' Securities**

From time to time, representatives of FA may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of FA to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, FA will never engage in trading that operates to the client's disadvantage if representatives of FA buy or sell securities at or around the same time as clients.

# **Item 12: Brokerage Practices**

## **A. Factors Used to Select Custodians and/or Broker/Dealers**

Custodians/broker-dealers will be recommended based on FA's duty to seek "best execution," which is the obligation to seek to execute securities transactions for a client on terms that are the most favorable to the client under the circumstances. The client will not necessarily pay the lowest commission or commission equivalent, and FA may also consider the market expertise and research access provided by the payment of commissions, including but not limited to access to written research, oral communication with analysts, admittance to research conferences and other resources provided by the brokers to aid in the research efforts of FA. FA will never charge a premium or commission on transactions, beyond the actual cost imposed by the broker-dealer/custodian. FA requires that assets to be managed are held with Apex Clearing Corporation.

### ***1. Research and Other Soft-Dollar Benefits***

FA receives no research, product, or services other than execution from a broker-dealer or third-party in connection with client securities transactions ("soft dollar benefits").

### ***2. Brokerage for Client Referrals***

FA receives no referrals from a broker-dealer or third party in exchange for using that broker-dealer or third party.

### ***3. Clients Directing Which Broker/Dealer/Custodian to Use***

FA will require clients to use a specific broker-dealer to execute transactions.

## **B. Aggregating (Block) Trading for Multiple Client Accounts**

FA does not aggregate or bunch the securities to be purchased or sold for multiple clients. This may result in less favorable prices, particularly for illiquid securities or during volatile market conditions.

# **Item 13: Review of Accounts**

## **A. Frequency and Nature of Periodic Reviews and Who Makes Those Reviews**

Robo-advisory portfolio management accounts are not reviewed by FA, save for automated allocation revisions. Clients are encouraged to update their account with any change in their objectives, risk tolerance, or other pertinent information, as that information factors into the portfolio's composition.

## **B. Factors That Will Trigger a Non-Periodic Review of Client Accounts**

Robo-advisory portfolio management accounts do not undergo non-periodic review by FA, although allocations may change based on material market, economic, or political events and/or changes to the client's profile in accordance with FA's automated portfolio management.

## **C. Content and Frequency of Regular Reports Provided to Clients**

Robo-advisory portfolio management clients will receive at least quarterly a written report that details the client's account including assets held and asset value, which report will come from the custodian.

## **Item 14: Client Referrals and Other Compensation**

### **A. Economic Benefits Provided by Third Parties for Advice Rendered to Clients (Includes Sales Awards or Other Prizes)**

FA does not receive any economic benefit, directly or indirectly from any third party for advice rendered to FA's clients.

### **B. Compensation to Non - Advisory Personnel for Client Referrals**

FA does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

## **Item 15: Custody**

FA does not take custody of client accounts at any time. Custody of client's accounts is held primarily at the client's custodian. Clients will receive account statements from the custodian and should carefully review those statements for accuracy.

## **Item 16: Investment Discretion**

FA provides discretionary investment advisory services to clients. The Investment Advisory Contract established with each client outlines the discretionary authority for trading. FA manages the client's account and makes investment decisions without consultation with the client as to what securities to buy or sell, when the securities are to be bought or sold for the account, the total amount of the securities to be bought/sold, or the price per share.

## **Item 17: Voting Client Securities (Proxy Voting)**

FA will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

## **Item 18: Financial Information**

### **A. Balance Sheet**

FA neither requires nor solicits prepayment of more than \$1,200 in fees per client, six months or more in advance, and therefore is not required to include a balance sheet with this brochure.

### **B. Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients**

Neither FA nor its management has any financial condition that is likely to reasonably impair FA's ability to meet contractual commitments to clients.

### **C. Bankruptcy Petitions in Previous Ten Years**

FA has not been the subject of a bankruptcy petition in the last ten years.
