Item 4 - Advisory Business

The Firm & Principal Owners

Hoisington Investment Management Company (“HIMCo” or “the firm”) is an independent investment adviser registered under the Investment Advisers Act of 1940. Its principal place of business is in Austin, Texas. HIMCo has been providing fixed income investment management services since 1980. The firm was founded by Van R. Hoisington and is operated and managed by:

- Van R. Hoisington, Chief Executive Officer
- Van R. Hoisington Jr. (“V.R.”), President and Chief Operating Officer
- David M. Hoisington, Executive Vice President and Chief Compliance Officer

Van R. Hoisington Jr. and David Hoisington are principal owners (i.e., control more than 25% of the firm).

HIMCo has a five-person Investment Committee that has worked together since 1996. The Investment Committee researches economic issues affecting the inflationary environment in the U.S. and its effect on HIMCo’s investment strategy.

There are no subsidiary companies or affiliates.

We offer our clients the following types of advisory services:

1. Portfolio Management for Separately Managed Accounts

We manage customized fixed income portfolios for separate accounts on a discretionary basis. Portfolio assets are limited to U.S. Treasury securities and cash equivalents. Examples of U.S. Treasury securities include:

- U.S. Treasury bonds, bills and notes
- Treasury zero coupon bonds (“STRIPS”)
- Treasury Inflation Protected Securities (“TIPS”)
- Treasury floating rate notes (“FRNS”)
- Repurchase agreements collateralized by Treasuries

We are able to tailor advisory services to the individual needs of clients. For example, certain clients have specific income requirements. We accommodate such income needs by investing only in coupon bearing securities.

We provide continuous and regular management services under a written Investment Advisory Agreement (“Agreement”) that is cancellable by the client within five

business days of execution without penalty or fees, thereafter, by either party upon thirty days' written notice. We provide investment management services for mainly institutional clients: pension and profit-sharing plans; 401(k) plans; charitable organizations; state or municipal government retirement plans; pooled investment vehicles; insurance companies and other corporations or partnerships.

Occasionally, we will accept high net worth individual clients. We require that all new accounts have a value of at least one million dollars.

2. Portfolio Management for Sub-adviser Relationships

Mutual Fund - Since 1996, we have been the sub-adviser for the Wasatch-Hoisington U.S. Treasury Fund (ticker symbol, WHOSX). We sub-advise WHOSX (the "Fund") through a sub-advisory agreement with Wasatch Advisors, LP, a non-affiliated federally registered investment adviser. Wasatch Advisors, LP, d/b/a Wasatch Global Investors, is the investment adviser to the Fund. More information on this fund can be obtained by calling (800) 551-1700 or online at www.wasatchglobal.com.

Private Funds - We also have sub-adviser relationships with two private funds. We manage the private funds in the same manner as our other accounts.

As of December 31, 2023, we had client assets under management of approximately \$3,721,500,000, all of which are managed on a discretionary basis.

Item 5 - Fees and Compensation

Fee Schedule

The firm charges advisory fees for discretionary account management based on a percentage of the market value of the account's assets at the end of each quarter. We charge fees for new clients under the following fee schedule:

Adviser's Fee Schedule

.45% on the first \$10 million
.35% on the next \$40 million
.25% on the next \$50 million
.15% on the next \$400 million
.05% on amounts above \$500 million

The minimum quarterly fee is \$5,625 and the minimum account size is \$1 million.

Accounts valued below \$5 million will be subject to the minimum quarterly fee which means the annual fee rate will exceed .45%. Quarterly fees are calculated as $\frac{1}{4}$ of the annual rate. Fees are prorated (using the actual number of days in the quarter) if we have served as investment manager for less than the full calendar quarter and for any contributions to or withdrawals from the account during the quarter. Fees are payable by each client quarterly, in arrears, based upon the ending market value ("EMV") of the account, including cash and accrued interest, on the last business day of each calendar quarter. For billing purposes, the value of the account is the value as reflected in our performance measurement and investment accounting system. There is the possibility that there will be differences between the account value on the client's custodial statement and the account value in our investment accounting system due to different pricing services used and minor variances in accrued income calculations.

Although HIMCo has established the aforementioned fee schedule, we retain the discretion to negotiate alternative fees on a limited client-by-client basis. Related accounts may be combined in order to calculate the fee charged. Because we have a long history with many of our clients, some clients have older fee schedules. Breakpoints for tiers and fee rates have been revised over time. Existing clients pay the fee specified in their advisory agreement. Some clients require us to use the custodial balance for billing. Some clients remove accrued interest from quarter-end EMV and some clients require us to use the actual number of days in the quarter to calculate the fee. Some clients require us to calculate fees on the average of the month-end value for each month in the quarter, therefore, adjustments are not made for cash flows. These differences mean that some clients are paying different rates than others and are receiving the same level of service. We do not differentiate the service we provide based on the fee schedule.

The fee that we receive for serving as the sub-adviser to the Wasatch-Hoisington U.S. Treasury Fund is currently equal to 0.25% of the Fund's average daily net assets, less one-half of the quarterly shareholder servicing fees.

Sub-adviser fees for the private funds are according to our fee schedule at the time they became a client.

Payment of Fees

Accounts are billed each calendar quarter in arrears. Payment is requested within 30 days of receipt of the invoice. Payment may be made by check, wire transfer or ACH electronic funds transfer.

Typically, we bill clients directly for fees incurred. However, some clients have requested that we instruct the custodian to deduct funds from their account to pay our fees. If directed by the client, we will upload our invoice to the account custodian. On at least a quarterly basis, the custodian is required to send to the client a statement showing all

transactions within the account during the reporting period including the deduction of our management fee. Clients should contact us directly if they believe that there may be an error in their fee calculation.

The fee we receive as the sub-adviser to the Wasatch-Hoisington U.S. Treasury Fund is paid monthly, in arrears, pursuant to the Sub-Advisory Agreement with Wasatch Advisors, LP.

Other Fees & Expenses

In addition to our advisory fees, clients often incur certain charges imposed by third parties, such as custodians, banks, or other financial institutions. We do not receive any of these fees, either directly or indirectly. These additional fees include, among other things:

- Mark-ups and mark-downs (e.g., dealer spreads)
- Custodial fees
- Wire transfer and electronic fund processing fees

In addition, clients direct their custodian to invest cash in a sweep or other interest-bearing account such as a money market fund, which may be managed by an affiliated company of the custodian. These short-term investments of cash may incur management and distribution expenses payable to the custodian or its affiliates. Money market funds' fees and costs are described in the relevant money market fund prospectus and will not be deducted from the fee that clients pay to us for advisory services.

Due to the fact that we trade only in U.S. Treasuries, there are no brokerage commissions incurred when trades are executed.

Mutual Fund Fees - The net fee expense ratio of the Wasatch-Hoisington U.S. Treasury Fund is .67%.

Prepaid Fees

We do not collect any prepaid fees. Clients are invoiced quarterly, in arrears.

Item 6 - Performance-Based Fees and Side-by-Side Management

We do not accept or charge any performance-based fees.

Item 7 - Types of Clients

We provide advisory services to the following types of clients:

- Pension and profit-sharing plans (both public and private, including ERISA plans)
- Charitable organizations
- Insurance companies
- Investment companies (sub-advisory)
- Pooled investment vehicles (other than investment companies) (sub-advisory)
- Corporations or other businesses
- Trusts and partnerships
- High net worth individuals

The minimum amount necessary to enter into an agreement for portfolio advisory services is \$1 million and the minimum quarterly fee is \$5,625.

The minimum investment to open an account for the Wasatch-Hoisington U.S. Treasury Fund is \$2,000.

Item 8 - Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis

The Strategic Investment Committee (the “SIC”) conducts HIMCo’s portfolio management process. Five employees serve on the SIC and are registered as Investment Adviser Representatives of the firm. More information about the members of the SIC may be found in our Brochure Supplements.

In managing Treasury securities, the SIC is interested in macroeconomic, top-down analysis. The majority of HIMCo’s research is conducted internally. The research is designed to identify the long-term trends in real growth and inflation. Substantial academic research indicates that inflation is the key determinant of long-term Treasury bond yields. All members of the SIC are involved in the research process. As a result of this effort, we analyze research coming out of major educational institutions, as well as private and public think tanks. We augment the internal research by purchasing research and data from external suppliers.

Investment Strategy

During a multi-year rising inflationary environment, portfolios are typically invested in short-duration Treasurys or cash equivalents to avoid the principal loss associated with falling Treasury bond prices that would result from any increase in yields. Alternatively, during a multi-year falling inflationary environment, portfolios are typically invested in longer-duration Treasury securities in order to capture the capital gains that are associated with rising bond prices that would result from any decrease in yields.

We will and have customized the investment strategy in Treasurys for certain clients.

Risk of Loss

U.S. Treasury securities, used to finance the federal government debt, are considered to have the bond market's lowest credit risk because they are guaranteed by the U.S. government's full faith and credit. Full faith and credit means that the U.S. government is committed to pay interest as it is due and principal at maturity. However, if interest rates move adversely to HIMCo's position, there is a risk of loss of principal if Treasury securities are sold below the purchase price. Clients should understand that in this circumstance there would be a loss of principal that the client should be prepared to bear. There can be no assurance that we will be able to predict interest rate movements and, therefore, price movements.

All investments carry some degree of risk that will affect the value of the investment and its investment performance. Investing in Treasurys, as with any security, involves the risk of loss and clients should be prepared to bear potential losses.

Risks investors face when investing in Treasurys include the following:

- **Credit Risk:** Credit risk is the risk that the issuer of a debt security will fail to repay principal and interest when due. U.S. Treasury securities are backed by the full faith and credit of the U.S. government and are viewed as carrying minimal credit risk. Changes to the financial condition or credit rating of the U.S. government, however, may cause the value of obligations issued by the U.S. Treasury to decline.
- **Interest Rate Risk:** Interest rate risk is the risk that a debt security's value will decline due to an increase in market interest rates. While U.S. Treasury securities provide a stable stream of income, their prices will still fluctuate with changes in interest rates. For example, when yields on existing bonds rise, their value declines. When interest rates change, the value of longer-duration debt securities usually change more than the value of shorter duration debt securities.
- **Market Risk:** Market risk is the risk that a security may fall in value. The price of a U.S. Treasury security may move dramatically in reaction to tangible and

intangible events or conditions. For example, political and/or economic conditions may trigger market events, as well as social conditions. Potential government fiscal policy initiatives and the resulting market reaction to those initiatives could affect interest rates.

- **Effective Duration Risk:** Effective duration calculates the expected price change for a fixed income security when the yield of the security changes by 100 bps. For example, if the yield increased by 100 bps, a fixed income security with an effective duration of five years would experience a decline in price of approximately 5%. Conversely, if the yield decreased by 100 bps, the price of a fixed income security with an effective duration of five years would increase by approximately 5%. Higher duration means higher price sensitivity to yield changes. The market price changes of a zero-coupon fixed income security, which does not pay periodic interest payments, is generally more volatile than the market price changes of a security of similar maturity that does pay interest periodically because its duration equals its maturity.
- **Reinvestment Risk:** Primarily related to fixed income securities, this is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e. interest rate).
- **Inflation Risk:** When inflation is present, a dollar today will not buy as much as a dollar next year because purchasing power is eroding at the rate of inflation.
- **Currency Risk:** Overseas investments are subject to fluctuations in the value of the U.S. dollar against the currency of the investment's originating country. This is also known as exchange rate risk. This risk applies to our non-U.S. clients.
- **Cybersecurity Risk:** HIMCo and its service providers may be subject to operational and information security risks resulting from cyberattacks. Cyberattacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cybersecurity breaches. Cybersecurity attacks affecting HIMCo and its service providers may adversely impact clients. For instance, cyberattacks may interfere with the processing of transactions, cause the release of private information about clients, impede trading, subject HIMCo to regulatory fines, financial losses, or cause reputational damage. Similar types of cybersecurity risks are also present for issuers of securities in which clients accounts may invest in, qualified custodians, governmental and other regulatory authorities, exchange and other financial market operators, or other financial institutions. Cybersecurity incidents that could ultimately cause them to incur losses, including, for example: financial losses, cost and reputational damages, and loss from damage or interruption of systems.

Although HIMCo has established its system and processes including employee training, 2-factor authentication, vendor due diligence, and cybersecurity insurance to reduce the risk of these incidents from occurring, there is no guarantee that these efforts will always be successful, especially considering that HIMCo does not directly control the cybersecurity measures and policies employed by third-party service providers or those of its clients.

Item 9 - Disciplinary Information

Registered investment advisers are required to disclose all material facts regarding any legal or disciplinary events that would be material to a client's or prospective client's evaluation of HIMCo or HIMCo's management.

Neither our firm nor our management personnel have any reportable disciplinary events to disclose.

Item 10 - Other Financial Industry Activities and Affiliations

Neither our firm nor any management personnel are registered, or have an application pending to register, as a broker-dealer or a registered representative of a broker-dealer. Neither our firm nor any management persons are registered, or have an application pending to register, as a futures commission merchant, commodity pool operator, a commodity trading adviser or an associated person of the foregoing entities.

We are the sub-adviser to the Wasatch-Hoisington U.S. Treasury Fund. Wasatch Advisors, LP, the adviser to the Fund, is not a related party.

Item 11 - Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Code of Ethics

We have adopted a Code of Ethics ("Code") pursuant to Rule 204A-1 under the Advisers Act that sets forth high ethical standards by which all our employees must adhere. As a fiduciary, we have a duty of care, loyalty, honesty and good faith to our clients.

Our Code outlines the Standards of Business Conduct regarding issues such as confidentiality; communications with clients and others; compliance with laws, rules, and regulations; fiduciary appointments; gifts and entertainment; conflicts of interest; and the prohibition of using material non-public information. Each director, officer and employee is expected to comply at all times with all the policies and procedures in our Code, and to

report to the Chief Compliance Officer any suspected or observed violation of these policies and procedures.

Our Code is distributed to all employees of HIMCo whenever revisions are made or no less frequently than annually, at which time all employees are required to provide a written acknowledgement and attestation of their intent to abide by the Code's provisions.

A copy of our Code of Ethics is available to our advisory clients and prospective clients upon request.

Interest in Client Transactions & Personal Trading

Our Code of Ethics includes policies and procedures for the reporting of quarterly securities transactions, as well as initial and annual holdings reports that must be submitted by our firm's access persons. In addition, all access persons are required to obtain prior approval for any acquisition of securities in a limited or private offering or an initial public offering. The SEC mandates that persons associated with SEC-registered firms must monitor employee's activity in certain reportable securities. Employees are required to report trading in reportable securities, including the Wasatch-Hoisington U.S. Treasury Fund. Direct obligations of the U.S. Treasury are specifically exempted from the definition of reportable securities and are not reportable.

At any time, the security positions in the personal accounts of our employees may differ, or be similar to, the recommendations promulgated to clients. This does not create a conflict of interest, as the U.S. Treasury market is so deep and broad that it cannot be manipulated by individual trading.

Item 12 - Brokerage Practices

The U.S. Treasury market is one of the world's most liquid debt markets. This means the market is one where the pricing, execution and settling of a trade is very efficient and inexpensive due, partly, to very tight bid/ask prices.

Under our Investment Advisory Agreement, we accept discretionary authority to determine what securities should be purchased or sold and the amount to be purchased or sold for each client. This gives us the authority regarding the choice of broker-dealer to be used. The discretionary authority given to us is unrestricted, unless limited by any special restrictions placed upon the account by the client.

It is HIMCo's policy to seek best execution (i.e. prompt and reliable execution at the most favorable prices obtainable under the prevailing market conditions) in all trades.

We select broker-dealers primarily on price and the quality of their execution capabilities, including: overall promptness of execution, accuracy of oral, hard copy and electronic execution verification, the ability and willingness to correct errors, and research, if any, provided by the broker-dealer. Generally, trades are executed using the Tradeweb electronic trading application. Through Tradeweb, we are able to approach multiple broker-dealers simultaneously and trade with best price as a priority. If Tradeweb is not utilized, then we contact broker-dealers who we know are capable of trading securities efficiently and are capable of handling transactions with privacy.

All bond trades are done on a net price basis with a broker-dealer. Explicit brokerage commissions are not paid. An over-the-counter market, such as the one for Treasuries, means that we can only buy securities at a price being offered in the market or sell them at a price that a broker-dealer is willing to pay.

The majority of broker-dealers used are primary broker-dealers. Occasionally, due to the large size of our Treasury positions and volatile intraday market conditions, it is necessary to execute trades in a manner that is not disruptive to overall markets to minimize potential harm to clients. Under these circumstances, it is often advantageous to trade with non-primary broker-dealers that we know are capable of trading securities efficiently and are capable of handling transactions with privacy to shield our trading activities from publicity and market knowledge. This may result in slightly sub-optimal pricing in the short run, but in our experience, it produces a better result overall for clients when taken in the context of changing large positions in the portfolio.

Occasionally, orders are given to various broker-dealers to fill trades over an extended time frame with a controlled price range (albeit, at wider spreads than a single trade). It is possible that not all accounts will receive identical prices if several broker-dealers are used simultaneously to help expedite the buying or selling of large positions, but extreme care is given to even the trading results. Despite efforts to maintain exact evenness in price, it is most unlikely that all accounts will receive the same pricing. In fact, it is highly probable that some variance in prices paid or received between accounts will occur when trading large positions.

We have adopted policies and procedures for correcting trading errors. The policies and procedures require that all trade errors affecting a client's account be resolved promptly and fairly. The intent of the policy is to restore a client account to the appropriate financial position considering all relevant circumstances surrounding the error.

Research and Other Soft Dollar Benefits

We do not enter into any third party or proprietary soft dollar arrangements where research is provided by a broker-dealer in exchange for an expectation of receiving a certain dollar amount of commissions.

We receive a range of economic research from broker-dealers, including studies on the economy, information on political developments, statistical information, market data, accounting and tax law interpretations and other information regarding matters that affect the economy and interest rates. We use this research in connection with our investment activities.

Brokerage for Client Referrals

HIMCo does not enter into agreements with, or make commitments to, any broker-dealer that would bind HIMCo to compensate that broker-dealer, directly or indirectly, for client referrals through the placement of brokerage transactions.

Directed Brokerage

As a general practice, we do not permit our clients to direct brokerage. However, some clients may prohibit use of specific broker-dealers. Any brokerage request may have an adverse effect on HIMCo's ability to achieve best execution for such client. In addition, such requests may prevent the client from trade aggregation, which may allow more favorable execution.

Trade Aggregation and Allocation

We have a fiduciary duty, when placing orders for multiple accounts, to ensure that participating clients are treated fairly and equitably when aggregating and allocating securities transactions. When making a tactical asset reallocation, or investing a coupon payment, HIMCo will transact an aggregated trade for multiple clients. Under these circumstances, all trades are allocated on a pro-rata basis with each participating account receiving a percentage of the executed portion of the order based on each account's percentage of the original order. Each aggregated order is documented with the securities bought or sold for each client account.

Item 13 - Review of Accounts

Account Reviews

On a daily basis, we review transactions and cash flow activities that have occurred within each client's separately managed account. Members of the SIC review each client account on an ongoing basis. Members of the SIC include the CEO, President, Executive Vice Presidents and Senior Vice President. These reviews ensure that the portfolios are conforming to the clients' investment guidelines and conforming to the general strategy established by the SIC. Each review considers yield, duration, performance and relative performance.

More frequent reviews may be triggered by changes in the market, political or economic environment. Clients may request reviews at any time.

Account Reports and Statements

We provide written monthly reports to clients that include: (1) a performance summary; (2) a portfolio valuation, and (3) a transaction schedule. Interim reports are provided at the request of the client.

In addition, clients receive monthly statements directly from their custodian. We urge clients to carefully review their custodial statements and compare them to the reports they receive from us. It is possible that our reports vary from custodial statements based on accounting procedures, reporting dates, or valuation methodologies of certain securities, including calculation of accrued interest. If clients observe any discrepancies between our reports and their custodian's statements, they should contact us.

Item 14 - Client Referrals and Other Compensation

Economic Benefits for Providing Services to Clients

We are not the recipient of any economic benefits, such as sales awards or other prizes, from any third parties for providing investment advice to clients.

Compensation to Individuals for Client Referrals

We have no agreements with any person or firm to solicit clients.

Item 15 - Custody

Custody is defined as holding, directly or indirectly, client funds or securities, or having any authority to obtain possession. HIMCo does not have custody of clients' cash (and cash equivalents) or securities. However, as previously disclosed in the "Fees and Compensation" section (Item 5) of this Brochure, a client can request that we instruct the account custodian to deduct the investment management fee directly from their account. In this instance, HIMCo is considered to have "deemed custody" of the client's assets. This limited access is monitored by the client through receipt of account statements (received quarterly, or more frequently) directly from the qualified custodian. These account statements show the deduction of the management fees. Because the custodian does not calculate the amount of the fee to be deducted, clients should carefully review their custodial account statements and compare them with the month end reports and quarter-end invoice received from HIMCo to verify the accuracy of the fee calculation. If the client finds significant discrepancies, the custodian and HIMCo should be notified.

Item 16 – Investment Discretion

Clients hire us to provide discretionary asset management services. We have full discretion to do the following without first obtaining approval from the client:

- Determine the securities to be bought or sold;
- Determine the amount of securities to be bought or sold;
- Determine the broker-dealer to be used for the purchase or sale; and
- Determine the timing of the purchase or sale.

We accept this authority when the client signs the written Investment Advisory Agreement, which includes a limited power of attorney. Some clients place a limitation on this authority by giving us written instructions. Such limitations are typically set forth in written Investment Guidelines or Investment Policy Statements. Clients may change or amend such instructions by again providing us with written instructions.

Item 17 - Voting Client Securities

The accounts that we manage hold only U.S. Treasury securities, so there are no proxies to vote on those securities. We will not vote proxies on money market funds. Proxies on money market funds are the custodian's responsibility.

Item 18 - Financial Information

We do not require prepayment of fees; therefore, we are not required to include a balance sheet.

As an advisory firm that maintains discretionary authority for client accounts and has deemed custody for certain accounts, we are required to disclose a bankruptcy within the last ten years or any financial condition that is reasonably likely to impair our ability to meet our contractual commitments to clients. HIMCo has no such financial conditions to report.
