

BlackRock[®]

Item 1: Cover Sheet

BlackRock Asset Management Schweiz AG

Bahnhofstrasse 39
Zurich, 8001

Switzerland

41 44 297 7373

March 31, 2024

This Brochure provides information about the qualifications and business practices of BlackRock Asset Management Schweiz AG, as well as certain other affiliated registered investment adviser subsidiaries (the “Advisers”) of BlackRock, Inc. (together with its subsidiaries, “BlackRock”). If you have any questions about the contents of this Brochure, please contact BlackRock Asset Management Schweiz AG at the telephone number provided above. Information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (“SEC”) or by any state securities authority.

BlackRock Asset Management Schweiz AG is registered as an investment adviser with the SEC. Registration as an investment adviser does not imply any level of skill or training.

Additional information about BlackRock Asset Management Schweiz AG is available on the SEC’s website at www.adviserinfo.sec.gov.

Item 2. Material Changes

Since the last annual update to the Form ADV Part 2A (the “Brochure”) on May 5, 2023, material changes to this Brochure include amendments to the following items:

Item 5 – Fees and Compensation – Fee Schedules – Private Investors Accounts

- As of March 22, 2024, the Standard Fee Option is generally unavailable to Private Investors clients who select equity and balanced investment strategies.

Item 8 – Methods of Analysis, Investment Strategies and Risk of Loss – Investment Strategy Risks

- Additional technology risks related to the use of artificial intelligence and machine learning tools was added.

Item 4. Advisory Business

Overview of BlackRock Registered Investment Advisers

Each BlackRock entity listed below (individually, an “Adviser”) is registered as an investment adviser with the SEC and is a wholly-owned subsidiary of BlackRock, Inc., a publicly traded company. Although referred to collectively throughout this Brochure as the Advisers, each Adviser is a separate and distinct company with its own investment capabilities and functions. The Advisers generally have common policies and procedures with respect to United States (“U.S.”) investment advisory clients and share senior management teams. This Brochure provides an overview of each Adviser listed in the table below, showing Client Assets Managed¹ as of (12/31/2023):

BlackRock – Advisers	SEC File #	In Business Since²	Discretionary	Non-Discretionary	Total
BlackRock Financial Management, Inc. (“BFM”)	801-48433	10/21/1994 29 years	1,285,414,048,014	3,083,758,425	1,288,497,806,439
BlackRock Advisors, LLC (“BAL”)	801-47710	9/23/1994 29 years	869,677,370,186	--	869,677,370,186
BlackRock International Limited (“BIL”)	801-51087	10/4/1995 28 years	48,141,818,006	--	48,141,818,006

BlackRock Investment Management, LLC (“BIM”)	801-56972	9/28/1999 24 years	360,677,383,435	97,514,127,314	458,191,510,749 ³
BlackRock Fund Advisors (“BFA”)	801-22609	9/20/1984 39 years	3,047,294,350,591	--	2,406,691,634,676
BlackRock (Singapore) Limited (“BSL”)	801-76926	12/20/2000 23 years	50,657,385,763	--	50,657,385,763
BlackRock Asset Management North Asia Limited (“BAMNAL”)	801-77343	8/10/1998 25 years	96,927,116,767	--	96,927,116,767
BlackRock Asset Management Schweiz AG (“BAMS”)	801-78476	6/17/2005 18 years	1,267,893,232	--	1,267,893,232
BlackRock Capital Investment Advisors, LLC (“BCIA”)	801-112118	11/2/2017 6 years	50,708,850,726	--	50,708,850,726
Tennenbaum Capital Partners, LLC (“TCP”)	812-13068	5/26/1999 24 years	6,087,355,192	--	6,087,355,192
SVOF/MM, LLC (“SVOF/MM”)	801-63473	6/10/2004 19 years	203,495,921	--	203,495,921

- 1 The assets reported as Client Assets Managed include those assets for which an Adviser acts as the primary adviser and/or the Adviser has been delegated investment management authority of all or a portion of the assets of a client of another Adviser. Assets reported as Client Assets Managed excludes assets for which a contracting Adviser has delegated discretionary investment advisory authority to another Adviser.
- 2 “In Business” is based on each Adviser’s date of incorporation or organization, as appropriate.
- 3 BIM’s “Non-Discretionary” assets include: \$126,520,257 with respect to which BIM is responsible for making investment recommendations to clients and, if approved by such clients, placing trades in their accounts to implement such recommendations; and \$74,592,672,396 with respect to which BIM provides investment services (in the form of model portfolios) to third-party investment managers and such managers are responsible for placing trades in their client accounts based on such model portfolios (please see references below to “Model-Based SMA Programs” for more information on BIM’s participation in such Model-Based SMA Programs).

Advisory Services

As part of their investment management services, the Advisers collectively offer a range of investment solutions from fundamental and quantitative active management to indexing strategies designed to gain broad exposure to the world's capital markets. Each Adviser generally provides investment management services in accordance with applicable investment guidelines and restrictions, including applicable restrictions on investing in certain securities, or types of securities or other financial instruments, that are developed in consultation with the Client, or in accordance with the mandate selected by the Client (e.g., fixed income, cash management, equity, private market, index or multi-asset). Each pooled investment vehicle managed or otherwise advised by an Adviser (e.g., U.S. registered investment companies, including ETFs, and private investment funds) is managed in accordance with its investment guidelines and restrictions and generally is not tailored to the individualized needs of any particular fund shareholder or fund investor, and an investment in such a vehicle does not, in and of itself, create an advisory relationship between the shareholder or investor and an Adviser. The Advisers use both automated and/or manual processes to manage portfolios in accordance with their stated portfolio investment guidelines and restrictions.

An overview of each Adviser and its primary focus is provided in the table below:

Advisers	Primary Focus
BFM	Manages assets for institutional and high net worth clients, separate accounts, pooled investment vehicles, private investment funds and U.S. registered investment companies. Mandates include cash management, equity, fixed income, private market, multi-asset and quantitative equity strategies.
BAL	Manages assets primarily for U.S. registered investment companies and 529 Plans. Has a small number of institutional separate account clients. Mandates include cash management, equity, fixed income, private market, multi-asset and quantitative equity strategies.
BIL ⁴	Manages assets for institutional clients, separate accounts, pooled investment vehicles and U.S. registered investment companies, including ETFs. Mandates include equity, fixed income, cash management and multi-asset strategies.
BCM	Manages assets for institutional and high net worth clients, separate accounts, pooled investment vehicles, private investment funds, and U.S. registered investment companies. Mandates include cash management, fixed income and equity strategies.
BIM	Manages assets for institutional clients, high net worth and other individual clients, separate accounts, pooled investment vehicles and U.S. registered investment companies. Also sponsors an SMA ("wrap fee") program. Mandates include cash management, equity, fixed income, private market and multi-asset strategies.
BFA	Manages assets for institutional clients and U.S. registered investment companies, including ETFs. Mandates include cash management, equity, fixed income, multi-asset and index strategies.
BSL ⁵	Manages assets for institutional clients, pooled investment vehicles and U.S. registered investment companies. Mandates include fixed income, private market and equity strategies.
BAMNAL ⁶	Manages assets for institutional clients, pooled investment vehicles and U.S. registered investment companies, including ETFs. Mandates include equity and real estate strategies.

4 BIL is located in the United Kingdom and authorized by the Financial Conduct Authority of the United Kingdom. In some cases, laws, rules and regulations applicable to BIL differ from those described generally herein. In such cases, BIL has separate policies and procedures in support of such laws, rules and regulations.

5 BSL is located in Singapore and licensed by the Monetary Authority of Singapore. In some cases, laws, rules and regulations applicable to BSL differ from those described generally herein. In such cases, BSL has separate policies and procedures in support of such laws, rules and regulations.

6 BAMNAL is located in Hong Kong and licensed by the Hong Kong Securities and Futures Commission in Hong Kong. In some cases, laws, rules and regulations applicable to BAMNAL differ from those described generally herein. In such cases, BAMNAL has separate policies and procedures in support of such laws, rules and regulations.

Advisers	Primary Focus
BAMS ⁷	Manages assets for institutional clients, pooled investment vehicles and separate accounts. Mandates include fixed income, equity, private equity and infrastructure strategies. Also engages in distribution activity in relation to non-U.S. domiciled collective investment schemes, as well as U.S. and non-U.S. ETFs.
BCIA	Manages assets for institutional clients, pooled investment vehicles, U.S.-registered investment companies, business development companies and private investment funds. Mandates focus on credit, private equity and secondaries opportunities.
TCP	Manages assets for pooled investment vehicles, U.S.-registered investment companies, business development companies and private investment funds. Mandates focus on credit opportunities.
SVOF/ MM	Manages assets for private investment funds. Mandates focus on credit opportunities.

The Advisers' investment management services are offered (directly or indirectly through a sub-advisory arrangement with the Client's primary investment adviser) to registered investment companies, single-investor funds, discretionary and non-discretionary advisory programs, commingled investment vehicles, other investment advisers, and individuals and institutional investors through separate account management. The types of clients to which each Adviser provides investment management services are disclosed in each Adviser's Form ADV Part 1 and summarized in Item 7 ("Types of Clients") of this Brochure.

Depending on the investment strategy or strategies that a Client wishes to pursue, the Client's ultimate contractual relationship can be with one or more of the Advisers. For example, a Client that engages an Adviser to perform U.S. fixed income and non-U.S. equity investment services can have two contractual relationships, one with BFM and one with BIL.

Institutional Separate Accounts and SMAs

Certain Advisers provide investment management services directly to institutional clients and/or high net worth and other individual clients through SMAs.

Institutional clients typically retain an Adviser to manage their accounts pursuant to a negotiated IMA between the Adviser and the Client. As part of their institutional separate account business, the Advisers have developed many investment strategies to meet individual client risk profiles. The Advisers' institutional fixed income strategies span the yield curve and incorporate the expertise of various U.S. and non-U.S. sector specialists. The guidelines for each Client's fixed income strategy are tailored to reflect the Client's particular investment needs with respect to interest rate exposure, sector allocation, and credit quality. The Advisers' cash management strategies typically emphasize quality and liquidity. The Advisers offer both U.S. and non-U.S. equity investment strategies to institutional clients using a variety of investment styles, including growth, value, core and enhanced equity, that are targeted to specific market capitalization ranges, including small-cap, mid-cap, small/mid-cap, large-cap and all-cap, as well as geographic and industry sectors which can be tailored to meet the specific needs of clients. The Advisers also offer private market asset and multi-asset separate account strategies to institutional clients, including strategies that permit the Advisers to allocate all or a portion of the portfolio management to unaffiliated investment advisers selected by the Advisers.

⁷ BAMS is located in Switzerland and authorized as a fund management company with the Swiss Financial Market Supervisory Authority. In some cases, laws, rules and regulations applicable to BAMS differ from those described generally herein. In such cases, BAMS has separate policies and procedures in support of such laws, rules and regulations.

Individual Clients can retain an Adviser to manage their accounts by participating in a SMA Program sponsored either by the Adviser or by a third-party investment-adviser, broker-dealer or other financial services firm (the “Sponsor”). Depending on the structure of the program, an SMA Program client enters into an investment advisory agreement with the Adviser and/or the third-party Sponsor. BIM sponsors Private Investors, an SMA Program. Through Private Investors, BIM offers a variety of equity, fixed income, and multi-asset investment strategies to Clients generally referred by Merrill Lynch, Pierce, Fenner & Smith Incorporated (“MLPF&S”) pursuant to an endorsement arrangement between BIM and MLPF&S which is described in Item 14 (“Client Referrals and Other Compensation”) of this Brochure. Additional information about Private Investors is available through its disclosure document (the “Private Investors Brochure”), which is available to current and prospective Private Investors clients. As the sponsor of Private Investors, BIM provides Private Investors clients with the Private Investors Brochure. On June 30, 2020, the Private Investors program was “soft closed”. Effective October 15, 2020, this program status change means that only Clients who meet specific criteria set by MLPF&S can open new accounts on the Private Investors platform, subject to certain exceptions agreed to by MLPF&S from time to time. However, existing Private Investors clients will be able to add and withdraw funds in their existing accounts as well as make strategy changes after this date.

BIM also participates as an investment manager in SMA Programs sponsored by third-party Sponsors, including in certain cases where BIM acts as sub-adviser to Clients who authorize their investment advisers to retain BIM (directly or indirectly, including through a turnkey asset management platform) to act as a discretionary investment manager. The SMA Programs in which BIM currently participates are identified in BIM’s Form ADV Part 1. BIM requires a minimum account size for certain of its investment strategies, which varies among SMA Programs. In most SMA Programs, the Sponsor is responsible for establishing the financial circumstances, investment objectives, and investment restrictions applicable to each Client, often through a client profile (the “Profile”) and discussions between the Client and the Sponsor’s personnel. Each Client typically completes a Profile in addition to executing a program contract with the Sponsor. In some SMA Programs (often referred to as “Dual Contract SMA Programs”), Clients are required to execute a separate agreement directly with each investment manager (such as BIM) or the investment manager is made a party to the client/Sponsor agreement. The Client’s program agreement with the Sponsor generally sets forth the services to be provided to the Client by or on behalf of the Sponsor, which can include, among other things:

- (i) manager selection;
- (ii) trade execution, often without a transaction-specific commission or charge;
- (iii) custodial services;
- (iv) periodic monitoring of investment managers; and
- (v) performance reporting.

Clients typically are charged by the Sponsor quarterly, in advance or in arrears, a comprehensive or wrap fee based upon a percentage of the value of the assets under management to cover such services. The wrap fee often, but not always, includes the advisory fees charged by BIM (or other participating managers) through the program. Where the services provided by BIM (or another participating manager) are included in the wrap fee, the Sponsor generally collects the wrap fee from the Client and remits the advisory fee to BIM (or other participating manager). In Dual Contract SMA Programs, the investment manager’s fee typically is paid directly by the Client pursuant to a separate agreement between the investment manager and the Client.

SMA Program Clients also are subject to additional fees, expenses, and charges (e.g., commissions on transactions executed by a broker-dealer other than the Sponsor or the program's designated broker-dealer(s), expenses with respect to investments in pooled vehicles (such as ETFs and money market funds and other registered investment companies), dealer mark-ups or mark-downs on principal transactions, and certain costs or charges imposed by the Sponsor or a third-party, such as odd-lot differentials, exchange fees, and transfer taxes mandated by law). Generally, Sponsors are responsible for providing Clients with both this Brochure and other applicable brochures for the Sponsor's program (the "Program Brochure"). The Program Brochure for each Sponsor is also available through the SEC's Investment Adviser Public Disclosure (IARD) website. SMA Program Clients should review the Sponsor's Program Brochure for further details about the relevant program. Such Clients should consider that, depending upon the rate of the wrap fee charged, the amount of trading activity, the value of custodial and other services provided and other factors, the wrap fee could exceed the aggregate costs of the services provided if they were to be obtained separately (although, in some cases, it is possible to obtain such services only through the program) and, with respect to brokerage, any transaction-based commissions paid by the account. BIM is not responsible for, and does not attempt to determine, whether a third-party SMA Program is suitable or advisable for program participants. BIM reserves the right, in its sole discretion, to reject any account referred to it by a Sponsor for any reason, including, but not limited to, the Client's stated investment goals and restrictions.

BIM's fees for managing SMA Program accounts can be less than the fees it receives for managing similar accounts outside of an SMA Program. However, Clients should be aware that, as discussed above, the total fees and expenses associated with an SMA Program can exceed those available if the services were acquired separately.

An institutional Client typically consults with an Adviser at the outset of the adviser-client relationship to establish customized investment guidelines applicable to the Adviser's management of the Client's separate account, and such guidelines often vary significantly among institutional Client separate accounts with the same investment objective. An SMA Program Client typically selects (in its program agreement) an investment strategy for BIM to utilize in connection with its management of the Client's account (e.g., U.S. large-cap equity, U.S. short-term taxable fixed income). As discussed in Item 8 ("Methods of Analysis, Investment Strategies and Risk of Loss") of this Brochure, SMA Program accounts following the same investment strategy typically are managed by BIM in accordance with a "target portfolio" (for equity securities) or "model guidelines" (for fixed income securities), subject to any reasonable investment restrictions imposed by Clients. Therefore, SMA Program accounts following the same investment strategy typically hold the same or similar securities in accordance with the target portfolio or model guidelines, as applicable. In addition, BIM typically effects equity transactions for SMA Program accounts with the program's designated broker-dealer, whereas an Adviser usually effects equity transactions for institutional separate accounts with a variety of broker-dealers. For additional information please refer to Item 12 ("Brokerage Practices") of this Brochure.

Since an SMA Program account is generally only one component of a Client's overall portfolio, BIM will not approve or otherwise monitor compliance with the Client's investment policy statement(s) (IPS) applying to the Client's overall portfolio when provided in connection with the opening of an account in the SMA Programs described in this Brochure. BIM will not be responsible for ensuring that a Client's investment policy guidelines and asset allocation choices comply with all specific legal, actuarial or other requirements that may apply as part of the IPS. That responsibility rests solely with the Client who should consult with their legal and tax advisors regarding those matters.

Certain investment strategies offered in some SMA Programs and institutional separate accounts invest in securities that are not traded in U.S. markets. As a result, certain securities are subject to state or territory registration requirements. If a security an Adviser wishes to purchase for such an SMA Program or institutional separate account is not registered or exempt from registration in a particular state or territory, applicable regulatory requirements can restrict the purchase of that security for residents of that state or territory, which could affect portfolio composition, diversification and performance.

Model-Based SMA Programs

In certain SMA Programs (referred to below as “Model-Based SMA Programs”), BIM provides non-discretionary investment services (often in the form of model portfolios) to an overlay portfolio manager (“OPM”) retained by the Sponsor which may utilize BIM’s model portfolios in connection with its management of client accounts. Generally, it is only the OPM, and not BIM, which acts as investment adviser to program clients, and in most of the Model-Based SMA Programs in which BIM participates, the OPM, and not BIM, is responsible for implementing trades in Client accounts. In most of the Model-Based SMA Programs in which BIM participates, Clients are able to designate the particular model portfolios to be utilized by the OPM in managing their accounts, the OPM typically implements BIM’s model portfolios (subject only to account-specific restrictions imposed by Clients), and the fees payable to BIM for providing such model portfolios typically are paid by the Sponsor or OPM based on the amount of their clients’ assets that are managed by the OPM. A model portfolio may include equity and/or fixed income securities including, but not limited to, shares of exchange-traded funds and mutual funds, some of which may Affiliated Funds) that are in addition to any fees received by BIM for providing non-discretionary investment services. BIM generally includes such assets in its Non-Discretionary Client Assets Managed set forth above in the table under “Overview of BlackRock Registered Investment Advisers” in Item 4 (“Advisory Business”) of this Brochure. The Model-Based SMA Programs to which BIM currently provides model portfolios are identified in BIM’s Form ADV Part 1.

Delivery of Model Portfolios

BlackRock, through various business units, offers non-discretionary model portfolios, some of which may be customized, to registered investment advisers and other financial institutions (“Financial Intermediaries”). Such model portfolios may be composed of either:

- (i) all Affiliated Funds; or
- (ii) a significant allocation to Affiliated Funds and the remaining allocation to Third Party Funds.

In certain instances, model portfolios that include Third Party Funds target a minimum allocation to Affiliated Funds but can also allocate up to 100% in Affiliated Funds. Access to model portfolios may be made available through agreements with the financial institutions or through BlackRock’s Research and Digital Services (as described below), and a Financial Intermediary is responsible for determining the suitability of a particular model portfolio for its clients.

When Third Party Funds are included in a model portfolio, BlackRock will not review the entire universe of available Third Party Funds that may be appropriate for a model portfolio, but rather will only consider for inclusion a subset of such Third Party Funds that have been reviewed and approved by BlackRock as determined in its sole discretion. As a result, there may be one or more Third Party Funds that would be a more appropriate addition to the model portfolio than the investment product selected by BlackRock, from the standpoint of the factors that BlackRock has taken into consideration or other factors not considered. Such Third Party Funds not selected may outperform the investment product selected for the model portfolio.

When a model portfolio includes only Affiliated Funds, BlackRock will not review or consider Third Party Funds. As a result, there may be one or more Third Party Funds that would be a more appropriate addition to the model portfolio than the Affiliated Fund selected by BlackRock, from the standpoint of the factors that BlackRock has taken into consideration or other factors not considered. Such Third Party Funds not selected may outperform the Affiliated Fund selected for the model portfolio. Please refer to Item 11 (“Code of Ethics, Participation or Interest in Client Transactions and Personal Trading”) of this Brochure and the disclosure under the headings “Use of Affiliated Products” and “Use of Unaffiliated Products” for a discussion of conflicts associated with the use of Affiliated Funds and Third Party Funds.

BlackRock is not responsible for implementing trades in the accounts of Client accounts. Generally, it is the Financial Intermediary, and not BlackRock, which is responsible for implementing trades in Client accounts (subject only to account-specific restrictions imposed by clients).

Portfolio Research Services and Digital Investment Tools and Analysis

In certain instances, BFM and BFA provide impersonal, non-discretionary portfolio research services and digital tools and analysis (“Research and Digital Services”) to:

- (i) institutional investors and/or fiduciaries acting on behalf of institutional investors, in the case of BFM; and
- (ii) financial advisers and other representatives of a registered investment adviser, in the case of BFA and BFM (each, a “Research and Digital Service Recipient”).

Such Research and Digital Services may be provided to Research and Digital Service Recipients through:

- (i) BlackRock’s website or
- (ii) a digital property made available on BlackRock’s or a third-party’s website.

The Research and Digital Service Recipient may use the Research and Digital Services, which may include model portfolios provided by BlackRock or by third-party providers, for investment research or portfolio analysis and is under no obligation to implement any output or analysis from the Research and Digital Services. Neither BFM nor BFA is responsible for any model portfolios or other information provided by third parties for use in the Research and Digital Services.

Services of Affiliates

BlackRock, Inc. operates its investment management business through the Advisers, as well as through multiple affiliates, some of which are also investment advisers registered with the SEC, one of which is a limited purpose national banking association chartered by the U.S. Department of Treasury's Office of the Comptroller of the Currency, some of which are registered only with non-U.S. regulatory authorities and some of which are registered with multiple regulatory authorities. The Advisers use the services of their broker-dealer affiliates which are registered under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) and members of the Financial Industry Regulatory Authority (“FINRA”), as needed. For additional information, please refer to Item 10 (“Other Financial Industry Activities and Affiliations”) and Item 12 (“Brokerage Practices”) of this Brochure.

The Advisers use the services of one or more BlackRock, Inc. subsidiaries or appropriate personnel of one or more BlackRock, Inc. subsidiaries for investment advice, portfolio execution and trading, operational support, and client servicing in their local or regional markets or their areas of special expertise without specific consent by the Client, except to the extent explicitly restricted by the Client in or pursuant to its IMA, or inconsistent with applicable law. Arrangements among affiliates take a variety of forms, including but not limited to dual employee, delegation, participating affiliate, sub-advisory, sub-agency, or other servicing agreements. This practice is designed to make BlackRock’s global capabilities available to an Adviser’s Clients in as seamless a manner as practical within a varying global regulatory framework. In these circumstances, the Adviser with which the Client has its IMA remains fully responsible for the account from a legal and contractual perspective. No additional fees are charged for the affiliates’ services except as set forth in the Client’s IMA, governing documents and/or offering memorandum (“OM”).

Please refer to Item 11 (“Code of Ethics, Participation or Interest in Client Transactions and Personal Trading”) of this Brochure and the section of disclosure headed “Potential Conflicts That Arise With Respect to Services Provided by or Through Various BlackRock Entities” for a discussion of conflicts associated with the use of Affiliated services.

Item 5. Fees and Compensation

Advisory Fees

An Adviser's fees generally depend on the services being provided. For investment management services, fees typically are expressed as a percentage of assets under management. Fee arrangements vary by client, and are based on a number of different factors, including investment mandate, services performed, and account/relationship size. To the extent permitted under the Advisers Act, or the applicable provisions of the Investment Company Act of 1940, as amended (the "Investment Company Act"), in the case of investment companies registered under the Investment Company Act and advised or sub-advised by an Adviser ("US Registered Funds"), Advisers can negotiate and charge performance-based fees, as well as asset-based fees. Additional information about US Registered Funds is provided in Item 7 ("Types of Clients") of this Brochure. In addition, fees and allocations are often fixed, fixed plus performance, or performance only. Certain fixed fees are required to be paid up front. For an additional discussion of performance-based fees and allocations, please refer to Item 6 ("Performance-Based Compensation and Side-by-Side Management") of this Brochure. The mechanisms by which fees are paid to the Advisers also varies based on the preferences and capabilities of custodian firms holding Client assets; generally speaking, custodians and/or administrators will calculate daily and deduct monthly fees in accordance with established fee schedules.

Fee Schedules

The following sets forth a basic description of certain advisory fee arrangements. Information on BIM's standard fee schedules for Private Investors and Dual Contract SMA Programs are noted below. However, fees and other compensation are negotiated in certain circumstances, and arrangements with particular Clients vary.

US Registered Funds

With respect to US Registered Funds, each prospectus sets forth the applicable fees and expenses. Changes in fees and/or expenses for a closed-end US Registered Fund can be disclosed to shareholders in other fund documents (such as annual or semi-annual reports).

Private Funds

With respect to unregistered investment vehicles managed by an Adviser (each a "Private Fund"), the applicable fees and expenses are set forth in the Private Fund's IMA, subscription agreement and/or other governing documents, or the Private Fund's Offering Memorandum (OM), if the Private Fund has issued an OM. In certain cases, an Adviser manages a separate account or other Private Fund with an investment mandate similar to certain Private Fund, in which case the fees charged to such an account (including performance-based fees) are not necessarily identical to those of the similar Private Fund.

Institutional Separate Accounts

An Adviser's fees for managing an institutional separate account are determined through negotiation with each Client and are set forth in the Adviser's IMA with the Client. There is no default or base fee schedule. The Adviser's fee may not cover the Client's pro rata share of the fees, expenses and/or transaction charges incurred by any mutual fund, ETF or other pooled investment vehicles (including funds or vehicles managed by an Adviser) in which the account invests. When an Adviser invests an account in a US Registered Fund, the fee paid by Clients directly to the Adviser may or may not be reduced by the account's pro-rata share of any management fees or other fees or expenses paid by the US Registered Fund to BlackRock (including any fees paid pursuant to Rule 12b-1 of the Investment Company Act or other shareholder servicing plan) as a result of such investment.

Please refer to Item 11 ("Code of Ethics, Participation or Interest in Client Transactions and Personal Trading") of this Brochure for a discussion of conflicts associated with the use of Affiliated Funds and other Adviser accounts.

Private Investors Accounts ⁸

Private Investors' Clients who select equity investment strategies choose either a wrap fee arrangement, where brokerage commissions related to agency equity security transactions executed by MLPF&S generally are included in the Private Investors fee (the "Wrap Fee Option"), or a "standard fee" arrangement, under which Clients pay brokerage commissions associated with agency equity security transactions executed on their behalf in addition to the Private Investors fee (the "Standard Fee Option"). Although the applicable Private Investors fee varies between the two options, in either case, and in the case of a fixed income investment strategy, the Private Investors fee typically is based on a percentage of a Client's assets under management at market value on the appraisal date. As of March 22, 2024, the Standard Fee Option is no longer available to Private Investors Clients who select equity and balanced investment strategies and all such Private Investors accounts will be designated under the Wrap Fee Option, with the exception of a small number of legacy Private Investors accounts that remain under the Standard Fee Option or other exceptions as agreed to by MLPF&S from time to time.

For certain accounts, the Private Investors fee is reduced in connection with investments in US Registered Funds, which is described in more detail in Item 11 ("Code of Ethics, Participation or Interest in Client Transactions and Personal Trading") of this Brochure under the heading "Use of Affiliated Products". Clients generally have the ability to negotiate the Private Investors fee applicable to their accounts with their MLPF&S Financial Advisor or BIM.

The Private Investors fee includes investment management by BIM, performance reporting and, if requested by the Client, assistance in reviewing investment objectives and selecting an investment strategy. Custodial and other account-related fees charged by the custodian typically are not included in the Private Investors fee and will be charged to Private Investors accounts separately by the custodian. If a Client chooses the Wrap Fee Option, the Private Investors fee also includes most execution charges for equity security transactions executed through MLPF&S. The Private Investors fee is in addition to transaction charges on trades effected through or with a broker-dealer other than MLPF&S (or its affiliates), mark-ups or mark-downs by such other broker-dealers, transfer taxes, margin interest, exchange or similar fees (such as for American Depositary Receipts – "ADRs") charged by third parties including issuers and the SEC, electronic fund, wire and any other account transfer fees, and any other charges imposed by law or otherwise agreed to with respect to the account.

In addition, and as discussed further under the heading "Use of Affiliated Products" in Item 11 ("Code of Ethics, Participation or Interest in Client Transactions and Personal Trading") of this Brochure, the Private Investors fee is in addition to the Client's pro rata share of the fees, expenses and/or transaction charges incurred by any mutual fund, ETF or other pooled investment vehicles (including Affiliated Funds or other vehicles managed by an Adviser) in which the account invests.

When BIM invests a Private Investors account in a US Registered Fund, the Private Investors fee paid by Clients may or may not be reduced by the Private Investors account's pro-rata share of any management fees or other expenses paid by the US Registered Fund to BlackRock (including any fees paid pursuant to Rule 12b-1 of the Investment Company Act) as a result of such investment. Even if the Private Investors fee is reduced by the pro-rata share of any management fees paid by the US Registered Fund to BlackRock (and any fees paid pursuant to Rule 12b-1 of the Investment Company Act), there could be certain compensation received by BlackRock for providing other services to US Registered Funds (such as shareholder servicing and other administrative services) that does not reduce the Private Investors fee, and therefore such compensation to BlackRock is separate from and in addition to the Private Investors fee. Additionally, certain US Registered Funds in which BIM may invest Private Investors accounts do not charge management fees, or their fees are waived or reimbursed by the Adviser managing the US Registered Fund, and/or are only eligible for investment by:

⁸ Private Investors is a separately managed account or wrap fee program sponsored by BIM. Please see Item 4 ("Institutional Separate Accounts and Separately Managed Accounts") of this Brochure for more information.

- (i) separate accounts managed by an Adviser (such as Private Investors accounts) or separate account Clients who have requested that their investment adviser consider investment recommendations provided by an Adviser in connection with the management of their account,
- (ii) collective trust funds managed by BTC; and
- (iii) other BlackRock US Registered Funds (“Management Fee-Waived Mutual Funds”). With respect to investments by the separate accounts, the Management Fee-Waived Mutual Fund shares will be redeemed upon the termination of the Adviser’s management of the separate account.

In certain instances, when MLPF&S executes transactions in foreign ordinary securities outside of the US, it may use the services of foreign firms, which either handle a Client’s order as agent and assess a commission charge, or transact as principal and receive a dealer spread or mark-up/down. Additionally, to the extent a foreign currency conversion transaction is required to facilitate trade settlement, the foreign firm effecting the currency conversion will be remunerated in the form of a dealer spread or mark-up/down. The commission charges and/or dealer spreads of other broker-dealers can also accrue when foreign issuers terminate an ADR facility, thereby necessitating conversion of ADRs to foreign ordinary share form. In such circumstances, there is the potential for the price obtained for the post-ADR security to be less beneficial to Clients than if the ADR remained intact. The foregoing commission charges and/or dealer spreads associated with transactions in foreign securities are factored into the net price for such securities and are not included in the Private Investors fee.

Because of factors bearing on cost, such as fees which differ based on the value of the assets held in a Private Investors account, the number and type of transactions effected for an account and the fee option that a Client selects, a Client’s costs for participating in Private Investors can be more or less than the cost of purchasing the services offered through Private Investors separately. In addition, selection of the Wrap Fee Option potentially could result in a higher or lower cost to the Client than had the Client selected the Standard Fee Option (and paid commissions on agency equity security transactions), depending on the level of trading in the account and the Private Investors fee and brokerage commissions the Client would have paid under the Standard Fee Option. Clients should consider the amount of anticipated trading activity and their applicable commission rate when assessing the overall cost of Private Investors and determining which fee option to select. Wrap fees typically assume a normal and consistent amount of trading activity, and therefore, under particular circumstances, a prolonged period of inactivity can result in higher fees than if commissions were paid separately for each transaction. The Wrap Fee Option could be more economical if active trading is anticipated. As noted above, as of March 22, 2024, the Standard Fee Option is generally unavailable to Private Investors Clients who select equity and balanced investment strategies.

The typical fee schedules for Private Investors are set out below. Fees and minimum account sizes can vary from the fee schedules below and can be negotiated with BIM or the Client’s MLPF&S Financial Advisor based upon factors that include, but are not limited to:

- (i) the amount and/or composition of the assets in the Client’s account;
- (ii) the number of accounts and/or total amount of assets that the Client or its MLPF&S Financial Advisor has with MLPF&S, BIM and/or their affiliates;
- (iii) the range and extent of services provided to the Client; and
- (iv) whether the Client is an employee of BIM, MLPF&S or an affiliate of either firm.

Moreover, Private Investors fees, minimum account sizes, and other account requirements also vary as a result of prior policies and the date the relevant account opened, or if account assets are held by custodians other than MLPF&S. Fees and surcharges vary for Clients requesting non-discretionary management.

Fees generally are calculated and paid quarterly and in advance of the rendering of services (except as separately negotiated or as otherwise noted herein). Most Private Investors Clients elect to pay fees by authorizing their custodian (typically MLPF&S) to pay BIM out of their Private Investors account assets. However, some Clients elect to pay fees from outside of the Private Investors account and such Clients should note that their IMA with BIM may authorize the Client's custodian (typically MLPF&S) to pay the Private Investors fee from the Private Investors account, if full payment has not been timely received by BIM or, if earlier, at the termination of the Client's IMA with BIM. In such cases, if money market fund shares or other cash assets in the account(s) are insufficient to pay fees due, BIM can instruct the custodian to sell or liquidate account assets to cover the Private Investors fee. Private Investors accounts generally are subject to a minimum fee, determined by applying the Client's fee schedule to the applicable minimum portfolio size. If BIM manages multiple accounts for a Client (or a group of related Clients), then BIM, at its discretion, can permit the assets of such accounts to be aggregated for purposes of taking advantage of available breakpoints. The following fee schedules and minimum account sizes generally apply:

Wrap Fee Options

No commissions will be charged on equity trades executed by MLPF&S

Available only if Client directs that all equity brokerage is to be effected through MLPF&S

Equity, Balanced, Retirement Journey and Wealth Diversified Portfolios ("WDP") Investment Strategies

SMAs (Other than Private Investors Accounts)

As discussed in more detail under “Institutional Separate Accounts and SMAs” in Item 4 (“Advisory Business”) of this Brochure, BIM participates as an investment manager in SMA Programs sponsored by various firms (including acting as sub-adviser to Clients who authorize their investment adviser to retain BIM to act as a discretionary investment manager). With respect to SMA Programs for which BIM is not the Sponsor, the Sponsor’s Program Brochure generally contains information on minimum account sizes and fees payable to the Sponsor and participating investment managers, such as BIM. Accordingly, BIM’s minimum account size and fees can vary from program to program or within a single program based on, among other things, the investment strategies offered by the program. BIM’s fees for managing SMA Program accounts may be less than the fees it receives for managing similar accounts outside of an SMA Program. However, Clients should be aware that, as discussed above, the total fees and expenses associated with an SMA Program may exceed those which might be available if the services were acquired separately. Clients should contact their SMA Program Sponsor for more information on the fees payable to BIM in connection with such program. BIM and/or its affiliates makes payments to certain Sponsors for the provision of certain analytical or other data services relating to the SMA Programs, such as statistical information regarding sales and redemptions, and/or Sponsor platform support. Such payments are generally made as a fixed dollar amount but can also be based on assets or sales.

Dual Contract SMA Program Accounts

The typical fee schedules applicable to BIM’s participation in Dual Contract SMA Programs are set out below. The minimum account size for Dual Contract SMA Program accounts generally is \$250,000 for an equity account and \$250,000 for a fixed income account, though different minimum account sizes may apply to other investment strategies as listed below. Smaller accounts may be accepted at BIM’s discretion. Fees can vary from the fee schedules below and can be negotiated with BIM or the Client’s financial adviser based upon factors that include, but are not limited to:

- (i) the amount and/or composition of the assets in the Client’s account;
- (ii) the number of accounts and/or total amount of assets that the Client or its financial adviser has with BlackRock and/or the program Sponsor;
- (iii) the range and extent of services provided to the Client; and
- (iv) whether the Client is an employee of BlackRock or the program Sponsor.

Moreover, fees, minimum account sizes and other account requirements vary as a result of prior policies and the date the relevant account opened, or if account assets are custodied at firms other than the Sponsor. Fees and surcharges vary for Clients electing non-discretionary management.

BIM's fee is in addition to the Client's pro rata share of the fees, expenses and/or transaction charges incurred by any mutual fund, ETF or other pooled investment vehicles (including funds or vehicles managed by an Adviser) in which the account invests, although to the extent required by the applicable program, applicable law, and/or applicable account documentation, when BIM invests an account in a US Registered Fund, the fee paid by Clients directly to BIM may or may not be:

- (i) reduced by the account's pro-rata share of any management fees or other fees or expenses paid by the US Registered Fund to BlackRock (including any fees paid pursuant to Rule 12b-1 of the Investment Company Act) as a result of such investment; or
- (ii) assessed on the Client assets invested in such US Registered Funds.

Fees generally are calculated and paid on a quarterly basis and in advance of rendering services (except as separately negotiated or as otherwise noted herein). Although most Dual Contract SMA Program Clients elect to pay fees by authorizing their custodian to pay BIM out of their account assets, some Clients elect to pay fees from outside of the account. Dual Contract SMA Program accounts generally are subject to a minimum fee, determined by applying the Client's fee schedule to the applicable minimum account size. If BIM manages multiple accounts for a Client (or group of related Clients), BIM, at its discretion, can permit the assets of such accounts to be aggregated for purposes of taking advantage of available breakpoints.

Minimum Account Sizes

Timing And Payment Of Advisory Fees

The timing of fee payments, mutually agreed upon with each Client, typically is set forth in the applicable IMA (for a separate account) or in the Private Fund's relevant governing documents and/or the OM, if applicable. Asset-based fees generally are paid monthly, quarterly or semi-annually, and are generally calculated on the value of the account's net or managed assets or, in the case of certain closed-end Private Funds, committed capital, invested capital or the balance of the primary loan to the vehicle. In addition, in certain situations involving due diligence support provided to investment management clients of the Advisers on a non-discretionary basis, Clients are charged flat fees depending on the scope of work. Performance-based fees or other performance-based compensation generally will be based on specified yield or total return benchmarks, or periodic or cumulative performance "hurdles" or an appropriate index and generally are payable to the Adviser or an affiliate of the Adviser:

- (i) on a quarterly or annual basis;
- (ii) in the case of certain funds that invest primarily in Affiliated Funds or Third Party Funds (each, a "Fund of Funds") and other Private Funds (and similarly managed separate accounts), at the time of withdrawal or redemption with respect to the amount withdrawn; and/or
- (iii) as redeemed or as investments are realized and/or capital is distributed.

Certain Private Funds charge performance-based fees or allocations based on the relevant Private Funds' net profits without regard to any index or performance hurdle. In some cases, these arrangements are subject to a cumulative high-water mark or other provisions intended to assure that prior losses are recouped before giving effect to any performance-based fees or allocations. Clawback or deferral provisions also apply to performance-based fees paid with respect to certain Private Funds and separate accounts. The timing and amount of performance-based fees or allocations typically are described in the relevant governing documents and/or the OM, if applicable.

With the exception of the Advisers' IMAs with US Registered Funds, the Advisers' IMAs with Clients, collateralized debt obligation funds, collateralized loan obligation funds, Private Funds and Fund of Funds often do not have termination dates. Rather, IMAs typically are terminated by the Adviser or the Client with advance notice, as set forth in the relevant IMA. In the event of the termination of a relationship, unearned fees, if any, beyond agreed-upon minimum fees, paid in advance will be refunded to the Client. To the extent fees have been earned but not yet billed, such fees will be pro-rated and paid by the Client upon termination. In certain cases (e.g., Private Funds, and separate accounts with performance-based fees), fees continue to be paid after termination of the relationship in accordance with the IMA or OM and/or other governing documents, as applicable.

Other Fees and Expenses

In addition to the fees described above, certain Clients bear other costs associated with investments or accounts including but not limited to:

- (i) custodial charges (including overdraft charges), brokerage fees, commissions and related costs;
- (ii) interest expenses;
- (iii) taxes, duties and other governmental charges;
- (iv) transfer and registration fees or similar expenses;
- (v) costs associated with foreign exchange transactions;
- (vi) other portfolio expenses, including but not limited to index licensing fees;

- (vii) costs, expenses and fees (including investment advisory and other fees charged by the investment advisers of funds in which the Client's account invest) associated with products or services that are necessary or incidental to such investments or accounts;
- (viii) administrative services; and
- (ix) to the extent negotiated in the IMA, certain of the expenses described in the next paragraph. With respect to certain of the services described in clause (vii), which include, but are not limited to, custodial, brokerage, futures, banking, consulting or third-party advisory or legal services, each Client is required to establish business relationships with relevant service providers or other counterparties based on the Client's own credit standing. BlackRock will not have any obligation to allow its credit to be used in connection with the establishment of such relationships, nor is it expected that such service providers or counterparties will consider or rely on BlackRock's credit in evaluating the Client's creditworthiness.

Private Funds also generally bear their own organizational, operating and other expenses including, but not limited to, in addition to those listed above:

- (i) sales expenses;
- (ii) legal expenses (which includes expenses incurred in connection with a Private Fund's legal and regulatory compliance with U.S. and non-U.S. laws and regulations (including reporting on and compliance with Form PF), and expenses incurred in connection with complying with provisions in side letter agreements, including "most favored nations" provisions);
- (iii) internal and external accounting, audit, custody, administration and tax preparation expenses;
- (iv) out-of-pocket costs of any legal counsel (including litigation expenses);
- (v) insurance costs, including the cost of any D&O liability or other insurance and indemnification (including advances) or extraordinary expense or liability relating to the affairs of Private Funds;
- (vi) placement compensation payable to any placement agent (including any out-of-pocket expenses of such placement agent and any indemnification expenses payable to such placement agent);
- (vii) expenses of the limited partner advisory boards for certain Private Funds and meetings of the limited partners;
- (viii) expenses of liquidating and dissolving the Private Funds, including any fees and expenses of the Private Funds' liquidator;
- (ix) certain travel expenses;
- (x) other service provider expenses (e.g., expenses related to directors of a Private Fund);
- (xi) all expenses incurred in connection with a Private Fund's business, affairs and operations, including identifying, structuring, managing, evaluating, trading, conducting due diligence on, investing in, acquiring, holding, restructuring, disposition of (including the transfer or sale of), any portfolio investments or prospective investments (whether or not consummated), including "broken-deal expenses," legal, accounting, engineering, consulting, management, non-disclosure agreement service providers, and other professional fees, fees of finders or sourcing partners, and travel and lodging expenses;
- (xii) all expenses incurred in connection with the securing and servicing of financing, including expenses related to the negotiation and documentation of agreements with one or more lenders or the posting of collateral;

- (xiii) all principal and interest on, and fees, costs and expenses arising out of, all borrowings and guarantees made by, and other indebtedness of, the Private Funds;
- (xiv) all extraordinary expenses or liabilities;
- (xv) all professional fees incurred in connection with the business or management of the Private Funds, including reasonable dues for professional organizations related to the investment strategy of the Private Funds;
- (xvi) all expenses relating to the potential transfer or actual transfer of investors' interests in the Private Funds (to the extent not paid by the transferor or transferee);
- (xvii) all expenses relating to any letter agreements, distribution agreements and other similar agreements with investors and prospective investors and modifications and amendments to such agreements;
- (xviii) all expenses incurred in connection with the creation of, and any restructuring or amendments or supplements to, the OM or the governing documents of the Private Funds or of the general partner and related entities;
- (xix) all expenses incurred in connection with the formation of private market investment vehicles and special purpose vehicles and subsidiaries of the Private Funds;
- (xx) any amounts paid by the Private Funds or private market investment vehicles for any hedging transactions (including any amounts necessary to satisfy margin requirements) or permitted borrowing requirements;
- (xxi) all expenses incurred in connection with multimedia, analytical, database, news or other third-party research services and related terminals for the delivery of such services;
- (xxii) all fees charged by third parties for sourcing and/or managing portfolio investments, including fees paid to administrators of portfolio investments;
- (xxiii) all third-party fees and expenses charged to the Private Funds, including in connection with tax and legal advice, custodial services and compliance services;
- (xxiv) all fees charged, and reasonable out-of-pocket expenses incurred, by the Private Funds' administrators and custodians;
- (xxv) management fees; and
- (xxvi) any value added tax payable in respect of any expenses, fees or costs set forth in clauses (i) – (xxv) above.

Generally, feeder funds bear a pro rata share of the expenses associated with the related master fund. Accounts or Private Funds that invest with an underlying manager or in underlying funds generally bear associated fees (which typically include both asset based and performance-based fees) and expenses of such underlying managers and/or underlying funds. Investors and Clients bear the cost of investments in funds, which can include Affiliated Funds. Further details on expenses that are charged are in the relevant OM and/or other governing documents.

Fees Paid to Adviser by Third Parties

With respect to certain Private Funds and separate accounts an Adviser or one of its employees or affiliates at times receives commitment fees, origination fees, structuring fees, administrative agency fees, break-up fees, financing fees, directors' fees, consulting fees, transaction fees, advisory fees, closing fees and other similar fees from a portfolio investment of or counterparty to such Private Fund and separate account, respectively, as well as placement or other similar fees payable to a broker-dealer ("Third-Party Fees"). The management fee received by an Adviser from a Private Fund or separate account or one of its affiliates may be reduced by the amount of Third-Party Fees received by such Adviser, or its employees or its affiliates. The extent to which an Adviser or one of its employees or affiliates may retain such Third-Party Fees, if at all, is set forth in such Private Fund's OM and/or governing documents or the IMA governing the separate account, respectively. Further details on Third-Party Fees are in such Private Fund's OM and/or governing documents or the IMA governing the applicable separate account, respectively.

Various conflicts of interest may exist when Third-Party Fees can be retained by an Adviser, or its employees or its affiliates and are not required to be applied to reduce the amount of the management fee received by such Adviser. For an additional discussion of the conflicts of interest presented by an Adviser's or its employee's or its affiliate's entitlement to retain Third-Party Fees, please refer to Item 11 ("Code of Ethics, Participation or Interest in Client Transactions and Personal Trading") of this Brochure and the section of disclosure headed "Conflicts of Interest Presented by the Retention of Third-Party Fees". For an additional discussion of brokerage and other transaction costs, please refer to Item 12 ("Brokerage Practices") of this Brochure.

Co-Investments

The Advisers from time to time offer certain persons (affiliated or unaffiliated) the opportunity to co-invest in particular investments alongside of a Private Fund, subject to certain restrictions. In each case where co-investors participate in an investment, the Advisers may allocate expenses associated with such investment, including broken-deal expenses, among such co-investors and other participants in the investment in accordance with BlackRock's allocation policies and procedures.

Item 6. Performance-Based Fees and Side-By-Side Management

As discussed in Item 5 (“Fees and Compensation”) of this Brochure, fee arrangements vary by Client, and are based on a number of different factors. Where applicable, performance-based fees or other performance-based compensation is generally based on specified yield or total return benchmarks or periodic or cumulative performance “hurdles” or an appropriate index and generally are payable to the Adviser or an affiliate of the Adviser:

- (i) on a quarterly or annual basis;
- (ii) in the case of certain funds that invest primarily in other affiliated or unaffiliated investment vehicles (each, a “Fund of Funds”) and other Private Funds (and similarly managed separate accounts), at the time of withdrawal or redemption with respect to the amount withdrawn; and/or
- (iii) as redeemed or as investments are realized and/or capital is distributed.

In some cases, these arrangements are subject to a high-water mark or other provisions intended to assure that prior losses are recouped before giving effect to any performance-based fees or allocations. Clawback or deferral provisions also apply to performance-based fees paid with respect to certain Private Funds and separate accounts. The timing and amount of performance-based fees or allocations typically are described in the relevant governing documents and/or the OM, if applicable.

Clients should be aware that when an Adviser or an affiliate receives performance-based fees or allocations, or BlackRock personnel have any other financial incentive to achieve gains in excess of the disincentive to suffer losses, BlackRock and/or such personnel have an incentive to choose investments that are riskier or more speculative than might otherwise be chosen.

In addition, the Advisers manage different types of accounts having different fee arrangements. US Registered Funds and SMA Program accounts, for example, generally pay management fees based on a fixed percentage of assets under management (which may include unitary fee structures), whereas institutional accounts and Private Funds have more varied fee structures, including a combination of asset- and performance-based compensation. Side-by-side management by Advisers of US Registered Funds, institutional accounts, SMA Program accounts and Private Funds raises potential conflicts of interest. Please refer to Item 11 (“Code of Ethics, Participation or Interest in Client Transactions and Personal Trading”) of this Brochure and the section of disclosure headed “Allocation of Investment Opportunities and Side-by-Side Management” for a discussion of conflicts associated with the side-by-side management of Client accounts, including but not limited to that the Advisers or their employees have an incentive to favor accounts from which the Advisers or its employees receive a performance-based fees.

Item 7. Types of Clients

Overview of Clients

As discussed in Item 4 (“Advisory Business”) of this Brochure, the Advisers’ investment management services are offered to investment companies, single-investor funds, discretionary and non-discretionary advisory programs, commingled investment vehicles, other investment advisers, and individuals and institutional investors through separate account management. The Advisers’ Clients include, but are not limited to: financial institutions, registered investment companies, ETFs, business development companies, private investment funds, real estate investment trusts, profit sharing plans, pension funds and other retirement accounts, insurance companies, charitable and endowment organizations, corporations, banks and thrift institutions, estates and trusts, and other institutional type accounts (both taxable and tax-exempt), government agencies, government chartered corporations, quasi-governmental agencies, state and local governments and non-U.S. pension funds, national banks, as well as high net worth and other individuals. Not every Adviser covered herein will manage each type of client account. The Advisers can advise both U.S. and non-U.S. clients subject to applicable law. Each of the Advisers generally utilizes the common policies and procedures described in this Brochure¹¹.

An Adviser may seek to obtain, verify, and record information that identifies each Client and, as applicable, their owners and controllers of investors who retain the Adviser to manage the account or who invest in a fund managed by the Adviser, in order to help the U.S. Government fight the funding of terrorism and money laundering activities and comply with economic sanctions. The Adviser will also screen clients and, as applicable, the owners and controllers of investors who invests in Private Funds, against appropriate sanctions lists, such as those administered by the United States Office of Foreign Assets Control, European Union and United Nations, and any other applicable regimes to where the Adviser operates.

The types of clients to which an Adviser typically provides investment management services are noted below but are not limited to those listed.

US Registered Funds

BAL and BFA serve as investment advisers to BlackRock's proprietary open-end investment companies, including ETFs, and closed-end investment companies, each of which are registered under the Investment Company Act, and are grouped into several complexes. BFA is the investment adviser to certain BlackRock open-end investment companies, including the U.S. iShares ETF Complex ("US iShares ETFs") and sub-adviser to non-proprietary ETFs. Together, the funds included in these complexes are referred to as the "BlackRock US Funds". BAL is the investment adviser to the BlackRock closed-end investment companies and certain BlackRock open-end investment companies, including variable insurance funds, certain money market funds and non-index ETFs.

The BlackRock Multi-Asset Complex consists of various open-end mutual funds, including variable insurance funds and money market funds serving the institutional and retail market, and non-index ETFs. The BlackRock Fixed-Income Complex consists of closed-end investment companies, most of which are publicly traded, and various open-end investment companies, including variable insurance funds and non-index ETFs. The BlackRock BCIA Fund Complex consists of closed-end investment companies.

The US iShares ETF Complex consists of exchange-traded U.S. registered investment companies that are listed for trading on the secondary market, and primarily consists of index funds, but also includes some and non-index ETFs.

Each fund complex has its own board of directors/board of trustees.

In some cases, the U.S. registered investment companies are commodity pools for which an Adviser is a commodity pool operator that:

- (i) is exempt from pool disclosure document delivery and general disclosure requirements pursuant to Rule 4.12(c)(3) under the CEA;
- (ii) is a registered commodity pool operator; or
- (iii) is exempt from registration and related requirements pursuant to CEA Rule 4.5, or other provisions under the CEA and the rules of the CFTC, and in connection with these exemptions, investors are required to meet additional requirements.

The Advisers can also serve as adviser or sub-adviser for a variety of U.S. registered investment companies advised by an affiliated or unaffiliated adviser ("Sub-Advised Funds" and, together with the BlackRock US Funds, "US Registered Funds").

Private Funds

Private Funds include, but are not limited to, funds focusing on commercial or residential mortgages, bank loans, money market securities, distressed assets and certain sectors (e.g., energy, renewable power or health sciences); funds focusing on real estate and other real assets; fixed income funds; equity funds; direct private equity funds and special situations funds; infrastructure debt and equity funds; funds of private equity or hedge funds and other Fund of Funds and direct co-investment funds; opportunistic funds; collateralized debt obligation funds; collateralized loan obligation funds; managed futures funds and portable alpha funds.

Private Funds are organized as domestic or offshore (non-U.S.) companies, limited partnerships, limited liability companies, corporate trusts or other legal entities, in order to meet the legal, regulatory and tax demands of investors and as determined to be appropriate by the applicable Adviser. As a general matter, each Private Fund is managed in accordance with its investment objectives, strategies and guidelines and is not generally tailored to the individualized needs of any particular investor in the Private Fund (each an “Investor”). In addition, an investment in a Private Fund does not, in and of itself, create an advisory relationship between the Investor and an Adviser. Therefore, Investors must consider whether the Private Fund meets their investment objectives and risk tolerance prior to investing in a Private Fund. Information about each Private Fund, including its investment risks, can be found in its OM and/or other governing documents, which will be available to current and prospective Investors only through a BlackRock-affiliated broker-dealer or another authorized party or directly from BlackRock. In some cases, a Private Fund is established for the benefit of a single investor, in which case the Private Fund is tailored to the individualized needs of the investor. BlackRock, or an affiliate, generally acts as general partner, managing member or investment manager or otherwise exercises investment discretion with respect to these products in which investors invest. Certain BlackRock non-U.S. affiliates act as placement agents with respect to the distribution of Private Funds to investors outside the U.S. While this Brochure includes information relevant to investors, this Brochure is designed solely to provide information about the Advisers and should not be considered to be an offer of interests in any Private Fund.

Private Funds that are offered to U.S. Persons, defined under Regulation S of the Securities Act of 1933 (“U.S. Persons”) are typically excepted from the definition of an “investment company” pursuant to Section 3(c)(1) or Section 3(c)(7) of the Investment Company Act. Interests in the Private Funds are offered on a private placement basis or under Regulation S of the Securities Act of 1933, as amended (the “Securities Act”). Interests in the 3(c)(1) Funds are offered to persons who are “accredited investors” as defined under the Securities Act, and “qualified clients” as defined in Rule 205-3 under the Advisers Act (to the extent a performance-based fee is charged). Interests in the 3(c)(7) Funds are offered to persons who are both “accredited investors” as defined under the Securities Act and “qualified purchasers” as defined under the Investment Company Act. In some cases, the Private Funds are commodity pools for which an Adviser is a commodity pool operator that:

- (i) is exempt from certain reporting, recordkeeping and disclosure requirements pursuant to Rule 4.7 under the CEA;
- (ii) is a registered commodity pool operator; or
- (iii) is exempt from registration and related requirements pursuant to CEA Rule 4.13(a)(3), or other provisions under the CEA and the rules of the CFTC thereunder, and in connection with these exemptions, investors are required to meet additional requirements.

Additionally, investors in Private Funds are subject to certain other eligibility requirements which are set forth in the OM and/or other governing documents for each of the Private Funds. BlackRock personnel (including, but not limited to, the Advisers’ investment strategy personnel responsible for the management of such Private Funds or other client accounts) who are qualified purchasers, “knowledgeable employees” (as defined in Rule 3c-5 under the Investment Company Act) or who meet the Private Fund’s eligibility criteria and other applicable regulatory requirements, and certain other eligible personnel of BlackRock are permitted to invest in the Private Funds.

Private Funds that are organized under the laws of jurisdictions outside of the U.S. may be offered outside of the U.S. to U.S. Persons, pursuant to Section 7(d) of the Investment Company Act and the relevant SEC guidance thereunder. Such Private Funds can also be offered on a private placement basis to U.S. Persons (typically tax-exempt institutions) that are both “accredited investors” as defined under the Securities Act and for 3(c)(7) Funds “qualified purchasers” as defined under the Investment Company Act.

Certain of the Private Funds operate using “master-feeder” structures, pursuant to which trading operations reside in a “master fund” while Investors access the master fund directly or invest through one or more “feeder funds” that, in turn, invest (directly or indirectly) in the master fund. Private Funds can also use special purpose vehicles to aggregate investments by Private Funds into certain underlying investments or for structuring purposes, or parallel fund structures that divide Investors for tax or other purposes.

BlackRock and its related persons often invest in and/or serve as general partner, or managing member, or on the board of directors or advisory board of a Private Fund. BlackRock, and its related persons generally act as investment manager or otherwise exercise investment discretion with respect to certain Private Funds and often provide services other than advice (including, but not limited to, administration, organizing and managing the business affairs, executing and reconciling trades, preparing financial statements and providing audit support, preparing tax related schedules or documents, and sales and investor relations support, diligence and valuation services) to such funds, in some cases for a fee separate and apart from the advisory fee. A Private Fund often pays or reimburses BlackRock for certain organizational and offering expenses and operating expenses related to the Private Fund.

Other Pooled Investment Vehicles

Certain Advisers manage publicly-traded real estate investment trusts, private real estate investment trusts, commodity pools as defined in the CEA, grantor trusts and other structured products. Certain investment pools advised by the Advisers trade on a stock exchange and are known as exchange-traded funds (collectively, “iShares/BlackRock ETFs”). Although shares representing interests in such investment pools are bought or sold on a stock exchange, such shares cannot be purchased or redeemed directly from the iShares/BlackRock ETF except in large aggregations of shares (referred to as “creation units”) by institutions that sign an agreement to become authorized participants or participating dealers.

Certain Advisers provide investment advice to portfolios commonly referred to as collective investment schemes, which is a type of pooled investment common in the United Kingdom, Luxembourg Ireland, and Switzerland. Some of the collective investment schemes are Undertakings for Collective Investments in Transferable Securities (“UCITS”). UCITS is the European regulatory framework for an investment vehicle that can be marketed across the European Union, subject to certain notification and registration requirements.

Institutional Separate Accounts and SMAs

As discussed above in Item 4 (“Advisory Business”) of this Brochure, certain Advisers provide investment management services directly to institutional clients through separate accounts and high net worth and other individual clients through SMA Program accounts. As part of their institutional separate account business, the Advisers have developed many investment strategies to meet individual client risk profiles. Individual clients typically retain an Adviser to manage their accounts by participating in an institutional separate account or SMA program. BIM sponsors Private Investors, and BIM participates as an investment manager in SMA Programs sponsored by various third-party firms. Advisers’ SMA clients include, but are not limited to, high net worth and other individuals, charitable and endowment organizations, government entities, investment companies, corporations and other institutions (both taxable and tax-exempt), trusts and estates. SMA advisory services or certain investment strategies are not available to prospective clients residing or domiciled in certain countries outside the U.S., and such clients should contact MLPF&S (for Private Investors), their program Sponsor (for other SMA Programs) or the relevant Adviser for more information.

For Private Investors accounts, BIM generally requires a minimum investment of at least:

- (i) \$250,000 for investment strategies with the Wrap Fee Option;
- (ii) \$1,000,000 for investment strategies with the Standard Fee Option, and
- (iii) \$250,000 for fixed income investment strategies.

For Dual Contract SMA Program accounts, BIM generally requires a minimum investment of at least \$250,000 for investment strategies, although smaller accounts can be accepted at BIM's discretion. Higher minimums are required for certain programs and/or investment strategies. Please see, e.g., Item 5 ("Fees and Compensation") of this Brochure for more information. Clients participating in other SMA Programs should contact their program Sponsors for more information on minimum account sizes and other eligibility requirements.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

In managing discretionary client accounts and providing recommendations to non-discretionary clients, the Advisers utilize various investment strategies and methods of analysis implemented by Investment Groups. Item 8 describes various methods of analysis and investment strategies, as well as the primary risks associated with these investment strategies. However, it is not possible to identify all risks associated with investing and the particular risks applicable to a client account will depend on the nature of the account, its investment strategy or strategies and the types of securities held.

While an Adviser seeks to manage accounts so that risks are appropriate to the strategy, it is often not possible or desirable to fully mitigate risks. Any investment includes the risk of loss and there can be no guarantee that a particular level of return will be achieved. Clients and investors should understand that they could lose some or all of their investment and should be prepared to bear the risk of such potential losses. Clients and investors should read carefully all applicable informational materials and offering/governing documents, including OMs and prospectuses, for further information on the various risks associated with investing, prior to retaining an Adviser to manage an account or investing in any BlackRock investment product.

Advisers often consider but don't solely rely on credit ratings when analyzing bonds, notes and other debt-related investments and when evaluating the tenancy of real estate assets and the credit risk of certain real estate-related investments for client accounts. A credit rating generally reflects an assessment by the rating's provider of the relative credit risk of an investment compared to other investments rated by the provider (please see the below disclosure within this Item 8 of this Brochure headed "Investment Strategy Risks - Credit/Default Risk"). Credit rating agencies, including nationally recognized statistical rating organizations (each, a "Rating Agency"), may rate specific investments (e.g., bonds), issuers (e.g., corporations, governments and financial institutions) and/or programs (e.g., commercial paper programs). Certain types of investments generally are not rated by Rating Agencies, such as non-US government/sovereign obligations, US agency securities, time deposits at financial institutions, and derivative instruments such as credit default swaps. For those types of investments, as well as U.S. Treasury securities (some of which are not rated), where a Rating Agency has not rated the specific investment but has rated the investment's issuer, program, financial institution or underlying reference asset, an Adviser typically considers the investment to have the same Rating Agency rating as its issuer, program, financial institution or underlying reference asset, as appropriate. In the case of municipal securities, where one Rating Agency provides multiple ratings for the same security (e.g., "underlying," "insured" and/or "enhanced" ratings), an Adviser may consider the security to have the highest of the multiple ratings.

Certain new issue securities (regardless of type) are not rated by a Rating Agency at the time of their initial offering. Preliminary prospectuses or term sheets for new issue securities often include an expected rating for the security (as determined by the underwriter and/or issuer) or a Rating Agency rating for the issuer of the security. When deciding whether to purchase a new issue security that has not yet been rated by a Rating Agency, an Adviser typically will attribute an expected rating to the security based on:

- (i) the expected rating of the security set forth in the preliminary prospectus or term sheet for the security;
- (ii) the Rating Agency's rating for the issuer of the security set forth in the preliminary prospectus or term sheet for the security;
- (iii) with respect to asset-backed securities, the rating of a prior issuance or
- (iv) other factors.

Please see "Investment Strategy Risks – New Issue Securities Risk" below for some of the risks associated with new issue securities.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Credit ratings are subject to change and do not reflect all risks associated with an investment.

Clients and investors should be aware that while an Adviser does not limit its advice to particular types of investments, mandates can be limited to certain types of securities or to the recommendation of investment advisers or managed funds and are not always diversified. The accounts managed by the Advisers are generally not intended to provide a complete investment program for a client or investor. Clients and investors are responsible for appropriately diversifying their assets to guard against the risk of loss.

BlackRock's active investment teams are provided with tools that can enable them to consider whether environmental, social, and governance ("ESG") considerations are relevant to their investment process alongside other measures for each investment strategy ("ESG Integration"), to the extent relevant and where reliable data is available. Such portfolio management teams may choose to consider those ESG characteristics they deem consistent with and relevant to their investment strategy with the goal of enhancing long-term performance. Clients can and occasionally do explicitly prohibit portfolio management teams from considering these factors for their portfolios.

To enable better evaluation of the ESG and sustainability risks by investment teams in the future, BlackRock's investment stewardship processes encourage the companies in which our clients are invested to manage and disclose material sustainability risks effectively. While BlackRock views ESG considerations as having the potential to contribute to a portfolio's long-term performance, there is no guarantee that such results will be achieved.

Across each of the mandates described below, the Advisers offer various sustainable investment strategies, which typically pursue one of three investment objectives: 1) investing in securities that contribute to positive sustainability-related outcomes (*i.e.*, "impact" strategies), 2) offering investors exposure to particular sustainability characteristics or themes, or 3) limiting investor exposure to a specific sustainability-related risk through an exclusionary approach. BlackRock offers sustainable investment strategies that are actively managed (including strategies that are model-based) as well as index-based. BlackRock also offers custom sustainable investment strategies based on client-specific needs and works with index providers to design ESG or sustainability themed indexes and expand the universe of sustainable indexes. See "Investment Strategy Risks – ESG Integration and Sustainable Investing Risk" for further information regarding the various risks associated with sustainable strategies and ESG Integration.

Fixed Income Mandates

The Advisers utilize fixed income strategies that are actively managed, or model or index based. Actively managed fixed income mandates generally employ an active investment style that emphasizes rotation among different types of debt on a relative value basis, specific security selection, quantitative analysis of each security and the portfolio as a whole and intensive credit analysis and review. Model-based institutional strategies typically invest across a broad spectrum of global fixed income securities, as well as currencies, futures and swaps. A risk-controlled, systematic process is utilized for model-based portfolio construction and alpha generation. Alpha sources include security selection, duration and yield curve positioning, industry rotation, asset allocation, and currency positioning. For institutional index strategies, BlackRock typically invests in accordance with the risk and return profile of a benchmark either by replicating an index or utilizing security level or stratified sampling where an index is disaggregated into smaller cells in an effort to match the risk characteristics of each cell.

For certain Private Investors and other SMA Program investment strategies, BIM creates and maintains generally applicable guidelines ("Model Guidelines") which specify, for example, particular securities or guidelines for, among other things, the asset class, issuer, duration, maturity and/or credit quality of fixed income securities that can be held in an account following the particular strategy. The Model Guidelines will change from time to time at BIM's discretion based on market and other considerations.

In seeking to achieve long-term investment performance consistent with clients' and other investors' objectives and policies, the Advisers seek to establish a continuous and comprehensive understanding of the investment risks in each portfolio, as well as those risks inherent in the increasingly complex global capital markets. Accordingly, the Advisers generally utilize proprietary investment technology, particularly for institutional fixed income and cash management businesses. BlackRock believes that this technology provides both a high degree of automation in trade processing and compliance, as well as highly sophisticated securities and portfolio analytics that permit a continuous, thorough understanding of the risks taken, or proposed to be taken, relative to each client's benchmark or on an absolute basis (without reference to a benchmark), as appropriate. In addition, BlackRock's senior risk management professionals work closely with portfolio managers to ensure that models reflect market conditions, identify and assess risks, and develop strategies to manage such risks.

Equity Mandates

An Adviser's equity platform can offer a broad range of products that vary according to investment style (active, systematic, index and/or passive management), market capitalization (small-, mid-, small/mid-, large- and all-cap), and geography (global, international and regional). The product range also includes sector funds, long-only and long-short portfolios, as well as products that combine different strategies to create balanced, multi-asset and asset allocation portfolios. For certain Private Investors and other SMA Program investment strategies, BIM creates and maintains "target" portfolios of securities, to which securities are added and from which securities are removed from time to time. Individual portfolio management teams interact to review market developments, opportunities and strategies.

Cash Management Mandates

In cash management portfolios, the investment process seeks to emphasize safety and liquidity over yield. Risk is sought to be controlled through ongoing credit review, stress testing and risk management analysis and diversification. The CMG of the Investment Groups holds bi-weekly meetings to review risk, relative value, and yield curve positioning, credit and rate outlook, among other things. CMG and RQA regularly monitor portfolio construction, including liquidity positioning, maturity structure and security selection. The CMG Credit Committee approves issuers and counterparties, sets and monitors aggregate exposure limits, and reviews evolving risks. CMG and RQA regularly review market data, industry information and proprietary analytics.

Private Market Mandates

BlackRock private markets focus on sourcing and managing high-alpha investments with lower correlation to public markets and developing a holistic approach to address client needs in private markets investing. Our private markets products fall into two main categories: 1) core private markets, and 2) currency and commodities. Core includes private market solutions, direct hedge funds, direct private equity funds, hedge fund and private equity solutions (Funds of Funds), opportunistic private equity and credit, real estate and infrastructure offerings. Certain of these products involve a higher level of investment risk, while seeking greater returns than traditional investment products.

Private market products invest in a wide array of instruments depending on their respective investment guidelines and objectives, including but not limited to equity securities, warrants, commercial paper, government securities, municipal securities, options contracts, future contracts, real estate, infrastructure projects, and interests in private funds. Further information can be found in the relevant OM and/or governing document, if applicable, for each Private Fund or the IMA for each institutional separate account.

BlackRock solicits clients to invest in such products, from time to time and when appropriate, as these investments are not necessarily appropriate for all clients. Not all clients afforded the opportunity to invest will choose to invest. BlackRock may on a discretionary basis invest in such products on a client's behalf, in accordance with the client's investment guidelines and restrictions.

Multi-Asset Mandates

Certain Advisers develop and manage investment mandates and products involving multiple strategies and asset classes, including strategies that permit the Advisers to allocate all or a portion of the portfolio management to unaffiliated investment advisers selected by the Advisers. Advisers develop asset allocation strategies and liability driven strategies for these mandates. Multi-asset strategies generally utilize a wide variety of asset classes and/or investment styles, and employ a variety of techniques and investment vehicles, including Funds of Funds that invest in hedge funds (including commodity pools), private equity, ETFs and mutual funds or other categories of funds (including BlackRock-managed funds), equities, bonds, cash, private market investments, and derivatives. The Advisers will conduct pre-investment due diligence and ongoing manager due diligence (the “Manager Research Services”) in connection with certain multi-asset mandates. Before allocating multi-asset separate account assets to the Advisers’ portfolio manager teams, an Adviser will carry out due diligence at the enterprise level (and not at the portfolio manager team level and/or fund level) and will compare BlackRock to peer firms, based on consideration of factors, including, without limitation, each firm’s global compliance processes, corporate governance, and regulatory disclosure documents. Before allocating multi-asset separate account assets to unaffiliated investment advisers, an Adviser will conduct due diligence with respect to such advisers’ investment teams, investment philosophies and processes, investment performance, fee structures, and remuneration systems in comparison to market standard (if any).

Multi-Asset Strategies & Solutions

Multi-Asset Strategies & Solutions (“MASS”), a business unit within BlackRock, provides customized, multi-asset class services to institutional clients and intermediated retail clients, which may include market commentary, asset allocation, analytics-based advice, model portfolio recommendations, and portfolio and risk management services. MASS generally utilizes BlackRock’s internal resources, which may include, but is not limited to, its manager due diligence team for pre-investment due diligence and ongoing manager due diligence with respect to products and strategies managed by the Advisers and unaffiliated investment advisers (such diligence, “Manager Research”), in order to offer clients a wide variety of investment options across asset classes, jurisdictions and liquidity profiles.

Method of Analysis

MASS’ investment process begins with analysis of the client’s objectives, constraints and preferences. MASS generates its portfolio construction using a combination of different asset allocation analyses, which may include strategic asset allocation, tactical asset allocation, and Manager Research and security selection.

- **Strategic Asset Allocation (“SAA”):** Designing a portfolio based on long-term investment beliefs and market condition assumptions which will track broad asset class indices or liability benchmarks.
- **Tactical Asset Allocation (“TAA”):** Blending diversified excess return sources, including factor and market timing, over a shorter-time horizon.
- **Manager Research and Security Selection:** Conducting pre-investment due diligence and ongoing due diligence with respect to products and strategies managed by the Advisers and unaffiliated investment advisers.

MASS strategy and portfolio management teams seek to select the products and managers that correlate to the assumptions used to produce the SAA and reflect the group’s investment insights and convictions, with consideration of applicable Manager Research, fees and diversification if applicable.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

The applicable investment guidelines of a client mandate may authorize MASS to select or recommend:

- (i) investment strategies managed by the Advisers, including Affiliated Funds, or Third Party Funds; or
- (ii) investment strategies managed by both the Advisers, including Affiliated Funds, and unaffiliated investment advisers, including Third Party Funds.

To the extent permitted by a client's investment guidelines, where MASS implements certain types of investment on a client's behalf, including illiquid or private market products, there may be an opportunity to negotiate the terms of the related investment documentation. When such products are serviced by the Advisers, MASS will not negotiate such terms on the client's behalf.

If Manager Research services are provided, then before recommending or allocating client assets to actively managed investment strategies managed by the Advisers' portfolio manager teams or to unaffiliated investment advisers, MASS professionals will consider Manager Research including:

- (i) due diligence at the enterprise level, which compares managers to peer firms, based on consideration of factors, including, without limitation, each firm's global compliance processes, corporate governance, and regulatory disclosure documents; and
- (ii) investment due diligence for both the Advisers and unaffiliated investment advisers, which considers such advisers' investment teams, investment philosophies and processes, investment performance and fee structures.

In some cases, the due diligence process for the Advisers and Affiliated Funds may be different than that for unaffiliated investment advisers and Third Party Funds with limited operational due diligence performed on certain offerings. Generally, with respect to the Advisers' portfolio manager teams or unaffiliated investment advisers that manage passive investment strategies, Manager Research performs operational due diligence on such managers and investment due diligence at the index platform level.

MASS will not review the entire universe of available investment strategies managed by unaffiliated investment advisers, including Third Party Funds (together "Unaffiliated Products") that may be appropriate for a MASS client account, but rather will only review a subset of such Unaffiliated Products that have been reviewed and approved by MASS as determined in its sole discretion. As a result, there may be one or more Unaffiliated Product that would be a more appropriate addition to the client account than the investment product selected by MASS, from the standpoint of the factors that MASS has taken into consideration or other factors. Such Unaffiliated Products may outperform the investment product selected for the MASS client account.

In connection with a client account or an asset class within a client account that, pursuant to its guidelines invests only in investment strategies managed by the Advisers, including Affiliated Funds (together "Affiliated Products"), MASS will not review or consider Unaffiliated Products. As a result, there may be one or more Unaffiliated Product that would be a more appropriate addition to the MASS client account than the Affiliated Products selected by MASS, from the standpoint of the factors that MASS has taken into consideration or other factors. Such Unaffiliated Products may outperform the Affiliated Products selected for the MASS client account.

Please refer to Item 11 ("Code of Ethics, Participation or Interest in Client Transactions and Personal Trading") of this Brochure and the section of disclosures headed "Use of Affiliated Products" and "Use of Unaffiliated Products" for a discussion of conflicts associated with the use of Affiliated Products and Unaffiliated Products.

Risks Relating to the Use of Tactical Tilts

MASS may utilize tactical investment ideas derived from short-term market views ("Tactical Tilts") for client accounts. There are material risks related to the use of Tactical Tilts for client accounts. For example, the

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

timing for implementing a Tactical Tilt or unwinding a position can materially affect the performance of such Tactical Tilt. For various reasons, other businesses within BlackRock may implement a Tactical Tilt or unwind a position for client accounts or on their own behalf at a different time than MASS does on behalf of MASS client accounts, or may implement a Tactical Tilt that is different from the Tactical Tilt implemented by MASS on behalf of MASS client accounts, which could have an adverse effect on MASS client accounts and may result in poorer performance by MASS client accounts than by BlackRock or other client accounts. In addition, unless otherwise agreed in the agreement governing the client account, MASS monitors a client account's Tactical Tilt positions only on a periodic basis. Therefore, changes in market conditions and other factors may result in substantial losses to a client account, and no assurance can be given that a Tactical Tilt position will be unwound before the client account suffers losses. The use of Tactical Tilts also may include the risk of reliance on models.

Risks Relating to the Use of Target Ranges and Rebalancing

Certain client accounts, either generally or with respect to particular asset classes and/or product classes, may allocate to both Affiliated Products and Unaffiliated Products in accordance with target allocations or target ranges. For these client accounts, the conflicts and risks described above with respect to allocating assets to both Affiliated Products and Unaffiliated Products apply. In addition, to the extent a client designates target allocations or target ranges for Affiliated Products and Unaffiliated Products within a client account or a particular asset class or strategy within a client account, allocations of a client account's assets may, from time to time, be out of balance with the client account's target ranges for extended periods of time or at all times due to various factors, such as fluctuations in, and variations among, the performance of the investment products to which the assets are allocated and reliance on estimates in connection with the determination of percentage allocations. Any rebalancing by MASS of the client account's assets may have an adverse effect on the performance of the client account. For example, the client account's assets may be allocated away from an over-performing investment product and allocated to an under-performing investment product, which could be harmful to the client account. In addition, the achievement of any intended rebalancing may be limited by several factors, including the use of estimates of the net asset values of the investment products, and, in the case of investments in investment products that are pooled investment vehicles, restrictions on additional investments in and redemptions from such investment products. Similarly, the use of target ranges in respect of product classes may result in a client account containing a significantly greater percentage of Affiliated Products than would otherwise be the case, including during periods in which Affiliated Products underperform Unaffiliated Products. In such circumstances, there may be one or more Unaffiliated Products that would be a more appropriate addition to a client account than the Affiliated Products then in the client account. Such Unaffiliated Products may outperform the Affiliated Products then in the client account.

Index Mandates

Certain Advisers provide investment advisory services to investment vehicles and client accounts (e.g., US Registered Funds, other pooled investment vehicles, separate accounts) whose investment objective is to achieve investment results, before fees and expenses, that correspond generally to the total return performance of a particular index ("Underlying Index"). Underlying Indices are generally developed by index providers that are not affiliated with BlackRock, but in some circumstances, BIS, an affiliate of the Advisers, is the index provider to client accounts, including US Registered Funds. BIS has established a governance framework designed to prevent the undue influence of the Advisers in the operation of any BIS Index. This framework includes information barriers to restrict the sharing of confidential information and a committee that approves index methodology changes and is independent of portfolio management and trading. In instances where BlackRock charges a unitary management fee, BlackRock may have a financial incentive to use a BIS Index that is less costly to BlackRock than a third-party index.

BlackRock does not provide any warranty or guarantee against index providers' errors. Portfolios managed to track an index have passive investment risk since they are not actively managed and do not attempt to take defensive positions in declining markets. Please see the below disclosure within this Item 8 of this Brochure headed "Investment Strategy Risks" for more information about index-related risks.

BlackRock's index-based Funds of Funds strategies utilize internally managed funds as building blocks to provide performance representative of an index. Advisers also offer Funds of Funds strategies that allocate to a variety of internally managed funds based on the output of proprietary quantitative models.

Investment Strategy Risks

BlackRock supports the investment strategies of client accounts with proprietary technology, such as that provided by BRS which produces risk management reports using technology such as its Aladdin® technology platform. In some cases, RQA generates supplementary daily risk reports. However, RQA generally provides periodic detailed risk analyses, including risk reports that are discussed with portfolio managers, across all asset classes, as part of the RQA risk oversight process. Among other things, RQA's role enables the risks associated with the portfolios managed by the Advisers to be understood by relevant portfolio managers and reviewed for conformity with client objectives. Prospective clients and investors should be aware that no risk management system is fail-safe, and no assurance can be given that risk frameworks employed by RQA and an Adviser's portfolio managers (e.g., stop-win, stop-loss, Sharpe Ratios, loss limits, value-at-risk or any other methodology now known or later developed) will achieve their objectives and prevent or otherwise limit substantial losses. No assurance can be given that the risk management systems and techniques or pricing models will accurately predict future trading patterns or the manner in which investments are priced in financial markets in the future. BlackRock investment professionals employ quantitatively-based financial and analytical models to aid in the selection of investments for clients and to determine the risk profile of client accounts. The success of an investment program and trading activities depends, in part, on the viability of such analytical models. Additional risks for relevant products are more fully described in such products' offering and/or governing documentation.

The fixed income investment process centers around investment strategy meetings. Fixed income portfolio team heads within Investment Group chair meetings with Investment Group personnel to present their market outlook views. Investment Groups, along with RQA representatives, then hold strategy meetings to determine appropriate risks and exposures through credit quality, liquidity bias and sector/asset allocations. RQA conducts risk and performance reviews with Investment Groups across all asset classes, generally on a monthly basis. RQA also has a Risk and Performance Targets review process for the majority of active accounts, whereby risk tolerances are set based on discussions with respective businesses and Investment Groups. RQA monitors risk exceptions with business leads and discusses possible actions with chief investment officers. RQA holds monthly Portfolio Risk Alignment Committee meetings to review and discuss all risk and performance exceptions, and action recommendations if necessary.

Certain risks apply specifically to particular investment strategies or investments in different types of securities or other investments that clients and investors should be prepared to bear. The risks involved for different client accounts or funds will vary based on each client's investment strategy and the type of securities or other investments held in the client's account or the fund. The following are descriptions of various primary risks related to the investment strategies used by the Advisers. Not all possible risks are described below. Clients and investors should read carefully all applicable informational materials and offering/governing documents, including OMs and prospectuses, for further information on the various risks prior to retaining an Adviser to manage an account or investing in any BlackRock investment product.

Asset Allocation Strategy Risk: Asset allocation strategies do not assure profit or diversification and do not protect against loss. There is a risk that the asset allocation may be incorrect in view of actual market conditions. In addition, an asset allocation strategy determination could result in underperformance as compared to other strategies with similar investment objectives and asset allocation strategies.

Asset Class Risk: Securities in a portfolio can underperform in comparison to the general securities markets, a particular securities market, or other asset classes.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Borrowing Risk: Borrowing may exaggerate changes in the net assets and returns of a portfolio. Borrowing will cost the portfolio interest expense and other fees, potentially reducing a portfolio's return. This can at times result in a need for the portfolio to liquidate positions when it may not be advantageous to do so to satisfy its borrowing obligations. Borrowing arrangements can be used to meet short-term investment and liquidity needs or to employ forms of leverage either of which entails risks, including the potential for higher volatility and greater declines of a portfolio's value, and fluctuations of dividend and other distribution payments.

Commodity Risk: Negative changes in a commodity market could have an adverse impact on the value of commodity-linked investments including companies that are susceptible to fluctuations in commodity markets. The value of commodity-linked investments can be affected by changes in overall market movements, taxation, terrorism, nationalization or expropriation, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as, weather (e.g., drought, flooding), livestock disease, embargoes, tariffs and international economic, political and regulatory developments. The prices of sector commodities (e.g., energy, metals, bitcoin, agriculture and livestock) can fluctuate widely due to factors such as changes in value, supply and demand and governmental regulatory policies.

Concentration Risk: Concentrating investments in an issuer or issuers, in a particular country, group of countries, region, market, industry, group of industries, sector or asset class means that performance will be more susceptible to loss due to adverse occurrences affecting that issuer or issuers, particular country, group of countries, region, market, industry, group of industries, sector or asset class than a more diversified mix of investments.

Controlling Interest Risk: Because of its equity ownership, representation on the board of directors and/or contractual rights, a portfolio may be considered to control or influence the conduct of portfolio companies. Under certain circumstances, such ownership, rights or roles could be used by third parties as the basis for such parties to assert environmental, pension-related, securities law or other claims against such portfolio or its owners or affiliates.

Conversion of Equity Investments Risk: After its purchase, a non-equity investment directly or indirectly held by a portfolio, such as a convertible debt obligation may convert to an equity security (converted investment). Alternatively, a portfolio may directly or indirectly acquire equity securities in connection with a restructuring event related to one or more of its non-equity investments. Challenges in liquidating the converted investment at an advantageous time, would impact the performance of the portfolio.

Counterparty Risk: Transactions, including certain derivative transactions, entered into directly with a counterparty are subject to the risk that the counterparty will fail to perform its obligations in accordance with the agreed terms and conditions of the transaction. A counterparty's bankruptcy or other failure to perform its obligations due to financial difficulties, would result in significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding or reduced or no recovery in such circumstances.

Credit/Default Risk: Debt issuers and other counterparties of fixed income securities or instruments in some instances default on their obligation to pay interest, repay principal or make a margin payment, or default on any other obligation. Additionally, the credit quality of securities or instruments could deteriorate (e.g., downgraded by one or more Rating Agencies), which would impair a security's or instrument's liquidity and decrease its value.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Currency Risk: Currencies are purchased and sold for portfolios through the use of forward contracts or other instruments. A portfolio that seeks to trade in foreign currencies can have limited access to certain currency markets due to a variety of factors including government regulations, adverse tax treatment, exchange controls, and currency convertibility issues. Certain portfolios can hold investments denominated in currencies other than the currency in which the portfolio is denominated. Currency exchange rates can be volatile, particularly during times of political or economic unrest or as a result of actions taken by central banks. A change in the exchange rates has the potential to produce significant losses to a portfolio, particularly if unhedged in whole or in part.

Debt Instruments Risk: Generally, investments in debt and credit-related instruments can be secured or unsecured and can be structurally or contractually subordinated to substantial amounts of senior indebtedness. Other factors can materially and adversely affect the market price and yield of such debt investments, including investor demand, changes in the financial condition of the applicable portfolio company, government fiscal policy and domestic or worldwide economic conditions.

Derivative Risk: Investments in derivatives, or similar instruments, including but not limited to, options, futures, options on futures, forwards, participatory notes, swaps, structured securities, tender-option bonds and derivatives relating to foreign currency transactions, which can be used to hedge a portfolio's investments or to seek to enhance returns, entail specific risks relating to liquidity, leverage and credit that can reduce returns and/or increase volatility. Losses in a portfolio from investments in derivative instruments can result from the potential illiquidity of the markets for derivative instruments, the failure of the counterparty or issuer to fulfill its contractual obligations, the portfolio receiving cash collateral under the transactions and some or all of that collateral being invested in the market, or the risks arising from margin posting requirements and related leverage factors associated with such transactions. In addition, many jurisdictions continue to review practices and regulations relating to the use of derivatives, or similar instruments. Such reviews could make such instruments more costly, limiting the availability of, or otherwise adversely affecting the value or performance of such instrument.

Developed Countries Risk: Investments in developed countries subject a portfolio to regulatory, political, currency, security, demographic, and economic risk specific to developed countries. Developed countries are impacted by changes to the economic health of certain key trading partners, regulatory burdens, debt burdens, and the price or availability of certain commodities. Developed countries tend to represent a significant portion of the global economy and have generally experienced slower economic growth than some other countries or regions.

Distressed Securities Risk: Investments in companies that are in poor financial condition, lack sufficient capital or are involved in bankruptcy or reorganization proceedings face the unique risks of lack of information with respect to the issuer, the effects of bankruptcy laws and regulations and greater market volatility than is typically found in other securities markets. As a result, investments in securities of distressed companies involve significant risks that could result in a portfolio, incurring losses with respect to such investments.

ESG Integration and Sustainable Investing Risk:

- **ESG Integration Risk:** The ESG Integration employed by certain of BlackRock's active investment teams involves the consideration of certain ESG characteristics with the goal of enhancing long-term performance, but there is no guarantee that such results will be achieved. These ESG considerations will vary depending on a portfolio's particular investment strategies and may include consideration of third-party research as well as consideration of proprietary BlackRock research across the ESG risks and opportunities regarding an issuer. The ESG characteristics utilized in a portfolio's investment process are anticipated to evolve over time and one or more characteristics may not be relevant with respect to all issuers that are eligible for investment. Certain of these considerations may affect a portfolio's exposure to certain companies or industries. While portfolio management views ESG considerations as having the potential to

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

contribute to a portfolio's long-term performance, there is no guarantee that such results will be achieved.

- **Sustainable Investing Risk.** A portfolio that employs a sustainable investing strategy may seek to achieve sustainability-related outcomes, to achieve exposure to particular sustainability characteristics or themes, and/or to screen out certain companies and industries. Such sustainable investing strategies may reduce or increase a portfolio's exposure to certain companies or industries and the portfolio may forego certain investment opportunities as a result. Such portfolio's performance results may be lower than other portfolios that do not seek to invest in issuers based on sustainability characteristics or that use different criteria when screening out particular companies and industries.

In evaluating a security or an issuer's ESG or sustainability characteristics, BlackRock may be dependent upon information and data from third-party providers, which may be incomplete, inaccurate or unavailable. As a result, there is a risk that BlackRock could incorrectly assess a security or issuer. There is also a risk that BlackRock may not apply the relevant ESG or sustainability criteria correctly or that a portfolio could have indirect exposure to issuers that do not meet the relevant ESG or sustainability criteria used by such portfolio. BlackRock does not make any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of such ESG or sustainability assessment. Further, there may be limitations with respect to the availability, accuracy and completeness of ESG or sustainability data, as well as limited availability of investments with relevant ESG or sustainability characteristics in certain sectors or regions. In addition, there is variability among data sources, including differing methodologies for measuring sustainability, which could negatively affect BlackRock's ability to accurately assess an issuer. If the ESG or sustainability assessment of a security held by a portfolio changes, BlackRock does not accept any liability in relation to such change.

The impacts of risks related to ESG Integration and sustainable investing are likely to change over time, and new risks may be identified as further data and information regarding ESG factors and impacts become available. In addition, methodologies for ESG integration and sustainable investing continue to develop, and the methodology applied by BlackRock may change over time.

Emerging Markets Risk: Investments in emerging markets can be subject to a greater risk of loss than investments in more developed markets, as they are more likely to experience inflation risk, political turmoil and rapid changes in economic conditions. Investing in the securities of emerging markets involves certain considerations not typically associated with investing in more developed markets, including but not limited to, the small size of such securities markets and the low volume of trading (possibly resulting in potential lack of liquidity and in price volatility), political risks of emerging markets which can include unstable governments, government intervention in securities or currency markets, nationalization, restrictions on foreign ownership and investment, laws preventing repatriation of assets and legal systems that do not adequately protect property rights. Further, emerging markets can be affected adversely by changes to the economic health of certain key trading partners, such as the U.S., regional and global conflicts and terrorism and war. Emerging markets often have less uniformity in accounting and reporting requirements, unreliable securities valuation and greater risk associated with custody of securities.

Equity Securities Risk: Equity securities are subject to changes in value and their values can be more volatile than other asset classes. The value of equity securities varies in response to many factors. These factors include, without limitation, factors specific to an issuer and the industry in which the issuer securities are subject to stock risk. Historically, U.S. and non-U.S. stock markets have experienced periods of substantial price volatility and should be expected to do so again in the future.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Fraudulent Conveyance Risk: If a court in a lawsuit brought by an unpaid creditor or representative of creditors of a borrower, such as a trustee in bankruptcy or the borrower as debtor-in-possession, were to find that the borrower did not receive fair consideration or reasonably equivalent value for incurring indebtedness evidenced by a loan made by a portfolio and the grant of any security interest or other lien securing such investment made by a portfolio, and, after giving effect to the incurring of such indebtedness, the borrower:

- (i) was insolvent;
- (ii) was engaged in a business for which the assets remaining in such borrower constituted unreasonably small capital; or
- (iii) intended to incur, or believed that it would incur, debts beyond its ability to pay such debts as they mature,

such court could invalidate, in whole or in part, such indebtedness and such security interest or other lien as fraudulent conveyances, subordinate such indebtedness to existing or future creditors of the borrower or recover amounts previously paid by the borrower (including to the relevant portfolio) in satisfaction of such indebtedness or proceeds of such security interest or other lien previously applied in satisfaction of such indebtedness.

Frontier Markets Risk: Investments in frontier markets are subject to a greater risk of loss than investments in more developed and traditional emerging markets. Frontier markets are more likely to experience inflation, currency and liquidity risks, political turmoil and rapid changes in economic conditions than more developed and traditional emerging markets. Frontier markets often have less uniformity in accounting and reporting requirements, unreliable securities valuation and greater risk associated with custody of securities.

Hedging Risk: Hedging techniques could involve a variety of derivatives, including without limitation futures contracts, exchange-listed and over-the-counter put and call options on securities, financial indices, forward foreign currency contracts, and various interest rate transactions. A transaction used as a hedge to reduce or eliminate losses associated with a portfolio holding or particular market that a portfolio has exposure, including currency exposure, can also reduce or eliminate gains. Hedges are sometimes subject to imperfect matching between the hedging transaction and its reference portfolio holding or market (correlation risk), and there can be no assurance that a portfolio's hedging transaction will be effective. In particular, the variable degree of correlation between price movements of hedging instruments and price movements in the position being hedged creates the possibility that losses on the hedge will be greater than gains in the value of the positions of the portfolio. Increased volatility will generally reduce the effectiveness of the portfolio's currency hedging strategy. Hedging techniques involve costs, which could be significant, whether or not the hedging strategy is successful. Hedging transactions, to the extent they are implemented, will not necessarily be completely effective in insulating portfolios from currency or other risks.

Illiquid and Long-Term Investment Risk: Certain portfolios may invest in private debt instruments secured by infrastructure or other assets for which the number of potential purchasers and sellers, if any, is often limited. This factor may have the effect of limiting the availability of these obligations for origination or purchase by a respective portfolio and may also limit the ability of a portfolio to sell such obligations at their fair market value prior to termination of such portfolio or in response to changes in the economy or financial markets. In particular, such investments will be relatively illiquid and there can be no assurance that a portfolio will be able to realize on such investments in a timely manner.

Income Risk: A dividend-producing portfolio security's income can decline in some instances when interest rates decrease. During periods of falling interest rates if an issuer is able to repay principal prior to the security's maturity ("prepayment"), the portfolio could be caused to reinvest in securities with a lower yield, resulting in a decline in the portfolio's income.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Index-Related Risk: Index strategies are passively managed and do not attempt to take defensive positions under any market conditions, including declining markets. Index strategies seek to achieve a return that corresponds generally to the price and yield performance, before fees and expenses, of the Underlying Index as published by the Index Provider. There is no assurance that the Index Provider or any agents that may act on its behalf will compile the Underlying Index accurately, or that the Underlying Index will be determined, composed or calculated accurately. While the Index Provider provides descriptions of what the Underlying Index is designed to achieve, neither the Index Provider nor its agents provide any warranty or accept any liability in relation to the quality, accuracy or completeness of the Underlying Index or its related data, and they do not guarantee that the Underlying Index will be in line with the Index Provider's methodology. Errors in respect of the quality, accuracy and completeness of the data used to compile the Underlying Index may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, particularly where the indices are less commonly used as benchmarks by funds or managers. Such errors may negatively or positively impact an Index Portfolio. There is no guarantee that an index portfolio will achieve a high degree of correlation to its Underlying Index and therefore achieve its investment objective. Market exposure and regulatory restrictions could have an adverse effect on the index portfolio's ability to adjust its exposure to the required levels in order to track its Underlying Index.

Interest Rate Risk: When interest rates increase, fixed income securities or instruments will generally decline in value. Long-term fixed income securities or instruments will normally have more price volatility because of this risk than short-term fixed income securities or instruments.

Issuer Risk: A portfolio's performance depends on the performance of individual securities to which the portfolio has exposure. Adverse changes to the financial condition or credit rating of an issuer of those securities often cause the value of the securities to decline or become worthless.

Investment Style Risk: Different investment styles tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. Portfolios can outperform or underperform other portfolios that invest in similar asset classes but employ different investment styles.

Leverage Risk: A portfolio utilizing leverage will be subject to heightened risk. Leverage often involves the use of various financial instruments or borrowed capital in an attempt to increase the return on an investment and is often intrinsic to certain derivative instruments. Leverage can take the form of borrowing funds, trading on margin, derivative instruments that are inherently leveraged, including but not limited to, forward contracts, futures contracts, options, swaps (including total return financing swaps and interest rate swaps), repurchase agreements and reverse repurchase agreements, or other forms of direct and indirect borrowings and other instruments and transactions that are inherently leveraged. Any such leverage, including instruments and transactions that are inherently leveraged, can result in the portfolio's market value exposure being in excess of the net asset value of the portfolio. A portfolio could need to liquidate positions when it is not advantageous to do so to satisfy its borrowing obligations or to meet the applicable requirements of the Investment Company Act. The use of leverage entails risks, including the potential for higher volatility and greater declines of a portfolio's value, and fluctuations of dividend and other distribution payments.

Liability Driven Investing ("LDI") Risk: To design and implement the LDI fixed income strategy for a defined benefit pension plan or other type of client, portfolio management relies entirely on information provided by the client, such as the client's funding status, liability schedule and other actuarial information. Portfolio management utilizes client information to recommend a target portfolio duration and target portfolio allocation/blended benchmark of fixed income investments for the client's portfolio. Inaccurate, incomplete or outdated information provided by the client may result in a target portfolio duration and/or target portfolio allocation/blended benchmark for the portfolio that does not appropriately reflect the client's funding needs. The client should promptly notify BlackRock of any changes to the information previously provided by the client. BlackRock does not guarantee any particular level of performance for the portfolio or that the client will be able to meet its funding needs.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Liquidity Risk: Liquidity risk exists when particular investments are difficult to purchase or sell (e.g., not publicly traded and/or no market is currently available or may become less liquid in response to market developments). This can reduce a portfolio's returns because the portfolio may be unable to transact at advantageous times or prices. Investments that are illiquid or that trade in lower volumes may be more difficult to value.

Loan Fraud: Of paramount concern in originating or investing in loans is the possibility of material misrepresentation or omission on the part of a borrower. Such inaccuracy or incompleteness may adversely affect the valuation of the collateral underlying the loans or may adversely affect the likelihood that a lien on the collateral securing the loans has been properly created and perfected. Under certain circumstances, payments to a portfolio may be reclaimed if any such payment or distribution is later determined to have been made with intent to defraud or prefer creditors.

Long/Short Strategy Risk: There is no guarantee that returns on a portfolio's long or short positions will produce high, or even positive, returns and the portfolio could lose money if either or both the portfolio's long and short positions produce negative returns.

Management Risk: A portfolio is subject to management risk, which is the risk that the investment process, techniques and analyses applied will not produce the desired results, and those securities or other financial instruments selected for a portfolio will result in returns that are inconsistent with the portfolio's investment objective. Portfolios advised by BlackRock are subject to threshold limitations on aggregate and/or portfolio-level ownership interests in certain companies and commodities, arising from statutory, regulatory or self-regulatory organization requirements or company ownership restrictions (e.g., poison pills or other restrictions in organizational documents). In addition, legislative, regulatory, or tax developments affect the investment techniques or opportunities available in connection with managing the portfolio and can also adversely affect the ability of the portfolio to achieve its investment objective (e.g., where aggregate and/or portfolio-level ownership thresholds or limitations must be observed, a portfolio is subject to investment limitations in certain companies arising from statutory, regulatory or self-regulatory organization requirements or company ownership restrictions).

Market Risk: Market risk is the risk that one or more markets in which the portfolio invests will go down in value, including the possibility that the markets will go down sharply and unpredictably. The value of a security or other asset may decline due to changes in general market conditions, economic trends or events that are not specifically related to the issuer of the security or other asset, or factors that affect a particular issuer or issuers, exchange, country, group of countries, region, market, industry, group of industries, sector or asset class. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on the portfolio and its investments. Selection risk is the risk that the securities selected will underperform the markets, the relevant indices or the securities selected by other investment managers for other portfolios with similar investment objectives and investment strategies. This means the portfolio may lose money.

Micro-Cap Companies Risk: Stock prices of microcap companies are significantly more volatile, and more vulnerable to adverse business and economic developments, than those of larger companies. Microcap stocks are also thinly traded, making it difficult for a portfolio to buy and sell them.

Municipal Securities Risk: Municipal securities can be significantly affected by political or economic changes, as well as uncertainties in the municipal market related to taxation, changes in interest rates, relative lack of information about certain issuers of municipal securities, legislative changes or the rights of municipal security holders. Municipal securities backed by current or anticipated revenues from a specific project or specific assets can be negatively affected by the inability to collect revenues for the project or from the assets.

New Issue Securities Risk – Investing in new issue securities involves risks that are in addition to those associated with investments which have been trading for an extended period of time because information

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

typically used to evaluate investments often is not available for new issue securities. Subsequent to the purchase of a new issue security by an Adviser, information about the security or its issuer may become publicly available (e.g., the issuance of a credit rating by a Rating Agency) which could cause an Adviser to alter its view on the appropriateness of the investment for a portfolio.

Non-Diversification Risk: Non-diversification of investments means a portfolio invests a large percentage of its assets in securities issued by or representing a small number of issuers or exposure types. As a result, a portfolio's performance depends on the performance of a small number of issuers or exposures.

Non-U.S. Securities Risk: Investments in the securities of non-U.S. issuers are subject to the risks associated with non-U.S. markets in which those non-U.S. issuers are organized and operate, including but not limited to, risks related to foreign currency, limited liquidity, less government regulation, privatization, and the possibility of substantial volatility due to adverse political, economic, geographic events, or other developments, differences in accounting, auditing and financial reporting standards, the possibility of repatriation, expropriation or confiscatory taxation, adverse changes in investment or exchange controls or other regulations and potential restrictions on the flow of international capital. These risks are often heightened for investments in smaller capital markets, emerging markets, developing markets or frontier markets. Due to differences in settlement timing, trading in foreign ordinary securities may lead to overdraft fees charged to a client by the client's custodian.

Offshore Investor Risk: A portfolio seeking to trade in foreign currencies can have limited access to certain currency markets due to a variety of factors including government regulations, adverse tax treatment, exchange controls, and currency convertibility issues. These limitations and restrictions impact the availability, liquidity and pricing of the financial instruments that are necessary for the portfolio to gain exposure to the currency markets, impairing the portfolio's ability to achieve its investment objective.

Operational Risk: Inadequate or failed internal processes, people and systems, or external events can pose a direct or indirect risk when investing. This includes any errors, omissions, systems breakdown, natural disasters, and fraudulent activity, which could cause impact in terms of unavailability of services and potentially resulting in financial losses.

Private Investment Risk: Investments in private investments, including debt or equity investments in operating and holding companies, investment funds, joint ventures, royalty streams, commodities, physical assets, and other similar types of investments can be highly illiquid and long-term. A portfolio's ability to transfer and/or dispose of private investments is expected to be highly restricted. BlackRock may not be able to obtain material information about the private investment that other investors obtain. Private investments are not subject to the same reporting and disclosure requirements as public companies, which may increase valuation risk for those investments.

Portfolio Turnover Risk: Active and frequent trading of securities and financial instruments in a portfolio can result in increased transaction costs, including potentially substantial brokerage commissions, fees, and other transaction costs. In addition, frequent trading is likely to result in short-term capital gains tax treatment. As a result of portfolio turnover, the performance of a portfolio can be adversely affected.

Quantitative Model Risk: When executing an investment strategy using various proprietary quantitative or investment models, securities or other financial instruments selected can perform differently than expected, or from the market as a whole, as a result of a model's component factors, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction, implementation and maintenance of the models (e.g., data problems, software issues, etc.). There can be no assurance that a model will achieve its objective.

Real Assets Risk: Investments in real assets such as real estate, infrastructure and energy are subject to certain risks, including, but not limited to, the following:

- (i) construction risks, including labor disputes or work stoppages, shortages of material or interruptions to the availability of necessary equipment;

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

- (ii) accidents, adverse weather, force majeure or catastrophic events, such as explosions, fires or terrorist activity;
- (iii) personal injury or property damage;
- (iv) failures on the part of third-party managers or sub-contractors appointed in connection with investments or projects to adequately perform their contractual duties or operate in accordance with applicable laws;
- (v) exposure to stringent and complex foreign, federal, state and local laws, ordinances and regulations, including those related to financial crime, permits, government contracting, conservation, exploration and production, tenancy, occupational health and safety, foreign investment and environmental protection
- (vi) environmental hazards, such as natural gas leaks, product and waste spills, pipeline and tank ruptures, and unauthorized discharges of products, wastes and other pollutants;
- (vii) changes to the supply and demand for properties and/or tenancies or fluctuations in the price of commodities;
- (viii) the financial resources of tenants; and
- (ix) contingent liabilities on disposition of assets.

Real Estate and Repurchase Agreement Risk: Historically real estate has experienced significant fluctuations and cycles in value and local market conditions which result in reductions in real estate opportunities, value of real property interests and, possibly, the amount of income generated by real property. All real estate-related investments are subject to the risk attributable to, but not limited to:

- (i) inability to consummate investments on favorable terms;
- (ii) inability to complete renovation, expansion or development on advantageous terms;
- (iii) adverse government, environmental and tax regulations;
- (iv) leasing delays, tenant bankruptcies and low occupancy levels and lease rates; and
- (v) changes in the liquidity of real estate markets. Real estate investment strategies which employ leverage are subject to risks normally associated with debt financing, including the risk that:
 - (a) cash flow after debt service will be insufficient to accumulate sufficient cash for distributions;
 - (b) existing indebtedness (which is unlikely to be fully amortized at maturity) will not be able to be refinanced;
 - (c) terms of available refinancing will not be as favorable as the terms of existing indebtedness; or
 - (d) that the loan covenants will not be complied with. It is possible that property could be foreclosed upon or otherwise transferred to the mortgagee, with a consequent loss of income and asset value.

Securities Lending Risk: Securities lending involves the risk that the borrower may fail to return the securities in a timely manner or at all. As a result, a portfolio may lose money and there may be a delay in recovering the loaned securities. A portfolio could also lose money if it does not recover the securities and/or the value of the collateral falls, including the value of investments made with cash collateral. These events could trigger adverse tax consequences for the portfolio.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Short Selling Risk: Short sales in securities that it does not own exposes a portfolio to speculative exposure risks. If a portfolio makes short sales in securities that increase in value, the portfolio will lose value. Certain securities may not be available or eligible for short sales. Short selling involves the risks of: increased leverage, and its accompanying potential for losses; the potential inability to reacquire a security in a timely manner, or at an acceptable price; the possibility of the lender terminating the loan at any time, forcing the portfolio to close the transaction under unfavorable conditions; the additional costs that may be incurred; and the potential loss of investment flexibility caused by the obligation to provide collateral to the lender and set aside assets to cover the open position. There can be no assurance that a portfolio will be able to close out a short sale position at any particular time or at an acceptable price. Loss on short positions is subject to potential offset by investing short-sale proceeds in other investments.

Small-Cap & Mid-Cap Risk: Compared to large-capitalization companies, small-capitalization and mid-capitalization companies are less stable and more susceptible to adverse developments, and their securities can be more volatile and less liquid.

Tax-Managed Investing Risk: Investment strategies that seek to enhance after-tax performance may be impacted by various factors. Market conditions may limit the ability to generate tax losses. In addition, wash sale violations can potentially negate the benefits of active loss harvesting. Examples of instances in which wash sales can occur include: (1) a tax loss realized by a U.S. investor after selling a security would be negated if the investor purchases the security within thirty days or (2) a U.S. investor purchasing a security cannot realize a loss on that position if sold within thirty days. Although BlackRock attempts to avoid wash sales whenever possible, a wash sale may be triggered by BlackRock under a number of conditions including, but not limited to, managing tracking error and client requests such as deposits or withdrawals. Future tax legislation, Treasury Regulations and/or changes in guidance issued by the Internal Revenue Service can negatively impact the tax treatment of assets in a client portfolio.

U.S. Economic Risk: The U.S. is a significant trading partner with other countries. Certain changes in the U.S. economy can have an adverse effect on the economy and markets of other countries.

Underlying Fund Risk: The risks for a portfolio operating under a fund of funds structure include, but are not limited to, the following:

- (i) the performance of the portfolio will depend on the performance of the underlying funds' investments;
- (ii) there can be no assurance that a multi-manager approach will be successful or diversified, or that the collective performance of underlying fund investments will be profitable;
- (iii) there could be limited information about or influence regarding the activities of the underlying fund's investment advisers and underlying funds, like any other asset, may be subject to trading restrictions or liquidity risk;
- (iv) an acquiring portfolio will be subject to the investment risks of its underlying funds, which could involve highly speculative investment techniques, including, for example, extremely high leverage, highly concentrated portfolios, workouts and startups, control positions and illiquid investments; and
- (v) portfolio investments in underlying funds will generally be charged the proportionate share of the expenses of investing in the underlying fund(s), however, expense waivers may be put in place under certain circumstances.

Valuation Risk: The net asset value of a portfolio as of a particular date may be materially greater than or less than its net asset value that would be determined if a portfolio's investments were to be liquidated as of such date. For example, if a portfolio was required to sell a certain asset or all or a substantial portion of its assets on a particular date, the actual price that a portfolio would realize upon the disposition of such asset or assets could be materially less than the value of such asset or assets as reflected in the net asset value of a portfolio. Volatile market conditions could also cause reduced liquidity in the market for certain assets, which could result in liquidation values that are materially less than the values of such assets as reflected in the net asset value of a portfolio.

Volatility Risk: The prices of a portfolio's investments can be highly volatile. Price movements of assets are influenced by, among other things, interest rates, general economic conditions, the condition of the financial markets, developments or trends in any particular industry, the financial condition of the issuers of such assets, changing supply and demand relationships, programs and policies of governments, and national and international political and economic events and policies.

Technology and Cybersecurity Risk

Generally

BlackRock is dependent on the effectiveness of the information and cybersecurity policies, procedures and capabilities it maintains to protect the confidentiality, integrity, and availability of its computer and telecommunications systems and the data that resides on or is transmitted through them. An externally caused information security incident, such as a cyber-attack including a phishing scam, malware, or denial-of-service attack, or an internally caused incident, such as failure to control access to sensitive systems, could materially interrupt business operations or cause disclosure or modification of sensitive or confidential client or competitive information. Moreover, BlackRock's increased use of mobile and cloud technologies could heighten these and other operational risks, as certain aspects of the security of such technologies may be complex, unpredictable or beyond BlackRock's control. BlackRock's growing exposure to the public Internet, as well as any reliance on mobile or cloud technology or any failure by third-party service providers to adequately safeguard their systems and prevent cyber-attacks, could disrupt BlackRock's operations and result in misappropriation, corruption or loss of personal, confidential or proprietary information. In addition, there is a risk that encryption and other protective measures may be circumvented, particularly to the extent that new computing technologies increase the speed and computing power available. Moreover, due to the complexity and interconnectedness of BlackRock's systems, the process of upgrading existing capabilities, developing new functionalities and expanding coverage into new markets and geographies, including to address client or regulatory requirements, may expose BlackRock to additional cyber- and information-security risks or system disruptions, for BlackRock, as well as for clients who rely upon, or have exposure to, BlackRock's systems. Although BlackRock has implemented policies and controls, and takes protective measures, to strengthen its computer systems, processes, software, technology assets and networks to prevent and address potential data breaches, inadvertent disclosures, cyber-attacks and cyber-related fraud, there can be no assurance that any of these measures prove effective.

Third Party Cybersecurity Risk

Due to BlackRock's interconnectivity with third-party vendors, advisers, central agents, exchanges, clearing houses and other financial institutions, BlackRock may be adversely affected if any of them are subject to a successful cyber-attack or other information security event, including those arising due to the use of mobile technology or a third-party cloud environment. BlackRock also routinely transmits and receives personal, confidential or proprietary information by email and other electronic means. BlackRock collaborates with clients, vendors and other third parties to develop secure transmission capabilities and protect against cyber-attacks. However, BlackRock cannot ensure that it or such third parties have all appropriate controls in place to protect the confidentiality of such information.

Artificial Intelligence and Machine Learning

BlackRock utilizes Artificial Intelligence (“AI”) and Machine Learning for various purposes, such as forecasting, insights, risk management, and client experience. The firm has utilized AI in interfaces for clients’ experience, in the investment cycle for forecasting and insights and for internal operational use cases for many years. Owing to the recent emergence of credible Generative AI (“GenAI”) tools, BlackRock launched at the end of 2023 its GenAI strategy to further drive innovation and efficiency.

AI is the broader term for the field of artificial intelligence, while Machine Learning is a subset of AI that involves learning from data. Machine Learning models differ from traditional models in their ability to incorporate feedback, find patterns, evaluate unstructured data, and make predictions. Some of the techniques used by BlackRock include natural language processing, optimization, and, more recently, GenAI.

BlackRock has implemented a governance and control framework that addresses risk considerations, including pertaining to information security, cybersecurity, regulatory compliance, model risk management, and intellectual property. BlackRock is evolving its governance and control framework to incorporate the assessment and management of the risks posed by the development and deployment of AI and Machine Learning, including GenAI, applications.

AI and Machine Learning have the potential to boost productivity, enhance decision-making, and create better outcomes for investors. These technologies are evolving rapidly, and their use cases are increasingly sophisticated and complex. The risks posed by these technologies include, but are not limited to:

- (i) **Model Risk.** AI tools may incorporate bias or inaccuracy in their outputs. This could stem from the existence of biases present in the data being interpreted or used to train algorithms. Improper management of this risk could result in the creation of erroneous, distorted, or misleading outputs.
- (ii) **Data Risk.** Model fidelity is dependent on the integrity of the data consumed, and low integrity data will increase other risks. In addition, there is a potential for information leakage in poorly controlled environments. This puts at risk proprietary data being evaluated or generated by AI tools. In some cases, data at risk of leakage includes personal data.
- (iii) **Transparency Risk.** Firms deploying AI systems may fail to sufficiently understand the model input data or how tools make decisions. This risk is amplified in deep learning models that can be complex and difficult to interpret.
- (iv) **Operational Risk.** Existing operational risks may be magnified by AI tools. For example, cybersecurity risk may be higher because AI systems may allow the unintended introduction of vulnerabilities into infrastructures and applications through generated code or configurations.
- (v) **Hallucination Risk.** The perception of patterns or objects by large language models used by GenAI applications that are nonexistent may result in outputs that are defective, incorrect and/or nonsensical.

BlackRock’s risk management framework incorporates a number of approaches to help mitigate these risks. These include model governance strategies including tools to help evaluate the manner in which models operate and assess their outputs, implementing a “walled garden” designed to prevent data from leaving the firm, and incorporating human oversight of AI processes to reduce the risk of acting on bad outputs. Nonetheless, the novelty of many AI tools (particularly GenAI) and the speed at which this field is evolving increase the chances that the risks associated with their deployment will materialize.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Any information security incident or cyber-attack against BlackRock or third parties with whom it is connected, or issuers of securities or instruments in which the client portfolios invests, including any interception, mishandling or misuse of personal, confidential or proprietary information, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, the inability to transact business, violations of applicable privacy and other laws, loss of competitive position, regulatory fines and/or sanctions, breach of client contracts, reputational harm or legal liability. Furthermore, many jurisdictions in which BlackRock operates have laws and regulations relating to data privacy, cybersecurity and protection of personal information, including the General Data Protection Regulation, which expands data protection rules for individuals within the European Union and for personal data exported outside the European Union. Any determination of a failure to comply with any such laws or regulations could result in fines and/or sanctions against the BlackRock.

Operating Events

Trade errors and other operational issues (“Operating Events”) occasionally occur in connection with an Adviser’s management of funds and client accounts (“Portfolios”). The Advisers have policies and procedures that address identification and correction of Operating Events, consistent with applicable standards of care and client documentation. An Operating Event generally is compensable by an Adviser to a client or fund when it is a mistake (whether an action or inaction) in which the Adviser has, in the Adviser’s reasonable view, deviated from the applicable investment guidelines or the applicable standard of care in managing a Portfolio, subject to the considerations set forth below.

Operating Events may include, but are not limited to:

- (i) the placement of orders (either purchases or sales) in excess of the amount of securities intended to trade for a Portfolio;
- (ii) the purchase (or sale) of a security when it should have been sold (or purchased);
- (iii) the purchase or sale of a security not intended for the Portfolio;
- (iv) the purchase or sale of a security contrary to applicable investment guidelines or restrictions;
- (v) incorrect allocations of trades;
- (vi) failure to properly file for and/or pay taxes; and
- (vii) transactions with a non-authorized counterparty.

Operating Events can also occur in connection with other activities that are undertaken by an Adviser and its affiliates, such as net asset value calculation, management fee calculations, calculations of carried interest or incentive fees, trade recording and settlement and other matters that are non-advisory in nature.

An Adviser makes its determinations regarding Operating Events pursuant to its policies on a case-by-case basis, in its discretion, based on factors it considers reasonable, including regulatory requirements, contractual obligations, and business practices. Not all Operating Events will be considered compensable mistakes. Relevant factors an Adviser considers when evaluating whether an Operating Event is compensable include, among others, the nature of the service being provided at the time of the event, specific applicable contractual and legal requirements and standards of care, whether an applicable investment objective or guideline was contravened, the nature of the client’s investment program, and the nature of the relevant circumstances.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Operating Events may result in gains or losses or could have no financial impact. With respect to Portfolios other than Private Investors and other SMA Program accounts, clients or funds generally are entitled to retain any gain resulting from an Operating Event. Operating Events involving erroneous transactions in Private Investors accounts generally are corrected by moving the transaction out of the Private Investors client's account and into a Private Investors omnibus error account maintained by MLPF&S (the "Omnibus Account") and restoring the Private Investors client's account to the position it would have been in had the event not occurred. Material gains in the Omnibus Account resulting from correction transactions promptly are donated to charity; non-material gains generally are netted with losses, and any resulting net gains periodically are donated to charity (*i.e.*, BIM does not retain net gains in the Omnibus Account). Operating Events involving erroneous transactions in other SMA Program accounts (*i.e.*, non-Private Investors accounts managed by an Adviser in SMA Programs sponsored by other firms) generally are corrected in accordance with the procedures established by the particular sponsor/custodian, which utilizes an omnibus account process similar to that used by BIM and MLPF&S for Private Investors accounts. Clients in such SMA Programs should contact their program sponsors for information on how Operating Events are corrected in such programs.

When BlackRock determines that reimbursement by BlackRock is appropriate, the client or fund will be compensated as determined in good faith by BlackRock. BlackRock will determine the amount to be reimbursed, if any, based on what it considers reasonable guidelines regarding these matters in light of all of the facts and circumstances related to the Operating Event. In general, compensation is expected to be limited to direct and actual losses, which may be calculated relative to comparable conforming investments, market factors and benchmarks and with reference to related transactions and/or other factors BlackRock considers relevant. Compensation generally will not include any amounts or measures that BlackRock determines are indirect, consequently, speculative or uncertain.

Item 9. Disciplinary Information

There have not been any legal or disciplinary events that are material to BlackRock's advisory business or the integrity of BlackRock's management.

Item 10. Other Financial Industry Activities and Affiliations

BlackRock is a broad financial services organization. In some cases, the Advisers have business arrangements with related persons/companies that are material to the Advisers' advisory business or to their clients. In some cases, these business arrangements create a potential conflict of interest, or the appearance of a conflict of interest between the Adviser and a client. The services that BlackRock provides its clients through its Advisers or through investments in a BlackRock investment product, as well as related conflicts of interest, are discussed in Item 11 ("Code of Ethics, Participation or Interest in Client Transactions and Personal Trading") of this Brochure. Potential conflicts of interest are also discussed in other governing documents, including but not limited to in an OM and/or IMA.

Affiliated Broker-Dealers

BlackRock Investments, LLC ("BRIL") and BlackRock Execution Services ("BES") are indirect wholly-owned subsidiaries of BlackRock, Inc. registered under the Exchange Act.

- BRIL is primarily engaged in the distribution of BlackRock proprietary and third-party registered investment companies, including through wholesale marketing, to other registered broker-dealers, investment advisers, banks and other entities as well as through self-directed online cash management platforms, marketing 529 municipal securities and the sale of certain other investment products to institutional investors. BRIL also acts as placement agent for certain Private Funds advised by the Advisers and BTC, and acts as the distributor for US iShares ETFs and US BlackRock ETFs. In addition, the US iShares ETFs and US BlackRock ETFs have retained BRIL to perform certain order processing, Authorized Participant communications, and related services in connection with the issuance and redemption of creation units of each ETF ("ETF Services"). BRIL will retain a portion of the standard transaction fee received from Authorized Participants on each creation or redemption order from the Authorized Participant for the ETF Services provided.
- BES provides account introduction and execution services to certain transition accounts of the Advisers and affiliates that have been authorized or directed by the transition clients to use BES to the extent consistent with applicable laws.

Affiliated Registered Investment Advisers

The Advisers have affiliates that are direct or indirect wholly-owned subsidiaries of BlackRock, Inc., registered as investment advisers with the SEC under the Advisers Act. Additional information about the Advisers and affiliated registered investment advisers is available on the SEC's website at www.adviserinfo.sec.gov.

- BlackRock Alternatives Management, LLC
- Global Energy & Power Infrastructure Advisors, L.L.C.¹²
- Global Energy & Power Infrastructure II Advisors, L.L.C.¹³
- BlackRock Realty Advisors, Inc.
- Aperio Group, LLC

¹² Global Energy & Power Infrastructure Advisors, L.L.C. is a relying adviser to BAM.

¹³ Global Energy & Power Infrastructure II Advisors, L.L.C. is a relying adviser to BAM.

Affiliated Commodity Pool Operator/Commodity Trading Advisor

Certain Advisers serve as commodity pool operators and commodity trading advisors to accounts of clients.

- BFM, BIM, BFA and BAL are registered as commodity pool operators and commodity trading advisors.
- BCM, BSL and BAMNAL are exempt commodity pool operators and exempt commodity trading advisors.
- BIL is a registered commodity trading advisor.

Affiliates of the Advisers are registered or exempt from registration as commodity trading advisors or commodity pool operators:

- BTC is registered as a commodity trading advisor and a commodity pool operator.
- iShares Delaware Trust Sponsor LLC is a registered commodity pool operator.
- BlackRock Investment Management (UK) Limited (“BIMUK”), BAM, Global Energy & Power Infrastructure Advisors, L.L.C., Global Energy & Power Infrastructure II Advisors, L.L.C., BCIA, SVOF/MM, and TCP are exempt commodity pool operators and commodity trading advisors.
- BRA, Inc. is an exempt commodity trading advisor.

All of the non-exempt entities listed above are members of the National Futures Association (the “NFA”). The NFA and CFTC each administer a comparable regulatory system covering futures contracts, swaps and various other financial and derivative instruments in which certain Clients invest.

Relationships or Arrangements with Affiliates and/or Related Persons

BTC, an indirect subsidiary of BlackRock, Inc., is a national banking association organized under the laws of the U.S. and operates as a limited purpose trust company. BTC provides investment management and other fiduciary services for client accounts, including trust accounts, common trust funds and group trusts maintained by BTC and other unregistered investment vehicles. BTC also provides securities lending services to certain registered and unregistered investment funds managed by BlackRock. BTC is registered as a Municipal Advisor with both the SEC and the Municipal Securities Rulemaking Board.

A subsidiary of BlackRock, Inc. and Chubb Limited (“Chubb”) partially funded the creation of a reinsurance company, ABR Reinsurance Capital Holdings Ltd. (together with its wholly owned subsidiary ABR Reinsurance Ltd., “ABR Re”), pursuant to which BlackRock has a non-controlling ownership interest (“ABR Re Transaction”). Chubb is a publicly traded company whose securities are held in Client accounts. The subsidiary of BlackRock, Inc. and Chubb have representation on the board of directors of ABR Re. Certain employees and executives of BlackRock have a less than ½ of 1% ownership interest in ABR Re. BFM manages the investment portfolio of ABR Re. ABR Re participates as a reinsurer with respect to a portfolio of reinsurance contracts written by subsidiaries of Chubb.

BlackRock, Inc. owns indirectly through BFM a non-controlling interest in a joint venture, Luminex Trading & Analytics LLC (“Luminex”). Luminex is an independent equity trading venue owned and operated by a consortium of leading investment management firms. It provides a platform for investment managers to trade large blocks of stock with other investment managers at a lower cost and uses transparent trading rules and protocols.

Item 10. Other Financial Industry Activities and Affiliations

Through a holding company subsidiary, BlackRock, Inc. owns a non-controlling interest in iCapital Networks (“iCapital”). iCapital is a financial technology platform that provides access to private market investments for high-net-worth investors and their financial advisers. iCapital’s platform provides combination of due diligence capabilities, technology and relationships with private market asset managers to facilitate investments in hedge funds and private equity funds, including BlackRock. Certain employees of BlackRock serve on iCapital’s Board of Directors. iCapital may serve as the managing member or general partner of, and/or other service provider to, certain investment funds managed by BlackRock.

BlackRock owns a 24.9% interest in SpiderRock Advisors, an option overlay SMA manager focused on risk management and yield enhancement for diversified portfolios as well as concentrated stock positions (Chicago). As part of this ownership interest, BlackRock serves as a solicitor for SpiderRock.

BlackRock owns a majority interest in an asset management company in China, BlackRock CCB Wealth Management Company Ltd (“BlackRock WMC”). BlackRock WMC is a management joint venture company with CCB Wealth Management Co., Ltd. and Fullerton Management Pte Ltd. in China. is regulated by the China Banking and Insurance Regulatory Commission (“CBIRC”). BlackRock WMC operates as a bank wealth management company under the CBIRC’s Bank Wealth Management Supervision and Management Measures and Management Measures of Bank Wealth Management Subsidiaries.

BlackRock has a 50% interest in Decarbonization Partners LLC, which is a partnership that will launch a series of late stage venture capital and early growth private equity investment funds that will focus on advancing decarbonization solutions designed to advance global efforts to achieve a net zero economy by 2050. Decarbonization Partners LLC is a joint venture with Temasek, a Singaporean investment company specializing in sustainable solutions. BlackRock and Temasek intend to commit initial capital to invest in multiple funds launched by the partnership.

BlackRock, Inc. indirectly owns a non-controlling interest in Acorns Grow Incorporated (“Acorns”). Acorns is a personal investment application that allows Acorn clients to automatically invest spare change in ETFs, including ETFs advised by an Adviser. BlackRock has an observer on Acorns’ Board of Directors.

BlackRock, Inc. indirectly owns a 10% interest in EquiLend LLC (“EquiLend”) a significant technology provider in the securities-lending industry through its NGT trading platform, which automates and streamlines the execution and settlement of securities lending transactions for a significant portion of the securities lending transactions between borrowers and lenders. BlackRock also has a seat on Equilend’s Board of Directors.

Through a holding company subsidiary, BlackRock, Inc. owns a non-controlling interest in Envestnet Inc. (“Envestnet”). Envestnet provides unified wealth management technology and products to financial advisers and other institutions. Their flagship product is an advisory platform that integrates the services and software used by financial advisers in wealth management. Certain funds recommended by Envestnet may be advised by an Adviser. BIM has entered into a model portfolio licensing agreement to provide an Envestnet subsidiary with non-discretionary investment recommendations in the form of model portfolios, some of which are comprised of Affiliated Funds.

BlackRock, Inc. indirectly owns a non-controlling interest in Gallatin Point Capital LLC (“Gallatin”). A BlackRock subsidiary provides certain analytics and related services to Gallatin. Gallatin is an private market investment firm.

Through a holding company subsidiary, BlackRock, Inc. owns a market position in Scalable Capital GmbH (“Scalable”). Scalable is a European robo-advisor that recommends or invests client assets in ETFs, including ETFs advised by an Adviser. BlackRock has a board member and an observer on Scalable’s Board of Directors.

Through a holding company subsidiary, BlackRock, Inc. owns a non-controlling interest in Managed Account Partners (Holdings) Limited, a company that provides managed account services through its wholly-owned subsidiary, Managed Account Partners Limited.

Item 10. Other Financial Industry Activities and Affiliations

Cachematrix Holdings, LLC is an indirect, wholly-owned subsidiary of BlackRock, Inc., that together with its subsidiaries, provides technology to banks and other clients, including BlackRock, where the purpose of such technology is to facilitate online trading in cash management vehicles (managed by BlackRock, as well as third-party asset managers) and other products.

BlackRock Mexico Operadora, S.A. de C.V., Sociedad Operadora de Fondos de Inversion (“BlackRock Mexico Operadora”), based in Mexico, is an indirect, wholly-owned subsidiary of BlackRock, Inc. BlackRock Mexico Operadora, among other services, manages Mexican mutual funds and offers investment management services in Mexico.

Within the guidance set forth under applicable law, the relevant no-action letter(s) and related SEC staff guidance, registered investment advisers are permitted to access the services of unregistered affiliates under prescribed conditions (“participating affiliates”). BlackRock Japan Co., Ltd. (“BlackRock Japan”) is a participating affiliate of BFM, BIM and BIL. BlackRock Australia is a participating affiliate of BAL, BIM and BFM. The prescribed conditions include, but are not limited to, the participating affiliate providing the SEC access to trading and other records, observing specific recordkeeping rules, submitting to jurisdiction of U.S. courts and cooperating with the SEC as it relates to accounts advised by BFA, BFM, BIL, BIM and BAL, for which BlackRock Japan or BlackRock Australia respectively, may provide services pursuant to the relevant participation agreement.

BIL is an Adviser that is authorized and regulated by the Financial Conduct Authority, the independent financial services industry regulator in the United Kingdom, and has permission from the Financial Supervisory Service in South Korea to perform (a) Investment Advisory Services and (b) Discretionary Investment Services.

BAMNAL is an Adviser that is located in Hong Kong and is licensed by the Securities and Futures Commission in Hong Kong. The China Securities Regulatory Commission has granted BAMNAL licenses as a Qualified Foreign Institutional Investor and Renminbi Qualified Foreign Institutional Investor.

BSL is an Adviser that is located in Singapore and licensed by the Monetary Authority of Singapore. BSL is licensed with the China Securities Regulatory Commission as a Renminbi Qualified Foreign Institutional Investor. BSL is also registered with the Korea Financial Services Commission as a cross-border investment advisory company and a cross-border discretionary investment management company.

BAMS is an Adviser that is located in Switzerland and is licensed as a fund management company with the Swiss Financial Market Supervisory Authority.

BFA, BSL and BAMNAL are Advisers that are licensed with the Securities and Exchange Board of India as a Foreign Portfolio Investor.

BlackRock uses BES to provide account introduction and execution services on behalf of BlackRock’s Clients in accordance with policies and procedures that are designed to provide for compliance with the requirements of (and BlackRock’s duties under) the Advisers Act, Investment Company Act, ERISA, other laws and regulations and related relief, as applicable to the transaction. These policies and procedures, and the related laws and regulations, address the potential for conflicts of interest arising in connection with using an affiliate to provide trade execution services on behalf of such Clients.

BIS Indices can be utilized by funds, accounts and other investment products and tools. When permitted, BIS Indices may include certain US Registered Funds advised by an Adviser as an index constituent. Certain of these indices are Underlying Indices of investment vehicles, including certain US Registered Funds advised by an Adviser. Please refer to Item 8 (“Methods of Analysis, Investment Strategies and Risk of Loss”) and Item 11 (“Code of Ethics, Participation or Interest in Client Transactions and Personal Trading”) of this Brochure and the sections of disclosure respectively headed “Index Mandates” and “Management of Index Funds & BlackRock Index Services” for more information.

Securities Lending

BlackRock, Inc. has three subsidiaries, BIM, BTC and BALUK that act as securities lending agents (collectively, “Lending Agents”) to certain portfolios and client accounts. Pursuant to SEC exemptive relief, each of BTC and BIM acts as securities lending agent to, and receive a share of securities lending revenues from, US Registered Funds. BALUK acts as lending agent solely to non-U.S. entities.

BlackRock uses a predetermined systematic process in order to approximate pro rata allocation over time. In doing so, BlackRock seeks to provide equal lending opportunities for all portfolios, independent of whether BlackRock indemnifies the portfolio. Equal opportunities for lending portfolios does not guarantee equal outcomes. Specifically, short and long-term outcomes for individual clients may vary due to asset mix, asset/liability spreads on different securities, and the overall limits imposed by the firm.

Please refer to Item 11 (“Code of Ethics, Participation or Interest in Client Transactions and Personal Trading”) of this Brochure and the section of disclosure headed “Potential Conflicts Relating to Securities Lending Services” for a discussion of conflicts associated with securities lending.

Transition Management

Certain Advisers offer transition management (“TRIM”) services to institutional clients seeking to transition their portfolio holdings from one investment manager to another and/or from one investment strategy to another. Such investment manager can include the Advisers or an affiliate. Relevant Advisers give advice to TRIM clients regarding trading strategies, including recommending trading baskets of securities rather than individual securities when deemed to be in the best interest of the TRIM clients and to the extent consistent with applicable laws. For TRIM services, fees typically are earned through trading commissions paid to an affiliated broker-dealer, BES, but in some cases are invoiced directly, or are expressed as a percentage of net assets under management, a flat-fee agreed upon with a TRIM client, or as a combination of such fees.

BlackRock Solutions®

BRS, a business unit within BlackRock, provides a broad range of risk management, investment accounting and trade processing tools to a variety of clients, including insurance companies, asset managers, pension funds, investment consultants, real estate investment trusts, commercial and mortgage banks, savings institutions, government agencies, and central banks. Using proprietary technology, analytics, and product knowledge, BRS is able to assist these clients in measuring financial risks in their portfolios and across their lines of business on both the asset and liability sides of their balance sheets. BRS makes available its proprietary enterprise trading system and risk reporting tools to other firms or companies. eFront, a provider of investment management systems for private market assets, is part of BRS and enables BRS to provide technology solutions across public and private assets.

Financial Markets Advisory

BlackRock’s Financial Markets Advisory Group (“FMA”) works with financial institutions, official institutions and market intermediaries and utilities globally, and provides advice on balance sheet and capital markets exposures, as well as a wide range of other strategic, regulatory and operational challenges. FMA also delivers capital markets, risk management, and investment management capabilities to advise holders or prospective holders of complex, difficult to value or special-situation portfolios, including advice relating to the management, retention, restructuring, disposition and valuation of such assets.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

As a global provider of investment management, risk management and advisory services to institutional and retail clients, BlackRock engages in a broad spectrum of activities, including sponsoring and managing a variety of public and private investment funds, Funds of Funds and separate accounts across fixed income, cash management, equity, multi-asset, private market investment and real estate strategies, providing discretionary and non-discretionary financial advisory services, providing enterprise trading systems, risk analytics, investment accounting and trading support services under the BRS business and engaging in certain broker-dealer activities, transition management services, mortgage servicing and other activities. BlackRock acts as, among other things, an investment manager, investment adviser, broker-dealer and, under certain circumstances, an index provider.

BlackRock has direct and indirect interests in the global fixed income, currency, commodity, equity, and other markets in which Clients invest. As a result, BlackRock and its directors, managers, members, officers, and employees (collectively, the “BlackRock Group”), including those involved in the management, sales, investment activities, business operations, or distribution of BlackRock’s services and products, are engaged in businesses and have interests other than that of managing the assets of Clients. These activities and interests include potential multiple advisory, transactional, financial, and other interests in securities, instruments, and companies that are directly or indirectly purchased or sold by or on behalf of Clients by BlackRock and other persons.

As a result of the various activities and interests of the BlackRock Group, Clients could have multiple business relationships with members of the BlackRock Group and the Advisers will, on behalf of Clients, invest in, engage in transactions with, make voting decisions with respect to, or obtain services from entities for which the BlackRock Group performs, or seeks to perform, risk management, investment system outsourcing, financing, investment banking, lending, loan servicing, or other services.

Although the relationships and activities of the BlackRock Group tend to offer attractive opportunities and services to Clients, such relationships and activities may under certain circumstances give rise to potential conflicts of interest between or among the BlackRock Group and Clients or have other potentially negative effects on Clients. Additionally, the complexity and changing nature of the BlackRock Group’s business activity, affiliations and opportunities, as well as legislative and regulatory developments, may create other or different potential conflicts that arise in the future or that are not covered in this Brochure.

Potential conflicts are discussed generally herein and should be considered in conjunction with any other discussion of potential conflicts which may also be included in any applicable IMA or other contractual arrangement or in an offering document and/or governing document of an Affiliated Fund.

As a fiduciary to the Clients, BlackRock is committed to putting the interests of Clients ahead of its own in the provision of investment management and advisory services. The Advisers are also required to manage the assets of Clients in accordance with the investment mandate applicable to each Client and applicable law, and will seek to give advice to, and make investment decisions for, such Client that the Adviser believes to be in the best interests of such Client.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

BlackRock maintains a well-developed compliance program for identifying, escalating, avoiding and/or monitoring conflicts of interest. The program is carried out through adherence to relevant policies and procedures, a governance and oversight structure and employee training. Among the various policies and procedures that address conflicts of interest is BlackRock's Global Conflicts of Interest Policy. The Global Conflicts of Interest Policy is designed to ensure the appropriate management of the risks to Clients from conflicts of interest. The Global Conflicts of Interest Policy governs the responsibility of BlackRock and its employees to place the interests of Clients first and to identify and manage any conflicts of interest that may arise in the course of our business. BlackRock has also issued a Conduct Code which requires every BlackRock employee and director, whatever their position, to be responsible for upholding high ethical and professional standards. Any violation of the Global Conflicts of Interest Policy or the Conduct Code may result in potential remedial action to the extent permitted by applicable law.

Potential Conflicts Relating To BlackRock Personnel

BlackRock personnel may be engaged in activities and have interests other than that of managing the assets of Clients which may give rise to potential conflicts of interest, some of which are discussed below. All BlackRock personnel are required to comply with applicable federal securities laws, fiduciary principles applicable to BlackRock's businesses and the requirements of the BlackRock Global Conflicts of Interest Policy and the Conduct Code, including that employees must avoid placing their own personal interests ahead of Clients' interests.

Personal Trading

BlackRock's and the Advisers' directors, officers, and employees buy, sell, and hold for their own and their family members' accounts public securities, private securities, and other investments in which such BlackRock personnel have a pecuniary interest. Such investments may also be bought, sold, or held for Clients or through accounts (or investments in funds) managed by the Advisers or otherwise. As a result of differing trading and investment strategies or constraints, positions taken by BlackRock directors, officers, and employees can be the same as or different from, or made contemporaneously or at different times than, positions taken for Clients.

As these situations involve potential conflicts of interest, BlackRock has adopted policies and procedures relating to personal securities transactions, insider trading and other ethical considerations, including the PT Policy in accordance with Rule 17j-1 under the Investment Company Act and Rule 204A-1 under the Advisers Act (the "Rules"). These policies and procedures are intended to identify and prevent actual conflicts of interest with clients and to resolve such conflicts appropriately if they do occur.

In conformity with the Rules, the PT Policy contains provisions regarding employee personal trading and, reporting requirements that are designed to address potential conflicts of interest that might interfere or appear to interfere with making decisions in the best interest of Clients.

Together with the Conduct Code, the PT Policy requires that employees at BlackRock, their spouses, domestic partners, financially dependent children, and any other person on behalf of whom they make investment decisions conduct all of their personal investment transactions in a manner that is consistent with applicable federal securities laws, the requirements of the BlackRock Global Insider Trading Policy and other policies of BlackRock. These requirements include that all personal trading activity complies with the fiduciary principles applicable to BlackRock's businesses, the reporting of personal investment accounts, pre-clearance of personal trading transactions, and the reporting investment transactions. The PT Policy also generally prohibits employees from acquiring securities in initial public offerings, and contains prohibitions against profiting from short-term trading, subject to very limited exceptions. The PT Policy also imposes "blackout" periods on certain employees, including portfolio management personnel, prohibiting transactions in certain securities during time periods surrounding transactions in the same securities by Client accounts. Moreover, the PT Policy and other BlackRock policies contain provisions that are designed to prevent the use of material nonpublic information.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Any member of the BlackRock Group covered by the policies who fails to observe their requirements or those contained in related BlackRock policies and procedures is subject to potential remedial action. BlackRock will determine on a case-by-case basis what remedial action should be taken in response to any violation, including potential voiding or reversal of a trade, the cost of which will be borne by the employee or owner of the account or limiting an employee's personal trading for some period of time.

Outside Activities

Members of the BlackRock Group have a duty to act solely in the interest of BlackRock's Clients; as such BlackRock's Global Outside Activity Policy requires that BlackRock employees obtain approval from their line manager and Legal & Compliance before engaging in any outside activities so that BlackRock has the opportunity to consider whether such activities create actual or potential conflicts of interest. The Global Outside Activity Policy is intended to identify activities that have the potential to conflict with an employee's role at BlackRock and/or BlackRock's activities.

Political Contributions

BlackRock's Global U.S. Political Contributions Policy establishes the requirements that apply when BlackRock and its employees make or solicit U.S. political contributions or engage in political activities in the U.S. The policy prohibits BlackRock and its employees from making or soliciting U.S. political contributions for the purpose of obtaining or retaining business. The policy requires employees to pre-clear U.S. political contributions before they, their spouse, domestic partner, or dependent children make any contributions to a political candidate, government official, political party, or political action committee ("PAC") in the U.S.

The BlackRock PAC, a non-partisan political action committee, is supported voluntarily by eligible U.S. employees to help elect U.S. federal candidates who the PAC's Board of Directors determine share BlackRock's values and goals. To avoid potential conflicts, the PAC does not make political contributions to state or local candidates or state or local officials running for federal office to avoid any potential conflicts with any applicable state laws concerning vendors and potential vendors.

Employee Personal Relationships

The personal relationships of BlackRock's directors, officers, and employees have the potential to create a number of conflicts of interest, including where any such individual has a personal relationship with another BlackRock director, officer, or employee or an external party, including but not limited to a service provider, vendor, Client (or prospective client) or a portfolio company (or prospective portfolio company). Such personal relationships can unduly influence the decision-making capabilities of the applicable BlackRock directors, officers, and employees to the possible detriment of a Client.

BlackRock has issued a policy designed to provide guidance to directors, officers, and employees regarding personal relationships in the workplace and has put appropriate processes and safeguards in place to avoid actual and potential conflicts of interest that can result from these relationships.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Potential Conflicts Relating To Advisory Activities

The BlackRock Group operates as a global investment adviser, providing advisory services to a wide range of clients, with the Advisers also managing or serving a wide range of investment funds and trading across the full spectrum of securities.

The Advisers will manage the assets of a Client in accordance with the investment mandate selected by such Client. However, members of the BlackRock Group (including the Advisers) may give advice and take action with respect to their own accounts or any other Client that competes or conflicts with the advice an Adviser may give to, or an investment action an Adviser may take on behalf of, a Client (or a group of Clients), or advice that may involve different timing than that of a Client.

The management of numerous accounts for Clients and other services provided by the Advisers creates a number of potential conflicts of interest, some of which as discussed below.

From time to time, investment allocation decisions are made which adversely affect the size or price of the assets purchased or sold for a Client. Additionally, the amount, timing, structuring, or terms of an investment for one Client will differ from, and performance can be lower than, investments and performance of other Clients (or future clients), including those which provide greater fees or other compensation (including performance-based fees) to the Advisers or are accounts in which members of the BlackRock Group have an interest.

Allocation of Investment Opportunities and Side-by-Side Management

In some circumstances, the Advisers seek to buy or sell the same securities contemporaneously for multiple Client accounts. Similarly, the Advisers manage or advise accounts of Clients that have investment objectives that are similar to those of other Clients and/or seek to make investments in securities or other instruments in which Clients invest. This will create potential conflicts and potential differences among different Clients, particularly where there is limited availability or limited liquidity for those investments.

Side-by-side management by the Advisers of US Registered Funds, separate accounts, institutional accounts, SMA Program accounts, Private Funds and collective trust funds also involves potential conflicts of interest, including those associated with any difference in fee structures, as well as other pecuniary and investment interests the BlackRock Group may have in an account managed by the firm. US Registered Funds and SMA Program accounts, for example, generally pay management fees based on a fixed percentage of assets under management, whereas institutional accounts and Private Funds often have more varied fee structures, including a combination of asset- and performance-based compensation.

The side-by-side management of these different funds and accounts creates potential incentives for the applicable Adviser to favor one account over another including in the allocation of investment opportunities or securities transactions where:

- (i) there is the prospect of achieving higher compensation from one Client or account than from another, resulting in the applicable Adviser favoring the higher paying Client or account (including accounts subject to performance or incentive fees or allocations) when, for example, placing securities transactions that the applicable Adviser believes could more likely result in favorable performance;
- (ii) the actions taken on behalf of one account potentially impact other similar or different accounts (e.g., because such accounts have the same or similar investment styles or otherwise compete for investment opportunities, have potentially conflicting investments or investment styles, or have differing abilities to engage in short sales and economically similar transactions); and
- (iii) the Adviser, its affiliates or their personnel have differential interests (including proprietary) in such accounts (i.e., expose the Adviser or its related persons to differing potential for gain or loss through differential ownership interests).

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

As a result of certain regulations governing the ability of accounts investing side-by-side, it is possible that different account types are not permitted to participate in an investment opportunity at the same time. For example, absent a regulatory exemption or guidance or relief from the SEC, US Registered Funds are generally prohibited from participating in transactions alongside affiliated funds, including affiliated Private Funds. Therefore, if both US Registered Funds and Private Funds are considering a particular investment, certain US Registered Funds or Private Funds could be prohibited from participating together in such investment due to regulatory restrictions on affiliated transactions. Certain US Registered Funds have received an exemptive order from the SEC that permits the Funds to co-invest in privately negotiated transactions alongside certain Private Funds, subject to compliance with the conditions in the order. The conditions in the order can have the effect of limiting certain US Registered Funds and/or Private Funds from participating in an investment in an issuer if investments will be made, or had previously been made, in reliance on the order.

The decision as to which accounts participate in an investment opportunity will take into account the suitability and the strategy of the applicable accounts. It is possible that an account is prevented from participating due to such investment opportunity being more appropriate within the primary strategy or secondary of another account.

BlackRock has developed policies and procedures that provide that it will seek to allocate investment opportunities and make purchase and sale decisions among all Clients in accordance with the fiduciary duties owed to each such account, in a manner that it deems fair and equitable over time and without consideration of BlackRock's or an Adviser's (or any of their personnel's) pecuniary investment, or other financial interests. Specifically, investment opportunities will not be allocated with consideration of the different fees or compensation BlackRock receives from certain Clients.

Notwithstanding the foregoing and considering BlackRock's policy to treat all eligible Clients fairly and equitably over time, any particular allocation decision among accounts can be more or less advantageous to any one Client or group of Clients and certain allocations, to the extent consistent with BlackRock's fiduciary obligations, may deviate from a pro rata basis among Clients in order to address legal, tax, regulatory, fiduciary, risk management, and other considerations. In any given circumstance, BlackRock will also consider Client guidelines, the source of the investment opportunity, the nature of the mandate, the timing of a given fund or account's closing, contractual obligations, the respective committed capital of the relevant Clients, legal or regulatory requirements, and other considerations, as applicable.

The Advisers allocate investment opportunities among Client accounts based upon, the nature of the investment opportunity and an assessment of the appropriateness of that opportunity for a Client's account, taking into consideration the various risk characteristics associated with the investment opportunity and the relative risk profiles of the Client account ("allocation metrics"). The risks considered in determining the allocation metrics for a group of accounts include, without limitation:

- (i) the type of security being considered;
- (ii) the security-, issuer- and/or industry-specific risks;
- (iii) the actual or expected liquidity of the security; and
- (iv) current and expected concentrations and exposures.

In certain cases, the Advisers will determine that an investment opportunity or particular purchases or sales are appropriate for one or more Clients or for the BlackRock Group, but not for other Clients, or are appropriate for, or available to, Clients but in different sizes, terms, or timing than is appropriate for other Clients, or determine not to allocate to or purchase or sell for certain Clients all investment transactions for which all Clients may be eligible.

Given all of the foregoing factors, the amount, timing, structuring, or terms of an investment for a Client will differ from, and performance can be lower than, investments and performance of other Clients,

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

including those which provide greater fees or other compensation (including performance-based fees) to the Advisers or are accounts in which members of the BlackRock Group have an interest.

Please also refer to the “Potential Conflicts Resulting from the Handling and Execution of Trades” section of this Item 11 for a discussion of conflicts associated with the trade execution of competing Client orders and the aggregation of trade.

Potential Restrictions on Investment Adviser Activity

Regulatory and legal restrictions (including those relating to the aggregation of positions among different funds and accounts) and BlackRock’s internal policies and procedures can restrict certain investment activities of the Advisers for Clients.

From time to time, BlackRock will be restricted from or limited in purchasing, selling or voting securities, derivative instruments or other assets on behalf of Clients because of corporate or regulatory and legal requirements, as well as contractual restrictions, applicable to BlackRock or the securities held by BlackRock on behalf of its clients. BlackRock has developed internal policies, to the extent necessary, designed to comply with, limit the applicability of, or otherwise relate to such requirements, as well as address potential conflicts of interest. These restrictions can impact or limit BlackRock’s ability to purchase, vote or sell certain securities, derivative instruments or other assets on behalf of certain Clients at the same time as other Clients. A client not advised by BlackRock will not necessarily be subject to the same considerations.

In some cases, the Advisers do not initiate or recommend certain types of transactions, or will otherwise restrict or limit their advice with respect to securities or instruments issued by or related to companies for which BlackRock is performing advisory or other services, or companies in which BlackRock has an interest. Such limitations or restrictions can arise solely from actions taken or initiated by BlackRock and have a negative effect on Clients. For example, from time to time, when BlackRock is engaged to provide advisory or risk management services for a company, the Advisers will be prohibited from or limited in purchasing or selling securities of that company for Client accounts, particularly where such services result in BlackRock obtaining material nonpublic information about the company. Similar situations could arise if:

- (i) BlackRock personnel serve as directors or officers of companies the securities of which BlackRock wishes to purchase or sell;
- (ii) BlackRock has an ownership or other interest in a company;
- (iii) BlackRock is provided with material nonpublic information with respect to the issuer of securities;
- (iv) the Advisers on behalf of Clients or BlackRock, Inc. participate in a transaction (including a controlled acquisition of a U.S. public company) that results in the requirement to restrict all purchases and voting of equity securities of such target company; or
- (v) regulations, including portfolio affiliation rules under the Investment Company Act or stock exchange rules, prohibit investments in an issuer when BlackRock or Clients already have an interest in such issuer.

However, where permitted by applicable law, and where consistent with BlackRock’s policies and procedures (including the implementation of appropriate information barriers), BlackRock can purchase or sell securities or instruments that are issued by such companies or are the subject of an advisory or risk management assignment by BlackRock, or in cases in which BlackRock personnel serve as directors or officers of the issuer.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

In certain circumstances where BlackRock invests in securities issued by companies that operate in certain regulated industries or in certain emerging or international markets, or are subject to corporate or regulatory ownership restrictions, Clients can, in the absence of BlackRock being granted a license, waiver, regulatory relief or corporate consent, become subject to threshold limitations on aggregate and/or portfolio-level ownership interests in certain companies arising from statutory, regulatory or self-regulatory organization requirements, or company ownership restrictions (e.g., poison pills or other restrictions in organizational documents). In these circumstances, Clients will be competing for investment opportunities with other Clients. Similarly, some Clients will be limited or restricted in their ability to participate in certain initial public offerings pursuant to FINRA rules. This will result in Client accounts not being able to fully participate, or to participate at all, in such opportunities.

As a result, the Advisers on behalf of Clients may limit purchases, sell existing investments, or otherwise restrict, forgo, or limit the exercise of rights (including transferring, outsourcing or limiting voting rights or foregoing the right to receive dividends) when the Advisers, in their sole discretion, deem it appropriate in light of potential regulatory or corporate restrictions on ownership, voting rights, or other consequences resulting from reaching investment thresholds. Similar limitations apply to derivative instruments or other assets or instruments, including futures, options, or swaps.

In those circumstances where ownership thresholds or limitations must be observed, BlackRock seeks to equitably allocate limited investment opportunities among Clients, taking into consideration a security's benchmark weight and investment strategy. When BlackRock's ownership in certain securities nears an applicable threshold, BlackRock will limit purchases in such securities in index portfolios to the issuer's weighting in the applicable benchmark used by BlackRock to manage the Client account or fund and in actively managed portfolios to the issuer's weighting in the applicable risk benchmark, adjusted on the basis of scaling factors that recognize additional degrees of freedom of active mandates over index mandates. If Clients' holdings of an issuer exceed an applicable threshold and BlackRock is unable to obtain relief to enable the continued holding of such investments, it will be necessary to sell down these positions to meet the applicable limitations, possibly during deteriorating market conditions. In these cases, benchmark overweight positions will be sold prior to benchmark positions being reduced to meet applicable limitations.

In addition to the foregoing, other ownership or voting thresholds may trigger or require reporting, applications, licenses, or other special obligations to governmental and regulatory authorities, and such reports, applications, or licenses may entail the disclosure of the identity of the Client or BlackRock's intended strategy with respect to such securities, instruments, or assets. Where applicable, BlackRock can elect to forego or limit certain investments or opportunities, including limitations on voting or other investor rights, rather than incur the costs of an application, registration, or license.

Under certain circumstances, BlackRock will restrict a purchase or sale of a security, derivative instrument, or other asset on behalf of Clients in anticipation of a future conflict that may arise if such purchase or sale would be made. Any such determination will take into consideration the interests of the relevant Clients, the circumstances that would give rise to the future conflict and applicable laws. Such determination will be made on a case-by-case basis.

When evaluating non-index investments on behalf of its Clients, especially in the case of private and real assets, BlackRock may consider the reputational risks of such investments to itself or its Clients. As a result, BlackRock may, from time to time, forego making or disposing of non-index investments on behalf of its clients based on BlackRock's evaluation of these risks, even in circumstances where such investments are legally permissible and consistent with Client guidelines. With respect to index investing, however, BlackRock manages to each applicable index without regard to these risks.

An Adviser may also provide due diligence support to Clients on a non-discretionary basis for investment opportunities brought by such Client to the Adviser. Typically, the investments for which due diligence support is provided will not be available for allocation to other Clients.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Certain Private Funds and the Advisers may conform to regulations under the Bank Holding Company Act of 1956, as amended, resulting in limits or restrictions on investments in certain companies, and underlying funds. These potential restrictions are generally discussed in each applicable Private Fund's OM.

In July 2010, the Dodd-Frank was signed into law in the U.S. Dodd-Frank is expansive in scope and requires the adoption of extensive regulations and numerous regulatory decisions, many of which have been adopted. BlackRock has a conformance program to address certain regulations adopted under Dodd-Frank, as well as financial reforms that have been introduced as part of the SEC's investment company modernization initiatives.

In addition, the SEC, banking regulators, the Internal Revenue Service and the CFTC each continue to review practices and regulations relating to the use of futures, swaps and other derivatives. Such reviews could result in regulations that restrict or limit the use of such products by funds or accounts. If adopted, these limitations could require BlackRock to change certain business practices or implement new compliance processes, which could result in additional costs and/or restrictions.

Transacting in the same issuer and/or security

Members of the BlackRock Group and one or more Clients buying or selling positions while another Client is undertaking the same or a differing position, including a potential opposite, strategy create potential conflicts of interest. In addition, to the extent permitted by applicable law and contractual arrangements, Clients may engage in investment transactions which may result in other Clients being relieved of obligations or otherwise having to divest or cause Clients to have to divest certain investments.

Potential conflicts of interest may also arise where the purchase, holding, and sale, as well as voting of investments by Clients may enhance the profitability or increase or decrease the value of a BlackRock Group member's or other Clients' own investments in such companies

Under certain circumstances, if a Client (or a group of Clients) invests in an issuer in which one or more other Clients are expected to invest, or already have made or will seek to make, an investment, such Clients (or groups of Clients) may have conflicting interests and objectives in connection with such investments, including with respect to views on the operations or activities of the portfolio company involved, the targeted returns from the investment and the timeframe for, and method of, exiting the investment. For example, in certain instances, the Advisers' decision on behalf of other Client accounts to sell, redeem from, or otherwise liquidate an investment in which another Client account is invested will adversely affect such Client account, including by causing such investment to be less liquid or more concentrated, or by causing such Client account to lose the benefit of certain negotiated terms.

In other cases, fundamental analyses, research and proprietary models developed internally are used by various Advisers and personnel on behalf of different Clients, which could result in purchase or sale transactions in the same security at different times (and could potentially result in certain transactions being made by one portfolio manager on behalf of certain Clients before similar transactions are made by a different portfolio manager on behalf of other Clients), or could also result in different purchase and sale transactions being made with respect to the same security.

Conflicts will also arise in cases where different Clients (or groups of Clients) invest in different parts of an issuer's capital structure, including circumstances in which one or more Clients own private securities or obligations of an issuer and other Clients own public securities of the same issuer. For example, with respect to certain transactions or issuers, a Client (or group of Clients) acquiring a loan, loan participation, or loan assignment of a particular borrower (or otherwise holding the debt of such borrower) will have conflicting interests than the other Clients have an equity investment in such borrower.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

In addition, different Clients that may invest in securities of an issuer that have different voting rights, dividend or repayment priorities or other features that could be in conflict with one another. In negotiating the terms and conditions of any such investments, or any subsequent amendments or waivers, the Advisers' interests, Client (or group of Clients) interests, and/or the interests of one or more other Clients could conflict.

If an issuer in which a Client (or group of Clients) and one or more other Clients hold different classes of securities (or other assets, instruments or obligations issued by such issuer) encounters financial problems, decisions over the terms of any workout will raise conflicts of interest (including, for example, conflicts over proposed waivers and amendments to debt covenants). For example, a debt holder who could be paid in full likely will be better served by a liquidation of the issuer, whereas an equity holder or junior debt holder would be better served by a reorganization that holds the potential to create value for the equity holders.

Certain Funds of Funds or other accounts managed by an Adviser that acquire a financial interest in certain Third Party Funds could, but not always, receive directly or indirectly a portion of any management or performance-based fees paid by the Third Party Fund to their respective general partner, managing member, or investment adviser. These interests can also involve additional rights such as board representation or other means to influence the management or business decisions of the Third Party Fund. These relationships create the potential for conflicts of interest between the applicable Funds of Funds or accounts receiving such interests and other funds or accounts managed by an Adviser that have also acquired an interest in the applicable Third Party Fund.

Any of the foregoing conflicts of interest will be discussed and resolved on a case-by-case basis. Any such discussions will take into consideration the interests of the relevant Clients, the circumstances giving rise to the conflict and applicable laws. When considering whether to pursue applicable claims on behalf of Clients, BlackRock considers various factors, including the cost of pursuing the claim and the likelihood of the outcome, and may not pursue every potential claim. BlackRock may elect not to pursue a claim on behalf of a Client, rely on third parties to pursue such claim, actively or otherwise, on BlackRock's behalf or otherwise rely on alignment with other third parties to act on behalf of a class of securities or tranche of loans held by the applicable Client. Clients (and investors in Private Funds) should be aware that conflicts will not necessarily be resolved in favor of their interests. There can be no assurance that any actual or potential conflicts of interest will not result in a particular Client or group of Clients receiving less favorable investment terms in certain investments than if such conflicts of interest did not exist.

Similarly, the Advisers advise entities regarding estimated valuation, risk management, transition management, and potential restructuring or disposition activities in connection with their proprietary or client investment portfolios. Such activities create potential conflicts of interest, as BlackRock, on behalf of Clients, may seek to purchase securities or other assets from the foregoing portfolios and may engage, without limitation, in related activities to bid down the price of assets in such portfolios, which may have an adverse effect on those portfolios.

Long and Short Investing

A Client may buy a security and another Client may establish a short position in that same security, both at the discretion of an Adviser. The subsequent short sale could result in a decrease in the price of the security which the first Client holds. Conversely, an Adviser may establish a short position in a security for a Client and another Adviser may buy that same security for a different Client. The subsequent purchase may result in an increase of the price of the underlying position in the short sale exposure to a Client's disadvantage. On the other hand, potential conflicts also arise when portfolio decisions regarding a Client benefit other Clients, for example, where the sale of a long position or establishment of a short position for a Client decreases the price of the same security sold short by (and therefore benefit) a BlackRock Group member or other Clients, or the purchase of a security or covering of a short position in a security for a Client results in an increase in the price of the same security held by (and therefore benefit) a BlackRock Group member or other Clients.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Material Nonpublic Information/Insider Trading

The BlackRock Group receives material nonpublic information in the ordinary course of its business. This is information that is not available to other investors or other confidential information which, if disclosed, would likely affect an investor's decision to buy, sell or hold a security. This information is received voluntarily and involuntarily and under varying circumstances, including, but not limited to, upon execution of a non-disclosure agreement, as a result of serving on the board of directors of a company, serving on ad hoc or official creditors' committees and participation in risk, advisory or other committees for various trading platforms, clearinghouses and other market infrastructure related entities and organizations. Under applicable law, members of the BlackRock Group are generally prohibited from disclosing or using such information for their personal benefit or for the benefit of any other person, regardless of whether that person is a Client.

Accordingly, should a member of the BlackRock Group obtain, either voluntarily or involuntarily, material nonpublic information with respect to an issuer, it may limit the ability of Clients to buy, sell, or hold investments and may result in an underlying security or investment being priced inconsistently across Clients. BlackRock has no obligation or responsibility to disclose the information to, or use such information for the benefit of, any person (including Clients), even if requested by BlackRock or its affiliates and even if failure to do so would be detrimental to the interests of that person. BlackRock has adopted a Global Insider Trading Policy and a Global Material Nonpublic Information Barrier Policy, which establish procedures reasonably designed to prevent the misuse of material nonpublic information by BlackRock and its personnel. Under the Global Insider Trading Policy, the Advisers generally are not permitted to use material nonpublic information obtained by any department or affiliate of BlackRock in the course of its business activities or otherwise, in effecting purchases and sales in securities transactions for Clients or for their personal accounts.

BlackRock also has adopted policies establishing information barriers to minimize the likelihood that particular investment advisory units or teams will inadvertently come into possession of material nonpublic information known by some other unit or team at BlackRock and thereby also minimizing the likelihood that a particular unit or team will be inadvertently precluded from taking action on behalf of its Clients. Therefore, the investment flexibility of one or more of the Advisers or business units on behalf of Clients may be constrained as a consequence of BlackRock's policies regarding material nonpublic information and insider trading and related legal requirements.

Consequently, the Advisers' investment activities likely will be impacted by receipt of such information, even if a failure to act on such information is ultimately detrimental to Clients. In addition, in certain circumstances, the use of such information would also be prohibited by BlackRock's Global Insider Trading Policy.

From time to time, certain BlackRock employees use paid expert networks and other industry experts, (subject to the BlackRock policies regarding the handling and restricted use of material nonpublic information). BlackRock has adopted specific policies and procedures to help prevent and/or appropriately address the receipt of any material nonpublic information from such expert networks.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Cross Trades

In certain circumstances, the Advisers effect purchases and sales between Clients or clients of affiliates (“cross trades”) if the Advisers believe such transactions are appropriate based on each party’s investment objectives and guidelines, subject to each client’s governing documents, applicable law and regulation (but are not required to effect such cross-trades). In such cases, the relevant Adviser and such affiliate may have a potentially conflicting division of loyalties and responsibilities regarding both parties to the transaction.

In this regard, BlackRock maintains a cross-trading program covering various strategies pursuant to which securities are bought and sold among Clients. Cross trades for accounts subject to ERISA are made in accordance with applicable DOL regulations and relevant exemptions. Where a US Registered Fund participates in a cross trade, the Advisers will comply with the US Registered Fund’s procedures adopted pursuant to Rule 17a-7 under the Investment Company Act and related regulatory authority. In certain circumstances, based on product and account type, an independent pricing source might be used. the Advisers seek to assure that the price used in a cross trade is fair and appropriate, and in keeping with, or as required by the relevant regulations.

In addition, a Client account may enter into “agency cross transactions,” in which a member of the BlackRock Group may act as broker for such Client account and for the other party to the transaction, to the extent permitted under applicable law and subject to the terms of the governing documents of such Client account. In such cases, the relevant Adviser and such affiliate may have a potentially conflicting division of loyalties and responsibilities regarding both parties to the transaction. The authority of the Advisers to conduct such agency cross-transactions is subject to the right of the Client account investors to revoke such authority by the affirmative vote of a majority of those Client account investors who are not directly or indirectly affiliated with the relevant Adviser, voting as a single class or, in the case of certain Client accounts, the approval of the respective advisory boards of such Client accounts. To the extent that any provision of Section 11(a) of the Exchange Act or any of the rules promulgated thereunder is applicable to any transactions effected by the relevant Adviser, such transactions will be effected in accordance with the requirements of such provisions and rules.

Transacting in securities issued by business relationships

The Advisers may to the extent permitted by applicable law and contractual arrangements, invest Client accounts directly or indirectly in securities issued by:

- (i) companies in which a member of the BlackRock Group or other Client, for itself or its Clients, has an equity, debt, or other interest; or.
- (ii) Clients, to whom the BlackRock Group may provide a variety of services and advice. In such circumstances, the BlackRock Group may generally receive fees for these services, including fees that are contingent on the successful placement of securities and successful closing of a transaction, and certain transaction fees in connection with structuring, negotiating, or entering into such investment transactions, as well as ongoing advisory or monitoring fees. In some instances, fees and expenses will be earned by the BlackRock Group or its personnel if such personnel serve as directors or officers of such Clients.

As a result of the foregoing, BlackRock may have an incentive to invest in securities issued by certain Clients or in securities of companies in which a member of the BlackRock Group or other Client, for itself or its Clients, has an equity, debt, or other interest. BlackRock believes, however, that the nature and range of such relationships is such that it would be inadvisable to exclude these securities from Client accounts. Accordingly, absent of a specific investment restriction or direction or regulatory restriction, it is possible that a Client account will include these securities.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Investments in securities of BlackRock, Inc.

Certain client accounts invested in index-based SMA strategies and certain US Registered Funds and other pooled investment vehicles whose investment objectives are to provide investment results, before fees and expenses, which correspond generally to the price and yield performance of an Underlying Index (“index funds”), may hold securities of BlackRock, Inc. which corresponds to the approximate weighting of BlackRock securities in the index strategy followed by a SMA account or index fund. The Advisers have a conflict of interest because BlackRock, its subsidiaries and their personnel, benefit from transactions that support or increase the market demand and price for BlackRock securities. The conflict is mitigated because purchases and sales of BlackRock securities in the SMA client account or index fund are limited to transactions that align the weighting of BlackRock securities in the client account or index fund, as applicable, to the current weightings of the index followed by the client account or index fund, as applicable.

Use of Affiliated Products

The Advisers, when appropriate and in accordance with applicable laws, investment objectives and guidelines will:

- (i) recommend (including, where applicable, via model portfolios and the provision of Research and Digital Services) the purchase of Affiliated Products; and
- (ii) on behalf of Clients, allocate assets to Affiliated Products.

The Advisers face potential conflicts when recommending the use of or allocating assets of a Client to Affiliated Products. In hindsight, circumstances could be construed that such recommendation or allocation conferred a benefit upon the Affiliated Products or BlackRock, to the detriment of the Client, Private Fund, model portfolio recipient or Research and Digital Service Recipient, or vice versa.

The Advisers have a financial incentive to recommend or allocate assets to Affiliated Products:

- (i) that pay higher fees to the Advisers, including in instances where Affiliated Products and Unaffiliated Products offer lower expense ratios and/or higher historical returns; or
- (ii) where BlackRock receives additional fees and/or other compensation in connection with such recommendation or allocation, including in instances where Unaffiliated Products offer lower expense ratios and/or higher historical returns.

Shareholders in a pooled investment vehicle, including a Client, will pay a proportionate share of the vehicle’s fees and expenses. Investment by a Client in an Affiliated Fund means that, subject to applicable laws and the terms of any such investment, BlackRock will receive directly or indirectly advisory fees and/or other compensation from the Affiliated Fund that are in addition to the fees it will receive from the Client for managing the separate account or investing fund.

The Advisers may be disincentivized to consider or recommend the removal of a Client’s assets from, or the modification of a Client’s allocations to, an Affiliated Product at a time that it otherwise would have, in order to avoid or delay the adverse impacts of such redemption on an Adviser or the Affiliated Product. Redeeming from Affiliated Products may affect the liquidity position of the Affiliated Product and will result in decreased assets under management for the Advisers and decreased fees paid to the Advisers. When the Advisers do recommend the removal of, or re-allocate assets away from, Affiliated Products, other Clients and investors in such Affiliated Products may be adversely impacted.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

BlackRock generally does not charge any fees for providing or Research and Digital Service or for model portfolios comprised solely of funds and the fees BlackRock receives from the Affiliated Funds included in the Research and Digital Service or any such model portfolio are typically the compensation received by BlackRock with respect to the Research and Digital Service or model portfolio. This conflict of interest may result in a Research and Digital Service or a model portfolio with lower performance or higher fees than they would have had if the Research and Digital Service or model portfolio did not invest in Affiliated Funds.

The Advisers also have an incentive to recommend or allocate assets to Affiliated Products to increase assets under management to provide a competitive advantage to the Advisers in marketing the Affiliated Products. Some Affiliated Products could be considered “start-up” or early-stage funds with low assets under management. The Advisers recommending or allocating assets to such Affiliated Products will help accelerate such Affiliated Products’ scale with additional assets.

Additionally, BlackRock might have its own seed capital invested in certain Affiliated Funds and/or could have discretionary control of a significant amount of Client assets invested in such Affiliated Funds. Withdrawing seed capital or Client assets from such Affiliated Funds could disadvantage the other Clients and investors invested in the Affiliated Fund.

Clients who fund their separate accounts with shares of Affiliated Funds may incur deferred sales charges upon the sale of such shares by BlackRock, which could result in compensation to BlackRock or an affiliate that is in addition to the fees BlackRock will receive for managing the separate account. Certain Clients can invest directly in certain Affiliated Funds outside of their separate accounts without paying additional separate account management fees to BlackRock. Consistent with applicable law, BlackRock may waive fees and/or reimburse fees or expenses for some Clients while not waiving fees or reimbursing fees or expenses for other Clients.

The Advisers may sell securities held in an Affiliated Fund’s portfolio in response to redemptions, which could increase the Affiliated Fund’s transaction costs and cause the Fund to realize capital gains. Significant redemptions of Affiliated Fund shares may also reduce the Affiliated Funds’ liquidity. An Affiliated Fund’s expense ratio may increase as assets under management decrease, particularly where asset-based fees are subject to breakpoint reductions, depending on any applicable expense caps.

The separate account management fees paid by certain retirement accounts (including certain accounts subject to ERISA) that invest in US Registered Funds from which BlackRock or an affiliate receives compensation (including management fees or fees paid pursuant to Rule 12b-1 under the Investment Company Act) will be reduced by the account’s pro rata share of such compensation, to the extent required by applicable law. In certain circumstances, (e.g., at BlackRock’s discretion, or if required by applicable contractual arrangements), BlackRock, in order to avoid duplication of advisory fees, will waive or credit all or a portion of its separate account investment management fee with respect to any assets of a Client invested in shares of any such US Registered Funds or other pooled investment vehicles, or SMAs of another Adviser. To the extent permissible under applicable law and the terms of any relevant contractual arrangement, BlackRock will institute, waive, or alter the terms of such a waiver from time to time in its sole and absolute discretion.

As authorized in a Private Investors client’s IMA with BIM, and when either contemplated by a Private Investors client’s investment strategy or upon direction from a client, BIM will invest Private Investors accounts in funds (such as mutual funds, ETFs and/or other pooled investment vehicles), including but not limited to Affiliated Funds. Except under limited circumstances described below, when BIM invests Private Investors accounts in such funds, BIM typically invests solely in Affiliated Funds. Generally, BIM would only invest Private Investors accounts in funds that are not Affiliated Funds upon direction from the client or in limited circumstances (e.g., if a Private Investors client directs BIM to conduct year-end “tax loss selling” on its behalf, and some of such sales include shares of an Affiliated Fund, BIM might reinvest the proceeds of such sale in a similar Third Party Fund for a short period of time in order to avoid the triggering of “wash sale” rules).

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

From time to time, to the extent permitted by a client's IMA, and when either contemplated by client's investment strategy or upon direction from a client, BIM will invest Private Investors accounts and accounts of clients participating in SMA Programs other than Private Investors (i.e., SMA Programs not sponsored by BlackRock, referred to herein as "Non-PI SMA Programs") in Management Fee-Waived Mutual Funds, which are utilized by SMA Programs. Such Management Fee-Waived Fund shares will be redeemed upon the termination of the BlackRock Investment Adviser's management of the separate account. With respect to Model-Based SMA Programs, BIM often includes Affiliated Funds in model portfolios provided to OPMs.

With respect to investments in funds for clients participating in Non-PI SMA Programs, unless otherwise directed by the Sponsor or client, BIM typically only utilizes funds that are Affiliated Funds, including but not limited to Management Fee-Waived Mutual Funds. To the extent required by the applicable program, applicable law, and/or applicable account documents, when BIM invests client accounts participating in Non-PI SMA Programs in Affiliated Funds that are not Management Fee-Waived Mutual Funds, the management fee payable to BIM in connection with the Non-PI SMA Program may or may not be (i) reduced by the account's pro rata share of any management fees or other fees or expenses paid by the Affiliated Fund to BlackRock as a result of such investment or (ii) assessed on the client assets invested in Affiliated Funds.

In situations where BlackRock investment teams are investing in Affiliated Funds, access to certain portfolio holding and risk characteristic data of the Affiliated Funds is not available to the investment team until it is disclosed publicly if such investment team does not also manage the applicable Affiliated Funds. As a result, BlackRock investment teams may not have any early access to this information about these Affiliated Funds that could be relevant in making an investment decision, which could adversely affect a Client account or fund.

Use of Unaffiliated Products

The fee structure of certain Client accounts may require an Adviser to compensate unaffiliated investment advisers out of the fee it receives from the Client account for the use of an Unaffiliated Product within the client account. In such circumstances, the Adviser may be incentivized to select Unaffiliated Products with lower compensation levels (including unaffiliated investment advisers that discount their fees based on aggregate account size or other relationships) in order to increase the net fee to the Adviser, and not select other Unaffiliated Products that might also be appropriate for the client account. Fee breakpoints in a Client account may also be affected by BlackRock's business relationships with an unaffiliated investment adviser and the size of Client accounts and may directly or indirectly benefit BlackRock and other Client accounts. A Client account will not be entitled to any compensation with respect to such benefits received by BlackRock and other Client accounts.

The terms of the governing agreement between an Adviser and its Client may limit the Client account to utilize only Affiliated Products or only Unaffiliated Products or for particular asset classes or strategies within the Client account to utilize only Affiliated Products or only Unaffiliated Products. However, in other cases, the governing agreement may permit the use of both Affiliated Products and Unaffiliated Products for the Client account or for particular asset classes or strategies within the Client account. In such cases, the governing agreement may provide that the Client must consent to, or may permit the Client to veto, the Adviser's investment in an Affiliated Product. Alternatively, or in addition, the governing agreement between the Adviser and its Client may incorporate portfolio targets where the portfolio has an expected minimum percentage of Affiliated Products.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

In some circumstances the governing agreement between the Adviser and its Client may provide for a single layer of fees. In such circumstances the Adviser will have an incentive to select or recommend Unaffiliated Products as BlackRock does not receive additional fees from such Client accounts in respect of investments in investment strategies managed by the Advisers, including Affiliated Products even though BlackRock is providing additional services to the Client accounts. However, in such circumstances there may be countervailing considerations outside of the best interests of the Client that may incentivize the Adviser to select or recommend Affiliated Products (e.g. increased assets under management) over Unaffiliated Products.

Capacity Constrained Investment Strategies

From time to time, an investment strategy managed by an Adviser may become capacity constrained, generally meaning the size of assets under management with respect to the investment strategy have increased to a point where the Adviser's ability to generate alpha from the investment strategy is hindered or constrained.

In such situations, the Adviser will close the capacity constrained investment strategy to new injections of assets under management which can create potential conflicts of interest with respect to the competing investment interests of and the allocation of investment opportunities to those Client accounts and those investors and potential investors of Affiliated Products (which may include other Clients, other Affiliated Products, BlackRock employees and BlackRock) utilizing or seeking to utilize the capacity constrained investment strategy.

Additionally, where an investment strategy is capacity constrained the constrained Adviser faces a potential conflict of interest by further increasing assets under management and earning greater management fees from those assets to the potential detriment of investors utilizing the capacity constrained investment strategy as a result of reduced investment performance and returns.

Potential Conflicts Resulting from the Handling and Execution of Trades

Competing Orders

Transactions in investments by one or more Clients and members of the BlackRock Group may have the effect of diluting or otherwise disadvantaging the values, prices or investment strategies of another Client, particularly, but not limited to, in small capitalization, emerging market, or less liquid strategies.

This may occur when portfolio decisions regarding a Client account are based on research or other information that is also used to support portfolio decisions for other Client accounts. When one Adviser implements a portfolio decision or strategy ahead of, or contemporaneously with, similar portfolio decisions or strategies of another Adviser (whether or not the portfolio decisions emanate from the same research analysis or other information), market impact, liquidity constraints, or other factors could result in one or more Clients receiving less favorable trading results, the costs of implementing such portfolio decisions or strategies could be increased or such Clients could otherwise be disadvantaged.

BlackRock Investment Advisors, therefore, face potential conflicts of interest in how they handle the implementation of portfolio decisions for different Clients, including the sequencing in which portfolio decisions are executed. The Advisers seek to obtain the best execution of portfolio decisions reasonably available under the circumstances and subject to the best interests of a Client and instructions of a Client's account, portfolio decisions are typically executed in the order in which they are received. The implementation of portfolio decisions will be decided without consideration of BlackRock's or an Adviser's (or any of their personnel's) pecuniary investment, or other financial interests, including without consideration of the different fees or compensation BlackRock receives from certain Clients.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Competing Orders and SMA Programs

In the event that portfolio managers for SMA Program accounts and portfolio managers for institutional or investment company accounts submit trade orders for execution for the same securities at or about the same time, BlackRock will determine, based on trading volume, market conditions, and other appropriate factors, including the administrative overhead associated with effecting trades for SMA Program accounts, the order in which such transactions will be entered. Factors considered typically include relative size of the transactions, liquidity, and trading volume of the securities or other instruments involved, and the length of time needed to complete the respective transactions. Taking into account these factors, BlackRock will seek to make such decisions in a manner designed to achieve overall fair and equitable treatment of all Clients over time. Once the order in which transactions will be effected for a particular group has been determined, BlackRock may complete transactions for one group before commencing transactions for the other. Trades directed by an SMA client or attributable to client inflows or outflows, may be submitted for execution separate from trades associated with the management of the investment strategy of a specific SMA Program. Thus, as discussed under “Directed Brokerage” within Item 12 “Brokerage Practices” of this Brochure, trades may be effected on behalf of non-SMA Program accounts at a different time than the corresponding trades are effected on behalf of SMA Program accounts, and SMA Program account trades, as well as transactions for other directed brokerage clients, may “wait behind” block trades executed for BlackRock’s non-SMA Program accounts (and trades for SMA Program accounts with significant client-imposed investment restrictions may trade after block trades executed for other SMA Program accounts without such restrictions). In such circumstances, these accounts may receive an execution price that varies from (and may be less favorable than) the price received by other accounts managed by BlackRock. In certain of such circumstances, the market price of those securities can rise or fall before an SMA Program or directed brokerage account trade is executed (and, in certain circumstances, as a direct result of other trades placed by, or on the advice of, BlackRock), causing SMA Program and directed brokerage clients to purchase the same securities at a higher price (or sell the same securities at a lower price) than BlackRock’s other clients.

Competing Orders and Model-Based SMA Programs

As noted in Item 4 (“Advisory Business”) of this Brochure under the section of disclosure headed “Advisory Services – Model-Based SMA Programs,” in certain SMA Programs BIM provides non-discretionary investment services (often in the form of model portfolios) to a Sponsor or an OPM, who utilizes such model portfolios in connection with its management of program client accounts. The model portfolios provided to a Sponsor or OPM can, in some circumstances, reflect recommendations being made by BIM contemporaneously to, or investment advisory decisions made contemporaneously for, similarly situated discretionary clients of BIM. As a result, BIM may have already commenced trading before the Sponsor or OPM has received or had the opportunity to evaluate or act on BIM’s model portfolios. In this circumstance, trades ultimately placed by the Sponsor or OPM for its clients may be subject to price movements, particularly with large orders or where the securities are thinly traded, that may result in the OPM’s clients receiving prices that are less favorable than the prices obtained by BIM for its client accounts. On the other hand, the OPM may initiate trading based on BIM’s model portfolios before or at the same time BIM is also trading for its own client accounts. Particularly with large orders or where the securities are thinly traded, this could result in BIM’s clients receiving prices that are less favorable than prices that might otherwise have been obtained absent the Sponsor’s or OPM’s trading activity. BIM takes reasonable steps to attempt to minimize the market impact of the recommendations provided to the Sponsor or OPM on accounts for which BIM exercises investment discretion. However, because BIM does not control the Sponsor’s or OPM’s execution of transactions for the Sponsor’s or OPM’s client accounts, BIM cannot affect the market impact of such transactions to the same extent that it is able to for its discretionary client accounts.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Competing Orders and Research and Digital Services

As noted in Item 4 (“Advisory Business”) of this Brochure under the section of disclosure headed “Advisory Services – Research and Digital Services,” in respect of certain Research and Digital Services, BFM and BFA provide impersonal non-discretionary investment services to Research and Digital Services Recipients who may utilize such services in connection with their provision of investment services to their clients. In some circumstances, such Research and Digital Services include tool output and analysis being provided by BFA or BFM contemporaneously with, or investment advisory decisions made for, investment vehicles over which BFA or BFM have discretionary authority. As a result, BFA or BFM may have already commenced trading before the Research and Digital Services Recipient has received or had the opportunity to evaluate or act on the information. In this circumstance, trades ultimately placed by the Research and Digital Services Recipient may be subject to price movements, particularly with large orders or where the securities are thinly traded, that may result in the Research and Digital Services Recipient’s clients receiving prices that are less favorable than the prices obtained by BFA or BFM for its discretionary accounts. On the other hand, the Research and Digital Services Recipient may initiate trading based on tool output and analysis received from BFA or BFM before or at the same time BFA or BFM is also trading for its own discretionary accounts. Particularly with large orders or where the securities are thinly traded, this could result in investment vehicles over which BFA has discretionary authority receiving prices that are less favorable than prices that might otherwise have been obtained absent the Research and Digital Services Recipient’s trading activity.

Trade Aggregation

The Advisers, in appropriate circumstances, will aggregate securities trades for a Client with similar trades for other Clients, but are not required to do so. In particular, an Adviser could determine not to aggregate transactions that relate to portfolio management decisions that are made independently for different Client accounts or if it determines that aggregation is not practicable, not required or inconsistent with, a Client direction.

When Client transactions are aggregated it may not be possible, due to prevailing trading activity or otherwise, to fill the entire volume of securities purchased or sold. In such circumstances, Clients will be competing for the allocation of the partially filled aggregated order and it will not be possible to receive the same price or execution on the entire volume of securities purchased or sold. BlackRock’s policy is to treat Clients fairly and equitably over time, and any particular decision to allocate securities purchased or sold among accounts can be more or less advantageous to any one Client or group of Clients and certain allocations, to the extent consistent with BlackRock’s fiduciary obligations, may deviate from a pro rata basis among Clients in order to address legal, tax, regulatory, fiduciary, risk management, and other considerations. Additionally, the various prices at which the securities are purchased or sold will be averaged, in which case all participating accounts generally will be charged or credited with the average price. In addition, under certain circumstances, Clients will not be charged the same commission or commission equivalent rates in connection with a bunched or aggregated order. The effect of the aggregation therefore, on some occasions could either advantage or disadvantage a particular Client.

From time to time, aggregation will not be possible because a security is thinly traded or otherwise not able to be aggregated and allocated among all Client accounts seeking the investment opportunity or a Client will be limited in, or precluded from, participating in an aggregated trade as a result of that Client’s specific brokerage arrangements. In these cases, the Advisers generally will choose to allocate on a non-pro rata basis such as through random or rotational allocations among eligible accounts in such a manner as to reasonably assure that Clients are treated fairly and equitably over time.

The allocation of partially filled aggregated orders will be decided without consideration of BlackRock’s or an Adviser’s (or any of their personnel’s) pecuniary investment, or other financial interests, including without consideration of the different fees or compensation BlackRock receives from certain Clients.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Potential Conflicts That Arise With Respect to Services Provided by or Through Various BlackRock Entities

Subject to applicable law and contractual arrangements, Clients have a choice of engaging the securities and futures broker or dealer, custodial, derivatives, trustee, agency, mortgage servicing, lending, banking, advisory services and other commercial services of, or investing in one of a spectrum of investment products provided or sponsored by, another Adviser, other members of the BlackRock Group (collectively, “Affiliated Services”).

Additionally, the Advisers rely on information from, or utilize the Affiliated Services in managing a Client’s account.

These Affiliated Services and certain other relationships among various members of the BlackRock Group and their respective subsidiaries and related persons, with or with respect to Clients, give rise to potential conflicts of interest and could have potentially adverse effects on Clients, described generally below.

Clients Selecting Affiliated Services

When Clients utilize Affiliated Services, the relevant BlackRock entities will be entitled, subject to applicable laws and contractual arrangements, to assess and retain fees and other amounts that they receive in connection with such products and services, without being required to account to any Client. Additionally, subject to applicable laws and contractual arrangements, advisory fees, or other compensation payable by Clients may not be reduced or offset by reason of receipt by BlackRock of any such fees or other amounts.

Except as otherwise described herein, an Adviser may not take actions to negotiate terms between a Client and BlackRock affiliates who provide these Affiliated Services, nor will the Adviser generally be responsible with respect to any losses or harms suffered by the Client in connection with the Client’s use of Affiliated Services.

As with relationships with unaffiliated counterparties, Clients will be required to establish these business or commercial relationships with BlackRock affiliates, if at all, based on the Client’s own credit standing; such BlackRock affiliates will not consider or rely on, and neither BlackRock nor any Adviser will be required to allow the credit standing of BlackRock or any Adviser to be used in connection therewith.

Additionally, Clients utilizing Affiliated Services can be disadvantaged as a result of, among other things:

- (i) differences in regulatory requirements of various jurisdictions or organizations to which such BlackRock affiliates are subject;
- (ii) time differences;
- (iii) the terms of BlackRock’s and such affiliates’ internal policies and procedures, the client’s investment advisory and other agreements; or
- (iv) the terms of the governing documents for a Private Fund, US Registered Fund or other investment product.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

The Advisers Selecting Affiliated Services

As discussed under “Services of Affiliates” in Item 4 (“Advisory Business”) of this Brochure, the Advisers use the personnel or services of other BlackRock entities in a variety of ways to make available BlackRock’s global capabilities to Clients. While BlackRock believes this practice is generally in the best interests of its Clients, it can give rise to certain conflicts of interest, with respect to the allocation of investment opportunities, execution of portfolio transactions, client servicing and fees.

BlackRock and its affiliates will seek to mitigate conflicts that arise by determining not to utilize the personnel or services of a particular affiliate or the applicable BlackRock investment product in circumstances where it believes the potential conflict or adverse impact of ameliorative steps outweighs the potential benefits of the relationship.

Certain Services Insourced from or Outsourced to Third Parties

Subject to applicable law and contractual arrangements with Clients, BlackRock, including the Advisers, from time to time, and without notice to Clients, will insource from or outsource to third parties, including parties which are affiliated or unaffiliated with BlackRock, certain processes or functions in connection with a variety of services that they provide to Clients in their administrative or other capacities. Such insourcing or outsourcing can give rise to potential conflicts of interest, including where BlackRock or other Clients receive favorable pricing or other benefits that arise from or are connected to another Client’s vendor relationships.

Banking, Custodial and Related Services

BlackRock or its affiliates own or have an ownership interest in certain trading, portfolio management, operations and/or information systems (the “Systems”) used by one or more service providers providing custodial services to Clients or funds managed by an Adviser (each a “Service Provider”). The Service Providers remunerate BlackRock or its affiliates for the use of the Systems. Such payments to BlackRock or its affiliates for the use of the Systems may enhance the profitability of BlackRock and its affiliates. The receipt of fees by BlackRock or its affiliates from a Service Provider in connection with the use of the Systems may create an incentive for BlackRock to recommend that a Client or fund managed by an Adviser enter into or renew a custodial arrangement with a Service Provider.

Management of Index Funds & BlackRock Index Services

BlackRock provides investment advisory services to US Registered Funds and other pooled investment vehicles, including those commonly referred to as index funds, whose investment objectives are to provide investment results, before fees and expenses, which correspond generally to the price and yield performance of an Underlying Index. The Underlying Index generally is developed by an index provider that is unaffiliated with BlackRock, but in some circumstances, BIS is the index provider. Please see Item 8 (“Index Mandates”) for more information. Index funds seek to track the performance of indices and in some circumstances may use all or a portion of the name of the index in the fund name. Index providers are paid licensing fees for use of their index and index name. Where BIS is the index provider, BlackRock may pay BIS licensing fees for use of a BIS Index or index name, but only when permissible under applicable law.

Potential Conflicts Resulting in Inducement

Gifts and Entertainment

With regard to Clients or other entities with whom BlackRock has a professional relationship, BlackRock and its respective affiliates and personnel can receive or offer gifts, entertainment, or other benefits in line with the Global Gifts and Entertainment Policy. The receipt or offer of any such gift, entertainment, or other benefit may be perceived as an inappropriate inducement or a quid pro quo arrangement that could motivate BlackRock, its respective affiliates or personnel to act in a manner that is not in the best interests of a Client.

As noted in the Conduct Code, all BlackRock employees and directors must act in the best interests of our clients and consider the reputation of BlackRock when receiving or providing any gift or entertainment. Employees are prohibited from offering, promising, giving or receiving, or authorizing others to offer, promise, give or receive anything of value, either directly or indirectly, to any party in order to improperly obtain or retain business, or to otherwise gain an improper business advantage. Additionally, strict laws (including criminal laws) govern the provision of gifts and entertainment, including meals, transportation, and lodging, to public officials. Employees are prohibited from providing gifts or anything of value to public officials or their employees or family members in connection with BlackRock's business for the purpose of obtaining or retaining business or a business advantage.

Preferential Hiring Practices

From time to time, an individual with ties to a public official, key governmental decision maker or current or potential Client may be referred to BlackRock for an open BlackRock employment opportunity. Such a referral may create a potential conflict of interest with the referral being provided with the intent of creating, maintaining or improving BlackRock's relationship with any such public official, key governmental decision maker or Client or as part of a quid pro-quo arrangement. Such arrangements may lead to the hiring of unqualified or unsuitable individuals, leading to a potential deterioration in the provision of services to Clients generally.

BlackRock has issued policies and established processes to manage potential conflicts of interest resulting from employment referral which generally require that employment hiring decisions be based on the merits of the individual candidate, relative to others being considered for the position, and that each candidate undergo standard BlackRock employment hiring procedures that are fair and transparent. Candidates for an open employment position may not be selected as a favor to a Client, a prospective client, or a Public Official or in order to obtain or retain a business advantage.

Charitable Contributions

From time to time, BlackRock in its sole discretion or at the request of a Client or prospective client or third-party may make a charitable contribution. In other situations, BlackRock can request a Client or prospective client or third-party to make a charitable contribution. Such activity creates potential conflicts of interest, where the intent of the activity is to create, maintain or improve a BlackRock business relationship including by creating an inducement or a quid pro quo arrangement or where such charitable contribution results in a potential benefit to a BlackRock employee or a BlackRock employee's close relation who is connected to the charity (e.g., where a contribution results in the payment of compensation).

BlackRock has issued policies and established processes to manage potential conflicts of interest resulting from the giving or requesting of charitable contributions which generally require that charitable contributions may not be given or requested in order to improperly obtain or retain business, or to otherwise gain an improper business advantage.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Recommending BlackRock over unaffiliated investment advisers

Consistent with applicable law, BlackRock and its respective affiliates and personnel can receive greater compensation or greater profit in connection with an account for which BlackRock serves as an adviser than with an account advised by an unaffiliated investment adviser. Differentials in compensation result from, among other reasons, BlackRock paying a portion of its advisory fee to its affiliate or other compensation arrangements, including for portfolio management, brokerage transactions, or account servicing. Any differential in compensation creates a potential financial incentive on the part of BlackRock, its affiliates and personnel to recommend BlackRock over unaffiliated investment advisers, to effect transactions differently in one account over another, or to favor accounts in which they have more significant interests over those in which they have a lesser (or no) interest. Please refer to the “Use of Affiliated Products” and “Use of Unaffiliated Products” sections of this Item 11 for a discussion of potential conflicts associated with the recommendation of and investment in Affiliated Products and Unaffiliated Products.

Conflicts of Interest Presented by the Retention of Third-Party Fees

As discussed under the heading “Fees Paid to an Adviser by Third Parties” in Item 5 (“Fees and Compensation”) of this Brochure, an Adviser or its employees or its affiliates may be entitled to negotiate for and retain Third-Party Fees with respect to the portfolio investments of a Private Fund or separate account to the extent set forth in the applicable Private Fund’s OM and/or governing documents or the IMA governing the applicable separate account, respectively, and subject to applicable laws and regulations.

The entitlement of an Adviser or its employees or its affiliates in respect of such Third-Party Fees poses potential various conflicts of interest. For example, an Adviser is financially incentivized to seek out transactions in which a Third-Party Fee would be payable, which may result in the applicable Client making investments that it might not otherwise make absent the entitlement of the Adviser to Third-Party Fees. In addition, in situations where an Adviser or its employees or its affiliates have the ability to retain a Third-Party Fee, such Adviser has the financial incentive to negotiate as high a Third-Party Fee as possible. In certain circumstances, transaction counterparties may negotiate terms for the portfolio investments that yield lower returns to the Client than might have been the case had the Adviser, its employee or its affiliate not been entitled to the Third-Party Fees.

Even if the terms of a Private Fund’s OM and/or governing documents or the IMA governing the separate account, as applicable, do not permit the Adviser or its employees or its affiliate to retain Third-Party Fees, the Client may invest alongside other Clients with respect to which the Adviser or its employees or its affiliate have a right to retain such fees, which creates potential conflicts similar to those that may arise with respect to such other Client.

Potential Conflicts Relating to Clients’ Use of Investment Consultants and BlackRock’s Relationship With Pension Plan Providers

Many Clients work with pension or other institutional investment consultants or outsourced chief investment officers (collectively, “Investment Consultants”), who provide a wide array of services to pension plans and other institutions, including assisting in the selection and monitoring of investment advisers such as the Advisers.

From time to time, Clients’ Investment Consultants who recommend the Advisers to, and provide oversight of the Advisers for, Clients also provide services to or purchase services from members of the BlackRock Group. For example, BlackRock purchases certain index and performance-related databases and human resources-related information from Investment Consultants and their affiliates. The Advisers also utilize brokerage execution services of Investment Consultants or their affiliates, and members of the BlackRock Group attend conferences sponsored by Investment Consultants. Conversely, from time to time, the BlackRock Group will be hired by Investment Consultants and their affiliates to provide investment management and/or risk management services, creating potential conflicts of interest.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

These differing relationships between BlackRock and the Investment Consultants create potential conflicts of interest including where an Adviser may seek to preserve or enhance a relationship with an Investment Consultants to the possible detriment of a Client, such as by failing to challenge the advice or opinion of an Investment Consultant with regard to a Client account in order to not potentially harm BlackRock's other business activities with the Investment Consultant.

Rule 12b-1 Plans of BlackRock US Registered Funds and Additional Payments

Some of the BlackRock US Funds (outside the US iShares ETF Complex) have adopted plans under Rule 12b-1 of the Investment Company Act or, with respect to certain BlackRock closed-end funds, adopted plans in conformity with Rule 12b-1 of the Investment Company Act (the "Plans") with respect to certain share classes that allow such BlackRock US Funds to pay distribution fees for the sale of their shares and shareholder servicing fees for certain services provided to its shareholders.

The distribution fees are permitted to be used to pay an affiliate of BlackRock or others for distribution and sales support services provided and related expenses in connection with the sale of certain classes of shares of such BlackRock US Funds. Shareholder servicing fees payable pursuant to the Plans are fees payable for general shareholder liaison and other services and are not costs which are primarily intended to result in the sale of BlackRock US Funds' shares.

From time to time, BlackRock and its affiliates are permitted to pay affiliated and unaffiliated entities, including financial institutions, broker-dealers or other entities, compensation for the sale and distribution of shares of the BlackRock US Funds or for other services to the BlackRock US Funds and their shareholders. Such services may include participation in marketing activities, educational programs, conferences, and technology development and reporting, or sub-accounting, administrative, shareholder processing or other services related to the sale and distribution of the BlackRock US Funds, or for other services or activities that facilitate investments by Clients in such funds. These payments are additional to any such affiliated and unaffiliated entity ("Additional Payments") are not made pursuant to the Plans or otherwise paid by a BlackRock US Fund. Such Additional Payments are made from BlackRock's own assets and are not an additional charge to a BlackRock US Fund or its shareholders. Additional Payments made to affiliated and unaffiliated entities are in addition to the Plan payments described in such BlackRock US Funds' prospectuses and/or statements of additional information. BlackRock can also make such Additional Payments with respect to products other than the BlackRock US Funds. In some circumstances, such Additional Payments create a potential incentive for the entity receiving such payments, its employees or associated persons, to recommend or sell shares of a BlackRock US Fund or other fund or product. BlackRock or an affiliate of BlackRock also make payments for administrative and sub-transfer agency, operational and recordkeeping, networking and shareholder servicing with respect to the BlackRock US Funds (as disclosed in the BlackRock US Funds' prospectuses and statements of additional information).

To the extent permitted by applicable laws, BlackRock and its affiliates make payments to financial intermediaries relating to the placement of interests in Private Funds or revenue sharing for US registered mutual funds and closed-end funds. These payments are in addition to or in lieu of any other fees (e.g., placement fees) payable by Investors in those funds. These payments, potentially significant to the financial intermediary and/or its representatives, can also create an incentive for the financial intermediary to recommend the fund over other products.

Client Confidentiality, Information Asymmetry and Availability of Proprietary Information

In connection with the activities of BlackRock, Inc. and the Advisers, certain persons within the BlackRock Group receive information in connection with proposed investment activities for BlackRock and Clients that is not generally available to the public. Also, the Advisers have access to certain fundamental analyses, research and proprietary technical models developed internally or by other members of the BlackRock Group, certain third parties and their respective personnel.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

There will be no obligation on the part of such persons or any Adviser, to make available for use by a Client, or to effect transactions on behalf of a Client on the basis of, any such information, strategies, analyses or models known to them or developed in connection with their own proprietary or other activities. In many cases, such persons will be prohibited from disclosing or using such information for their own benefit or for the benefit of any other person, including Clients.

Similarly, one or more Clients could have, as a result of receiving client reports or otherwise, access to information regarding the Advisers' transactions or views, including views on voting proxies, which are not available to other Clients, and may act on such information through accounts managed by persons other than an Adviser.

The foregoing transactions may negatively impact Clients through market movements or by decreasing the pool of available securities or liquidity. Clients could also be adversely affected when cash flows and market movements result from purchase and sale transactions, as well as increases of capital in, and withdrawals of capital from, accounts of other Clients. These effects can be more pronounced in thinly traded securities and less liquid markets.

In addition, the Advisers have no obligation to seek information from or share with any Client any information, investment strategies, opportunities, or ideas known to members or affiliates of the BlackRock Group or developed or used in connection with other clients or activities. For example, it is possible that a Client account invests in securities of companies with which an affiliate has or is trying to develop investment banking relationships, strategic partnerships, as well as securities of entities in which BlackRock, or one of its affiliates has significant debt or equity investments, in which an affiliate makes a market or in which an affiliate provides or anticipates someday providing research coverage.

Such investments could cause conflicts between the interests of a Client account and the interests of other Clients or another affiliate, or cause BlackRock to be exposed to material nonpublic information about an issuer. Moreover, conflicts of interest could arise where members and personnel of the BlackRock Group, including the Advisers' personnel or other BlackRock personnel advising or otherwise providing services to Clients, have possession of information not available to all BlackRock personnel, and such personnel act on the basis of such information, or are required to refrain from acting, in ways that have adverse effects on Clients.

Certain Principal and Proprietary Transactions of the BlackRock Group

Subject to the terms of the governing documents of the relevant Client account, a member of the BlackRock Group may enter into "principal transactions" with a Client account within the meaning of Section 206(3) of the Advisers Act in which such member of the BlackRock Group acts as principal for its own account with respect to the sale of a security or other asset to, or purchase of a security or other asset from, such Client account.

Principal transactions will be completed in compliance with applicable law and the terms of the governing documents of the relevant Client account. In analyzing such principal transactions, the applicable Adviser will have a conflict between acting in the best interests of a Client account and assisting itself or its affiliates by selling or purchasing a particular security.

On occasion, and subject to applicable law and applicable governing documents, BlackRock or a related person (including its affiliates or its officers, directors or employees) may purchase investments on behalf of and in anticipation of opening a Private Fund for investment. Such investments are transferred to the Private Fund. Generally, to the extent permitted by law, the Private Fund pays a market rate of interest and purchases the investment at cost. Since prior to transfer, such investments would be owned by BlackRock or a related person, conflicts of interest arise regarding the decision of whether or not to transfer such investments and the timing of such transfers.

BlackRock or a related person, in order to provide initial investment capital, may hold a temporary proprietary interest for a period of time after the inception of an Affiliated Fund. Additionally, BlackRock or a related

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

person may hold a proprietary interest in an Affiliated Fund as a component of BlackRock's compensation program as it applies to certain individuals within any such Affiliated Fund's investment team. BlackRock's or the related person's disposition of such investment can have an impact on the price or liquidity of such Affiliated Fund. With regard to any such investment in a BlackRock US Fund, when BlackRock or the related person disposes of their interest, the shares are generally not permitted to be redeemed in conjunction with a purchase by a client account for which BlackRock serves as advisor.

From time to time, BlackRock, including its affiliates, may invest in a company or otherwise seek to acquire a controlling or non-controlling stake in a company for strategic purposes. Such activity could result in a restriction on the ability of Clients to engage with such company as a counterparty or otherwise invest in such company's securities either at the time of such engagement or at a later date. In addition, BlackRock may take action with respect to its proprietary account(s) that competes or conflicts with the advice an Adviser may give to, or an investment action an Adviser may take on behalf of, a Client. Such activity gives rise to a potential conflict of interest.

Potential Conflicts Relating to Securities Lending Services

Each US Registered Fund, including the ETFs advised by an Adviser, relies on an exemptive order from the SEC permitting it to retain BTC or BIM, as applicable, as an affiliated securities lending agent for a fee as well as lend portfolio securities to affiliated borrowers. The lending agent fee paid to BTC or BIM is generally based on a share of the overall returns from securities lending.

In connection with securities lending activities, BTC or BIM, as applicable, shall, on behalf of a US Registered Fund, invest cash collateral received by the US Registered Fund for such loans, among other things, in certain Affiliated Funds which are a private or US registered money market fund or other cash management vehicle ("Cash Management Affiliated Funds"). If a US Registered Fund acquires shares in a Cash Management Affiliated Fund, shareholders will bear both their proportionate share of the US Registered Fund's expenses and, indirectly, the expense of the Cash Management Affiliated Fund. Such shares will not be subject to a sales load, redemption fee, distribution fee or service fee, or in the case of the shares of an affiliated money market fund, the payment of any such sales load, redemption fee, distribution fee or service fee will be offset by the manager's waiver of a portion of its advisory fee.

Additionally, when BlackRock acts as both Lending Agent and manager of cash collateral for the same client, there is a potential conflict of interest as a Lending Agent may have an incentive to increase the amount of securities on loan to maximize the amount of collateral it manages, instead of maximizing the overall revenue generated for the client from securities lending.

The acceptance of a Cash Management Affiliated Fund as collateral also creates other potential conflicts of interest for the Lending Agent due to the resulting benefit to BlackRock from the creation of a deeper market for the Cash Management Affiliated Fund, and through receiving higher lending fees by being willing to accept such affiliated collateral. In contrast, the client may suffer detriment by receiving less liquid or lower quality collateral, by BlackRock applying preferential lending criteria to such Cash Management Affiliated Funds and as a result of BlackRock, in the event of borrower default, being required to manage the conflict between liquidating the collateral in a timely and efficient manner and limiting the potential impact that this might have on remaining investors in the Cash Management Affiliated Fund.

The Lending Agents are also faced with a number of potential conflicts of interest which can affect the amount of securities lending activity the Lending Agents conduct at any given point in time, impacting clients differently by reducing the volume of lending opportunities for certain types of loans and increasing the volume of lending opportunities for other types of loans. Where there is higher lending supply than borrowing demand, the lending Agents may be incentivized to allocate loans to those clients with whom BlackRock has negotiated a preferential lending agent fee or to those clients with whom BlackRock has a larger relationship. For certain clients, BlackRock also provides an indemnity for any collateral shortfall in the event of a borrower's default. This borrower default indemnification ultimately subjects BlackRock, Inc. to the risk of collateral shortfall upon a borrower default ("shortfall risk"). Management of the shortfall risk may incentivize

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

a Lending Agent to mitigate its risk of incurring losses under the indemnity by preferencing un-indemnified clients over indemnified clients. Such preferential treatment may be achieved by applying different lending criteria (including limits on asset type, collateral type and/or revenue profile) to each of the client types. Additionally, in maintaining the indemnity, BlackRock determines a maximum amount of potential indemnified shortfall risk BlackRock is willing to assume (the “indemnification exposure limit”). If the indemnification exposure limit is approached, a Lending Agent may be incentivized to maximize total program returns by allocating loan opportunities to those clients holding securities which provide higher revenues, while reducing the allocation of loan opportunities to those clients holding securities which provide lower revenues.

From time to time, the Lending Agents will aggregate the securities lending transactions of different clients. Each securities lending client of BlackRock participating in an aggregated loan will participate at the loan or rebate fee negotiated with the borrower for the entire loan.

The Lending Agents’ policy seeks to allocate loan opportunities in a manner that, over time, seeks to approximate the outcome of a pro rata allocation, taking into account which clients have been passed over for previous loan opportunities, which clients have the security available for loan (and the amount available for loan), each client’s applicable legal, tax and credit restrictions, (if applicable) any restrictions imposed by the borrower, and constraints imposed by the client’s custodian or sub-custodian or the relevant securities market. In allocating loan opportunities, the Securities Lending Agents will not consider its lending agent fee or whether any particular client benefit from the aforementioned BlackRock indemnity.

Potential Conflicts Relating to Other Investment Products

Certain Advisers that are domiciled outside of the U.S. serve as investment manager to Foreign iShares ETFs, (those domiciled outside of the U.S.). Certain Foreign ETFs may, from time to time, invest in the securities of the BlackRock-advised ETFs pursuant to a no-action letter issued by the SEC staff. In connection with any proxies solicited by the BlackRock-advised ETFs, the **Foreign ETFs**, if required by applicable law, will either:

- (i) seek instructions from their security holders and vote the proxies in accordance with such instructions (“pass through voting”); or
- (ii) vote the securities in the same proportion as the vote of all other holders of such securities (“mirror voting” or “echo voting”).

However, if these voting methods are unavailable, the Foreign ETFs will either abstain from voting or withhold voting, or if a quorum is reasonably expected to be achieved without any action, refrain from voting.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

BlackRock, Inc. has entered into an arrangement with Markit Indices Limited, the index provider for certain underlying fixed income indexes used by US iShares ETFs, related to derivative fixed-income products that are based on such US iShares ETFs. For such fixed-income derivative products, BlackRock may receive certain payments in connection with their development, for licensing intellectual property belonging to BlackRock and for facilitating data in connection with such fixed-income derivative products, which may include payments based on the trading volumes of, or revenues generated by, the derivative products. Funds and accounts managed by the Advisers may from time to time transact in such fixed-income derivative products. BlackRock will waive any such payments with respect to such derivative products entered into by Affiliated Funds and Affiliated Accounts. Trading activity in the derivative products could potentially lead to increased purchase activity with respect to the US iShares ETFs and increased assets under management for BFA.

The Advisers may create, write or issue derivatives for clients, the underlying securities, currencies or instruments in which an Affiliated Product may invest or which may be based on the performance of the Affiliated Fund. An entity in which BlackRock, Inc. has a significant minority interest will create, write or issue options which may be based on the performance of certain Affiliated Funds or Affiliated Accounts. The Advisers have the right to receive a portion of the gross revenue earned by such entity. Options writing by such entity on an Affiliated Fund could potentially lead to increased purchase activity with respect to the Affiliated Fund and increased assets under management for the Advisers.

Structuring of investments

In certain situations, an Adviser can influence the structure of an underlying portfolio investment for tax or other regulatory purposes. Such structuring may not benefit all Client accounts. The Adviser will seek to structure the underlying portfolio in a way that is fair under the circumstances but there is no guarantee a particular Client account will not be harmed. Under certain circumstances, an Adviser is required to sell or exit an investment on behalf of a Client at the direction of the Client or due to a need for liquidity of a Client, so as to meet the ongoing obligations of the Client. Such transactions potentially are not in the best interests of all Clients and could result in a reduced sales price from current market values.

Pricing and Valuation of Securities and Other Investments

In many cases, BlackRock's fees are based on the value and performance of the assets held in the client account. BlackRock generally does not price securities or other assets for purposes of determining fees. However, to the extent permitted by applicable laws, including ERISA, from time to time, BlackRock or an affiliate will be charged with the responsibility of, or have a role in, determining in good faith asset values with respect to BlackRock products or accounts and BlackRock, or such an affiliate, will be required to price a portfolio holding when a market price is not readily available or when BlackRock has reason to believe in good faith that the market price is unreliable. To the extent BlackRock's fees are based on the value or performance of client accounts, BlackRock would benefit by receiving a fee based on the impact, if any, of the increased value of assets in an account.

When pricing a security, BlackRock attempts, in good faith and in accordance with applicable laws, to determine the fair value of the security or other assets in question. BlackRock generally relies on prices provided by third-party pricing services, custodians, broker-dealers, index providers or other external sources for valuation purposes. When market quotations are not readily available or are believed in good faith by BlackRock to be unreliable, the security or other asset or liability is valued by BlackRock in accordance with BlackRock's valuation procedures. Valuation procedures for certain separate accounts and/or Private Funds are described in the relevant IMA, OM and/or other governing documents. With respect to Funds of Funds and other BlackRock products or accounts which invest in privately placed pooled investment vehicles managed by third parties and/or investments sponsored by such third-party managers, BlackRock generally relies on pricing information provided by the Private Fund or its manager or other service provider. While BlackRock expects that such persons will provide appropriate valuations, such persons face conflicts similar to those described above and certain investments can be complex or difficult to value. BlackRock may also perform its own valuation analysis, but generally will not independently assess the accuracy of such

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

valuations. For certain clients, at the clients' request, BlackRock has agreed to provide "reasonable assistance" involving the valuation of securities. This typically does not include proactively communicating BlackRock's valuation judgments to such clients.

From time to time, BlackRock or an affiliate will be engaged to provide valuation assistance to certain clients with respect to certain securities or other investments. Valuation recommendations made by BlackRock for a client account can differ from the valuations for the same securities or investments assigned by a client's custodian or pricing vendors, especially if such valuations are based on broker-dealer quotes or other data sources unavailable to the client's custodian or pricing vendors. In addition, BlackRock provides a variety of services to clients in connection with the evaluation of certain distressed securities or other assets, including advice relating to the management, retention, restructuring, disposition and valuation of such assets.

In certain instances described below, BlackRock, in good faith based on available information, will determine an asset's fair value using a variety of methodologies. Furthermore, in circumstances where material nonpublic information is available to one group at BlackRock but, consistent with BlackRock's compliance policies and procedures, is not available to all groups at BlackRock, asset valuations used for pricing of underlying investments can be inconsistent. Due to specific time and operational constraints related to the daily calculation of net asset value certain BlackRock-sponsored funds value certain assets that are held in other non-registered funds or other accounts using different pricing sources than are used by other funds and accounts. BlackRock's Global Valuation Methodologies Committee (the "GVMC") reports to and derives its authority from the Valuation Oversight Committee, which consists of senior members of RQA, BRS, Legal & Compliance and other groups at BlackRock. The GVMC is responsible for overseeing valuation and pricing issues impacting BlackRock and its clients, including the design and implementation of pricing controls and the development of valuation policies and procedures.

For certain assets that BlackRock manages on behalf of Clients, pricing and valuation will be unavailable or unreliable, from time to time, due to market dislocations, loss of pricing coverage, or market-making activities by broker-dealers, mergers and liquidations of broker-dealers or pricing vendors that previously supplied pricing data, the distressed nature of certain forced asset sales due to deleveraging transactions, extreme market volatility in certain asset classes, uncertainty surrounding potential or actual government intervention in the markets for certain assets, and other factors that have diminished the timeliness, accuracy or reliability of asset price information. In such circumstances, a client's investments generally will be valued at fair value ("Fair Value Assets"). Fair Value Assets are valued by BlackRock in accordance with BlackRock's valuation procedures or, when held in a BlackRock-sponsored registered investment company, in accordance with valuation procedures approved by the investment company's board of directors/trustees. BlackRock may conclude that a market quotation is not readily available or is unreliable:

- (i) if a security or other asset does not have a price source (e.g., due to technology issues, lack of liquidity, etc.);
- (ii) if BlackRock believes a market quotation from a broker-dealer or other source is unreliable (e.g., where it varies significantly from a recent trade);
- (iii) where the security or other asset is thinly traded;
- (iv) where recent asset sales represent distressed sale prices not reflective of the price that a client would reasonably expect to receive from the current sale of that asset in an arm's-length transaction; or
- (v) where there is a significant material event subsequent to the most recent market quotation. BlackRock's good faith judgment as to whether an event would constitute a "significant event" likely to cause a material change in an asset's market price may, in hindsight, prove to be incorrect, and the fair value determination made by BlackRock may be incorrect as to the direction and magnitude of any price adjustment when compared to the next available market price.

Item 11. Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

In circumstances where BlackRock typically relies on a valuation provided by a third-party, if the third-party fails to provide a valuation, or if BlackRock believes such valuation is not representative of fair value, BlackRock will determine fair value in good faith in accordance with its valuation policies and procedures.

On a date when the New York Stock Exchange ("NYSE") is open and the primary exchange on which a foreign asset is traded is closed, such asset will generally be valued using the prior day's price, provided that BlackRock is not aware of any significant event or other information that would cause such price to no longer reflect the fair value of the asset. In such case the asset would be treated as a Fair Value Asset.

BlackRock will submit its recommendations regarding the valuation and/or valuation methodologies for Fair Value Assets to BlackRock's GVMC or a subcommittee thereof. The GVMC or its subcommittee will accept, modify, or reject the recommendations. BlackRock's Pricing Group periodically endeavors to confirm the prices it receives from all third-party pricing services, index providers and broker-dealers, and, with the assistance of BlackRock's portfolio managers, to regularly evaluate the values assigned to the securities and other assets held by Clients. The pricing of all Fair Value Assets is subsequently reported to the GVMC or a subcommittee thereof with appropriate oversight from the BlackRock's Valuation Oversight Committee and, in the case of assets held in BlackRock US Funds, reviewed and/or ratified by a BlackRock US Fund's board or a committee thereof.

When determining the price for a Fair Value Asset, BlackRock seeks to determine the price that a client would reasonably expect to:

- (i) receive upon the current sale of the security or asset; or
- (ii) pay to transfer the liability associated with the security or asset in an orderly arm's-length transaction between market participants on the date on which the security or asset is being valued.

The price generally will not be determined based on what a client would reasonably expect to receive for selling an asset at a later time or if it holds the asset to maturity. Fair value determinations will be made in good faith and will be based upon all available factors that BlackRock deems relevant at the time of the determination, and it can be based on analytical values determined by BlackRock using proprietary or third-party valuation models such as the Black-Scholes Option Pricing model. Nevertheless, the models and/or underlying valuation assumptions utilized by BlackRock may potentially not correctly capture the fair value of an asset, which could impact the cost paid or proceeds realized by a client upon the purchase or disposition of the asset. BlackRock's fair value determinations may differ from those made by other advisers for the same security.

Fair value represents a good faith approximation of the value of a security. In retrospect, the fair value of one or more securities can differ from the price at which those assets could have been sold during the period in which the particular fair values were used in determining a client's asset value for performance or fee calculation purposes or, in the case of registered investment companies or other pooled investment vehicles, net asset value per share or unit on purchases and redemptions. For investment companies and other pooled investment vehicles, the sale or redemption of its shares or units at net asset value, at a time when a holding or holdings are valued at fair value, can have the effect of diluting or increasing the economic interest of existing investors and result in a purchasing or redeeming investor receiving too few shares/units or too little cash.

BlackRock will communicate its valuation information or determinations to a client's custodian and/or fund accountants as reasonably requested. There may be instances where the client's custodian, pricing vendors or fund accountants assign a different valuation to a security or other investment than the valuation for such security or investment determined or recommended by BlackRock.

Item 12. Brokerage Practices

As a general rule, each Adviser receives discretionary (or non-discretionary) investment authority from its clients at the outset of an advisory relationship. Subject to the terms of the applicable IMA, the Adviser's authority often includes the ability to select brokers and dealers through which to execute transactions on behalf of its clients, and to negotiate the commission rates, if any, at which transactions are effected. In making decisions as to which securities or instruments are to be bought or sold and the amounts thereof, each Adviser is guided by the mandate selected by the client and any client-imposed guidelines or restrictions. In some cases, pursuant to the advisory relationship, each Adviser has the authority to enter into an over-the-counter derivative relationship and transaction related documentation, repurchase agreements, futures and cleared derivatives agreements, listed options agreements, prime brokerage and securities lending agreements, securities forward agreements and other brokerage and/or trading agreements in connection with the trading of certain securities or instruments.

Please refer to Item 11 ("Code of Ethics, Participation or Interest in Client Transactions and Personal Trading") of this Brochure for a discussion of conflicts associated with the making of decisions as to which securities or instruments are to be bought or sold and the amounts thereof, including the handling of competing orders and trade aggregation.

The applicable Client IMA or other contractual arrangement or the offering document an Affiliated Fund may also include additional information about the implementation of portfolio decisions, allocation of investment opportunities, trade aggregation, and potential conflicts of interest generally, which relate specifically to that Client account of Affiliated Fund.

Selection of Brokers, Dealers and Other Trading Venues and Methods

The overriding consideration in allocating client orders for execution is the maximization of client profits (or minimization of losses) through a combination of controlling transaction costs (including market impact) and seeking the most effective uses of a broker's capabilities. When an Adviser has the authority to select brokers or dealers to execute transactions for its clients, it seeks to obtain the best execution reasonably available under the circumstances (which may or may not result in paying the lowest available brokerage commissions or spread). In so doing, the Adviser considers all factors it deems relevant. Such factors are typically either venue specific or transaction specific and may include, but not be limited to:

Venue Specific:

- (i) execution capability including speed of execution, quality of communication links to BlackRock, clearance and trade settlement history and capability and ratio of complete versus incomplete trades;
- (ii) ability to handle large trades in securities having limited liquidity without undue market impact and ability to provide liquidity (as principal, agent or otherwise);
- (iii) access to market liquidity and quotation sources;
- (iv) financial condition of the counterparty, including reputation and creditworthiness;
- (v) responsiveness and reliability in executing trades, keeping records and accounting for and correcting administrative errors;
- (vi) ability to maximize price improvement opportunities, including the ability to provide ad hoc information or services; and
- (vii) ability to comply with all regulatory requirements.

Transaction Specific:

- (i) price and overall cost of the transaction, including any related credit support;
- (ii) the size, type and timing of the transaction;
- (iii) existing and expected activity in the market for the security, including any trading patterns of the security and the particular marketplace;
- (iv) nature and character of the security or instrument and the markets on which it is purchased or sold;
- (v) value of research provided, if permitted under applicable law or regulation;
- (vi) fund or portfolio objectives or client requirements (if permissible), as applicable;
- (vii) if applicable, client-directed brokerage arrangements; and
- (viii) applicable execution venue factors.

BlackRock performs multiple types of monitoring to maintain order execution arrangements that remain suitable for the purpose of delivering the best client outcomes consistently over time. Some aspects of monitoring take place at the level of the transaction, where appropriate, and some monitoring is done on larger samples to make the monitoring statistically meaningful. The key types of monitoring include transaction cost analysis, compliance monitoring and governance committee oversight. The specific scope and content of monitoring varies depending on the data that is available for the relevant asset class in the market.

When deemed appropriate by the Adviser and subject to the applicable IMA or contractual arrangements and investment guidelines, an Adviser will enter into derivatives transactions (including but not limited to futures, swaps, options and currency forward contracts) on behalf of a Client. Counterparties to these derivatives transactions are selected based on a number of factors, including but not limited to credit rating, execution prices, execution capability with respect to complex derivative structures and other criteria relevant to a particular transaction.

The Advisers endeavor to be aware of current charges assessed by relevant broker-dealers and to minimize the expense incurred for effecting portfolio transactions, to the extent consistent with the interests and policies of client accounts. However, the Advisers will not select broker-dealers solely on the basis of “posted” commission rates nor always seek in advance competitive bidding for the most favorable commission rate applicable to any particular transaction. Although the Advisers generally seek competitive commission rates, they will not necessarily pay the lowest commission or commission equivalent as transactions that involve specialized services on the part of a broker-dealer generally result in higher commission rates or equivalents than would be the case with more routine transactions. The Advisers may pay higher commission rates to those brokers whose execution abilities, brokerage or research services or other legitimate and appropriate services are particularly helpful in seeking good investment results and are consistent with applicable law and contractual arrangements.

The reasonableness of commissions is based on an Adviser’s view of the broker’s ability to provide professional services, competitive commission rates, research and other services which will help an Adviser in providing investment advisory services to its clients, viewed in terms of either the particular transaction or the Adviser’s overall responsibility to its clients, as the extent to which the commission rate or net price associated with a particular transaction reflects the value of services provided often cannot be readily determined. In making these determinations, the Adviser recognizes that some firms are better at executing some types of orders than others and it can be in the clients’ best interests to use a broker whose commission rates are not the lowest but whose executions and other services the Adviser believes are likely to result in lower overall transaction costs or more favorable or more certain results.

Unless inconsistent with the Adviser's duty to seek best execution, an Adviser at times directs a broker to execute a trade and "step out" a portion of the commission in favor of another broker that provides brokerage or research related services to BlackRock as described above. An Adviser also at times uses step out transactions in fulfilling a client-directed brokerage arrangement, to allow for an order to be aggregated, or for regulatory or other purposes. However, BlackRock does not enter into agreements with, or make commitments to, any broker-dealer that would bind BlackRock to compensate that broker-dealer, directly or indirectly, for client referrals or sales efforts through placement of brokerage transactions; nor will BlackRock use step out transactions or similar arrangements to compensate selling brokers for their sales efforts. The BlackRock US Funds have adopted procedures pursuant to Rule 12b-1(h) under the Investment Company Act which provide that neither the funds nor BlackRock are permitted to direct brokerage in recognition of the sale of fund shares. Consistent with those procedures, BlackRock does not consider sales of shares of BlackRock US Funds as a factor in the selection of brokers or dealers to execute portfolio transactions. However, whether or not a particular broker or dealer sells shares of BlackRock US Funds neither qualifies nor disqualifies such broker or dealer to execute transactions for those funds.

From time to time an Adviser places client transactions through an ECN or other electronic systems or ATS or with brokers or dealers that participate in such systems, including some in which BlackRock, from time to time and in accordance with applicable law, will have an ownership or financial interest. An Adviser uses these systems only when consistent with its relevant policies and procedures and the duty to seek best execution.

Trade Reporting

Certain client transactions are subject to reporting requirements with regulators within the United States and in jurisdictions outside of the United States. Brokers, dealers and other counterparties to such client transactions as well as market participants such as clearing houses, trading platforms or affirmation platforms may be required to report details of such client transactions to a trade repository and/or to relevant regulators, and such disclosures could result in certain client transaction data becoming available to the public.

Research and Soft Dollars

From time to time and consistent with applicable law and regulatory guidance, The Advisers will select broker-dealers that furnish Advisers and Clients or their affiliates or personnel, directly or through third-party or correspondent relationships, with research or execution services that provide, in the Advisers' view, lawful and appropriate assistance in the investment decision-making or trade execution processes (including such processes with respect to futures, fixed-price offerings, and over-the-counter transactions). The Advisers, excluding BIL, may use trading commissions to acquire research or execution services from broker-dealers in addition to the execution of trades known as "soft dollar" arrangements. Under the European Union's Markets in Financial Instruments Directive, effective January 3, 2018, BIL has elected to pay for research from brokers-dealers and third-party research providers directly out of its own resources, rather than through soft dollar arrangements.

Subject to the duty to seek best execution, research or brokerage services obtained with client commissions or through soft dollar arrangements include, without limitation and to the extent permitted by applicable law and regulation:

- (i) research reports on companies, industries and securities;
- (ii) economic and financial data;
- (iii) financial publications; and
- (iv) quantitative analytical software.

Services that can be acquired will be either proprietary (*i.e.*, created and provided by the broker-dealer) or third-party. In such soft dollar arrangements, an Adviser could pay, or be deemed to have paid, commission

rates higher than it could have otherwise paid in order to obtain such research or brokerage services. Such higher commissions would be paid in accordance with Section 28(e) of the Exchange Act as interpreted by the SEC and its staff, which requires the Adviser to determine in good faith that the commissions paid are reasonable in relation to the value of the research or brokerage services received. Such Advisers believe that using commission dollars to obtain the type of research and brokerage services mentioned above help enhance their investment research and trading processes. Research products or brokerage services received by an Adviser might also be used for functions that are not research or brokerage related. Where a research product or brokerage service has a mixed use, the Adviser will make a reasonable allocation according to its use and will pay for the non-research and brokerage function in cash using its own funds. The receipt of such products and services and the determination of the appropriate allocation create a potential conflict.

While research or brokerage services obtained in this manner can be used in servicing any or all of an Adviser's client accounts, such products and services tend to disproportionately benefit one or more clients relative to others based on the amount of brokerage commissions paid, the nature of the research or brokerage products and services acquired and their relative use or value for particular accounts. For example, in some cases, the research or brokerage services that are paid through a client's commissions might not be used in managing that client's account. In addition, other Clients could receive the benefit, including disproportionate benefits, of economies of scale or price discounts in connection with products and services provided as a result of transactions executed on behalf of a client account for which such products and services are also used. To the extent that an Adviser uses client commission dollars to obtain research or brokerage services, it will not have to pay for those products and services itself.

The Advisers, excluding BIL, can also receive research or brokerage services that are bundled with trade execution, clearing, settlement, and/or other services provided by a particular broker-dealer. To the extent an Adviser receives research or brokerage services on this basis, many of the same potential conflicts related to receipt of these services through third-party arrangements exist. For example, the research effectively will be paid by client commissions that also will be used to pay for the execution, clearing, and settlement services provided by the broker-dealer and will not be paid by the Adviser from its own assets.

Access Fees Paid to, and Discounts Provided by, ECNs, Derivatives Clearing Firms and Other Trading Systems

BlackRock also places orders for the purchase and sale of securities or other instructions for certain of its clients through electronic trading systems or ATSSs, including ECNs, derivatives clearing firms, or with brokers or dealers that participate in such trading systems or platforms, consistent with its duty to seek best execution of client transactions. ECNs and derivatives clearing firms charge fees for their services, including access fees, transaction fees and/or clearing fees. Access fees may be paid by BlackRock even though incurred in connection with executing transactions on behalf of clients, while transaction fees and clearing fees generally will be charged to clients and may be included in the cost of the instrument purchased. In certain circumstances, ECNs and derivatives clearing firms offer volume discounts that will reduce the access fees typically paid by an investment adviser. BlackRock expects to qualify for these volume discounts, which have the effect of reducing the access fees paid by BlackRock. Volume discounts achieved by BlackRock may also benefit or be applied to other BlackRock affiliates or their clients.

BlackRock also, from time to time and in accordance with applicable law, makes nominal equity investments in, or enters into financial arrangement with, trading systems or enters into consulting and/or advisory relationships with such electronic trading systems in order to assist in the design and development of such systems. In addition, certain BlackRock employees or employees of affiliates serve as board members or advisory members of ECNs, derivatives clearing firms, and/or other trading systems. Although BlackRock will not accept any payment, commission, rebate, or other compensation that is based on its use of a trading system on behalf of its advisory clients, BlackRock's use of these trading systems would result in some benefit to the trading system and therefore would, in turn, indirectly benefit BlackRock as an investor or party with a financial interest in the trading system.

Directed Brokerage

In certain circumstances, BlackRock accepts direction from clients or agrees to limitations with respect to BlackRock's brokerage discretion as to which brokers or dealers are to be used in effecting transactions for client accounts. Since wrap fees paid by Private Investors and Dual Contract SMA Program clients typically only include commissions on equity transactions executed by a particular broker-dealer (MLPF&S in the case of Private Investors, and the Sponsor in the case of a Dual Contract SMA Program), BlackRock generally requires such clients to direct BlackRock to execute equity transactions at such broker-dealer. Other SMA Program investment advisers may or may not require such direction from their clients.

Clients who direct BlackRock (or whose investment adviser or SMA Program Sponsor directs BlackRock) to use a Designated Broker, or otherwise limit BlackRock's brokerage discretion, should be aware that, this direction can limit BlackRock in obtaining volume discounts on aggregated orders, or in selecting brokers or dealers on the basis of best price and execution. In certain SMA Programs where BlackRock is not directed to use a particular broker-dealer, BlackRock has discretion to select broker-dealers to fulfill its duty to seek best execution for its clients' accounts. However, because brokerage commissions and other charges for equity transactions not effected through the Sponsor can be charged to the client, whereas the wrap fee generally covers the cost of brokerage commissions and other transaction fees on equity transactions effected through the Sponsor, it is likely that most, if not all, equity transactions for clients of such programs will be effected through the Sponsor. In certain instances, the Sponsor requires BlackRock, and not the client, to bear the cost of brokerage commissions and other transaction fees for equity transactions not effected through the Sponsor. In such circumstances, BlackRock will have an incentive to select the Sponsor or, if the Sponsor cannot effect a particular equity transaction, such other broker-dealer with the lowest transaction fees in order to minimize the costs to be borne by BlackRock, which incentive may conflict with BlackRock's duty to seek best execution for its clients' accounts. BlackRock seeks to mitigate this potential conflict of interest by selecting broker-dealers to obtain best execution based on the factors noted above in Item 12 ("Brokerage Practices") under "Brokerage Practices – Selection of Brokers, Dealers and Other Trading Venues and Methods."

BlackRock generally does not monitor or evaluate the nature and quality of the services clients obtain from SMA Program Sponsors or Designated Brokers and it is possible that Sponsor or Designated Brokers provide less advantageous execution of transactions than if BlackRock selected another broker-dealer to execute the transactions. Furthermore, if the Sponsor or Designated Broker is not on BlackRock's approved list of brokers, the client could potentially be subject to additional counterparty credit and settlement risk. As a result, directed brokerage transactions can result in less favorable execution on some transactions than would be the case if BlackRock was free to choose the broker or dealer, potentially resulting in increased costs to the client.

Moreover, clients who direct brokerage can have execution of their orders delayed, since (as discussed above) in certain instances BlackRock will fill directed trades after block trading activity is completed for a particular security. Orders for SMA Program accounts, while generally aggregated with orders for other accounts within the same program that are employing the same investment strategy, typically are not aggregated with transactions for institutional or investment company accounts and can take more time to complete than those effected for institutional or investment company accounts. This is, among other things, because:

- (i) transactions for SMA Program accounts involve substantially greater numbers of accounts than transactions for institutional or investment company accounts and therefore require the use of specialized trading systems to determine the quantity of securities being purchased or sold by each account and which record and confirm each transaction at the individual account level; and

- (ii) equity transactions for accounts in an SMA Program typically are executed at one firm because either:
 - (a) BlackRock is directed to effect such transactions through a Designated Broker; or
 - (b) the fees paid by clients to the program Sponsor typically only include commissions on equity transactions executed by the Designated Broker.

A client who participates in a wrap fee arrangement with an SMA Program Sponsor should consider that, depending on the level of the wrap fee charged by the Sponsor, the amount of portfolio activity in the client's account, the value of the custodial and other services which are provided under the arrangement, and other factors, the wrap fee may or may not exceed the aggregate cost of such services if they were provided separately.

Non-wrap fee paying SMA Program clients are solely responsible for their brokerage arrangements (including negotiating the commission rates payable by their accounts) and BlackRock will effect equity transactions through the client's Designated Broker at the commission rates or spreads agreed to by the client directly with the Designated Broker or at the Designated Broker's standard rate if no specific rate has been negotiated. Such rates may not be the lowest available rates and may not be as low as the rate BlackRock might have obtained if BlackRock had discretion to select the brokerage firm for the transaction.

Non-Discretionary Accounts

If a client has retained an Adviser to manage an account on a non-discretionary basis ("Non-Discretionary Clients"), there is the potential for the Client to be disadvantaged because the Adviser generally must obtain the Non-Discretionary Client's approval prior to effecting investment transactions on their behalf (unless otherwise agreed to with the client). In some instances, Non-Discretionary Clients will not receive notification of proposed trades from the Adviser and/or will not provide consent to such trades until after BlackRock's discretionary accounts have finished trading. Therefore, Non-Discretionary Clients will not always benefit from aggregated or "bunched" orders, resulting in a delay in execution of orders, and resulting in their accounts receiving a price that potentially is less favorable than that obtained for discretionary accounts. In addition, in certain instances, Non-Discretionary Clients are precluded from participating in certain investment opportunities that are available to discretionary clients if BlackRock is unable to obtain the client's consent in a timely fashion. As a result of these and other factors, the performance of non-discretionary accounts can differ from (and be better or worse than) the performance of discretionary accounts following the same investment strategy.

Model-Based SMA Programs

As noted in Item 4 ("Advisory Business") of this Brochure under the section of disclosure headed "Advisory Services – Model-Based SMA Programs," in certain SMA Programs BIM provides non-discretionary investment services (often in the form of model portfolios) to a Sponsor or an OPM, who utilizes such model portfolios in connection with its management of program client accounts. The model portfolios provided to a Sponsor or OPM can, in some circumstances, reflect recommendations being made by BIM contemporaneously to, or investment advisory decisions made contemporaneously for, similarly situated discretionary clients of BIM. As a result, BIM may have already commenced trading before the Sponsor or OPM has received or had the opportunity to evaluate or act on BIM's model portfolios. In this circumstance, trades ultimately placed by the Sponsor or OPM for its clients may be subject to price movements, particularly with large orders or where the securities are thinly traded, that may result in the OPM's clients receiving prices that are less favorable than the prices obtained by BIM for its client accounts. On the other hand, the OPM may initiate trading based on BIM's model portfolios before or at the same time BIM is also trading for its own client accounts. Particularly with large orders or where the securities are thinly traded, this could result in BIM's clients receiving prices that are less favorable than prices that might otherwise have been obtained absent the Sponsor's or OPM's trading activity. BIM takes reasonable steps to attempt to minimize the market impact of the recommendations provided to the Sponsor or OPM on accounts for which BIM exercises investment discretion. However, because BIM does not control the Sponsor's or OPM's execution of

transactions for the Sponsor's or OPM's client accounts, BIM cannot affect the market impact of such transactions to the same extent that it is able to for its discretionary client accounts.

Portfolio Trading Upon Receipt of Notice of Contribution or Withdrawal

Unless otherwise agreed with a separate account client, following the initial funding of the client's account, upon receipt of a Contribution Notice detailing the Client's intended money movement to or from the account, the Advisers can place trade orders in reliance on the Contribution Notice and, in the case of a contribution of assets, before confirming with the custodian that the account has received the assets. Such clients should ensure that they contribute the assets specified in a Contribution Notice to their accounts by the date specified in the Contribution Notice.

Changes to BlackRock's Brokerage Arrangements

An Adviser may choose, from time to time, to alter or not to engage in the above described arrangements to varying degrees, without notice to Clients, to the extent permitted by applicable law and the applicable client agreement.

Item 13. Review of Accounts

BlackRock periodically reviews client accounts and provides reports to clients regarding their accounts. The nature and frequency of these reviews, as well as the frequency and content of these reports, is discussed in more detail below.

Nature and Frequency of Client Account Review

Depending on the nature of an institutional client's portfolio, the client's own monitoring capabilities, the type of advice and the arrangements made with the client, BlackRock's frequency of client account reviews ranges from daily to quarterly. The level of review can encompass the client's portfolio, a section of the portfolio, or a specific transaction or investment. Additional reviews can be triggered by changes in the investment objectives or guidelines of a particular client or specific arrangements with particular clients. The frequency, depth, and nature of reviews are often determined by negotiation with individual clients pursuant to the terms of each client's written IMA or by the mandate selected by the client and the particular needs of each client. Reviews typically are conducted by portfolio management and account management personnel. BlackRock holds periodic staff meetings to determine the timing, level and focus of specific client reviews and to review the appropriateness of the review already completed.

Private Investors and other SMA Program accounts (and related Model Guidelines and target portfolios) are reviewed on an ongoing basis by BlackRock. Reviews are conducted with the help of computer support systems on an account-by-account basis and on security-holdings and performance-exception basis. Reviews are conducted to determine if an account's holdings are consistent with the client's selected investment strategy and restrictions imposed by the client. In addition to the assigned portfolio management team, certain representatives of BlackRock's risk management groups periodically spot check accounts and target portfolios to review performance and relevant investment guidelines.

Frequency and Content of Client Account Reports

The frequency and content of reports for institutional clients vary according to the particular needs of each client and the agreement between the client and Adviser. Such reports generally contain information with respect to portfolio holdings, transactions, and performance. Reporting for SMA Program clients varies according to the service or program in which the client is enrolled. Private Investors clients typically receive a quarterly account performance report. Clients in SMA Programs sponsored by other firms should contact the Sponsors for information regarding reports provided to their program clients.

Item 14. Client Referrals and Other Compensation

Payments to BlackRock by a Non-Client in Connection With Advice Provided to a Client

Certain retirement and/or pension plan Sponsors will pay management fees in connection with advice provided by BlackRock to such plan directly to BlackRock instead of having the management fee deducted from the retirement or pension plan assets.

Endorsement, Introduction or Placement Arrangements

With respect to third-party endorsement arrangements, the Advisers Act requires that, among other things, subject to certain exceptions, compensation to a promoter be made pursuant to a written agreement and that the promoter provide a written disclosure statement (the “Promoter’s Disclosure Statement”) to each person to whom BlackRock’s or a third-party firm’s advisory services are endorsed at the time an endorsement is disseminated. The Promoter’s Disclosure Statement contains important information with respect to an endorsement to disclose, among other things:

- (i) clearly and prominently:
 - (a) that the endorsement was given by a person other than a current client or investor;
 - (b) that cash or non-cash compensation was provided for the endorsement, if applicable; and
 - (c) a brief statement of any material conflicts of interest on the part of the promoter giving the endorsement resulting from BlackRock’s or a third-party firm’s relationship with such promoter;
- (ii) the material terms of any compensation arrangement, including a description of the compensation provided or to be provided, directly or indirectly, to the promoter for the endorsement; and
- (iii) a description of any material conflicts of interest on the part of the promoter giving the endorsement resulting from BlackRock’s or a third-party firm’s relationship with such promoter and/or any compensation arrangement.

These Promoter’s Disclosure Statements should be reviewed carefully by prospective clients.

Private Fund Placements/Introductions

From time to time, BlackRock compensates certain affiliated and unaffiliated persons or entities for client referrals or introductions to BlackRock or placements of interests in Private Funds, in compliance with applicable law, including circumstances where, in connection with discrete advisory transactions, BlackRock or an affiliate will pay or split a portion of the fees with an unaffiliated third-party for assisting in obtaining a specific client. The material terms of such arrangements will be disclosed to relevant clients or investors. BlackRock informs each Private Fund Investor that is the subject of such placement services that the third-party placement agent will be compensated by the Investor, the Private Fund or BlackRock, as the case may be. The name of the third-party providing the services also is disclosed to each relevant Private Fund Investor, along with the nature of any affiliation between the third-party and BlackRock. From time to time, investors also will be introduced to a Private Fund by the Private Fund’s prime broker. Because an increase in the size of a Private Fund would likely result in additional compensation to the prime broker, the prime broker receives a benefit from such introductions.

Endorsements by BlackRock

BlackRock participates in endorsement arrangements through which BlackRock receives compensation in the form of endorsement fees for endorsing third-party firms' investment advisory services to certain clients and prospects. The compensation BlackRock receives is typically a portion of the gross revenue of the third-party advisor and may vary depending on the type of agreement or nature of the services provided. A description of such compensation and other relevant information, including certain conflicts of interest pertaining to the endorsement arrangement is contained in BlackRock's Promoter's Disclosure Statement.

Endorsements and Other Compensation by Third Parties or Their Employees

Third-party advisors, such as MLPF&S Financial Advisors, and/or other employees of third-party firms typically receive compensation from BlackRock in the form of endorsement fees for endorsing BlackRock's investment advisory services to SMA clients and other separate account clients. A description of such compensation and other relevant information pertaining to the endorsement arrangement is contained in the third-party advisor's Promoter's Disclosure Statement.

Third-party advisory firms and/or their employees also may receive compensation from the third-party advisory firm's broker-dealer affiliates based on the commissions paid by BlackRock's SMA clients (depending on their individual fee selection) in connection with equity security transactions executed by the third-party advisor's broker-dealer affiliate (such as MLPF&S). Such clients may have materially different commission rate schedules with the third-party advisor's broker-dealer, even though their SMA accounts may be following the same investment strategy and/or may have substantially similar trading patterns. Therefore, SMA clients who pay commissions on trades should contact their third-party advisor or sales representative to discuss and/or negotiate the commission rates payable by their accounts. The amount of compensation paid to third-party broker-dealer employees whose clients retain BlackRock to manage their assets and pay a wrap fee may be more than what the employees would receive if the clients had paid separately for advisory, brokerage and other services. Therefore, third-party advisor employees may have a financial incentive to recommend certain services or programs over other services or programs.

Placement Arrangements

Certain BlackRock affiliates, such as BRIL in the U.S., serve as the appointed distributor to many of the iShares/BlackRock ETFs. In this capacity, the BlackRock affiliates contract with authorized participants (also called participating dealers in some jurisdictions) to facilitate the creation and redemption of the iShares/BlackRock ETFs. In the U.S., these activities may be deemed participation in a distribution of the iShares/BlackRock ETFs for statutory purposes.

Promotional and Educational Cost Reimbursements

From time to time and consistent with BlackRock policy and applicable regulation, BlackRock also pays for, or reimburses broker-dealers to cover, various costs arising from, or activities that may result in, the sale of advisory products or services, including:

- (i) client and prospective client meetings and entertainment;
- (ii) sales and marketing materials;
- (iii) educational and training meetings or entertainment activities with the registered representatives of such broker-dealers and other personnel from entities that distribute BlackRock's products and/or services; and
- (iv) charitable donations in connection with events involving personnel or clients of entities that distribute BlackRock's products and/or services.

Item 15. Custody

BlackRock may be deemed to have custody of its clients' assets including, without limitation, because certain clients authorize BlackRock to receive its advisory fees out of the assets in such clients' accounts by sending invoices to the respective custodians of those accounts. BlackRock may also be deemed to have limited custody of its client's assets where BlackRock has authority to disburse client funds to a third-party on the client's behalf, pursuant to a standing letter of instruction. Such clients generally will receive account statements directly from their third-party custodians for the accounts and should carefully review these statements. Such clients should contact BlackRock immediately if they do not receive account statements from their custodian on at least a quarterly basis. As noted in Item 13 ("Review of Accounts") of this Brochure, the frequency and content of reports provided by BlackRock to clients vary according to the particular needs of each client and the agreement between the client and the Adviser. Clients should compare any reports provided by BlackRock with the account statements received from the custodian, without limitation, advisory fee deductions and transfers to a third-party pursuant to a standing letter of instruction. If clients discover any discrepancy between the account statement provided by BlackRock and the account statement provided by the custodian, then they should contact BlackRock immediately.

BlackRock also could be deemed to have custody of certain Private Funds advised by an Adviser for which it or an affiliate serves as managing member or general partner. In addition, BlackRock may be deemed to have custody of certain special purpose vehicles for which an Adviser or an affiliate serves as managing member or general partner (or similar role) and through which certain clients (including Private Funds and separate account clients) make one or more investments. Investors in such Private Funds or special purpose vehicles generally will receive the vehicle's annual audited financial statements. Such Investors should review these statements carefully. If investors in the Private Funds or special purpose vehicles do not receive audited financial statements in a timely manner (120 days for most Private Funds and special purpose vehicles and 180 days for Private Funds that are Funds of Funds), then they should contact BlackRock immediately.

To the extent that a Private Fund or special purpose vehicle for which BlackRock is deemed to have custody does not provide Investors with its annual financial statements as described above, such Investors will instead receive quarterly account statements from the qualified custodian of such Private Fund or special purpose vehicle and should contact BlackRock immediately if they fail to receive such account statements.

Item 16. Investment Discretion

As a general rule, each Adviser receives discretionary (or non-discretionary) investment authority from its clients at the outset of an advisory relationship. Depending on the terms of the applicable IMA, the Adviser's authority could include the ability to select brokers and dealers through which to execute transactions on behalf of its clients, and to negotiate the commission rates, if any, at which transactions are effected. In making decisions as to which securities are to be bought or sold and the amounts thereof, each Adviser is guided by the mandate selected by the client and any client-imposed guidelines or restrictions. Unless the Adviser and the client have entered into a non-discretionary arrangement, the Adviser generally is not required to provide notice to, consult with, or seek the consent of its clients prior to engaging in transactions. Please see Item 12 ("Brokerage Practices") of this Brochure for more information.

Item 17. Voting Client Securities

US Registered Funds and certain Private Funds managed by BlackRock have delegated the authority to vote proxies to BlackRock. From time to time, institutional, SMA Program, and other clients will give BlackRock or its designee the authority to vote proxies relating to securities held in their accounts by granting such authority in IMAs. Consistent with applicable rules under the Advisers Act, BlackRock has adopted and implemented written proxy voting policies and procedures (“Proxy Voting Guidelines”) that are reasonably designed:

- (i) to vote proxies, consistent with its fiduciary obligations, in the long-term economic interests of clients; and
- (ii) to prevent conflicts of interest from influencing proxy voting decisions made on behalf of clients.

Nevertheless, when votes are cast in accordance with the Proxy Voting Guidelines and in a manner that BlackRock believes to be consistent with its fiduciary obligations, actual proxy voting decisions made on behalf of one client can have the effect of favoring or harming the interests of other clients, BlackRock, or its affiliates.

BlackRock provides proxy voting services as part of its investment management service to client accounts and does not separately charge a fee for this service. This function is executed by a team of dedicated BlackRock employees without sales responsibilities (the “Investment Stewardship Group”), which is considered an investment function. BlackRock maintains regional oversight committees (“Stewardship Advisory Committees”) comprising senior BlackRock investment professionals for the following regions: Americas; Europe, Middle East and Africa; and Asia Pacific. The Stewardship Advisory Committees review and advise on amendments to BlackRock’s Proxy Voting Guidelines covering markets within each respective region. The Global Head of Investment Stewardship (“Global Head”) leads the Investment Stewardship Group to carry out engagement, voting, and vote operations in a manner consistent with the relevant Stewardship Advisory Committee’s mandate. Changes to the Proxy Voting Guidelines are also reviewed and approved by the Investment Stewardship Global Oversight Committee, which also oversees the Global Principles. In conjunction with portfolio managers, the Investment Stewardship Group engages companies in discussions of significant governance issues, conducts research on corporate governance issues and participates in industry discussions to keep abreast of the field of corporate governance.

The Investment Stewardship Group, or vendors overseen by the Investment Stewardship Group, also monitor upcoming proxy votes, execute proxy votes and maintain records of votes cast. The Investment Stewardship Group has adopted policies and procedures to provide ongoing oversight of any vendors used to vote proxies in the best interest of clients. An outside vendor is used by the Investment Stewardship Group for record keeping and vote execution, sometimes including pre-population of ballots or automated voting using BlackRock’s Proxy Voting Guidelines. These services are used to assist our Investment Stewardship Group in making vote recommendations for a subset of our positions:

- (i) on routine management proposals that are clearly addressed by our Proxy Voting Guidelines; and
- (ii) for issuers where BlackRock holds a small position.

Meetings with proposals related to capital allocations, or for issuers identified as facing material governance or sustainability risks including climate risk, are systematically excluded from automated voting and are voted manually by the Investment Stewardship Group. Vendor recommendations based on the BlackRock Proxy Voting Guidelines can be overridden at any time prior to the vote deadline, and are regularly reviewed by the Investment Stewardship Group. Both BlackRock and its vendor actively monitor securities filings, research reports, issuer announcements and direct communications from issuers to ensure awareness of supplemental disclosures and proxy materials that may require modification of votes. BlackRock’s vendor’s performance is reviewed on a periodic basis.

The Investment Stewardship Group will refer complicated or particularly controversial matters or discussions to the appropriate investors for their review, discussion, and guidance prior to making a voting decision.

BlackRock votes (or outsources, transfers or refrains from voting) proxies for each client for which it has voting authority based on BlackRock's evaluation of the long-term economic interests of shareholders, in the exercise of its independent business judgment, and without regard to the relationship of the issuer of the proxy (or any dissident shareholder) to the client, the client's affiliates (if any), BlackRock, or BlackRock's affiliates.

When exercising voting rights, BlackRock will normally vote on specific proxy issues in accordance with the Proxy Voting Guidelines for the relevant market. From time to time, the Investment Stewardship Group will conclude, in the exercise of their business judgment, that the Proxy Voting Guidelines do not cover the specific matter upon which a proxy vote is requested or that an exception to the Proxy Voting Guidelines would be in the best long-term economic interests of BlackRock's Clients. The Proxy Voting Guidelines are reviewed regularly and are amended consistent with changes in the local market practice, as developments in corporate governance occur, or as otherwise deemed advisable by BlackRock's Stewardship Advisory Committees.

In certain markets, proxy voting involves logistical issues which can affect BlackRock's ability to vote such proxies, as well as the desirability of voting such proxies. These issues include but are not limited to:

- (i) untimely notice of, shareholder meetings;
- (ii) restrictions on a foreigner's ability to exercise votes;
- (iii) requirements to vote proxies in person;
- (iv) "share blocking" (requirements that investors who exercise their voting rights surrender the right to dispose of their holdings for some specified period in proximity to the shareholder meeting);
- (v) potential difficulties in translating the proxy;
- (vi) requirements to provide local agents with unrestricted powers of attorney to facilitate voting instructions; and
- (vii) regulatory or contractual threshold constraints.

As a consequence, BlackRock votes proxies only on a "best-efforts" basis. In addition, the Investment Stewardship Group will in some circumstances determine that it is in the best interests of Clients not to vote proxies if it determines that the costs (including but not limited to opportunity costs associated with share blocking constraints) associated with exercising a vote are expected to outweigh the benefit the client will derive by voting on the issuer's proposal.

Portfolio managers retain full discretion to vote the shares in the accounts they manage based on their analysis of the economic impact of a particular ballot item. Portfolio managers from time to time legitimately will reach differing but equally valid views, for their funds and the client assets in those funds, on how best to maximize economic value in respect of a particular investment. In certain circumstances, the portfolio manager of an account, in consultation with the Investment Stewardship Group, will determine that the specific circumstances of an account require that account's proxies be voted differently due to such account's investment objective or other factors that differentiate it from other accounts. However, because Clients are mostly long-term investors with long-term investment goals, ballots are frequently cast in a uniform manner for all Clients.

BlackRock maintains policies and procedures that are designed to prevent undue influence on BlackRock's proxy voting activity that stems from any relationship between the issuer of a proxy (or any dissident shareholder) and BlackRock, BlackRock's affiliates, a fund or a fund's affiliates. BlackRock manages most conflicts through the structural separation of the Investment Stewardship Group from employees with sales

responsibilities. In certain instances, BlackRock will determine to engage an independent third-party voting service provider to make proxy voting recommendations as a further safeguard to avoid potential conflicts of interest or as otherwise required by applicable law. Use of a voting service provider has been adopted for votes related to any company that is affiliated with BlackRock, or other situations that could give rise to a potential conflict of interest.

With respect to fixed income securities or the securities of privately held issuers, proxy voting decisions generally will be made by the portfolio manager of an account or private fund and/or the Investment Stewardship Group based on their assessment of the particular transactions or other matters at issue.

Certain business units of BlackRock, Inc. maintain proxy voting policies and procedures that are applicable to their specific business units and are separate from the proxy voting policies and procedures applicable to other BlackRock business units and the Investment Stewardship Group. A summary of these policies and procedures are available to clients of those business units upon request.

Clients that have not granted BlackRock voting authority over securities held in their accounts will receive their proxies in accordance with the arrangements they have made with their service providers. BlackRock generally does not provide proxy voting recommendations to clients who have not granted BlackRock voting authority over their securities.

With regard to the relationship between securities lending and proxy voting, BlackRock's approach is driven by its clients' economic interests. The evaluation of the economic desirability of voting proxies for securities that are on loan involves balancing the likely economic significance of voting those securities against the revenue-producing value of the loan. Based on BlackRock's evaluation of this relationship, we believe that generally the likely value of casting most votes is less than the securities lending income, either because the votes will not have significant economic consequences or because the outcome of the vote would not be affected by the Adviser recalling loaned securities in order to ensure they are voted. In certain instances, however, BlackRock in its discretion will determine that the value of voting outweighs the cost of recalling shares, and thus recall shares to vote in that instance.

BlackRock will provide clients, upon request, a copy of the Proxy Voting Guidelines, which is also available at: <https://www.blackrock.com/corporate/literature/fact-sheet/blk-responsible-investment-engprinciples-global.pdf>- ("Global Corporate Governance Guidelines & Engagement Principles"). BlackRock also will provide clients, upon request with information regarding how BlackRock voted their proxies. Except with respect to U.S. Private Funds and Sub-Advised Funds where disclosure is mandated by SEC rules, BlackRock will not disclose how it voted for a client to third parties, unless specifically requested, in writing, by the client. However, where BlackRock serves as a sub-adviser to another adviser to a client, BlackRock will be deemed to be authorized to provide proxy voting records with respect to such accounts to that adviser. In addition, information on how BlackRock voted proxies for certain BlackRock US Funds can be found at: <https://www.blackrock.com/corporate/about-us/investment-stewardship#engagement-and-voting-history> - ("Investment Stewardship Annual Report" and "Stewardship Statistics").

Item 18. Financial Information

Not Applicable.

GLOSSARY

3(c)(1) Funds: Private Funds that are offered to U.S. Persons and are excepted from the definition of an investment company pursuant to Section 3(c)(1) of the Investment Company Act

3(c)(7) Funds: Private Funds that are offered to U.S. Persons and are excepted from the definition of an investment company pursuant to Section 3(c)(7) of the Investment Company Act

Advisers: Wholly-owned direct and indirect subsidiaries of BlackRock, Inc., registered as investment advisers with the SEC (Listed on Page 1 of this Brochure).

Advisers Act: Investment Advisers Act of 1940, as amended

Affiliated Accounts: Portfolios managed by the Advisers that are not Affiliated Funds.

Affiliated Funds: “US Registered Funds” or other pooled investment vehicles (including Private Funds) for which the Advisers serve as investment adviser or sub-adviser

ATS: Alternative Trading System

BAL: BlackRock Advisors, LLC

BALUK: BlackRock Advisors (UK) Limited

BAMNAL: BlackRock Asset Management North Asia Limited

BAMS: BlackRock Asset Management Schweiz AG

BCM: BlackRock Capital Management, Inc.

BES: BlackRock Execution Services

BFA: BlackRock Fund Advisors

BFM: BlackRock Financial Management, Inc.

BIL: BlackRock International Limited

BIM: BlackRock Investment Management, LLC

BIS: BlackRock Index Services, LLC

BIS Index: Index developed by BlackRock Index Services, LLC

BlackRock: BlackRock, Inc. together with its subsidiaries

BlackRock Australia: BlackRock Investment Management (Australia) Limited

BlackRock Group: Collectively, BlackRock and its directors, managers, members, officers, and employees

BlackRock Japan: BlackRock Japan Co., Ltd.

BlackRock US Funds: the BlackRock Multi-Asset Complex (consisting of various open-end mutual funds, including variable insurance funds and money market funds serving the institutional and retail market, and ETFs), the BlackRock Fixed-Income Complex (consisting of publicly traded closed-end investment companies and various open-end investment companies, including variable insurance funds and ETFs) and the US iShares ETF Complex (consisting of ETFs)

BRIL: BlackRock Investments, LLC

BRS: BlackRock Solutions®

BSL: BlackRock (Singapore) Limited

BTC: BlackRock Institutional Trust Company, N.A.

CEA: Commodity Exchange Act

CFTC: U.S. Commodities Futures Trading Commission

CMG: BlackRock's Cash Management Group

Clients: Investment management clients of BlackRock, Inc. and its subsidiaries, including Affiliated Funds

Conduct Code –BlackRock's Code of Business Conduct and Ethics

Contribution Notice: Notice or instruction from a client to an Adviser regarding a contribution of assets to a separate account

Dodd-Frank: Dodd-Frank Wall Street Reform and Consumer Protection Act

DOL: U.S. Department of Labor

Designated Broker: A particular broker or dealer BlackRock has been directed to use by a client, the client's investment adviser or SMA Program Sponsor

ECN: Electronic Communication Network

eFront: eFront Holding SAS

ERISA: Employee Retirement Income Security Act of 1974, as amended

ETFs: Exchange-traded funds

Exchange Act: The Securities Exchange Act of 1934, as amended

Fair Value Assets: Assets for which are valued by BlackRock in accordance with BlackRock's valuation procedures or, when held in a BlackRock-sponsored registered investment company, in accordance with valuation procedures approved by the investment company's board of directors.

FINRA: The Financial Industry Regulatory Authority

FMA: BlackRock's Financial Markets Advisory Group

Foreign iShares ETFs: BlackRock's exchange-traded funds domiciled outside of the U.S. that are managed by an Adviser domiciled outside of the U.S.

Funds of Funds: Funds that invest primarily in other affiliated or unaffiliated investment vehicles

GVMC: BlackRock's Global Valuation Methodologies Committee

IMA: Investment Management Agreement

Index Portfolio: A portfolio whose investment objective is to achieve investment results, before fees and expenses that correspond generally to the total return performance of a particular index

Investment Company Act: The Investment Company Act of 1940, as amended

Investment Consultants: Pension or other institutional investment consultants or outsourced chief investment officers

Investment Group: BlackRock's Investment Group

Investor: A particular investor in a Private Fund

iShares/BlackRock ETFs: U.S. and non-U.S. exchange-traded funds managed by an Adviser

LDI: Liability Driven Investing fixed income strategies that are generally offered to defined benefit plan sponsors.

Lending Agents: BIM, BTC and BALUK, each subsidiaries of BlackRock, Inc. that act as securities lending agents

Management Fee-Waived Mutual Funds: Certain US Registered Funds that do not charge management fees (or their fees are waived or reimbursed by the Adviser managing the US Registered Fund), and/or are only eligible for investment by (i) separate accounts managed by an Adviser, (ii) collective trust funds managed by BTC and (iii) other BlackRock US Registered Funds.

MLPF&S: Merrill Lynch, Pierce, Fenner & Smith Incorporated

MASS: Multi-Asset Strategies & Solutions

NFA: National Futures Association

Non-PI SMA Programs: SMA Programs not sponsored by BlackRock

NYSE: New York Stock Exchange

OM: Offering Memorandum

OPM: Overlay portfolio manager

Operating Events –Trade errors and other operational mistakes made in connection with an Adviser’s management of funds and client accounts

PAC: Political Action Committee

PT Policy: BlackRock’s Global Personal Trading Policy.

Private Investors Brochure: Disclosure document which BlackRock Investment Management, LLC makes available to current and prospective Private Investors clients.

Proxy Voting Guidelines: The written proxy voting policies and procedures adopted and implemented by BlackRock

Plans: Plans under Rule 12b-1 under the Investment Company Act

Private Fund: Unregistered investment vehicles excepted from the definition of an “investment company” under the Investment Company Act.

Private Investors: The Private Investors Service, a SMA program sponsored by BIM

Rating Agency: Credit rating agencies, including nationally recognized statistical rating organizations

Research and Digital Services: Impersonal, non-discretionary portfolio research services and digital tools and analysis

Research and Digital Services Recipients: Includes (i) financial advisers and other representatives of a registered investment adviser or broker-dealer to whom BFA or BFM provides Research and Digital Services; and (ii) institutional investors and/or fiduciaries acting on behalf of institutional investors to whom BFM provides Research and Digital Services

RQA: BlackRock’s Risk & Quantitative Analysis Group

Rules: Collectively, Rule 17j-1 under the Investment Company Act and Rule 204A-1 under the Advisers Act

SEC: U.S. Securities and Exchange Commission

Securities Act: The Securities Act of 1933, as amended

Service Clients: Various clients for which the BlackRock Group provides a variety of services and advice

SMA: Separately managed account

SMA Program: Separately managed account or wrap fee program

Standard Fee Option: A fee arrangement for clients of Private Investors, under which clients pay brokerage commissions associated with trades executed on their behalf in addition to the Private Investors fee

Sub-Advised Funds: Third-party funds registered under the Investment Company Act and sub-advised by an Adviser

SVOF/MM: SVOF/MM, LLC.

Systems: Trading, portfolio management, operations and/or information systems which BlackRock or its affiliates own or have an ownership interest.
