

EACM Advisors LLC

200 Connecticut Avenue, 6th Floor
Norwalk, Connecticut 06854-1940

**Form ADV Part 2A
Fund of Hedge Funds
(as of March 29, 2019)**

This Brochure (“Brochure”) provides information about the qualifications and business practices of EACM Advisors LLC. If you have any questions about the contents of this Brochure, please contact us at 203-854-7000 or info@eacm.com. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (“SEC”) or by any state securities authority.

EACM Advisors LLC is a registered investment adviser. Registration of an Investment Adviser does not imply any level of skill or training. The oral and written communications of an Adviser provide you with information about which you determine to hire or retain an Adviser.

Additional information about EACM Advisors also is available on the SEC’s website at www.adviserinfo.sec.gov.

Item 2. Summary of Material Changes

Following is a summary of material changes we have made to our Brochure since its last annual update on March 30, 2018:

Item 4. Advisory Business: Explanation of changes in overall objectives and operations of the Firm caused the announced wind down of EACM.

Item 5. Fees and Compensation: Restated the fee structure applicable to all investors/clients.

Item 6. Performance Fees and Side-by-Side Management: Eliminated references to EACM performance fees as EACM has voluntarily waived all of its fees to remaining investors/clients.

Item 7. Types of Clients: Removed all discussion of Separate Custom Account Requirements as the Firm no longer can solicit new investors/clients nor accept additional capital.

Item 8. Investment Strategies, Methods of Analysis, and Risk of Loss: Restated investment strategy and objectives as the Firm no longer focuses on active management but instead focuses on the process of liquidating remaining portfolio assets in order to distribute the proceeds to their beneficial owners. Eliminated discussion of Methods of Analysis as these are no longer applicable.

Item 10. Other Financial Industry Activities and Affiliations: Removed references to matters no longer applicable due to the wind down of the business.

Item 13. Review of Accounts: Changed language to account for business wind down and review of accounts.

Item 14. Client Referrals and Other Compensation: Deleted discussion of Unaffiliated Solicitors and Unaffiliated Placement Agents as this is no longer applicable.

Along with the changes stated above, EACM filed an amended Form ADV Part 1 in October 2018 to reflect changes in Executive Officers, with additional changes included in the annual amendment filed March 2019.

Item 4. Advisory Business

EACM Advisors LLC (“EACM” or the “Firm” or “We” or “Us”) is a limited liability company organized under the laws of the State of Delaware. The Firm is currently an indirect, wholly-owned subsidiary of The Bank of New York Mellon Corporation (“BNY Mellon”). The firm’s history begins in 1976, when predecessor Evaluation Associates (“EAI”) was founded as an institutional consulting firm. In 1984, a fund-of-funds unit was started within EAI, focusing on long-only traditional multi-manager products. In 1987, EAI began managing its first discretionary fund of hedge funds portfolio. In 1991, EAI’s experience advising clients on hedge funds led it to form a dedicated unit to manage hedge fund-of-funds portfolios. EAI’s fund-of-funds operations were consolidated within a separate unit (Evaluation Associates Capital Markets, Inc., or ‘EACM’), operating independently of the affiliated institutional consulting business with respect to resources and client base. In August 2004, Mellon Financial Corporation acquired the assets of EACM, which subsequently was renamed EACM Advisors LLC and became an independent ‘boutique’ firm within the institutional arm of Mellon’s Asset Management Group. On July 1, 2007 the Bank of New York Corporation and the Mellon Financial Corporation merged to form The Bank of New York Mellon Corporation.

MBC Investments Corporation owns 100% of the Firm.

On September 24, 2018, BNY Mellon announced its intention to wind down EACM. As a result, EACM is closed to new clients/investors and is in the process of returning capital to existing fund of hedge funds and separately managed account investors in an orderly manner as investments are able to be redeemed. As part of the wind down, Dreyfus Select Managers Long/Short Fund, for which EACM was the Portfolio Allocation Manager, was liquidated effective November 30, 2018. Additionally, EACM’s Traditional Manager of Managers Program was terminated effective December 1, 2018.

As of December 31, 2018 EACM managed \$604,360,945 on a discretionary basis and \$12,720,942 on a non-discretionary basis. EACM fund of hedge-funds program (“FOHF Program”) had regulatory assets under management of \$617,081,887 as of December 31, 2018. (All of the numbers above are unaudited and are based on estimates.)

Since year end 2018, EACM has continued to return investor capital and has substantially decreased its assets under management, along with reductions in staff.

EACM generally does not manage individual securities and investment positions. Rather, we allocated (or recommended allocation of) assets to a variety of underlying securities managers, commodity trading advisors and commodity pool operators (“Portfolio Managers”). Please refer to Item 8 for a description of the FOHF Program.

Investors in any of the EACM Funds should refer to the fund’s offering memorandum and constitutional documents for a full description of the investment program, risks, conflicts of interests, fees and other relevant information regarding such EACM Fund.

EACM is registered as an "investment adviser" under the Investment Advisers Act of 1940. The

Central Bank of Ireland has confirmed non-objection in respect of EACM acting in the capacity as an investment adviser of Irish authorized collective investment schemes. EACM is also a U.S. registered commodity pool operator and a Member of the National Futures Association.

Item 5. Fees and Compensation

As part of the wind down of the Firm, effective January 1, 2019 EACM voluntarily waived all EACM management and EACM performance fees, thereby the Firm does not charge fees to either its separate account clients or pooled investors. EACM intends not to charge fees throughout the process of returning client/investor capital. Other fees and expenses as discussed herein may be applicable.

Separate Account Fees: As previously stated, effective January 1, 2019 EACM does not charge fees for its investment advisory separate account services. However, your investment advisory agreement may also provide that you will incur fees and expenses in addition to our advisory fees such as custody, administrative and other customary operating expenses. Client accounts are still subject to such fees and charges payable to other third parties.

Generally, fees are deducted automatically by your account administrator based on instructions per your investment advisory agreement.

EACM Fund Fees: Effective January 1, 2019 EACM, as investment adviser to its pooled funds, has voluntarily waived all EACM management and EACM performance fees that are disclosed in each EACM Fund's Offering Memorandum. EACM Funds may also be subject to additional charges such as custody, administrative and other operating expenses. Please see the applicable EACM Fund's offering materials for further information regarding fees.

The Firm invested your account in pooled investment vehicles ("Portfolio Funds") and/or separately managed accounts that themselves bear advisory fees and operational expenses such as brokerage and other transaction costs, transfer agent, distribution, shareholder servicing, networking, and recordkeeping fees. Moreover, investors in the FOHF Program may indirectly be subject to (i) a management fee charged by a Portfolio Manager based on the portion of their assets that are invested in the applicable Portfolio Fund; and (ii) an incentive allocation payable to the Portfolio Manager of Portfolio Fund, which is generally in the range from ten percent (10%) to thirty percent (30%) of net income or capital appreciation. However, such fees/allocations may exceed these ranges (including, in certain cases, to a material extent) and/or may be charged on a different basis. In addition, investors in the FOHF Program may incur indirectly other investment costs and expenses of the Portfolio Funds, including markups, mark-downs and other amounts included in the price of a security, odd-lot differentials, transfer taxes, wire transfer fees and electronic fund fees. Investors in the FOHF Program will indirectly bear these fees and expenses as an investor in such Portfolio Funds and, as a result, will bear higher expenses than if you invested directly in the securities held by the Portfolio Fund.

Item 6. Performance-Based Fees and Side-by-Side Management

EACM has voluntarily waived all EACM investment management fees, including EACM performance-based fees.

Our side-by-side management activities entail inherent conflicts that are described in this Item 6.

“Side-by-side management” refers to our simultaneous management of multiple types of client accounts/investment products. For example, we manage separate accounts, managed accounts, and EACM Funds for clients and investors at the same time. Our clients have a variety of investment objectives, policies, strategies, limitations and restrictions. Our affiliates likewise manage a variety of separate accounts, managed accounts, and pooled investment vehicles.

Side-by-side management gives rise to a variety of potential and actual conflicts of interest for us, our employees and our supervised persons. Below we discuss the conflicts that we and our employees and supervised persons face when engaging in side-by-side management and how we deal with them.

Note that we manage our accounts consistent with applicable law, and we follow procedures that are reasonably designed to treat our clients fairly and to prevent any client or group of clients from being systematically favored or disadvantaged. For example, we have Trade Allocation Policies and Procedures which are designed and implemented to ensure that all clients are treated fairly and equally, and to prevent these conflicts from influencing the allocation of investment opportunities among clients. *Please see Item 12 for an explanation of our Trade Allocation Policies and Procedures.*

Conflicts of Interest Relating to the Management of Multiple Client Accounts

We and our affiliates perform investment advisory services for various clients. We may give advice and take action in the performance of our duties with respect to any of our other clients which may differ from the advice given, or the timing or nature of action taken, with respect to another client. We have no obligation to purchase or sell for a client any security or other property which we purchase or sell for our own account or for the account of any other client, if it is undesirable or impractical to take such action. We may give advice or take action in the performance of our duties with respect to any of our clients which may differ from the advice given, or the timing or nature of action taken by our affiliates on behalf of their clients.

Conflicts of Interest Relating to Accounts with Different Strategies

We and our affiliates manage numerous pooled investment vehicles and separate custom accounts with a variety of strategies, which may present conflicts of interest. *As is described in “Additional Risks Associated with Fund-of-Funds Investment Programs” under Item 8 below,* EACM’s underlying sub-managers invest wholly independently of one another and may at times hold economically offsetting positions. i.e., long and short positions in the same security. To the extent that the Portfolio Managers do in fact hold economically offsetting positions, an EACM Fund or separate custom account, considered as a whole, cannot achieve any gain or loss despite incurring expenses.

Other Conflicts of Interest

As noted previously, we and our affiliates manage numerous accounts with a variety of investment strategies and underlying sub-managers. This necessarily creates potential conflicts of interest for us. For example, we or an affiliate may cause multiple accounts to invest, directly or indirectly, in the same investment. Such accounts may have conflicting interests and objectives in connection with such investment, including differing views on the operations or activities of the portfolio company, the targeted returns for the transaction and the timeframe for and method of exiting the investment. Conflicts may also arise in cases where multiple EACM and/or affiliate pooled investment vehicles or separate custom accounts are invested in different parts of an issuer's capital structure through underlying sub-managers. For example, one of our client account's sub-managers could acquire, directly or indirectly, debt obligations of a company while another client account's sub-managers acquire an equity investment. In negotiating the terms and conditions of any such investments, we may find that the interests of the debt-holding client account's sub-managers and the equity holding client account's sub-managers may conflict.

Item 7. Types of Clients

EACM's remaining investors and clients may include, but are not limited to, high net worth individuals and family offices, banks or thrift institutions, corporate pension and profit sharing plans, Taft-Hartley plans, trusts, foundations, endowments, charitable institutions, Investment Companies, U.S. and "offshore" (non-U.S.) private investment funds, other non-US regulated funds, sovereign funds, separate accounts, and other U.S. and international institutions.

Item 8. Investment Strategies, Methods of Analysis, and Risk of Loss

As previously stated, EACM is in process of terminating all operations and all remaining Funds and accounts are in liquidation. Therefore, the investment objective regarding all remaining Funds and accounts is to manage the realization process of the remaining assets in the portfolios and distribute the proceeds, when available, to investors in the Funds and/or separately managed account clients, where applicable.

Investment Strategies

The remaining underlying hedge fund investments of all EACM Funds and accounts can be classified across five broad strategies groups as defined by EACM: Relative Value, Event Driven, Equity Hedge Funds, Global Asset Allocations and Portfolio Protection. In its investment approach, EACM recognizes five (5) broad strategies (including an array of substrategies) and attempts to diversify its exposure to risks associated with such strategies, as outlined below.

- **Relative Value:**
 - Portfolio Managers within the Relative Value category seek to achieve attractive risk-adjusted returns through the use of both long and short positions. Relative Value Portfolio Managers generally look to take advantage of perceived pricing inefficiencies that occur in the market place from time to time. Positions taken by Relative Value Portfolio Managers may or may not be leveraged. Within the Relative Value category there are four major management strategies: Long-Short Equity, Convertible Arbitrage, Fixed Income Arbitrage and Rotational.
- **Event Driven:**
 - Portfolio Managers in the Event-Driven category typically invest either long or short (or both) based on anticipated outcomes of company-specific or transaction-specific situations. Event-Driven Portfolio Managers employ a transactional approach, attempting to capture an underlying change in value based on a particular event such as an anticipated merger or pending bankruptcy. Positions taken by Event-Driven Portfolio Managers may or may not be leveraged. Event-Driven Portfolio Managers tend to have a directional bias that produces a higher correlation to equity markets than many other strategies. Within the Event-Driven category there are three major management strategies: Equity-Event, Credit Opportunities and Opportunistic.
- **Equity Hedge:**
 - Portfolio Managers in the Equity Hedge category tend to focus on taking long and short positions in listed equity markets. These positions tend to correspond to the Portfolio Manager's views of individual opportunities. Equity Hedge Portfolio Managers may employ leverage and may have "gross" positions (the sum of their long and short positions) in excess of assets under management. It should be noted that Portfolio Managers in the Equity Hedge category generally are not fully hedged. Within the Equity Hedge category there are three major management strategies: Long-Biased, Opportunistic and Global-International.
- **Global Asset Allocation:**
 - The Global Asset Allocation category is comprised of two major management strategies: Discretionary and Systematic. With respect to both strategies, Portfolio Managers tend to focus on macro-economic opportunities across numerous markets and instruments. Investments may be either long or short securities, futures contracts, derivative contracts or options. The markets traded may include equities, fixed income, currencies or commodities (e.g., agricultural, metals, energy). Systematic Portfolio Managers tend to invest in a variety of markets, based on proprietary, model-driven strategies. These Portfolio Managers tend to follow investment trends and take positions based primarily on the output of their models. Discretionary Portfolio Managers tend to rely more on a fundamental or qualitative approach to their decision making.

- **Portfolio Protection:**

- Portfolio Managers in the Portfolio Protection category seek to profit from market conditions that usually exist in stressed or declining markets for risk assets in an attempt to provide downside protection or hedge perceived risks. These Portfolio Managers may employ a variety of strategies to achieve this objective, such as short selling of securities and long or short investments in instruments whose return is tied to equity, credit, interest rate, foreign exchange, commodity, volatility or other market factors where those instruments would be expected to increase in value in volatile or declining markets. These Portfolio Managers may or may not utilize significant leverage.

Since remaining portfolios are in the final stages of liquidation, strategy and manager allocations are not actively managed, are dependent on the liquidation terms of underlying hedge funds, and may result in concentration in one or more of the above.

General Risks

The risks set forth below represent a general summary of the material risks involved in the remaining investment strategies under management. If applicable, please refer to the “Risk Factors” section in the offering documents for a more detailed discussion of the risks involved in an investment in an EACM Fund. These risks apply to EACM separate accounts as well.

Risk of Loss. Investing in securities involves risk of loss that you should be prepared to bear. We do not guarantee or represent that our investment program will be successful. Our past results are not necessarily indicative of our future performance and our investment results may vary over time. We cannot assure you that our investments of your money will be profitable, and in fact, you could incur substantial losses. Your investments with us are not a bank deposit and are not insured or guaranteed by the FDIC or any other government agency. Accordingly, investors should consider investing with EACM only as part of an overall diversified portfolio and should be willing to assume the risks of potentially significant fluctuations in value.

Lack of Operating History. Certain of the underlying investment funds (“Portfolio Funds”) may be newly formed entities and have no or little operating history upon which investors can evaluate the anticipated performance of such Portfolio Fund. Any past investment performance of Portfolio Managers with which EACM expects to invest its assets cannot be relied upon as an indication of the future results of an investment with EACM. EACM’s investment program should be evaluated on the basis that there can be no assurance that EACM’s assessments of Portfolio Managers, and in turn their assessments of the short-term or long-term prospects of investments, will prove accurate or that EACM will achieve its investment objective.

Absence of Regulatory Oversight. EACM Funds are not required to, and do not intend to, register as investment companies under the U.S. Investment Company Act of 1940, as amended (the “Company Act”), or the laws of any other country or jurisdiction and,

accordingly, the provisions of such statutes (which may provide certain regulatory safeguards to investors) are not applicable. For example, EACM Funds are not required, and do not require Portfolio Managers, to maintain custody of their own securities or place their securities in the custody of a bank or a member of a U.S. securities exchange, as required of registered investment companies under the SEC rules. A registered investment company which places its securities in the custody of a member of a U.S. securities exchange is required to have a written custodian agreement, which provides that securities held in custody will be at all times individually segregated from the securities of any other person and marked to clearly identify such securities as the property of such investment company and which contains other provisions complying with SEC regulations. Portfolio Managers generally maintain such accounts at brokerage firms which do not separately segregate such assets as would be required in the case of registered investment companies. Under the provisions of the U.S. Securities Investor Protection Act, the bankruptcy of any such brokerage firms might have a greater adverse effect on the Fund than would be the case if all Portfolio Managers maintained their accounts to meet the requirements applicable to registered investment companies.

Conflicts of Interest. EACM is engaged in advisory activities other than on behalf of a particular EACM Fund or separate custom account. Accordingly, conflicts of interest may arise in connection with the allocation of investment opportunities between EACM Funds, separate custom accounts, and/or other investment advisory clients. EACM will allocate such investment opportunities among its investment advisory clients in a manner believed equitable by EACM.

Banking Regulation. EACM and its affiliates (including BNY Mellon), are subject to certain U.S. and non-U.S. banking laws, including the Bank Holding Company Act of 1956, as amended (the "BHCA") and to regulation by the Board of Governors of the Federal Reserve System (the "Federal Reserve"). The BHCA and other applicable banking laws, rules, regulations, guidelines and the interpretations thereof by the staff of the regulatory agencies which administer them, may restrict the transactions and relationships between EACM, BNY Mellon and/or their affiliates, on the one hand, and EACM Funds on the other hand, and may restrict the investments, activities and transactions of EACM Funds.

The Dodd-Frank Wall Street Reform and Consumer Protection Act ("DFA") was adopted by the U.S. Congress in July 2010. It requires financial regulators to propose and adopt rules to implement the statutory provisions of the DFA. One of the rules is commonly referred to as the "Volcker Rule," which imposes a number of restrictions on financial organizations like BNY Mellon and the EACM Funds. The final Volcker Rule was jointly adopted by a group of U.S. federal financial regulators in December 2013, and generally must be implemented by BNY Mellon no later than July 21, 2017, except for investments in or relationships with a "covered fund" that occurred after December 31, 2013, which must conform by July 21, 2015.

Under the Volcker Rule, "banking entities" such as BNY Mellon and any of its controlled subsidiaries or affiliates ("BNY Mellon-controlled entities") must comply with certain conditions and restrictions in connection with sponsoring or investing in certain "covered funds." The EACM Funds are subject to the restrictions of the Volcker Rule. The Volcker Rule affects how EACM may organize and offer the EACM Funds. The rule also regulates the amount that BNY

Mellon-controlled entities may invest in EACM Funds and which of their employees and directors may invest in EACM Funds.

BNY Mellon-controlled entities may invest seed capital and otherwise have ownership interests in the EACM Funds so long as their aggregate ownership interests do not exceed 3% of the total value of outstanding EACM Funds ownership interests by July 21, 2017 (“3% Fund Limit”). Moreover, the aggregate investment by all BNY Mellon-controlled entities in the EACM Funds and all other “covered funds” may not exceed 3% of BNY Mellon’s Tier 1 Capital (“3% Aggregate Limit”). Redemptions or divestments of EACM Funds ownership interests by BNY Mellon-controlled entities to meet the 3% Fund Limit and, if applicable, the 3% Aggregate Limit may have significant ramifications for the EACM Funds and its investors.

The Volcker Rule prohibits the EACM Funds from using “bank” in its name and sharing the same name or a variation of the same name with any BNY Mellon-controlled entity for corporate, marketing, promotional, or other purposes. This will require certain EACM Funds to change names by July 21, 2017. Additional information on this will be provided when available.

The Volcker Rule prohibits certain types of “covered transactions” between the EACM Funds and BNY Mellon-controlled entities, such as loans to the EACM Funds, extending credit to the EACM Funds, purchasing assets from the EACM Funds, and issuing a guarantee or letter of credit to the EACM Funds. The Volcker Rule also requires sales transactions and servicing arrangements between the EACM Funds and a BNY Mellon-controlled entity to be on market terms. This may require changes to the existing service arrangements that the EACM Funds may have with BNY Mellon-controlled entities, but no such changes are contemplated at this point.

No BNY Mellon-controlled entity, which includes EACM and EACM Funds, may directly or indirectly, guarantee, assume, or otherwise insure the obligations or performance of the EACM Funds. Ownership interests in the EACM Funds are not insured by the FDIC, and are not deposits, obligations of, or endorsed or guaranteed in any way, by any BNY Mellon-controlled entity. Any losses in the EACM Funds will be borne solely by investors in the EACM Funds and not by any BNY Mellon-controlled entity; therefore, any losses suffered by a BNY Mellon-controlled entity will be limited to losses attributable to its ownership interest in the EACM Funds held by it in its capacity as an investor in the EACM Funds. Investors should read the respective offering documents before investing in the EACM Funds.

Portfolio Managers. As the Portfolio Funds in which EACM will invest may be in an early stage of formation or operation, this can pose a number of operational and other issues. For example, in its early stages the Portfolio Manager may have little capital available to cover expenses and, accordingly, may have difficulty attracting qualified personnel. Portfolio Managers may face competition from other investment funds, which may be more established, have a larger number of qualified management and technical personnel and benefit from a larger capital base.

Limited Information Regarding Portfolio Managers. Although EACM will receive information from each prospective Portfolio Manager regarding such Portfolio Manager's historical performance, if any, and investment strategy, in most cases EACM will have little or

no means of independently verifying the information supplied to it by such Portfolio Managers. In some cases, EACM will not have access to detailed information regarding the underlying portfolios of the Portfolio Funds and will rely in large part on the limited information provided to it by the Portfolio Managers. The absence of detailed information could result in significant losses to EACM Funds or separate custom accounts.

Incentive Compensation Arrangements. Portfolio Managers typically receive compensation based on the performance of their investments. Such compensation arrangements may create an incentive to make investments that are riskier or more speculative than would be the case if such arrangements were not in effect. In addition, because performance-based compensation is calculated on a basis that includes unrealized appreciation, it may be greater than if such compensation were based solely on realized gains. Similarly, EACM may receive a Performance Fee that will be based on the net capital appreciation of EACM Funds or separate custom accounts.

Valuations. Certain securities in which Portfolio Funds invest may not have a readily ascertainable market price. Such securities will nevertheless generally be valued by the Portfolio Managers, their appointed administrators, or third party pricing agents. Valuation will ordinarily be conclusive with respect to the EACM Fund or separate custom account, even though Portfolio Managers will generally face a conflict of interest in valuing such securities because the value of the securities will affect their compensation.

Investment Related Risks

EACM Funds and separate custom accounts allocated capital to Portfolio Managers and invest in Portfolio Funds that invest in, and actively trade, securities and other financial instruments using a variety of strategies and investment techniques with significant risk characteristics, including the risks arising from the volatility of the equity, fixed-income, commodity and currency markets, the risks of short sales, the risks arising from leverage associated with trading in the equities, currencies and over-the-counter derivatives markets, the illiquidity of derivative instruments and the risk of loss from counterparty defaults. No guarantee or representation is made that the EACM Funds' or separate accounts' investment programs will be successful. The Portfolio Managers may utilize leverage, which can, in certain circumstances, substantially increase the adverse impact to which the EACM Funds' or separate custom accounts' investment portfolio may be subject. Prospective investors and clients should consider the following additional factors in determining whether an investment in with EACM is a suitable investment:

General Economic and Market Conditions. The success of the EACM Funds' or separate custom accounts' activities may be affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws and national and international political circumstances. These factors may affect the level and volatility of securities prices and the liquidity of the Portfolio Funds. Unexpected volatility or illiquidity could impair an EACM Fund's or separate custom account's profitability or result in losses.

Risks of Securities Activities. All securities investing and trading activities risk the loss of capital. There can be no assurance that the EACM Funds' or separate custom accounts' investment activities will be successful or that investors will not suffer losses. The following discussion sets forth some of the more significant risks associated with the Portfolio Managers' and the EACM Funds' or separate custom accounts' style of investing:

Equity Securities. The value of equity securities may fluctuate in response to specific situations for each company, industry market conditions and general economic environments. Portfolio Funds may acquire long and short positions in listed and unlisted common equities, preferred equities and convertible securities of issuers domiciled in developed or in emerging countries. (See "Investments in Emerging Markets" below.) Portfolio Funds may invest in equity securities regardless of market capitalization, including micro and small cap companies. The securities of smaller companies may involve more risk and their prices may be subject to more volatility. Portfolio Funds may also invest in distressed equity securities, which are generally considered to be riskier, more and speculative and less liquid than other equity securities.

Short Selling. Many Portfolio Funds will engage in short selling. Short selling involves selling securities that are not owned, and borrowing the same securities for delivery to the purchaser, with an obligation to replace the borrowed securities at a later date. Short selling allows the investor to profit from declines in market prices to the extent such declines exceed the transaction costs and the costs of borrowing the securities. A short sale creates the risk of an unlimited loss, as the price of the underlying security could theoretically increase without limit, thus increasing the cost of buying those securities to cover the short position. There can be no assurance that the securities necessary to cover a short position will be available for purchase. Purchasing securities to close out the short position can itself cause the price of the securities to rise further, thereby exacerbating any loss. In certain cases, extreme demand by other short sellers of a particular security to "cover" such security can drive up the price, resulting in further losses for EACM Funds or separate custom accounts.

Hedging Transactions. The Portfolio Funds may or may not utilize a variety of financial instruments, such as short sales, derivatives, options, interest rate swaps, caps and floors, futures and forward contracts to seek to hedge against declines in the values of their portfolio positions as a result of changes in currency exchange rates, certain changes in the equity markets and market interest rates and other events. EACM Funds or separate custom accounts may also engage in hedging transactions directly in order to hedge against changes in currency exchange rates. Hedging against a decline in the value of portfolio positions does not eliminate fluctuations in the values of portfolio positions or prevent losses if the values of such positions decline, but establishes other positions designed to gain from those same developments, thus offsetting the decline in the portfolio positions' value. Such hedging transactions may also limit the opportunity for gain if the value of the hedged portfolio positions should increase. It may not be possible for the Portfolio Managers to hedge against a change or event at a price sufficient to protect an EACM Funds', a separate custom accounts', or the Portfolio Funds' assets from the decline in value of the portfolio positions anticipated as a result of such change. In addition, it may not be possible to hedge against certain changes or events at all.

While EACM Funds or separate custom accounts, or certain Portfolio Managers may or may not enter into hedging transactions, the non-occurrence of the events being hedged against may result in a poorer overall performance for an EACM Fund or separate custom account than if the EACM Fund, separate custom account, or the Portfolio Manager, as applicable, had not engaged in any such hedging transactions. Moreover, for a variety of reasons, an EACM Fund, separate custom account, or the Portfolio Managers may not seek to establish a perfect correlation between such hedging instruments and the portfolio holdings being hedged. Such imperfect correlation may prevent the Portfolio Managers from achieving the intended hedge or expose an EACM Fund or separate custom account to additional risk of loss.

Leverage; Interest Rates; Margin. EACM Funds or separate custom accounts generally do not intend to utilize leverage in connection with its investment programs but may, however, utilize short-term borrowings for operating and investing purposes. In addition, the Portfolio Managers with which the assets of EACM Funds or separate custom accounts are invested may buy and sell securities on margin and otherwise utilize leverage, increasing the volatility of EACM Funds' or separate custom accounts' investments. While leverage presents opportunities for increasing an EACM Fund's or separate custom account's total return, it has the effect of potentially increasing losses as well. Accordingly, any event that adversely affects the value of an investment, either directly or indirectly, could be magnified to the extent that leverage is employed. The cumulative effect of the use of leverage by an EACM Fund, separate custom account, or a Portfolio Fund, directly or indirectly, in a market that moves adversely to the investments of the entity employing the leverage, could result in a loss to that EACM Fund or separate custom account that would be greater than if leverage were not employed by the EACM Fund, separate custom account, or such Portfolio Fund. In addition, to the extent that an EACM Fund, separate custom account, or the Portfolio Funds borrow funds, the rates at which they can borrow may affect the operating results of that EACM Fund, separate custom account, or Portfolio Fund.

The anticipated use of margin borrowings by the Portfolio Funds may result in certain additional risks to an EACM Fund or separate custom account. For example, should the securities that are pledged to brokers to secure the Portfolio Funds' margin accounts decline in value, or should brokers from which the Portfolio Funds have borrowed increase their maintenance margin requirements (i.e., reduce the percentage of a position that can be financed), then the Portfolio Funds could be subject to a "margin call," pursuant to which the Portfolio Funds must either deposit additional funds with the broker or suffer mandatory liquidation of the pledged securities to compensate for the decline in value. The broker normally has the right to liquidate the manager's portfolio in the broker's discretion. In the event of a precipitous drop in the value of the assets of a Portfolio Fund, the Portfolio Fund might not be able to liquidate assets quickly enough to pay off the margin debt and might suffer mandatory liquidation of positions in a declining market at relatively low prices, thereby incurring substantial losses.

Investments in Emerging Markets. Certain Portfolio Funds may invest in securities of companies operating in emerging markets and in emerging markets' currencies. Investing in the securities of such companies and countries involves certain considerations not usually associated with investing in developed countries, including political and economic considerations, such as greater risks of expropriation and nationalization, confiscatory taxation,

the potential difficulty of repatriating funds, general social, political and economic instability and adverse diplomatic developments; the possibility of imposition of withholding or other taxes on dividends, interest, capital gain or other income; the small size of the securities markets in such countries and the low volume of trading, resulting in potential lack of liquidity and in price volatility; fluctuations in the rate of exchange between currencies and costs associated with currency conversion; and certain government policies that may restrict a Portfolio Manager's investment opportunities. In addition, accounting and financial reporting standards that prevail in many such countries may not provide adequate information to investors. There is also less regulation, generally, of the securities markets in emerging countries than there is in developed countries. EACM does not expect that investments in Portfolio Funds that focus on emerging markets will be a significant part of the EACM Funds' or separate custom accounts' overall investment portfolios.

Fixed-Income Securities. Certain Portfolio Funds may invest in fixed-income securities. The value of fixed-income securities in which Portfolio Funds invest will change in response to fluctuations in interest rates. In addition, the value of certain fixed-income securities can fluctuate in response to perceptions of credit worthiness, political stability or soundness of economic policies. Valuations of other fixed-income instruments, such as mortgage-backed securities, may fluctuate in response to changes in the economic environment that may affect future cash flows. Except to the extent that values are independently affected by currency exchange rate fluctuations, when interest rates decline, the value of fixed-income securities generally can be expected to rise. Conversely, when interest rates rise, the value of fixed-income securities generally can be expected to decline. Portfolio Funds may invest in U.S. and non-U.S. issuers of fixed-income securities. The Portfolio Funds may invest in both investment grade and non-investment grade debt securities, including "high-yield" or "junk bonds" and "distressed securities."

ETF Risk. ETFs in which Portfolio Funds may invest involve certain inherent risks generally associated with investments in a portfolio of common stocks, including the risk that the general level of stock prices may decline, thereby adversely affecting the value of each unit of the ETF. Moreover, an ETF may not fully replicate the performance of its benchmark index because of the temporary unavailability of certain index securities in the secondary market or discrepancies between the ETF and the index with respect to the weighting of securities or the number of stocks held. Investing in ETFs, which are investment companies, may involve duplication of advisory fees and certain other expenses.

Currency Exposure of Portfolio Funds. The Portfolio Funds may invest their assets in a currency other than their base currency or the base currency of an EACM Fund or separate custom account, or in instruments denominated in a currency other than their base currency or the base currency of an EACM Fund or separate custom account. A Portfolio Fund may or may not seek to hedge all or any portion of its currency exposure. To the extent unhedged, the value of a Portfolio Fund's assets will fluctuate with exchange rates as well as the price changes of its investments in the various local markets and currencies. Thus, an increase in the value of the Portfolio Fund's base currency compared to the other currencies in which such Portfolio Fund makes its investments will reduce the effect of increases and magnify the effect of decreases in the prices of such Portfolio Fund's securities in their local markets. Conversely, a

decrease in the value of the Portfolio Fund's base currency will have the opposite effect on a Portfolio Fund's non-base currency investments.

Derivatives. Derivatives are based on the performance of an underlying asset, index interest rate or other investment. Derivatives may be volatile and involve various risks, depending upon the derivative and its function in a portfolio. Portfolio Funds may purchase derivatives either to increase or to decrease the level of risk, or to change the types of risks to which the portfolio is exposed. Swaps, options and other derivative instruments may be subject to various types of risks, including market risk, liquidity risk, the risk of non-performance by the counterparty, including risks relating to the financial soundness and creditworthiness of the counterparty, legal risk and operations risk.

EACM Funds, separate custom accounts, and the Portfolio Funds may take advantage of opportunities with respect to certain other derivative instruments that are not currently contemplated for use by EACM Funds, separate custom accounts, or Portfolio Funds or that are currently not available, but that may be developed, to the extent such opportunities are both consistent with the investment objective of a particular EACM Fund, separate custom account, or the relevant Portfolio Funds and legally permissible for that EACM Fund or separate custom account or the relevant Portfolio Funds. Special risks may apply to instruments that are invested in by EACM Funds or the Portfolio Funds in the future that cannot be determined at this time or until such instruments are developed or invested in by EACM Fund, separate custom account, or the Portfolio Funds.

Call Options. There are risks associated with the sale and purchase of call options. The seller (writer) of a call option which is covered (e.g., the writer holds the underlying security) assumes the risk of a decline in the market price of the underlying security below the purchase price of the underlying security less the premium received, and gives up the opportunity for gain on the underlying security above the exercise price of the option. The seller of an uncovered call option assumes the risk of a theoretically unlimited increase in the market price of the underlying security above the exercise price of the option. The securities necessary to satisfy the exercise of the call option may be unavailable for purchase except at much higher prices. Purchasing securities to satisfy the exercise of the call option can itself cause the price of the securities to rise further, sometimes by a significant amount, thereby exacerbating the loss. The buyer of a call option assumes the risk of losing its entire premium invested in the call option.

Put Options. There are risks associated with the sale and purchase of put options. The seller (writer) of a put option which is covered (e.g., the writer has a short position in the underlying security) assumes the risk of an increase in the market price of the underlying security above the sales price (in establishing the short position) of the underlying security plus the premium received, and gives up the opportunity for gain on the underlying security below the exercise price of the option. The seller of an uncovered put option assumes the risk of a decline in the market price of the underlying security below the exercise price of the option. The buyer of a put option assumes the risk of losing his entire premium invested in the put option.

Forward Contracts. The Portfolio Funds may enter into forward contracts, which are not traded on exchanges and are generally not regulated. There are no limitations on daily price moves of forward contracts. Banks and other dealers with whom a Portfolio Fund may maintain accounts may require such Portfolio Fund to deposit margin with respect to such trading, although margin requirements are often minimal or non-existent. A Portfolio Fund's counterparties are not required to continue to make markets in such contracts. There have been periods during which certain counterparties have refused to continue to quote prices for forward contracts or have quoted prices with an unusually wide spread (the price at which the counterparty is prepared to buy and that at which it is prepared to sell). Arrangements to trade forward contracts may be made with only one or a few counterparties, and liquidity problems therefore might be greater than if such arrangements were made with numerous counterparties. The imposition of credit controls by governmental authorities might limit such forward trading to less than that which would otherwise be optimal, to the possible detriment of an EACM Fund or separate custom account.

Futures Contracts. Futures positions may be illiquid because, for example, most U.S. commodity exchanges limit fluctuations in certain futures contract prices during a single day by regulations referred to as "daily price fluctuation limits" or "daily limits." Once the price of a contract for a particular future has increased or decreased by an amount equal to the daily limit, positions in the future can neither be taken nor liquidated unless traders are willing to effect trades at or within the limit. Futures contract prices on various commodities or financial instruments occasionally have moved the daily limit for several consecutive days with little or no trading. Similar occurrences could prevent a Portfolio Fund from promptly liquidating unfavorable positions and subject such Portfolio Fund, and therefore an EACM Fund or separate custom account, to substantial losses. In addition, Portfolio Funds may not be able to execute futures contract trades at favorable prices if trading volume in such contracts is low. It is also possible that an exchange or a regulator such as the SEC or the U.S. Commodity Futures Trading Commission ("CFTC") may suspend trading in a particular contract, order immediate liquidation and settlement of a particular contract or order that trading in a particular contract be conducted for liquidation only. In addition, the CFTC and various exchanges impose speculative position limits on the number of positions that may be held in particular commodities. Trading in commodity futures contracts and options are highly specialized activities that may entail greater than ordinary investment or trading risks. Furthermore, low margin or premiums normally required in such trading may provide a large amount of leverage, and a relatively small change in the price of a security or contract can produce a disproportionately larger profit or loss.

Swap Agreements. EACM Funds, separate custom accounts, and the Portfolio Funds may enter into swap agreements. Swap agreements can be individually negotiated and structured to include exposure to a variety of different types of investments or market factors. Depending on their structure, swap agreements may increase or decrease the Fund's and a Portfolio Fund's exposure to equity securities, long-term or short-term interest rates, foreign currency values, corporate borrowing rates, or other factors. Swap agreements can take many different forms and are known by a variety of names.

Depending on how they are used, swap agreements may increase or decrease the overall volatility of the Fund's or a Portfolio Fund's portfolio. The most significant factor in the

performance of swap agreements is the change in the individual equity values, specific interest rate, currency or other factors that determine the amounts of payments due to and from the counterparties. If a swap agreement calls for payments by an EACM Fund, separate custom account, or a Portfolio Fund, the EACM Fund, separate custom account, or such Portfolio Fund must be prepared to make such payments when due.

Counterparty Credit Risk. Some of the markets in which the Portfolio Funds may affect their transactions are "over-the-counter" or "interdealer" markets. The participants in such markets are typically not subject to credit evaluation and regulatory oversight as are members of "exchange-based" markets. To the extent an EACM Fund, separate custom account, or a Portfolio Fund invests in swaps, derivative or synthetic instruments, or other over-the-counter transactions, on these markets, the EACM Fund, separate custom account, or such Portfolio Fund may take a credit risk with regard to parties with whom it trades and may also bear the risk of settlement default. These risks may differ materially from those entailed in exchange-traded transactions, which generally are backed by clearing organization guarantees, daily marking-to-market and settlement, and segregation and minimum capital requirements applicable to intermediaries. Transactions entered into directly between two counterparties generally do not benefit from such protections. This exposes the EACM Fund or separate custom account, or a Portfolio Fund to the risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not *bona fide*) or because of a credit or liquidity problem, thus causing the Fund or a Portfolio Fund to suffer a loss. Such "counterparty risk" is accentuated for contracts with longer maturities where events may intervene to prevent settlement, or where the EACM Fund, separate custom account, or a Portfolio Fund has concentrated its transactions with a single or small group of counterparties. EACM Funds, separate custom accounts, and Portfolio Funds are not restricted from dealing with any particular counterparty or from concentrating any or all of their transactions with one counterparty. The ability of EACM Funds, separate custom accounts, and Portfolio Funds to transact business with any one or number of counterparties, the lack of any independent evaluation of such counterparties' financial capabilities and the absence of a regulated market to facilitate settlement may increase the potential for losses by an EACM Fund or separate custom account.

Counterparty Insolvency. The Portfolio Funds' assets may be held in one or more accounts maintained for such Portfolio Funds by counterparties, including their prime brokers. There is a risk that any of such counterparties could become insolvent. The insolvency of a Portfolio Fund's counterparties is likely to impair the operational capabilities or the assets of such Portfolio Fund. Although a Portfolio Fund may regularly monitor the financial condition of the counterparties it uses, if one or more of such Portfolio Fund's counterparties were to become insolvent or the subject of liquidation proceedings in the United States (either under the Securities Investor Protection Act or the United States Bankruptcy Code), there exists the risk that the recovery of such Portfolio Fund's securities and other assets from such prime broker or broker-dealer will be delayed or be of a value less than the value of the securities or assets originally entrusted to such prime broker or broker-dealer.

In addition, a Portfolio Fund may use counterparties located in various jurisdictions outside the United States. Such local counterparties are subject to various laws and regulations in various

jurisdictions that are designed to protect their customers in the event of their insolvency. However, the practical effect of these laws and their application to a Portfolio Fund's assets are subject to substantial limitations and uncertainties. Because of the large number of entities and jurisdictions involved and the range of possible factual scenarios involving the insolvency of counterparty, it is impossible to generalize about the effect of their insolvency on a Portfolio Fund and its assets. Investors should assume that the insolvency of any counterparty would result in a loss to such Portfolio Fund, which could be material.

Highly Volatile Markets. The prices of commodities contracts and all derivative instruments, including futures and options, can be highly volatile. Price movements of forward, futures and other derivative contracts in which an EACM Fund's, separate custom account's, or a Portfolio Fund's assets may be invested are influenced by, among other things, interest rates, changing supply and demand relationships, trade, fiscal, monetary and exchange control programs and policies of governments and national and international political and economic events and policies. In addition, governments from time to time intervene, directly and by regulation, in certain markets, particularly those in currencies, financial instruments, futures and options. Such intervention often is intended directly to influence prices and may, together with other factors, cause all of such markets to move rapidly in the same direction. EACM Funds, separate custom accounts, and the Portfolio Funds also are subject to the risk of the failure of any exchanges on which its positions trade or of their clearinghouses.

Illiquid Portfolio Investments. Portfolio Funds may invest in securities that are subject to legal or other restrictions on transfer or for which no liquid market exists. The market prices, if any, for such securities tend to be volatile and a Portfolio Fund may not be able to sell them when it desires to do so or to realize what it perceives to be their fair value in the event of a sale. The sale of restricted and illiquid securities often requires more time and results in higher brokerage charges or dealer discounts and other selling expenses than does the sale of securities eligible for trading on national securities exchanges or in the over-the-counter markets. Restricted securities may sell at a price lower than similar securities that are not subject to restrictions on resale.

ERISA Plan Assets Status of an EACM Fund. The Firm anticipates that the assets of an EACM Fund (and therefore the Portfolio Funds) may, from time to time, be treated as "plan assets" within the meaning of Section 3 (42) of ERISA of those investors that are subject to the provisions of Title I of ERISA and/or the prohibited transaction provisions of Section 4975 of the U.S. Internal Revenue Code of 1986, as amended (the "Code"). In such event, and under certain circumstances, EACM and each Portfolio Manager would be treated as a fiduciary with respect to each such investor that is a Benefit Plan Investor. In addition, in the event that the assets of an EACM Fund and/or separate custom account (and therefore the Portfolio Funds) were treated as "plan assets" for purpose of ERISA, ERISA may impose certain limitations on the operation of the EACM Fund and/or separate custom account and such Portfolio Funds. Accordingly, ERISA could materially limit the activities of an EACM Fund and/or separate custom account and the Portfolio Funds, as applicable, and, as a result, Investors should expect that an EACM Fund and/or separate custom account and the Portfolio Funds, as applicable, will not be able to take advantage of certain investment opportunities, will have a

different portfolio and could have a lower rate of return than if it were not subject to ERISA.

Cybersecurity Risk. In addition to the risks described above that primarily relate to the value of investments, there are various operational, systems, information security and related risks involved in investing, including but not limited to “cybersecurity” risk. Cybersecurity attacks include electronic and non-electronic attacks that include but are not limited to gaining unauthorized access to digital systems to obtain client and financial information, compromising the integrity of systems and client data (e.g., misappropriation of assets or sensitive information), or causing operational disruption through taking systems off-line (e.g., denial of service attacks). As the use of technology has become more prevalent, we and the client accounts we manage have become potentially more susceptible to operational risks through cybersecurity attacks. These attacks in turn could cause us and client accounts (including funds) we manage to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures, and/or financial loss. Similar adverse consequences could result from cybersecurity incidents affecting issuers of securities in which we invest, counterparties with which we engage in transactions, third-party service providers (e.g., a client account’s custodian), governmental and other regulatory authorities, exchange and other financial market operators, banks, brokers, dealers and other financial institutions and other parties. While cybersecurity risk management systems and business continuity plans have been developed and are designed to reduce the risks associated with these attacks, there are inherent limitations in any cybersecurity risk management system or business continuity plan, including the possibility that certain risks have not been identified. Accordingly, there is no guarantee that such efforts will succeed, especially since we do not directly control the cybersecurity systems of issuers or third-party service providers.

Additional Risks Associated with "Fund-of-Funds" Investment Programs

Fee Structure. In a “fund of funds”, investment management fees are charged to EACM Funds or separate custom accounts by both EACM and the Portfolio Managers. EACM Funds may also be subject to additional charges such as custody, administrative and other operating expenses. However, effective January 1, 2019 EACM has voluntarily waived its management and performance fees, but Portfolio Manager fees and expenses continue.

Overlapping Investment Strategies. The Portfolio Managers invest wholly independently of one another and may at times hold economically offsetting positions or cause an EACM Fund or separate custom account to be concentrated in certain positions. To the extent that the Portfolio Managers do, in fact, hold economically offsetting positions, an EACM Fund or separate custom account, considered as a whole, cannot achieve any gain or loss despite incurring expenses. If an EACM Fund or separate custom account are concentrated in a position, as a result of two or more Portfolio Managers holding the same positions, the risks associated with such investments will be magnified.

Portfolio Funds' Compensation not Correlated to EACM Funds' or separate custom accounts' Overall Performance. A Portfolio Manager will be compensated based on the performance of its Portfolio Fund. Consequently, a particular Portfolio Manager may receive

incentive compensation in respect of its Portfolio Fund's performance during a period when EACM Funds' or separate custom accounts' overall capital depreciated.

Dependence on EACM and Portfolio Managers. EACM invests assets of EACM Funds or separate custom accounts through Portfolio Managers and Portfolio Funds. The success of any EACM Fund or separate custom account depends upon the ability of EACM and the Portfolio Managers to develop and implement investment strategies that achieve each EACM Fund's or separate custom account's and the respective Portfolio Funds' investment objectives. Decisions made by EACM and/or the Portfolio Managers may cause the EACM Funds or separate custom accounts to incur losses or to miss profit opportunities on which they may otherwise have capitalized.

Limited Diversification. EACM Funds or separate custom accounts generally seek to diversify assets through investments with various Portfolio Managers and strategies. Such diversification may not be achieved as a result of insufficient investment opportunities or insufficient investable assets as a result of insufficient subscriptions or withdrawals by investors. In addition, although the diversification of EACM Funds or separate custom accounts' investments (through Portfolio Funds) in a variety of securities and industries is intended to reduce EACM Funds' or separate custom accounts' exposure to adverse events associated with specific issuers or industries, the number of investments by the Portfolio Funds will be limited, and the portfolios of some Portfolio Funds may be highly concentrated in particular companies, industries or countries. As a consequence, EACM Funds' or separate custom accounts' returns as a whole may be adversely affected by the unfavorable performance of even a single investment by a Portfolio Fund.

The risk of limited diversification may be more significant as all client/investor accounts are liquidated.

Dilution and Concentration. In the case of Portfolio Funds that limit the amount of additional capital that they will accept from EACM, continued sales of Interests by an EACM Fund or separate custom account will dilute the participation of existing investors in such Portfolio Funds. Conversely, withdrawals from an EACM Fund or separate custom account could lead to withdrawals from more liquid Portfolio Funds and consequently more concentration in certain Portfolio Funds within EACM Funds or separate custom accounts.

The risk of increased portfolio concentration may be more significant as all client/investor accounts are liquidated.

Correlation Risk. Although the funds-of-funds strategy seeks to deliver returns that are not typically representative of the broad market by allocating its assets among various asset categories or investment strategies, there can be no guarantee that the performance of the underlying funds or the fund will have a low correlation to that of traditional asset classes under all market conditions.

Valuation and Performance Estimates. EACM will have little ability to assess the accuracy of the valuations received from a Portfolio Manager. Furthermore, the net asset

values received by EACM Funds or separate custom accounts from such Portfolio Managers will typically be estimates only, subject to revision through the end of each Portfolio Fund's annual audit. Revisions to EACM Funds' or separate custom accounts' gain and loss calculations will be an ongoing process, and no appreciation or depreciation figure can be considered final until each EACM Fund's or separate custom account's annual audit is completed.

Limited Liquidity; In-kind Distributions. An investment in an EACM Fund or separate custom account provides limited liquidity, since withdrawal rights are limited and may be suspended in whole or in part under the circumstances described in the pooled investments vehicle's offering documents. Interests may not be pledged, assigned, hypothecated, sold, exchanged, transferred, conveyed or disposed of without the prior consent of EACM. There can be no assurance that any Fund will have sufficient cash to satisfy withdrawal requests, or that it will be able to liquidate investments at the time such withdrawals are requested. Liquidity of Interests is dependent on the liquidity of each Fund's investments in the Portfolio Funds. In certain cases, a Portfolio Fund may suspend withdrawals when there exists a state of affairs where disposal of part or all of such Portfolio Fund's assets or the determination of its Net Asset Value are not reasonably practical or are significantly prejudicial to the non-withdrawing investors. Although EACM Funds or separate custom accounts do not currently intend to make distributions in-kind, under certain circumstances, investors may receive in-kind distributions of interests in Portfolio Funds from EACM's portfolio. Such investments so distributed may not be readily marketable or saleable and may have to be held by such investors for an indefinite period of time. As a result, an investment in an EACM Fund or separate custom account is suitable only for sophisticated investors. Any such in-kind distributions will not materially prejudice the interests of remaining investors.

Delayed Schedules K-1. It is unlikely that an EACM Fund in which taxable U.S. investors invest will be able to provide final Schedule K-1s to investors for any given fiscal year until after April 15 of the following year. EACM will endeavor to provide such investors with estimates of the taxable income or loss allocated to their investment in an EACM Fund on or before such date, but final Schedules K-1 will not be available until completion of the EACM Fund's annual audit (which may be six months or more after year-end). Investors may be required to obtain extensions of the filing date for their income tax returns at the Federal, state and local level.

Side Letters. EACM Funds may enter into side letters and other agreements and arrangements ("Side Letters") with certain investors or Portfolio Funds pursuant to which, among other things, an investor, or EACM Fund or separate custom account may have more frequent redemption rights, short notice periods or receive reports and have access to information regarding an EACM Fund's portfolio that might not be generally available to other Investors. Such investors may be able to base their investment decisions, including, without limitation, withdrawing their capital from an EACM Fund, on the information that is not generally available to other investors.

Identity of Beneficial Ownership and Withholding on Certain Payments. In order to avoid a U.S. withholding tax of 30% on certain payments (including payments of gross proceeds) made with respect to certain actual and deemed U.S. investments, certain EACM

Funds and any non-U.S. Portfolio Funds generally will be required to register with the Internal Revenue Service (the “Service”) by June 30, 2014 (or by December 31, 2014, as applicable to certain entities located in jurisdictions with Model 1 inter-governmental agreements), and agree to identify certain of their direct and indirect U.S. account holders (including debtholders and equityholders).

A non-U.S. investor in an EACM Fund will generally be required to provide to the EACM Fund information which identifies its direct and indirect U.S. ownership. Under Inter Governmental Arrangements (“IGA”s), any such information provided to an EACM Fund may be shared with local government of the EACM Fund, unless such U.S. ownership is exempt from the reporting and withholding rules. A non-U.S. investor that is a "foreign financial institution" within the meaning of Section 1471(d)(4) of the IRC will generally be required to register with the Service by June 30, 2014 (or such later date applicable to certain entities located in jurisdictions with Model 1 inter-governmental agreements), and agree to identify certain of its own direct and indirect U.S. account holders (including debtholders and equityholders). A non-U.S. investor who fails to provide such information to an EACM Fund or register and agree to identify such account holders (as applicable) may be subject to the 30% withholding tax with respect to its share of any such payments attributable to actual and deemed U.S. investments of the EACM Fund, and the Board of Directors may take any action in relation to an investor's Shares or redemption proceeds to ensure that such withholding is economically borne by the relevant investor whose failure to provide the necessary information or comply with such requirements gave rise to the withholding.

Item 9. Disciplinary Information

From time to time, we and/or BNY Mellon may be involved in regulatory examinations or litigation that arise in the ordinary course of our business. At this time we are not aware of any regulatory matters or litigation that we believe would be material to an evaluation of our advisory business or integrity of our management.

Item 10. Other Financial Industry Activities and Affiliations

As previously noted, EACM is currently an indirect, wholly-owned subsidiary of BNY Mellon.

BNY Mellon is a Global Financial Services Company

BNY Mellon is a global financial services company providing a comprehensive array of financial services (including asset management, wealth management, asset servicing, clearing and execution services, issuer services and treasury services) through a world-wide client focused team that enables institutions and individuals to manage and service their financial assets. BNY Mellon Investment Management is the umbrella designation for BNY Mellon’s affiliated investment management firms, wealth management business and global distribution companies and is responsible, through various subsidiaries, for U.S. and non-U.S. retail, intermediary and institutional distribution of investment management and related services.

We may enter into transactions with unaffiliated counterparties or third party service providers who then use affiliates of ours to execute such transactions. Additionally, we may effect transactions in American Depositary Receipts (“ADRs”) or other securities and the involved issuers or their service providers may use affiliates for support services. Services provided by our affiliates to such unaffiliated counterparties, third party service providers and/or issuers may include, for example, clearance of trades, purchases or sales of securities serving as depositary bank to issuers of ADRs, providing foreign exchange services in connection with dividends and other distributions from foreign issuers to owners of ADRs, or other transactions not contemplated by us. Although one of our affiliates may receive compensation for engaging in these transactions and/or providing services, the decision to use or not use an affiliate of ours is made by the unaffiliated counterparty, third party service provider, or issuer. Further, we will likely be unaware that the affiliate is being used to enter into such transaction or service.

BNY Mellon and/or its other affiliates may gather data from us about our business operations, including information about holdings within client portfolios, which is required for regulatory filings to be made by us or BNY Mellon or other affiliates (e.g., reporting beneficial ownership of equity securities) or for other compliance, financial, legal or risk management purposes, pursuant to policies and procedures of EACM, BNY Mellon or other affiliates. This data is deemed confidential and procedures are followed to ensure that any information is utilized solely for the purposes intended.

BNY Mellon’s Status as a Bank Holding Company

BNY Mellon and its direct and indirect subsidiaries, including us, are subject to certain U.S. banking laws, including the Bank Holding Company Act of 1956, as amended (the “BHCA”), to regulation and supervision by the Board of Governors of the Federal Reserve System (the “Federal Reserve”), and to the provisions of, and regulations under, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”). The BHCA and the Dodd-Frank Act (and other applicable banking laws, and their interpretation and administration by the appropriate regulatory agencies, including but not limited to the Federal Reserve) may restrict the transactions and relationships among BNY Mellon, its affiliates (including us) and our clients, and may restrict our investments, transactions and operations. For example, the BHCA regulations applicable to BNY Mellon and us may, among other things, restrict our ability to make certain investments or the size of certain investments, impose a maximum holding period on some or all of our investments, and restrict our ability to participate in the management and operations of the companies in which we invest. In addition, certain BHCA regulations may require aggregation of the positions owned, held or controlled by related entities. Thus, in certain circumstances, positions held by BNY Mellon and its affiliates (including us) for client and proprietary accounts may need to be aggregated and may be subject to a limitation on the amount of a position that may be held. These limitations may have an adverse effect on our ability to manage client investment portfolios. For example, depending on the percentage of a company we and our affiliates (in the aggregate) control at any given time, the limits may: (1) restrict our ability to invest in a company for certain clients and/or (2) require us to sell certain client holdings of that company at a time when it may be undesirable to take such action. Additionally, BNY Mellon may in the future, in its sole discretion and without notice, engage in

activities impacting us in order to comply with the BHCA, Dodd-Frank Act or other legal requirements applicable to (or reduce or eliminate the impact or applicability of any bank regulatory or other restrictions on) us and accounts managed by us and our affiliates.

The Volcker Rule

The Dodd-Frank Act includes provisions that have become known as the “Volcker Rule,” which restrict bank holding companies, such as BNY Mellon and its subsidiaries (including us) from (i) sponsoring or investing in a private equity fund, hedge fund or otherwise “covered fund”, with the exception, in some instances, of maintaining a de minimis investment, subject to certain other conditions and/or exceptions, (ii) engaging in proprietary trading, and (iii) entering into certain transactions involving conflicts of interest (e.g., extensions of credit). The final Volcker Rule was jointly adopted by a group of U.S. federal financial regulators in December 2013 and generally was required to be implemented by BNY Mellon no later than July 21, 2017.

The Volcker Rule generally prohibits certain transactions involving an extension of credit between BNY Mellon and its affiliates, on the one hand, and “covered funds” managed by BNY Mellon and/or its affiliates (including us), on the other hand. BNY Mellon affiliates provide securities clearance and settlement services to broker-dealers on a global basis. The operational mechanics of the securities clearance and settlement process can result in an unintended intraday extension of credit between the securities clearance firm and a “covered fund.” As a result, we may be restricted in executing transactions for certain funds through broker-dealers that utilize a BNY Mellon affiliate as their securities clearance firm. Such restriction could prevent us from executing transactions through broker-dealers we would otherwise use in fulfilling our duty to seek best execution.

Affiliated Service Providers

In addition, to the extent permitted by law, placement agents and their respective affiliates may provide brokerage and certain other financial and securities services to us, our affiliates or related private funds. Such services, if any, will be provided at competitive rates. BNY Mellon is also affiliated with service providers, distributors and consultants that may provide services and may receive fees from BNY Mellon in connection with such services, which may incentivize such persons to distribute interests in a private fund or other BNY Mellon products.

From time to time, EACM will use research services provided to it by "participating affiliates" (as such term is used in relief granted by the staff of the U.S. Securities and Exchange Commission ("SEC") in a series of no-action letters allowing a registered adviser to use portfolio management and research services and resources provided by an affiliate subject to the supervision of the registered adviser). EACM has entered into an agreement with BNY Mellon Investment Management EMEA Limited ("BNYM EMEA" or the "participating affiliate"). Certain personnel of the participating affiliate provide research services as affiliate associated persons of EACM. These services assist EACM in managing certain client accounts and are rendered subject to EACM's supervision. EACM maintains investment discretion over client accounts. EACM and the participating affiliate will act in accordance with the series of SEC no-

action letters referred to above requiring the affiliated associated persons to be subject to the supervision of EACM and the SEC in the manner contemplated in such letters. Under the aforementioned agreement, EACM pays compensation to the participating affiliate for the services of the affiliate associated persons.

Other Relationships

In addition, BNY Mellon personnel, including certain of our employees, may have board, advisory, or other relationships with issuers, distributors, consultants and others that may have investments in a private fund and/or related funds or that may recommend investments in a private fund or distribute interests in a private fund. To the extent permitted by applicable law, BNY Mellon and its affiliates, including us and our personnel, may make charitable contributions to institutions, including those that have relationships with investors or personnel of investors. As a result of the relationships and arrangements described in this paragraph, placement agents, consultants, distributors and other parties may have conflicts associated with their promotion of a private fund, or other dealings with a private fund, that create incentives for them to promote a private fund.

Some of our clients may retain consulting firms to assist them in selecting investment managers. Some consulting firms provide services to both those who hire investment managers and to investment management firms. We may pay to attend conferences sponsored by consulting firms and/or purchase or utilize services from consulting firms where we believe those services will be useful to us. However, our clients and prospective clients should be aware that consulting firms might have business relationships with investment management firms that they recommend to their clients. BNY Mellon maintains, a Code of Conduct that addresses these types of relationships and the potential conflicts of interest they may present.

BNY Mellon, among several other leading investment management firms, has a minority equity interest in Luminex Trading and Analytics, LLC (“Luminex”), a registered broker-dealer under the Exchange Act, which was formed for the purpose of establishing and operating a “buy-side” owned and controlled electronic execution utility for trading securities (the “Alternative Trading System”). Transactions for clients for which we serve as adviser or sub-adviser may be executed through the Alternative Trading System. We and BNY Mellon disclaim that either is an affiliate of Luminex.

Affiliated Broker-Dealers and Investment Advisers

We are affiliated with a significant number of advisers and broker/dealers. Please see our Form ADV, Part 1A - Schedule D, Section 7.A for a list of our affiliated advisers and broker-dealers.

Several of our investment adviser affiliates have, collectively, a significant number of investment-related private funds for which a related person serves as sponsor, general partner or managing member (or equivalent), respectively. Please refer to the Form ADV, Part 1A – Schedule D, Section 7.B for each of our affiliated investment advisers for information regarding such firm’s private funds (if applicable) and such firm’s Form ADV, Part 1A – Schedule D,

Section 7.A for information regarding related persons that serve in a sponsor, general partner or managing member capacity (if applicable).

We may be prohibited or limited from effecting transactions for you because of rules in the marketplace, foreign laws or our own policies and procedures. In certain cases, we may face further limitations because of aggregation issues due to our relationship with affiliated investment management firms. *Please also refer to Item 12, below, for a discussion of trade aggregation issues.*

Affiliated Banking Institutions

BNY Mellon engages in trust and investment business through various banking institutions, including the Bank and BNY Mellon, National Association. These affiliated banking institutions may provide certain services to us, such as recordkeeping, accounting, marketing services, and referrals of clients. We may provide the affiliated banking institutions with sales and marketing materials regarding our investment management services that may be distributed under the name of certain marketing “umbrella designations” such as BNY Mellon, BNY Mellon Wealth Management, BNY Mellon IM, and BNY Mellon EMEA.

We may provide certain investment advice to the Bank. We also may provide certain investment advisory services to certain Bank clients and separately managed accounts (including separately managed accounts for which the Bank acts as trustee, custodian, or investment manager). Certain of our employees may also be employees of the Bank. In their capacity as employees of the Bank, our personnel provide discretionary investment advisory services to certain clients and also to certain collective investment funds of the Bank and we receive a fee for such services. In addition, our primarily institutional, employee benefit and foundation clients, and our affiliated employee benefit plan may invest in certain collective investment funds of the Bank.

Certain clients may have established custodial or sub-custodial arrangements with the Bank and other financial institutions that are affiliated with us. Furthermore, the Bank and other financial institutions that are affiliated with us may provide services (such as trustee, custodial or administrative services) to issuers of securities. Because of their affiliation with us, our ability to purchase securities of such issuers and to take advantage of certain market opportunities may be subject to certain restrictions and in some cases, prohibited.

Item 11. Code of Ethics, Participation or Interest in Client Transactions, Personal Trading

We have adopted a Code of Ethics that is made up of two parts:

1. BNY Mellon Code of Conduct (the “BNY Mellon Code”); and
2. BNY Mellon Personal Securities Trading Policy (the “PSTP”).

The BNY Mellon Code provides to employees the framework and sets the expectations for business conduct. In addition, it clarifies our responsibilities to clients, suppliers, government officials, competitors and the communities we serve and outlines important legal and ethical issues. Below are key principles of the BNY Mellon Code and an overview of areas covered by these principles:

1. Respecting Others: Mutual respect and professional treatment; harassment-free environment; safety and security; and managers' responsibilities.
2. Avoiding Conflicts: Gifts and entertainment; outside employment and business dealings; outside service as a director, trustee, officer, investment committee member, partner or business owner of a for-profit business or a not-for-profit organization; ownership of an outside business; fiduciary appointments; personal investment decisions; dealing with family and close personal friends; and corporate opportunities.
3. Conducting Business: fair competition and anti-trust; anti-corruption and improper payments; and combating financial crime and money laundering.
4. Working With Governments: Know the restrictions or limitations on presenting and receiving hospitality; observe a higher standard of care; and cooperate with government investigations and audits.
5. Protecting Company Assets: Financial integrity; additional standards for senior financial professionals; use of company assets; protecting client and employee records and observing our privacy principles; global records management program; use of computers, systems and corporate information; and inside or proprietary information;
6. Supporting Our Communities: Political activities; investor and media relations; charitable contributions and corporate sponsorship; and participating in trade associations, conferences and speaking engagements.

As a global financial institution, BNY Mellon and its subsidiaries (the "Company") are subject to certain laws and/or regulations governing the personal trading of securities. In order to ensure that all employees' personal investments are conducted in compliance with the applicable rules and regulations and are free from conflicts of interest, the Company has established limitations on personal trading, as reflected in the PTSP.

The PSTP sets forth procedures and limitations that govern the personal securities transactions of our employees in accounts held in their own names as well as accounts in which they have indirect ownership. We, and our related persons and employees, may, under certain circumstances and consistent with the PSTP, purchase or sell for their own accounts securities that we also recommend to clients.

The PSTP imposes different requirements and limitations on employees based on the nature of their business activities for [Firm name]. Each of our employees is classified as one of the following:

1. Investment Employee (“IE”): IE is an employee who, in the normal conduct of his/her job responsibilities, has access (or are likely to be perceived to have access) to nonpublic information regarding any advisory client’s purchase or sale of securities or nonpublic information regarding the portfolio holdings of any Proprietary Fund, is involved in making securities recommendations to advisory clients, or has access to such recommendations before they are public.
2. Access Decision Maker (“ADM”): Generally, employees are considered to be ADM Employees if they are portfolio managers or research analysts and make or participate in recommendations or decisions regarding the purchase or sale of securities for mutual funds or managed accounts. Portfolio managers of broad-based index funds and traders are not typically classified as ADM Employees.
3. Non-Classified Employee: Our employees are considered non-classified if they are not an IE or ADM.

PSTP Overview:

1. IEs and ADMs are subject to preclearance and personal securities reporting requirements, with respect to discretionary accounts in which they have direct or indirect ownership.
2. Transaction reporting is not required for non-discretionary accounts, transactions in exempt securities or certain other transactions that are not deemed to present any potential conflicts of interest.
3. Preclearance is not required for transactions involving certain exempt securities (such as open-end investment company securities that are not Proprietary Funds or money market funds and short-term instruments, non-financial commodities; transactions in non-discretionary accounts (approved accounts over which the employee has no direct or indirect influence or control over the investment decision-making process); transactions done pursuant to automatic investment plans; and certain other transactions detailed in the PSTP which are either involuntary or deemed not to present any potential conflict of interest.
4. We have a “Preclearance Compliance Officer” who maintains a “restricted list” of companies whose securities are subject to trading restrictions. This list is used by the Preclearance Compliance Officer to determine whether or not to grant trading authorization.
5. The acquisition of any securities in a private placement requires prior written approvals.

6. With respect to transactions involving BNY Mellon securities, all employees are also prohibited from engaging in short sales, purchases on margin, option transactions (other than employee option plans), and short-term trading (*i.e.*, purchasing and selling, or selling and purchasing BNY Mellon securities within any 60 calendar day period).
7. For IEs and ADMs, with respect to non-BNY Mellon securities, purchasing and selling, or selling and purchasing the same or equivalent security within 60 calendar days is discouraged, and any profits must be disgorged.
8. No covered employee should knowingly participate in or facilitate late trading, market timing or any other activity with respect to any fund in violation of applicable law or the provisions of such fund's disclosure documents.

A copy of our Code of Ethics will be provided upon request.

Interest in Client Transactions

Note that while each of the following types of transactions present conflicts of interest for us, as described below, we manage our accounts consistent with applicable law, and we follow procedures that are reasonably designed to treat our clients fairly and to prevent any client or group of clients from being systematically favored or disadvantaged.

Principal Transactions

"Principal transactions" are generally defined as transactions where an adviser, acting as principal for its own account or the account of an affiliated broker-dealer, buys any security from or sells any security to any client. A principal transaction may also be deemed to have occurred if a security is crossed between an affiliated EACM Fund and another client account. We may engage in principal transactions subject to the consent requirements under the Advisers Act and as permitted under applicable law. When we engage in a principal transaction, we may have an incentive to favor our own interests over the interests of our client. All principal transactions must be approved in advance by the Firm's Chief Compliance Officer.

Cross Transactions

From time to time securities to be sold on behalf of a client may be suitable for purchase by another client. In such instances, if we determine in good faith that the transaction is in the best interest of each client, then we may arrange for the securities to be transferred between the client accounts at an independently determined fair market value (a "cross trade"). Cross trades present conflicts of interest, as there may be an incentive for us to favor one client to the cross trade over the other. For example, if one client account pays performance fees to the Firm, while the other client account pays only asset-based fees, we would have a financial incentive to favor the performance fee paying account in the cross-trade. However, note that cross trades are subject to Advisers Act restrictions, and will only be undertaken by us as permitted under applicable law.

We do not receive fees or commissions when making these trades. All cross transactions must be approved in advance by the Firm's Chief Compliance Officer.

Transactions in Same Securities

We or our affiliates may invest, directly or indirectly, in the same securities that we or our affiliates recommend to clients. When we or an affiliate currently holds for our own benefit the same securities as a client, we could be viewed as having a potential conflict of interest. For example, we or our affiliate could be seen as harming the performance of the client's account for our own benefit if we short-sell the securities in our own account while holding the same securities long in the client account, causing the market value of the securities to move lower.

Interests in Recommended Securities/Products

We or our affiliates may recommend securities to clients, or buy or sell securities for client accounts, at or about the same time that we or one of our affiliates buys or sells the same securities for the our (or the affiliate's) own account. This practice may give rise to a variety of potential conflicts of interest, particularly with respect to aggregating, allocating and sequencing securities being purchased on both our (or its affiliate's) behalf and our clients' behalf. For example, we could have an incentive to cause a client or clients to participate in an offering because we desire to participate in the offering on our own behalf, and would otherwise be unable to meet the minimum purchase requirements. We could have an incentive to cause our clients to minimize their participation in an offering that has limited availability so that we do not have to share a proportionately greater amount of the offering to the client. Allocations of aggregated trades might likewise raise a potential conflict of interest as we may have an incentive to allocate securities that are expected to increase in value to ourselves. See Item 12 for a discussion of our brokerage and allocations practices and policies. Further, a potential conflict of interest could be viewed as arising if a transaction in our own account closely precedes a transaction in related securities in a client account, such as when a subsequent purchase by a client account increases the value of securities that were previously purchased for ourselves.

On occasion, we may recommend the purchase or sale, or purchase or sell, securities that are issued by our parent company, BNY Mellon, or underwritten by its affiliate, BNY Mellon Capital Markets, LLC, for client accounts if such recommendation or purchase or sale is in accordance with the client's guidelines and applicable law. In addition, we or a related person may recommend the purchase of securities in certain private funds which we manage and for which we may serve as sole director or managing member or collective investment funds maintained by the Bank (which are managed by EACM personnel in their roles as dual officers of the Bank and for which we receive a fee and the Bank may receive a custodial fee for custody services). EACM, its employees, and our related persons currently invest in certain private funds or collective funds that may also include client assets managed by us, and we and such related persons will receive proportional returns associated with our investment. Additionally, we may receive an investment management fee in our capacity as investment adviser or sub-adviser and related persons (including affiliated broker-dealers) may receive certain amounts associated with placement agent fees, custodial fees, administrative fees, loads, or sales charges.

Investments by Related Persons and Employees

We and our existing and future employees, our board members, and our affiliates and their employees may from time to time invest in products managed by us. We have developed policies and procedures to address conflicts of interest created by such investment. We are part of a large diversified financial organization that includes banks and broker-dealers. As a result, it is possible that a related person may, as principal, purchase securities or sell securities for itself that we also recommend to clients. We do permit our employees to invest for their own account within the guidelines and restrictions of the Code of Ethics, as described above. For more information, please see "Interests in Recommended Securities/Products" in this Item 11.

Agency Transactions Involving Affiliated Brokers

Neither we nor any of our officers or directors, acting as broker or agent, effects securities transactions for compensation for any client. We are part of a large diversified financial organization that includes broker-dealers. As a result, it is possible that a related person, other than our officers and directors, may, as agent, effect securities transactions for our clients for compensation. Please also see Item 10 and Item 12 for additional information relating to affiliate arrangements and with regard to purchases of securities in an offering where an affiliate acts as underwriter or a member of the underwriting. Please also see Schedule D, Section 7A of our Form ADV, Part 1A for a list of broker-dealers which are our affiliates.

Item 12. Brokerage Practices

Broker Selection: Generally, EACM utilizes a "fund-of-funds" or investment strategy and as such does not use brokers or have broker selection practices.

Soft Dollars: We do not use or receive research or other products or services in connection with client transactions.

Trade Allocation: EACM generally does not trade individual securities. Rather, as applicable, EACM allocates and reallocates capital to Portfolio Managers who affect trades according to their strategy. It is EACM's policy to allocate investments with Portfolio Managers and in Portfolio Funds among clients in a fair and equitable manner. EACM achieves this by first determining relevant investments and then determining eligible clients for which the trade is appropriate, given their investment objectives, practices and restrictions. For each client for whom it is deemed appropriate, EACM will consider cash available from flows and or possible withdrawals.

Once the set of eligible clients has been defined, the trade will be allocated equitably across the group. If there are no liquidity restrictions or a sufficient amount of capacity is available, this will usually occur in the form of an approximately pro rata distribution. If liquidity is restricted or a limited amount of capacity is available, EACM may choose to rotate such trades equitably among its clients.

Variables which may result in EACM varying from a pro rata allocation, or which it may consider in selecting the order of rotation, include whether a certain allocation would result in a position size exceeding the maximum desired, whether the allocation would have a meaningful investment impact on a portfolio, the relative position size with a particular manager among various clients and the timing of the receipt of any previous allocations.

Best Execution: Best execution has been defined by the SEC as the “execution of securities transactions for clients in such a manner that the client’s total cost or proceeds in each transaction is the most favorable under the circumstances.” The best execution responsibility applies to the circumstances of each particular transaction and an investment adviser must consider the full range and quality of a broker-dealer’s services, including, among other things, execution capability, commission rates, the value of any research, financial responsibility and responsiveness. Though EACM generally does not trade individual securities, EACM does periodically place foreign exchange (“FX”) trades for hedging purposes with Fund or separate account custodians. Generally, FX quotes are compared to Bloomberg for reasonableness.

Item 13. Review of Accounts

While EACM executes the liquidation process, all remaining EACM Funds and separate custom accounts are subject to continuing oversight.

EACM has in place an Investment & Product Committee as well as Risk and Compliance Committee comprising key Compliance, Risk Management, and Fund Administration officers which meets as needed, to formally review the liquidation process and requirements prior to implementation, as well as review significant events, errors, conflicts, or other material developments. Concerns are resolved or escalated accordingly, and material events are reported promptly to clients. As part of its compliance regime, BNY Mellon also requires a monthly reporting of significant events or violations from all subsidiaries.

Each of the investors in an EACM Fund or separate custom account receives capital statements from the account’s third party administrator, where applicable. Each of the investors will also receive annual audited financial statements of the EACM Fund or separate custom account as required.

Item 14. Client Referrals and Other Compensation

As part of the wind down process, EACM no longer solicits or accepts new clients/investors and/or additional investment by exiting clients/investors.

Item 15. Custody

Rule 206(4)-2 under the Advisers Act (the “Custody Rule”) defines “custody” to include a

situation in which an adviser or a related person holds, directly or indirectly, client funds or securities or has any authority to obtain possession of them, in connection with advisory services provided by the adviser.

For purposes of the Custody Rule, we may be deemed to have “custody” of certain client assets because:

- we have the ability to deduct fees from client custodial accounts
- client funds or securities are held by The Bank of New York Mellon (a related person of EACM), and
- we serve as general partner (or similar capacity) of EACM Funds organized as limited partnerships.

Generally, an adviser that is deemed to have custody of a client’s funds or securities, among other things, is required to arrange for an annual independent verification of such funds or securities in accordance with the Custody Rule (the “Surprise Exam Requirement”). However, the Custody Rule contains certain exceptions from the Surprise Exam Requirement. EACM will rely on the following exceptions:

1. Ability to Deduct Fees: advisers deemed to have custody of client assets solely because of their ability to deduct fees from client accounts are not subject to the Surprise Exam Requirement.
2. Related Person & Operational Independence: advisers deemed to have custody of client assets solely because a related person holds client assets will not be subject to the Surprise Exam Requirement, provided the adviser and the related person are “operationally independent.”
3. Pooled Investment Vehicles: advisers deemed to have custody of the assets of clients formed as pooled investment vehicles will not be subject to the Surprise Exam Requirement, provided the pool has audited financial statements that are prepared in accordance with generally accepted accounting principles and such statements are distributed to investors in the pool within 120 days (or 180 days for funds of funds) at the end of the fiscal year.

EACM Fund Investors: You will receive from the EACM Fund’s administrator or qualified custodian an account statement, at least quarterly, identifying the amount invested in the Fund at the end of the period and showing all transactions reflecting your interests in the Fund during the period. Please review these statements carefully. Generally, you will not receive account statements separately from us.

Separate Custom Accounts: You will receive statements and other documents from your administrator or qualified custodian depending on your contract. Please review these statements carefully. You are strongly urged to compare any account reporting you receive from us with those that you receive from your qualified custodian.

We do not maintain physical possession of client assets held in separate custom accounts. Typically each of our clients independently selects a custodian with whom it contracts directly. Our authority to instruct the client's custodian is limited to that granted by the client to us in each respective investment management agreement.

Item 16. Investment Discretion

We typically accept discretionary investment authority over client assets, and clients must grant this discretionary authority to us in writing via a contract, power of attorney, and/or through an appointment to become the investment adviser of a private fund. In all cases, however, such discretion is to be exercised in a manner consistent with the stated investment objectives and guidelines for the particular client account.

Clients must deliver their investment guidelines and restrictions to us in writing, and we will adhere to such guidelines and restrictions when making investment decisions.

Item 17. Voting Client Securities

The Securities and Exchange Commission (the "SEC") adopted Rule 206(4)-6, which requires registered investment advisers that exercise voting authority over client securities to implement proxy voting policies effective August 6, 2003. In compliance with such rules, EACM has adopted proxy voting policies and procedures (the "Policies"). The general policy is to vote proxy proposals, amendments, consents or resolutions (collectively, "proxies") relating to investments in Portfolio Funds and/or separate accounts of securities managed by third party investment advisers in a manner that serves the best interest of the EACM Fund/separate account, as determined by EACM in its discretion, taking into account the following factors: (i) the impact on the value of the returns; (ii) the attraction of additional capital; (iii) the alignment of the interests of the Portfolio Fund's or separate account's management with the interest of the beneficial owners, including establishing appropriate incentives for such management; (iv) the costs associated with the proxy; (v) the impact on redemption or withdrawal rights; (vi) the continued or increased availability of portfolio information; and (vii) industry and business practices. The policies also address how the adviser will vote proxies with regard to specific matters, such as voting rights, termination or liquidation of a Portfolio Fund or separate account, approval of Board members or advisors and other issues. In the situations where a client account owns an interest in a Portfolio Fund, the respective Portfolio Manager votes the proxies for that fund's underlying securities.

We will furnish a copy of our Proxy Voting Policy to each client upon request.

Item 18. Financial Information

In certain circumstances, registered investment advisers are required to provide you with financial information or disclosures about their financial condition in this Item. EACM has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to

clients and has never been the subject of a bankruptcy proceeding.
