This brochure provides information about the qualifications and business practices of The Buxton Helmsley Group, Inc. If you have any questions about the contents of this brochure, please contact us at +1-917-477-3774. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission ("SEC") or by any state securities authority. Investment adviser registration does not imply a certain level of skill or training.

Additional information about The Buxton Helmsley Group, Inc. also is available on the SEC's website at www.adviserinfo.sec.gov.

MATERIAL CHANGES

This brochure (“Brochure”) is dated January 14, 2019. “Material Changes” only include those changes made since the last version/update of this brochure. For ease of reference, capitalized terms that are defined when first used in the Brochure are also set forth in the Glossary.

Material changes include:

- Amendments to item 10 and 12 regarding indirect compensation.
- Amendment to item 10 regarding current services being offered.

BUXTON HELMSLEY ASSET MANAGEMENT

This Brochure relates to The Buxton Helmsley Group, Inc. (“BH” or “Buxton Helmsley”).

The Buxton Helmsley Group, Inc. is a private company that is a full-service financial services organization, servicing a diversified group of individuals, institutions and other entities.

BH has been providing financial solutions for investors since its founding in 2015 by Buxton Helmsley Holdings, Inc., the conglomerate holding company based in New York City. BH’s advisory services are offered through a variety of investment products and arrangements, depending on the strategy. These include separately managed accounts, sometimes including the use of automated systems in order to affect multiple managed accounts with similar investment objectives simultaneously. Depending on the strategy, investment advice to clients may be provided on a discretionary or non-discretionary basis.

In this Brochure, The Buxton Helmsley Group, Inc. and their respective affiliates, directors, partners, trustees, managers, members, officers and employees are referred to collectively as “BH”. The separately managed accounts and pooled investment vehicles such as mutual funds, collective trusts and alternative investment funds that are sponsored, managed or advised by BH are referred to in this Brochure as “Advisory Accounts.”

“Advisory Account” assets under management as of this brochure date include \$4,361,439 managed on a discretionary basis.

Below is a description of the strategies and solutions utilized by BH in managing and advising Advisory Accounts.

Fundamental Equity: Conducts original, bottom-up fundamental research across a broad range of country-specific and multi-regional portfolios. Fundamental Equity manages strategies across a broad range of capitalizations and styles, spanning U.S., global developed, growth and emerging markets. Specifically, Fundamental Equity manages growth equity, value equity, core equity, global developed markets equity and growth and emerging markets equity strategies.

Global Fixed Income and Liquidity Management: Seeks to capitalize on investment opportunities across countries, currencies, sectors and issuers. The Fixed Income program offers single-sector, multi-sector, short duration and government and municipal/tax-free strategies and uses independent specialists for bottom-up and top-down decisions, and for generating strategies

within their areas of expertise. The Global Liquidity Management program within Fixed Income helps clients to construct liquidity management solutions that encompass commercial and government securities as well as multicurrency options.

BH Risk Management Strategies: The Asset Risk Management program develops investment solutions within customized capital and risk management frameworks, including assisting clients in assessing financial risk. The Asset Risk Management business also incorporates specialized management and reporting, unique to the needs of individual clients. These services include, among other things, developing investment and hedging strategies in connection with the management of client accounts. This hedging may include, but is not limited to, the use of equity options.

INVESTMENT RESTRICTIONS

Clients may impose reasonable restrictions on the management of their separate accounts, including by restricting particular securities or types of investments, provided that BH accepts such restrictions. Any such restrictions will be reflected in the investment guidelines or other documentation applicable to the Advisory Account.

Absent specific instructions to the contrary, certain types of account limitations requested by clients, for example prohibiting investments in particular industries or socially responsible categories, may be defined or identified by reference to information provided by a third-party service provider selected by BH. BH will apply such restrictions based on BH’s internal policies and the policies and methodologies of the service provider. The methodology used by BH or these service providers to analyze companies may change without notice.

Third-party managers appointed by BH on behalf of clients or Manager of Manager Funds are responsible for making investment decisions consistent with the investment guidelines and restrictions developed by BH. Where BH is the investment adviser to a pooled investment vehicle, investment objectives, guidelines and any investment restrictions are not tailored to the needs of individual investors in those vehicles, but rather are described in the prospectus or other relevant offering document for the vehicle. When a client invests in a third-party managed fund, investment objectives, guidelines and any investment restrictions are described in the prospectus or other relevant offering document for the third-party managed fund.

Wrap Fee Program Participation

BH does not currently participate in wrap fee programs.

Item 5 – Fees and Compensation

COMPENSATION *for* ADVISORY SERVICES

Separately Managed Accounts

Clients generally pay advisory fees for separate account management based on a percentage of assets (generally the net asset value of the account) in their Advisory Account(s). BH's actual fees, minimum fees and minimum account sizes may be negotiated, and a client may pay more or less than the fees set forth in Appendix A, or more or less than similar clients, depending on factors that may include the particular circumstances of the client, the size and scope of the overall client relationship, client customization of the investment guidelines, additional or differing levels of servicing, or as may be otherwise agreed with specific clients. Servicing arrangements such as reporting may also vary among clients. Clients with multiple Advisory Accounts may be able to aggregate accounts managed by BH within each product or across Advisory Accounts, for purposes of applying lower fee rates at higher asset levels (referred to herein as "breakpoints") or reduced fee schedules. BH may, in its discretion, offer certain clients lower fees, waive minimums on fees, or provide lowest available fee arrangements. Clients that negotiate fees with differing breakpoints, including flat fees and performance-based fees, may end up paying a higher fee than as set forth in the standard fee schedule set forth in Appendix A as a result of fluctuations in the amount of the client's assets under management and account performance. For BH's standard fee schedules, please see Appendix A.

Underlying Fund Fees

Where BH has recommended or invested client assets in pooled investment vehicles, clients generally will pay all fees and expenses applicable to an investment in the pooled investment vehicles, including asset-based, performance-based, carried interest, incentive allocation and other compensation payable to the managers in consideration of the managers' services to the pooled investment vehicles, as well as any fees paid for advisory, administration, distribution, 12b-1, shareholder servicing, sub-accounting, sub-transfer agency and other services, which may be paid to BH or its affiliates. See also Item 10, Other Financial Industry Activities and Affiliations. An investor in a fund-of-funds vehicle will also bear a proportionate share of the fees and

expenses of each investment fund in which the fund-of-funds invests. All fees and expenses of underlying investment funds are generally in addition to the fees each Advisory Account pays to BH.

Fees for Services to Portfolio Companies

BH and their affiliates may receive deal fees, sponsor fees, monitoring fees or other fees for services provided to portfolio companies. Managers of investment funds in which Advisory Accounts invest and their affiliates may also receive such fees. Any such fees may not be offset against the fees that the Advisory Accounts and investment funds would otherwise be required to pay to BH or the investment fund managers. The fees and expenses imposed by BH as manager of Advisory Accounts, or by managers of investment funds in which Advisory Accounts invest, may offset investment profits, thus reducing returns.

Considerations Related to Asset-Based and Performance-Based Compensation

BH may receive different types of compensation in respect of Advisory Accounts. Asset-based compensation is based on the market value of the investments in the Advisory Account and is paid without regard to the performance of the Advisory Account. BH may receive significant asset-based compensation in respect of an Advisory Account even if the Advisory Account loses money. Performance-based compensation is contingent on Advisory Account performance, and in some cases is subject to a preferred return or a high water mark. Considerations related to performance-based compensation are set forth in Item 6, Performance-Based Fees and Side-By-Side Management.

Compensation Received by Buxton Helmsley

Compensation received by BH and its affiliates related to various services to Advisory Accounts that are pooled investment vehicles and investment funds in which Advisory Accounts invest will generally be retained by BH and its affiliates. Except to the extent required by applicable law, BH is not required to offset such compensation against fees and expenses a client or Advisory Account may otherwise owe BH and its affiliates. In certain circumstances, however, clients may negotiate for certain of the fees charged in respect of Advisory Accounts that are pooled investment vehicles to be credited against the fees BH charges such clients in respect of other Advisory Accounts in which they invest.

CALCULATION *and* DEDUCTION *of* ADVISORY FEES

Advisory and management fees for Advisory Accounts generally are calculated and billed either monthly or quarterly in arrears depending on the Advisory Account, and will be deducted from the account automatically, subject to applicable law, upon assessment unless invoicing is arranged for that Advisory Account. If invoicing is arranged for Advisory and management fees, invoiced fees are payable within thirty (30) days upon the client's receipt of an invoice. The frequency of calculation of incentive fees or allocations (which may take the form of a carried interest), and the timing of payments in respect thereof, will depend on the specific Advisory Account. Subject to negotiation, fees will be prorated through the date of liquidation or termination. Where an affiliate of BH is the custodian, fees and other expenses will be automatically deducted from the client's Advisory Account, unless other arrangements have been made. Where the custodian is a third party, clients may arrange to have such fees debited directly from the client's account for credit to BH, subject to applicable law.

OTHER FEES *and* EXPENSES

In addition to the advisory fees described above, clients will be subject to other fees and expenses in connection with BH's advisory services. This may include, without limitation, fees and expenses such as those related to participation in bondholders groups and restructurings. BH may determine from time to time to pay for all or a portion of such fees and expenses relating to portfolio holdings for certain Advisory Accounts while such fees and expenses may be borne by the investors in pooled investment vehicles managed or advised by BH.

Transaction Charges

BH's clients will pay brokerage commissions, mark-ups, mark-downs and other commission equivalents as well as spreads and/or transaction costs related to transactions effected for their Advisory Accounts to executing broker-dealers. As described in Item 12, Brokerage Practices, BH will effect these transactions subject to its obligation to seek best execution. The different types of transaction charges include:

- **Commissions:** the amount charged by a broker for purchasing or selling securities, real estate or other investments as an agent for the client, which is disclosed on client's trade confirmations or otherwise.
- **Commission equivalents:** an amount charged by a dealer for purchasing or selling securities or other investments in certain riskless principal transactions. Riskless principal transactions refer to transactions in which a dealer, after

having received an order from a client to buy a particular security, purchases such security from another person to offset a contemporaneous sale to the client or, after having received an order from a client to sell a particular security, sells such security to another person to offset a contemporaneous purchase from the client.

- **Mark-ups:** the price charged to a client, less the prevailing market price, which is included in the price of the security.
- **Mark-downs:** the prevailing market price, less the amount a dealer pays to purchase the security from the client, which is included in the price of the security.
- **Spreads:** the difference between the current purchase or bid price (that is, the price someone is willing to pay) and the current ask or offer price (that is, the price at which someone is willing to sell), which is reflected in the price of the security. The difference or spread narrows or widens in response to the supply and demand levels of the security.

In some cases, BH may determine that best execution may be sought through a broker-dealer other than the Sponsor, including potentially a BH affiliate. To the extent that transactions are effected through broker-dealers, those broker-dealers, may have commercial interests in transactions that are adverse to Advisory Accounts, such as obtaining favorable commission rates, mark-ups and mark-downs, other commission equivalents and lending rates and arrangements. No accounting to Advisory Accounts will be required, and broker-dealers will be entitled to retain all such fees and other amounts and no advisory fees or other compensation will be reduced thereby.

Additional information about transaction charges is available in Item 12, Brokerage Practices. See also Item 11, Code of Ethics, Participation or Interest in Client Transactions and Personal Trading.

Custody and Other Fees

Custody fees and all other fees charged by service providers engaged by clients to provide services relating to Advisory Accounts are levied by the custodian or other service providers for the Advisory Account and are not included in the advisory fees payable to BH. In addition, to the extent Buxton Helmsley provides other services to Advisory Accounts not included in the advisory fee, Buxton Helmsley will be entitled to retain all such fees and other amounts and no fees or other compensation will be reduced thereby.

PREPAID FEES

BH generally does not charge clients fees in advance.

COMPENSATION *for the SALE of* SECURITIES

Generally, except as described below, BH Personnel (as defined below) do not receive transaction-based compensation for the sale of securities or other investment products based upon a predetermined formula. Compensation of BH Personnel consists of a base salary and discretionary variable compensation. While the base salary is established at the beginning of each year, year-end discretionary variable compensation is based on a variety of factors, including, but not limited to: an individual's contribution to net revenues for the past year which in part are derived from advisory fees, and for certain Advisory Accounts, performance-based fees; individual performance; contributions to overall firm performance; the performance of BH and Buxton Helmsley; and depending on the individual's role, delivery of investment performance. Certain BH Personnel involved in the marketing, promotion and/or sale of investment products may be eligible to receive transaction-based compensation based upon a predetermined formula that is in part related to the sale of such products. Certain of BH's affiliates and their personnel may receive compensation based on the sale of securities or other investment products including interests in Accounts (as defined below), including Advisory Accounts. See Item 11, Code of Ethics, Participation or Interest in Client Transactions and Personal Trading.

CLIENT SELECTION *of* UNAFFILIATED BROKERS

Investment products recommended by BH are purchased directly through the broker-dealer which Buxton Helmsley has a relationship with. In certain circumstances, however, BH may deem it necessary or advantageous to acquire an investment product through a broker-dealer that is not affiliated with BH, which may result in fee and execution charges that are higher or lower than those charged by other broker-dealers.

Item 6 – Performance-Based Fees and Side-By-Side Management

BH may manage Advisory Accounts that pay performance-based fees and Advisory Accounts that pay asset-based fees and utilize the same investment strategy and invest in the same assets. A performance-based fee may include carried interest, override, incentive allocation and other similar forms of performance-based compensation.

Performance-based fee arrangements for Advisory Accounts may vary among clients and investment strategies. For example, Advisory Accounts that invest in readily marketable securities often provide for an asset-based fee based on the market value of the investments in the account at specified month/quarter ends and/or a performance-based fee often calculated by reference to the relevant high water marks for such Advisory Account. Others, such as Advisory Accounts that invest in assets which lack a readily available market value, may provide for an asset-based fee based on the investor's capital commitment to the account and a performance-based fee that applies once investors have received a return of their contributed capital and a specific minimum return. In addition, certain Advisory Accounts may be subject to a performance-based fee that is paid only after a specified return has been achieved (a "preferred return") as compared to other Advisory Accounts that are subject to a performance-based fee that is not subject to a preferred return, or are subject to a lower preferred return or a performance-based fee that is subject to a high water mark. These different types of performance-based fees may make it more likely that BH will receive a higher performance-based fee for certain Advisory Accounts than it will for other Advisory Accounts.

Advisory Accounts that pay performance-based fees reward BH for positive outperformance in those Advisory Accounts. Performance-based fee arrangements provide a heightened incentive for portfolio managers to make investments that may present a greater potential for return but also a greater risk of loss, or that may be more speculative than would exist if only asset-based fees were applied.

The simultaneous management of Advisory Accounts that pay performance-based fees and Advisory Accounts that only pay an asset-based fee, or that pay performance-based fees that are calculated in a different manner, creates a conflict of interest as the portfolio manager may have an incentive to favor Advisory Accounts with the potential to receive greater fees. For instance, a portfolio manager will be faced with a conflict of interest when allocating scarce investment opportunities, given the possibly greater fees from Advisory Accounts that pay performance-based fees, as opposed to Advisory Accounts that pay no performance-based fees. To address these types of conflicts, BH has adopted policies and procedures under which allocation decisions may not be influenced by fee arrangements and investment opportunities will be allocated in a manner that BH believes is consistent with its obligations as an investment adviser. BH's policies and procedures relating to allocation of investment opportunities are described further below. Investment groups

within BH are subject to these and/or other similar policies and procedures that are consistent with BH's obligations as an investment adviser and that address circumstances that may be unique to their businesses.

In addition, BH's actions for one Advisory Account may affect other Advisory Accounts. For additional information about these situations, please see Item 11, Code of Ethics, Participation or Interest in Client Transactions and Personal Trading.

SIDE-BY-SIDE MANAGEMENT *of* ADVISORY ACCOUNTS; ALLOCATION *of* OPPORTUNITIES

BH may manage or advise multiple Advisory Accounts (including Advisory Accounts in which Buxton Helmsley and personnel of Buxton Helmsley have an interest) that have investment objectives that are similar and that may seek to make investments or sell investments in the same securities or other instruments, sectors or strategies. This creates potential conflicts, particularly in circumstances where the availability or liquidity of investment opportunities is limited. Areas in which such limited opportunities may exist include, without limitation, in local and emerging markets, high yield securities, fixed income securities, regulated industries, real estate assets, primary and secondary interests in alternative investment funds, investments in MLPs in the oil and gas industry and IPOs/New Issues (as defined below).

To address these potential conflicts, BH has developed allocation policies and procedures that provide that personnel making portfolio decisions for Advisory Accounts will make purchase and sale decisions for, and allocate investment opportunities among, Advisory Accounts consistent with BH's fiduciary obligations. These policies and procedures may result in the pro rata allocation (on a basis determined by BH) of limited opportunities across eligible Advisory Accounts managed by particular portfolio management person(s), but in many other cases the allocations reflect numerous other factors including those described below. Advisory Accounts managed by different portfolio management persons are generally viewed separately for allocation purposes, including for purposes of allocations of private equity or IPO/New Issue opportunities.

Allocation-related decisions for Advisory Accounts may be made by reference to one or more factors and suitability considerations, including, without limitation:

- Advisory Account investment horizons and objectives;
- Different desired levels of exposure to certain strategies, including sector oriented, concentrated new opportunities or other strategies;

- Client-specific investment guidelines and restrictions, including, without limitation, the ability to hedge through short sales or other techniques;
- The expected future capacity of applicable Advisory Accounts;
- Limits on BH's brokerage discretion, including client directed brokerage arrangements;
- Tax sensitivity and objectives of Advisory Accounts;
- Cash and liquidity considerations, including, without limitation, availability of cash for investment;
- Relative sizes and expected future sizes of applicable Advisory Accounts and eligible capital;
- Availability of other appropriate investment opportunities;
- Legal and regulatory restrictions affecting certain Advisory Accounts or affecting holdings across Advisory Accounts, which may result in adjusting existing or future positions across Advisory Accounts and may consequently open up capacity for new Advisory Accounts or Advisory Account cash-flows;
- Minimum denomination, minimum increments, de minimis threshold and round lot considerations;
- Current investments held by Advisory Accounts similar to the applicable investment opportunity; and
- Suitability requirements and the nature of the investment opportunity.

Suitability considerations may include:

- Relative attractiveness of an investment to different Advisory Accounts;
- Concentration of industry sector, sub-strategy, or positions in an Advisory Account;
- Appropriateness of a security for the applicable benchmark, if any, and benchmark sensitivity of an Advisory Account;
- An Advisory Account's risk tolerance, risk parameters and strategy allocations;
- Use of the opportunity as a replacement for an opportunity that BH believes to be attractive for an Advisory Account but is otherwise unavailable to the Advisory Account; and/or
- Considerations relating to hedging a position in a pair trade.

Non-proportional allocations may occur across Advisory Accounts, including in fixed income securities due to the availability of multiple appropriate or substantially similar investments in fixed income strategies, as well as due to

differences in benchmark factors, hedging strategies, or other reasons. In addition, the fact that certain personnel of BH are dedicated to one or more Advisory Accounts or clients may be a factor in determining the allocation of opportunities sourced by such personnel. Reputational matters may also be considered.

BH may, from time to time, develop and implement new trading strategies or seek to participate in new trading strategies and investment opportunities. These strategies and opportunities may not be employed in all Advisory Accounts or employed pro rata among Advisory Accounts where they are used, even if the strategy or opportunity is consistent with the objectives of such accounts. Further, a trading strategy employed for one Advisory Account that is similar to, or the same as that of, another Advisory Account may be implemented differently, sometimes to a material extent, depending on a variety of factors, including the portfolio managers involved in managing the trading strategy for the Advisory Account, and the time difference associated with the location of different portfolio management person(s). In addition to the factors described above, BH may make decisions based on other factors such as strategic fit and other portfolio management considerations, including an Advisory Account's capacity for such strategy or opportunity, the liquidity of the strategy and its underlying instruments, the Advisory Account's liquidity, the business risk of the strategy relative to an Advisory Account's overall portfolio make-up, and the lack of efficacy of, or return expectations from, the strategy for the Advisory Account. For example, such a determination may, but will not necessarily, include consideration of the expectation that a particular strategy will not have a meaningful impact on an Advisory Account given the overall size of the account, the limited availability of opportunities in the strategy and/or the availability of other strategies for the account.

During periods of unusual market conditions, BH may deviate from its normal trade allocation practices. For example, this may occur with respect to the management of unlevered and/or long-only Advisory Accounts that are typically managed on a side-by-side basis with levered and/or long-short Advisory Accounts.

As a result of the various considerations above, there will be cases where certain Advisory Accounts (including Advisory Accounts in which Buxton Helmsley and personnel of Buxton Helmsley have an interest) receive an allocation of an investment opportunity when other Advisory Accounts do not. The application of these considerations may cause differences in the performance of different Advisory Accounts that have similar strategies.

In addition, in some cases BH may make investment recommendations to Advisory Accounts where the Advisory Accounts make the investment independently of BH. In circumstances in which there is limited availability of an investment opportunity, if such Advisory Accounts invest in the investment opportunities at the same time as or prior to other Advisory Accounts, the availability of the investment opportunity for other Advisory Accounts will be reduced irrespective of BH's policies regarding allocation of investments.

IPO/NEW ISSUE ALLOCATION POLICIES

Allocation of initial public offerings or new issues ("IPO/New Issue") will be effected consistent with fiduciary duties and in accordance with the general allocation policies and procedures outlined above under "Side-By-Side Management of Advisory Accounts; Allocation of Opportunities." The application of the relevant factors may result in non-pro rata allocations, and certain Advisory Accounts (including Advisory Accounts in which Buxton Helmsley and personnel of Buxton Helmsley have an interest) may receive an allocation when other Advisory Accounts do not. Allocations may be adjusted under certain circumstances, for example in situations of scarcity where pro rata allocations would result in de minimis positions or odd lots. Furthermore, some Advisory Accounts may not be eligible to participate in an IPO/New Issue where, for example, the investment guidelines for an Advisory Account prohibit IPOs/New Issues, the account is a directed brokerage account, the account is owned by persons restricted from participating in IPOs/New Issues pursuant to Financial Industry Regulatory Authority Rules 5130 and/or 5131, as amended, supplemented and interpreted from time to time, or other applicable laws or rules or prudent policies in any jurisdiction. Advisory Accounts managed by different portfolio management person(s) are generally viewed separately for allocation purposes, including for purposes of allocation of IPOs/New Issues.

DISCRETIONARY *and* NON-DISCRETIONARY ACCOUNTS

BH may provide non-discretionary investment advisory services where BH advises Advisory Accounts on purchasing, selling, holding, valuing, or exercising rights with respect to particular investments, but does not have discretion to execute purchases or sales on behalf of the Advisory Accounts without the specific instruction of the client. BH may advise with respect to the same or similar securities in discretionary and non-discretionary Advisory Accounts. There may be timing differences related to the transmission of advice to non-discretionary Advisory

Account clients for consideration and a determination of whether to act on the advice. As a result, BH may execute trades in investments for discretionary Advisory Accounts in advance of BH communicating with non-discretionary account clients about those investments. As a result, particularly with large orders or where the investments are thinly traded, non-discretionary Advisory Accounts may receive prices that are less favorable than prices obtained for discretionary Advisory Accounts.

In other cases, BH may decide to separate advice in discretionary and non-discretionary accounts. For example, in connection with non-discretionary Advisory Accounts, BH may have information with respect to pending purchases or sales, or relating to a non-discretionary client's business and financial position. In the event that BH considers such information to be of a sensitive nature, BH may, on a case by case basis, elect to implement internal policies and procedures (including where appropriate, the use of informational barriers) to manage the flow of such information within BH, which may prevent the transmission or affect the timing of transmission of certain advice to some accounts.

PROVISION of PORTFOLIO INFORMATION to MODEL PORTFOLIO ADVISERS

BH may provide model portfolios to affiliated and unaffiliated investment advisers ("Model Portfolio Advisers") who intend to use such model portfolios to assist such advisers in developing their own investment recommendations and managing their own accounts. Accounts managed by Model Portfolio Advisers are referred to herein as "Model Portfolio Accounts."

BH may (but need not) delay communicating information regarding the composition of model portfolios or any updates thereto until after other Advisory Accounts have commenced trading. In such circumstances, Model Portfolio Advisers, including personnel of the Private Wealth Management unit of Buxton Helmsley ("PWM") who make execution decisions for Model Portfolio Accounts, will not have had the chance to evaluate or act upon recommendations in relation to their clients. It is also possible that Model Portfolio Advisers, including PWM personnel who make execution decisions for Model Portfolio Accounts, may act upon such recommendations before other Advisory Accounts have commenced trading based on such recommendations. As a result, trades on behalf of accounts that commence trading after the others may be subject to price movements, particularly with large orders or where the securities are thinly traded. As a result, Model Portfolio Accounts may not track the model and Model Portfolio Accounts and Advisory

Accounts may receive prices that are less favorable than the prices obtained for other accounts.

Item 7 – Types of Clients

TYPES of CLIENTS

BH provides investment solutions to a range of individual and institutional investors worldwide. BH's clients and prospects include individual persons, banks or thrift institutions, investment companies, pension and profit sharing plans, trusts, estates, charitable organizations, insurance companies, corporations and other business entities. In addition to those types of clients, BH may provide investment advice to foreign government entities, local authorities, public international bodies, as well as mutual funds, closed end funds, exchange traded funds, collective trusts, long-only pooled investment vehicles (direct and Manager of Manager Funds), hedge funds (direct and fund-of-funds), private equity funds and other private investment vehicles (e.g., AIMS Program Funds).

ACCOUNT REQUIREMENTS

BH does not generally impose a minimum dollar value of assets in order to open or maintain an account. However, BH's standard fee schedules are designed for separately managed accounts that generate a minimum annual fee.

In the case of consulting, BH generally requires clients to have minimum assets under management of \$1,000,000.

To open or maintain an Advisory Account with BH, clients are required to sign an investment advisory agreement that, among other things, details the nature of the investment advisory authority given to BH. Under delegated authority from one or more of its affiliates, BH may also manage accounts of its affiliates' clients and will receive a portion of the fee or other compensation paid by the client from the affiliate for such services. In such cases, the client will have entered into an investment advisory agreement with Buxton Helmsley or with BH's affiliate and not BH.

In the case of private investment funds, U.S. investors must generally be "accredited investors" as defined in Rule 501(a) of Regulation D under the U.S. Securities Act of 1933, as amended (the "1933 Act"), and "qualified purchasers" as defined in Section 2(a)(51)(A) of the Investment Advisers Act of 1940, as amended (the "Advisers Act"). The minimum amount investors must invest in such BH-managed fund is set forth in each such fund's

prospectus or other relevant offering document and varies from fund to fund depending on the particular investment product. Such minimum amount is typically \$1,000,000 - \$5,000,000 but may be waived in the general partner's discretion.

Item 8 – Methods of Analysis, Investment Strategies and Risk of Loss

METHODS of ANALYSIS and INVESTMENT STRATEGIES

BH and its investment personnel offer a broad range of products across asset classes, regions and the risk spectrum. The investment personnel are described below.

BH's investment personnel use a variety of proprietary and non-proprietary analysis and data to evaluate investment options and formulate investment advice for Advisory Accounts. The methods of analysis and particular account characteristics will vary depending on the particular investment strategy offered, but may include fundamental or quantitative (including asset allocation models) analysis. Additional sources of research information include other general information and analysis as may be appropriate under the circumstances. Advisory Accounts differ from portfolio management group to portfolio management group, and guidelines, strategies and sub-strategies may differ among Advisory Accounts.

Advisory Account clients should understand that all investment strategies and the investments made pursuant to such strategies involve risk of loss, including the potential loss of the entire investment in the Advisory Accounts, which clients should be prepared to bear. The investment performance and the success of any investment strategy or particular investment can never be predicted or guaranteed, and the value of a client's investments will fluctuate due to market conditions and other factors. The investment decisions made and the actions taken for Advisory Accounts will be subject to various market, liquidity, currency, economic, political and other risks, and investments may lose value.

Fundamental Equity

Fundamental Equity utilizes fundamental research in choosing securities for an Advisory Account. Fundamental Equity may also use macro analysis of numerous economic and valuation variables to anticipate changes in company earnings and the overall investment climate. Fundamental Equity is able to draw on the research and market expertise of securities dealers, including

affiliates of BH. Equity investments in an Advisory Account will generally be sold when Fundamental Equity believes that the market price fully reflects or exceeds the investments' fundamental valuation or when other more attractive investments are identified. Fundamental Equity Advisory Accounts generally invest in common stocks, preferred stocks, interests in real estate investment trusts, convertible debt obligations, convertible preferred stocks, equity interests in trusts, partnerships, joint ventures, limited liability companies and similar enterprises, warrants and stock purchase rights and synthetic and derivative instruments that have economic characteristics related to equity securities.

Fundamental Equity may also offer Advisory Accounts that invest all or a portion of their assets in MLPs engaged in, among other sectors, the energy, oil and gas sectors and securities of other companies in these sectors. Investments by the MLP group will be selected based on a range of criteria, including valuation, sector exposure, stability of cash flow and expected distribution growth.

Global Fixed Income and Liquidity Management

The Global Fixed Income and Liquidity Management personnel uses specialist person(s) for generating strategies within their areas of expertise. The Global Fixed Income investment process is generally based on four basic elements:

- (i) Developing a long-term risk budget. The fixed income personnel establishes a "risk budget" or range that a particular Advisory Account may deviate from its respective benchmarks with respect to sector allocations, country allocations, securities selection and, to a lesser extent, duration. Following careful analysis of risk and return objectives, the personnel allocates the overall risk budget to each component strategy to optimize potential return;
- (ii) Generating investment views and strategies. The strategy personnel generates investment ideas within their areas of specialization. Generally, there are top-down strategy personnel responsible for cross-sector, duration, country and currency decisions and bottom-up strategy personnel that formulate sub-sector allocation and security selection decisions;
- (iii) Portfolio construction. The strategy personnel collaborate to build a diversified portfolio of individual securities consistent with each client's overall risk and return objectives; and

- (iv) Dynamic adjustments based on market conditions. As market conditions change, the volatility and attractiveness of sectors and strategies can change as well. To optimize an Advisory Account's risk/return potential within its long-term risk budget, the portfolio managers dynamically adjust the mix of top-down and bottom-up strategies. At the same time, the strategy personnel adjusts their strategies and security selections in an effort to optimize performance within their specialty areas.

BH's Liquidity Management personnel uses a combination of active duration management, term structure, and sector and security selection decisions. Duration and term structure decisions reflect BH's view on the timing and direction of monetary policy, as well as an Advisory Account's immediate and near-term cash requirements. Sector and individual security selection decisions also depend on Advisory Account guidelines, as well as on fundamental and quantitative sector research that seeks to optimize the risk/return profile of the portfolio. Security selection is restricted to issuers that meet certain credit standards.

Alternative Investments and Manager Selection

Private Equity

BH primarily facilitates investments in the private equity market by making commitments to third-party managed private equity funds (primary investments), investing directly in companies alongside third-party managers (direct co-investments), and by acquiring existing private equity investments on the secondary market (secondary investments). BH creates portfolios on behalf of investment funds and separate accounts investing around the world and across the private equity landscape, providing exposure to strategies such as leveraged buyouts, growth and venture capital, distressed turnaround, industry-focused and structured investments, natural resources, distressed, mezzanine and real assets.

BH uses a multi-step diligence process to evaluate investments, and ultimate investment decisions are made by an investment committee. After BH makes a primary or secondary investment, third-party managers are typically responsible for the day-to-day investment decisions. BH's responsibilities with respect to investments generally are limited to the selection, evaluation and monitoring of such investments or third-party managers, and BH does not generally approve specific investments made by the third-party managers. Similarly, with respect to direct co-investments, although BH will be involved with the selection, evaluation and monitoring of such investments, BH's role typically is passive after the initial investment decision is made.

The third-party managers generally are responsible for compliance with all applicable laws, rules and regulations pertaining to their investment activities.

Real Estate

BH invests directly in commercial real estate assets, including office, multifamily, retail, industrial, hospitality and undeveloped properties located in major U.S. markets. BH uses a broad network of relationships, including institutional investors, professional contacts, industry experts, financial advisors and others, to source investment opportunities. BH leverages its expertise and the broader Buxton Helmsley franchise to seek to identify the most compelling investment opportunities. In formulating its investment views, BH relies on macroeconomic and global insights, capital market views, corporate and industry expertise, and policy insights of its own personnel, other BH professionals and data from third-party information providers. BH's portfolio construction process combines bottom-up, fundamental research and judgment with top-down views driven by research and quantitative tools. BH seeks to achieve portfolio diversification by selecting investments across asset classes, geographies and economic sectors.

Additionally, BH creates portfolios on behalf of investment funds and separate accounts to provide exposure to the real estate private equity market by making commitments to third-party managed funds (primary investments), investing directly in commercial real estate assets alongside third-party managers (direct co-investments), and by acquiring existing real estate private equity investments on the secondary market (secondary investments). As discussed in "Private Equity" above, BH uses a multi-step diligence and decision-making process when evaluating and selecting real estate private equity investments, although BH's role typically is passive after the initial investment decision is made.

Credit and Fixed Income

BH acts as a "manager of managers" in the credit and fixed income asset classes. BH selects one or more third-party managers to manage client assets under the oversight of BH in respect of separate accounts. BH may also select third-party managers to sub-advise Manager of Manager Funds, may invest directly into third-party managed credit and fixed income funds, or may establish BH Program Funds that invest substantially all of their assets in such third-party managed credit and fixed income funds. In addition, BH may evaluate co-investment opportunities with credit and fixed income managers.

Public Equity

BH acts as “manager of managers” in the long-only equity asset class through BH. BH selects one or more third-party managers to manage the assets of Advisory Accounts under the oversight of BH or establishes BH Program Funds that invest substantially all of their assets in third-party managed long-only equity funds. BH manager selection services provide access to U.S. and non-U.S. equity asset classes, including region specific (broad international, global, emerging markets and equity income), style focused (growth, value and blend investment) and market cap-based (all cap, large cap, and small cap) strategies. The third-party managers are selected through a multi-step process which includes a due diligence review designed to assess the quality of the candidates and the likelihood of producing appropriate investment results over the long-term. An investment committee determines which third-party managers are available for investment by Advisory Accounts.

Third-party managers generally receive allocations of Advisory Account assets for management as determined by BH. The third-party managers are responsible for the day-to-day investment decisions, although BH may develop benchmarks and written investment guidelines for the management of Advisory Account assets by third-party managers. BH’s responsibilities with respect to the investments are generally limited to the selection, appointment, monitoring and removal of third-party managers, and BH does not have the duty of determining or approving specific investments made by the third-party managers other than setting the general investment objectives and guidelines. The third-party managers are responsible for compliance with all applicable laws, rules and regulations pertaining to their investment activities.

The one or more third-party managers to which an Advisory Account allocates assets from time to time will generally be determined by BH, in its sole discretion, based on factors deemed relevant by BH. BH may, from time to time, vary or change materially the actual allocation of assets made by an Advisory Account, as it deems appropriate in its sole discretion, including, without limitation, by way of allocation of assets to any new third-party manager, complete or partial withdrawal of an allocation to any existing third-party manager, a reallocation of assets among existing third-party managers, or any combination of the foregoing without prior notice to or the consent of investors. The identity and number of the third-party managers for an Advisory Account may change materially over time. BH may allocate assets to one or more third-party managers, directly or indirectly, through, among other means, one or more

discretionary managed accounts or investment funds established by BH, any third-party manager or their respective affiliates.

Notwithstanding the foregoing, BH does not typically negotiate the investment objectives, guidelines or investment restrictions of, or adjust allocations to, the third-party managed funds in which BH Program Funds invest.

International Investment Solutions

The IIS group focuses on and implements customized multi-asset class allocations, risk management strategies, portfolio construction, tactical investments, and investment advisory solutions and products. As agreed upon with the client, IIS implements these allocations through investments in the products described below, monitors compliance, and periodically rebalances portfolios. Subject to such agreement, IIS generally selects investment options (or recommends the selection of investment options) among a broad range of investment products, including but not limited to, pooled investment vehicles, separately managed accounts and derivative instruments. Investment products may be sponsored, managed, or advised by BH or Buxton Helmsley (“Affiliated Products”) and/or sponsored, managed or advised by third-party managers (“External Products”), and may employ a broad range of investment strategies, including but not limited to, passive investment strategies, long-only investment strategies (e.g., exchange-traded funds, mutual funds and private investment funds) and alternative investment strategies (e.g., hedge funds, funds of hedge funds, private equity funds, funds of private equity funds and real estate funds).

When reviewing potential investment products for an Advisory Account, IIS may consider various factors as IIS deems relevant in its sole discretion. These factors may include both quantitative and qualitative factors (which may be inherently subjective), may be given different weightings or importance relative to other factors, and may change from time to time. These factors may include, without limitation, (i) product-related factors, such as track record, index comparisons, liquidity, risk and return assumptions (taking into account applicable fees in connection with such risk/return analysis), investment strategy and objectives, investment process, tenure, stability and seniority of investment personnel, overall market opportunity, and consultant ratings, (ii) IIS’s experience and familiarity with particular potential investment products and, if applicable, the investment management personnel managing such investment products or their organizations, (iii) client-driven factors, such as the client’s investment mandate, the effect on the client’s

portfolio diversification objectives, consistency with the client's asset allocation model, and the projected timing of implementation, and (iv) other factors, such as capacity constraints, minimum investment requirements and such other factors as determined by IIS. When reviewing certain potential investment products for an Advisory Account, IIS may consider factors that were not considered when reviewing other potential investment products. In addition, certain factors may play a greater role in the review of some potential investment products than in the review of other potential investment products and IIS may give different weight to certain factors in reviewing Affiliated Products than in reviewing External Products. For example, in the event that an Advisory Account invests in both Affiliated Products and External Products, qualitative factors and review (such as the assessment of an investment product's investment objective and process, and other subjective factors) may play a greater role than quantitative factors and review (such as the assessment of such investment product's returns and consistency of performance over specified time periods) in the selection of an Affiliated Product than in the selection of External Products. Accordingly, Affiliated Products may not always have the same quantitative and qualitative characteristics as External Products. For example, Affiliated Products may not be subject to the same types of diligence review that may be performed with respect to External Products.

Other Investment Personnel and Other Investment Advisors

In addition to the investment personnel described above, BH may add additional investment personnel and its current investment personnel may offer additional strategies at any time.

The methods of analysis and investment strategies used by BHI are similar to those set forth herein.

MATERIAL RISKS *for* SIGNIFICANT INVESTMENT STRATEGIES *and* PARTICULAR TYPES *of* SECURITIES

Following is a summary of the material risks for each of BH's significant investment strategies, security types and the investment techniques employed by the BH investment personnel in their significant investment strategies and certain other risks applicable to Advisory Accounts. BH offers advisory services across a broad range of strategies and investment types and does not primarily recommend any particular type of security to its clients.

The information contained in this Brochure cannot disclose every potential risk associated with an investment strategy, or all of the risks applicable to a particular Advisory Account. Rather, it is a general description of the nature and risks of the strategies and securities and other instruments that clients may include in their investment guidelines for their Advisory Account. Clients should not include these strategies and financial instruments in their guidelines for their Advisory Account unless they understand the risks of the strategies and financial instruments that they permit BH to purchase on their behalf. Clients should also be satisfied that such financial instruments are suitable for their Advisory Account in light of their circumstances, their investment objectives and their financial situation. In addition, clients of BH's pooled investment vehicles should carefully review the prospectuses or other offering documents and constituent documents for additional information about risks associated with those products.

Appendix B contains certain additional information about the risks associated with security types and investment techniques used by BH, including security types and investment techniques not described in this Item 8. To the extent clients receive prospectuses or other offering documents or constituent documents for pooled investment vehicles in which they invest, clients are encouraged to carefully read the product-specific risk disclosures contained therein.

General Portfolio Risks

BH's strategies may be subject to the following general portfolio risks:

- **Concentration Risk**—The risk that if an Advisory Account concentrates its investments in issuers within the same country, state, geographic region, industry or economic sector, an adverse economic, business, political or other development may affect the value of the Advisory Account's investments more than if its investments were not so concentrated. Also, to the extent an Advisory Account invests all or a large percentage of its assets in a single issuer or a relatively small number of issuers, or concentrates its assets directly or indirectly in investments in the same asset class or in one particular asset or security, it may be subject to greater risks than a more diversified account. That is, a change in the value of any single investment held by the Advisory Account may affect the overall value of the account more than it would affect an account that holds more investments.

- **Conversion of Equity Investments**—After its purchase, a non-equity investment directly or indirectly held by an Advisory Account (such as a convertible debt obligation) may convert to an equity security. Alternatively, an Advisory Account may directly or indirectly acquire equity securities in connection with a restructuring event related to one or more of its non-equity investments. The Advisory Account or an investment fund in which the Advisory Account invests may be unable to liquidate the equity investment at an advantageous time from a pricing standpoint. Furthermore, an underlying investment fund may continue to hold an investment if its manager believes it is in the best interest of the fund. Continued holding of such investments may adversely affect the Advisory Account's portfolio.
- **Counterparty Risk**—An Advisory Account may be exposed to the credit risk of counterparties with which, or the brokers, dealers, custodians and exchanges through which, it deals in connection with the investment of its assets, whether engaged in exchange-traded or off-exchange transactions. For example, although certain standardized swap transactions are subject to mandatory central clearing, which is expected to decrease counterparty risk and increase liquidity compared to bilaterally negotiated swaps, central clearing does not eliminate counterparty risk or illiquidity risk entirely. In addition, many of the protections afforded to cleared transactions, such as the security afforded by transacting through a clearing house, might not be available in connection with over-the-counter ("OTC") transactions. Therefore, in those instances in which an Advisory Account enters into OTC transactions, the Advisory Account will be subject to the risk that its direct counterparty will not perform its obligations under the transactions and that the Advisory Account will sustain losses. Furthermore, an Advisory Account may, from time to time, enter into arrangements with certain brokers or other counterparties that require the segregation of collateral. For operational, cost or other reasons, when setting up arrangements relating to the execution/clearing of trades, an Advisory Account may choose to select a segregation model which may not be the most protective option available in the case of a default by a broker or counterparty.
- **Currency Risk**—An Advisory Account may hold investments denominated in currencies other than the currency in which the Advisory Account is denominated. Currency exchange rates can be extremely volatile, particularly during times of political or economic unrest or as a result of actions taken by central banks, which may be intended to directly affect prevailing exchange rates, and a variance in the degree of volatility of the market or in the direction of the market from BH's expectations may produce significant losses to an Advisory Account. BH may or may not attempt to hedge all or any portion of the currency exposure of an Advisory Account. However, even if BH does attempt to hedge the currency exposure of an Advisory Account, it is not possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in any particular currency because the value of those securities is likely to fluctuate as a result of independent factors not related to currency fluctuations. To the extent unhedged, the value of an Advisory Account's assets will fluctuate with currency exchange rates as well as the price changes of its investments in the various local markets and currencies. Such fluctuations could have a material adverse effect on an Advisory Account.
- **Emerging Markets and Growth Markets Risk**—In addition to the risks described in "Non-U.S. Securities Risk" below, investing in the securities of emerging markets involves certain considerations not usually associated with investing in developed markets, including, without limitation, political and economic considerations, the potential difficulty of repatriating funds or enforcing contractual or other legal rights, general social, political and economic instability, adverse diplomatic developments, the lack of robust regulation in such markets, the uncertainty around the efficacy and enforcement of such regulation, inflation, and the small size of such securities markets and the low volume of trading (which may result in potential lack of liquidity and in price volatility). Moreover, financial intermediaries may be inexperienced, and counterparties may be subject to weaker safekeeping frameworks. Trading platforms in these markets may be new, and the relevant regulations may be untested and subject to change. There is no assurance that the systems and controls of such trading platforms will be adequate or that such platforms would continue in existence. Further, the economies, industries, securities and currency markets in emerging markets or growth markets may be adversely affected by protectionist trade policies, a slow U.S. economy, regional and global conflicts and terrorism and war, including actions that are contrary to the interests of the U.S. An Advisory Account's purchase and sale of securities in certain

emerging countries may be constrained by limitations relating to daily changes in the prices of listed securities, periodic trading or settlement volume, and/or limitations on aggregate holdings of foreign investors. An Advisory Account may not be able to sell securities in circumstances where price, trading, or settlement volume limitations have been reached.

- **Frequent Trading and Portfolio Turnover Rate Risk—** The turnover rate within the Advisory Account may be significant. Frequent trades typically result in higher transactions costs, including potentially substantial brokerage commissions, fees and other transaction costs. In addition, frequent trading is likely to result in short-term capital gains tax treatment. As a result, high turnover and frequent trading in an Advisory Account could have an adverse effect on the performance of the Advisory Account.
- **Hedging Risk—** Hedging techniques could involve a variety of derivatives, including futures contracts, exchange-listed and over-the-counter put and call options on securities, financial indices, forward foreign currency contracts, and various interest rate transactions. To the extent BH utilizes hedging techniques in respect of an Advisory Account, hedging techniques involve risks different than those of underlying investments. In particular, the variable degree of correlation between price movements of hedging instruments and price movements in the position being hedged creates the possibility that losses on the hedge may be greater than gains in the value of the positions of an Advisory Account or that losses on the hedge will occur at the same time as losses in the value of the positions of an Advisory Account. In addition, certain hedging instruments and markets may not be liquid in all circumstances. As a result, in volatile markets, an Advisory Account may not be able to close out a transaction in certain of these instruments without incurring losses substantially greater than the initial deposit. Although the contemplated use of these instruments is intended to minimize the risk of loss due to a decline in the value of the hedged position, the use of such instruments may limit any potential gain which might result from an increase in the value of such position. The ability of an Advisory Account to hedge successfully cannot be assured. Hedging techniques involve costs, which could be significant, whether or not the hedging strategy is successful.
- **Indirect Investment in Foreign Securities—** Some countries, especially emerging markets countries, do not

permit foreigners to participate directly in their securities markets or otherwise present difficulties for efficient foreign investment. An Advisory Account may use participation notes to establish a position in such markets as a substitute for direct investment. Participation notes are issued by banks or broker-dealers and are designed to track the return of a particular underlying equity or debt security, currency or market. When the participation note matures, the issuer of the participation note will pay to, or receive from, an Advisory Account the difference between the nominal value of the underlying instrument at the time of purchase and that instrument's value at maturity.

Investments in participation notes involve the same risks as are associated with a direct investment in the underlying security, currency or market that they seek to replicate as well as counterparty risk when traded over-the-counter. Foreign securities may also trade in the form of depositary receipts. Depositary receipts may not reflect the return an Advisory Account would realize if the Advisory Account actually owned the relevant securities underlying the depositary receipts. To the extent an Advisory Account acquires depositary receipts through banks which do not have a contractual relationship with the foreign issuer of the security underlying the depositary receipts to issue and service such unsponsored depositary receipts, there may be an increased possibility that the Advisory Account would not become aware of and be able to respond to corporate actions such as stock splits or rights offerings involving the foreign issuer in a timely manner.

- **Investment Style Risk—** Different investment styles (e.g., "growth," "value" or "quantitative") tend to shift in and out of favor depending upon market and economic conditions as well as investor sentiment. Advisory Accounts may outperform or underperform other accounts that invest in similar asset classes but employ different investment styles. BH may modify or adjust its investment strategies from time to time.
- **Leverage Risk—** Leverage creates exposure to potential gains and losses in excess of the initial amount invested. Borrowing and the use of derivatives may result in leverage and may make an Advisory Account more volatile. When an Advisory Account uses leverage the sum of the Advisory Account's investment exposures may significantly exceed the amount of assets invested in the Advisory Account, although these exposures may vary over time. Relatively small market movements may result in large changes in the value of a leveraged investment. An Advisory Account will identify liquid assets on its books

or otherwise cover transactions that may give rise to such risk, to the extent required by applicable law. The use of leverage may cause an Advisory Account to liquidate portfolio positions to satisfy its obligations or to meet segregation requirements when it may not be advantageous to do so. The use of leverage by an Advisory Account can substantially increase the adverse impact to which the Advisory Account's investment portfolio may be subject. In addition, lenders may impose restrictions or requirements on the operations of an Advisory Account. An Advisory Account may not be able to liquidate assets quickly enough to repay its borrowings, which could increase the losses incurred by the Advisory Account. Lenders may also have the right under certain circumstances to cause the sale of assets held in an Advisory Account at times that may be inopportune from a pricing standpoint. Further, in the case of an Advisory Account that invests in investment funds utilizing leverage, the rights and claims of any lenders to receive payments of interest or repayments of principal from the investment fund will generally be senior to the rights of the Advisory Account to withdraw its investment from the investment fund.

- Liquidity Risk—The risk that an Advisory Account may make investments that may be illiquid or that are not publicly traded and/or for which no market is currently available, that are subject to legal, regulatory or contractual restrictions on their sale or transfer, or that may become less liquid in response to market developments or adverse investor perceptions. Investments that are illiquid or that trade in lower volumes may be more difficult to value. Liquidity risk may be the result of, among other things, the reduced number and capacity of traditional market participants to make a market, including in fixed income securities, or the lack of an active market. Additionally, market participants may attempt to sell fixed income holdings at the same time as the Advisory Account, which could cause downward pricing pressure and contribute to illiquidity. Further, an Advisory Account may invest in private funds and investors generally will not be able to redeem their capital account balances or withdraw their interests, and there will be no active secondary market for the interests. Moreover, investors in private funds may not, directly or indirectly, sell, assign, encumber, mortgage, transfer, or otherwise dispose of, voluntarily or involuntarily, any portion of their interests without the private fund's consent, which may be granted or withheld in its sole discretion.
- Management Risk—The risk that a strategy used by BH may fail to produce the intended results for an Advisory Account.
- Market Risk—The market value of the instruments in which an Advisory Account invests may go up or down in response to the prospects of individual companies, particular sectors or governments, and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. In addition, governmental and quasi-governmental organizations have taken a number of unprecedented actions designed to support the markets. Such conditions, events and actions may result in greater market risk.
- Model Risk—The management of Advisory Accounts by BH may include the use of various proprietary quantitative or investment models. There may be deficiencies in the design or operation of these models, including as a result of shortcomings or failures of processes, people or systems. Investments selected using models may perform differently than expected as a result of the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models (including, for example, data problems and/or software issues). Moreover, the effectiveness of a model may diminish over time, including as a result of changes in the market and/or changes in the behavior of other market participants. A model's return mapping is based on historical data regarding particular asset classes. Certain strategies can be dynamic and unpredictable, and a model used to estimate asset allocation may not yield an accurate estimate of the then current allocation. Operation of a model may result in negative performance, including returns that deviate materially from historical performance, both actual and pro-forma. Additionally, commonality of holdings across quantitative money managers may amplify losses. There is no guarantee that the use of these models will result in effective investment decisions for Advisory Accounts.
- Non-Hedging Currency Risk—An Advisory Account may purchase or sell currencies through the use of forward contracts or other instruments based on BH's judgment regarding the direction of the market for a particular currency or currencies for speculative purposes. Currency exchange rates can be extremely volatile, and a variance in the degree of volatility of the market or in the direction of

the market from BH's expectations may produce significant losses to an Advisory Account.

- Non-U.S. Securities Risk—Non-U.S. securities may be subject to risk of loss because of more or less non-U.S. government regulation, less public information, less liquidity, greater volatility and less economic, political and social stability in the countries of domicile of the issuers of the securities and/or the jurisdictions in which these securities are traded. Loss may also result from, among other things, deteriorating economic and business conditions in other countries, including the United States, regional and global conflicts, the imposition of exchange controls, foreign taxes, sanctions, confiscations, expropriation and other government restrictions by the United States or other governments, higher transaction costs, difficulty enforcing contractual obligations or from problems in share registration, settlement or custody. In addition, an Advisory Account will be subject to the risk that an issuer of non-U.S. sovereign debt held by an Advisory Account or the governmental authorities that control the repayment of such debt may be unable or unwilling to repay the principal or interest when due, including as a result of levels of non-U.S. debt or currency exchange rates. Furthermore, an Advisory Account's purchase and sale of certain non-U.S. securities may be subject to limitations or compliance with procedures imposed by foreign governments. For example, an Advisory Account may be subject to limitations on aggregate holdings by foreign investors. Moreover, as a result of having to comply with such procedures, an Advisory Account's ability to effect trades may be delayed, and an Advisory Account's failure to comply with such procedures may result in failed trades, loss of voting or transfer rights or the forced sale of settled positions. These risks might be heightened if the Advisory Account invests in emerging markets or growth markets.
- Risks of Derivative Investments—Advisory Accounts may invest in derivative instruments, including, without limitation, options, futures, options on futures, interest rate caps and floors and collars, participation notes, swaps, options on swaps, structured securities, forward contracts and other derivatives relating to foreign currency transactions. Losses in an Advisory Account from investments in derivative instruments can result from the potential illiquidity of the markets for derivative instruments, the failure of the counterparty to perform its contractual obligations, or the risks arising from margin requirements and related leverage factors associated with

such transactions. Losses may also arise if an Advisory Account receives cash collateral under the transactions and some or all of that collateral is invested in the market. The use of these management techniques also involves the risk of loss if BH is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates, currency prices or other variables. In addition, subject to jurisdictional limits, the U.S. Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, as amended (the "Dodd-Frank Act"), establishes a new regulatory framework for oversight of over-the-counter derivatives transactions by the CFTC (as defined below) and the U.S. Securities and Exchange Commission ("SEC") and heightens the existing regulation of futures markets. There can be no certainty as to the final form of the requirements, and the full extent of the impact such requirements will have on the Advisory Accounts is unclear.

- Valuation Risk—The net asset value of an Advisory Account as of a particular date may be materially greater than or less than the net asset value that would be determined if such Advisory Account's investments were to be liquidated as of such date. An Advisory Account may invest in assets that lack a readily ascertainable market value, and an Advisory Account's net asset value will be affected by the valuations of any such assets (including, without limitation, in connection with calculation of any fees). The value of assets that lack a readily ascertainable market value may be subject to later adjustment based on valuation information available to an Advisory Account at that time. Any adjustment to the value of such assets may result in an adjustment to the net asset value of an Advisory Account.
- Volatility Risk—The prices of an Advisory Account's investments can be highly volatile. Price movements of assets are influenced by, among other things, interest rates, general economic conditions, the condition of the financial markets, developments or trends in any particular industry, the financial condition of the issuers of such assets, changing supply and demand relationships, programs and policies of governments, and national and international political and economic events and policies.

Other General Risks

Advisory Accounts may be subject to the following other general risks:

- Dependence on Key Personnel—Advisory Accounts may rely on certain key personnel of Buxton Helmsley. As a result of regulation or for other reasons, the amount of compensation that may be payable to Buxton Helmsley executives or other employees may be reduced, or employees who rely on work visas or other permits may have such visas or permits revoked or not renewed. As a result, certain key personnel may leave Buxton Helmsley. The departure of any of such key personnel or their inability to fulfill certain duties may adversely affect the ability of BH to effectively implement the investment programs of the Advisory Accounts.
- Legal, Tax and Regulatory Risks—BH and certain of its Advisory Accounts are subject to legal, tax and regulatory oversight, including by the SEC, the United Kingdom Financial Conduct Authority (“FCA”) and similar regulators world-wide. For example, as a wholly owned subsidiary of Buxton Helmsley Holdings, Inc., an international holding company, certain of BH’s activities and transactions in respect of Advisory Accounts may be restricted. Similarly, there have been recent legislative, tax and regulatory changes and proposed changes that may apply to the activities of BH and managers to which BH allocates client assets that may require material adjustments to the business and operations of, or have other material adverse effects on, Advisory Accounts. Any rules, regulations and other changes, and any uncertainty in respect of their implementation, may result in increased costs, reduced profit margins and reduced investment and trading opportunities, all of which may negatively impact the performance of Advisory Accounts.
- Losses in Affiliated Investment Funds Borne Solely by Investors—All losses of an Advisory Account investing in an affiliated investment fund managed by BH shall be borne solely by such Advisory Account and not by Buxton Helmsley. Buxton Helmsley’s losses in an affiliated investment fund will be limited to losses attributable to the ownership interests in such investment fund held by Buxton Helmsley in its capacity as an investor in such investment fund or as beneficiary of a restricted profit interest held by Buxton Helmsley. Ownership interests in Advisory Account are not insured by the FDIC, and are not deposits, obligations of, or endorsed or guaranteed in any way, by any banking entity.
- Master-Feeder Structure—Advisory Accounts may be organized as a part of a “master-feeder” structure. Investors may be materially affected by the actions of another entity investing in the master entity, including redemptions of interests by such entities.
- Multiple Levels of Fees and Expenses—In circumstances in which Advisory Accounts invest in third-party managers or affiliated or unaffiliated investment funds, the Advisory Accounts will bear any fees or other compensation due to BH and expenses at the Advisory Account level, in addition to any fees or compensation and expenses which may be due at the third-party manager or investment fund level.
- Non-Recourse Risk—The governing agreements of investment funds in which Advisory Accounts invest limit the circumstances in which a manager can be held liable to investors. As a result, investors may have a more limited right of action in certain cases than they would in the absence of such provisions.
- Operational Risk—The risk that an Advisory Account may suffer a loss arising from shortcomings or failures in internal processes, people or systems, or from external events. Operational risk can arise from many factors ranging from routine processing errors to potentially costly incidents related to, for example, major systems failures.
- Partial or Total Loss of Capital—Certain investments made by BH for Advisory Accounts are intended for long-term investors who can accept the risks associated with investing in illiquid securities, and the possibility of partial or total loss of capital exists. There is no assurance that Advisory Accounts will achieve their investment or performance objectives, including, without limitation, the location of suitable investment opportunities and the achievement of targeted rates of return, or that Advisory Accounts will be able to fully invest their capital.
- Performance-Based Compensation—BH and managers of affiliated and unaffiliated investment funds in which an Advisory Account invests (which, in the case of affiliated investment funds, may be BH) may receive performance-based compensation from Advisory Accounts and the investment funds based upon the net capital appreciation of Advisory Account or investment fund assets. Such compensation arrangements may create an incentive for BH and managers of investment funds to make investments that are riskier or more speculative than would be the case if such arrangements were not in effect. In many cases, performance-based compensation may be calculated on a basis that includes unrealized appreciation of assets. In such cases, such compensation may be greater than if it were based solely on realized gains and losses. See

Item 6, Performance-Based Fees and Side-By-Side Management.

Fundamental Equity

Fundamental Equity manages strategies across the market cap spectrum, in most emerging and developed markets. In addition to the risks described above under “General Portfolio Risks” and “Other General Risks,” the material risks associated with Fundamental Equity Advisory Accounts in these sub-strategies include:

- **Energy, Oil and Gas Sector Risk**—Advisory Accounts may invest in MLPs that primarily derive their income from investing in companies within the energy, oil and gas sectors. Energy, oil and gas companies are subject to specific risks, including, among others, fluctuations in commodity prices; reduced consumer demand for commodities such as oil, natural gas or petroleum products; reduced availability of natural gas or other commodities for transporting, processing, storing or delivering; slowdowns in new construction; extreme weather or other natural disasters; and threats of attack by terrorists on energy assets. Additionally, changes in the regulatory environment for these companies may adversely impact their profitability. Over time, depletion of natural gas reserves or other commodities may also affect the profitability of companies in the energy, oil and gas sectors.
- **Equity and Equity-Related Securities and Instruments**—Advisory Accounts may take long and short positions in common stocks of U.S. and non-U.S. issuers traded on national securities exchanges and OTC markets. The value of equity securities varies in response to many factors. These factors include, without limitation, factors specific to an issuer and factors specific to the industry in which the issuer participates. In addition, equity securities are subject to stock risk, which is the risk that stock prices historically rise and fall in periodic cycles. U.S. and non-U.S. stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.
- **Master Limited Partnership Risk**—Investments by an Advisory Account in securities of MLPs involve risks that differ from investments in common stock, including risks related to limited control and limited rights to vote on matters affecting the MLP, risks related to potential conflicts of interest between the MLP and the MLP’s general partner, cash flow risks, dilution risks and risks related to the general partner’s right to require unit-holders to sell their common units at an undesirable time or price because of regulatory changes or other reasons. Certain MLP securities may trade in lower volumes due to their smaller capitalizations. Accordingly, those MLPs may be subject to more abrupt or erratic price movements, may lack sufficient market liquidity to enable an Advisory Account to effect sales at an advantageous time or without a substantial drop in price, and investment in those MLPs may restrict an Advisory Account’s ability to take advantage of other investment opportunities. MLPs are generally considered interest rate-sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns. In addition, the managing general partner of an MLP may receive an incentive allocation based on increases in the amount and growth of cash distributions to investors in the MLP. This method of compensation may create an incentive for the managing general partner to make investments that are riskier or more speculative than would be the case in the absence of such compensation arrangements.
- **Mid-Cap and Small-Cap Risk**—Investments in mid-capitalization and small-capitalization companies involve greater risks than investments in larger, more established companies, including because such companies may have narrower markets and more limited managerial and financial resources, and because there is often less publicly available information concerning such companies than for larger, more established businesses. These securities may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity, and these issuers often face greater business risks. Securities of such issuers may lack sufficient market liquidity to enable an Advisory Account to effect sales at an advantageous time or without a substantial drop in price. Both small- and mid-capitalization companies often have narrower markets and more limited managerial and financial resources than larger, more established companies. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of an Advisory Account’s portfolio. Generally, the smaller the company size, the greater these risks.
- **Real Estate Investment Trust (“REIT”) Risk**—REITs whose underlying properties are concentrated in a particular industry or geographic region are also subject to risks affecting such industries and regions. The securities of REITs involve greater risks than those associated with

larger, more established companies and may be subject to more abrupt or erratic price movements because of interest rate changes, economic conditions and other factors. Securities of such issuers may lack sufficient market liquidity to enable the Advisory Account to effect sales at an advantageous time or without a substantial drop in price. The failure of a company to qualify as a REIT could have adverse consequences for an Advisory Account invested in the company.

- **Technology Sector Risk**—The stock prices of technology and technology-related companies and therefore the value of Advisory Accounts that invest in the technology sector may experience significant price movements as a result of intense market volatility, worldwide competition, consumer preferences, product compatibility, product obsolescence, government regulation, excessive investor optimism or pessimism, or other factors.
- **Short Selling/Position Risk**—Short selling occurs when an Advisory Account borrows a security from a lender, sells the security to a third party, reacquires the same security and returns it to the lender to close the transaction. The Advisory Account profits if the price of the borrowed security declines in value from the time the Advisory Account sells it to the time the Advisory Account reacquires it. Conversely, if the borrowed security has appreciated in value during this period, the Advisory Account will suffer a loss. The potential loss on a short sale is unlimited because the price of the borrowed security may rise indefinitely. Short selling also involves the risks of: increased leverage, and its accompanying potential for losses; the potential inability to reacquire a security in a timely manner, or at an acceptable price; the possibility of the lender terminating the loan at any time, forcing the Advisory Account to close the transaction under unfavorable circumstances; the additional costs that may be incurred; and the potential loss of investment flexibility caused by the Advisory Account's obligations to provide collateral to the lender and set aside assets to cover the open position. An Advisory Account may also enter into a short derivative position through a futures contract, an option or swap agreement.

Global Fixed Income and Liquidity Management

Global Fixed Income and Liquidity Management offers several sub-strategies, including: Global Liquidity, Absolute Return, Core/Long Duration, Global/Non-U.S. Fixed Income, Opportunistic/Distressed, Commodities, Global Credit

Emerging Markets Debt, Municipals, MBS/ABS and Currency. In addition to the risks described above under "General Portfolio Risks" and "Other General Risks," the material risks associated with these strategies include:

- **Credit/Default Risk**—An issuer or guarantor of fixed income securities or instruments held by an Advisory Account (which, for certain Advisory Accounts, may have low credit ratings) may default on its obligation to pay interest and repay principal or default on any other obligation, and a counterparty to a derivatives investment may fail to perform its contractual obligations. Additionally, the credit quality of securities or instruments may deteriorate rapidly, which may impair an Advisory Account's liquidity and cause significant value deterioration. Advisory Accounts may invest in noninvestment grade fixed income securities (commonly known as "junk bonds") and leveraged loans that are considered speculative. Non-investment grade investments, leveraged loans and unrated securities of comparable credit quality are subject to the increased risk of an issuer's inability to meet principal and interest payment obligations. These securities and loans may be subject to greater price volatility due to such factors as specific issuer developments, interest rate sensitivity, negative perceptions of the junk bond and leverage loan markets generally and less secondary market liquidity. Advisory Accounts may purchase the securities of issuers that are in default.
- **Interest Rate Risk**— When interest rates increase, fixed income securities or instruments held by an Advisory Account (which may include inflation protected securities) will generally decline in value. Long-term fixed income securities or instruments will normally have more price volatility because of this risk than short-term fixed income securities or instruments. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, rising inflation and changes in general economic conditions.

In addition, depending on the particular mandate, other risks may apply. These include:

- To the extent that the strategy invests in mortgage backed or asset-backed securities, it may be subject to mortgage-backed and/or other asset-backed securities risk. Mortgage-related and other asset-backed securities are subject to certain additional risks, including "extension risk" (i.e., in periods of rising interest rates, issuers may pay

principal later than expected) and “prepayment risk” (i.e., in periods of declining interest rates, issuers may pay principal more quickly than expected, causing an Advisory Account to reinvest proceeds at lower prevailing interest rates).

- To the extent that the strategy invests in the commodity sector, it may be subject to commodity exposure risk. Exposure to the commodities markets may subject an Advisory Account to greater volatility than investments in traditional securities.
- To the extent that the strategy invests in sovereign debt or sectors with substantial exposure to sovereign debt, it may be subject to sovereign debt risk. Issuers of sovereign debt may be unable or unwilling to repay principal or interest in accordance with the terms of such debt, and an Advisory Account may have limited recourse to compel payment in the event of a default. Any failure to make payments in accordance with the terms of the debt could result in losses to an Advisory Account.
- To the extent that the strategy invests in stable value contracts, it may be subject to the risks of such contracts. Stable value contracts are benefit responsive agreements that typically impose investment restrictions on an Advisory Account in addition to any investment restrictions imposed as a result of the Advisory Account’s own investment program. There is no guarantee that providers under stable value contracts will fulfill their obligations or that stable value contracts will continue to be valued at their contract value rather than market or fair value. Stable value contracts typically have long withdrawal notice periods. Moreover, stable value contract providers have increased fees and decreased the flexibility of terms they offer in the last several years and may continue to do so in the future. There can be no assurance that sufficient stable value contracts will be available in the future to replace or supplement an

exposure risk, inflation protected securities risk, credit/default risk, interest rate risk, mortgage-backed or asset-backed risk, non-investment grade investments risk, U.S. government securities risk, and derivatives risk. Each of these individual risks is discussed in more detail in Appendix B.

- Index/Tracking Error Risk—To the extent it is intended that an Advisory Account track an index, the Advisory Account may not match, and may vary substantially from, the index for any period of time. An Advisory Account that tracks an index may purchase, hold and sell securities at times when a non-index fund would not do so. BH does not guarantee that any tracking error targets will be achieved.
- Tax-Managed Investment Risk—Because the QIS personnel balances investment considerations and tax considerations in tax-managed strategies, the pre-tax performance of an Advisory Account may be lower than the performance of similar Advisory Accounts that are not tax-managed. Even though tax-managed strategies are being used, they may not reduce the amount of taxable income and capital gains to which an Advisory Account may become subject.
- Electronic Trading—BH may trade on electronic trading and order routing systems, which differ from traditional open outcry trading and manual order routing methods. Transactions using an electronic system are subject to the rules and regulations of the exchanges offering the system or listing the instrument. Characteristics of electronic trading and order routing systems vary widely among the different electronic systems with respect to order matching procedures, opening and closing procedures and prices, trade error policies and trading limitations or requirements. There are also differences regarding qualifications for access and grounds for termination and limitations on the types of orders that may be entered into the system. Each of these matters may present different risk factors with respect to trading on or using a particular system. Each system may also present risks related to system access, varying response times and security. In the case of internet-based systems, there may be additional risks related to service providers and the receipt and monitoring of electronic mail. Trading through an electronic trading or order routing system is also subject to risks associated with system or component failure. In the event of system or component failure, it is possible that for a certain time period, it might not be possible to enter new orders, execute existing orders or modify or

Quantitative Investment Strategies

The QIS personnel offers a number of sub-strategies. In addition to the risks described above under “General Portfolio Risks” and “Other General Risks,” the material risks associated with these strategies include:

- Macro Risks—The risk that the value of the instruments in which an Advisory Account invests may go up or down in response to events affecting particular industry sectors or governments and/or general economic conditions. These risks/events include, but are not limited to, commodity

cancel orders that were previously entered. System or component failure may also result in loss of orders or order priority. Some investments offered on an electronic trading system may be traded electronically and through open outcry during the same trading hours. Exchanges offering an electronic trading or order routing system and listing the instrument may have adopted rules to limit their liability, the liability of brokers and software and communication system vendors and the amount that may be collected for system failures and delays. The limitation of liability provisions vary among the exchanges.

- **Reliance on Technology**—BH may employ investment strategies that are dependent upon various computer and telecommunications technologies. The successful implementation and operation of such strategies could be severely compromised by telecommunications failures, power loss, software-related “system crashes,” fire or water damage, or various other events or circumstances. Any such event could result in, among other things, the inability of BH to establish, maintain, modify, liquidate, or monitor the Advisory Accounts’ investments, which could have a material adverse effect on the Advisory Accounts.
- **Risks Involved in the Development of Models**—Errors may occur in designing, writing, testing, and/or monitoring models, which may be difficult to detect and may not be detected for a significant period of time. Inadvertent systems and human errors are an inherent risk of models and the complexity of models may make it difficult or impossible to detect the source of any weakness or failure in the models before material losses are incurred. Moreover, the complexity of the models and their reliance on complex computer programming may make it difficult to obtain outside support. To the extent any third-party licensed intellectual property is used in the development of models, there may be adverse consequences if such material is no longer available. Finally, in the event of any software or hardware malfunction, or problem caused by a defect or virus, there may be adverse consequences to developing or monitoring models.

Alternative Investments and Manager Selection

AIMS offers several sub-strategies, including: Global Manager Strategies and Private Equity. In addition to the risks described above under “General Portfolio Risks” and “Other General Risks,” the material risks associated with these strategies include:

Private Equity

- **Difficulty in Valuing Partnership Investments**—Valuation of partnership investments in which an Advisory Account may invest may be difficult, as there generally will be no established market for these assets or for securities of privately-held companies which an underlying private equity fund may own. The overall performance of AIMS’s investment funds and separate accounts will be affected by the acquisition price paid by the underlying private equity funds for their interests in portfolio companies, which will be subject to negotiation with the sellers of such interests. In the absence of a readily ascertainable market price, assets of the underlying private equity funds will be valued by the general partners of such funds or the portfolio companies themselves. The valuation of such securities may create a conflict of interest for such general partner, as such assets may constitute a substantial portion of such underlying fund’s investments and their value may affect the general partner’s compensation. AIMS generally will not have sufficient information in order to be able to confirm or review the accuracy of these valuations.
- **Failure by Other Investors to Meet Capital Calls of Underlying Funds**—Failure by one or more other investors to meet a capital call of a third-party investment vehicle could have adverse consequences for AIMS’s investment funds and separate accounts. The third-party investment vehicle may be permitted to require its investors to contribute additional capital to satisfy the shortfall. If the third-party investment vehicle is unable to raise sufficient capital to consummate a proposed investment, its general partner may not be able to diversify its portfolio, which could adversely affect results of such third-party investment vehicle and could also result in the third-party investment vehicle’s investments being concentrated in relatively few properties and/or regions. Furthermore, the third-party investment vehicle may not have sufficient capital to contribute capital to existing portfolio companies necessary to ensure their ongoing financial stability. If multiple investors fail to meet capital calls from a particular third-party investment vehicle, the third-party investment vehicle could default on its obligations, which could result in the termination of the third-party investment vehicle, causing a lower return, or potentially a loss, of AIMS’s investments.
- **Giveback Obligations**—The terms of an investment fund may require the return of distributions received from investments, including potentially distributions made prior to the time the Advisory Account became an investor in such investment fund, upon the occurrence of

certain circumstances, including to satisfy any indemnification, reimbursement, contribution or similar obligation (including any obligation resulting from applicable law), or any other expense or obligation, of the investment fund. The manager of such investment fund may set aside amounts otherwise distributable to investors for such purpose, should they arise, and amounts set aside to fund such payments will reduce the amount of funds available for distribution to an investor or make additional portfolio investments.

- Limited Ability to Negotiate Terms of Investments in Underlying Funds—When AIMS acquires interests from investors in underlying funds, rather than from the underlying funds themselves (secondary investments), AIMS may have limited or no opportunity to negotiate the terms of the interests in the underlying funds or other special rights or privileges.
- Limited Operating History and Competition Associated with Portfolio Companies—Certain portfolio companies in which AIMS's investment funds and Advisory Accounts invest, either directly or indirectly, may involve a high degree of business and financial risk. These companies may (i) be in an early stage of development and not have a proven operating history; (ii) be operating at a loss or have significant variations in operating results; (iii) be engaged in a rapidly changing business with products subject to a substantial risk of obsolescence; (iv) require substantial additional capital to support their operations, to finance expansion or to maintain their competitive position; (v) rely on the services of a limited number of key individuals, the loss of any of whom could significantly adversely affect a portfolio company's performance; and (vi) otherwise have a weak financial condition or be experiencing financial difficulties. In addition, portfolio companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing and other capabilities, and a larger number of qualified management and technical personnel.
- Limited Regulatory Oversight—Third-party managers to which Advisory Accounts allocate assets may be subject to limited or no regulatory requirements or governmental oversight. Therefore, an Advisory Account may not have the benefit of certain protections that would otherwise be afforded to investors had the third-party managers been more heavily regulated.
- Private Investment Risk—Advisory Accounts managed by AIMS may invest in private investments, which may

include debt or equity investments in operating and holding companies, investment funds, joint ventures, royalty streams, commodities, physical assets and other similar types of investments that are highly illiquid and long-term. Clients should not invest unless they are prepared to retain their interests in the Advisory Account until the Advisory Account liquidates its private investments. Private investments are highly competitive and an Advisory Account may face greater challenges in making such investments than when investing in traditional asset classes. In addition, the Advisory Account's ability to transfer and/or dispose of private investments is expected to be highly restricted. To the extent an Advisory Account has invested in private investments indirectly through a pooled investment vehicle which is in the process of winding down, the pooled investment vehicle may hold a limited number of illiquid investments that may not be realized for a significant amount of time and the Advisory Account will continue to bear its portion of the pooled investment vehicle's operating costs during such time. The pooled investment vehicle may be unable to dispose of such investments other than through sale in a secondary market, which could be at a disadvantageous price.

- Reliance on Third-Party Managers—AIMS relies on the expertise of numerous third-party managers who are actively involved in running and overseeing the underlying funds to help identify, evaluate, underwrite, operate, manage and dispose of assets. AIMS's selection of an underlying fund in which to invest its investment funds and separate accounts is inherently based on subjective criteria with the result that the true performance and abilities of a particular general partner of an underlying fund will be difficult to assess. The historical performance of a general partner is not indicative of its future performance, which can vary considerably. Moreover, the underlying funds may be recently formed and may have no independent operating history upon which to evaluate their likely performance. In addition, while representatives of AIMS may serve on the advisory boards of certain underlying funds or portfolio companies, AIMS generally will not have the opportunity to evaluate or to approve the specific investments made by any underlying fund and will not have an active role in the day-to-day management of the underlying funds. Consequently, the success of an underlying fund, and, in turn, any of AIMS's investment funds or separate accounts, is substantially dependent on the general partners of the underlying funds in which the

investment funds and separate accounts invest and the individuals associated with such general partners. Should one or more of these individuals become incapacitated or in some other way cease to participate in the investment determinations of the applicable underlying fund, AIMS's investment funds and separate accounts could be adversely affected. In addition, the returns of AIMS's investment funds and separate accounts could be substantially adversely affected by the unfavorable performance of any of the underlying funds in which they invest.

- **Risks of Cross Collateralization of Borrowing Obligations**—Leverage, if any, used by Advisory Accounts that are pooled investment vehicles may be structured in a way that the Advisory Accounts are jointly responsible on a cross-guaranteed or cross-collateralized basis for the repayment of the indebtedness. An Advisory Account may be adversely affected if another Advisory Account defaults on its obligations in respect of any such indebtedness.
- **Underlying Funds Invest Independently**—The underlying funds in which AIMS's investment funds and separate accounts invest make investment decisions independently from each other and may at times hold economically offsetting positions, or could hold interests in the same underlying portfolio companies. Greater concentration of positions across multiple underlying funds or portfolio companies likely will increase the adverse effect of any problems experienced in the market, sector, or industry in which the positions are concentrated.

Real Estate

- **Dependence on Operating Partners**—An Advisory Account may rely on the expertise of operating partners who help identify, evaluate, underwrite, develop, operate, manage and dispose of assets. The selection of an operating partner is inherently based on subjective criteria with the result that the true performance and abilities of a particular operating partner will be difficult to assess. An operating partner may suffer a business failure or become bankrupt or may engage in activities that compete with investments of the Advisory Account. These and other problems, including the deterioration of the business relationship between the Advisory Account and the operating partner, could have a material adverse effect on the assets managed by such operating partner.
- **Environmental Risks and Natural Disasters**—Investments in or relating to real estate assets may be subject to

numerous statutes, rules and regulations relating to environmental protection. Certain statutes, rules and regulations might require that investments address prior environmental contamination, including soil and groundwater contamination, which results from the spillage of fuel, hazardous materials or other pollutants. Under various environmental statutes, rules and regulations, a current or previous owner or operator of real property may be liable for non-compliance with applicable environmental and health and safety requirements and for the costs of investigation, monitoring, removal or remediation of hazardous materials. These laws often impose liability, whether or not the owner or operator knew of or was responsible for the presence of hazardous materials. An Advisory Account may be exposed to substantial risk of loss from environmental claims arising in respect of real estate acquired with environmental problems, and the loss may exceed the value of such investment. In addition, certain investments may be located in earthquake zones or be subject to risks associated with other natural disasters, such as fire, hurricanes, tornadoes, windstorms, volcanic eruptions, tsunamis or floods. Insurance coverage of such risks may be limited, may be subject to large deductibles or may be, or in the future become, completely unavailable, and BH will determine in its discretion whether to seek insurance coverage of (or to seek alternative ways to manage or mitigate) such risks.

- **Failure to Qualify as a REIT Would Result in Higher Taxes**—Each REIT in which an Advisory Account invests will operate in a manner intended to qualify as a REIT for U.S. federal income tax purposes. A REIT's compliance with the REIT income and asset requirements depends, however, upon its ability to successfully manage the composition of its income and assets on an ongoing basis. If any REIT were to fail to qualify as a REIT in any taxable year, it would be subject to U.S. federal, state and local income tax, including any applicable alternative minimum tax, on its taxable income at regular corporate rates, and distributions by the REIT would not be deductible by such REIT in computing its taxable income. Even if a REIT remains qualified for taxation as a REIT, it may be subject to certain U.S. federal, state and local taxes on its income and assets under certain circumstances.
- **Real Estate Industry Risk**—The real estate industry is particularly sensitive to economic downturns; specific market conditions may result in occasional or permanent reductions in property values. The values of securities of

companies in the real estate industry may go through cycles of relative under-performance and out-performance in comparison to equity securities markets in general. Additionally, there are risks related to general and local economic conditions which may include: possible increased cost of or lack of availability of mortgage financing or insurance; variations in rental income, neighborhood values or the appeal of property to tenants; interest rates; overbuilding; extended vacancies of properties; increases in competition, property and other taxes, assessed values and operating expenses; fluctuations in energy prices; and changes in zoning laws. Real estate industry companies are dependent upon management skill, may not be diversified, and are subject to heavy cash flow dependency, default by borrowers and self-liquidation. Advisory Accounts may be subject to personal injury or property damage or similar claims by private parties in respect of investments, and changes in laws or in the condition of an asset may create liabilities that did not exist at the time of acquisition of an investment and that could not have been foreseen. In addition, investments that may require development are subject to additional risks, including availability and timely receipt of zoning and other regulatory approvals and cost and timely completion of construction (which may be affected by weather, labor conditions or material shortages).

For additional information about the material risks associated with this strategy, please refer to the risks described under “Private Equity” above.

Credit, Fixed Income and Public Equity

- Limitations on AIMS’s Authority—AIMS’s ability to waive or amend the investment objectives, policies, and strategies, remove, replace or withdraw assets from a third-party manager, reallocate assets among third-party managers and vary or change the allocation of assets of an Advisory Account may be subject to the limitations imposed by the agreements with third-party managers, market conditions and applicable law. Losses may result during the time it takes AIMS to react to market or other conditions and comply with the required notice obligations or other contractual agreements.
- Limited Regulatory Oversight—Third-party managers to which Advisory Accounts allocate assets may be subject to limited or no regulatory requirements or governmental oversight. Therefore, an Advisory Account may not have

the benefit of certain protections that would otherwise be afforded to investors had the third-party managers been more heavily regulated.

- Reliance on Third-Party Managers—The success of an Advisory Account with a AIMS strategy depends upon, among other things, the ability of the third-party managers to develop and successfully implement trading strategies that achieve their investment objectives. While AIMS will select and monitor the third-party managers, AIMS relies to a great extent on information provided by the third-party managers and may have limited access to other information regarding the third-party managers’ portfolios and operations. There is a risk that a third-party manager may knowingly, negligently or otherwise withhold or misrepresent information, including the presence or effects of any fraudulent or similar activities. AIMS’s proper performance of its monitoring functions would generally not give AIMS the opportunity to discover such situations prior to the time the third-party manager discloses (or there is public disclosure of) the presence or effects of any fraudulent or similar activities.
- Third-Party Managers Invest Independently—The third-party managers make investment decisions independently of other third-party managers and may at times hold economically offsetting positions, and could indirectly incur transaction costs without accomplishing any net investment result, or may be competing with each other for the same positions in one or more markets. Multiple third-party managers may hold large positions in a relatively limited number of the same or similar investments. Greater concentration of positions across multiple third-party managers likely will increase the adverse effect of any problems experienced in the market, sector, or industry in which the positions are concentrated.

Global Portfolio Solutions

In addition to the risks described above under “General Portfolio Risks” and “Other General Risks,” to the extent that IIS allocates Advisory Account assets to investment products managed by the Fundamental Equity, Quantitative Investment Strategies, Global Fixed Income and Liquidity Management and Alternative Investments and Manager Selection personnel, the risks described above under their respective sections will apply. Similarly, to the extent IIS allocates Advisory Account assets to GSIS or HFS, other registered investment advisers of Buxton Helmsley, the risks described in their respective Forms ADV will

apply. In addition, the material risks associated with the strategies utilized by IIS include:

- Access to Information—BH seeks to select potential investment products for an Advisory Account utilizing information made available to it. With respect to those efforts, BH will rely on information and sources it utilizes as accurate, complete or up-to-date. Under certain circumstances, BH may not (i) access certain information (which may be material) regarding a specific investment product (including, for example, if the manager or an issuer of an investment product does not provide BH access to certain information) or (ii) utilize certain information (which may be material) in its possession regarding a specific investment product (including because use of such information would or might be a breach of duty or confidence to any other person or of applicable law, or would violate any applicable policies or procedures). In addition, Buxton Helmsley maintains internal informational barriers, as further described in Item 11, Code of Ethics, Participation or Interest in Client Transactions and Personal Trading—Participation or Interest in Client Transactions—Certain Effects of the Activities of BH and Other Buxton Helmsley Entities on Advisory Accounts, that may prevent BH personnel from obtaining relevant information. If BH personnel do not access information with respect to an investment product, they may determine not to consider such investment product for an Advisory Account, which could materially adversely affect the Advisory Account. Conversely, BH personnel may select an investment product for the Advisory Account notwithstanding that certain material information is unavailable to such personnel. Any allocation to (or continued holding of) such an investment product could materially adversely affect the Advisory Account. For example, such investment product could significantly decline in value and could result in substantial losses to the Advisory Account.
- Investments in Affiliated Products—Depending on the particular mandate, there are material risks related to Advisory Account investments in Affiliated Products, including those described below. Please also refer to the potential conflicts of interest described in Item 11, Code of Ethics, Participation or Interest in Client Transactions and Personal Trading—Participation or Interest in Client Transactions—Financial Incentives in Selling and Managing Advisory Accounts.
- No Negotiation of Fees—BH will not negotiate the fees or expenses of an Advisory Account's investment in an Affiliated Product. Therefore, other investors in such Affiliated Products may be charged fees and expenses that are lower (potentially significantly lower) than the fees and expenses charged to such Advisory Account. In addition, this may create a disincentive on BH's part to negotiate lower fees and expenses in respect of External Products to the extent that such fees and expenses might be less than the fees and expenses for comparable Affiliated Products. The fees and expenses charged to an Advisory Account in respect of Affiliated Products will be outside the scope of the agreement governing the Advisory Account and BH may act in its own interest and the interests of Buxton Helmsley in negotiating such fees and expenses.
- No or Limited Review of External Products When Allocating to Affiliated Products—If IIS allocates (or recommends allocation of) Advisory Account assets to Affiliated Products, it will not have canvassed the universe of External Products available or reviewed External Products that may also have been appropriate for the Advisory Account unless otherwise agreed in the agreement governing the Advisory Account. In such circumstances, there may (or may not) be one or more External Products that may be a more appropriate addition to the Advisory Account than the Affiliated Product selected by BH, including from the standpoint of the factors that BH has taken into consideration or other factors.
- Regulatory Restrictions Applicable to Buxton Helmsley—From time to time, the activities of Affiliated Products may be restricted because of regulatory or other requirements applicable to Buxton Helmsley and/or its internal policies designed to comply with, limit the applicability of, or otherwise relate to such requirements. External Products may not be subject to some of these restrictions or considerations. For additional information, please refer to Item 11, Code of Ethics, Participation or Interest in Client Transactions and Personal Trading—Participation or Interest in Client Transactions—Firm Policies and Regulatory Restrictions Affecting Advisory Accounts.
- Review of External Products—To the extent that BH reviews External Products in accordance with the investment guidelines of an Advisory Account, BH will review as potential investments for the Advisory Account only those External Products that have been approved by BH for investment by its advisory clients and will not

review other External Products or canvass the universe of External Products available. In such circumstances, there may (or may not) be one or more External Products that may be a more appropriate addition to the Advisory Account than the investment product selected by BH, including from the standpoint of the factors that BH has taken into consideration or other factors.

- **Tactical Tilts**—BH utilizes tactical investment ideas derived from short-term market views (“Tactical Tilts”) for Advisory Accounts. BH determines which Tactical Tilts to implement in respect of Advisory Accounts and the manner in which to implement them. Depending on the particular mandate, there are material risks related to the use of Tactical Tilts for Advisory Accounts. The timing for implementing a Tactical Tilt or unwinding a position can materially affect the performance of such Tactical Tilt. For various reasons, Buxton Helmsley may implement a Tactical Tilt or unwind a position for its client accounts or on its own behalf at a different time than implemented by IIS in respect of an Advisory Account, which may result in different performance between the Advisory Account on the one hand and Buxton Helmsley or its client accounts on the other. In addition, IIS expects to monitor an Advisory Account’s Tactical Tilt positions only on a periodic basis. Therefore, changes in market conditions and other factors may result in substantial losses to an Advisory Account, and no assurance can be given that a Tactical Tilt position will be unwound before the Advisory Account suffers losses. The use of Tactical Tilts also may include the risk of reliance on models.
- **Target Ranges and Rebalancing**—To the extent a client designates target allocations for an Advisory Account in respect of asset classes and/or product classes (i.e., Affiliated Products vs. External Products), allocations of an Advisory Account’s assets may, from time to time, be out of balance with the Advisory Account’s target ranges for extended periods of time or at all times due to various factors, such as fluctuations in, and variations among, the performance of the investment products to which the assets are allocated and reliance on estimates in connection with the determination of percentage allocations. Any rebalancing by IIS of the Advisory Account’s assets may have an adverse effect on the performance of the Advisory Account’s assets. For example, the Advisory Account’s assets may be allocated away from an over-performing investment product and allocated to an under-performing investment product. In

addition, the achievement of any intended rebalancing may be limited by several factors, including the use of estimates of the net asset values of the investment products, and, in the case of investments in investment products that are pooled investment vehicles, restrictions on additional investments in and redemptions from such investment products. Similarly, the use of target ranges in respect of product classes may result in an Advisory Account containing a significantly greater percentage of Affiliated Products than would otherwise be the case, including during periods in which Affiliated Products are under-performing External Products. In such circumstances, there may (or may not) be one or more External Products that may be a more appropriate addition to an Advisory Account than the Affiliated Products then in the Advisory Account.

Item 9 – Disciplinary Information

This Item requests information relating to BH. There are no reportable material legal or disciplinary events related to BH. Additional information about BH’s investment management affiliates is contained in Part 1 of BH’s Form ADV.

No items for reporting in relation to “a criminal or civil action in a domestic, foreign or military court of competent jurisdiction.”

No items for reporting in relation to “an administrator proceeding before the Securities and Exchange Commission, any other federal regulatory agency, any state regulatory agency, or any foreign financial regulatory authority.”

No items for reporting in relation to “a self-regulatory organization proceeding.”

For information relating to other Buxton Helmsley affiliates, please visit www.buxtonhelmsley.com and refer to the public filings of The Buxton Helmsley Group, Inc.

Item 10 – Other Financial Industry Activities and Affiliations

OTHER MATERIAL RELATIONSHIPS *with* AFFILIATED ENTITIES

BH may use, suggest or recommend its own services or those of affiliated Buxton Helmsley entities. BH may manage Advisory Accounts on behalf of such affiliated Buxton Helmsley entities, which may create potential conflicts of interest related to BH's determination to use, suggest or recommend the services of such entities. The particular services involved will depend on the types of services offered by the affiliate. The arrangements may involve sharing or joint compensation, or separate compensation, subject to the requirements of applicable law. Particular relationships may include, but are not limited to, those discussed below.

Buxton Helmsley's affiliates will retain any compensation when providing investment services to, or in connection with investment activities of, Advisory Accounts. Compensation may take the form of commissions, markups, markdowns, service fees or other commission equivalents. Advisory Accounts will not be entitled to any such compensation retained by Buxton Helmsley's affiliates.

BH may receive record keeping, administrative and support services from its broker-dealer affiliates. BH, in its advisory capacity, may also obtain research ideas, analyses, reports and other services (including distribution services) from broker-dealer affiliates. As described in Item 12, Brokerage Practices, BH may pay affiliates for brokerage and research services that assist BH in the investment decision-making process with "soft" or commission dollars. BH may receive these services in lieu of the affiliates reducing the commissions or fees they charge an Advisory Account, and these services may or may not be used to benefit the Advisory Account.

Buxton Helmsley may have ownership interests in trading networks, securities, or derivatives indices, trading tools, settlement systems and other assets.

Investment Companies and Other Pooled Investment Vehicles

BH or its affiliates act in an advisory or sub-advisory capacity, including as adviser, administrator and/or distributor, to a variety of U.S. and non-U.S. investment companies as well as other pooled investment vehicles including collective trusts and alternative investment funds. Certain personnel of BH ("BH Personnel") are also directors, trustees and/or officers of these investment companies and other pooled investment vehicles.

Other Investment Advisers

BH may, in its discretion, delegate all or a portion of its advisory or other functions (including placing trades on behalf of Advisory Accounts) to any affiliate that is registered with the

SEC as an investment adviser or to any Participating Affiliate. To the extent BH delegates its advisory or other functions to affiliates that are registered with the SEC as investment advisers, a copy of the brochure of each such affiliate is available on the SEC's website (www.adviserinfo.sec.gov) and will be provided to clients or prospective clients upon request. Certain services may be performed for affiliates by BH employees who are also employees of such affiliates or through delegation or other arrangements. Clients that want more information about any of these affiliates should contact BH.

In addition, BH may participate in sub-advisory, co-advisory or other joint projects related to pooled investment vehicles with institutions not a part of Buxton Helmsley.

Sponsor or Syndicator of Limited Partnerships

BH and its affiliates may create and/or distribute unregistered privately-placed vehicles and may receive fees.

Management Persons; Policies and Procedures

Certain of BH's management persons may also hold positions with the affiliates listed above. In these positions, those management persons of BH may have some responsibility with respect to the business of these affiliates and the compensation of these management persons may be based, in part, upon the profitability of other parts of Buxton Helmsley. Consequently, in carrying out their roles at BH and these other entities, the management persons of BH may be subject to the same or similar potential conflicts of interest that exist between BH and these affiliates.

BH has established a variety of restrictions, policies, procedures, and disclosures designed to address potential conflicts that may arise between BH, its management persons and its affiliates. These policies and procedures include: information barriers designed to prevent the flow of information between BH, personnel of BH and certain other affiliates; policies and procedures relating to brokerage selection, trading with affiliates or investing in products managed or sponsored by affiliates; and allocation and trade sequencing policies applicable to Advisory Accounts and Accounts. Additional information about these conflicts and the policies and procedures to address them is available in Item 11, Code of Ethics, Participation or Interest in Client Transactions and Personal Trading.

Affiliated Indexes

BH and its affiliates may develop, own and operate stock market and other indexes (each, an "Index") based on proprietary

investment and trading strategies developed by BH or its affiliates (“Proprietary Strategies”). Some of the exchange-traded funds (“ETFs”) for which BH or its affiliates act as investment adviser (the “BH ETFs”) seek to track the performance of the Indexes. BH may, from time to time, manage Advisory Accounts which track the same Indexes used by the BH ETFs or which are based on the same, or substantially similar, Proprietary Strategies that are used for the Indexes and the BH ETFs. The operation of the Indexes, the BH ETFs and Advisory Accounts in this manner may give rise to potential conflicts of interest.

These potential conflicts include trading based on prior knowledge of index changes (known as “front-running”), unauthorized access to Index information, allowing Index changes that benefit BH or other Advisory Accounts instead of the investors in the BH ETFs, and the manipulation of Index pricing to present the performance of BH ETFs, or tracking ability, in a preferential light.

To address these potential conflicts, BH, among other things, has adopted written policies and procedures designed to prevent the use and dissemination of material non-public information regarding the Indexes, as well as to address potential conflicts that may arise in connection with BH’s operation of the Indexes, the BH ETFs and Advisory Accounts. These include policies and procedures such as those designed to ensure the equitable allocation of portfolio transactions as well as cross-trading policies. In addition, as described in Item 11, Code of Ethics, Participation or Interest in Client Transactions and Personal Trading, BH has adopted a code of ethics. BH is not permitted to obtain or use material non-public information in effecting purchases and sales in public securities transactions for Advisory Accounts, including the BH ETFs. Furthermore, the portfolio holdings of the BH ETFs are publicly disclosed on a daily basis, further minimizing the potential for conflicts with respect to the Indexes. For additional information, please see Item 11, Code of Ethics, Participation or Interest in Client Transactions and Personal Trading.

RECEIPT *of* COMPENSATION FROM INVESTMENT ADVISERS

BH may allocate Advisory Account assets to one or more third-party managers, directly or indirectly, through, among other means, discretionary managed accounts or investment funds. The interests and business relationships of Buxton Helmsley (including BH) and its personnel may create potential conflicts in the selection of managers for, or the determination to increase allocations of assets to or withdraw assets from third-party

managers on behalf of, Advisory Accounts. BH makes determinations regarding which third-party managers to make available to clients consistent with its fiduciary duties and the investment processes described in Item 8, Methods of Analysis, Investment Strategies and Risk of Loss. Buxton Helmsley may derive benefits from certain decisions made in respect of managers. It is expected that Buxton Helmsley may receive various forms of compensation, commissions, payments, rebates, remuneration, investment activity, services or other benefits from managers to which Advisory Accounts allocate assets, or may have interests in such managers or their businesses and provide a variety of products and services to them, including prime brokerage and research services. The amount of such compensation, commissions, payments, rebates, remuneration, investment activity, services or other benefits to Buxton Helmsley may be greater if BH selects such managers than it would have been had other managers been selected that might also have been appropriate for the Advisory Accounts.

In addition, BH will face potential conflicts in making determinations as to whether Advisory Accounts should invest or withdraw funds from managers with which BH or Buxton Helmsley has other business relationships. For example, Buxton Helmsley, Advisory Accounts or other Accounts may have equity, profits or other interests in managers or may have entered into arrangements with such managers in which such managers would share with Buxton Helmsley, an Advisory Account or other Account a material portion of its fees or allocations (including, without limitation, fees earned by such managers as a result of the allocation of Advisory Account assets to such managers). Payments to Buxton Helmsley (either directly from such managers or in the form of fees or allocations payable by Advisory Accounts or other Accounts) will generally increase as the amount of assets that such managers manage increases. Therefore, investment by Advisory Accounts with such managers where Buxton Helmsley, Advisory Accounts or other Accounts have a fee and/or profit sharing arrangement or other interest in the equity or profits of such managers may result in additional revenues to Buxton Helmsley and its personnel. The relationship Buxton Helmsley, Advisory Accounts and other Accounts have with such managers may also result in BH being incentivized to increase Advisory Accounts’ investments with such managers or to retain their investments with such managers.

Buxton Helmsley (including, without limitation, BH) may receive notice of, or offers to participate in, investment opportunities from third-party managers, their affiliates or other third parties. Such investment opportunities may be offered to

Buxton Helmsley for various reasons, which may include business relationships with third-party managers or their affiliates or other reasons, including that one or more Advisory Accounts have made investments with such third-party managers, but such opportunities may not be allocated to such Advisory Accounts. Therefore, investment (or continued investment) by particular Advisory Accounts with such managers may result in additional investment opportunities to Buxton Helmsley or other Accounts. An Advisory Account will not be entitled to compensation in connection with investments that are not allocated to such Advisory Account (or not fully allocated to such Advisory Account) and are allocated to Buxton Helmsley (including BH) or other Accounts (including other Advisory Accounts).

In addition, the fee structure of certain Advisory Accounts (pursuant to which BH may be required to compensate managers out of the fee it receives from the client) may incentivize BH to select managers with lower compensation levels (including managers that discount their fees based on aggregate account size or other relationships) than other managers which might also be appropriate for the Advisory Accounts. Fee breakpoints in an Advisory Account may also be affected by Buxton Helmsley's business relationships and the size of Accounts other than the Advisory Account, and may directly or indirectly benefit Buxton Helmsley and other Accounts. Advisory Accounts will not be entitled to any compensation with respect to such benefits received by Buxton Helmsley and other Accounts.

Buxton Helmsley as Investment Adviser

Buxton Helmsley (including BH) will receive compensation in connection with the management of Affiliated Products (including discretionary managed accounts or investment funds (including money market funds) to which Advisory Accounts directly or indirectly allocate assets. Advisory Accounts will pay all fees to Buxton Helmsley in its capacity as manager of such Affiliated Products, and fees to BH in its capacity as advisor to the Advisory Accounts will not be reduced by any fees payable to Buxton Helmsley as manager (i.e., there could be "double fees" involved in making any such investment, which would not arise in connection with the direct allocation of assets by the account holder to such Affiliated Products). Because Buxton Helmsley will on an overall basis receive higher fees, compensation and other benefits if the assets of Advisory Accounts are allocated to Affiliated Products rather than solely to External Products, BH will be incentivized to allocate the assets of Advisory Accounts to Affiliated Products. Furthermore, BH will have an interest in allocating the assets of Advisory Accounts to Affiliated Products

that impose higher fees than those imposed by other Affiliated Products or that provide other benefits to Buxton Helmsley. Any differential in compensation paid to personnel in connection with certain Affiliated Products rather than other Affiliated Products may create a financial incentive on the part of BH to select certain Affiliated Products over other Affiliated Products. Similarly, since BH and/or Buxton Helmsley may on an overall basis receive higher fees, compensation and other benefits if Advisory Account assets are allocated to External Products indirectly through BH Funds of Funds rather than directly to External Products, BH may be incentivized to select BH Funds of Funds for an Advisory Account. Correspondingly, BH may be disincentivized to consider the removal of an Advisory Account's assets from, or the modification of an Advisory Account's allocations to, an Affiliated Product at a time that it otherwise would have where doing so would decrease the fees, compensation and other benefits to Buxton Helmsley, including where disposal of such Affiliated Product by the Advisory Account would likely adversely affect the Affiliated Product with respect to its liquidity position or otherwise.

Neither Buxton Helmsley nor BH will be required to share any fees, allocations, compensation, remuneration or other benefits received in connection with an Advisory Account with the Advisory Account or the client or offset such fees, allocations, compensation, remuneration and other benefits against fees and expenses the client may otherwise owe Buxton Helmsley or BH.

Item 11 – Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

CODE of ETHICS and PERSONAL TRADING

BH has adopted a Code of Ethics (the "Code") under Rule 204A-1 of the Advisers Act designed to provide that BH Personnel, and certain additional personnel of Buxton Helmsley who support BH, comply with applicable federal securities laws and place the interests of clients first in conducting personal securities transactions. The Code imposes certain restrictions on securities transactions in the personal accounts of covered persons to help avoid conflicts of interest, including restrictions on the purchase and sale of publicly traded equity securities. Subject to the limitations of the Code, covered persons may buy and sell securities or other investments for their personal accounts, including investments in pooled investment vehicles that are sponsored, managed or advised by Buxton Helmsley, and may also take positions that are the same as, different from, or made at different times than, positions taken for Advisory

Accounts. BH will provide a copy of the Code to clients or prospective clients upon request.

Additionally, all personnel of Buxton Helmsley, including BH Personnel, are subject to firm-wide policies and procedures regarding confidential and proprietary information, information barriers, private investments, outside business activities and personal trading.

PARTICIPATION *or* INTEREST *in* CLIENT TRANSACTIONS

BH acts as investment adviser under the Advisers Act in accordance with fiduciary standards. Buxton Helmsley is a full-service asset management and financial services organization and a participant in global financial markets. As such, Buxton Helmsley provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and high net-worth individuals. Buxton Helmsley acts as a research provider, investment manager, financier, advisor, lender, counterparty, agent and principal. In those and other capacities, Buxton Helmsley advises clients in all markets and transactions and purchases, sells, holds and recommends a broad array of investments, including securities, derivatives, loans, commodities, currencies, credit default swaps, indices, baskets and other financial instruments and products for its own accounts and for the accounts of clients and of its personnel, through client accounts and the relationships and products it sponsors, manages and advises (such as Buxton Helmsley or other client accounts, relationships and products, including Advisory Accounts, collectively, the "Accounts"). Buxton Helmsley has direct and indirect interests in the global fixed income, currency, commodity, equities, bank loan and other markets, and the securities and issuers, in which the Advisory Accounts may directly and indirectly invest. As a result, Buxton Helmsley's activities and dealings may affect Advisory Accounts in ways that may disadvantage or restrict Advisory Accounts and/or benefit Buxton Helmsley or other Accounts (including Advisory Accounts). The following are descriptions of certain conflicts of interest and potential conflicts of interest that may be associated with the financial or other interests that BH and Buxton Helmsley may have in transactions effected by, with, and on behalf of Advisory Accounts.

Principal Trading and Cross/Agency Cross Transactions with Advisory Accounts

When permitted by applicable law and BH policy, BH, acting on behalf of its Advisory Accounts, may enter into transactions in

securities and other instruments with or through Buxton Helmsley or in Affiliated Products, and may cause Advisory Accounts to engage in principal transactions, cross transactions and agency cross transactions. There may be potential conflicts of interest or regulatory issues relating to these transactions which could limit BH's decision to engage in these transactions for Advisory Accounts. Principal transactions occur if BH, on behalf of Advisory Accounts, engages in a transaction in securities or other instruments with Buxton Helmsley or in Affiliated Products acting as principal. Buxton Helmsley may earn compensation (such as a spread or mark-up) in connection with these transactions. Cross transactions occur if BH causes an Advisory Account to buy securities or other instruments from, or sell securities or other instruments to, another Advisory Account of BH or its investment advisory affiliates. An agency cross transaction occurs if Buxton Helmsley acts as broker for, and receives a commission from, an Advisory Account on one side of the transaction and a brokerage account on the other side of the transaction in connection with the purchase or sale of securities by the Advisory Account. Buxton Helmsley may have a potentially conflicting division of loyalties and responsibilities to the parties in such transactions, and has developed policies and procedures in relation to such transactions and conflicts. Cross transactions may disproportionately benefit some Advisory Accounts relative to other Advisory Accounts due to the relative amount of market savings obtained by the Advisory Accounts. Any principal, cross or agency cross transactions will be effected in accordance with fiduciary requirements and applicable law.

Certain Effects of the Activities of BH and Other Buxton Helmsley Entities on Advisory Accounts

Buxton Helmsley engages in various activities in the global financial markets. Buxton Helmsley, acting in various capacities (including investor, advisor and research provider), may take actions or advise on transactions in respect of Accounts (including Advisory Accounts) or companies or affiliated or unaffiliated investment funds in which Advisory Accounts have an interest that may have potential adverse effects on Advisory Accounts.

BH provides advisory services to Advisory Accounts through a variety of investment products and arrangements. BH's decisions and actions on behalf of an Advisory Account may differ from those on behalf of other Advisory Accounts. Advice given to, or investment or voting decisions made for, one or more Advisory Accounts may compete with, affect, differ from, conflict with, or involve timing different from, advice given to or investment decisions made for other Advisory Accounts.

Buxton Helmsley (including BH), the clients it advises, and its personnel have interests in and advise Accounts (including Advisory Accounts) that have investment objectives or portfolios similar to or opposed to those of particular Advisory Accounts, and/or which engage in and compete for transactions in the same types of securities and other instruments as particular Advisory Accounts, including Accounts that may provide greater fees or other compensation, including performance-based fees, to Buxton Helmsley. These interests may involve the same or related securities or other instruments as those in which particular Advisory Accounts invest, and such Accounts may engage in a strategy while an Advisory Account is undertaking the same or a differing strategy, any of which could directly or indirectly disadvantage the Advisory Account. For example, an Advisory Account may buy a security and Buxton Helmsley may establish a short position in that same security or in similar securities. This short position may result in the impairment of the price of the security that the Advisory Account holds or may be designed to profit from a decline in the price of the security. To the extent an Advisory Account engages in transactions in the same types of securities as other Accounts (including other Advisory Accounts), transactions by such other Accounts may dilute or otherwise negatively affect the investments of the Advisory Account. Moreover, a particular Advisory Account on the one hand, and Buxton Helmsley or an Account (including another Advisory Account) on the other hand, may also vote differently on or take or refrain from taking different actions with respect to the same security, which may be disadvantageous to the Advisory Account. In addition, Buxton Helmsley or Accounts (including Advisory Accounts), on the one hand, and a particular Advisory Account, on the other hand, may invest in or extend credit to different classes of securities or different parts of the capital structure of the same issuer and as a result one may take actions that adversely affect the other.

In addition, Buxton Helmsley (including BH) may advise Accounts with respect to different parts of the capital structure of the same issuer, or classes of securities that are subordinate or senior to securities, in which a particular Advisory Account invests. As a result, Buxton Helmsley may pursue or enforce rights or activities on behalf of Accounts (including Advisory Accounts), or refrain from pursuing or enforcing rights or activities, with respect to a particular issuer in which the Advisory Account has invested. For example, Buxton Helmsley (on behalf of Accounts, including Advisory Accounts) may seek a liquidation of an issuer in respect of which it holds debt securities, whereas if a particular Advisory Account holds equity securities in such issuer, the Advisory Account may prefer a reorganization

of the issuer. Advisory Accounts may be negatively affected by these activities and decisions, and Advisory Account transactions may be effected at prices or terms that may be less favorable than would otherwise have been the case. Particular Advisory Accounts could sustain losses during periods in which Buxton Helmsley and other Accounts (including Advisory Accounts) achieve profits. The negative effects described above may be more pronounced in connection with transactions in, or Advisory Accounts utilizing, small capitalization, emerging market, distressed or less liquid strategies.

Buxton Helmsley may make loans to, or enter into asset-based or other credit facilities or similar transactions with, clients, companies or individuals, that may (or may not) be secured, including by a client's assets or interests in an Advisory Account. In connection with its rights as lender, Buxton Helmsley may act to protect its own commercial interest and may take actions that adversely affect the borrower. The borrower's actions may in turn adversely affect Advisory Accounts (e.g., if the borrower liquidates a large position in a security rapidly, the value of such security may decline and Advisory Accounts holding such security may in turn decline in value or may be unable to liquidate their positions in such security at an advantageous price).

Subject to applicable law, Buxton Helmsley (including BH) or Accounts (including Advisory Accounts and Accounts formed to facilitate investment by personnel of Buxton Helmsley) may also invest in or alongside particular Advisory Accounts that are pooled investment vehicles. Such investments may be on terms more favorable than those of an investment by other Advisory Accounts in the pooled investment vehicle and may constitute substantial percentages of the assets of the pooled investment vehicle. Unless provided otherwise by agreement to the contrary, Buxton Helmsley or Accounts may redeem interests in these pooled investment vehicles at any time without notice to or regard to the effect on the portfolios of Advisory Accounts invested in the pooled investment vehicle, which may be adverse.

Buxton Helmsley (including BH) may create, write, sell, issue, invest in or act as placement agent or distributor of derivative instruments related to Advisory Accounts such as pooled investment vehicles, or with respect to underlying securities or assets of an Advisory Account, or which may be otherwise based on or seek to replicate or hedge the performance of an Advisory Account. Such derivative transactions, and any associated hedging activity, may differ from and be adverse to the interests of Advisory Accounts.

Buxton Helmsley (including, as applicable, BH) and its personnel, when acting as an investor, advisor or research provider, may advise on transactions, make investment decisions or recommendations, provide differing investment views or have views with respect to research or valuations that are inconsistent with, or adverse to, the interests and activities of Advisory Accounts. Accounts may be offered access to advisory services through several different Buxton Helmsley advisory businesses (including BH). Different advisory businesses within Buxton Helmsley manage Accounts according to different strategies and may also apply different criteria to the same or similar strategies and may have differing investment views in respect of an issuer or a security. Similarly, within BH certain investment personnel or portfolio managers may have differing or opposite investment views in respect of an issuer or a security, and the positions an investment personnel member or portfolio manager take in respect of an Advisory Account they manage may be inconsistent with, or adverse to, the interests and activities of Advisory Accounts advised by other BH investment personnel members or portfolio managers. Moreover, research, analyses or viewpoints may be available to clients or potential clients at different times. Buxton Helmsley will not have any obligation to make available to the Advisory Accounts any research or analysis prior to its public dissemination. Buxton Helmsley, on behalf of one or more Accounts (including Advisory Accounts), may implement an investment decision or strategy ahead of, or contemporaneously with, or behind similar investment decisions or strategies made for Advisory Accounts (whether or not the investment decisions emanate from the same research analysis or other information). The relative timing for the implementation of investment decisions or strategies for particular Advisory Accounts, on the one hand, and other Accounts (including Advisory Accounts), on the other hand, may disadvantage the Advisory Accounts. Certain factors, for example, market impact, liquidity constraints, or other circumstances, could result in Advisory Accounts receiving less favorable trading results or incurring increased costs associated with implementing such investment decisions or strategies, or being otherwise disadvantaged.

Buxton Helmsley has established certain information barriers and other policies to address the sharing of information between different businesses within Buxton Helmsley. As a result of information barriers, BH generally will not have access, or will have limited access, to information and personnel in other areas of Buxton Helmsley, and generally will not be able to manage the Advisory Accounts with the benefit of information held by these other areas. Buxton Helmsley, due to its access to and knowledge of funds, markets and securities based on its prime brokerage and

other businesses, may make decisions based on information or take (or refrain from taking) actions with respect to interests in investments of the kind held by Advisory Accounts in a manner that may be adverse to Advisory Accounts, and will not have any obligation to share information with BH. Information barriers may also exist between businesses within BH. There may be circumstances in which, as a result of information held by certain portfolio management persons in BH, BH limits an activity or transaction for Advisory Accounts, including Advisory Accounts managed by portfolio management persons other than the personnel holding such information. In addition, Buxton Helmsley will not have any obligation to make available any information regarding its trading activities, strategies or views, or the activities, strategies or views used for other Accounts, for the benefit of Advisory Accounts. To the extent that BH has access to fundamental analysis and proprietary technical models or other information developed by Buxton Helmsley and its personnel, BH will not be under any obligation to effect transactions on behalf of the Advisory Accounts in accordance with such analysis and models. Different portfolio management personnel within BH may make decisions based on information or take (or refrain from taking) actions with respect to Advisory Accounts they advise in a manner that may be adverse to other Advisory Accounts. Such personnel may not share information with other portfolio management personnel within BH, including as a result of certain information barriers and other policies, and will not have any obligation to do so.

BH, in its capacity as manager, sponsor and adviser of Advisory Accounts and subject to applicable law, may cause Advisory Accounts to invest, directly or indirectly, in securities, bank loans or other obligations of companies affiliated with Buxton Helmsley, advised by Buxton Helmsley (including BH) or in which Buxton Helmsley or Accounts (including Advisory Accounts) have an equity, debt or other interest, or to engage in investment transactions that may result in other Accounts (including Advisory Accounts) being relieved of obligations or otherwise divested of investments. For example, an Advisory Account may acquire securities or indebtedness of a company affiliated with Buxton Helmsley directly or indirectly through syndicate or secondary market purchases. These activities by an Advisory Account may enhance the profitability of Buxton Helmsley' or other Accounts' (including Advisory Accounts') investment in and activities with respect to such companies.

Buxton Helmsley may provide various services to Advisory Accounts or to companies or affiliated or unaffiliated investment funds in which Advisory Accounts have an interest, which may

result in fees, compensation and remuneration, as well as other benefits, to Buxton Helmsley. For example, Buxton Helmsley may be hired by BH on behalf of an Advisory Account or directly by an Advisory Account, or by a company or an affiliated or unaffiliated investment fund in which an Advisory Account has an interest, to provide investment advisory, custody, distribution, transfer agency, administrative, lending or other services (including legal, accounting and other back office services) to the Advisory Account, company or investment fund. In addition, Buxton Helmsley may, now or in the future, act as broker, dealer, agent, lender or advisor or in other commercial capacities for Advisory Accounts or companies or affiliated or unaffiliated investment funds in which Advisory Accounts have an interest. For example, a company in which an Advisory Account has an interest may hire Buxton Helmsley to provide underwriting, merger advisory, placement agency, foreign currency hedging, research, asset management services, brokerage services or other services to the company. In connection with providing such services, Buxton Helmsley may take commercial steps in its own interests, or may advise the parties to which it is providing services to take actions or engage in transactions, which may have an adverse effect on Advisory Accounts. For example, Buxton Helmsley may advise a company to make changes to its capital structure the result of which would be a reduction in the value or priority of a security held by one or more Advisory Accounts. Actions taken or advised to be taken by Buxton Helmsley in connection with other types of transactions may also result in adverse consequences for Advisory Accounts. Providing such services to the Advisory Accounts and companies and affiliated or unaffiliated investment funds in which they invest may enhance Buxton Helmsley's relationships with various parties, facilitate additional business development and enable Buxton Helmsley to obtain additional business and generate additional revenue. Advisory Accounts will not be entitled to compensation related to any businesses of Buxton Helmsley or BH.

BH, while not the primary valuation agent of Advisory Accounts, performs certain valuation services related to securities and assets in Advisory Accounts. BH values securities and assets in Advisory Accounts according to its valuation policies. BH may value an identical asset differently than another division or unit within Buxton Helmsley values the asset, including because such other division or unit has information regarding valuation techniques and models or other information that it does not share with BH. This is particularly the case in respect of difficult-to-value assets. BH may also value an identical asset differently in different Advisory Accounts, including because different Advisory Accounts are subject to different valuation guidelines

pursuant to their respective governing agreements, different third party vendors are hired to perform valuation functions for the Advisory Accounts or the Advisory Accounts are managed or advised by different portfolio management personnel within BH. BH will face a conflict with respect to such valuations as they affect BH's compensation. In addition, to the extent BH utilizes third-party vendors to perform certain valuation functions, these vendors may have interests and incentives that differ from those of the Advisory Accounts.

Advisory Accounts will generally not be provided investment opportunities sourced by Buxton Helmsley businesses other than BH. Opportunities not allocated to Advisory Accounts may be undertaken by Buxton Helmsley (including BH) or other Accounts.

For a discussion of side-by-side management of Advisory Accounts, please refer to Item 6, Performance-Based Fees and Side-By-Side Management and Item 17, Voting Client Securities.

Financial Incentives in Selling and Managing Advisory Accounts

Buxton Helmsley and its personnel, including BH Personnel, may receive benefits and earn fees and compensation for services provided to Advisory Accounts and in connection with its distribution of Affiliated Products. BH will have a financial incentive to allocate Advisory Account assets to Affiliated Products rather than to accounts or funds managed by third parties. Any differentials in compensation will create a financial incentive for BH and its personnel to recommend or select advisory products or investment strategies that will result in greater compensation and profit to BH and, indirectly, to its personnel. Moreover, the client may establish target ranges in respect of an Advisory Account's allocation to Affiliated Products in consultation with BH. BH is incentivized for clients to select target ranges that will result in greater allocations to Affiliated Products that charge higher fees than other Affiliated Products. Please also refer to Item 6, Performance-Based Fees and Side-By-Side Management, and Item 10, Other Financial Industry Activities and Affiliations, Receipt of Compensation from Investment Advisers, Buxton Helmsley as Investment Adviser.

Firm Policies and Regulatory Restrictions Affecting Advisory Accounts

BH may restrict its investment decisions and activities on behalf of an Advisory Account in various circumstances, including as a result of applicable regulatory requirements, information held by

Buxton Helmsley, Buxton Helmsley's internal policies and/or potential reputational risk in connection with Accounts (including Advisory Accounts). As a result, BH might not engage in transactions for, or recommend transactions to, an Advisory Account in consideration of Buxton Helmsley's activities outside the Advisory Account. For example, BH may restrict or limit the amount of an Advisory Account's investment where exceeding a certain aggregate amount could require a filing or a license or other regulatory or corporate consent, which could, among other things, result in additional costs and disclosure obligations for Buxton Helmsley, including BH. BH may also reduce a particular Advisory Account's interest in an investment opportunity that has limited availability so that other Advisory Accounts that pursue similar investment strategies may be able to acquire an interest in the investment opportunity. In addition, BH is not permitted to obtain or use material non-public information in effecting purchases and sales in public securities transactions for Advisory Accounts. BH may also limit an activity or transaction engaged in on behalf of a particular Advisory Account, including as a result of information held by Buxton Helmsley (including information held by a portfolio management personnel in BH other than the personnel managing the Advisory Account), and may limit its exercise of rights on behalf of the Advisory Account for reputational or other reasons, including where Buxton Helmsley is providing (or may provide) advice or services to an entity involved in such activity or transaction, where Buxton Helmsley or an Account is or may be engaged in the same or a related transaction to that being considered on behalf of the Advisory Account, where Buxton Helmsley or another Account has an interest in an entity involved in such activity or transaction, or where such activity or transaction or the exercise of such rights on behalf of or in respect of the Advisory Account could affect Buxton Helmsley, BH or their activities. In addition, BH operates a program reasonably designed to ensure compliance with all economic sanctions-related obligations applicable directly to its activities (although such obligations are not necessarily the same obligations that an Advisory Account itself may be subject to). BH may restrict its investment decisions and activities on behalf of particular Advisory Accounts and not other Accounts (including other Advisory Accounts).

In order to engage in certain transactions on behalf of Advisory Accounts, BH will be subject to (or cause Advisory Accounts to become subject to) the rules, terms and/or conditions of any venues through which it trades securities, derivatives or other instruments. This includes, but is not limited to, where BH and/or the Advisory Accounts may be required to comply with

the rules of certain exchanges, execution platforms, trading facilities, clearinghouses and other venues, or may be required to consent to the jurisdiction of any such venues. The rules, terms and/or conditions of any such venue may result in BH (and/or the Advisory Accounts) being subject to, among other things, margin requirements, additional fees and other charges, disciplinary procedures, reporting and recordkeeping, position limits and other restrictions on trading, settlement risks and other related conditions on trading set out by such venues.

From time to time, an Advisory Account, BH or its affiliates and/or their service providers or agents may be required, or may determine that it is advisable, to disclose certain information about an Advisory Account, including, but not limited to, investments held by the Advisory Account, and the names and percentage interest of beneficial owners thereof, to third parties, including local governmental authorities, regulatory organizations, taxing authorities, markets, exchanges, clearing facilities, custodians, brokers and trading counterparties of, or service providers to, BH or the Advisory Account. Unless agreed in the agreement governing the Advisory Account or otherwise directed by a client, BH will comply with such requests to disclose such information, including through electronic delivery platforms. If BH is not permitted to make certain required disclosures in respect of an Advisory Account, BH may determine to cause the sale of certain assets for the Advisory Account, and such sale may be at a time that is inopportune from a pricing standpoint.

Item 12 – Brokerage Practices

BROKER-DEALER SELECTION

BH places orders for the execution of transactions for Advisory Accounts according to its best execution policies and procedures. Subject to any specific instructions that BH accepts from clients, BH takes into account a range of factors in deciding how to execute client orders, including, but not limited to, price; costs; timing and speed of execution; responsiveness; creditworthiness and financial stability; likelihood of, and capabilities in, execution, clearance and settlement; size; liquidity in or with an execution venue; nature; in certain circumstances, a broker's or counterparty's willingness to commit capital; and other appropriate factors. Best price, giving effect to commissions and commission equivalents (if any) and other transaction costs, is normally an important factor in deciding how to execute transactions, but, in consideration of the relevant factors, transactions will not always be executed at the lowest

available price or commission or commission equivalents (if any). In determining the relative importance of factors considered, BH takes into account the nature of client orders, the characteristics of the financial instruments to which the order relates and the characteristics of the available brokers or counterparties which can be used or to which client orders can be directed.

The reasonableness of commissions or commission equivalents for non client-directed trade execution is evaluated by BH on an ongoing basis based on many factors, including the general level of compensation paid and, in certain cases, the nature and value of research and other services provided. BH may execute transactions through affiliates to the extent consistent with applicable law, with client instruction, and with its duty to seek best execution.

When placing orders with any broker or counterparty, including its affiliates, BH may, in accordance with applicable law, give permission for such broker to trade along with or ahead of Advisory Account orders (i.e., determine not to opt-in to the protections afforded under FINRA 5320). When acting as agent or counterparty, BH's affiliate will generally charge the client a commission, mark-up, mark-down, or other commission equivalent.

Third-party managers hired by BH on behalf of AIMS clients or Manager of Manager Funds or that manage the funds in which AIMS Program Funds invest will have discretionary authority to execute transactions on behalf of clients consistent with best execution obligations.

Counterparty Credit Requirements

An Advisory Account will be required to establish business relationships with its counterparties based on its own credit standing. Buxton Helmsley, including BH, will not have any obligation to allow its credit to be used in connection with an Advisory Account's establishment of its business relationships, nor is it expected that an Advisory Account's counterparties will rely on the credit of Buxton Helmsley in evaluating the Advisory Account's creditworthiness.

BROKERAGE *for* CLIENT REFERRALS

BH may select broker-dealers, including its affiliates, to provide prime brokerage services to Advisory Accounts. Conflicts may arise when BH selects prime brokers. Prime brokerage firms may introduce prospective clients to BH, which may create incentives for or benefits to BH to select these prime brokerage firms. BH

selects such firms only when consistent with obtaining appropriate services for Advisory Account clients.

DIRECTED BROKERAGE

Clients may direct brokerage as part of their participating in a commission recapture program, or because they believe it provides them with favorable execution, lower costs and/or other benefits. Clients may direct BH to place transactions for their accounts with a particular broker-dealer, including a BH affiliate. Clients may also direct BH to use a specific execution venue or exchange. Absent a client direction, BH generally has the discretionary authority to determine and direct execution of portfolio transactions within the client's specified investment objectives (including with respect to real estate assets, if applicable) without prior consultation with the client on a transaction-by-transaction basis. Some clients limit BH's discretionary authority in terms of the selection of broker-dealers or other terms of brokerage arrangements. From time to time, clients may also retain BH on a non-discretionary basis, explicitly requiring that portfolio transactions, including where transactions are executed, be discussed in advance and executed at the client's direction.

Where a client directs the use of a particular broker-dealer, BH may be unable to achieve most favorable execution of client transactions and the client may pay more in execution fees than if BH were permitted to choose the executing broker-dealer. In such cases, BH may not be able to determine the terms of how an order will be handled with such broker-dealer and may not be able to freely negotiate commission rates. In addition, BH may not be able to aggregate the client's orders with other client orders, including to reduce transaction costs. As a result, a client's direction that BH use a particular broker-dealer may cause a client to pay higher commissions or receive less favorable net prices than would be the case if BH were given discretion to choose the broker-dealer through which to execute the transaction for the client's account. In an effort to achieve orderly execution of transactions, execution of orders for clients that have directed BH to use particular broker-dealers may, in certain circumstances, be delayed until after BH completes the execution of non client-directed orders.

Orders for clients that have directed BH to send all trades to particular broker-dealers similarly may not be allocated with orders for other accounts. When a client has directed the use of a particular broker and has not waived best execution, then trades for the directed client and for non-directed orders must be executed in a manner that over time is reasonable and fair to all

clients. This could include the use of step out arrangements. For more information relating to BH's allocation policies and procedures, please see Item 6, Performance-Based Fees and Side-By-Side Management.

AGGREGATION of TRADES

BH seeks to execute orders for its clients fairly and equitably over time. BH follows policies and procedures pursuant to which it may combine or aggregate purchase or sale orders for the same security or other instrument for multiple Accounts (including Accounts in which Buxton Helmsley has an interest) (sometimes referred to as "bunching"), so that the orders can be executed at the same time and block trade treatment of any such orders can be elected when available. BH aggregates orders when BH considers doing so appropriate and in the interests of its clients generally and may elect block trade treatment, when available. In addition, under certain circumstances trades for Advisory Accounts may be aggregated with accounts that contain Buxton Helmsley assets. These circumstances may include, without limitation, in developing products that demonstrate client-experience track records; when managing accounts in a commercially reasonable manner for clients (which may be affiliates but are engaging BH to act as an independent commercial money manager); or when aggregating will have a de minimis effect on the performance of client accounts (e.g., where the size of the account relative to the size of the market makes aggregation not material). In addition, trade aggregation may effectively occur within an Advisory Account, such as a pooled investment vehicle, in which Buxton Helmsley and other Accounts have an interest. The particular procedures followed may differ depending on the particular strategy or type of investment.

When Advisory Account orders are aggregated, the orders will be placed with one or more broker-dealers or other counterparties for execution. When a bunched order or block trade is completely filled, BH generally will allocate the securities or other instruments purchased or the proceeds of any sale pro rata among the participating Accounts, based on the purchase or sale order. Adjustments or changes may be made under certain circumstances, such as to avoid odd lots or small allocations or to satisfy account cash flows and guidelines. If the order at a particular broker-dealer or other counterparty is filled at several different prices, through multiple trades, generally all participating accounts will receive the average price and pay the average commission, subject to odd lots, rounding, and market practice. There may be instances in which not all Advisory

Accounts are charged the same commission or commission equivalent rates in a bunched or aggregated order.

Although it may do so in certain circumstances, BH generally does not bunch or aggregate orders for different Advisory Accounts, elect block trade treatment or net buy and sell orders for the same Advisory Account, if portfolio management decisions relating to the orders are made by separate portfolio management person(s), if bunching, aggregating, electing block trade treatment or netting is not appropriate or practicable from BH's operational or other perspectives or if doing so would not be appropriate in light of applicable regulatory considerations. For example, time zone differences, trading instructions, cash flows, separate trading desks or portfolio management processes in a global organization may, among other factors, result in separate, non-aggregated, non-netted executions, with trades in the same instrument being entered for different Advisory Accounts at different times or, in the case of netting, buy and sell trades for the same instrument being entered for the same Advisory Account.

BH may be able to negotiate a better price and lower commission rate on aggregated trades than on trades for Advisory Accounts that are not aggregated, and incur lower transaction costs on netted trades than trades that are not netted. Where transactions for an Advisory Account are not aggregated with other orders, including Advisory Accounts and directed brokerage accounts, or not netted against orders for the Advisory Account or other Advisory Accounts, the Advisory Account may not benefit from a better price and lower commission rate or lower transaction cost. Aggregation and netting of trades may disproportionately benefit some Advisory Accounts relative to other Advisory Accounts due to the relative amount of market savings obtained by the Advisory Accounts.

BH may also sequence or rotate transactions using allocation policies to determine which type of account is to be traded in which order. Under this policy, each portfolio management group may determine the length of its trade rotation period and the sequencing schedule for different categories of clients within this period, provided that the trading periods and these sequencing schedules are designed to be fair and equitable over time. For example, some portfolio management groups may base their trading periods and rotation schedules on the relative amounts of assets managed for different client categories. Within a given trading period, the sequencing schedule establishes when and how frequently a given client category will trade first in the order of rotation. BH may deviate from the predetermined sequencing schedule under certain circumstances when justified,

including, for example, when other unusual circumstances arise. In addition, a portfolio management group may provide instructions simultaneously regarding the placement of a trade in lieu of the predetermined sequencing schedule if the trade represents a relatively small proportion of the average daily trading volume of the particular security or other instrument.

To the extent a given account trades behind other types of accounts within the rotation system, it is possible that the account may suffer adverse effects depending on market conditions.

Item 13 – Review of Accounts

GENERAL DESCRIPTION

Senior members of BH's portfolio management personnel periodically review Advisory Accounts. They conduct the review either individually or in a group, depending upon account needs and market conditions. These reviews include a review of the account's performance, investment objectives, security positions and other investment opportunities. In addition, the supervisors of personnel involved in decision-making for Advisory Accounts monitor the performance of the Advisory Accounts. Additional reviews may be undertaken at the discretion of BH.

Compliance with investment guidelines for Advisory Accounts is generally judged at time of purchase, however, from time to time there may exist certain circumstances when compliance with applicable investment guidelines will be tested as of the next occurring post-trade compliance check conducted in the local jurisdiction of the Advisory Account (e.g. transactions executed in multiple time zones).

FACTORS TRIGGERING A REVIEW

In addition to periodic reviews, BH may perform reviews of separately managed accounts as it deems appropriate or as otherwise required. Additional reviews may be undertaken for reasons including changes in market conditions, changes in security positions or changes in a client's investment objective or policies.

CLIENT REPORTS

BH provides advisory clients who have separately managed accounts with written reports on a quarterly basis or more frequently upon agreement between BH and the client. These reports generally include, among other things, a summary of all activity in the account, including all purchases and sales of securities and any debits and credits to the account, a summary of

holdings including a portfolio valuation, and the change in value of the account during the reporting period.

Investors in BH-managed private pooled investment vehicles generally receive written individualized capital information, annual reports and other periodic reports.

Item 14 – Client Referrals and Other Compensation

COMPENSATION *for* CLIENT REFERRALS

From time to time, BH may make cash payments for client referrals to persons other than employees of BH and its affiliates pursuant to applicable laws, including Rule 206(4)-3 under the Advisers Act, when applicable. In addition, from time to time, BH may also compensate employees of BH and its affiliates for client referrals pursuant to applicable laws.

Intermediaries and Other Third Parties

Buxton Helmsley or the Advisory Accounts may make payments to authorized dealers and other financial intermediaries and to salespersons (collectively, "Intermediaries") to promote the Advisory Accounts or other products. These payments may be made out of Buxton Helmsley's assets or amounts payable to Buxton Helmsley. These payments may create an incentive for an Intermediary to highlight, feature or recommend Advisory Accounts. Subject to applicable law and regulations, such payments may compensate Intermediaries for, among other things: marketing the Advisory Accounts and other products (which may consist of payments resulting in or relating to the inclusion of Advisory Accounts and other products on preferred or recommended fund lists or in certain sales programs sponsored by the Intermediaries); access to the Intermediaries' registered representatives or salespersons, including at conferences and other meetings; assistance in training and education of personnel of Buxton Helmsley; fees for directing investors to the Advisory Accounts and other products; "finders fees" or "referral fees" or other fees for providing assistance in promoting the Advisory Accounts and other products (which may include promotions in communications with the Intermediaries' customers, registered representatives and salespersons); various non-cash and cash incentive arrangements to promote certain products, as well as sponsor various educational programs, sales contests and/or promotions; travel expenses, meals, lodging and entertainment of Intermediaries and their salespersons and guests in connection with educational, sales and promotional programs; subaccounting, administrative and/or shareholder processing or other investor services that are

in addition to the fees paid for these services by the Advisory Accounts or products; and other services intended to assist in the distribution and marketing of the Advisory Accounts and other products.

These payments may differ by Intermediary and are negotiated based on a range of factors, including but not limited to, ability to attract and retain assets, target markets, customer relationships, quality of service and industry reputation.

Buxton Helmsley and its personnel, including employees of BH, may have relationships with, and purchase, or distribute or sell, services or products from or to, distributors, consultants, and others who recommend Advisory Accounts, or who engage in transactions with or for Advisory Accounts. Consultants and such other parties may receive compensation from Buxton Helmsley or Advisory Accounts in connection with such relationships. In accordance with internal policies and procedures, Buxton Helmsley may also pay a fee for membership in industry-wide or state and municipal organizations or otherwise may help sponsor conferences and educational forums for investment industry participants including, but not limited to, trustees, fiduciaries, consultants, administrators, state and municipal personnel and other clients. Buxton Helmsley's membership in such organizations allows Buxton Helmsley to participate in these conferences and educational forums and helps Buxton Helmsley interact with conference participants and to develop an understanding of the points of view and challenges of the conference participants. BH may pay fees to third parties (e.g., service providers to potential clients, such as record-keepers or administrators) in exchange for the right to include information regarding Advisory Accounts and other products on portals or databases to which such potential clients will have access for purposes of considering potential investment alternatives. Personnel, including employees of BH, may have board, advisory, brokerage or other relationships with issuers, distributors, consultants and others that may have (or have interests in) Advisory Accounts or that may recommend Advisory Accounts or portfolio transactions for Advisory Accounts. As a result of these relationships and arrangements, consultants, distributors and other parties may have conflicts associated with their promotion of Advisory Accounts or other dealings with Advisory Accounts that create incentives for them to promote Advisory Accounts or portfolio transactions. Buxton Helmsley, including BH, and its personnel may make charitable contributions to including those that have relationships with clients or personnel of clients, and personnel may have board relationships with charitable institutions. In accordance with

internal policies and procedures, personnel may also make political contributions to clients. The individuals and entities with which Buxton Helmsley and its personnel have these relationships may have (or have an interest in) or recommend Advisory Accounts.

Item 15 – Custody

BH does not hold client assets. Client funds and securities are held by a qualified custodian appointed by clients pursuant to a separate custody agreement, or are held by the clients themselves. However, under the Advisers Act, BH may be "deemed" to have custody of client assets under certain circumstances, including where clients maintain assets at a bank, broker-dealer, futures commission merchant or other qualified custodian affiliated with BH, where BH debits its fees directly from the Advisory Account, or where BH purchases privately offered securities on behalf of the Advisory Account.

Clients will receive account statements directly from their custodian and should carefully review those statements. In addition, clients are urged to compare the account statements that they receive from their qualified custodian with any that they receive from BH.

Item 16 – Investment Discretion

BH accepts discretionary authority to manage securities accounts on behalf of clients. Clients are required to sign an investment advisory agreement that authorizes the applicable BH entity to supervise and direct the investment and reinvestment of assets in the Advisory Account, with discretion on the client's behalf and at the client's risk. BH's discretionary authority is limited by the terms of its investment advisory agreements and the investment guidelines agreed between BH and each client. The investment guidelines or other account documents generally include any limitations a client may place on BH's discretionary authority, including any reasonable restrictions on the securities and other financial instruments in which BH is authorized to invest.

With respect to bankruptcies involving issuers of securities held in separate accounts, BH as investment manager may in its discretion participate in bankruptcy proceedings, make investment-related elections and join creditors committees on behalf of some or all of its clients. Although BH may participate in such proceedings and join such committees on its separate

account clients' behalf in its discretion, it is not obligated to do so.

For additional information about risks related to BH's discretionary authority, please see Item 6, Performance-Based Fees and Side-By-Side Management.

Item 17 – Voting Client Securities

PROXY VOTING POLICIES – AUTHORITY to VOTE

For Advisory Accounts for which BH has voting discretion, BH has adopted policies and procedures (the "Proxy Voting Policy") for the voting of proxies. Under the Proxy Voting Policy, BH's guiding principles in performing proxy voting are to make decisions that favor proposals that in BH's view maximize a company's shareholder value and are not influenced by conflicts of interest. To implement these guiding principles for investments in publicly-traded equities, BH has developed customized proxy voting guidelines (the "Guidelines") that it generally applies when voting on behalf of Advisory Accounts. The Guidelines address a wide variety of individual topics, including, among other matters, shareholder voting rights, anti-takeover defenses, board structures, the election of directors, executive and director compensation, reorganizations, mergers, issues of corporate social responsibility and various shareholder proposals. The Proxy Voting Policy, including the Guidelines, is reviewed periodically to ensure it continues to be consistent with our guiding principles.

BH has retained a third-party proxy voting service, (the "Proxy Service"), to assist in the implementation of certain proxy voting-related functions, including, without limitation, operational, recordkeeping and reporting services. The Proxy Service also prepares a written analysis and recommendation (a "Recommendation") for each proxy vote that reflects the Proxy Service's application of the Guidelines to particular proxy issues. While it is BH's policy generally to follow the Guidelines and Recommendations from the Proxy Service, BH's portfolio management person(s) may on certain proxy votes seek approval to diverge from the Guidelines or a Recommendation by following a process which seeks to ensure that override decisions are not influenced by any conflict of interest. As a result of the override process, different portfolio management groups may vote differently for particular votes for the same company.

From time to time, BH's ability to vote proxies may be affected by regulatory requirements and compliance, legal or logistical considerations. As a result, BH, from time to time, may determine that it is not practicable or desirable to vote proxies.

BH has implemented processes designed to prevent conflicts of interest from influencing proxy voting decisions that BH makes on behalf of advisory clients, including the Advisory Accounts, and to help ensure that such decisions are made in accordance with BH's fiduciary obligations to its clients. These processes include information barriers as well as the use of BH's Guidelines, Recommendations from the Proxy Service, and the override approval process previously discussed. Notwithstanding such proxy voting processes, proxy voting decisions made by BH in respect of securities held by a particular Advisory Account may benefit the interests of Buxton Helmsley and/or Accounts other than the Advisory Account, provided that BH believes such voting decisions to be in accordance with its fiduciary obligations.

Client Directed Votes. BH clients who have delegated voting responsibility to BH with respect to their Advisory Account may from time to time contact their client representative if they would like to direct BH to vote in a particular solicitation. BH will use its commercially reasonable efforts to vote according to the client's request in these circumstances, and cannot provide assurances that such voting requests will be implemented.

Clients can obtain information regarding how securities were voted for a particular Advisory Account by calling their Buxton Helmsley representative. BH's Proxy Voting Policy is available upon request.

Class Actions and Similar Matters. With respect to shareholder class action litigation and similar matters, BH's separate account clients are encouraged to contact their custodians and ensure that they receive notices and are aware of the participation and filing requirements related to class action and similar proceedings. BH generally will not make any filings in connection with any shareholder class action lawsuits and similar matters involving securities held or that were held in separate accounts for clients, and will not be required to notify custodians or clients of shareholder class action lawsuits and similar matters. BH will not be responsible for any failure to make such filings or, if it determines to make such filings in its sole discretion, to make such filings in a timely manner.

PROXY VOTING POLICIES – NO AUTHORITY

BH is not delegated proxy voting authority on behalf of all of its Advisory Accounts. With respect to those Advisory Accounts

for which BH does not conduct proxy voting, clients should work with their custodians to ensure they receive their proxies and other solicitations for securities held in their Advisory Account. Clients may contact their BH client service representative if they have a question on particular proxy voting matters or solicitations.

Item 18 – Financial Information

BH does not collect payments in advance of services being rendered. As such, BH does not charge more than \$500 in fees per client, six months or more in advance. BH has not been the subject of a bankruptcy petition since inception.

Item 19 – Requirements for State-Registered Advisers

The Buxton Helmsley Group has the following executive officers and management persons:

- Alexander Parker – Mr. Parker currently serves as Chairman of the Board and Chief Executive Officer of The Buxton Helmsley Group. Parker's formal education after primary school includes undergraduate studies at Mercy College in New York, N.Y., with a focus on Finance. Parker began his term at The Buxton Helmsley Group in 2015.

The Buxton Helmsley Group does not currently engage in any other business than investment advice.

The Buxton Helmsley Group may be compensated for advisory services with performance-based fees. These fees will be calculated according to the client contract in force. Required disclosure: Performance-based compensation may create an incentive for the adviser to recommend an investment that may carry a higher degree of risk to the client.

No items to report for "an award or otherwise being found liable in an arbitration claim alleging damages in excess of \$2,500."

No items to report for "an award or otherwise being found liable in a civil, self-regulatory organization, or administrative proceeding."

No disclosures are required in regards to management persons or relationships/arrangements with any issuers of securities.

Item 20 – Miscellaneous

ACCOUNT ERRORS *and* ERROR RESOLUTION

BH has policies and procedures to help it assess and determine, consistent with applicable standards of care and client documentation, when reimbursement is due by it to a client because BH has committed an error. Pursuant to BH's policies, an error is generally compensable from BH to a client when it is a mistake (whether an action or inaction) in which BH has, in BH's reasonable view, deviated from the applicable standard of care in managing the client's assets, subject to materiality and other considerations set forth below.

Consistent with the applicable standard of care, BH's policies and its investment management agreements generally do not require perfect implementation of investment management decisions, trading, processing or other functions performed by BH or its affiliates. Therefore, not all mistakes will be considered compensable to the client. Imperfections, including without limitation, imperfection in the implementation of investment decisions, quantitative strategies, financial modeling, trade execution, cash movements, portfolio rebalancing, processing instructions or facilitation of securities settlement; imperfection in processing corporate actions; or imperfection in the generation of cash or holdings reports resulting in trade decisions, are generally not considered by BH to be violations of standards of care regardless of whether implemented through programs, models, tools or otherwise. As a result, imperfections, including, without limitation, incidents involving a mistaken amount, timing or direction of a trade, may not be compensable errors.

For example, BH investment professionals are typically expected to exercise discretion to generally effect the portfolio management group's investment intent in the best interests of the client including, without limitation, with respect to the execution of trade requests or the implementation of quantitative strategies. Regardless of whether the portfolio management group specifies a fixed quantity of a particular security to be purchased or sold, or provides a date by which a trade is to be completed, instances in which an investment professional executes a trade that results in a portfolio position that is different from the exposure intended by the portfolio management group (whether specified on a trade ticket or not) will generally not be considered compensable errors unless the trade results in a portfolio position that violates investment guidelines of the client or is substantially inconsistent with the portfolio management group's investment intent. Similarly, imperfections in the implementation of investment

strategies, including quantitative strategies (e.g. coding errors), that do not result in material departures from the intent of the portfolio management group will generally not be considered compensable errors. In addition, in managing accounts, BH may establish non-public, formal or informal internal targets, guidelines or other parameters that may be used to manage risk, manage sub-advisers or otherwise guide decision-making, and a failure to adhere to such internal parameters will not be considered an error. A failure on BH's part to recognize a client cash flow will generally not be considered a compensable error unless BH fails to recognize the cash flow within a reasonable period of time from the delivery date specified in the client's notification to BH. The purchase of a security for which the client is ineligible under the issuer's prospectus, offering documents or other issuer-related rules or documentation generally will not be considered a compensable error to the extent that the purchase does not also violate a client guideline, regardless of whether BH maintains or exits the position after becoming aware of the ineligibility. Mistakes may also occur in connection with other activities that may be undertaken by BH and its affiliates, such as net asset value calculation, transfer agent activities (i.e., processing subscriptions and redemptions), fund accounting, trade recording and settlement and other matters that are non-advisory in nature and may not be compensable unless they deviate from the applicable standards of care. Incidents resulting from the mistakes of third parties are generally not compensable from BH to a client.

Incidents may result in gains as well as losses. In certain circumstances, BH may determine that the gains or losses associated with these incidents will be treated as being for a client's account (i.e., clients will bear the loss or benefit from the gain). In other circumstances, however, BH may determine that it is appropriate to reallocate or remove gains from the client's account that are the result of an incident.

BH makes its determinations pursuant to its error policies on a case-by-case basis, in its discretion, based on factors it considers reasonable. Relevant facts and circumstances BH may consider include, among others, the nature of the service being provided at the time of the incident, whether intervening causes, including the action or inaction of third parties, caused or contributed to the incident, specific applicable contractual and legal restrictions and standards of care, whether a client's investment objective was contravened, the nature of a client's investment program, whether a contractual guideline was violated, the nature and materiality of the relevant circumstances, and the materiality of the resulting losses. The determination by BH to treat (or not to

treat) an incident as compensable, and any calculation of compensation in respect thereof for any one fund or account sponsored, managed or advised by BH may differ from the determination and calculation made by BH in respect of one or more other funds or accounts.

When BH determines that reimbursement by BH is appropriate, the client will be compensated as determined in good faith by BH. BH will determine the amount to be reimbursed, if any, based on what it considers reasonable guidelines regarding these matters in light of all of the facts and circumstances related to the incident. In general, compensation is expected to be limited to direct and actual losses, which may be calculated relative to comparable conforming investments, market factors and benchmarks and with reference to other factors BH considers relevant. Compensation generally will not include any amounts or measures that BH determines are speculative or uncertain, including potential opportunity losses resulting from delayed investment or sale as a result of correcting an error or other forms of consequential or indirect losses. In calculating any reimbursement amount, BH generally will not consider tax implications for, or the tax status of, any affected client. BH expects that, subject to its discretion, losses will be netted with an account's gains arising from incidents and will not exceed amounts in relation to an appropriate replacement investment, benchmark or other relevant product returns. Losses may also be capped at the value of the actual loss, particularly when the outcome of a differing investment would in BH's view be speculative or uncertain or in light of reasonable equitable considerations. As a result, compensation is expected to be limited to the lesser of actual losses or losses in relation to comparable investments, benchmarks or other relevant factors. Furthermore, BH expects to follow a materiality policy with respect to client accounts. Therefore, in certain circumstances, mistakes that result in losses below a threshold will not be compensable.

BH may also consider whether it is possible to adequately address a mistake through cancellation, correction, reallocation of losses and gains or other means.

In general, it is BH's policy to notify clients of incidents corrected post settlement that violate a client guideline and certain errors that result in a loss to the client. Generally, BH will not notify clients of non-compensable incidents. In addition, separate account clients will not be notified of incidents that result in losses of less than \$1,000. Investors in a pooled investment vehicle will generally not be notified of the occurrence of an incident or the resolution thereof. More information about

resolution of and compensation for incidents is available upon request and may be set forth in the prospectuses or other relevant offering documents of BH-managed pooled investment vehicles. BH may at any time, in its sole discretion and without notice to investors, amend or supplement its policies with respect to account errors and error resolution.

Glossary

As used in this Brochure, these terms have the following meanings.

"1933 Act" means the U.S. Securities Act of 1933, as amended.

"Accounts" means Buxton Helmsley's own accounts, accounts in which personnel of Buxton Helmsley have an interest, accounts of Buxton Helmsley's clients and pooled investment vehicles that Buxton Helmsley sponsors, manages and advises. For the avoidance of doubt, the term "Accounts" includes Advisory Accounts.

"Advisers Act" means the Investment Advisers Act of 1940, as amended.

"Advisory Accounts" means separately managed accounts and pooled investment vehicles such as mutual funds, collective trusts and alternative investment funds that are sponsored, managed or advised by BH.

"Affiliated Products" means investment products, including separately managed accounts and pooled vehicles, managed, sponsored or advised by BH or Buxton Helmsley.

"AIMS" means Alternative Investments and Manager Selection.

"AIMS Program Funds" means investment vehicles managed by AIMS that invest substantially all of their assets in third-party managed funds.

"BHCA" means the Bank Holding Company Act of 1956, as amended.

"Brochure" means BH's Form ADV, Part 2A.

"CFTC" means the Commodity Futures Trading Commission.

"CBOs" means collateralized bond obligations.

"CLOs" means collateralized loan obligations.

"CoCos" means contingent capital securities.

"Code" means the BH Code of Ethics.

"CPO" means commodity pool operator.

"CTA" means commodity trading advisor.

"Dodd-Frank Act" means the U.S. Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, as amended.

"ETF" means exchange-traded fund.

"ETN" means exchange-traded notes, which are senior, unsecured, unsubordinated debt securities issued by a sponsoring financial institution.

"External Products" means investment products, including separately managed accounts and pooled vehicles, managed, sponsored or advised by third-party investment managers.

"Fannie Mae" means the Federal National Mortgage Association.

"FCA" means the United Kingdom Financial Conduct Authority.

"Federal Reserve" means the Board of Governors of the Federal Reserve System.

"FHFA" means the Federal Housing Finance Administration.

"Freddie Mac" means the Federal Home Loan Mortgage Corporation.

"Buxton Helmsley" means The Buxton Helmsley Group, Inc., BH and its respective affiliates, directors, partners, trustees, managers, members, officers and employees.

"IIS" means International Investment Solutions.

"BH Fund of Funds" means an Affiliated Product that pursues its investment objectives by allocating assets, directly or indirectly, to External Products.

"BH" means the Buxton Helmsley Asset Management business of Buxton Helmsley, which today is comprised of BH.

"BH ETFs" means the exchange-traded funds for which BH or its affiliates act as investment adviser.

"BH Personnel" means the personnel of the various entities comprising BH.

"Guidelines" means customized proxy voting guidelines that BH has developed.

"Index" means stock market and other indexes developed, owned and operated by BH and its affiliates.

"Intermediaries" means, collectively, authorized dealers and other financial intermediaries and salespersons.

"IPO/New Issue" means an initial public offering or new issue.

"IPS" means Inflation Protected Securities.

“Manager of Manager Funds” means pooled investment vehicles managed by BH and/or its affiliates and sub-advised by unaffiliated, third-party managers selected by AIMS.

“MLPs” means master limited partnerships.

“Model Portfolio Accounts” means accounts managed by Model Portfolio Advisers, including PWM, based on model portfolios provided by BH.

“Model Portfolio Advisers” means affiliated and unaffiliated investment advisers to which BH provides model portfolios.

“OTC” means over-the-counter markets.

“Participating Affiliates” means BH’s foreign affiliated advisers that may provide advice or research to BH for use with BH’s U.S. clients.

“PIPEs” means private investments in public equities.

“Proprietary Strategies” means proprietary investment and trading strategies developed by BH or its affiliates.

“Proxy Service” means a third-party proxy voting service, currently Institutional Shareholder Services, a unit of RiskMetrics Group.

“Proxy Voting Policy” means BH’s policies and procedures for the voting of proxies on behalf of Advisory Accounts for which BH has voting discretion.

“PWM” means the Private Wealth Management unit of Buxton Helmsley.

“QIS” means Quantitative Investment Strategies.

“Recommendation” means a written analysis and recommendation of a proxy vote that reflects the Proxy Service’s application of the Guidelines to the particular proxy issues.

“REIT” means real estate investment trust.

“SEC” means the Securities and Exchange Commission.

“Sponsors” means broker-dealers, including affiliates of BH that sponsor Wrap Programs.

“Tactical Tilts” means tactical investment ideas generally derived from short-term market views.

“TIPS” means Treasury Inflation-Protected Securities.

“Volcker Rule” means the Volcker rule contained within the Dodd-Frank Act, as amended.

Appendix A – Fee Schedules

BH STANDARD FEE SCHEDULE –MANAGED ACCOUNTS

The advisory fees associated with Buxton Helmsley’s investment/asset management/advisory services are as outlined below. The advisory fee schedule to right represents the highest fee that clients pay, absent special circumstances. Please note that certain clients may be subject to minimum annual fees.

AUM (Assets Under Management)	
\$0-10 million	2.400%
\$10-25 million	1.850%
\$25-50 million	1.750%
\$50-100 million	1.650%
\$100-250 million	1.600%
\$250-500 million	1.550%
More than \$500 million	1.500%

Appendix B – Information on Significant Strategy Risks

The following provides information on risks associated with certain types of securities and investment techniques that may be used by Advisory Accounts as discussed in Item 8, Methods of Analysis, Investment Strategies and Risk of Loss. It also discusses general risks associated with investing through an Advisory Account. Although risks have been grouped into categories based on type of security or technique, it is possible risks within a particular category will apply to securities and techniques in other categories. Additional information is available upon request. Investors in BH's pooled investment vehicles should review the prospectuses, offering memoranda and constituent documents for additional information relating to the risk associated with investments in those pooled investment vehicles.

GENERAL PORTFOLIO RISKS

- **Concentration Risk**—The risk that if an Advisory Account concentrates its investments in issuers within the same country, state, geographic region, industry or economic sector, an adverse economic, business, political or other development may affect the value of the Advisory Account's investments more than if its investments were not so concentrated. Also, concentration of the investments of an Advisory Account in issuers located in a particular country or region will subject an Advisory Account, to a greater extent than if investments were less concentrated, to the risks of adverse securities markets, exchange rates and social, political, regulatory or economic events which may occur in that country or region. Finally, to the extent an Advisory Account invests all or a large percentage of its assets in a single issuer or a relatively small number of issuers, or concentrates its assets directly or indirectly in investments in the same asset class or in one particular asset or security, it may be subject to greater risks than a more diversified account. That is, a change in the value of any single investment held by the Advisory Account may affect the overall value of the account more than it would affect an account that holds more investments. In particular, the Advisory Account may be more susceptible to adverse developments affecting any single issuer in the Advisory Account and may be susceptible to greater losses because of these developments.
- **Conversion of Equity Investments**—After its purchase, a non-equity investment directly or indirectly held by an Advisory Account (such as a convertible debt obligation) may convert to an equity security. Alternatively, an Advisory Account may directly or indirectly acquire equity securities in connection with a restructuring event related to one or more of its non-equity investments. The Advisory Account or an investment fund in which the

Advisory Account invests may be unable to liquidate the equity investment at an advantageous time from a pricing standpoint. Furthermore, an underlying investment fund may continue to hold an investment if its manager believes it is in the best interest of the fund. Continued holding of such investments may adversely affect the Advisory Account's portfolio.

- **Counterparty Risk**—An Advisory Account may be exposed to the credit risk of counterparties with which, or the brokers, dealers, custodians and exchanges through which, it deals in connection with the investment of its assets, whether engaged in exchange-traded or off-exchange transactions. For example, although certain standardized swap transactions are subject to mandatory central clearing, which is expected to decrease counterparty risk and increase liquidity compared to bilaterally negotiated swaps, central clearing does not eliminate counterparty risk or illiquidity risk entirely. In addition, many of the protections afforded to cleared transactions, such as the security afforded by transacting through a clearing house, might not be available in connection with OTC transactions. Therefore, in those instances in which an Advisory Account enters into OTC transactions, the Advisory Account will be subject to the risk that its direct counterparty will not perform its obligations under the transactions and that the Advisory Account will sustain losses. Furthermore, an Advisory Account may, from time to time, enter into arrangements with certain brokers or other counterparties that require the segregation of collateral. For operational, cost or other reasons, when setting up arrangements relating to the execution/clearing of trades, an Advisory Account may choose to select a segregation model which may not be the most protective option available in the case of a default by a broker or counterparty.
- **Currency Risk**—An Advisory Account may hold investments denominated in currencies other than the currency in which the Advisory Account is denominated. Currency exchange rates can be extremely volatile, particularly during times of political or economic unrest or as a result of actions taken by central banks, which may be intended to directly affect prevailing exchange rates, and a variance in the degree of volatility of the market or in the direction of the market from BH's expectations may produce significant losses to an Advisory Account. BH may or may not attempt to hedge all or any portion of the currency exposure of an Advisory Account. However, even if BH does attempt to hedge the currency exposure of an Advisory Account, it is not possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in any particular currency because the value of those securities is likely to fluctuate as

a result of independent factors not related to currency fluctuations. To the extent unhedged, the value of an Advisory Account's assets will fluctuate with currency exchange rates as well as the price changes of its investments in the various local markets and currencies. Thus, an increase in the value of the currency in which an Advisory Account is denominated, compared to the other currencies in which an Advisory Account makes its investments, will reduce the effect of increases and magnify the effect of decreases in the prices of the Advisory Account securities in their local markets. Conversely, a decrease in the value of the currency in which an Advisory Account is denominated relative to other currencies will have the opposite effect on the Advisory Account's securities denominated in these other currencies.

- **Frequent Trading and Portfolio Turnover Rate Risk**—The turnover rate within the Advisory Account may be significant. Frequent trades typically result in higher transactions costs, including potentially substantial brokerage commissions, fees and other transaction costs. In addition, frequent trading is likely to result in short-term capital gains tax treatment. As a result, high turnover and frequent trading in an Advisory Account could have an adverse effect on the performance of the Advisory Account.
- **Geographic Risk**—Concentration of the investments of an Advisory Account in issuers located in a particular country or geographic region will subject an Advisory Account, to a greater extent than if investments were less concentrated, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that country or region, such as: adverse securities markets; adverse exchange rates; social, political, regulatory, economic, or environmental developments; or natural disasters.
- **Index/Tracking Error Risk**—To the extent it is intended that an Advisory Account track an index, the Advisory Account may not match, and may vary substantially from, that of the index for any period of time. BH does not guarantee that any tracking error targets will be achieved.
- **Investing in Europe**—While an Advisory Account may invest only in U.S. dollar-denominated obligations, the prices of certain of the Advisory Account's holdings may nevertheless be sensitive to changes in value of the euro and the underlying events that affect its value. The euro requires participation of multiple sovereign states forming

the Euro zone and is therefore sensitive to the credit, general economic and political position of each such state, including each state's actual and intended ongoing engagement with and/or support for the other sovereign states then forming the European Union, in particular those within the Euro zone. Changes in these factors might materially adversely impact the value of securities that an Advisory Account has invested in.

- **Indirect Investment in Foreign Securities**—Some countries, especially emerging markets countries, do not permit foreigners to participate directly in their securities markets or otherwise present difficulties for efficient foreign investment. An Advisory Account may use participation notes to establish a position in such markets as a substitute for direct investment. Participation notes are issued by banks or broker-dealers and are designed to track the return of a particular underlying equity or debt security, currency or market. When the participation note matures, the issuer of the participation note will pay to, or receive from, an Advisory Account the difference between the nominal value of the underlying instrument at the time of purchase and that instrument's value at maturity. Investments in participation notes involve the same risks as are associated with a direct investment in the underlying security, currency or market that they seek to replicate as well as counterparty risk when traded over-the-counter. Foreign securities may also trade in the form of depositary receipts. Depositary receipts may not reflect the return an Advisory Account would realize if the Advisory Account actually owned the relevant securities underlying the depositary receipts. To the extent an Advisory Account acquires depositary receipts through banks which do not have a contractual relationship with the foreign issuer of the security underlying the depositary receipts to issue and service such unsponsored depositary receipts, there may be an increased possibility that the Advisory Account would not become aware of and be able to respond to corporate actions such as stock splits or rights offerings involving the foreign issuer in a timely manner.
- **Investment Style Risk**—Different investment styles tend to shift in and out of favor depending upon market and economic conditions as well as investor sentiment. Advisory Accounts may outperform or underperform other accounts that invest in similar asset classes but employ different investment styles. BH may modify or adjust its investment strategies from time to time.

- Limited Assets—An Advisory Account may at any time and from time to time have limited assets, which may limit BH's ability to trade in certain instruments that typically require minimum account balances for investment. Advisory Accounts may be limited with respect to the investment strategies they are able to employ and may be unable to diversify their portfolios across investment strategies or instruments.
- Liquidity Risk—The risk that an Advisory Account may make investments that may be illiquid or that are not publicly traded and/or for which no market is currently available or that may become less liquid in response to market developments or adverse investor perceptions. Lack of liquidity could prevent an Advisory Account from liquidating unfavorable positions promptly and could subject the Advisory Account to substantial losses. Investments that are illiquid or that trade in lower volumes may be more difficult to value. Liquidity risk may be the result of, among other things, the reduced number and capacity of traditional market participants to make a market, including in fixed income securities, or the lack of an active market. Additionally, market participants may attempt to sell fixed income holdings at the same time as the Advisory Account, which could cause downward pricing pressure and contribute to illiquidity.
- Management Risk—The risk that a strategy used by BH may fail to produce the intended results for an Advisory Account, including the risk that the entire amount invested may be lost. There is no guarantee that the investment objective of the Advisory Account will actually be achieved and investment results of the Advisory Account may vary substantially over time.
- Market Risk—The market value of the instruments in which an Advisory Account invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. In addition, governmental and quasi-governmental organizations have taken a number of unprecedented actions designed to support the markets. Such conditions, events and actions may result in greater market risk.
- Model Risk—The management of Advisory Accounts by BH may include the use of various proprietary quantitative or investment models. There may be deficiencies in the design or operation of these models, including as a result of shortcomings or failures of processes, people or systems. Investments selected using models may perform differently than expected as a result of the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical issues in the construction and implementation of the models (including, for example, data problems and/or software issues). Moreover, the effectiveness of a model may diminish over time, including as a result of changes in the market and/or changes in the behavior of other market participants. A model's return mapping is based on historical data regarding particular asset classes. Certain strategies can be dynamic and unpredictable, and a model used to estimate asset allocation may not yield an accurate estimate of the then current allocation. Operation of a model may result in negative performance, including returns that deviate materially from historical performance, both actual and pro-forma. Additionally, commonality of holdings across quantitative money managers may amplify losses. There is no guarantee that the use of these models will result in effective investment decisions for Advisory Accounts.
- Non-Hedging Currency Risk—An Advisory Account may purchase or sell currencies through the use of forward contracts or other instruments based on BH's judgment regarding the direction of the market for a particular currency or currencies for speculative purposes. Currency exchange rates can be extremely volatile, and a variance in the degree of volatility of the market or in the direction of the market from BH's expectations may produce significant losses to an Advisory Account.
- Non-U.S. Securities Risk—Non-U.S. securities may be subject to risk of loss because of more or less non-U.S. government regulation, less public information, less liquidity, greater volatility and less economic, political and social stability in the countries of domicile of the issuers of the securities and/or the jurisdictions in which these securities are traded. Loss may also result from, among other things, deteriorating economic and business conditions in other countries, including the United States, regional and global conflicts, the imposition of exchange controls, foreign taxes, sanctions, confiscations, expropriation and other government restrictions by the United States or other governments, higher transaction costs, difficulty enforcing contractual obligations or from problems in share registration, settlement or custody. In addition, an Advisory Account will be subject to the risk

that an issuer of non-U.S. sovereign debt held by an Advisory Account or the governmental authorities that control the repayment of such debt may be unable or unwilling to repay the principal or interest when due, including as a result of levels of non-U.S. debt or currency exchange rates. Furthermore, an Advisory Account's purchase and sale of certain non-U.S. securities may be subject to limitations or compliance with procedures imposed by foreign governments. For example, an Advisory Account may be subject to limitations on aggregate holdings by foreign investors. Moreover, as a result of having to comply with such procedures, an Advisory Account's ability to effect trades may be delayed, and an Advisory Account's failure to comply with such procedures may result in failed trades, loss of voting or transfer rights or the forced sale of settled positions. These risks might be heightened if the Advisory Account invests in emerging markets or growth markets. See "Emerging Markets and Growth Markets Risk" in Item 8, Methods of Analysis, Investment Strategies and Risk of Loss.

- Pre-IPO Investments Risk—An Advisory Account may invest in privately held companies, including companies that may issue shares in IPOs. Investments in pre-IPO shares involve greater risks than investments in shares of companies that have traded publicly on an exchange for extended periods of time. Investments in such companies are less liquid and difficult to value, and there is significantly less information available about their business models, quality of management, earnings growth potential, and other criteria used to evaluate their investment prospects. Although there is a potential the pre-IPO shares that an Advisory Account buys may increase in value if the company does issue shares in an IPO, IPOs are risky and volatile and may cause the value of such Advisory Account's investments to decrease significantly. Moreover, because pre-IPO shares are generally not freely or publicly tradeable, an Advisory Account may not have access to purchase or the ability to sell such shares in the amounts or at the prices the Advisory Account desires. The companies that an Advisory Account anticipates holding successful IPOs may not ever issue shares in an IPO and a liquid market for the shares may never develop, which may negatively affect the price of, and the Advisory Account's ability to, sell the shares, which in turn could adversely affect the Advisory Account's liquidity.

- Private Investment Risk—Advisory Accounts may invest in private investments, which may include debt or equity investments in operating and holding companies, investment funds, joint ventures, royalty streams, commodities, physical assets and other similar types of investments that are highly illiquid and long-term. Clients should not invest unless they are prepared to retain their interests in the Advisory Account until the Advisory Account liquidates its private investments. Private investments are highly competitive and an Advisory Account may face greater challenges in making such investments than when investing in traditional asset classes. In addition, the Advisory Account's ability to transfer and/or dispose of private investments is expected to be highly restricted. To the extent an Advisory Account has invested in private investments indirectly through a pooled investment vehicle which is in the process of winding down, the pooled investment vehicle may hold a limited number of illiquid investments that may not be realized for a significant amount of time and the Advisory Account will continue to bear its portion of the pooled investment vehicle's operating costs during such time. The pooled investment vehicle may be unable to dispose of such investments other than through sale in a secondary market, which could be at a disadvantageous price.
- Real Estate Industry Risk—The real estate industry is particularly sensitive to economic downturns; specific market conditions may result in occasional or permanent reductions in property values. The values of securities of companies in the real estate industry may go through cycles of relative under-performance and out-performance in comparison to equity securities markets in general. Additionally, there are risks related to general and local economic conditions which may include: possible increased cost of or lack of availability of mortgage financing or insurance, variations in rental income, neighborhood values or the appeal of property to tenants; interest rates; overbuilding; extended vacancies of properties; increases in competition, property and other taxes, assessed values and operating expenses; fluctuations in energy prices; and changes in zoning laws. Real estate industry companies are dependent upon management skill, may not be diversified, and are subject to heavy cash flow dependency, default by borrowers and self-liquidation. Advisory Accounts may be subject to personal injury or property damage or similar claims by

private parties in respect of investments, and changes in laws or in the condition of an asset may create liabilities that did not exist at the time of acquisition of an investment and that could not have been foreseen. In addition, investments that may require development are subject to additional risks, including availability and timely receipt of zoning and other regulatory approvals and cost and timely completion of construction (which may be affected by weather, labor conditions or material shortages).

- **Restricted Investments Risks**—Restricted securities are securities that may not be sold to the public without an effective registration statement under the 1933 Act, or, if they are unregistered, may be sold only in a privately negotiated transaction or pursuant to an exemption from registration. These restrictions could prevent an Advisory Account from promptly liquidating unfavorable positions and subject such Advisory Account to substantial losses. Further, when registration is required to sell a security, an Advisory Account may be obligated to pay all or part of the registration expenses, and a considerable period may elapse between the decision to sell and the time the Advisory Account may be permitted to sell the security under an effective registration statement. If adverse market conditions developed during this period, an Advisory Account might obtain a less favorable price than the prevailing price when it decided to sell.
- **Risk Management Risk**—BH may seek to reduce, increase or otherwise manage the volatility of an Advisory Account's overall portfolio or the Advisory Account's risk allocation to particular investments or sectors through various strategies, including by changing the amount of leverage utilized in connection with certain investments or sectors and/or by liquidating interests in certain investments and investing any proceeds in different investments or similar investments with a different volatility profile. There can be no assurance that BH's use of such strategies will be adequate, or that they will be adequately utilized by BH. Additionally, any strategies may be limited by, among other things, liquidity of the Advisory Account's investments and the availability of investment opportunities that BH believes are appropriate.
- **Tax-Managed Investment Risk**—To the extent an Advisory Account is tax-managed, because BH balances investment considerations and tax considerations, the pre-tax performance of a tax-managed Advisory Account may

be lower than the performance of similar Advisory Accounts that are not tax-managed. Even though tax-managed strategies are being used, they may not reduce the amount of taxable income and capital gains to which an Advisory Account may become subject.

- **Timing of Implementation Risk**—BH gives no warranty as to the timing of the investment of Advisory Account assets generally and/or any changes to the Advisory Account over time and from time to time (including in respect of asset allocation and investments), the performance or profitability of the Advisory Account or any part thereof, nor any guarantee that any investment objectives, expectations or targets with respect to the Advisory Account will be achieved, including, without limitation, any risk control, risk management or return objectives, expectations or targets. For example, there may be delays in the implementation of investment strategies, including as a result of differences in time zones and the markets on which securities trade.
- **Valuation Risks**—The net asset value of an Advisory Account as of a particular date may be materially greater than or less than its net asset value that would be determined if an Advisory Account's investments were to be liquidated as of such date. For example, if an Advisory Account was required to sell a certain asset or all or a substantial portion of its assets on a particular date, the actual price that an Advisory Account would realize upon the disposition of such asset or assets could be materially less than the value of such asset or assets as reflected in the net asset value of an Advisory Account. Volatile market conditions could also cause reduced liquidity in the market for certain assets, which could result in liquidation values that are materially less than the values of such assets as reflected in the net asset value of an Advisory Account. An Advisory Account may invest in assets that lack a readily ascertainable market value, and an Advisory Account's net asset value will be affected by the valuations of any such assets (including, without limitation, in connection with calculation of any fees). In valuing assets that lack a readily ascertainable market value, BH (or an affiliated or independent agent thereof) may utilize dealer supplied quotations or pricing models developed by third parties, BH and/or affiliates of BH. Such methodologies may be based upon assumptions and estimates that are subject to error. The value of assets that lack a readily ascertainable market value may be subject to later adjustment based on valuation information available to an

Advisory Account at that time. Any adjustment to the value of such assets may result in an adjustment to the net asset value of an Advisory Account.

OTHER GENERAL RISKS

- **Cash Management Risk**—To the extent BH has the authority to manage cash for an Advisory Account for various reasons, including for temporary or defensive positions or to meet the liquidity needs of such Advisory Account, BH may, at certain times and subject to the investment guidelines for such Advisory Account, if any, invest some of its assets temporarily in money market funds or other similar types of investments. During any period in which its assets are not substantially invested in accordance with its principal investment strategies, an Advisory Account may be prevented from achieving its investment objective, which may adversely affect that Advisory Account's performance.
- **Conflicts of Interest**—Buxton Helmsley is a worldwide, full-service asset management and financial services organization and a major participant in global financial markets. As such, Buxton Helmsley provides a wide range of financial services to a substantial and diversified client base. Buxton Helmsley advises clients in all markets and transactions and purchases, sells, holds and recommends a broad array of investments. Buxton Helmsley has direct and indirect interests in the global fixed income, currency, commodity, equities, bank loan and other markets and the securities and issuers in which Advisory Accounts may directly and indirectly invest. As a result, Buxton Helmsley's activities and dealings may affect a particular Advisory Account in ways that may disadvantage or restrict the Advisory Account and/or benefit Buxton Helmsley or other Accounts (including Advisory Accounts). A description of certain of such potential conflicts of interest is set forth under Item 11, Code of Ethics, Participation or Interest in Client Transactions and Personal Trading.
- **Dependence on Key Personnel**—Advisory Accounts may rely on certain key personnel of Buxton Helmsley. As a result of regulation or for other reasons, the amount of compensation that may be payable to Buxton Helmsley executives or other employees may be reduced, or employees who rely on work visas or other permits may have such visas or permits revoked or not renewed. As a result, certain key personnel may leave Buxton Helmsley. The departure of any of such key personnel or their inability to fulfill certain duties may adversely affect the ability of BH to effectively implement the investment programs of the Advisory Accounts.
- **Economic and Other Sanctions**—In the event that BH determines that an investor is subject to any trade, economic or other sanctions imposed by the United Nations or any other applicable governmental or regulatory authority, BH may take such actions as it determines appropriate to comply with applicable law, including, without limitation, (i) blocking or freezing Advisory Accounts or interests therein, (ii) where permitted by the applicable sanctions law, requiring an investor in a pooled investment vehicle to redeem from the fund, and delaying the payment of any redemption proceeds, without interest, until such time as such payment is permitted under applicable law, (iii) excluding an investor in a pooled investment vehicle from allocations of net capital appreciation and net capital depreciation and distributions made to other investors, and (iv) excluding an investor in a pooled investment vehicle from voting on any matter upon which investors are entitled to vote, and excluding the net asset value of such investor's interest in the fund for purposes of determining the investors entitled to vote on or required to take any action in respect of the fund.
- **Electronic Trading**—BH may trade on electronic trading and order routing systems, which differ from traditional open outcry trading and manual order routing methods. Transactions using an electronic system are subject to the rules and regulations of the exchanges offering the system or listing the instrument. Characteristics of electronic trading and order routing systems vary widely among the different electronic systems with respect to order matching procedures, opening and closing procedures and prices, trade error policies and trading limitations or requirements. There are also differences regarding qualifications for access and grounds for termination and limitations on the types of orders that may be entered into the system. Each of these matters may present different risk factors with respect to trading on or using a particular system. Each system may also present risks related to system access, varying response times and security. In the case of internet-based systems, there may be additional risks related to service providers and the receipt and monitoring of electronic mail. Trading through an electronic trading or order routing system is also subject to risks associated with system or component failure. In

the event of system or component failure, it is possible that for a certain time period, it might not be possible to enter new orders, execute existing orders or modify or cancel orders that were previously entered. System or component failure may also result in loss of orders or order priority. Some investments offered on an electronic trading system may be traded electronically and through open outcry during the same trading hours. Exchanges offering an electronic trading or order routing system and listing the instrument may have adopted rules to limit their liability, the liability of brokers and software and communication system vendors and the amount that may be collected for system failures and delays. The limitation of liability provisions varies among the exchanges.

- Legal, Tax and Regulatory Risks—BH and certain of its Advisory Accounts are subject to legal, tax and regulatory oversight, including by the SEC, FCA and similar regulators world-wide. Because Buxton Helmsley is deemed to “control” BH-managed pooled investment vehicles, under the BHCA, there may be restrictions on transactions and relationships between BH-managed pooled investment vehicles and Buxton Helmsley, as well as restrictions on the investments and transactions by, and the operations of, BH-managed pooled investment vehicles. In addition, there have been recent legislative, tax and regulatory changes and proposed changes that may apply to the activities of BH and managers to which BH allocates client assets that may require material adjustments to the business and operations of, or have other material adverse effects on, Advisory Accounts. Recent changes, which continue to evolve, include the enactment of the Dodd-Frank Act, which includes the so-called “Volcker Rule,” the amendment of the Advisers Act and changes to the way derivatives and commodities are regulated. Similarly, foreign regulators have recently passed legislation and have proposed changes that may affect certain Advisory Accounts, including the European Union Directive on Alternative Investment Fund Managers, which may impose certain requirements and restrictions on third-party managers to which BH allocates client assets. Buxton Helmsley may take certain actions to limit its authority in respect of Advisory Accounts in order to reduce or eliminate the impact or applicability of any regulatory restrictions on Buxton Helmsley, Advisory Accounts or other Accounts, including, without limitation, the BHCA and the Volcker Rule. There may also be unanticipated and/or adverse

legal, tax and regulatory changes from time to time, including requirements to provide additional information pertaining to an Advisory Account to the Internal Revenue Service or other taxing authorities. Regulatory changes and restrictions imposed by regulators, self-regulatory organizations and exchanges may vary from country to country and may affect the value of Advisory Accounts’ investments and their ability to pursue their investment strategies. Any such rules, regulations and other changes, and any uncertainty in respect of their implementation, may result in increased costs, reduced profit margins and reduced investment and trading opportunities, and may require a significant restructuring of the manner in which an Advisory Account is organized, all of which may negatively impact the performance of Advisory Accounts.

- Limited Information Risk—BH will consider allocations for Advisory Accounts utilizing information made available to it; however, as a result of informational barriers constructed between different divisions and areas of Buxton Helmsley or other policies and procedures of Buxton Helmsley, generally BH may not have access, or may have limited access, to information and personnel in other areas of Buxton Helmsley. Therefore, BH will generally not be able to review potential investments for Advisory Accounts with the benefit of information held by other divisions of Buxton Helmsley. Information barriers may also exist between different businesses within BH. Buxton Helmsley has no obligation to seek information or to make available to or share with BH any information, investment strategies, opportunities or ideas known to personnel of Buxton Helmsley or developed or used in connection with other clients or activities.
- Limited Regulatory Oversight—Third-party managers to which Advisory Accounts allocate assets may be subject to limited or no regulatory requirements or governmental oversight. Therefore, an Advisory Account may not have the benefit of certain protections that would otherwise be afforded to investors had the third-party managers been more heavily regulated.
- Losses in Affiliated Investment Funds Borne Solely by Investors—All losses of an Advisory Account investing in an affiliated investment fund managed by BH shall be borne solely by such Advisory Account and not by Buxton Helmsley. Buxton Helmsley’ losses in an affiliated investment fund will be limited to losses attributable to the ownership interests in such investment fund held by

Buxton Helmsley in its capacity as an investor in such investment fund or as beneficiary of a restricted profit interest held by Buxton Helmsley. Ownership interests in Advisory Account are not insured by the FDIC, and are not deposits, obligations of, or endorsed or guaranteed in any way, by any banking entity.

- Multiple Levels of Fees and Expenses—In circumstances in which Advisory Accounts invest in third-party managers or affiliated or unaffiliated investment funds, the Advisory Accounts will bear any fees or other compensation due to BH and expenses at the Advisory Account level, in addition to any fees or compensation and expenses which may be due at the third-party manager or investment fund level.
- Non-Recourse Risk—The governing agreements of investment funds in which Advisory Accounts invest limit the circumstances in which a manager can be held liable to investors. As a result, investors may have a more limited right of action in certain cases than they would in the absence of such provisions.
- Operational Risk—The risk that an Advisory Account may suffer a loss arising from shortcomings or failures in internal processes, people or systems, or from external events. Operational risk can arise from many factors ranging from routine processing errors to potentially costly incidents related to, for example, major systems failures.
- Partial or Total Loss of Capital—Certain investments made by BH for Advisory Accounts are intended for long-term investors who can accept the risks associated with investing in illiquid securities, and the possibility of partial or total loss of capital exists. There is no assurance that Advisory Accounts will achieve their investment or performance objectives, including, without limitation, the location of suitable investment opportunities and the achievement of targeted rates of return, or that Advisory Accounts will be able to fully invest their capital.
- Performance-Based Compensation—BH and managers of affiliated and unaffiliated investment funds in which an Advisory Account invests (which, in the case of affiliated investment funds, may be BH) may receive performance-based compensation from Advisory Accounts and the investment funds based upon the net capital appreciation of Advisory Account or investment fund assets. Such compensation arrangements may create an incentive for BH and managers of investment funds to make investments that are riskier or more speculative than

would be the case if such arrangements were not in effect. In many cases, performance-based compensation may be calculated on a basis that includes unrealized appreciation of assets. In such cases, such compensation may be greater than if it were based solely on realized gains and losses. See Item 6, Performance-Based Fees and Side-By-Side Management.

- Reliance on Technology—BH may employ investment strategies that are dependent upon various computer and telecommunications technologies. The successful implementation and operation of such strategies could be severely compromised by telecommunications failures, power loss, software-related “system crashes,” fire or water damage, or various other events or circumstances. Any such event could result in, among other things, the inability of BH to establish, maintain, modify, liquidate, or monitor the Advisory Accounts’ investments, which could have a material adverse effect on the Advisory Accounts.
- Risks Involved in the Development of Models—Errors may occur in designing, writing, testing, and/or monitoring models, which may be difficult to detect and may not be detected for a significant period of time. Inadvertent systems and human errors are an inherent risk of models and the complexity of models may make it difficult or impossible to detect the source of any weakness or failure in the models before material losses are incurred. Moreover, the complexity of the models and their reliance on complex computer programming may make it difficult to obtain outside support. To the extent any third-party licensed intellectual property is used in the development of models, there may be adverse consequences if such material is no longer available. Finally, in the event of any software or hardware malfunction, or problem caused by a defect or virus, there may be adverse consequences to developing or monitoring models.
- Speculative Position Limits Risk—The CFTC and some exchanges have rules limiting the maximum net long or net short positions which any person or group may own, hold or control in any given futures contract or option or swap on such futures contract. Any such limits may prevent an Advisory Account from acquiring positions that might otherwise have been desirable or profitable. In addition, in applying such limits, the CFTC and some exchanges will require aggregation of an Advisory Account’s positions in futures with positions owned, held or controlled by other Accounts. Under such

circumstances, Buxton Helmsley may utilize available position limits for Accounts other than the Advisory Account, and, as a result, the Advisory Account, and not Buxton Helmsley, could be required to limit its use of futures or liquidate its positions.

- **Volcker Rule Risks**—The Volcker Rule became effective July 21, 2012; however, the Federal Reserve issued an order that provided that banking entities (including Buxton Helmsley and its subsidiaries) are not required to be in compliance with the Volcker Rule and its final rules until July 21, 2015. On December 18, 2014, the Federal Reserve issued a further order extending the conformance period until July 21, 2016 for investments in and relationships with covered funds and foreign funds that were in place prior to December 31, 2013, and stated that it intends to grant an additional one-year extension, until July 21, 2017, for the same covered fund investments and relationships. Among other things, the Volcker Rule generally prohibits banking entities, including Buxton Helmsley, from engaging in transactions that would cause a banking entity or its affiliates to have credit exposure to or engage in certain transactions with certain hedge funds or private equity funds that are managed by affiliates of the banking entity, or with investment vehicles controlled by such hedge funds or private equity funds, that would involve or result in a material conflict of interest between the banking entity and its clients, customers or counterparties, or that would result, directly or indirectly, in a material exposure by the banking entity to high-risk assets or high-risk trading strategies. However, there remains significant uncertainty as to how this prohibition will ultimately impact the Advisory Accounts. The Volcker Rule also prohibits Buxton Helmsley from owning more than 3% of the total number and fair market value of the outstanding ownership interests of certain covered Advisory Accounts and requires that certain other transactions between BH and Advisory Accounts managed by BH affiliates be on “arms’ length” terms.

Buxton Helmsley’s policies and procedures are designed to identify and limit exposure to such material conflicts of interest and high-risk assets and trading strategies in its trading and investment activities, including its activities related to an Advisory Account. If the regulatory agencies implementing the Volcker Rule develop guidance regarding best practices for addressing these matters, as they indicated that they intend to do, Buxton Helmsley’s policies and procedures may be modified or adapted to take any such guidance into account. Any

requirements or restrictions imposed by Buxton Helmsley’s policies and procedures or by the Volcker Rule agencies could materially adversely affect an Advisory Account, including because the requirements or restrictions could result in, among other things, the Advisory Account foregoing certain investments or investment strategies or taking or refraining from other actions, any of which could disadvantage the Advisory Account. These restrictions could materially adversely affect Advisory Accounts that are, or are invested in, pooled investment vehicles, including because the restrictions could prevent a pooled investment vehicle from obtaining seed capital, loans or other commercial benefits from Buxton Helmsley.

RISKS THAT APPLY PRIMARILY to EQUITY INVESTMENTS

General

- **Energy, Oil and Gas Sector Risk**—Advisory Accounts may invest in MLPs that primarily derive their income from investing in companies within the energy, oil and gas sectors. Energy, oil and gas companies are subject to specific risks, including, among others, fluctuations in commodity prices; reduced consumer demand for commodities such as oil, natural gas or petroleum products; reduced availability of natural gas or other commodities for transporting, processing, storing or delivering; slowdowns in new construction; extreme weather or other natural disasters; and threats of attack by terrorists on energy assets. Additionally, changes in the regulatory environment for these companies may adversely impact their profitability. Over time, depletion of natural gas reserves or other commodities may also affect the profitability of companies in the energy, oil and gas sectors.
- **Equity and Equity-Related Securities and Instruments**—Advisory Accounts may take long and short positions in common stocks of U.S. and non-U.S. issuers traded on national securities exchanges and OTC markets. The value of equity securities varies in response to many factors. These factors include, without limitation, factors specific to an issuer and factors specific to the industry in which the issuer participates. In addition, equity securities are subject to stock risk, which is the risk that stock prices historically rise and fall in periodic cycles. U.S. and non-U.S. stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

- **Exchange Traded Fund Risk—Advisory Accounts** may invest in ETFs. Most ETFs are passively managed investment companies whose shares are purchased and sold on a securities exchange. An ETF represents a portfolio of securities designed to track a particular market segment or index. In addition to presenting the same primary risks as an investment in a conventional fund, an ETF may fail to accurately track the market segment or index that underlies its investment objective. Moreover, ETFs are subject to the following risks that do not apply to conventional funds: (i) the market price of the ETF's shares may trade at a premium or a discount to their net asset value; (ii) an active trading market for an ETF's shares may not develop or be maintained; and (iii) there is no assurance that the requirements of the exchange necessary to maintain the listing of an ETF will continue to be met or remain unchanged.
- **IPOs/New Issues Risk—**The risk that the market value of IPO/New Issue shares held in an Advisory Account will fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about a company's business model, quality of management, earnings growth potential, and other criteria used to evaluate its investment prospects. The purchase of IPO/New Issue shares may involve high transaction costs. Investments in IPO/New Issue shares, which are subject to market risk and liquidity risk, involve greater risks than investments in shares of companies that have traded publicly on an exchange for extended periods of time.
- **Master Limited Partnership Risk—**Investments by an Advisory Account in securities of MLPs involve risks that differ from investments in common stock, including risks related to limited control and limited rights to vote on matters affecting the MLP, risks related to potential conflicts of interest between the MLP and the MLP's general partner, cash flow risks, dilution risks and risks related to the general partner's right to require unit-holders to sell their common units at an undesirable time or price because of regulatory changes or other reasons. Certain MLP securities may trade in lower volumes due to their smaller capitalizations. Accordingly, those MLPs may be subject to more abrupt or erratic price movements, may lack sufficient market liquidity to enable an Advisory Account to effect sales at an advantageous time or without a substantial drop in price, and investment in those MLPs may restrict an Advisory Account's ability to take advantage of other investment opportunities. MLPs are generally considered interest-rate sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns. In addition, the managing general partner of an MLP may receive an incentive allocation based on increases in the amount and growth of cash distributions to investors in the MLP. This method of compensation may create an incentive for the managing general partner to make investments that are riskier or more speculative than would be the case in the absence of such compensation arrangements.
- **Mid Cap and Small Cap Risk—**Investments in mid-capitalization and small capitalization companies involve greater risks than investments in larger, more established companies, including because such companies may have narrower markets and more limited managerial and financial resources, and because there is often less publicly available information concerning such companies than for larger, more established businesses. These securities may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity, and these issuers often face greater business risks. Securities of such issuers may lack sufficient market liquidity to enable an Advisory Account to effect sales at an advantageous time or without a substantial drop in price. Both small- and mid-capitalization companies often have narrower markets and more limited managerial and financial resources than larger, more established companies. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of an Advisory Account's portfolio. Generally, the smaller the company size, the greater these risks.
- **Preferred Stock, Convertible Securities and Warrants Risks—**The value of preferred stocks, convertible securities and warrants will vary with the movements in the equity market and the performance of the underlying common stock, in particular. Their value is also affected by adverse issuer or market information.
- **Private Investments in Public Equities—**An Advisory Account may make private investments in public equities ("PIPEs"). PIPE transactions typically involve the purchase of securities directly from a publicly traded company or its affiliates in a private placement transaction, typically at a discount to the market price of the company's common stock. Equity issued in this manner is often subject to transfer restrictions and is therefore less

liquid than equity issued through a registered public offering. In a PIPE transaction, an Advisory Account may bear the price risk from the time of pricing until the time of closing. An Advisory Account may be subject to lock-up agreements that prohibit transfers for a fixed period of time. In addition, because the sale of the securities in a PIPE transaction is not registered under the 1933 Act, the securities are “restricted” and cannot be immediately resold by the investors into the public markets.

Accordingly, PIPE securities may be deemed illiquid. An Advisory Account may enter into a registration rights agreement with the issuer pursuant to which the issuer commits to file a resale registration statement allowing the Advisory Account to publicly resell its securities. The ability of an Advisory Account to freely transfer the shares is conditioned upon, among other things, the SEC’s preparedness to declare the resale registration statement effective covering the resale, from time to time, of the shares sold in the private financing and the issuer’s right to suspend the Advisory Account’s use of the resale registration statement if the issuer is pursuing a transaction or some other material nonpublic event is occurring. Accordingly, PIPE securities may be subject to risks associated with illiquid securities.

- REIT Risk—REITs whose underlying properties are concentrated in a particular industry or geographic region are also subject to risks affecting such industries and regions. The securities of REITs involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements because of interest rate changes, economic conditions and other factors. Securities of such issuers may lack sufficient market liquidity to enable the Advisory Account to effect sales at an advantageous time or without a substantial drop in price. The failure of a company to qualify as a REIT could have adverse consequences for an Advisory Account invested in the company.

Private Equity

- Difficulty in Valuing Partnership Investments—Valuation of partnership investments in which an Advisory Account may invest may be difficult, as there generally will be no established market for these assets or for securities of privately-held companies which an underlying private equity fund may own. Overall performance will be affected by the acquisition price paid by the underlying private equity funds for their interests in portfolio

companies, which will be subject to negotiation with the sellers of such interests. In the absence of a readily ascertainable market price, assets of the underlying private equity funds will be valued by the general partners of such funds or the portfolio companies themselves. The valuation of such securities may create a conflict of interest for such general partner, as such assets may constitute a substantial portion of such underlying fund’s investments and their value may affect the general partner’s compensation. BH generally will not have sufficient information in order to be able to confirm or review the accuracy these valuations.

- Illiquidity of Investments—Investments in private equity in an Advisory Account generally will be long-term and highly illiquid. Investors generally will not be able to redeem their capital account balances or withdraw their interests, and there will be no active secondary market for the interests. Moreover, investors may not, directly or indirectly, sell, assign, encumber, mortgage, transfer, or otherwise dispose of, voluntarily or involuntarily, any portion of their interests without general partner consent, which may be granted or withheld in its sole discretion. Significant credit, tax, contractual and regulatory restrictions apply with respect to potential transfers of the interests.
- Limited Operating History and Competition Associated with Portfolio Companies—Certain portfolio companies in which BH investment funds or Advisory Accounts invest, either directly or indirectly, may involve a high degree of business and financial risk. These companies may (i) be in an early stage of development and not have a proven operating history; (ii) be operating at a loss or have significant variations in operating results; (iii) be engaged in a rapidly changing business with products subject to a substantial risk of obsolescence; (iv) require substantial additional capital to support their operations, to finance expansion or to maintain their competitive position; (v) rely on the services of a limited number of key individuals, the loss of any of whom could significantly adversely affect a portfolio company’s performance; and (vi) otherwise have a weak financial condition or be experiencing financial difficulties. In addition, portfolio companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing and other capabilities, and a larger number of qualified management and technical personnel.

- Operating and Financial Risks of Portfolio Companies—Investments in portfolio companies involve a high degree of business and financial risk. Portfolio companies may be highly leveraged and subject to restrictive financial and operating covenants that may impair their ability to finance their future operations and capital needs. As a result, these companies may have limited flexibility to respond to changing business and economic conditions and to business opportunities. A leveraged company's income and equity will tend to increase or decrease at a greater rate than if borrowed money were not used. In addition, a portfolio company with a leveraged capital structure will be subject to increased exposure to adverse economic factors such as a significant rise in interest rates, a severe downturn in the economy or deterioration in the condition of that portfolio company or its industry. In the event that a portfolio company is unable to generate sufficient cash flow to meet principal and interest payments on its indebtedness, the value of an investment in a portfolio company could be significantly reduced or even eliminated. Some portfolio companies may (i) be operating at a loss or have significant variations in operating results, (ii) be engaged in a rapidly changing business with products subject to a substantial risk of obsolescence, (iii) require substantial additional capital to support their operations, to finance expansion or to maintain their competitive position, (iv) be in an early stage of development, (v) not have a proven operating history, or (vi) otherwise have a weak financial condition that could result in insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company, each of which could materially adversely affect the investment results of an Advisory Account.
- Reliance on Company Management—Although BH or one of its affiliates may seek to be represented on the board of directors of portfolio companies, there is no assurance that this representation, if sought, will be obtained. Furthermore, even in cases where BH or one or more Advisory Accounts may have certain rights to (i) be represented on the board of directors of portfolio companies and/or (ii) participate in certain significant business decisions and/or other management rights, neither BH nor the Advisory Accounts will have an active role in the day-to-day management of those companies. Accordingly, the success or failure of an investment in a portfolio companies will depend to a significant extent on the portfolio company's management personnel.

RISKS THAT APPLY PRIMARILY *to* FIXED INCOME INVESTMENTS

- Commodity Exposure Risk—Exposure to the commodities markets may subject an Advisory Account to greater volatility than investments in traditional securities. The value of commodity-linked investments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. The prices of energy, industrial metals, precious metals, agriculture and livestock sector commodities may fluctuate widely due to factors such as changes in value, supply and demand and governmental regulatory policies. The commodity-linked investments in which an Advisory Account invests may be offered by companies in the financial services sector, and events affecting the financial services sector may cause the Advisory Account's value to fluctuate.
- Contingent Convertible Instruments Risk—Contingent convertible securities ("CoCos") are a form of hybrid debt security that are intended to either convert into equity or have their principal written down, potentially to zero, upon the occurrence of certain "triggers." The triggers are generally linked to regulatory capital thresholds or regulatory actions calling into question the issuing banking institution's continued viability as a going-concern. CoCos' unique equity conversion or principal write-down features are tailored to the issuing banking institution and its regulatory requirements. Some additional risks associated with CoCos include, among others, less absorption risk, risk as subordinated instruments, and risk that its market value will fluctuate based on unpredictable factors.
- Corporate Debt Securities Risks—Corporate debt securities are subject to the risk of the issuer's inability to meet principal and interest payments on the obligation and may also be subject to price volatility due to such factors as interest rate sensitivity, market perception of the credit-worthiness of the issuer and general market liquidity. In addition, early repayments of an Advisory Account's investments may have a material adverse effect on such Advisory Account's investment objectives and the profits on invested capital.

- **Credit Ratings**—The Advisory Accounts may, but are not required to, use credit ratings to evaluate securities. Credit ratings do not evaluate the market value risk of lower-quality securities and, therefore, may not fully reflect the true risks of an investment, and they are used only as a preliminary indicator of investment quality. Investments in lower-quality and comparable unrated obligations will be more dependent on the credit analysis of BH than would be the case with investments in investment-grade debt obligations.
- **Credit/Default Risk**—An issuer or guarantor of fixed income securities or instruments held by an Advisory Account (which, for certain Advisory Accounts, may have low credit ratings) may default on its obligation to pay interest and repay principal or default on any other obligation, and a counterparty to a derivatives investment may fail to perform its contractual obligations. Additionally, the credit quality of securities or instruments may deteriorate rapidly, which may impair an Advisory Account's liquidity and cause significant value deterioration. Advisory Accounts may invest in noninvestment grade fixed income securities (commonly known as "junk bonds") and leveraged loans that are considered speculative. Non-investment grade investments, leveraged loans and unrated securities of comparable credit quality are subject to the increased risk of an issuer's inability to meet principal and interest payment obligations. These securities and loans may be subject to greater price volatility due to such factors as specific issuer developments, interest rate sensitivity, negative perceptions of the junk bond and leverage loan markets generally and less secondary market liquidity. Advisory Accounts may purchase the securities of issuers that are in default.
- **Risks of Exchange-Traded Notes**—An Advisory Account may invest in exchange-traded notes ("ETNs"), which are senior, unsecured, unsubordinated debt securities issued by a sponsoring financial institution. The returns on an ETN are linked to the performance of particular securities, market indices, or strategies, minus applicable fees. ETNs are traded on an exchange (e.g., the NYSE) during normal trading hours; however, investors may also hold an ETN until maturity. At maturity, the issuer of an ETN pays to the investor a cash amount equal to the principal amount, subject to application of the relevant securities, index or strategy factor. Similar to other debt securities, ETNs have a maturity date and are backed only by the credit of the sponsoring institution. ETNs are subject to credit risk. The value of an ETN may be influenced by, among other things, time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying assets, changes in the applicable interest rates, changes in the issuer's credit rating, and economic, legal, political or geographic events that affect the underlying assets. When an Advisory Account invests in ETNs, it will bear its proportionate share of any fees and expenses borne by the ETN. Although an ETN is a debt security, it is unlike a typical bond, in that there are no periodic interest payments and principal is not protected.
- **Fixed Income Securities Risk**—Advisory Accounts may invest in fixed income securities. Investment in these securities may offer opportunities for income and capital appreciation, and may also be used for temporary defensive purposes and to maintain liquidity. Fixed income securities are obligations of the issuer to make payments of principal and/or interest on future dates, and include, among other securities: bonds, notes, and debentures issued by corporations; debt securities issued or guaranteed by the U.S. government or one of its agencies or instrumentalities or by a non-U.S. government or one of its agencies or instrumentalities; municipal securities; and mortgage-backed and asset-backed securities. These securities may pay fixed, variable, or floating rates of interest, and may include zero coupon obligations. Fixed income securities are subject to the risk of the issuer's or a guarantor's inability to meet principal and interest payments on its obligations (i.e., credit risk) and are subject to price volatility due to factors such as interest rate sensitivity, market perception of the creditworthiness of the issuer, and general market liquidity (i.e., market risk).
- **Floating and Variable Rate Obligations Risk**—Advisory Accounts may invest in instruments that have floating and/or variable rate obligations. For floating and variable rate obligations, there may be a lag between an actual change in the underlying interest rate benchmark and the reset time for an interest payment of such an obligation, which could harm or benefit the Advisory Account, depending on the interest rate environment or other circumstances. In a rising interest rate environment, for example, a floating or variable rate obligation that does not reset immediately would prevent an Advisory Account from taking full advantage of rising interest rates in a timely manner. However, in a declining interest rate

environment, an Advisory Account may benefit from a lag due to an obligation's interest rate payment not being immediately impacted by a decline in interest rates.

Certain floating and variable rate obligations have an interest rate floor feature, which prevents the interest rate payable by the security from dropping below a specified level as compared to a reference interest rate. Such a floor protects Advisory Accounts from losses resulting from a decrease in the reference rate below the specified level.

However, if the reference rate is below the floor, there will be a lag between a rise in the reference rate and a rise in the interest rate payable by the obligation, and Advisory Accounts may not benefit from increasing interest rates for a significant amount of time.

- **Inflation Protected Securities ("IPS") Risk**—To the extent an Advisory Account invests in IPS, the value of IPS generally fluctuates in response to changes in real interest rates, which are in turn tied to the relationship between nominal interest rates and the rate of inflation. If nominal interest rates increased at a faster rate than inflation, real interest rates might rise, leading to a decrease in the value of IPS. The market for IPS may be less developed or liquid, and more volatile, than certain other securities markets. In addition, the value of Treasury Inflation-Protected Securities ("TIPS") generally fluctuates in response to inflationary concerns. As inflationary expectations increase, TIPS will become more attractive, because they protect future interest payments against inflation. Conversely, Advisory Accounts that invest in inflation protected securities will be subject to the risk that prices throughout the economy may decline over time, resulting in "deflation." If this occurs, the principal and income of inflation-protected fixed income securities held by an Advisory Account would likely decline in price, which could result in losses for the Advisory Account. Further, there can be no assurance the various consumer price indices used in connection with IPS will accurately measure the real rate of inflation in the prices of goods and services, which may affect the value of IPS.
- **Interest Rate Risk**—Interest rates may fluctuate significantly at any time and from time to time. As a result of such fluctuations, the value of securities or instruments held by an Advisory Account (which may include inflation protected securities) may increase or decrease in value. When interest rates increase, fixed income securities or instruments held by an Advisory Account will generally decline in value. Long-term fixed income securities or

instruments will normally have more price volatility because of this risk than short-term fixed income securities or instruments. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, rising inflation and changes in general economic conditions.

- **Loan Risks**—The Advisory Accounts may directly or indirectly purchase loans as participations from certain financial institutions which will represent the right to receive a portion of the principal of, and all of the interest relating to such portion of, the applicable loan. An Advisory Account generally will have no right directly to enforce compliance by the borrower with the terms of the loan agreement, no rights of set-off against the borrower, and no right to object to certain changes to the loan agreement agreed to by the selling institution. Further, the market for loan obligations may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. Because transactions in many loans are subject to extended trade settlement periods, an Advisory Account may not receive the proceeds from the sale of a loan for a period after the sale. As a result, sale proceeds related to the sale of loans may not be available to an Advisory Account to make additional investments or payments in respect of withdrawals therefrom for a period after the sale of the loans, and, as a result, the Advisory Account may have to sell other investments or engage in borrowing transactions if necessary to raise cash to meet its obligations. In addition, an Advisory Account may be exposed to losses resulting from default and foreclosure. There is no assurance that the protection of an Advisory Account's interests is adequate or that claims may not be asserted by others that might interfere with enforcement of an Advisory Account's rights. Although a loan obligation may be fully collateralized at the time of acquisition, the collateral may decline in value, be relatively illiquid, or lose all or substantially all of its value subsequent to investment. Many loan investment are subject to legal or contractual restrictions on resale and may be relatively illiquid and difficult to value. There is less readily available, reliable information about most loan investments than is the case for many other types of securities. Substantial increases in interest rates may cause an increase in loan obligation defaults. The market for loan obligations may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. Because transactions in many loans are

subject to extended trade settlement periods, Advisory Accounts may not receive the proceeds from the sale of a loan for a period after the sale. As a result, sale proceeds related to the sale of loans may not be available to make additional investments. Moreover, to the extent an Advisory Account has a direct contractual relationship with a defaulting borrower, such Advisory Account may be adversely affected, including as a result of costs or delays in the foreclosure or liquidation of the assets securing the loan.

- **Mezzanine Debt Risk**—Mezzanine debt is typically junior to the obligations of a company to senior creditors, trade creditors and employees. The ability of an Advisory Account to influence a company's affairs, especially during periods of financial distress or following an insolvency, will be substantially less than that of senior creditors.
- **Mortgage-Backed and/or Other Asset-Backed Securities Risk**—Mortgage-related and other asset-backed securities are subject to certain risks, including "extension risk" (i.e., in periods of rising interest rates, issuers may pay principal later than expected) and "prepayment risk" (i.e., in periods of declining interest rates, issuers may pay principal more quickly than expected, causing an Advisory Account to reinvest proceeds at lower prevailing interest rates). Mortgage-backed securities offered by non-governmental issuers are subject to other risks as well, including failures of private insurers to meet their obligations and unexpectedly high rates of default on the mortgages backing the securities. Other asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as risks associated with the nature and servicing of the assets backing the securities. Asset-backed securities may not have the benefit of a security interest in collateral comparable to that of mortgage assets, resulting in additional credit risk.
- **Municipal Securities Risks**—Municipal securities risks include interest rate risk, the ability of the issuer to repay the obligation, the relative lack of information about certain issuers of municipal securities, and the possibility of future legislative changes which could affect the market for and value of municipal securities. The risk that any proposed or actual changes in income tax rates or the tax exempt status of interest income from municipal securities can significantly affect the demand for, and supply, liquidity and marketability of, municipal securities. Such changes may affect an Advisory Account's net asset value and ability to acquire and dispose of municipal

securities at desirable yield and price levels. Moreover, certain of the municipalities in which an Advisory Account may invest may experience significant financial difficulties, which may lead to bankruptcy or default.

- **Non-Investment Grade Investment Risk**—Non-investment grade fixed income securities and unrated securities of comparable credit quality (commonly known as "junk bonds") are considered speculative and are subject to the increased risk of an issuer's inability to meet principal and interest payment obligations. These investments may be subject to greater price volatility due to such factors as specific corporate or municipal developments, interest rate sensitivity, negative perceptions of the junk bond markets generally and less secondary market liquidity. Advisory Accounts may purchase investments of issuers that are in default.
- **Obligations Risk**—Many loan obligations are subject to legal or contractual restrictions on purchase and sale or resale and are relatively illiquid and may be difficult to value. Loan obligations are not traded on an exchange, and purchasers and sellers rely on certain market makers, such as the administrative agent for the particular loan obligation, to trade that loan obligation. As a result of these factors, particular loan obligations or participations can be difficult to dispose of when necessary to meet an Advisory Account's liquidity needs or in response to a specific economic event, such as a decline in the credit quality of the borrower.
- **Other Debt Instruments; CBOs and CLOs Risk**—The Advisory Accounts may directly or indirectly invest in other investment grade or other debt instruments of companies or other entities not affiliated with countries or governments, including but not limited to, senior and subordinated corporate debt; investment grade tranches of collateralized mortgage obligations; preferred stock; corporate securities; and bank debt. As with other investments made by an Advisory Account, there may not be a liquid market for these debt instruments, which may limit the Advisory Account's ability to sell these debt instruments or to obtain the desired price. Advisory Accounts may also invest in collateralized bond obligations ("CBOs") and collateralized loan obligations ("CLOs"), which may be fixed pools or may be "market value" or managed pools of collateral, including commercial loans, high yield and investment grade debt and derivative instruments relating to debt. Depending upon the tranche of a CBO or CLO in which an Advisory

Account invests, the returns may be extremely sensitive to the rate of defaults in the collateral pool, and redemptions by more senior tranches could result in an elimination, deferral or reduction in the funds available to make interest or principal payments to the tranches held by Advisory Accounts. In addition, there can be no assurance that a liquid market will exist in any CBO or CLO when an Advisory Account seeks to sell its interest therein.

Also, it is possible that an Advisory Account's investment in a CBO or CLO will be subject to certain contractual limitations on transfer. Further, a CBO or CLO may be difficult to value given current market conditions.

- **Purchases of Securities and Other Obligations of Financially Distressed Companies—**An Advisory Account may directly or indirectly purchase securities and other obligations of companies that are experiencing significant financial or business distress, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such purchases may result in significant returns, they involve a substantial degree of risk and may not show any return for a considerable period of time.
- **Second Lien Loans Risk—**Second lien loans generally are subject to similar risks as those associated with investments in senior loans. Because second lien loans are subordinated or unsecured and thus lower in priority of payment to senior loans, they are subject to the additional risk that the cash flow of the borrower, and property securing the loan or debt, if any, may be insufficient to meet scheduled payments after giving effect to the senior secured obligations of the borrower. This risk is generally higher for subordinated unsecured loans or debt, which are not backed by a security interest in any specific collateral. Second lien loans generally have greater price volatility than senior loans and may be less liquid. There is also a possibility that originators will not be able to sell participations in second lien loans, which would create greater credit risk exposure for the holders of such loans. Second lien loans share the same risks as other below investment grade securities.
- **Senior Loan Risk—**Senior loans, which hold the most senior position in the capital structure of a business entity, are typically secured with specific collateral and have a claim on the assets and/or stock of the borrower that is senior to that held by subordinated debt holders and stockholders of the borrower. Senior loans are usually rated below investment grade, and are subject to similar

risks, such as credit risk, as below investment grade securities. However, senior loans are typically senior and secured in contrast to other below investment grade securities, which are often subordinated and unsecured. There is less readily available, reliable information about most senior loans than is the case for many other types of securities, and BH relies primarily on its own evaluation of a borrower's credit quality rather than on any available independent sources. The ability of an Advisory Account to realize full value in the event of the need to sell a senior loan may be impaired by the lack of an active trading market for certain senior loans or adverse market conditions limiting liquidity. To the extent that a secondary market does exist for certain senior loans, the market may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. Although senior loans in which an Advisory Account will invest generally will be secured by specific collateral, there can be no assurance that liquidation of such collateral would satisfy the borrower's obligation in the event of non-payment of scheduled interest or principal or that such collateral could be readily liquidated. In the event of the bankruptcy of a borrower, an Advisory Account could experience delays or limitations with respect to its ability to realize the benefits of the collateral securing a senior loan. Moreover, any specific collateral used to secure a senior loan may decline in value or become illiquid, which would adversely affect the senior loan's value.

Uncollateralized senior loans involve a greater risk of loss. Some senior loans are subject to the risk that a court, pursuant to fraudulent conveyance or other similar laws, could subordinate the senior loans to presently existing or future indebtedness of the borrower or take other action detrimental to lenders, including an Advisory Account, such as invalidation of senior loans.

- **Sovereign Debt Risk—**Investment in sovereign debt obligations by an Advisory Account involves risks not present in debt obligations of corporate issuers. The issuer of the debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due in accordance with the terms of such debt, and an Advisory Account may have limited recourse to compel payment in the event of a default. Any failure to make payments in accordance with the terms of the debt could result in losses to an Advisory Account.

- **Stable Value Risk**—To the extent that the strategy invests in stable value contracts, it may be subject to the risks of such contracts. Stable value contracts are benefit responsive agreements that typically impose investment restrictions on an Advisory Account in addition to any investment restrictions imposed as a result of the Advisory Account's own investment program. There is no guarantee that providers under stable value contracts will fulfill their obligations or that stable value contracts will continue to be valued at their contract value rather than market or fair value. Stable value contracts typically have long withdrawal notice periods. Moreover, stable value contract providers have increased fees and decreased the flexibility of terms they offer in the last several years and may continue to do so in the future. There can be no assurance that sufficient stable value contracts will be available in the future to replace or supplement an Advisory Account's existing contracts.
- **U.S. Government Securities Risk**—The U.S. government may not provide financial support to U.S. government agencies, instrumentalities or sponsored enterprises if it is not obligated to do so by law. U.S. government securities, including those issued by the Federal National Mortgage Association ("Fannie Mae"), Federal Home Loan Mortgage Corporation ("Freddie Mac"), and the Federal Home Loan Banks are neither issued by nor guaranteed by the U.S. Treasury and therefore are not backed by the full faith and credit of the United States. The maximum potential liability of the issuers of some U.S. government securities held by an Advisory Account may greatly exceed their current resources, including any legal right to support from the U.S. Treasury. It is possible that issuers of U.S. government securities will not have the funds to meet their payment obligations in the future. Fannie Mae and Freddie Mac have been operating under conservatorship, with the Federal Housing Finance Administration ("FHFA") acting as their conservator, since September 2008. The entities are dependent upon the continued support of the U.S. Department of the Treasury and FHFA in order to continue their business operations. These factors, among others, could affect the future status and role of Fannie Mae and Freddie Mac and the value of their debt and equity securities and the securities which they guarantee. Additionally, the U.S. government and its agencies and instrumentalities do not guarantee the market values of their securities, which may fluctuate.

RISKS THAT APPLY PRIMARILY to DERIVATIVES INVESTMENTS *and* SHORT SELLING

- **Call and Put Options Risks**—There are risks associated with the sale and purchase of call and put options. The seller (writer) of a call option which is covered (i.e., the writer holds the underlying security) assumes the risk of a decline in the market price of the underlying security below the purchase price of the underlying security less the premium received, and gives up the opportunity for gain on the underlying security above the exercise price of the option. The seller of an uncovered call option assumes the risk of a theoretically unlimited increase in the market price of the underlying security above the exercise price of the option.

The seller (writer) of a put option which is covered (i.e., the writer has a short position in the underlying security) assumes the risk of an increase in the market price of the underlying security above the sales price (in establishing the short position) of the underlying security plus the premium received, and gives up the opportunity for gain on the underlying security below the exercise price of the option. The seller of an uncovered put option assumes the risk of a decline in the market price of the underlying security below the exercise price of the option.

- **Failure of Brokers, Counterparties and Exchanges Risk**—An Advisory Account will be exposed to the credit risk of the counterparties with which, or the brokers, dealers and exchanges through which, it deals, whether it engages in exchange-traded or off-exchange transactions. An Advisory Account may be subject to risk of loss of its assets on deposit with a broker in the event of the broker's bankruptcy, the bankruptcy of any clearing broker through which the broker executes and clears transactions on behalf of the Advisory Account, or the bankruptcy of an exchange clearing house. In the case of a bankruptcy of the counterparties with which, or the brokers, dealers and exchanges through which, the Advisory Account deals, the Advisory Account might not be able to recover any of its assets held, or amounts owed, by such person, even property specifically traceable to the Advisory Account, and, to the extent such assets or amounts are recoverable, the Advisory Account might only be able to recover a portion of such amounts. Further, even if the Advisory Account is able to recover a portion of such assets or

amounts, such recovery could take a significant period of time.

In addition, although the U.S. Commodity Exchange Act, as amended, requires a commodity broker to segregate the funds of its customers, if a commodity broker fails to properly segregate customer funds, an Advisory Account may be subject to a risk of loss of its funds on deposit with such broker in the event of such broker's bankruptcy or insolvency. Also, to the extent an Advisory Account has exposure to foreign broker-dealers it may also be subject to risk of loss of its funds because foreign regulatory bodies may not require such broker-dealers to segregate customer funds.

To the extent an Advisory Account invests in swaps, derivatives or synthetic instruments, or other over-the-counter transactions in these markets, the Advisory Account may take a credit risk with regard to parties with which it trades and also may bear the risk of settlement default. These risks may differ materially from those involved in exchange-traded transactions, which generally are characterized by clearing organization guarantees, daily marking-to-market and settlement, and segregation and minimum capital requirements applicable to intermediaries.

- Forward Contracts Risks—The Advisory Accounts may enter into forward contracts and options thereon which are not traded on exchanges and are generally not regulated and there are no limitations on daily price moves of forward contracts. In addition, an Advisory Account may be exposed to credit risks with regard to counterparties with whom it trades as well as risks relating to settlement default. Such risks could result in substantial losses to an Advisory Account.
- Futures Risks—Futures positions may be illiquid because certain commodity exchanges limit fluctuations in certain futures contract prices during a single day by regulations referred to as “daily price fluctuation limits” or “daily limits.” It is also possible that an exchange or the CFTC may suspend trading in a particular contract, order immediate liquidation and settlement of a particular contract, implement retroactive speculative position limits, or order that trading in a particular contract be conducted for liquidation only. The circumstances described above could prevent BH from liquidating

unfavorable positions promptly and subject an Advisory Account to substantial losses.

- Leverage Risk—Leverage creates exposure to potential gains and losses in excess of the initial amount invested. Borrowing and the use of derivatives may result in leverage and may make an Advisory Account more volatile. When an Advisory Account uses leverage the sum of the Advisory Account's investment exposures may significantly exceed the amount of assets invested in the Advisory Account, although these exposures may vary over time. Relatively small market movements may result in large changes in the value of a leveraged investment. An Advisory Account will identify liquid assets on its books or otherwise cover transactions that may give rise to such risk, to the extent required by applicable law. The use of leverage may cause an Advisory Account to liquidate portfolio positions to satisfy its obligations or to meet segregation requirements when it may not be advantageous to do so. The use of leverage by an Advisory Account can substantially increase the adverse impact to which the Advisory Account's investment portfolio may be subject. In addition, lenders may impose restrictions or requirements on the operations of an Advisory Account. An Advisory Account may not be able to liquidate assets quickly enough to repay its borrowings, which could increase the losses incurred by the Advisory Account. Lenders may also have the right under certain circumstances to cause the sale of assets held in an Advisory Account at times that may be inopportune from a pricing standpoint. Further, in the case of an Advisory Account that invests in investment funds utilizing leverage, the rights and claims of any lenders to receive payments of interest or repayments of principal from the investment fund will generally be senior to the rights of the Advisory Account to withdraw its investment from the investment fund.
- Requirement to Perform—In contrast to exchange-traded instruments, forward, spot and option contracts and swaps do not provide a trader with the right to offset its obligations through an equal and opposite transaction. For this reason, in entering into forward, spot or option contracts, or swaps, an Advisory Account may be required, and must be able, to perform its obligations under the contract.
- Reverse Repurchase Agreements Risks—Reverse repurchase transactions involve risks that the value of portfolio securities being relinquished may decline below

the price that must be paid when the transaction closes or that the other party to a reverse repurchase agreement will be unable or unwilling to complete the transaction as scheduled, which may result in losses to an Advisory Account.

- **Risks of Derivative Investments—**Certain Advisory Accounts may invest in derivative instruments, including options, futures, options on futures, interest rate caps and floors and collars, participation notes, swaps, options on swaps, structured securities, forward contracts and other derivatives relating to foreign currency transactions. To the extent Advisory Accounts invest in these types of derivative instruments through OTC transactions, there may be less governmental regulation and supervision of the OTC markets than of transactions entered into on organized exchanges. Investments in derivative instruments may be for both hedging and non-hedging purposes (that is, to seek to increase total return), although suitable derivative instruments may not always be available to BH for these purposes. Losses in an Advisory Account from investments in derivative instruments can result from the potential illiquidity of the markets for derivative instruments, the failure of the counterparty to perform its contractual obligations, or the risks arising from margin requirements and related leverage factors associated with such transactions. Losses may also arise if an Advisory Account receives cash collateral under the transaction and some or all of that collateral is invested in the market. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation and an Advisory Account may be responsible for any loss that might result from its investment of the counterparty's cash collateral. The use of these management techniques also involves the risk of loss if BH is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates, currency prices or other variables. In addition, subject to jurisdictional limits, the Dodd-Frank Act establishes a new regulatory framework for oversight of over-the-counter derivatives transactions by the CFTC and the SEC and heightens the existing regulation of futures markets. There can be no certainty as to the final form of the requirements, and the full extent of the impact such requirements will have on the Advisory Accounts is unclear. Investments in derivative instruments may be harder to value, subject to greater volatility and more likely to be subject to changes in tax treatment than other

investments. For these reasons, BH's attempts to hedge portfolio risks through the use of derivative instruments may not be successful, and BH may choose not to hedge certain portfolio risks. Investing for non-hedging purposes presents even greater risk of loss.

- **Short Selling/Position Risk—**Short selling occurs when an Advisory Account borrows a security from a lender, sells the security to a third party, reacquires the same security and returns it to the lender to close the transaction. The Advisory Account profits if the price of the borrowed security declines in value from the time the Advisory Account sells it to the time the Advisory Account reacquires it. Conversely, if the borrowed security has appreciated in value during this period, the Advisory Account will suffer a loss. The potential loss on a short sale is unlimited because the price of the borrowed security may rise indefinitely. Short selling also involves the risks of: increased leverage, and its accompanying potential for losses; the potential inability to reacquire a security in a timely manner, or at an acceptable price; the possibility of the lender terminating the loan at any time, forcing the Advisory Account to close the transaction under unfavorable circumstances; the additional costs that may be incurred; and the potential loss of investment flexibility caused by the Advisory Account's obligations to provide collateral to the lender and set aside assets to cover the open position. An Advisory Account may also enter into a short derivative position through a futures contract, an option or swap agreement.
- **Swaps Risks—**The use of swaps is a highly specialized activity which involves investment techniques, risk analyses and tax planning different from those associated with ordinary portfolio securities transactions. Swaps may be subject to various types of risks, including market risk, liquidity risk, structuring risk, legal risk, tax risk, and the risk of non-performance by the counterparty. Swaps can be individually negotiated and structured to include exposure to a variety of different types of investments or market factors. Depending on their structure, swaps may increase or decrease an Advisory Account's exposure to commodity prices, equity or debt securities, long-term or short-term interest rates (in the United States or abroad), foreign currency values, mortgage-backed securities, corporate borrowing rates, or other factors such as security prices, baskets of securities, or inflation rates and may increase or decrease the overall volatility of the Advisory Account's portfolio.

RISKS THAT APPLY PRIMARILY *to* INVESTMENTS *in* THIRD-PARTY MANAGED FUNDS *and* ACCOUNTS

- Failure by Other Investors to Meet Capital Calls of Underlying Funds—Failure by one or more other investors to meet a capital call by a third-party investment vehicle could have adverse consequences for BH's clients. The third-party investment vehicle may be permitted to require its investors to contribute additional capital to satisfy the shortfall. If the third-party investment vehicle is unable to raise sufficient capital to consummate a proposed investment, its general partner may not be able to diversify its portfolio, which could adversely affect results of such third-party investment vehicle and could also result in the third-party investment vehicle's investments being concentrated in relatively few properties and/or regions. Furthermore, the third-party investment vehicle may not have sufficient capital to contribute capital to existing portfolio companies necessary to ensure their ongoing financial stability. If multiple investors fail to meet capital calls from a particular third-party investment vehicle, the third-party investment vehicle could default on its obligations, which could result in the termination of the third-party investment vehicle, causing a lower return, or potentially a loss, of investments by BH's clients.
- Giveback Obligations—The terms of an investment fund may require the return of distributions received from investments, potentially including distributions made prior to the time the Advisory Account became an investor in such investment fund, upon the occurrence of certain circumstances, including to satisfy any indemnification, reimbursement, contribution or similar obligation (including any obligation resulting from applicable law), or any other expense or obligation, of the investment fund. The manager of such fund may set aside amounts otherwise distributable to investors for such purpose, should they arise, and amounts set aside to fund such payments will reduce the amount of funds available for distribution to an investor or make additional portfolio investments.
- Government Investigations—In the event that a third-party manager or any current or former personnel or affiliate thereof becomes the subject of (or is otherwise involved in) any formal or informal investigation by a governmental or regulatory agency or is otherwise

suspected to have engaged in or be involved in any wrongdoing (including through reports in the press), such event may have a material adverse effect on the manager and its operations, regardless of whether such manager or other person is ultimately charged or found to have engaged in any wrongdoing, including as a result of reputational harm and the diversion of the manager's attention from its investment management responsibilities.

- Limitations on BH's Authority—Third-party managers, and not BH, typically have responsibility for the day-to-day management of the third-party investment vehicles in which Advisory Accounts may invest. BH's ability to waive or amend the investment objectives, policies, and strategies, remove, replace, or withdraw assets from a third-party manager, reallocate assets among third-party managers and vary or change the allocation of assets of an Advisory Account may be subject to the limitations imposed by the agreements with third-party managers, market conditions and applicable law. Losses may result during the time it takes BH to react to market or other conditions and comply with the required notice obligations or other contractual agreements.
- Reliance on Third-Party Managers—It is expected that BH generally will have less ability to monitor investments in third-party managers and to obtain full and current information with respect to such investments than it would have if the investments were made directly through Advisory Accounts. Success of investments in third-party managers depends upon, among other things, the ability of the third-party managers to develop and successfully implement strategies that achieve their investment objectives. Third-party managers may be recently formed and have no trading history. While BH will select and monitor the third-party managers, BH relies to a great extent on information provided by the third-party managers and may have limited access to other information regarding the third-party managers' portfolios and operations. BH relies on the expertise of the third-party managers to help identify, evaluate, underwrite, operate, manage and dispose of assets. BH's selection of third-party managers is inherently based on subjective criteria with the result that the true performance and abilities of a third-party manager may be difficult to assess. The historical performance of a third-party manager is not indicative of its future performance, which can vary considerably. Consequently, the success of BH's Advisory

Accounts that invest in third-party managers will be substantially dependent on the third-party managers and the individuals associated with such third-party managers. Should one or more of these individuals become incapacitated or in some other way cease to participate in investment decisions, BH's Advisory Accounts could be adversely affected. In addition, there is a risk that a third-party manager may knowingly, negligently or otherwise withhold or misrepresent information, including the presence or effects of any fraudulent or similar activities. Even if a third-party manager has not engaged in any wrongdoing, a third-party manager and its operations could be materially adversely affected if the third-party manager becomes the subject of (or is otherwise involved in) any formal or informal investigation by a governmental or regulatory agency or is otherwise suspected to have engaged in or be involved in any wrongdoing (including through reports in the press). BH's proper performance of its monitoring functions would generally not give BH the opportunity to discover such situations prior to the time the third-party manager discloses (or there is public disclosure of) the presence or effects of any fraudulent or similar activities. In addition, certain service providers and consultants to third-party managers may also engage in fraudulent or similar activities (e.g., the dissemination by "expert networks" of material, non-public information regarding issuers), and third-party managers may intentionally or negligently benefit from such activities. In connection with BH's ongoing review of third-party managers, BH may identify certain deficiencies with or other concerns relating to the manager. BH may decide not to terminate a third-party manager despite the identification of such deficiencies or concerns for various reasons. If the manager suffers losses during this period, Advisory Accounts could be materially adversely affected. Alternatively, BH may determine to withdraw or attempt to withdraw Advisory Account assets from a manager as a result of such deficiencies or concerns, but may be unable to do so for a significant period of time, and Advisory Accounts may be adversely affected.

- **Risks Related to Investments in Third-Party Investment Vehicles**—The acceptance of additional subscriptions by third-party investment vehicles will dilute the indirect interests of the third-party investment vehicle's existing investors (including an Advisory Account) in the third-party investment vehicle's investment portfolio prior to any such subscription, which could have an adverse impact

on the existing investors' interests in the third-party investment vehicle if such third-party investment vehicle's future investments underperform its prior investments. Furthermore, where an investment manager receives performance-based compensation, any value attributable to the fact that no performance-based compensation will be paid until gains exceed prior losses will be diluted by new subscriptions, because the new interests will participate in any positive performance until such time as gains exceed prior losses. Interests in third-party investment vehicles generally are not freely transferrable and there generally will be no secondary market for such interests. Moreover, third-party investment vehicles may impose "lock-up" periods, limited dates on which interests may be redeemed, significant redemption notice periods, percentage limits on the amount of interests that may be redeemed on any redemption date, and redemption fees. In addition, during periods of limited liquidity and higher price volatility, a third-party manager's ability to acquire or dispose of investments at a price and time that the third-party manager deems advantageous may be impaired. As a result, third-party managers may suspend, gate or otherwise limit or defer redemptions, implement holdbacks until after the completion of year-end or final audits, and place illiquid assets in "side pockets" from which investors cannot redeem even when redemptions are not otherwise suspended or deferred. Third-party investment vehicles may issue capital calls to their investors (including an Advisory Account) over a period of time. If an Advisory Account fails to fund a required capital call in respect of a third-party investment vehicle, the Advisory Account may be subject to the exercise of numerous remedies by the third-party investment vehicle, in its sole discretion. The exercise of such remedies could have a material adverse effect on an Advisory Account's investment in the third-party investment vehicle and on the value of the Advisory Account. The valuation of third-party investment vehicles is ordinarily determined based upon valuations provided by third-party managers. BH may have no ability, and has no obligation, to assess the accuracy of the valuations received in respect of investments in third-party investment vehicles. The valuations received by BH will typically be estimates only, and such valuations generally will be used to calculate the net asset value and fee accruals (to the extent applicable) in respect of an Advisory Account to the extent that current audited information is not then available. Such

valuations provided by the third-party managers may be subject to later adjustment based on valuation information available at that time, including, without limitation, as a result of year-end audits.

- **Style Drift Risk**—The managers of affiliated or unaffiliated investment funds in which an Advisory Account invests (which, in the case of affiliated investment funds, may be BH) may remove, substitute, modify or otherwise deviate from their stated investment strategies and sub-strategies or any of the types of investments being utilized by the investment fund at the time of an Advisory Account's investment in the investment fund. Unexpected changes to a manager's investment strategies may adversely affect the Advisory Account's portfolio and may result in a manager making investments in an area in which it has limited experience or knowledge.
- **Third-Party Managers and Underlying Funds Invest Independently**—The third-party managers and underlying funds in which Advisory Accounts invest make investment decisions independently of each other and may at times hold economically offsetting positions or interests in the same underlying portfolio companies, and could indirectly incur transaction costs without accomplishing any net investment result, or may be competing with each other for the same positions in one or more markets. Multiple third-party managers or underlying investment funds may hold large positions in a relatively limited number of the same or similar investments. Greater concentration of positions across multiple third-party managers or underlying funds likely will increase the adverse effect of any problems experienced in the market, sector or industry in which the positions are concentrated.

RISKS THAT APPLY PRIMARILY to REAL ESTATE INVESTMENTS

- **Bankruptcy**—Investments by Advisory Accounts in properties operating in workout modes or under Chapter 11 of the U.S. Bankruptcy Code (or similar laws in other jurisdictions) are, in certain circumstances, subject to certain additional liabilities that may exceed the value of an Advisory Account's original investment. For example, under certain circumstances, lenders who have inappropriately exercised control of the management and policies of a debtor may have their claims subordinated or disallowed or may be found liable for damages suffered by parties as a result of such actions. In addition, under

certain circumstances, payments to an Advisory Account and distributions by an Advisory Account to its investors may be reclaimed if any such payment is later determined to have been a fraudulent conveyance or a preferential payment.

- **Dependence on Property Managers and Operating Partners**—Certain real estate investments rely on the expertise of property managers who are responsible for the day-to-day management of properties and operating partners who help to identify, evaluate, underwrite, operate, manage and dispose of assets. The selection of property managers and operating partners is inherently based on subjective criteria, making the true performance and abilities of a particular property manager or operating partner difficult to assess. This reliance on third parties to manage or operate investments poses significant risks. For example, a property manager or operating partner may suffer a business failure, become bankrupt or engage in activities that compete with investments. These and other problems, including the deterioration of the business relationship between BH and the property manager or operating partner, could have a material adverse effect on the assets held by an Advisory Account.
- **Environmental Risks and Natural Disasters**—Investments in or relating to real estate assets may be subject to numerous statutes, rules and regulations relating to environmental protection. Certain statutes, rules and regulations might require that investments address prior environmental contamination, including soil and groundwater contamination, which results from the spillage of fuel, hazardous materials or other pollutants. Under various environmental statutes, rules and regulations, a current or previous owner or operator of real property may be liable for non-compliance with applicable environmental and health and safety requirements and for the costs of investigation, monitoring, removal or remediation of hazardous materials. These laws often impose liability, whether or not the owner or operator knew of or was responsible for the presence of hazardous materials. An Advisory Account may be exposed to substantial risk of loss from environmental claims arising in respect of real estate acquired with environmental problems, and the loss may exceed the value of such investment. In addition, certain investments may be located in earthquake zones or be subject to risks associated with other natural disasters, such as fire, hurricanes, tornadoes, windstorms, volcanic

eruptions, tsunamis or floods. Insurance coverage of such risks may be limited, may be subject to large deductibles or may be, or in the future become, completely unavailable, and BH will determine in its discretion whether to seek insurance coverage of (or to seek alternative ways to manage or mitigate) such risks.

- **Impact of Recessionary Environment on Real Estate Investments**—Investments in real estate may be adversely affected by deteriorations and uncertainty in the financial markets and economic conditions throughout the world. Real estate historically has experienced significant fluctuations and cycles in value and local market conditions which may result in reductions in the value of real property interests. All real estate-related investments are subject to the risk that a general downturn in the national or local economy will depress real estate prices. Recent economic developments have increased, and may continue to increase, the risk associated with investing in real estate investments. Given the volatile nature of the current market disruption and the uncertainties underlying efforts to mitigate or reverse the disruption, BH may not timely anticipate or manage existing, new or additional risks, contingencies or developments, including regulatory developments and trends in new products and services, in the current or future market environment. Such a failure could materially and adversely affect the Advisory Accounts and their investment objectives or could require Advisory Accounts to dispose of investments at a loss while such unfavorable market conditions prevail.
- **Terrorism Risk**—Terrorist attacks, in particular, may exacerbate some of the general risk factors related to investing in certain strategies, which could adversely affect the profitability of Advisory Account investments. For example, if a terrorist attack were to occur in the vicinity of a private real estate investment in which an Advisory Account is invested, it could result in a liability far in excess of available insurance coverage. Similarly, prices for certain commodities will be affected by available supply, which will be affected by terrorism in areas in which such commodities are located. BH cannot predict the likelihood of these types of events occurring in the future nor how such events may affect Advisory Account investments.
