Item 4: Advisory Business

A. Description of the Advisory Firm

Datavest Advisers, LLC (hereinafter “Datavest”) provides “robo-advisory” portfolio management services via an online interface to clients under this wrap fee program as sponsor and portfolio manager. The fee schedule is described below:

Total Assets Under Management	Annual Fees
All Assets	1.50%

Portfolio management fees are withdrawn directly from the client’s accounts with client’s written authorization.

Fees are paid in arrears. Datavest uses an average of the daily balance in the client’s account throughout the billing period, after taking into account deposits and withdrawals, for purposes of determining the market value of the assets upon which the advisory fee is based.

Clients may terminate the agreement without penalty, for full refund of Datavest’s fees, within five business days of signing the Investment Advisory Contract. Thereafter, clients may terminate the Investment Advisory Contract immediately upon written notice.

B. Contribution Cost Factors

The program may cost the client more or less than purchasing such services separately. There are several factors that bear upon the relative cost of the program, including the trading activity in the client’s account, the adviser’s ability to aggregate trades, and the cost of the services if provided separately (which in turn depends on the prices and specific services offered by different providers).

C. Additional Fees

Datavest will wrap third party fees (i.e., custodian fees, brokerage fees, mutual fund fees, transaction fees, etc.) for wrap fee portfolio management accounts. Datavest will charge clients one fee, and pay all transaction fees using the fee collected from the client.

Certain other fees are not included in the wrap fee and are paid for separately by the client. These include, but are not limited to, margin costs, charges imposed directly by a mutual fund or exchange traded fund, fees associated with “step out” transactions if the account uses different custodians or broker-dealers, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions.

D. Compensation of Client Participation

Neither Datavest, nor any representatives of Datavest receive any additional compensation beyond advisory fees for the participation of client's in the wrap fee program. However, compensation received may be more than what would have been received if client paid separately for investment advice, brokerage, and other services. Therefore, Datavest may have a financial incentive to recommend the wrap fee program to clients.

Item 5: Types of Clients

Datavest generally offers advisory services to Individuals

There is no account minimum.

Item 6: Portfolio Manager Selection and Evaluation

A. Selecting/Reviewing Portfolio Managers

Datavest will select outside portfolio managers for management of this wrap fee program.

Datavest will use industry standards to calculate portfolio manager performance.

Datavest reviews the performance information to determine and verify its accuracy and compliance with presentation standards. The performance information is annually and is reviewed by Datavest.

B. Related Persons

Datavest and its personnel serve as the portfolio managers for all wrap fee program accounts. This is a conflict of interest in that no outside adviser assesses Datavest's management of the wrap fee program. However, Datavest addresses this conflict by acting in its clients' best interest consistent with its fiduciary duty as sponsor and portfolio manager of the wrap fee program.

C. Advisory Business

Robo-Advisory Portfolio Management Services

Datavest provides “robo-advisory” portfolio management services via an online interface. This entails the use of algorithm-based portfolio management advice, rather than in-person investment advice. These automated investment solutions are customized to each client and based on individual characteristics, such as the client’s age, risk tolerance, income, and current assets, among others.

Portfolio management accounts participating in the wrap fee program will not have to pay for transaction or trading fees. Datavest will charge clients one fee, and pay transaction fees using the advisory fee collected from the client. Certain other fees are not included in the wrap fee and are paid for separately by the client. These include, but are not limited to, margin costs, charges imposed directly by a mutual fund or exchange traded fund, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions.

Accounts participating in the wrap fee program are not charged higher advisory fees based on trading activity, but clients should be aware that Datavest has an incentive to limit trading activities for those accounts since the firm absorbs those transaction costs. To address this conflict, Datavest will always act in the best interest of its clients consistent with its fiduciary duty as an investment adviser.

Services Limited to Specific Types of Investments

Datavest generally limits its investment advice to mutual funds, ETFs, Crypto Assets and Tokens. Datavest may use other securities as well to help diversify a portfolio when applicable.

Client Tailored Services and Client Imposed Restrictions

Datavest offers the same suite of services to all of its clients. However, specific client investment strategies and their implementation are dependent upon the client’s current situation (income, tax levels, and risk tolerance levels). Clients are not permitted to impose restrictions in investing in certain securities or types of securities in accordance with their values or beliefs.

Wrap Fee Programs

As discussed herein, Datavest sponsors and acts as portfolio manager for this wrap fee program. Datavest manages the investments in the wrap fee program, but does not manage those wrap fee accounts any differently than it would manage non-wrap fee accounts. The fees paid to the wrap account program will be given to Datavest as a management fee.

Amounts Under Management

Datavest has the following assets under management:

Discretionary Amounts:	Non-discretionary Amounts:	Date Calculated:
\$0	\$0	March 2019

Performance-Based Fees and Side-By-Side Management

Datavest does not accept performance-based fees or other fees based on a share of capital gains on or capital appreciation of the assets of a client.

Clients paying a performance-based fee should be aware that investment advisers have an incentive to invest in riskier investments when paid a performance-based fee due to the higher risk/higher reward attributes.

Methods of Analysis and Investment Strategies

Methods of Analysis

Datavest's methods of analysis include modern portfolio theory.

Modern portfolio theory is a theory of investment that attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, each by carefully choosing the proportions of various assets.

Investment Strategies

Datavest uses/recommends long term investing.

Datavest may recommend unusually risky investments to clients. For example, Datavest will offer non-discretionary options for investing in blockchain assets; e.g., crypto currencies and tokens. The options offered will be risk adjusted to accommodate for a given client's risk tolerance. These assets have a higher degree of volatility than traditional public equity investments.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Material Risks Involved

Methods of Analysis

Modern portfolio theory assumes that investors are risk averse, meaning that given two portfolios that offer the same expected return, investors will prefer the less risky one. Thus, an investor will take on increased risk only if compensated by higher expected returns. Conversely, an investor who wants higher expected returns must accept more risk. The exact trade-off will be the same for all investors, but different investors will

evaluate the trade-off differently based on individual risk aversion characteristics. The implication is that a rational investor will not invest in a portfolio if a second portfolio exists with a more favorable risk-expected return profile – i.e., if for that level of risk an alternative portfolio exists which has better expected returns.

Investment Strategies

Long term investing is designed to capture market rates of both return and risk. Due to its nature, the long-term investment strategy can expose clients to various types of risk that will typically surface at various intervals during the time the client owns the investments. These risks include but are not limited to inflation (purchasing power) risk, interest rate risk, economic risk, market risk, and political/regulatory risk.

Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Risks of Specific Securities Utilized

Exchange Traded Funds (ETFs): An ETF is an investment fund traded on stock exchanges, similar to stocks. Investing in ETFs carries the risk of capital loss (sometimes up to a 100% loss in the case of a stock holding bankruptcy). Areas of concern include the lack of transparency in products and increasing complexity, conflicts of interest and the possibility of inadequate regulatory compliance. Because ETFs use "authorized participants" (APs) as agents to facilitate creations or redemptions (primary market), there is a risk that an AP decides to no longer participate for a particular ETF; however, that risk is mitigated by the fact that other APs can step in to fill the vacancy of the withdrawing AP [an ETF typically has multiple APs] and ETF transactions predominantly take place in the secondary market without need for an AP. Like other liquid securities, ETF pricing changes throughout the trading day and there can be no guarantee that an ETF is purchased at the optimal time in terms of market movements. Moreover, due to market fluctuations, ETF brokerage costs, differing demand and characteristics of underlying securities, and other factors, the price of an ETF can be lower than the aggregate market price of its cash and component individual securities (net asset value – NAV). An ETF is subject to the same market risks as those of its underlying individual securities, and also has internal expenses that can lower investment returns.

Mutual Funds: Investing in mutual funds carries the risk of capital loss and thus you may lose money investing in mutual funds. All mutual funds have costs that lower investment returns. The funds can be of bond "fixed income" nature (lower risk) or stock "equity" nature.

Past performance is not indicative of future results. Investing in securities involves a risk of loss that you, as a client, should be prepared to bear.

Voting Client Securities (Proxy Voting)

Datavest will not ask for, nor accept voting authority for client securities. Clients will receive proxies directly from the issuer of the security or the custodian. Clients should direct all proxy questions to the issuer of the security.

Item 7: Client Information Provided to Portfolio Managers

All client information material to managing the portfolio (including basic information, risk tolerance, sophistication level, and income level) is provided to the portfolio manager. The portfolio manager will also have access to that information as it changes and is updated.

Item 8: Client Contact with Portfolio Managers

Datavest does not restrict clients from contacting portfolio managers. Datavest's representatives can be contacted during regular business hours using the information on the Form ADV Part 2B cover page.

Item 9: Additional Information

A. Disciplinary Action and Other Financial Industry Activities

Criminal or Civil Actions

There are no criminal or civil actions to report.

Administrative Proceedings

There are no administrative proceedings to report.

Self-Regulatory Organization (SRO) Proceedings

There are no self-regulatory organization proceedings to report.

Registration as a Broker/Dealer or Broker/Dealer Representative

Neither Datavest nor its representatives are registered as, or have pending applications to become, a broker/dealer or a representative of a broker/dealer.

Registration as a Futures Commission Merchant, Commodity Pool Operator, or a Commodity Trading Advisor

Neither Datavest nor its representatives are registered as or have pending applications to

become either a Futures Commission Merchant, Commodity Pool Operator, or Commodity Trading Advisor or an associated person of the foregoing entities.

Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests

Rob Nicholas Stone is an independent licensed insurance agent and from time to time may offer clients advice or products from those activities. Clients should be aware that these services may involve a conflict of interest; however, Datavest always acts in the best interest of the client. Clients are free to obtain these services or products through another provider and always have the right to utilize or decline the services of any Datavest representative in such individual's outside capacity.

Selection of Other Advisers or Managers and How This Adviser is Compensated for Those Selections

Datavest does not select third-party investment advisers.

B. Code of Ethics, Client Referrals, and Financial Information

Code of Ethics

Datavest has a written Code of Ethics that covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Gifts and Entertainment, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Training and Education, Recordkeeping, Annual Review, and Sanctions. Datavest's Code of Ethics is available free upon request to any client or prospective client.

Recommendations Involving Material Financial Interests

Conflict of interest situations that arise in connection with the management of the assets of clients will be handled on a case-by-case basis.

Client approval will be sought for client investment in such recommendations and, if granted, such approval will be binding. If a principal transaction arises, Datavest will only execute such transaction with the consent of the applicable client. Principal transactions are generally defined as transactions where an adviser, acting as principal for its own account or the account of a related person, buys from or sells any security to any advisory client.

Investing Personal Money in the Same Securities as Clients

From time to time, representatives of Datavest may buy or sell securities for themselves that they also recommend to clients. This may provide an opportunity for representatives of Datavest to buy or sell the same securities before or after recommending the same securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest. Datavest will always document any transactions that could be construed as conflicts of interest and will never engage in trading that operates to the client's disadvantage when similar securities are being bought or sold.

Trading Securities At/Around the Same Time as Clients' Securities

From time to time, representatives of Datavest may buy or sell securities for themselves at or around the same time as clients. This may provide an opportunity for representatives of Datavest to buy or sell securities before or after recommending securities to clients resulting in representatives profiting off the recommendations they provide to clients. Such transactions may create a conflict of interest; however, Datavest will never engage in trading that operates to the client's disadvantage if representatives of Datavest buy or sell securities at or around the same time as clients.

Frequency and Nature of Periodic Reviews

Robo-advisory portfolio management accounts are not reviewed by Datavest, save for automated allocation revisions. Clients are encouraged to update Datavest of any change in their objectives, risk tolerance, or other pertinent information.

Factors That Will Trigger a Non-Periodic Review of Client Accounts

Robo-advisory portfolio management accounts do not undergo non-periodic review by Datavest, allocations will change in accordance with the portfolio management software utilized by Datavest and changes to the client's profile.

Content and Frequency of Regular Reports Provided to Clients

Robo-advisory portfolio management clients will receive at least quarterly a written report that details the client's account including assets held and asset value, which report will come from the custodian and at least quarterly a written report from Datavest.

Economic Benefits Provided by Third Parties for Advice Rendered to Clients

Datavest does not receive any economic benefit, directly or indirectly from any third party for advice rendered to Datavest clients.

Compensation to Non – Advisory Personnel for Client Referrals

Datavest does not directly or indirectly compensate any person who is not advisory personnel for client referrals.

Balance Sheet

Datavest neither requires nor solicits prepayment of more than \$1,200 / \$500.

Financial Conditions Reasonably Likely to Impair Ability to Meet Contractual Commitments to Clients

Datavest does not have any financial condition that would impair its ability to meet contractual commitments to clients.

Bankruptcy Petitions in Previous Ten Years

Datavest has not been the subject of a bankruptcy petition.

Item 10: Requirements For State Registered Advisers
--

Please see the “*Recommendations Involving Material Financial Interests*” and “*Registration Relationships Material to this Advisory Business and Possible Conflicts of Interests*” sections above.
