Advisory Business

Dix Hills was founded in 2003 and registered as an investment adviser with the SEC in 2004. The Company is principally owned by MJB Holdings, LLC which is owned by Mr. Joseph Baggett. As of December 31, 2010 Dix Hills managed \$725 million on a discretionary basis on behalf of approximately 91 clients and \$289 million on a non-discretionary basis for 3 clients.

Dix Hills provides the following advisory services:

- ***Discretionary and non-discretionary investment advisory services to separately-managed private client accounts (“Separate Accounts”).*** Dix Hills manages its Separate Accounts’ assets based on the individual needs and objectives of each Separate Account. At the onset of a Separate Account relationship, Dix Hills identifies each Separate Account’s specific investment objectives and/or restrictions. Separate Accounts may impose restrictions on their account based on specific security type, duration range, direction and other risk parameters. All objectives and restrictions shall be contemplated in the Separate Account’s agreement with Dix Hills. Certain of the Separate Accounts are non-discretionary and, therefore, the Company provides the Separate Account with its investment recommendations and is not responsible for their implementation. In all cases, the Company is compensated fees for the assets under management on which the decision was utilized.

- ***Private investment funds (“Funds”).*** Dix Hills provides investment advisory services to private investment funds which are available only to investors who meet the definition of a “qualified purchaser” as the term is defined in the Investment Company Act of 1940. Additionally, investment objectives and restrictions for the Funds are contemplated in the relevant governing documents.
- ***Discretionary manager for wrap programs (“Wrap Clients”).*** Dix Hills serves as a portfolio manager in wrap fee programs including the Lockwood Managed Account Command Program and the World Equity Group ProActive Money Management Program. While the Company attempts to manage the Wrap Clients similarly to its other Clients, the presence of the program sponsor effectively limits the Company’s control in doing so. Wrap programs are arrangements in which investment advisory services, brokerage execution services and custody are provided by a sponsor for a single predetermined “wrap” fee (regardless of the number of trades completed by a client). Generally, clients participating in a wrap program pay a single, all-inclusive fee to the program sponsor, based on the assets under management. Dix Hills receives from the program sponsor a portion of the wrap fee for the portfolio management services it provides. The sponsor has prepared a brochure which contains detailed information about its wrap program, including the wrap fee charged. Copies of the brochure are available from the program sponsor upon request. Wrap Clients should be aware that Dix Hills will not be provided with sufficient information to perform an assessment as to the suitability of Dix Hills’ services for the Wrap Client. Dix Hills relies on the program sponsor to determine not only the suitability of Dix Hills’ services for the Client, but also the suitability of the wrap fee programs for the Client. Dix Hills does not serve as a sponsor to any wrap or similar managed account programs.
- ***Discretionary investment sub-adviser to several mutual funds (“Mutual Funds”).*** Dix Hills serves as a sub-investment adviser to open and closed end Mutual Funds advised by third parties.
- ***Discretionary and Non-Discretionary sub-advisory services to third-party advisers.*** Dix Hills provides an investment model to certain third-party advisers on a non-discretionary or discretionary basis.

The Separate Accounts, Funds, Wrap Clients, and Mutual Funds are hereto referred to as the “Clients.”

As discussed in greater detail below in the Methods of Analysis, Investment Strategy, and Risk of Loss section, a significant portion of Dix Hills’ advisory services are derived from applying the Company’s proprietary research methodology and frameworks to the US and global bond markets. Dix Hills implements the following standard investment strategies around two major Client objectives: Absolute Return and Relative Return. Strategies will generally consist of a “core portfolio” and a “overlay”, or active management component to seek alpha. Using the same proprietary methodology and frameworks, Dix Hills also manages customized strategies within certain Separate Accounts that elect for customized parameters, typically by either altering the core portfolio or customizing the overlay strategy. These overlays can be implemented by adjusting the core portfolio with cash securities or through the use of liquid futures contracts in concert with the core portfolio.

Additionally, fees for the non-discretionary services are generally based upon an advisory contract between the client and Dix Hills, reflecting the total assets that are being affected by the Dix Hills' recommendations.

Fees and Compensation

The general fees and conditions identified below are subject to change or modification based on Client or investor size, relationship, and investment objective.

Separate Accounts

Dix Hills negotiates advisory fees with each individual Separate Account which are subject to change depending on several factors, including (i) the amount of assets the Separate Account will have under Dix Hills' management, (ii) the Separate Account's investment objective/duration exposure, and (iii) whether the Separate Account is a current Client or related to a current Client with existing assets under management. In any particular circumstance, additional factors may be considered that may affect the amount of the management fee.

We seek to achieve a value-based fee structure, setting our advisory fees based on the amount of potential value we offer the Separate Accounts, which is determined by the exposure to our strategies. The fees are pro-rated based on this value, using our Alternative Treasury Strategy as the benchmark.

Dix Hills' basic annual fee schedule, which is used as a starting point for most fee negotiations for Separate Accounts is as follows:

Alternative Treasury Strategy ("ATS") – Dix Hills generally charges a 2.0% annual management fee and a 20% incentive fee based on net performance.

Dynamic Term Structure Strategy ("DTS") – Dix Hills generally charges a 2.0% annual management fee and a 20% incentive fee based on net performance.

Enhanced Treasury Strategy – Dix Hills generally charges an 80 basis points annual management fee and a 20% incentive fee based on net out-performance over the benchmark established with each Separate Account within this strategy which will be tailored to each portfolio.

Enhanced Cash Strategy ("ECS") – Dix Hills generally charges a 25 basis point annual management fee for assets managed.

Global Alpha Strategy ("Global Alpha") – Dix Hills generally charges a 2.0% annual management fee and a 20% incentive fee based on net performance.

Fees for Separate Accounts will be based on assets under management (e.g. either the account's total assets under management or the notional balance based on the IMA) and in certain cases will also include an incentive fee, which will be based on performance. The performance is determined by the relevant custodian's or futures commission merchant's records. Subject to a high-water mark, a performance fee will be applied to any net positive performance calculated for each individual Separate Account. The fee arrangements are detailed in the relevant Investment Advisory Agreement with each Separate Account. Fees are typically charged quarterly in arrears and are invoiced to the Separate Account.

Separate Accounts bear indirectly certain fees and expenses. Such fees vary, but typically include (but are not limited to) the following: (1) custodial and (2) transaction fees and costs and commissions paid to custodians, broker-dealers and other third parties. Please refer to the Brokerage Practices section for additional disclosure regarding trading costs.

Fees are pro-rated for partial periods. Separate Accounts generally may terminate advisory relationships with 5 business days prior written notice.

Funds

Investors in the Funds following the ATS strategy are charged management fees as set forth in the governing documents of the Funds. Additionally, these Funds charge a 20% incentive fee based on the net positive performance subject to a high-water mark.

Investors in the Funds following the DTS strategy are charged management fees as set forth in the governing documents of the Funds. Additionally, these Funds charge a 20% incentive fee based on the net positive performance, subject to a high-water mark.

Dix Hills Associates, LLC (“DHA”), an affiliate of Dix Hills with common ownership, provides certain administrative and management support services to the Funds. DHA receives the fees paid by certain of the Funds. On behalf of the Funds, Dix Hills has the authority to charge prorated early redemption fees on investors’ capital withdrawals made before one full year of investment. Dix Hills may, in its discretion, waive or rebate any or all of the management fee, incentive fee, or redemption fee for any capital account or shareholder without entitling other capital accounts or shareholder a similar waiver or rebate. Each Fund is responsible for all expenses attributable to it, including investment related expenses, legal expenses, accounting and audit expenses, administrative expenses, management and incentive fees, and other expenses.

The Funds may invest in other financial products that charge fees including management fees or performance fees to the Funds such as money market funds, exchange traded funds, mutual funds, or other private investment vehicles. As a result, investors will indirectly bear such fees through their investment in the Funds. Management fees are charged quarterly in arrears and incentive fees are charged annually to the Funds.

Wrap Clients

Lockwood Managed Account Command Program (Command Program) – The fee received by Dix Hills is calculated as a fixed percentage of assets under management within the Command Program. See Lockwood’s Schedule H for a description of total fees paid by the Wrap Client to Lockwood.

World Equity Group ProActive Money Management Program (ProActive Program) – The fee received by Dix Hills is calculated as a fixed percentage of the assets under management within the ProActive Program. See World Equity Group’s Schedule H for a description of total fees paid by the Wrap Client to World Equity Group.

Mutual Funds

For Mutual Funds, Dix Hills receives a portion of the total fees charged to the investors by the Mutual Fund sponsor. In all cases, Dix Hills seeks to achieve a value-based fee structure setting our advisory

fees based on the amount of potential value Dix Hills offers each fund using our ATS fee schedule as the benchmark.

Performance Based Fees and Side-by-Side Management

As stated in the Fees and Compensation section above, Dix Hills or its affiliate charges performance based fees to the Funds which are fees based on a share of capital gains on or capital appreciation of the Funds' assets.

The fact that Dix Hills is compensated based on profits may create an incentive for Dix Hills to make investments on behalf of Clients that are riskier or more speculative than would be the case in the absence of such compensation. A performance based fee also creates an incentive for Dix Hills to favor Clients that pay a performance based fee over other accounts that are charged a different fee structure. In addition, the performance based fee received by Dix Hills is based primarily on realized and unrealized gains and losses. As a result, the performance based fee earned could be based on unrealized gains that Clients may never realize. Dix Hills' strategy involves a consistent application of its investment recommendations for all Clients and therefore the risk of favoring certain Clients is mitigated.

Types of Clients

Dix Hills primarily provides customized investment advisory services to Separate Accounts of institutions globally, including pension and profit sharing plans, banking institutions, investment companies and investment advisers, corporations or business entities, state and local governments, as well as individuals and associated trusts. Dix Hills also provides investment advisory services to Mutual Funds and the Funds. When Dix Hills provides investment advice to the Funds, it does so directly to the Funds and not to the limited partners, members, or shareholders of any Fund.

Dix Hills generally requires the following minimum account size for Separate Accounts.

ATS, DTS, Global Alpha: \$50 million

Enhanced Cash Strategy: \$100 million

Enhanced Treasury Strategy: \$50 million

Funds: Investors in the Funds must commit a minimum of \$1 million in capital.

Dix Hills may at its discretion accept investments below the above amounts.

Methods of Analysis, Investment Strategies and Risk of Loss

Investment Strategy

Dix Hills manages Client accounts in accordance with investment guidelines established for each Client. As discussed in greater detail below, all of Dix Hills' advisory services are derived from its proprietary research methodology. Dix Hills implements the following investment strategies:

Alternative Treasury Strategy (ATS)

ATS is an absolute return strategy based on Dix Hills' proprietary US Duration Framework which anticipates short-term movements in US Treasury obligations. ATS' core portfolio consists of short-term cash and cash equivalents, combined with an active duration overlay. The overlay is implemented through long or short exposure to the 10 year US Treasury Note or a futures position replicating this exposure. ATS is specifically designated as the US Duration Framework set with a +/- 12 year duration band as described below.

As ATS is designed as an absolute return strategy, our internal benchmark is US short-term cash or cash equivalents.

ATS is available to Clients through fully funded or notionally funded Separate Accounts and to investors in certain Funds.

Additionally, Dix Hills can and does employ the US Duration Framework through an overlay to a core of short-term cash or other assets with a customized duration band or range greater or lesser than +/-12 years as the Client determines. These accounts can be fully funded or notionally funded at the Client's discretion.

Dynamic Term Structure Strategy (DTS)

DTS is an absolute return strategy that aims to generate positive returns by opportunistically taking exposure to fluctuations in the US Treasury term structure on a monthly basis. More specifically, the DTS strategy employs Dix Hills' US Duration and Yield Curve Frameworks.

Similar to ATS, DTS consists of a core portfolio of short-term cash instruments together with two overlays reflecting both the US Duration and US Yield Curve Frameworks. The US Yield Curve Framework is implemented via a "yield curve overlay", with positions constructed using primarily 2 Year and 10 Year U.S. Treasury Note futures or equivalents. DTS is specifically designated as an optimized blend of the US Duration Framework set with a +/- 10 year duration band combined with the US Yield Curve Framework.

As DTS is designed as an absolute return strategy, our internal benchmark is US short-term cash or cash equivalents.

The DTS strategy is available to Clients through fully funded or notionally funded Separate Accounts and to investors in certain Funds.

Global Alpha

Global Alpha is a multi-strategy portfolio that applies the Company's long-standing, fundamentally-driven philosophy for predicting US interest rate dynamics to multiple global markets that offer high liquidity. In order to maximize risk-adjusted returns, Global Alpha seeks to blend those strategies that have sufficiently low correlation.

The Global Alpha portfolio consists of short-term cash and cash equivalents, and is combined with a blend of a select set of Dix Hills' active investment frameworks employed as overlays. At the core of Global Alpha are Dix Hills' component global sovereign fixed income market frameworks. Dix Hills may add additional frameworks developed through the Company's research to the extent that they

independently demonstrate alpha generation while improving diversification of the existing Global Alpha portfolio.

As Global Alpha is designed as an absolute return strategy, our internal benchmark is US short-term cash or cash equivalents.

Global Alpha is available to Clients through fully funded or notionally funded Separate Accounts.

Enhanced Treasury Strategy I (“ETS I”)

ETS I is Dix Hills’ enhanced fixed income strategy designed for institutions seeking to outperform their core fixed income benchmark (relative return). ETS I consists of a core portfolio managed to replicate the return of the Bank of America Merrill Lynch US Treasury Master Index combined with a duration overlay. The duration overlay is effected through the active management of the core US Treasury index portfolio (or through the use of US Treasury note futures contracts), lengthening or shortening duration based on the Company’s proprietary US Duration Framework forecast each month. The duration range is bounded from 0% duration (cash like exposure) to 200% of the duration of the core bond portfolio, which for the Bank of America Merrill Lynch US Treasury Master Index is approximately 5 years in duration. The objective of ETS I is for the duration adjustment to enhance the total return over a market cycle, enabling the overall portfolio to outperform the Bank of America Merrill Lynch US Treasury Master Index, the Strategy’s benchmark.

As ETS I is designed as a relative return strategy, seeking to out-perform a portfolio made up of traditional fixed income securities, namely the Bank of America Merrill Lynch US Treasury Master Index, our internal benchmark is the Bank of America Merrill Lynch US Treasury Master Index.

ETS I is easily customized for participants by changing either the core portfolio and/or adjusting the duration band or range, all designed based on the Client’s risk/return objectives. As noted above, duration adjustment can be effected through active management of the core portfolio or through the management of 10 year US Treasury note futures with similar return expectations.

ETS I is available to Clients through fully funded or notionally funded Separate Accounts.

Enhanced Treasury Strategy II (“ETS II”)

ETS II has similar objectives to ETS I, but is designed for High Net Worth individuals. ETS II utilizes a combination of 10 year US Treasury notes and longer dated US Treasury STRIPS, to manage the duration of ETS II utilizing Dix Hills’ US Duration Framework. Alternatively, ETS II can utilize fixed income US Treasury-based ETFs as a substitute for the US Treasury securities to achieve substantially similar interest rate exposure. The range is typically set from 0% duration to 200% of the benchmark duration, which for ETS II is that of the Bank of America Merrill Lynch US Treasury Master Index. Excess cash may be invested in short-term instruments chosen by the investor. No futures are employed with ETS II.

ETS II is available through fully funded accounts associated with the Lockwood Managed Account Command Program and the World Equity Group ProActive Money Management Program. The exposure in the Lockwood program is implemented using US Treasury securities. The exposure in the World Equity Group program is implemented using fixed income exchanged-traded funds.

Enhanced Cash Strategy (ECS)

ECS is designed as an intermediate-term horizon high quality short-duration fixed income strategy that, when blended within a portfolio of shorter-term cash securities, may offer the Client enhanced returns over strictly short-term cash portfolios, while attempting to maintain low volatility as measured by standard deviation.

ECS' core portfolio consists of short-term cash or cash equivalents, ranging from 60% to 100% of total assets combined with Dix Hills' duration overlay. The duration overlay is implemented by the purchase of between 0% and 40% in 10-Year US Treasury notes or US Treasury futures contracts and adjusted on a monthly basis based on Dix Hills' US Duration Framework.

As ECS is designed as a relative return strategy, our internal benchmark is a fixed blend of 80% cash (90 day US Treasury Bills) and 20% 10 year US Treasury notes.

ECS is available through fully funded and notionally funded Separate Accounts.

Research Process

The Dix Hills methodology is based on a dynamic investment process developed to exploit the near-term predictability of interest rate movements. The foundation is a quantitative research discipline that uses precise, widely available, macroeconomic, valuation and technical variables to forecast the movement of US interest rates. Over 40 years of data incorporating these same variables was researched in developing this methodology. The research is applied to client assets each month through several portfolio applications by adjusting a portfolio's duration as generally outlined below.

Data for Dix Hills' research methodology comes mainly from government sources, such as the Federal Reserve, the Department of the Treasury, the US Department of Labor, and Bundesbank. Publicly available data from non-governmental entities such as industry trade groups and pricing data from public sources such as Standard and Poor's are also utilized. Dix Hills accesses the data either directly (via source websites) or through "data vendors" with whom it has contractual service agreements.

These factors are inputs to Dix Hills' research methodology. As a result, the Company does not rely on any third party or "Street research" to generate investment advice.

Risks

An investment in the strategies managed by Dix Hills entails a certain degree of risk and therefore should be undertaken only by Clients and investors capable of evaluating and bearing the risks that are present. Investing in securities involves risk of loss that all Clients and investors should be prepared to bear. Investing in notional accounts will magnify losses, and could result in a Client losing more than their original investment.

Disciplinary Information

Dix Hills and its employees have not been involved in any legal or disciplinary events in the past 10 years that would be material to a Client's evaluation of the company or its personnel.

Other Financial Industry Activities and Affiliations

Federated Investors, Inc. (“Federated”), an SEC registered investment adviser, owns a non-voting, minority interest in both Dix Hills and DHA. Dix Hills provides investment advisory services to Federated, its affiliates, or its clients in return for a fee. Federated provides cash management services to Dix Hills’ Separate Accounts and the Funds for which Clients or the Funds pay a fee to Federated.

Dix Hills or a related person acts as general partner or managing member to the Funds formed as limited partnerships or limited liability companies. Dix Hills or a related person also acts as investment manager to one of the Funds that is not formed as a limited partnership or limited liability company.

Dix Hills is registered with the National Futures Association as a Commodity Pool Operator and is a 4.7 exempt Commodity Trading Advisor.

One Employee of Dix Hills is a registered representative of SecureVest Financial Group, an unaffiliated broker-dealer. The Company does not execute Client transactions with SecureVest Financial Group.

Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

To avoid any potential conflicts of interest involving personal trades, the Company has adopted a Code of Ethics (“Code”), which requires, among other things, that employees:

- Act with integrity, competence, diligence, respect, and in an ethical manner with the public, clients, prospective clients, employers, employees, colleagues in the investment profession, and other participants in the global capital markets;
- Place the integrity of the investment profession, the interests of clients, and the interests of the Company above one’s own personal interests;
- Adhere to the fundamental standard that you should not take inappropriate advantage of your position;
- Avoid or disclose any actual or potential conflict of interest;
- Conduct all personal securities transactions in a manner consistent with this policy;
- Use reasonable care and exercise independent professional judgment when conducting investment analysis, making investment recommendations, taking investment actions, and engaging in other professional activities;
- Practice and encourage others to practice in a professional and ethical manner that will reflect credit on yourself and the profession;
- Promote the integrity of, and uphold the rules governing, capital markets;
- Maintain and improve your professional competence and strive to maintain and improve the competence of other investment professionals.
- Comply with applicable provisions of the federal securities laws.

The Code requires Employees to: 1) pre-clear certain personal securities transactions, 2) report personal securities transactions on at least a quarterly basis, and 3) provide Dix Hills with a detailed summary of certain holdings and accounts, upon commencement of employment and annually thereafter, over which such Employees have a direct or indirect beneficial interest. A copy of Dix Hills’ Code shall be provided to any client, investor, or prospective client or investor upon request at

no charge. A copy of the Code can be obtained by contacting Mr. William Gordon, Dix Hills' Chief Compliance Officer ("CCO") at 516-393-9135.

The Company and its related persons, including its employees, may invest their personal funds in the Funds, and, therefore, such persons may hold the same securities as other investors in the Funds. In addition, Dix Hills and its related persons may own securities in their personal accounts that are also recommended by the Company to its Clients. The Company has adopted certain policies to help assure that such trading by its personnel does not adversely affect the interests of its Clients, including pre-clearance requirements for certain personal transactions.

Mr. Joseph Baggett manages a personal "incubator account" in accordance with investment strategies that differ from those pursued in existing Client accounts. However, the incubator account may purchase and sell the same securities as Client accounts. Mr. Baggett engages in such management activities in order to develop investment products or mandates that may be suitable for Clients at some point in the future. Dix Hills understands the potential conflicts of interest associated with the investment allocation process and has undertaken to ensure a fair and equitable allocation of investments. The CCO or his designees review all such securities transactions on a regular basis.

Brokerage Practices

Dix Hills is normally granted the power and authority in its sole discretion to select brokers-dealers or futures commission merchants to execute purchases and sales of securities for the discretionary Separate Accounts and the Funds. Dix Hills' selection of trading counterparties is guided and/or limited by (i) its responsibility to act as a fiduciary when handling Clients' accounts, (ii) the disclosures and/or limitations contained in the offering documents for the Funds and (iii) its obligation, subject to the conditions specified in its disclosures and agreements with Clients or investors in the Funds, to select brokers or futures commission merchants who offer best execution on trades.

Dix Hills may negotiate commissions with broker-dealers or futures commission merchants on behalf of the Funds. While Dix Hills has the authority to select broker-dealers and futures commission merchants, typically, Dix Hills prefers to execute its Clients' futures transactions through one futures commission merchant selected by the Company. This is not the case for Wrap Clients or Separate Accounts that direct Dix Hills to use a specific broker or futures commission merchant. The execution of futures with the futures commission merchant is to help facilitate fair treatment to Clients across similar strategies. Excluding Wrap Clients, cash securities are executed via an electronic trading interface to attempt to receive best execution through a competitive bid/offer process. Dix Hills is not obligated to use the futures commission merchant and in the event that Dix Hills identifies a broker-dealer or futures commission merchant whom provides overall execution quality and price that is better than the futures commission merchant, Dix Hills will use the alternate broker-dealer or futures commission merchant. Wrap Clients should note that Dix Hills will generally execute transactions for their accounts through the wrap sponsor. In the event that Dix Hills identifies a broker-dealer which provides overall execution quality (within an operationally acceptable process) and price that is better than the wrap sponsor, Dix Hills will seek to use the alternate broker-dealer versus the wrap sponsor.

Dix Hills will accept direction from Separate Accounts or agree to limitations with respect to Dix Hills trading discretion as to which broker-dealer or futures commission merchant to be used and what commissions are to be paid. Any such direction or limitation must be in writing. Separate Accounts which, in whole or in part, direct Dix Hills to use a particular broker or futures commission merchant to execute transactions for their accounts should be aware that, in so doing, they may adversely affect

Dix Hills' ability to, among other things, obtain volume discounts on bunched orders or to obtain best price and execution, and the cost of the transaction may be greater. Separate Accounts that direct Dix Hills to use particular broker-dealers or futures commission merchants to execute transactions are responsible for negotiating commission rates with the broker. To the extent that Separate Accounts direct brokerage and negotiate their own commission rates it is possible that such Separate Accounts may have commission arrangements that are more or less favorable than other Clients. Finally, Separate Accounts that direct their brokerage should be aware that Dix Hills will generally place such trades after the completion of trades for other Clients that do not direct their brokerage. As a result, client accounts that request or are subjected to a directed brokerage arrangement may receive different outcomes as a result of differing transaction costs and timing of execution.

In connection with subscriptions by investors in the Funds, the Funds may accept subscriptions from investors who also provide services to the Funds including brokers. Relationships such as these could be viewed as creating a conflict of interest. The governing documents for the Funds do not prohibit Dix Hills from engaging in any business activities with investors who are brokers or individuals that are affiliated with brokers. As a result, Dix Hills, subject to its best execution policy, will place trades with brokers who are investors in the Funds.

In addition to the services already described, Dix Hills provides certain investment advisory services on a non-discretionary basis. Generally, Dix Hills will provide advice and/or place trades for non-discretionary accounts only after it has completed trading for its discretionary accounts.

Dix Hills seeks to execute orders for all of the participating Clients on an equitable basis. Specifically, if Dix Hills has determined to invest at the same time for more than one of the Clients, Dix Hills may place combined orders for all such Clients simultaneously. To the extent that the order is traded with the same futures commission merchant, and if any order is not filled at the same price, the prices received may be averaged. In these circumstances, each Client would pay, in connection with the acquisition of securities by more than one Client, the average price per unit acquired, which may be higher than if it had acted alone, and it may otherwise not be able to execute an investment decision as effectively as it could have if it had acted alone. To the extent that a Client directs Dix Hills to utilize a broker/futures commission merchant other than the futures commission merchant selected by Dix Hills for executions, it will not be included in an aggregated order. As a result, client accounts trading outside of the bunched orders may receive different outcomes as a result of the timing of their orders.

As a result of the differing strategies employed by Dix Hills for different Client accounts, at certain times Clients may have opposing positions in the same security.

Review of Accounts

Joseph Baggett, Portfolio Manager for the Clients, reviews portfolios at least once each calendar month and on each re-positioning date, which takes place monthly. The duration exposure or contracts outstanding may be adjusted based on asset levels or the required benchmark duration for the account or strategy. Triggering factors for the monthly re-positioning will be the monthly research analysis as well as stop loss and profit-taking transactions for risk management purposes. Stop losses are placed on ATS and DTS portfolios and profit targets may be placed on selected strategies each time a portfolio research review is executed. In addition, Mr. Baggett also executes transactions in rolling futures contracts prior to expiration.

The CCO or his designees review portfolios on a periodic and regular basis for compliance with regulatory restrictions and compliance with guidelines.

Investors in the Funds receive monthly account statements from each Fund's independent third party administrator. Monthly Composite Performance Reviews are issued by Dix Hills for all those investors in the Funds and Separate Accounts. Investors in the Funds also receive annual audited financial reports certified by independent public accountants within 120 days of the fiscal year end.

Separate Accounts receive quarterly statements outlining their fees based on their performance, all based on the Separate Account's custodial statements.

All Separate Accounts are held at the Separate Account's custodian or FCM and therefore they receive monthly statements directly from their selected custodians or FCM as agreed upon by the Separate Account and the custodian or FCM.

Client Referrals and Other Compensation

Dix Hills has entered into agreements with certain affiliated and unaffiliated third parties for the solicitation of Clients and/or Fund investors for Dix Hills. All such solicitation arrangements relating to Clients will comply with Rule 206 (4)-3 under the Investment Advisers Act of 1940. Under the terms of these arrangements, which are fully disclosed to any solicited Clients and/or investors, Dix Hills pays the third parties a portion of the fees generated by any solicited Clients and/or investors.

Custody

All Client assets are held in custody by unaffiliated broker/dealers or banks; however Dix Hills may have access to the Funds' accounts since it serves as the Managing Member of the Funds. Members of the Partnership will not receive statements from the custodian. Instead the Partnership is subject to an annual audit and the audited financial statements are distributed to each limited partner. The audited financial statements will be prepared in accordance with generally accepted accounting principals and distributed within 120 days of the partnership's fiscal year end.

Investment Discretion

Except for its non-discretionary relationships, Dix Hills has discretion to buy, sell, or otherwise acquire or dispose of securities for its Client's accounts, including the Funds. Authority to conduct transactions with discretion is provided through a limited power of attorney within an investment management agreement between a Separate Account and Dix Hills or through the governing documents of the Funds. For Separate Accounts, the investment management agreement outlines the specific types of securities to be bought or sold. The investment guidelines of the strategy set the limit of the duration range for each account, which, together with the account balance or notional account size, translates into the amount of securities allowed to be bought or sold. For the Funds, the confidential offering documents generally state that Dix Hills' authority is not limited.

Voting Client Securities

The Company's obligation to vote proxies on behalf of its Clients is limited. Typically, Dix Hills will be required to vote proxies relating to routine matters for the money market funds that are held in

Client accounts. Notwithstanding, the Company will be responsible for voting Client proxies in cases where it has discretionary authority. The Company has developed a written policy and procedures governing its activities in this area. In general, the policy requires the Company to vote Client proxies in the interest of maximizing shareholder value. In addition, the Company maintains a record of all proxy votes cast on behalf of Clients. If a material conflict of interest over proxy voting arises between the Company and the Client, the Portfolio Manager and the CCO will consider the proposal by reviewing the proxy voting materials and any additional documentation necessary in determining the appropriate vote. Separate Accounts and investors in the Funds may contact the Company for a copy of the policy or information with respect to a specific client proxy vote, at no cost.

Financial Information

Dix Hills has never filed for bankruptcy and is not aware of any financial condition that is expected to affect its ability to manage Client accounts.
