Item 4 – Advisory Business

Firm Description

R.T. Jones is a Missouri based corporation founded in 1987 and in 2004 was registered with the SEC as an investment adviser.

Principal Owners

R.T. Jones is a wholly- owned subsidiary of R.T. Jones, F.S. Ladner & Associates, Inc. Robert Jones owns more than 25% of R.T. Jones, F.S. Ladner & Associates, Inc.

TYPES OF ADVISORY SERVICES

R.T. Jones offers fee-only discretionary and non-discretionary investment management services to individuals; high net worth individuals; corporate pension and profit sharing plans, trusts, and endowments. Additionally, R.T. Jones provides fee-only non-discretionary investment advisory services to corporate retirement plans.

ERISA 3(38) INVESTMENT MANAGER

R.T. Jones also acts as the investment manager under the Employee Retirement Income Security Act of 1974 (“ERISA”) §3(38) to corporate retirement plans where it is granted discretionary authority by the Plan Sponsors to select and monitor the investment options for the Plans from those available through the Plans’ Recordkeeper, who is responsible for recording and tracking investment options for Plan participants.

R.T. Jones will develop an Investment Policy Statement (“IPS”) for the Plan. Once the IPS is established and approved R.T. Jones will review and select the investment options available through the Plan’s Recordkeeper. R.T. Jones has no authority or responsibility to determine which of the available investment options shall be Qualified Default Investment Alternative (“QDIA”).

R.T. Jones acts as an investment manager fiduciary under §3(38) of ERISA, but the Plan Sponsors are responsible for determining whether to implement R.T. Jones’ recommendations. The Plan Sponsors also retain authority and responsibility to determine whether managed account services will be made available to Plans’ participants and the managed account provider will assist in selecting investment managers for participants.

THIRD-PARTY PLATFORMS

R.T. Jones develops models that are primarily marketed and offered to third-party investment management platforms such as Trust Company of America and TCAdvisors Network, Inc. (together, “TCA”), qualified plan providers (“QPP” or “One America”), Matrix Settlement & Clearance Services, LLC an MG Trust Company (together, “Matrix”), and other third-party registered investment advisers

through a tri-party agreement. Clients obtained from other registered investment advisers that will typically have an investment advisory professional who is responsible for making investment recommendations to clients, which may include the selection of one or more of R.T. Jones' models that are available on their platform. Clients that are obtained through or whose assets are held in custody on one of these third-party investment management platforms, will not receive any individualized investment advice from R.T. Jones. Clients do not have the ability to impose restrictions on the securities or types of securities that R.T. Jones may invest in. The third-party investment adviser is responsible for the selection of the models. Clients are required to custody their accounts at TCA. Non-discretionary advisory services also are offered by R.T. Jones to pension sponsors of retirement plans ("Qualified Plan Clients") through One America and Matrix. Such non-discretionary advisory services provided by R.T. Jones to pension sponsors and plan participants include, but are not limited to, providing investment strategies, asset allocation, portfolio monitoring services, and educational materials. Discretionary investment management services also are provided by R.T. Jones directly to plan participants.

DIRECT CLIENTS

Prospective clients other than pension and corporate retirement plan clients ("Direct Clients") can also enter into a discretionary investment management services agreement directly with R.T. Jones. Direct Clients choosing this option will be required to complete a Risk Tolerance Questionnaire that will assist R.T. Jones in obtaining information about the client's investment objections so that R.T. Jones can recommend one or more of its models to the client. In general, tailored investment advice will be provided to these clients as to recommended models; however, the selection of individual securities within each model is performed on a discretionary basis by R.T. Jones and will not be individualized to the specific needs of any particular client. Furthermore, Direct Clients will not have the ability to impose any restrictions on investing in certain securities or types of securities.

DESCRIPTION OF MODELS

R.T. Jones specializes in managing models that invest in opened-ended mutual funds and ETFs. The models are described below:

Offensive Strategy:

Offensive is a long-term buy and hold approach to investing. Client assets are invested in a predetermined asset allocation that may change over time. R.T. Jones offers five offensively managed models with various risk and return expectations. The models' asset class selection and allocation is derived through the use of Modern Portfolio Theory ("MPT") modeling. The models invest in ETFs or open-ended mutual funds.

- Offensive Conservative: Highest percentage of dollars invested in bonds with small percentage in moderate risk equity asset classes.

- **Offensive Moderate:** Highest percentage of dollars invested in moderate risk equity asset classes with the remainder in bonds.
- **Offensive Growth:** Highest percentage of dollars invested in moderate risk equity asset classes with a small percentage of bonds and a small percentage of aggressive equity asset classes.
- **Offensive Aggressive:** Highest percentage of dollars invested in moderate risk equity asset classes with less concentration in aggressive equity asset classes.
- **Offensive Aggressive Plus:** Highest percentage of dollars invested in aggressive equity asset classes with a small percentage in moderate risk equity asset classes.

Defensive Strategy:

The Defensive Strategy is a short-term buy and sell approach to investing. The client may not remain fully invested in a predetermined asset allocation. R. T. Jones offers three defensively managed models with various risk and return expectations. The models asset class selection and allocation is derived through the use of MPT modeling. The models are invested within ETFs or open-ended mutual funds. Asset classes are monitored through proprietary algorithms to determine if they remain suitable for investment given current market conditions. If the algorithms determine market conditions are not suitable for an asset class(es), the clients' position will be liquidated from the asset class position(s) and reinvested within a cash alternative until the algorithms determine conditions warrant reinvestment back into the asset class(es).

- **Defensive Conservative:** Highest percentage of dollars invested in bonds with small percentage in moderate risk and aggressive equity asset classes.
- **Defensive Moderate:** Lower percentage of dollars invested in bonds and greater percentage of dollars invested in moderate risk and aggressive equity asset classes.
- **Defensive Growth:** Highest percentage of dollars invested in moderate risk and aggressive equity asset classes.

Assets Under Management

As of 03/31/2016, R.T. Jones managed approximately \$429,192,000 on a discretionary basis.

Item 5 – Fees and Compensation

The fee schedule applicable as of the date of this Brochure is as follows:

Management Fees For Direct Clients & Clients Obtained Through A Tri-Party Agreement Are Generally As Follows:

1.00% on the first \$500,000 of Account assets
 0.90% on assets between \$500,000.01 - \$1,500,000
 0.85% on assets between \$1,500,000.01 - \$2,500,000
 0.80% on assets between \$2,500,000.01 - \$3,500,000
 0.75% on assets over \$3,500,000

For clients who custody their accounts at TCA, fees are deducted from clients' assets quarterly in advance.

For clients who sign a tri-party agreement, R.T. Jones generally requires a minimum account of \$50,000 to open an account, subject to R.T. Jones' sole discretion.

Management Fees For Qualified Plan Client Assets Held In Custody At One America Are Generally As Follows:

| Client Assets – Retirement Plans | Annual Fee (%) for all assets |
|----------------------------------|-------------------------------|
| On the first \$750,000.00 | .75% (75 bps) |
| Over \$750,000.00 | .50% (50 bps) |
| QDIA Plans under \$20 million | .50% (50 bps) |
| QDIA Plans over \$20 million | .40% (40 bps) |

When R.T. Jones is serving as a 3(38) Manager on the Plan:

| Client Assets – Retirement Plans | Annual Fee (%) for all assets |
|--|-------------------------------|
| Serving as a 3(38) Manager | .50% (50 bps) |
| Serving as a 3(38) Manager and Artesys appointed as QDIA | .40% (40 bps) |

For Qualified Plan Clients obtained through One America, fees are deducted from clients' assets quarterly in arrears.

For clients whose assets are held in custody at One America, there is generally no minimum account size.

Management Fees For Clients Obtained Through Matrix:

Assets Under Management Annual
 Fee for R.T. Jones Model Portfolios 0.50% (50 bps)

For client accounts obtained through Matrix, fees are deducted from clients' assets on a daily basis.

For clients obtained through Matrix, there is generally no minimum account size.

For clients whose investments in R.T. Jones' models include mutual funds, R.T. Jones selects only open-ended mutual funds, that may have associated 12b-1 fees, and ETFs. 12b-1 fees are annual marketing or distribution fees that are generally between 0.25% and 1% of a fund's net assets. As a result, clients whose models include 12b-1 mutual funds will pay a higher fee compared to those models that include mutual funds without a 12b-1 fee.

Management Fees for ERISA §3(38) Investment Manager Services

R.T. Jones' charges an annual fee of 0.15% (15 bps) of the value of assets held by the Plan for its §3(38) investment manager services. The fee is billed quarterly, in arrears.

The Plan Sponsors can elect to pay for the (3)(38) services directly to R.T. Jones or request R.T. Jones to build the (3)(38) fees into the Plan. If the (3)(38) fees are built into the Plan, the Plan's Recordkeeper will facilitate fee calculation and collection. The fees are pro-rated intra-quarter depending on when the investment management agreement commences or terminates.

The §3(38) fee is lowered to 0.05% (5 bps) where Artesys, R.T. Jones' proprietary managed account program, is added to the Plan as a Managed Account Provider. In this case, the Plan Sponsor will execute a separate agreement appointing Artesys as a Managed Account service provider. The management fee is billed only to the Plans' participants using the service and is deducted from the participants account by the Plan's Recordkeeper.

The §3(38) fee also lowered to 0.05% (5 bps) if Artesys is added to the Plan as a Managed Account Provider to the participants and as a QDIA for the Plan. The Plan Sponsor will execute a separate agreement appointing Artesys as a Managed Account service provider and as the Plan's QDIA. The management fee is billed only to the Plans' participants using the service and is deduced from the participants account by the Recordkeeper.

The management fee discounts may incentivize the Plan Sponsors to use more of R.T. Jones' services. Additionally, R.T. Jones may select funds for the Plan based on the funds being more suitable for Artesys management approach rather than funds that performed better or are less expensive.

Other Fee Information

R.T. Jones pays a portion of its fee to TCA for TCA's services, which include but are not limited to brokerage commissions and custody fees, among other fees and expenses.

In addition, TCA will provide custody fee discounts to R.T. Jones based upon the following breakpoints:

| <u>Assets Under Custody</u> | <u>Cumulative Discount</u> |
|-----------------------------|----------------------------|
| \$50,000,000 | 5% |
| \$100,000,000 | 10% |
| \$250,000,000 | 15% |
| \$500,000,000 | 20% |
| \$1,000,000,000 | 25% |

Fees may be negotiated or waived by R.T. Jones in certain circumstances. R.T. Jones' fees may be higher than those charged by other investment advisory firms and clients may be able to obtain similar services elsewhere for a lower fee.

Investment companies (mutual funds, ETFs, etc.) in which a client's assets may be invested, charge additional management fees and other expenses, as described in the fund's prospectus. Moreover, client may be charged a custody fee by the custodian depending on where the assets are held.

Please refer to Item 12 of this brochure regarding brokerage practices.

For clients whose assets are held in custody at TCA, advisory fees are prorated for any new accounts opened during a calendar quarter. In the event that a client terminates its advisory agreement with R.T. Jones prior to the end of a quarter or a wealth management platform client ceases to be a client of the platform, the client will be entitled to receive a refund of any unearned management fees that were deducted from their custodial account. The amount of the refund will be calculated by dividing the most recent management fee by the number of days in the quarter and multiplying that figure by the number of days left in the quarter following the date of termination.

For clients whose assets are held in custody at Bank of New York Mellon, advisory fees are not prorated for any new accounts opened during a calendar quarter.

Item 6 – Performance-Based Fees and Side-by-Side Management

R.T. Jones does not charge any performance-based fees (fees based upon a share of capital gains on or capital appreciation of the assets of a client).

Item 7 – Types of Clients

R.T. Jones primarily offers its investment management services to individuals, high net worth individuals, corporate pension and profit sharing plans, trusts, endowments, and fee-only, non-discretionary pension consulting services to corporate retirement plans such as 401(k), 403(b), and 457 accounts. R.T. Jones does have requirements for opening and maintaining some accounts, such as a minimum account size, which is described in Item 5.

Item 8 – Methods of Analysis, Investment Strategies and Risk of Loss

R.T. Jones offers a series of investment models under the brand name Artesys®. These models fall into two broad investment approaches: Offensive and Defensive.

ARTESYS OFFENSIVE

Offensive is a buy and hold strategy using asset allocation. The Offensive Portfolios aim to maximize expected returns for a given level of expected risk. R.T. Jones selects no-load mutual funds and ETFs to represent each asset class and monitors the fund manager's performance. This strategy involves transactions that may result in either short- or long-term gains or losses. Dividends will vary by model. As stated in Item 5, a portion of the commissions or fees charged by the fund management companies or their affiliates may be paid to R.T. Jones, its third-party service providers for administrative services and/or its registered representatives, as described above. Additional information concerning the calculation of 12b-1 fees is set forth in a fund's prospectus relating to the mutual fund and is available upon request.

ARTESYS DEFENSIVE

Defensive is a buy and sell approach that uses proprietary algorithms designed to preserve capital. R.T. Jones selects no-load mutual funds and ETFs to represent each asset class and monitors the fund manager's performance. This strategy involves transactions that may result in either short- or long-term gains or losses. Dividends will vary by model. A portion of the commissions or fees charged by the fund management companies or their affiliates may be paid to R.T. Jones, its third-party service providers for administrative services and/or its registered representatives, as described above. Additional information concerning the calculation of 12b-1 fees is set forth in a fund's prospectus relating to the mutual fund and is available upon request.

Investing in securities involves risk of loss that clients should be prepared to bear. R.T. Jones' investment approach constantly keeps the risk of loss in mind and the firm attempts to mitigate portfolio risk.

The following is not meant to be a complete description of risks.

- Market Risk: The price of any security, including ETFs, equities, bonds or mutual funds may drop in reaction to tangible and intangible events and conditions. This type of risk is caused by external factors independent of a security's particular underlying circumstances. For example, political, economic and social conditions may trigger market events.
- Liquidity Risk: Liquidity is the ability to readily convert an investment, including ETFs, into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not.
- Interest-Rate Risk: Fluctuations in interest rates may cause investment prices to fluctuate. For example, when interest rates rise, yields on existing bonds become less attractive, causing their market values to decline.
- Reinvestment Risk: This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e. interest rate). This primarily relates to bonds.
- Call Risk: Bonds that are callable carry an additional risk because they may be called prior to maturity depending on current interest rates thereby increasing the likelihood that reinvestment risk may be realized.

- Credit Risk: The price of a bond depends on the issuer's credit rating, or perceived ability to pay its debt obligations. Consequently, increases in an issuer's credit risk, may negatively impact the value of a bond investment.
- Inflation Risk: When inflation is present, a dollar today will not buy as much as a dollar next year, because purchasing power is eroding at the rate of inflation.
- Speculation Risk: The commodities markets are populated by traders whose primary interest is in making short-term profits by speculating whether the price of a security will go up or go down. The speculative actions of these traders may increase market volatility that could drive down the prices of commodities.
- Geopolitical Risk: The world's natural resources are located in various continents and the jurisdiction over those commodities lies with sovereign governments, international companies, and many other entities. Disagreements over licensing agreements, tax structures, environmental concerns, employment of indigenous workers, and access to technology could negatively impact the price of commodities. Additionally, international disagreements over the control of natural resources could negatively impact the price of commodities.
- Currency Risk: Overseas investments are subject to fluctuations in the value of the dollar against the currency of the investment's originating country. This is also referred to as exchange rate risk.
- Foreign Market Risk: The securities markets of many foreign countries, including emerging countries, have substantially less trading volume than the securities markets of the United States, and securities of some foreign companies are less liquid and more volatile than securities of comparable United States companies. As a result, foreign securities markets may be subject to greater influence by adverse events generally affecting the market, by large investors' trading significant blocks of securities, or by large dispositions of securities, than as it is in the United States. The limited liquidity of some foreign markets may affect R.T. Jones' ability to acquire or dispose of securities at a price and time it believes is advisable. Further, many foreign governments are less stable than that of the United States. There can be no assurance that any significant, sustained instability would not increase the risks of investing in the securities markets of certain countries.
- Counterparty and Broker Credit Risk: Certain assets will be exposed to the credit risk of the counterparties when engaging in exchange-traded or off-exchange transactions. There may be a risk of loss of assets on deposit with or in the custody of a broker in the event of the broker's bankruptcy, the bankruptcy of any clearing broker through which the broker executes and clears transactions, or the bankruptcy of an exchange clearinghouse.

- Leverage Risk: Although R.T. Jones does not employ leverage in the implementation of its investment strategies, some ETPs and CEFs employ leverage. Leverage increases returns to investors if the investment strategy earns a greater return on leveraged investments than the strategy's cost of such leverage. However, the use of leverage exposes investors to additional levels of risk and loss that could be substantial.
- Manager Risk: R.T. Jones may recommend or utilize the services of other registered investment advisers in the management of client accounts, primarily to provide tactical overlay guidance or recommendations regarding asset allocations. Despite R.T. Jones' efforts, an account's value may decrease if R.T. Jones relies on recommendations received from such investment advisers that do not properly evaluate current economic conditions or do not correctly anticipate changes to economic or market conditions.
- Exchange-Traded Funds (ETFs): ETFs are typically investment companies that are legally classified as open end mutual funds or UITs. However, they differ from traditional mutual funds, in particular, in that ETF shares are listed on a securities exchange. Shares can be bought and sold throughout the trading day like shares of other publicly-traded companies and the market price for a share of an ETF may fluctuate from the value of its underlying securities. Consequently, ETF shares may trade at a discount or premium to their net asset value. This difference between the bid price and the ask price is often referred to as the "spread", which generally varies based on the ETF's trading volume and market liquidity. Although many ETFs are registered as an investment company under the Investment Company Act of 1940, some ETFs, in particular those that invest in commodities, are not registered as an investment company. When a model portfolio invests in ETFs and other investment companies, it will indirectly bear its proportionate share of any fees and expenses payable directly by the underlying ETFs or other investment company. Therefore, the client account will incur higher expenses. In addition, ETFs are also subject to the following risks (i) an active trading market for an ETF's shares may not develop or be maintained; (ii) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are de-listed from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally; or (iii) the ETFs may fail to achieve close correlation with the index that it tracks due to a variety of factors, such as rounding of prices and changes to the index and/or regulatory policies, resulting in the deviating of the ETFs returns from that of the index. Not all ETFs carry the same amount of risk (e.g., leveraged ETFs and Inverse ETFs), and certain ETFs are less liquid than others. These model portfolios allow only open-ended mutual funds that have 12b-1 fees, which will be used as payment to registered representatives who recommend to their clients one or more of these strategies.

- Exchange-Traded Notes (ETNs): An ETN is a senior unsecured debt obligation designed to track the total return of an underlying market index or other benchmark. ETNs may be linked to a variety of assets, for example, commodity futures, foreign currency and equities. ETNs are similar to ETFs in that they are listed on an exchange and can typically be bought or sold throughout the trading day. However, an ETN is not a mutual fund and does not have a net asset value; the ETN trades at the prevailing market price. Some of the more common risks associated with ETNs include the risk that the ETN issuer may be unable to repay the principal, interest (if any), and any returns at maturity or upon redemption. In addition, the trading price of an ETN in the secondary market may be adversely impacted if the issuer's credit rating is downgraded. The index or asset class for performance replication in an ETN may be concentrated in a specific sector, asset class or country and may therefore carry specific risks.
- Leveraged and Inverse ETFs, ETNs and Mutual Funds: Leveraged ETFs, ETNs and mutual funds, sometimes labeled "ultra" or "2x" for example, are designed to provide a multiple of the underlying index's return, typically on a daily basis. Inverse products are designed to provide the opposite of the return of the underlying index, typically on a daily basis. These products are different from and can be riskier than traditional ETFs, ETNs and mutual funds. Although these products are designed to provide returns that generally correspond to the underlying index, they may not be able to exactly replicate the performance of the index because of fund expenses and other factors. This is referred to as tracking error. Continual re-setting of returns within the product may add to the underlying costs and increase the tracking error. As a result, this may prevent these products from achieving their investment objective. In addition, compounding of the returns can produce a divergence from the underlying index over time, in particular for leveraged products. In highly volatile markets with large positive and negative swings, return distortions are magnified over time. Because of these distortions, these products should be actively monitored, as frequently as daily, and may not be appropriate as an intermediate or long-term holding. To accomplish their objectives, these products use a range of strategies, including swaps, futures contracts and other derivatives. These products may not be diversified and can be based on commodities or currencies. These products may have higher expense ratios and be less tax-efficient than more traditional ETFs, ETNs and mutual funds.

- VIX Futures: VIX futures are among the most volatile futures contracts. VIX futures are almost continually in a state of contango, a situation where the futures price is higher than the expected future spot price. ETFs that hold VIX futures on a continuous basis must “roll” their contracts as each expiration date approaches in order to maintain their VIX exposure. Furthermore, as VIX futures are mean reverting, which means that the futures price and the future spot price must converge, eventually the futures price must drop, the future spot price must rise or a combination of the two must occur, but usually involving some drop in the futures price. Consequently, such ETFs must generally sell VIX futures contracts about to expire at a price lower than the price at which it purchases a replacement VIX futures contract to roll their position. Ultimately, in order to generate a profit, ETFs that invest in VIX futures must generate a return that exceeds the costs of contango, which may be substantial and, consequently, ETFs benchmarked to the VIX or investing materially in VIX futures should not be expected to appreciate over extended periods of time.

Item 9 – Disciplinary Information

We are required to disclose any legal or disciplinary events that are material to a client's or prospective client's evaluation of our advisory business or the integrity of our management.

On September 22, 2015, an Order Instituting Administrative and Cease-and-Desist Proceedings was entered against R.T. Jones by the SEC. The Order found that R.T. Jones failed to adopt written policies and procedures reasonably designed to protect customer records and information, in violation of Rule 30(a) of Regulation S-P. In July 2013, R.T. Jones’ web server was attacked by an intruder who gained access to the data on the server, and as a result of the attack the personal information of R.T. Jones’ clients was rendered vulnerable to theft. To date, R.T. Jones has not learned of any information indicating that a client has suffered any financial harm as a result of the cyber-attack. R.T. Jones was ordered to pay a civil money penalty to the SEC. To mitigate future risk of cyber threats, R.T. Jones has appointed an information security manager and has adopted and implemented a written information security policy, among other measures.

Item 10 – Other Financial Industry Activities and Affiliations

R.T. Jones currently employs one individual who is also a registered representative with Moloney Securities, a SEC-registered broker-dealer.

R.T. Jones hosts an annual business conference and invites Relationship Managers (“RMs”) employed by American United Life Insurance Company and other third-party administrators of pension and retirement plans, along with their spouses, to attend. RMs typically assist plan sponsors in the enrollment process, including educating participants on plan options, one of which may be the Artesys managed account option. During the conference, R.T. Jones seeks to educate RMs about its Artesys managed account product. Attendees’ travel, lodging and meals are paid by R.T. Jones. This annual business conference may create a conflict of interest as RMs who attend at no cost may be incentivized to highlight the Artesys managed account product when making a presentation of all available retirement plan options.

Item 11 – Code of Ethics

R.T. Jones has adopted a Code of Ethics for all supervised persons of the firm describing its high standard of business conduct and fiduciary duty to its clients. The Code of Ethics includes a prohibition on insider trading, provisions requiring all of R.T. Jones’ supervised persons to comply with applicable federal securities laws, provisions requiring R.T. Jones’ supervised persons to report their personal securities transactions, and provisions requiring R.T. Jones’ supervised persons to promptly report any violations of its Code of Ethics. All supervised persons must also acknowledge the terms of the Code of Ethics annually and as amended. A copy of R.T. Jones’ Code of Ethics is available for review by clients and prospective clients upon written request.

On occasion, R.T. Jones or its supervised persons may invest in the same securities as those recommended to clients. This may create potential conflicts of interest because (1) R.T. Jones or its supervised persons may have an incentive not to recommend the sale of those securities to clients in order to protect the value of their personal investment, and (2) R.T. Jones or its supervised persons may have an incentive to place their orders before those of clients in order to obtain a better price. R.T. Jones’ Code of Ethics addresses these potential conflicts of interest by instituting a standard of business conduct for all supervised persons, by prohibiting supervised persons from effecting certain securities transactions without obtaining pre-clearance from R.T. Jones’ Chief Compliance Officer and by reviewing personal securities transactions reports filed by supervised persons for potential conflicts of interest.

Item 12 – Brokerage Practices

As discussed above, R.T. Jones' models are offered to clients through various platforms. By directing R.T. Jones to transmit trading instructions to the broker-dealer(s) associated with various platforms, clients may not receive best execution and may incur higher trading costs. R.T. Jones does not execute trades, nor does it monitor the quality of execution. R.T. Jones does review holdings in client accounts and the general performance and reliability of client custodians.

For R.T. Jones clients whose assets are held in custody at TCA, TCA provides, among other things, trade execution services. Clients agree to direct brokerage to those broker-dealers affiliated with TCA. R.T. Jones, per its agreement with TCA, has instructed TCA to direct all equity and ETF trades to KCG Americas, LLC ("KCGA"). Bond trades are executed through TCAdvisors Network Inc. R.T. Jones will not seek best execution of the client's transactions through other broker-dealers. Accordingly, the client should consider whether or not the appointment of broker-dealers by TCA may or may not result in certain costs or disadvantages to the Client as a result of possibly less favorable executions.

For R.T. Jones clients obtained through the Matrix platform, Matrix provides, in conjunction with its affiliates, the processing of trades in mutual fund and ETF shares. Clients agree to direct brokerage to those broker-dealers affiliated with Matrix. R.T. Jones will not seek best execution of the client's transactions through other broker-dealers. Accordingly, the client should consider whether or not the appointment of broker-dealers by Matrix may or may not result in certain costs or disadvantages to the Client as a result of possibly less favorable executions.

For R.T. Jones clients whose assets are held in custody at Bank of New York Mellon, clients will have their securities executed by OneAmerica's affiliated broker-dealer. R.T. Jones will not seek best execution of the client's transactions through other broker-dealers. Accordingly, the client should consider whether or not the appointment of broker-dealers by OneAmerica may or may not result in certain costs or disadvantages to the Client as a result of possibly less favorable executions.

Clients should be aware that not all investment advisers require their clients to direct trades to a particular broker-dealer. For clients whose transactions are directed to a particular broker-dealer, they may pay higher brokerage commissions, for example, because the broker-dealer may not be able to aggregate orders to reduce transaction costs, or clients may receive less favorable prices.

As a result, a client may pay more money for brokerage than he or she otherwise would.

Item 13 – Review of Accounts

PERIODIC REVIEWS

R.T. Jones informally reviews each model on a periodic basis to ensure that each model continues to conform to the respective investment strategy. With respect to individual client accounts, accounts are reviewed on at least a quarterly basis by the Investment Committee responsible for the account. More frequent reviews may be triggered by unusual market activity or upon client request. The models are rebalanced quarterly and reviewed annually for further rebalancing. Accounts for non-Direct Clients will not be reviewed, formally or informally, by R.T. Jones. All reviews will be performed by R.T. Jones' Chief Investment Officer or the lead portfolio manager.

REGULAR REPORTS

R.T. Jones makes available quarterly performance reports to its clients. Unless prohibited by the third-party investment advisory professional, and provided R.T. Jones has email address for the client, clients will receive via email a quarterly narrated/animated video covering economic overview, performances, and investment education.

For clients obtained through Matrix, R.T. Jones makes available periodic reports to its qualified plan clients, generally on a quarterly basis. Such written reports will generally include current performance summaries of the market and specific asset classes, and holdings and performance summaries for the qualified plan's positions.

Clients will receive a written statement at least quarterly from the custodian or record-keeper detailing the account holdings and transactions during the statement period.

Item 14 – Client Referrals and Other Compensation

R.T. Jones has entered into an agreement to compensate a firm for referrals made to R.T. Jones. The firm who solicits the client account will receive a percentage of the fee rate charged by R.T. Jones for managing the account. The firm's fee is in addition to the advisory fee charged by R.T. Jones. The receipt of additional compensation, in the form of referral fees paid by R.T. Jones, to the firm and/or its sales personnel creates a conflict of interest that may impair their objectivity in recommending R.T. Jones, which could cause them to refer prospective clients to R.T. Jones, who may not be suitable for R.T. Jones' services.

Item 15 – Custody

R.T. Jones does not take custody of client assets at any time. Clients will generally receive statements no less than quarterly from the custodian or record-keeper that holds and maintains the client's investment assets. R.T. Jones urges you to carefully review such statements.

Item 16 – Investment Discretion

R.T. Jones has discretionary authority, pursuant to its written investment management services agreements with clients, to determine, without obtaining specific client consent, the securities to be bought or sold, the amount of the securities to be bought or sold, the brokers or dealers through which transactions will be executed, and the amount of commissions or mark ups or mark downs paid. Clients have the ability to direct which models that their assets are invested in, but once allocated, do not have any ability to limit R.T. Jones' discretionary authority with respect to the management of those models.

Item 17 – Voting Client Securities

R.T. Jones does not have and will not accept the authority to vote client securities on behalf of its advisory clients. Clients will receive proxies directly from the issuer of the security or the custodian or the Plan's Recordkeeper. Clients should direct all proxy questions to the issuer of the security.

Item 18 – Financial Information

R.T. Jones does not require or solicit prepayment of advisory fees six months or more in advance. R.T. Jones does not have any financial commitments that might impair our current or future ability to meet our contractual commitments to clients and we have not been the subject of a bankruptcy proceeding at any time during the past ten years.
