	<p>detailed in item 1.D. The Funds' investors are generally comprised of individuals, trusts, pension plans, corporations, institutions, other private investment funds and foreign individuals and entities.</p> <p><i>Global Long/Short Equity</i> This is the Manager's primary investment strategy. The Global Long/Short Equity Strategy seeks to combine fundamental analysis with quantitative techniques to build a proprietary model which will be used to create a diversified long/short global portfolio that maximizes return while controlling risk. The strategy's core foundation is the belief that fundamentally strong companies outperform others over time. The Manager deploys modern quantitative finance techniques to differentiate between fundamentally strong and weak companies within regions combined with price action models, to create globally diverse long/short portfolios that maximize returns while controlling risk.</p> <p>3. <u>Other Types of Investments</u></p> <p>The Manager advises with respect to long and short positions primarily in publicly traded common stock, total return equity swaps and futures. The Funds have in the past and may in the future, trade a wide and expanding range of new instruments and financial products. There is no limitation on the instruments or markets which the funds may trade.</p> <p>4. <u>Other Methods of Analysis, Sources of Information and Investment Strategies</u></p> <p>The strategy's core premise is fundamental, factor-based modeling. The investment process begins with a comprehensive understanding of cutting edge research from Academics and Wall Street. Research with potential to improve the return/risk of the portfolio is tested in-house to determine if the results can be replicated. Models must have a sound fundamental basis for inclusion, and are then divided into several general categories. The resulting portfolio is a combination of over 80 research-backed, return-predicting signals in different global markets. The core of each signal is often a factor model that considers company financial reports, management behaviors, analyst opinions, stock market data, etc.</p> <p>Risks are controlled through broad diversification in investment strategies, geographical regions, holdings, trading timing, etc. Positions and trades aim to satisfy constraints regarding liquidity, market capitalization and trading volume, neutrality across a host of risk factors, and low concentration on individual names.</p> <p>5. <u>Education and Business Standards</u></p> <p>The Manager undertakes thorough background investigations of all potential portfolio managers, and all potential candidates are expected to have an education and professional background similar to that of the employees detailed in item 6 below.</p> <p>6. <u>Education and Business Background</u></p> <p>Yuanzhi Luo, born in October, 1968, is the President of LYZ Capital Advisors and the</p>

10.	<p><u>Conditions for Managing Accounts</u></p> <p>Details concerning applicable suitability criteria are set forth in each Fund's subscription agreement. Although each Fund has the authority to accept subscriptions for any lesser amount, the minimum investment in a Fund is generally \$1,000,000. Interests are only available to U.S. investors who are: (i) "qualified purchasers" within the meaning of the Investment Company Act of 1940; and (ii) "accredited investors" within the meaning of Regulation D under the Securities Act of 1933. Interests in the Offshore Fund are offered to "non-U.S. persons" within the meaning of Regulation S under the Securities Act of 1933.</p>
12.A. & 12.B.	<p><u>Investment or Brokerage Discretion</u></p> <p>The Manager buys and sells securities and other instruments for the Funds generally through the Master Fund on a discretionary basis in a manner consistent with each Fund's investment objectives and restrictions, as set forth in the governing documents of each Fund. The Manager is authorized to make the following determinations in accordance with each Fund's objectives and restrictions without obtaining prior consent from any Fund or investor: (1) securities or instruments to be bought or sold; (2) total amount of securities or instruments to buy or sell; (3) the executing broker or dealer for any transaction; and (4) the commission rates or commission equivalents charged for transactions. Due to the master-feeder structure under which the Funds are organized, most trades are placed by the Master Fund and allocated to the Funds. In the event that the Manager elects to have certain of the Funds invest directly (outside of the Master Fund), the Manager will do so in a manner that is fair and equitable taking into account tax, legal, regulatory and financial considerations. Generally, such investments will be made when circumstances dictate, such as for favorable tax treatment and/or compliance with regulatory restrictions associated with investments by foreign/domestic entities. Except as described below, portfolio transactions for the Master Fund and the Manager's other accounts are allocated to brokers on the basis of best execution. It is currently not the Manager's practice to use brokerage commissions or "soft dollars" to obtain research or brokerage services. However, the Manager may in the future use "soft dollars" to obtain research, or brokerage services that, except for services that would be a Fund expense, would constitute research and brokerage within the meaning of Section 28(e) of the Securities Exchange Act of 1934. The Manager may also direct Master Fund brokerage transactions to brokers who refer prospective investors to the Funds. In certain instances the Manager may execute over-the-counter securities transactions on an agency basis, which may result in the Fund incurring two transaction costs for a single trade: a commission paid to the executing broker-dealer plus the market maker's mark-up or mark-down.</p> <p>In certain instances the Manager may execute over-the-counter securities transactions on an agency basis, which may result in the Fund incurring two transaction costs for a single trade: a commission paid to the executing broker-dealer plus the market maker's mark-up or mark-down.</p>
