Item 4: Advisory Business

A: Firm Description

ASSET MANAGEMENT STRATEGIES, INC., ("FIRM NAME") was founded in 2005.

ASSET MANAGEMENT STRATEGIES, INC. provides personalized confidential financial planning and investment management to individuals, pension and profit sharing plans, trusts, estates, charitable organizations and small businesses. Advice is provided through consultation with the client and may include: determination of financial objectives, identification of financial problems, cash flow management, tax planning, insurance review, investment management, education funding, retirement planning, and estate planning.

ASSET MANAGEMENT STRATEGIES, INC. is strictly a fee-only financial planning and investment management firm for securities. The firm does use non-securities annuities and insurance on either a fee-only or commission basis, depending on the client needs.

Investment advice is provided, with the client making the final decision on investment selection. ASSET MANAGEMENT STRATEGIES, INC. does not act as a custodian of client assets. The client always maintains asset control. ASSET MANAGEMENT STRATEGIES, INC. places trades for clients under a limited power of attorney.

Periodic reviews are communicated to provide reminders of the specific courses of action that need to be taken. More frequent reviews occur but are not necessarily communicated to the client unless immediate changes are recommended.

Other professionals (e.g., lawyers, accountants, insurance agents, etc.) are engaged directly by the client on an as-needed basis. Conflicts of interest will be disclosed to the client in the unlikely event they should occur.

The initial meeting, which may be by telephone, is free of charge and is considered an exploratory interview to determine the extent to which financial planning and investment management may be beneficial to the client.

Principal Owners

Anthony Fiorillo is 100% stockholder.

C: Client Tailored Relationships

The goals and objectives for each client are documented in our client relationship management system. Clients may impose restrictions on investing in certain securities or types of securities.

Agreements may not be assigned without client consent.

Types of Agreements

The following agreements define the typical client relationships.

Advisory Service Agreement

Most clients choose to have ASSET MANAGEMENT STRATEGIES, INC. manage their assets in order to obtain ongoing in-depth advice and life planning. All aspects of the client's financial affairs are reviewed, including those of their children. Realistic and measurable goals are set and objectives to reach those goals are defined. As goals and objectives change over time, suggestions are made and implemented on an ongoing basis.

The scope of work and fee for an Advisory Service Agreement is provided to the client in writing prior to the start of the relationship. An Advisory Service Agreement includes: cash flow management; insurance review; investment management (including performance reporting); education planning; retirement planning; estate planning; as well as the implementation of recommendations within each area.

The annual Advisory Service Agreement fee is based on a percentage of the investable assets per the following schedule:

- 1.50% on Total Account Values up to \$499,999;
- 1.25% on Total Account Values \$500,000 to \$999,999
- 1.00% on Total Account Values \$1,000,000 and over.

The minimum annual fee is \$0. Current client relationships may exist where the fees are higher or lower than the fee schedule above. In certain circumstances, client's fees may be charged as a flat amount or per hour for specific services.

D: Wrap Fee Programs

ASSET MANAGEMENT STRATEGIES, INC. does employ a wrap fee program.

E: Client Assets under Management

Assets are invested primarily in no-load or and exchange-traded funds, usually through discount brokers or fund companies. Fund companies charge each fund shareholder an investment management fee that is disclosed in the fund prospectus. Discount brokerages may charge a transaction fee for the purchase of some funds.

Stocks and bonds may be purchased or sold through a brokerage account when appropriate. The brokerage firm charges a fee for stock and bond trades. ASSET MANAGEMENT STRATEGIES, INC. does not receive any compensation, in any form, from fund companies. In most client relationships, ASSET MANAGEMENT STRATEGIES, INC. does not pass the cost of brokerage charges on to their clients.

Investments may also include: equities (stocks), warrants, options, corporate debt securities, commercial paper, certificates of deposit, municipal securities, investment company securities (variable life insurance, variable annuities, and mutual funds shares), U. S. government securities, options contracts, futures contracts, and interests in partnerships.

Initial public offerings (IPOs) are available through ASSET MANAGEMENT STRATEGIES, INC.

Termination of Agreement

Although the Advisory Service Agreement is an ongoing agreement and constant adjustments are required, the length of service to the client is at the client's discretion. The client or the investment manager may terminate an Agreement by written notice to the other party. At termination, fees will be billed on a pro rata basis for the portion of the quarter completed. The portfolio value at the date of notice is used as the basis for the fee computation, adjusted for the number of days during the billing quarter prior to termination.

A Client may terminate any of the aforementioned agreements at any time by notifying ASSET MANAGEMENT STRATEGIES, INC. in writing and paying the rate for the time spent on the investment advisory engagement prior to notification of termination. If the client made an advance payment, ASSET MANAGEMENT STRATEGIES, INC. will refund any unearned portion of the advance payment.

ASSET MANAGEMENT STRATEGIES, INC. may terminate any of the aforementioned agreements at any time by notifying the client in writing. If the client made an advance payment, ASSET MANAGEMENT STRATEGIES, INC. will refund any unearned portion of the advance payment.

Item 5: Fees and Compensation

A: Methods of Compensation and Fee Schedule

ASSET MANAGEMENT STRATEGIES, INC. bases its fees on a percentage of assets under management, subscription fees, or non-securities insurance commissions. In certain circumstances, client's fees may be charged as a flat amount or per hour for specific services.

Fees may be negotiable.

In Illinois, unless a client has received the firm's disclosure brochure at least 48 hours prior to signing the investment advisory contract, the investment advisory contract may be terminated by the client within five (5) business days of signing the contract without incurring any advisory fees.

B: Client Payment of Fees

Investment management fees are billed quarterly, in arrears, meaning that we charge you after the three-month billing period has ended. Fees are usually deducted from a designated client account to facilitate billing.

C: Additional Client Fees Charged

Custodians may charge transaction fees on purchases or sales of certain mutual funds and exchange-traded funds. These transaction charges are usually small and incidental to the purchase or sale of a security. The selection of the security is more important than the nominal fee that the custodian charges to buy or sell the security.

ASSET MANAGEMENT STRATEGIES, INC., in its sole discretion, may waive its minimum fee and/or charge a lesser investment advisory fee based upon certain criteria (e.g., historical relationship, type of assets, anticipated future earning capacity, anticipated future additional assets, dollar amounts of assets to be managed, related accounts, account composition, negotiations with clients, etc.).

New Advisory Service Agreement fees are calculated on a formula basis and adjusted for complexity of individual situations. The formula is based on gross income, gross assets and other financial considerations.

Expense Ratios

Mutual funds generally charge a management fee for their services as investment managers. The management fee is called an expense ratio. For example, an expense ratio of 0.50 means that the mutual fund company charges 0.5% for their services. These fees are in addition to the fees paid by you to ASSET MANAGEMENT STRATEGIES, INC.

Performance figures quoted by mutual fund companies in various publications are after their fees have been deducted.

D: Prepayment of Client Fees

ASSET MANAGEMENT STRATEGIES, INC. does not accept any prepayment of client fees.

ASSET MANAGEMENT STRATEGIES, INC. does not accept any external compensation for the sale of securities to clients.

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss

A: Methods of Analysis and Investment Strategies

Security analysis methods may include charting, fundamental analysis, technical analysis, and cyclical analysis.

The main sources of information include financial newspapers and magazines, inspections of corporate activities, research materials prepared by others, corporate rating services, timing services, annual reports, prospectuses, filings with the Securities and Exchange Commission, and company press releases.

Other sources of information that ASSET MANAGEMENT STRATEGIES, INC. may use include mutual fund information, stock information and the World Wide Web.

B: Investment Strategy and Method of Analysis Material Risks

The primary investment strategy used on client accounts is asset allocation utilizing a trend following approach. We use passively-managed index and exchange-traded funds to deliver market returns for those respective markets. For fixed income markets, we may also use open-ended mutual funds. Portfolios are globally diversified to control the risk associated with traditional markets.

The investment strategy for a specific client is based upon the objectives stated by the client during consultations. The client may change these objectives at any time.

Other strategies may include long-term purchases, short-term purchases, trading, short sales, margin transactions, and option writing (including covered options, uncovered options or spreading strategies).

C: Security Specific Material Risks

All investment programs have certain risks that are borne by the investor. Our investment approach constantly keeps the risk of loss in mind. Investors face the following investment risks:

- **Interest-rate Risk:** Fluctuations in interest rates may cause investment prices to fluctuate. For example, when interest rates rise, yields on existing bonds become less attractive, causing their market values to decline.
- **Market Risk:** The price of a security, bond, or mutual fund may drop in reaction to tangible and intangible events and conditions. This type of risk is caused by external factors independent of a security's particular underlying circumstances. For example, political, economic and social conditions may trigger market events.
- **Inflation Risk:** When any type of inflation is present, a dollar today will not buy as much as a dollar next year, because purchasing power is eroding at the rate of inflation.
- **Currency Risk:** Overseas investments are subject to fluctuations in the value of the dollar against the currency of the investment's originating country. This is also referred to as exchange rate risk.
- **Reinvestment Risk:** This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e. interest rate). This primarily relates to fixed income securities.
- **Business Risk:** These risks are associated with a particular industry or a particular company within an industry. For example, oil-drilling companies depend on finding oil and then refining it, a lengthy process, before they can generate a profit. They carry a higher risk of profitability than an electric company, which generates its income from

a steady stream of customers who buy electricity no matter what the economic environment is like.

- **Liquidity Risk:** Liquidity is the ability to readily convert an investment into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not.
- **Financial Risk:** Excessive borrowing to finance a business' operations increases the risk of profitability, because the company must meet the terms of its obligations in good times and bad. During periods of financial stress, the inability to meet loan obligations may result in bankruptcy and/or a declining market value.
