Item 4 - Advisory Business

Ziegler Capital Management, LLC ("ZCM", "we", "us", "our"), provides discretionary investment supervisory services and other advisory services to a wide variety of clients.

In a transaction that closed November 30, 2013, ZCM became a wholly owned subsidiary of Stifel Financial Corporation ("Stifel"). Stifel is a financial services holding company whose stock is publicly-traded on the New York Stock Exchange under the symbol SF. As of February 28, 2014, ZCM has statutory assets under discretionary management of \$4,557,336,704. ZCM also has assets under advisement, primarily through Unified Managed Account ("UMA") programs, of \$162,268,451.

The advisory services of ZCM are described in detail below.

Discretionary Supervisory Services

ZCM provides investment management services to clients based upon the individual needs of each client. The services involve managing each client's account on a continuous basis and purchasing and selling investments in the account as ZCM's professional staff deems necessary by using discretionary authority granted to ZCM by the client. Types of securities managed include stocks, bonds, mutual funds, and ETFs. Clients are obtained by direct solicitation or referred by consultants.

ZCM also manages portfolios not involving continuous investment supervisory services. These services are provided when ZCM is retained to perform a particular function not involving specific knowledge of other assets of the client. An example of such a service is the management of an institution's bond portfolio, but not other securities within the client's investment portfolio.

The initial investment and asset allocation recommendations are based on the financial information gathered from each client including a complete Investment Policy Statement, investment restrictions requested by the client, and overall financial condition. Based on this information, the client is provided with initial investment recommendations designed to provide an appropriate asset mix consistent with the client's objectives. The client's portfolio and its performance are then monitored by the client's ZCM Client Service Representative ("Client Service Rep"), consistent with the client's stated goals and objectives. The frequency of these reviews and transactions made for a client's account are determined by the Client Service Rep. Clients are free to contact their Client Service Rep at any time if they have questions about their accounts.

ZCM does not assure or guarantee the results of its Discretionary Supervisory Services. Thus, losses can occur from following ZCM's advice pertaining to any investment or investment approach, including using conservative investment strategies.

Other Advisory Services

ZCM also provides other advisory services to high net worth individuals, corporations, endowments/foundations, retirement plans, and retirement plan participants. These

advisory and consulting services include: helping formulate client investment objectives; identifying risk tolerance characteristics; developing investment policy statements; creating asset allocation strategies driven by the policy or risk profile; searching for suitable investment managers, mutual funds and/or investment products (e.g., stocks and bonds) to implement these strategies; and continuous monitoring, evaluation and reporting on client accounts.

Investment managers of client accounts may also be investment advisers to mutual funds recommended to clients, thus have a conflict of interest when recommending these funds to clients. ZCM intends to base recommendations on the best interests of its clients. Although ZCM believes its services are competitively priced, clients may be able to obtain similar advisory services at lower prices if purchased elsewhere.

Additionally, in cases where mutual funds shares are purchased, clients should be aware that they will pay both a direct management fee to ZCM for purposes of selecting, monitoring, and recommending the liquidation of mutual fund share and indirect management and other fees through the mutual fund which pay an investment adviser for management of assets within the particular fund. See Fees and Compensation below for detail.

Services to Mutual Fund

ZCM provides investment management and related services to the Ziegler Strategic Income Fund (the "Fund"), a mutual fund registered under the Investment Company Act of 1940.

Paula Horn and Sergio Castellon serve as the investment managers to the Fund, and continuously manage the Fund assets based on the investment goals and objectives as outlined in the Fund's prospectus.

Interested investors should refer to the Fund's prospectus and Statement of Additional Information ("SAI") for important information regarding objectives, investments, time-horizon, risks, fees, and additional disclosures. These documents are available on-line at www.zcmfunds.com.

Prior to making any investment in the Fund, investors and prospective investors should carefully review these documents for a comprehensive understanding of the terms and conditions applicable for investment in the Fund.

Services to Unaffiliated Mutual Funds

ZCM acts as an investment adviser to the following unaffiliated mutual funds within the Nationwide Family of Funds ("Nationwide Ziegler Funds"):

- Nationwide Ziegler Wisconsin Tax Exempt Fund
- Nationwide Ziegler NYSE Arca Tech 100 Index Fund
- Nationwide Ziegler Equity Income Fund

Interested investors should refer to the prospectus and Statement of Additional Information ("SAI") for important information regarding objectives, investments, time-

horizon, risks, fees, and additional disclosures for each Nationwide Ziegler Fund. These documents are available on-line at www.nationwidefunds.com.

ZCM acts as a sub-advisor to the Azzad Ethical Fund, part of the Azzad Financial family of funds. Interested investors should refer to the Azzad Ethical Fund's prospectus and Statement of Additional Information ("SAI") for important information regarding objectives, investments, time-horizon, risks, fees, and additional disclosures. These documents are available on-line at www.azzadfunds.com.

In addition, ZCM acts as sub-advisor to the NexGen US Dividend Plus Funds offered by NexGen Financial, a Canadian mutual fund company. Interested investors should refer to the information available at www.nexgenfinancial.ca for important information regarding objectives, investments, time-horizon, risks, fees, and additional disclosures.

Prior to making any investment in any mutual fund, investors and prospective investors should carefully review these documents for a comprehensive understanding of the terms and conditions applicable for investment in that fund.

Advisory services for individually managed accounts

We manage, on a discretionary basis, portfolios consisting of marketable debt and equity securities, commodities, currencies, and other such instruments. We may manage both the underlying assets as well as options and futures positions. Some of these positions generally are used for "hedging" purposes and are designed to reduce, but not necessarily eliminate, the risk of fluctuation in interest rates or other attributes of assets or liabilities maintained in various client portfolios. All of our research is conducted internally. Clients may impose restrictions on investing in certain securities or types of securities. We manage client portfolios in accordance with their investment policies and use reasonably available resources to comply with investment restrictions, when applicable.

Additionally, we also design and construct specialized portfolios and provide consulting services tailored to meet specific client mandates. We also act as a "Qualified Professional Asset Manager" (QPAM) under the Employee Retirement Income Security Act of 1974 (ERISA), providing requested guidance on specific transactions related to particular assets of employee benefit plan investors.

Advisory services for Wrap Fee programs and Model Investment portfolios

ZCM acts as a discretionary investment manager for one or more non-affiliated or affiliated broker-sponsored wrap fee programs. We provide asset management services to clients that select ZCM to manage their accounts through their respective wrap sponsor. We manage the program accounts in accordance with their investment policies and will use reasonably available resources to comply with investment restrictions, when applicable. There may be differences in the performance of wrap portfolios among ZCM clients and

other institutional accounts invested in similar strategies we manage for other clients, resulting from differences in the number of securities held in the portfolio, cash availability, investment restrictions, account sizes, tax considerations, and other factors. The program sponsor generally pays ZCM a fee based on assets managed in connection with the program. The fees we receive in connection with wrap programs may vary from fees charged to other clients and between wrap programs. For our services, we receive a portion of the total wrap fee charged by the wrap sponsor.

We also provide model investment portfolios ("Models") to various outside financial institutions. The Models contain our current investment recommendations as to the composition of a portfolio that would be appropriately purchased for the account managed in accordance with the relevant investment strategy. The recommendations generally reflect the investment recommendations and security weightings simultaneously being made for our discretionary institutional and high-net worth clients within the same investment strategy. The financial institution may implement our model recommendations on its own trading platform for the clients that have chosen to participate in the program. The financial institution may choose to implement some or all of our recommendations in terms of both the securities and/or the weightings. As securities and weightings change in the model, those modifications are communicated promptly to the financial institutions that are using our model program. There is no requirement that the Models be administered as it is provided, or at all, and we do not monitor or supervise the Model administered by the outside institutions. The performance of our discretionary accounts and those of the Models using the same investment strategy may differ for these and other reasons.

Advisory services for Commodity Futures Portfolios

ZCM is registered with the Commodity Futures Trading Commission as a Commodity Trading Advisor ("CTA"), and is a member of the National Futures Association. As such, we may advise clients with respect to investment in commodity futures contracts and options thereon, including without limitation, financial instruments, equity index futures, and other tradable positions available on recognized futures exchanges.

Item 5 - Fees and Compensation

ZCM bases its investment management fees on a percentage of assets under management. Generally, we provide advisory services on an individualized basis, based on the particular needs of each client. Accordingly, fees will be negotiated with each individual client depending on the nature of services to be provided, the type of client, other assets the client may have invested with us, and other relevant factors.

We generally have established investment advisory fees in accordance with the schedules below. Fees are for advisory services only, unless otherwise indicated. We will directly invoice clients for investment management fees. Fees are generally payable quarterly in advance at the beginning of each calendar quarter and are based on the market value of the assets under management. For accounts beginning at other times, pro-rata billing at the end of the initial quarter will be followed by regular quarterly billings. We may amend our fee schedule with our advisory contracts.

Discretionary Supervisory Services Fee

Non-investment company clients compensate ZCM on a quarterly basis for its account management services in accordance with the following fee schedule, which is based upon the types of securities managed and value of those securities:

<i>Equity Accounts</i>	<i>Annual Fee</i> 1.00%	
<i>Balanced Accounts</i>	<i>Annual Fee</i> 1.00% 0.75%	<i>Account Size</i> First \$5,000,000 Assets over \$5,000,000
<i>Fixed Income Accounts</i>	<i>Annual Fee</i> 1.00% of assets	
<i>Enhanced Cash Accounts</i>	<i>Annual Fee</i> 0.50% of assets	

These fees represent the maximum fees charged. Fees are negotiated on a relationship basis. While the fee schedules above represent the majority of the products and services offered to most of our clients, there are specialized products and/or services provided based on specific client mandates for which there is no set fee schedule. Fees for those accounts are not represented in this document and generally are negotiated with the client on a case-by-case basis.

Depending on the account, nature of investment strategy and/or the volatility in the size of the account based upon withdrawals or additions, ZCM will charge an advisory fee for its management services using one of the following three calculations:

1. In Advance. A quarterly fee will be billed in advance based on the account asset value on the last business day of the previous quarter and will become due the following business day. If additional cash or securities or other investments in excess of 20% of the prior quarter ending market value are accepted for management during the first two months of any quarter, an additional fee, pro-rated for the number of days remaining in the fee period and covering the total value of the accepted assets, will be charged and will become due on the date of such acceptance.

If the Agreement is terminated, a refund prorated from the date of termination through the end of the billing period will be made. No fee adjustment will be made during any fee period for appreciation or depreciation in account asset value during

that period, and no adjustment or refund will be made for partial withdrawals of account assets.

2. In Arrears. The quarterly renewal fee is billed in arrears for the previous quarter based upon the account asset value on the last business day of the previous quarter and is due the following business day. If the account terminates, the account is charged the pro-rata fee for the time services were provided during the quarter. If assets are withdrawn during the quarter, ZCM may prorate the fee for the time services were provided during the quarter prior to the withdrawal.
3. Averaging. Using this method, the management fee for the first calendar quarter is calculated on the average capital base of the assets placed under its supervision and determined as of the last day of the calendar quarter. The average capital base is calculated using the beginning of market value of the account and adding to this value the time-weighted net contributions and withdrawals of capital during the quarter in order to determine the billable asset value. Management fees charged by ZCM on subsequent calendar quarters will be calculated on the average capital base of the account as determined at the close of business on the last business day of each calendar quarter. Such fees shall be calculated using the prior quarter-end market value, and adding to this value the time-weighted net contributions and withdrawals of capital during the last quarter to determine the billable asset value.

Fees are charged on the billable asset value at the following annual rates, and one quarter (1/4) of the annual fee is payable as of the close of each calendar quarter. Termination of an advisory agreement can occur upon written notice by either party to the other and becomes effective in 30 business days after the notice date.

Other Advisory Service Fees

Fees for these other advisory services are negotiated and depend upon the complexity and nature of the assignment. Asset based fees are typically billed quarterly, in advance, unless other arrangements are negotiated. The client and ZCM have the right to terminate the agreement upon 30 days written notice. Any unearned prepaid fees are prorated and returned to the client. The client pays agreed upon expenses due but not paid.

We also provide investment advisory service to an affiliated open-end mutual fund and private investment partnerships. We have arrangements with other advisory firms where we have discretionary authority over client assets, however, we are not the client's primary adviser and instead act in a sub-advisory capacity. Fee arrangements with these accounts are generally negotiated individually based on the needs of the client, size of the account and services provided to such accounts.

The fee schedules above do not apply to Separately Managed Account ("WRAP") or Unified Managed Account clients. More information about ZCM's billing practices is detailed in the Investment Management Agreement. Clients should review the fees and billing practices with ZCM.

Additional Fee Information

Clients may generally terminate their investment advisory agreement within five business days of signing the agreement. Thereafter, the advisory agreement typically will be cancelable on 30 days notice. Clients receive a refund of a portion of any fees paid in advance, prorated based on the number of days in any quarterly period after termination.

Clients may incur other expenses while having their investments managed by us including brokerage transactions costs and custodial fees that are separate and distinct from our advisory fees. We do not reduce our advisory fees to offset commissions charged for brokerage services or fees charged by clients' custodians.

We do not accept compensation for the sale of securities or any other investment products, including service fees from the sale of mutual funds. We strive to be an independent advisor at all times and always put clients' interests first. Our brokerage practices are discussed in more detail in Item 12, Brokerage Practices. Clients with individually managed portfolios have the option of purchasing the investment products we recommend through other brokers and agents with no affiliation to us.

Each prospective and existing management client should carefully consider the following information about management services and contact their ZCM account manager if they have any questions.

1. Each mutual fund in which a client's assets may be invested also pays its own advisory fees and other expenses (including 12(b)-1 fees) which already have been deducted from the fund's reported performance and, depending on the fund, a client may be able to invest directly in the shares issued by a mutual fund with or without incurring any sales or advisory service fees. In addition, there are tax effects pertaining to fund share redemptions made by ZCM on behalf of clients. Redemptions are taxable events that may accelerate the recognition of capital gains, and frequent redemptions may result in short-term, rather than long-term capital gains.
2. Each alternative investment fund in which a client's assets may be invested also pays its own advisory fees and other expenses that already have been deducted from the fund's reported performance. Investors can expect fees for the underlying alternative investment funds to be higher. Depending on the fund, a client may be able to invest directly in the fund shares with or without incurring any sales or advisory service fees.
3. The amount of fees paid by clients receiving management services will vary from client to client based on the type of account and investment needs of the client. Thus, clients receiving similar advisory services will pay different fees.
4. Although ZCM believes its management services are competitively priced, clients may be able to obtain similar services at lower prices if acquired elsewhere.

Item 6 - Performance Based Fees and Side-by-Side Management

Equity Portfolios Fees

Clients choosing a performance based fee arrangement for management of their equity portfolios are charged two types of fees for services, an asset-based fee calculated as a negotiated asset-based fee, the other a performance fee. A description of the asset-based fee and performance fees follows:

1. **Asset-Based Fee.** The annual asset-based fee is calculated as a percentage of the assets under management. The annual fee is up to .25% of the average month-end market values of the net assets in the account, payable quarterly after services are provided. The fee, which does not include transactions costs, is deducted from the account quarterly. The base fee for any partial quarter is prorated based on the number of days services were provided during the quarter.
2. **Performance Fee.** In addition to the base fee described above, clients agree to pay ZCM a quarterly performance fee up to 30% of the amount of the excess total return if the account exceeds the total return of the S&P 500. The performance fee for any partial quarter is prorated and a maximum annual performance fee may be established. Other performance fee limitations may also apply. The following paragraphs describe how the performance fee is calculated.

In determining market value (i) any unrealized profit or loss on open positions is included, (ii) brokerage commissions on open positions are considered accrued in full upon the initiation of such open positions and deducted in determining the market value, and (iii) all asset-based fees are deducted from market value if and when accrued.

Total return of the account is the change in quarter-end market value calculated by use of the time-weighted rate of return method. The total return of the account is calculated net of all fees. ZCM, or other third party, in the sole discretion of the client, calculates the total return of the S&P 500. The period from the performance measurement commencement date through the end of the first fully completed quarter is the quarterly performance measurement period. Upon completion of the period, performance starts anew for the next quarterly period and continues to restart on a quarterly basis. The period from the performance measurement commencement date through the end of the fourth fully completed quarter is the annual performance measurement period.

The performance fee is calculated by taking the total return of the account for the performance measurement period in excess of the total return of the S&P 500 for the same period multiplied by the performance fee rate established by contract (currently up to 30%). Losses are carried forward to the next billing periods and must be offset before any performance fee is paid. ZCM may, at its option, establish a maximum annual performance fee. If it does, the cumulative quarterly performance fees may not exceed the maximum annual performance fee. In addition, ZCM may also establish other performance fee maximums that relate to the life of the account.

This performance fee arrangement may create an incentive for ZCM to make investments that are more risky or more speculative than might be the case in the absence of a fee based on performance. Clients should be aware that, by using this fee method, ZCM may receive

increased compensation with regard to unrealized appreciation as well as realized gains in the account.

Clients agreeing to a performance-based fee must represent to ZCM that the client (i) is a natural person or a company (as defined in paragraphs (b)(2) and (g)(1) of Rule 205-3 of the Investment Advisers Act of 1940), who immediately after entering into this Agreement has at least \$750,000 under management of ZCM; or (ii) is a natural person or company whose net worth (exclusive of home) at the time the contract is entered into exceeds \$1.5 million (either alone or held jointly with such person's spouse).

All fees are negotiable and generally will not exceed amounts quoted in the preceding schedules, but may under certain circumstances. Employees (and relatives) of ZCM and affiliates typically receive a discount from the preceding schedules.

Item 7 - Types of Clients/Minimum Account Size

ZCM makes its advisory services to a wide variety of clients including, but not limited to, individuals, investment companies, pension and profit sharing plans, trusts, estates, charitable organizations, corporations and other business entities, employee benefit plans, foundations, trusts, high net worth individuals, wrap and model portfolio platforms, and investment companies. ZCM may also act as a sub-adviser to affiliated or unaffiliated open-end investment companies.

The minimum fee may be negotiated. In general, individually managed accounts are subject to a \$5,000,000 minimum. In WRAP platform accounts, minimum investment sizes range from \$50,000 to \$100,000. Outside of WRAP programs, ZCM's minimum fee per account is \$10,000. ZCM may, in its sole discretion, waive its minimum account size and/or minimum fee based upon certain criteria (e.g., historical relationship, type of assets, anticipated future earning capacity, anticipated future additional assets, dollar amounts of assets to be managed, related accounts, account composition, negotiations with clients, etc.).

The minimums set forth above may be waived for mutual fund and variable annuity commission paying accounts. These guidelines apply only at the start-up of an account and may be waived or changed at the discretion of the firm during the life of the account. There are no restrictions placed on maintaining the account after start-up. All fees are subject to negotiation, but the minimum fee will not exceed the quoted amount. We may, at our discretion, accept accounts below the minimum investment provided certain conditions are satisfied.

Item 8 - Methods of Analysis, Investment Strategies and Risk of Loss

ZCM has a long-term investment horizon. Investing in securities involves the risk of loss that clients should be prepared to bear. ZCM does not have a single strategy or program that is utilized for all advisory clients. Rather, strategies adopted for, or recommended to, particular clients are based on the individual needs and objectives of each client. Client portfolio parameters may vary due to the industry in which the client is involved or the goals for the portfolio (e.g., maximizing current income, asset preservation, or attainment of a certain yield over a defined period of time). Despite this relative diversity in clients' needs and objectives, ZCM frequently utilizes common portfolio management strategies, where applicable, to manage similar portfolios with similar needs and objectives in similar ways.

Equity Strategies

In general, ZCM's equity strategies seek to invest in companies with strong financials that appear to have favorable prospects for capital growth. ZCM uses quantitative models and fundamental analysis to look for companies within the strategy's defined capitalization range that appear to have the potential for more rapid price appreciation than other stocks in the target index and the overall stock market in general. ZCM will generally sell a portfolio security when the portfolio managers believe 1) the security has achieved its value potential; 2) changing fundamentals signal a deteriorating value potential; or 3) other stocks have a better performance potential.

ZCM's equity strategies are intended for investors who are willing to withstand the risk of short-term price fluctuations in exchange for potential long-term capital appreciation. ZCM tries to diversify client risks by investing in a wide array of equity securities across different market sectors.

Fixed Income Strategies

On the fixed income side, ZCM focuses on using a fundamental, bottom-up analysis to identify securities.

The fixed income strategies emphasize high credit quality and high current income consisting primarily of liquid, investment grade fixed income instruments. ZCM may seek to actively manage fixed income strategies by varying sector weights, adjusting the duration in relation to anticipated risk, engaging in strategic yield curve positioning, and selecting securities that ZCM's portfolio managers believe are attractively valued.

Red Granite Growth Strategy

Accounts managed by the Red Granite Growth Team generally follow a strategy of long term purchases (securities held at least one year) and short term purchases following the Red Granite large cap growth or large cap balanced strategy. The Red Granite strategy includes investing in typically high quality companies with persistent earnings growth. The Red Granite team uses fundamental analysis, bolstered by technical analysis, charting, and cyclical analysis.

The main sources of information include financial newspapers and magazines, inspections of corporate activities, research materials prepared by others, corporate rating services, annual reports, prospectuses, filings with the Securities and Exchange Commission, and company press releases. Red Granite's experienced research analysts also prepare original, proprietary research reports that are shared with the Investment Committee and the portfolio managers.

Additionally, the Red Granite team follows the GICS (Global Industry Classification Standard) scheme for classifying companies by sector. Red Granite acknowledges that GICS is not the only classification scheme the investment industry uses. In rare instances, a company may fall into different sectors depending on the classification service, and as such Red Granite may agree with its categorization by a non-GICS service. For reporting purposes, Red Granite shows the security aligned with its GICS code while through the investment thought process, the Red Granite team may view that company as being more consistent with a different sector. This can create a situation where portfolio reports show sector exposures marginally above limits referenced in marketing material.

Red Granite does not service speculators seeking to profit through short-term trading. Rather, Red Granite provides advice and management for investors desiring long-term investments. Significant changes in economic or market conditions may precipitate short-term trading activity.

Quantitative Research Strategy

ZCM has developed a proprietary multi-factor quantitative model to evaluate equity securities called the Quantitative Research Strategy ("QRS"). Through QRS, ZCM uses a portfolio optimization program to produce a portfolio that closely reflects the risk characteristics of the benchmark, while providing for the expected excess returns generated by the stocks' assigned alphas. The portfolios are constructed within a prescribed risk range, measured by the portfolio's annualized predicted tracking error relative to the benchmark.

The QRS approach captures investor overreaction to past events by screening a broad (investable) universe of stocks and grouping the stocks into either "bargain," "glamour," or "neutral" categories. The strategy constructs portfolios that are more heavily allocated toward "bargain" stocks and away from "glamour" stocks. Neutral stocks are used to manage the risk of the portfolio relative to the benchmark index.

Bargain stocks are those stocks with the lowest historical growth in sales revenue and a high cash flow to price (CF/P) multiple and represent 20% of the investable universe. Glamour stocks are those stocks with the highest historical growth in sales revenue, and a low CF/P multiple and represent 20% of the investable universe. The remaining 60% of the stocks in the investable universe are categorized as neutral.

ZCM's main sources of information include, but are not limited to, financial newspapers and magazines, inspections of corporate activities, research materials prepared by others,

corporate rating services, annual reports, prospectuses, public filings and company press releases.

Neither ZCM, nor the third party managers it may secure, guarantee the results of the advice given. Thus, significant losses can occur by investing in any security, or by following any strategy, including conservative investments and strategies recommended or applied by ZCM.

Risk of Loss

All investment programs have certain risks that are borne by the investor. Our investment approach constantly keeps the risk of loss in mind. Investors face the following investment risks:

- **Interest-rate Risk:** Fluctuations in interest rates may cause investment prices to fluctuate. For example, when interest rates rise, yields on existing bonds become less attractive, causing their market values to decline.
- **Market Risk:** The price of a security, bond, or mutual fund may drop in reaction to tangible and intangible events and conditions. This type of risk is caused by external factors independent of a security's particular underlying circumstances. For example, political, economic and social conditions may trigger market events.
- **Inflation Risk:** When any type of inflation is present, a dollar today will not buy as much as a dollar next year, because purchasing power is eroding at the rate of inflation.
- **Currency Risk:** Overseas investments are subject to fluctuations in the value of the dollar against the currency of the investment's originating country. This is also referred to as exchange rate risk.
- **Reinvestment Risk:** This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e. interest rate). This primarily relates to fixed income securities.
- **Business Risk:** These risks are associated with a particular industry or a particular company within an industry. For example, oil-drilling companies depend on finding oil and then refining it, a lengthy process, before they can generate a profit. They carry a higher risk of profitability than an electric company, which generates its income from a steady stream of customers who buy electricity no matter what the economic environment is like.
- **Liquidity Risk:** Liquidity is the ability to readily convert an investment into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not.
- **Financial Risk:** Excessive borrowing to finance a business' operations increases the risk of profitability, because the company must meet the

terms of its obligations in good times and bad. During periods of financial stress, the inability to meet loan obligations may result in bankruptcy and/or a declining market value.

- 1) The stated investment strategy may not achieve the strategy's objective because our analysis was flawed and we do not implement the strategy effectively.
- 2) Securities may decline significantly in price over short or extended periods of time. Price changes may occur in the market as a whole, or they may occur in only a particular company, industry, or sector of the market. Smaller capitalization stocks are likely to be even more volatile in price than the stock market as a whole. Debt securities are interest-rate sensitive and may be subject to price volatility due to various factors including, but not limited to, changes in interest rates, market perception of the creditworthiness of the issuer, and general market liquidity.
- 3) Markets may be illiquid or disrupted, and external events may negatively affect the value of a specific company.
- 4) Fraud, for which no amount of analysis can be sufficient.

Item 9 - Disciplinary Information

There is no material disciplinary information to report regarding itself or any of its associates or other related persons.

Item 10 - Other Financial Industry Activities and Affiliations

As set forth above, ZCM is a wholly-owned subsidiary of Stifel. Stifel is a financial services holding company whose stock is publicly-traded on the New York Stock Exchange under the symbol SF. The Stifel affiliated group of entities includes registered broker-dealers and/or other registered investment advisers. These affiliates include Stifel Nicolaus & Company, Incorporated; Century Securities Associates, Inc.; Thomas Weisel Capital Management LLC; Thomas Weisel Global Growth Partners LLC; Missouri Valley Partners, Inc.; Montibus Capital Management LLC; Choice Financial Partners, Inc.; Keefe, Bruyette & Woods, Inc.; and Miller Buckfire & Company, LLC.

ZCM provides investment management services to accounts in Stifel Nicolaus wrap fee programs. Stifel Nicolaus' wrap fees generally do not vary on the basis of the managers selected. As a result, when the end-wrap client selects ZCM out of all other available options under the Stifel Nicolaus wrap platform, the total portion of the wrap fees that is retained by the Stifel affiliated group will be higher than when the wrap client selects an unaffiliated adviser.

Stifel Nicolaus may act as a selling broker and/or placement agent for investment funds managed by ZCM, or may act as underwriter or placement agent in connection with the public or private sales of securities owned by a ZCM advisory client. In addition, from time to time, Stifel Nicolaus may separately provide other services to ZCM's clients and/or to the issuers of securities held in ZCM's portfolios. In such instances, Stifel Nicolaus generally will

be paid customary fees for its services. In each such case, the client will receive appropriate disclosure of the affiliated relationship between Stifel Nicolaus and ZCM.

From time to time, ZCM may use research provided by our affiliate, KBW in formulating our Strategies. Clients are not charged separately for the value of such research.

As noted above in Item 4: Advisory Business, ZCM is the investment adviser to the Ziegler Strategic Income Fund, a registered mutual fund trustee at US Bancorp. From time to time, ZCM may recommend that Clients buy or sell shares of the Ziegler Strategic Income Fund, the Nationwide Ziegler Funds, the Azzad Ethical Fund, or the NexGen US Dividend Plus Funds. While ZCM endeavors at all times to put the interests of Clients first as part of its fiduciary duty, Clients should be aware that ZCM's receipt of compensation for managing these funds itself creates a conflict of interest.

ZCM has adopted policies and procedures designed to address conflicts, including policies restricting ZCM's trading in a security when an affiliate notifies ZCM that the affiliate has material non-public information about the security and/or issuer. As a result, ZCM may not be able to dispose of a security at a favorable time or take advantage of investment opportunities that would be available to it but for its affiliation with such affiliates. As set forth above, ZCM generally does not use affiliated brokers for execution and/or custody except with client consent and/or in the case of mutual funds, in compliance with the requirement of Rule 10f-3 of the Investment Company Act of 1940, as amended, (the "1940 Act"). In addition, a ZCM employee or an affiliate's employee can only invest or withdraw assets from an investment account or mutual fund managed by ZCM at a time when other unaffiliated customers could do the same.

ZCM is registered with the Commodity Futures Trading Commission as a Commodity Trading Advisor ("CTA"), and is a member of the National Futures Association. A brief description of our activity as a CTA can be found under Item 4, Advisory Business.

Item 11 - Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

ZCM has adopted and enforces a Code of Ethics ("Code") in accordance with Rule 204A-1 of the Advisers Act and Rule 17j-1 of the Investment Company Act of 1940. All employees are subject to the Code. The Code is designed to prevent the misuse of material, non-public information by ZCM or any of our employees. The Code sets forth specific provisions relating to personal and proprietary securities transactions, outside business activities, and confidentiality.

ZCM's employees are permitted to invest for their own accounts, which may include investment in our products. ZCM or our related persons may buy or sell securities for their own accounts that are bought or sold for client accounts. This creates a conflict of interest because the employees of the firm may have an incentive to execute their orders in front of our clients. To mitigate this conflict, the Code imposes restrictions (e.g., black out periods,

restricted securities, and watch lists) on trading in securities that are held or may be held in client accounts. Any exceptions to the above must be pre-approved by the Chief Compliance Officer ("CCO"). Such approval will be given only where it is clear that the proposed activity could not create a conflict of interest or harm, disadvantage, or deprive any client of an opportunity. In the event of a conflict of interest, the foremost consideration is what is in the best interest of the client.

Personal and proprietary securities transactions are analyzed with the use of software specially designed to administer the pre-clearance and monitoring of employee trading in relation to client holdings and transactions. Additionally, all employees are subject to mandatory quarterly transaction and annual holdings certifications. The Code also requires that all employees electronically certify on an annual basis that they have read and understand the Code and have disclosed all personal securities required to be reported.

Access persons of the registered mutual fund that we advise also are subject to the restrictions and reporting requirements of Rule 17j-1 of the Investment Company Act of 1940.

A copy of the ZCM Code of Ethics is available upon request by contacting the Chief Compliance Officer, at 312-368-1442 or by sending a written request to: Ziegler Capital Management LLC, 20 N. Clark Street, 34th Floor, Chicago, IL 60602, Attention: Chief Compliance Officer.

Item 12 - Brokerage Practices

Account Funding

Once any Client account is initially funded, or additional assets are deposited into a Client account over which ZCM has investment discretion, the account will be traded within a 24-hour period. The actual funding of the account will serve as explicit authorization that the account is active and should be traded. This is applicable for all accounts, including any wrap accounts.

Investment or Brokerage Discretion

ZCM generally has discretion over client accounts, which includes a determination of which positions are to be established; the total amount to be purchased or sold; which broker, dealer or futures commission merchant will effect such transactions; and the commission rate(s) at which the transactions will be effected.

Contracts with some clients, however, contain specific restrictions regarding, among other things, the size and type of individual stock investments relative to total assets; other restrictions regarding the type of securities in which the client may invest; the nature of the issuer of such securities; and credit and other quality standards. Each client is responsible for informing us in writing of the investment objectives and cash needs of the account and of any changes or modifications made to its investment objectives, as well as any specific

investment restrictions applicable to its account. Unless such investment restrictions and guidelines are based on specific, objective criteria (e.g., prohibitions on purchasing a specific security identified by CUSIP number, ticker symbol or some other clear security identifier), we will be responsible only for using our commercially reasonable efforts to comply with the client's investment restrictions and guidelines. Except for violations of the duty of care stated in the client agreement, we are not responsible or liable for any good faith deviations from the investment objectives, restrictions and guidelines, especially where investment objectives, restrictions and guidelines involve non-specific or subjective criteria. The client must give prompt written notice if the client deems any investments made for the account to be in violation of the client's objectives or restrictions. Unless the client notifies us in writing of specific restrictions, the investments made on behalf of the client's account are deemed unrestricted.

ZCM maintains solicitation arrangements with brokerage firms that also executes trade placed by our equity department. As indicated below, we generally effect and allocate brokerage transaction consistent with principals of "best execution." Nevertheless, although we believe that clients referred to us through this solicitation arrangement are not being charged any additional advisory fees as a consequence of the relationship, it is possible that our other clients may be absorbing somewhat higher brokerage commissions payable to brokers which also provide solicitation services to us than would have been the case in the absence of this solicitation arrangement. It also is possible that we might have a greater incentive to execute more transactions with brokerage firms that also refer clients or private fund investors to us. Similarly, brokerage firms that provide both solicitation and execution services to us may have an incentive to refer more clients to us than would otherwise be the case in order to induce us to direct more brokerage business to those firms.

Directed Brokerage and Broker Selection

Our clients may provide us with written direction to effect all, or a portion, of their portfolio transactions through particular broker/dealers. We believe that our clients are more likely to receive the best results on transactions executed for their accounts where we are not limited in selecting the executing broker. Such a direction to utilize a particular executing entity may be conditioned by the client on the broker/dealer being competitive as to price and execution of each transaction, or may be subject to varying degrees of "restrictions" (i.e., an instruction to utilize the broker or dealer whether or not competitive, or at specified levels of commission or commission discounts which are less favorable than we might otherwise attain). In the case of "restricted" designations, we generally will execute transactions in listed equity securities through the designated broker/dealer. On the other hand, unless the client has specifically directed that the designated broker be utilized for all transactions, without exception and regardless of the possible economic disadvantage to the client, we sometimes will not follow such general direction when, in our judgment, the designated broker/dealer will not afford the best price and execution. The following describes the manner in which transactions for Directed accounts will be handled, and it provides important information regarding Directed Brokerage arrangements in general:

- Clients that maintain Directed Brokerage arrangements, including WRAP programs and other similarly situated clients, may in some instances, not participate in aggregated or bunched orders, and in such cases, the client's order will generally trade after the aggregated or bunched order, and may trade last.
- We may or may not be able to achieve best execution when we are directed to use a client's Directed Broker depending on the Directed Broker the client has instructed us to use, the proportion of brokerage the client has instructed us to direct, the securities that we are buying or selling for the client account, and/or the fees that client has agreed to pay to the Directed Broker.
- We will not negotiate commission rates with the client's Directed Broker.
- Directed Brokerage accounts may not generate the same returns as similar, non-directed accounts in the same strategy due to the disadvantages discussed above.

In the event of non-directed brokerage arrangements, we will choose the broker/dealer through which transactions will be effected for customer accounts. Several factors are considered in selecting an executing entity, including but not limited to, particular expertise in the type of position or transaction; access to relevant markets and prior experience with such executing entity; and commission charge. We may also consider research and/or brokerage services available from the entity. After considering the factors we believe are relevant to the services, we may determine to pay a commission in excess of that which the executing entity might have charged for effecting the same transaction in recognition of the value of research or brokerage services provided. If securities orders are placed with broker/dealers that do not make a market in a particular security, such order subsequently may be executed with or through a market maker in that security. In such event, there may be a mark-up/down on the price of the security in addition to the commissions or other fees paid to the clients' broker/dealers and custodians.

Soft Dollars

In determining whether to effect clients' brokerage transactions through brokers/dealers who provide us with "brokerage or research products or service" as that term is used in Section 28(e) of the Securities and Exchange Act of 1934, we review (i) whether the product or service is an eligible product or service under Section 28(e); (ii) whether the product or service provides us with lawful and appropriate assistance; and (iii) whether, in good faith, the commission is reasonable in consideration of the value received from the product or service. Furthermore, ZCM is also compliant with the CFA Institute's Soft Dollar Standards.

Although we will, whenever possible, allocate brokerage to broker/dealers providing both best execution and soft dollar credits, the commissions paid to such executing entities are expected to be comparable to those paid to other broker/dealers not providing ZCM with research or brokerage services. Moreover, we believe that soft dollar credits we receive

from broker/dealers, viewed in terms of a particular transaction or our overall responsibility to all of our clients, are reasonable, although it is impossible to assign a precise monetary value to such research and execution services. Research services and other data received as a result of the soft dollar credits may relate to a specific transaction but, for the most part, will consist of a wide variety of information, products and services useful to our clients and us.

Generally, we seek to obtain proprietary research products and services, which include a broad variety of financial and related information and services. These products and services assist the portfolio managers in the decision-making process as it relates to client portfolios and may include research related to information concerning market, economic and financial data; a particular aspect of economics or on the economy in general; statistical information; data on pricing and availability of securities; financial publications; electronic market quotations; performance analytics; analyses concerning specific securities, companies, industries or sectors; and market, economic, financial studies and forecasts; and computer databases and quotation equipment.

We may also obtain brokerage products or services related to the connectivity between our trade order management system and our broker/dealers and various execution venues, as well as market data used in certain trading applications and order routing.

We may acquire soft dollar benefits that assist us in rendering advice inuring to the overall benefit of all of our clients or to the benefit of certain of our clients. For example, it is possible that certain equity accounts may bear a disproportionate soft dollar "cost" for research primarily benefiting fixed income clients. We believe, however, that the soft dollar transactions we undertake are generally fair to our clients in terms of which clients benefit from the research and which clients bear the cost of such research.

For accounts other than those that are prohibited from using soft dollars for anything but research services, we may accumulate and use soft dollars to acquire products or services that go beyond the Section 28(e) safe harbor. The receipt of non-research related products and services creates an inherent conflict of interest in that the use of client commissions to acquire non-research applications may incentivize us to effect more client transactions than necessary in order to acquire such products and services and to select brokers based on an interest in obtaining the products and services rather than based on the clients' interest in obtaining best execution. Additionally, we benefit by using client commissions to pay for non-research products and services because those are items that we otherwise might be required to pay for directly. Such products or services may include, but are not limited to, computers or terminals; client reporting and accounting services; client dedicated hardware, software and programming services; proxy voting services; and other products or services that facilitate both pre- and post-trade client account management.

Soft dollar credits received from accounts that do not permit soft dollar usage outside of the Section 28(e) safe harbor will not be used toward non-research services, although those accounts may benefit from the products or services purchased with soft dollars. Accounts that do not permit soft dollar credit outside of the Section 28(e) safe harbor are

those managed on behalf of insurance companies, ERISA plans, and registered investment companies, including the funds in the Ziegler Capital Management Investment Trust. Additionally, certain accounts that are not restricted by law may instruct ZCM that any soft dollar credits received can only be used for those items that fall within the Section 28(e) safe harbor. If a product or service is a mixed-use item, we take the conservative view and pay for the item with soft dollar credit generated outside the Section 28(e) safe harbor. The ratio of the amount of commissions required to be paid in order to earn one dollar of soft dollar services generally is 2:1.

Order Aggregation and Allocation

It is our practice, when feasible, to aggregate orders for a number of client accounts for execution as a single transaction in order to seek a more advantageous net price or more favorable overall execution. The benefit, if any, obtained as a result of such aggregation is generally allocated pro rata among the accounts of the clients that participated in the aggregated transaction. However, in the case of a client that has restricted us to a particular broker/dealer with respect to transactions for that client account and has specified a particular commission rate for such transactions, the client account generally will be unable to participate in aggregated orders. Further, where such client account does participate in an aggregate order executed with the client's designated broker, the client's specification of a particular commission rate will preclude that client from receiving the benefit, if any, of a lower net price resulting from the aggregation. In those circumstances, the accounts of other clients participating in the aggregated order may receive a correspondingly greater benefit.

When directed brokerage accounts or wrap accounts cannot be aggregated with transactions for our other clients, such client's orders will generally trade after the aggregated order in a random rotation with other similar orders and may trade last.

Cross Transactions

In addition, ZCM may periodically arrange for transactions between advisory accounts with similar investment objectives. Such transactions usually accommodate a client wishing to sell an investment by arranging for the other client to buy the investment. When recommending and effecting such "cross transactions," ZCM may have a conflict of interest, particularly where a limited market exists for the security, because the client-buyer's or the client-seller's financial interests may differ at the time of the transaction. However, ZCM will not recommend any cross transaction unless it believes it is suitable for both the client-buyer and client-seller. In determining the reasonableness of prices for cross transactions, ZCM will examine the market for the particular investment including, where available, obtaining current bid and ask information on the security from an unaffiliated broker, and ZCM will make a determination as to what it believes to be a fair price at the time based on the information so obtained. Because cross transactions often involve investments that are less liquid, current price information may not be readily available.

Item 13 - Review of Accounts and Reports

ZCM reviews all managed accounts on an ongoing basis. A complete performance monitoring report is furnished to most clients at least quarterly. Quarterly performance reports detail assets under management and performance analysis from current quarter, year-to-date and since inception. An appraisal report, which includes a list of all securities in the portfolio, is also provided. Client meetings are available upon request.

The portfolio management team reviews Client portfolios at multiple levels. Portfolios are continuously monitored to ensure they are positioned correctly versus the benchmark based on the current investment strategy. Portfolio performance attribution is performed to understand the sources of return. A review of portfolio performance to composite performance is performed monthly to ensure that any deviations are explained. Compliance personnel also review Client portfolios on a routine basis in connection with the firm's policies and procedures. Finally, ZCM utilizes software programs to monitor Client portfolios in light of their investment guidelines.

The agreement between the client and ZCM for other consulting services defines the nature of reports and account reviews and their frequency. Normally, each report includes information regarding investment results, in the absolute and relative to appropriate peer groups and benchmarks over a variety of time periods.

Item 14 - Client Referrals and Other Compensation

ZCM may also enter into agreements with and compensate firms and individuals that refer prospective clients to the firm. Typically, payments for referrals are a flat annual retainer, a percentage of the customary advisory fee received by ZCM from the referred client, or a combination of the two. Thus, a referred client pays no additional fee to ZCM. Each referred client is provided with details regarding the referral arrangement before the client signs an advisory agreement with the firm. Such arrangements create a conflict of interest for the person or firm making the referral because of the fee the person or firm will receive for making the referral.

ZCM negotiates compensation on a case-by-case basis with non-related entities that refer clients. In all cases, such marketing arrangements comply with Rule 206(4)-3 under the Advisers Act.

Item 15 - Custody

ZCM does not take custody of client funds or securities; it only provides investment management services. Client account assets must be held by a bank, trust company, broker-dealer, or other entity designated and appointed by the client.

To the extent a client receives any account or other investment ownership or transaction statement from ZCM, ZCM recommends the client carefully compare the information in the report to that in the custodian's statements and alert ZCM of any discrepancy. Annually,

ZCM sends letters to custodians and clients to confirm that clients are, in fact, receiving custodial statements.

Item 16 - Investment Discretion

For most managed accounts, ZCM is granted discretionary authority by the client to buy and sell securities, including mutual funds, in the quantities and at the times it deems appropriate without obtaining the prior consent of the client before each transaction. The firm also offers such services on a nondiscretionary basis. Clients may place written limitations on the percentage of portfolio securities invested in each issuer and each industry segment.

ZCM currently serves as investment manager to a number of clients, including investment companies. The firm strives to cause purchase and sale transactions to be allocated among clients in such manner as it deems equitable. In making such allocations, the main factors considered are the respective investment objectives, the relative size of portfolio holdings of the same or comparable securities, the commitments generally held, and opinions of the persons responsible for managing client accounts.

Through the exercise of its discretionary authority, ZCM may purchase various forms of government agency notes, FMHA loans, SBA loans and other forms of government fixed income securities when it believes such investments are suitable for a client's account. Although U.S. government agency securities have not been subject to credit risk (the failure by the agency to pay principal or interest when due), they are subject to interest rate and liquidity risk. The value of interest rate sensitive investments, including government note and loan pools recommended by ZCM, will decline with a rise in interest rates, especially for those securities whose interest reset date is further away from the date of the rise in interest rates. Thus, loss of principal can occur even though the United States government thereon, guarantees ultimate payment of the face amount, and interest. Also, brokers who sell such investments generally are not required to establish a "secondary" market for the securities. Even if a secondary market does exist, there can be no assurance that the market will be sufficiently active to allow for the purchase and sale of client securities at acceptable prices at the time. Thus, ZCM may not be able to sell a particular investment out of a client's account at an acceptable price at the time the client may wish to raise cash, or for any other reason.

ZCM makes available to its investment advisory clients an overnight investment vehicle that seeks to produce returns exceeding other overnight investment options generally available in the marketplace. The vehicle is a repurchase agreement between ZCM acting as agent, and a securities broker/dealer. Under the Repurchase Agreement, the broker-dealer (the "Counterparty") "sells" to ZCM, individual loans ("Loans") whose payment is guaranteed by the full faith and credit of the United States and securities ("Securities") secured by pools of these guaranteed Loans. The Securities and Loans are issued through the U.S. Small Business Administration. At the time the Counterparty sells the Loans and Securities to ZCM the Counterparty obligates itself to repurchase the Loans and Securities on the next business day at a slightly higher price, hence the name "Repurchase Agreement."

These Loans and Securities, despite the government guarantee, do present risks related to liquidity; that is, the price paid for a particular Loan or Security may be less than ZCM's purchase price because of movements in prevailing interest rates, supply and demand in the marketplace, and other factors. In the event the Repurchase Agreement Counterparty fails to repurchase the Loans and Securities upon ZCM's demand, ZCM will work with the custodian to sell the SBA Loans and Securities and deliver the resulting cash to its clients. In the event that the SBA Loans and Securities could not be sold in the marketplace for a price at least equal to the Counterparty's repurchase obligation, ZCM reserves the right to deliver the Loans and Securities into its client's accounts.

ZCM does not have authority or responsibility to pursue, maintain, participate in or defend any claims, proceedings, causes of action, suits or disputes on behalf of a client, the plan, the trustee or the account. The client will need to provide ZCM with all additional powers of attorney and other documentation, if necessary, to appoint ZCM as agent and attorney-in-fact with respect to the account, but such powers will not authorize ZCM to take any action not authorized in the Investment Management Agreement.

Item 17 - Voting Client Securities

Pursuant to various provisions of the Investment Advisers Act of 1940, ZCM acts in a fiduciary capacity with respect to each of its advisory clients and, therefore, we must act in the interest of the beneficial owners of the accounts we manage. We understand that it is our fiduciary duty to vote proxies and that proxy voting decisions may affect the value of shareholdings. In the case of employee benefit plans, the power to vote proxies lies exclusively with the plan trustee or named fiduciary, unless the power has been delegated to ZCM. In the absence of specific voting guidelines or directives from a client, we will typically vote proxies in accordance with Egan-Jones Ratings Co. ("Egan-Jones") recommendations utilizing Broadridge to electronically manage and maintain voting records. Egan-Jones recommendation guidelines are not exhaustive, do not address all potential voting issues, and do not necessarily always correspond with the opinions of ZCM. Therefore, there may be instances where ZCM may not vote the client's shares in accordance with Egan-Jones guidelines. In the event that ZCM believes the Egan-Jones recommendation is not in the best interest of shareholders and on those matters for which Egan-Jones does not provide a specific voting recommendation, ZCM will determine how to vote the proxies. All proxies by an issuer will typically be voted in the same manner for all clients, unless there is a conflict of interest or client guidelines dictate otherwise.

At times, proxies may be solicited by a company in which ZCM has, or is seeking, a business relationship or in which some other conflict of interest may be present. Accordingly, when ZCM believes that a particular vote to be cast on behalf of a client presents a potential material conflict of interest, ZCM will report the matter to its legal counsel and seek guidance as to how the vote should be cast.

Our proxy voting process is dynamic and subject to periodic review. Reflecting this ongoing process, our judgment concerning the manner in which the best economic interest

of the shareholders is achieved can and has changed over time based on additional information, further analysis, and changes in the economic environment. Our policy may be revised in its discretion to address any such changes.

We manage accounts on behalf of a diverse group of clients, including ERISA plans, state and local government funds, unions, corporations, socially conscious funds, and charitable foundations. From time to time, clients may desire that the proxies be voted differently from our Proxy Voting Policy. In such cases, the client either may retain the right to vote their proxies or may direct us to vote proxies on their behalf. Consequently, it is possible that we may vote proxies for the same securities differently for different clients.

We maintain records of proxy voting in accordance with the Investment Advisers Act of 1940, and will furnish proxy voting records regarding a client's securities if so requested by the client. Additionally, a copy of our current proxy voting policies and procedures will be provided upon request. Clients may request copies of their proxy voting records by calling the firm's Compliance Department at 312-368-1442 or by sending a written request to: Ziegler Capital Management LLC, 20 N. Clark Street, 34th Floor, Chicago, IL 60602, Attention: Compliance.

Item 18 - Financial Information

Because ZCM does not require prepayment of client fees more than six months in advance, the firm is not required to provide financial statements. ZCM does not have any financial condition that is reasonably likely to impair its ability to meet its contracted commitment to any client.

PRIVACY POLICY

It is the policy of ZCM to maintain the security and confidentiality of all customer information. We do not sell or make available personally identifiable customer information to non-affiliated parties. This policy covers all types of personally identifiable customer information, including among other things, personal and financial information provided by customers at the time they open accounts, ongoing transactional activity within accounts, and other personal or financial data furnished to ZCM by customers in the course of the account relationship. These policies apply to all our customers.

As permitted by law and in order to service your account(s) with our firm, ZCM does provide personally identifiable customer information described above to certain third party service providers and custodians of investment advisory accounts. In each case, we have received assurance from the third party that its respective policies are in accord with our own. We may disclose or report personally identifiable customer information in limited circumstances where we believe in good faith that disclosure is required or permitted by law, for example to cooperate with regulators or law enforcement authorities, resolve customer disputes perform credit or authentication checks, or for institutional risk control.

ZCM collects non-public personal information about its customers from the following sources:

- a) Account applications;
- b) Information related to opening an account and providing investment advice; and
- c) Information received from ancillary sources, such as consumer reporting agencies in the course of providing financial services to customers.

The categories of information we collect include personal vital statistics, as well as personal financial data about our client's financial circumstances and objectives. We restrict access to non-public personal information about you to those employees who need to know that information to provide products or services to you. We have developed and maintain physical, electronic, and procedural safeguards to guard your non-public personal information.
