## I. Advisory Business:

Magnolia Financial Planning Services, Inc. is a comprehensive financial planning firm that has been in business since 1994. We are owned by Robby T. Bryant, CFP, CEA and Patricia L. Bryant, MD.

We provide financial planning advice in the areas of retirement, investment, tax, insurance and estate planning. Magnolia analyzes, in detail, the client's current financial position including assets, liabilities, cash management, employee benefits, insurance, estate plan and other detailed factors pertaining to client's financial position, individual goals and future objectives. After collection of all data and documents, Magnolia processes and coordinates all information gathered, assimilates all aspects pertaining to the client's case, projects known conditions into future assumptions, and makes recommendations in a written, concise, personalized financial plan aimed at improving asset utilization, capital accumulation and goal achievement. Magnolia makes a supplemental analysis in each subsequent year and updates, in writing, those as necessary in relation to conditions existing at the time of each annual review. We currently manage \$51,232,818 in assets as of January 13, 2011, of which all is discretionary management.

## II. Fees:

We are a fee-only financial planning firm, meaning that we only charge a percentage of the investments managed and do not take commissions from brokers, insurance or other companies for investments. Fees are annual fees paid upfront, but which are divided into quarterly payments. Fees charged by Magnolia are for financial and investment advisory services. These fees are distinguished from supplementary legal, investment, insurance or accounting fees which might be incurred by the client as a result of implementing recommendations of the client's financial plan. Examples of services not performed by Magnolia are retirement plan accounting, retirement plan administration, preparation of legal documents, etc. Our mutual fund recommendations are all no-load funds.

#### IV. Methods of Analysis, Investment Strategies and Risk of Loss:

Our comprehensive financial planning will provide clients with different scenarios that will optimize their investments during retirement, including tax planning, insurance planning, and estate planning where they can save money by appropriate planning. Our overall investment strategy allows good returns with lower volatility by managing risks, using our valuation techniques to buy when investments are underpriced and sell when they become overpriced. Even so, investing in securities involves risk of loss that clients should be prepared to bear.
