The monthly custodian statements usually arrive within four weeks after each month end. It will take approximately six weeks after the end of each calendar quarter to prepare and deliver the performance evaluation report.

Asset allocation studies and analysis: The purpose of an asset allocation study is to develop an understanding of the interaction between risk and return. We will identify possible pitfalls and limitations to different allocation policies. The tradeoffs between different risk/return levels and the impact on client's plans. Upon receiving the most recent actuarial report, an asset allocation study usually requires about six weeks to complete.
