This brochure provides information about the qualifications and business practices of Apollo Capital Management, L.P. (“Apollo Capital Management”). If you have any questions about the contents of this brochure (“Brochure”), please contact us at (212) 515-3200. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (“SEC”) or by any state securities authority. Additional information about Apollo Capital Management is also available on the SEC’s website at www.adviserinfo.sec.gov.

Apollo Capital Management is registered as an investment adviser with the SEC pursuant to the Investment Advisers Act of 1940, as amended (the “Advisers Act”). Recipients of this Brochure should be aware that registration with the SEC does not in any way constitute an endorsement by the SEC of an investment adviser’s skill or expertise. Further, registration does not imply or guarantee that a registered adviser has achieved a certain level of skill, competency, sophistication, expertise or training in providing advisory services to its clients.

ITEM 2

Material Changes

Apollo Capital Management, an indirect subsidiary of Apollo Global Management, LLC, a Delaware limited liability company (“AGM”), routinely makes changes throughout its Brochure in an effort to improve and clarify the descriptions of its and its affiliates’ business practices and compliance policies and procedures or in response to evolving industry and firm practices. Apollo Capital Management believes that most of these changes are not material changes and does not describe them in this Item 2.

Set out below are those changes that Apollo Capital Management believes reflect material changes since its last annual update of this Brochure filed on March 30, 2016:

The following investment managers have been added to the Brochure as registered investment advisers relying on Apollo Capital Management’s investment adviser registration with the SEC pursuant to the SEC’s Division of Investment Management staff guidance issued in a no-action letter dated January 18, 2012, in response to the American Bar Association’s request for interpretive guidance (the “ABA No-Action Letter”):

- Apollo EPF Management III, LLC
- Apollo Capital Efficient Management, LLC
- Apollo Kings Alley Credit Capital Management, LLC
- Apollo Accord Management, LLC
- Apollo RRI Management LLC
- Apollo SA Management, LLC
- Apollo Tower Credit Management, LLC

A number of entities that are affiliated with AGM provide services to Redding Ridge Holdings LP, a Cayman Islands exempted limited partnership (“RR Holdings”) and its wholly owned subsidiary Redding Ridge Asset Management LLC, a Delaware series limited liability company (“RRAM”). Services include credit research, loan sourcing, trading, back office and middle office services, relationship introduction, structuring and financing. Interests in RR Holdings are held by Apollo Principal Holdings VII, L.P., a Delaware limited partnership and indirect subsidiary of AGM, certain private investment funds managed by subsidiaries of AGM and certain third party investors. RRAM primarily advises, and holds certain collateralized loan obligation securities (“CLOs”), including “risk retention” interests in, pooled investment vehicles that are CLOs and related CLO warehouse vehicles (“CLO Warehouses”).

AGM and its affiliates have established and provided the seed capital for RR Holdings, RRAM and their affiliates to facilitate compliance with Section 15G of the Securities Exchange Act of 1934 as amended by Section 941 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “U.S. Risk Retention Rules”). The U.S. Risk Retention Rules require a

sponsor of a securitization transaction (or its “majority-owned affiliate”) to retain at least 5% of the economic interest in the credit risk of the securitized assets. RRAM operates so that it meets the requirements for being the sponsor of each U.S. CLO in which it acts as collateral manager, co-collateral manager, sub-manager or servicer and holds the risk retention interest. RRAM has independently registered with the SEC as an investment adviser to comply with the Advisers Act.

On August 23, 2016, without admitting or denying any wrongdoing, certain related persons of Apollo Capital Management consented to the entry of an order to cease and desist from committing or causing any violations and future violations of Section 206(2) and 206(4) of the Advisers Act and Rules 206(4)-7 and 206(4)-8 thereunder. Please refer to Item 9 for additional details.

ITEM 4

Advisory Business

Founded in 1990, AGM (with its subsidiaries, “Apollo”) is a global alternative investment manager. Apollo is led by its managing partners, Leon Black, Joshua Harris and Marc Rowan, who have worked together for more than 25 years. Apollo’s primary business is to raise, invest and manage private equity, credit and real estate funds as well as single investor funds (“SIFs”) and managed accounts, on behalf of pension, endowment and sovereign wealth funds, as well as other institutional and individual investors. Apollo has three primary business segments: (1) *Private Equity*, which primarily invests in control equity and related debt instruments, convertible securities and distressed debt investments; (2) *Credit*, which primarily invests in non-control corporate and structured debt instruments; and (3) *Real Estate*, which primarily invests in real estate equity for the acquisition and recapitalization of real estate assets, portfolios, platforms and operating companies, and real estate debt including first mortgage and mezzanine loans, preferred equity and commercial mortgage backed securities.

Apollo Capital Management is an indirect subsidiary of AGM that is primarily engaged in managing Apollo’s credit business and controls the credit managers as set forth in the tables below (collectively, with Apollo Capital Management, the “Apollo Credit Managers”), which generally serve as investment and collateral managers to funds, SIFs and separately managed accounts (referred to as “Apollo Credit Funds”). Unless otherwise stated, the Apollo Credit Managers are registered with the SEC as investment advisers relying on Apollo Capital Management’s investment adviser registration with the SEC pursuant to the ABA No-Action Letter.

1. U.S. Performing Credit – The U.S. performing credit group includes commingled funds, SIFs and managed accounts that primarily focus on income-oriented, senior loan and bond investment strategies. The U.S. performing credit group also includes CLOs that Apollo raises and manages internally.

Set forth below are the U.S. Performing Credit managers and corresponding clients:

Manager	Client(s)
Apollo Credit Liquidity Management, L.P.	Apollo Credit Liquidity Fund, L.P. (“ <u>CLF</u> ”)
Apollo Credit Management (Senior Loans) II, LLC	Apollo AF Loan Trust 2012
Apollo Credit Management (Senior Loans), LLC	Apollo/Palmetto Short-Maturity Loan Portfolio, L.P. Apollo Credit Senior Loan Fund, L.P.
Apollo Credit Management, LLC	Manager to Apollo Senior Floating Rate Fund Inc. (“ <u>AFT</u> ”) and Apollo Tactical Income Fund Inc. (“ <u>AIF</u> ”). AFT and AIF are both non-diversified, closed-end management investment companies registered under the Investment Company Act of 1940, as amended (the “ <u>Company Act</u> ”).

Manager	Client(s)

2. Opportunistic Credit - The opportunistic credit group primarily focuses on credit investment strategies that are generally less liquid in nature and that utilize a similar value-oriented investment philosophy as our private equity business. The opportunistic credit funds, SIFs and managed accounts primarily invest in a broad array of primary and secondary opportunities encompassing performing, stressed and distressed public and private securities primarily within corporate credit, including senior loans, high yield, mezzanine, debtor in possession financings, rescue or bridge financings, loan originations and other debt investments. Additionally, certain opportunistic credit funds, SIFs and managed accounts will selectively invest in aircraft, shipping, energy and structured credit investment opportunities, and such funds, SIFs and managed accounts may seek to originate loans. For certain specific investments and general strategies, leverage can be employed by having fund subsidiaries or special-purpose vehicles incur debt or by entering into credit facilities or other debt transactions to finance the acquisition of various credit investments.

Set forth below are the Opportunistic Credit managers and corresponding clients:

Manager	Client(s)
Apollo Alternative Credit Absolute Return Management LLC	Apollo Alternative Credit Absolute Return Fund L.P.

Apollo Tower Credit Management, LLC	Apollo Tower Credit Fund, L.P.

3. Structured Credit – The structured credit group includes funds, SIFs and managed accounts that primarily focus on structured credit investment strategies that target multiple tranches of structured securities with what are generally favorable and protective lending terms, predictable payment schedules, well diversified portfolios, and low historical defaults, among other characteristics. These strategies include investments in externally managed CLOs, residential mortgage-backed securities, asset-backed securities and other structured instruments, including insurance-linked securities and longevity-based products. The structured credit group also serves as substitute investment manager for a number of asset-backed collateralized debt obligations (“CDOs”) and other structured vehicles.

Set forth below are the Structured Credit managers and corresponding clients:

Manager	Client(s)
Apollo Credit Management (CLO), LLC	ALM Loan Funding 2010-1, Ltd. ALM Loan Funding 2010-2, Ltd. ALM Loan Funding 2010-3, Ltd. ALM IV, Ltd. ALM V, Ltd. ALM VI, Ltd. ALM VII, Ltd. ALM VII (R), Ltd. Financial Credit Investment II Manager, LLC	Financial Credit Investment II, L.P.
Financial Credit Investment III Manager, LLC	Financial Credit Investment III, L.P.
Apollo RRI Management LLC	Redding Ridge Investments LLC

4. Non-Performing Loans – The non-performing loan group includes funds, SIFs and managed accounts that primarily invest in European commercial and residential real estate, performing and non-performing loans (“NPLs”), unsecured consumer loans and acquires assets as a result of

distressed market situations. Certain of the non-performing loan investment vehicles own captive pan-European loan servicing and property management platforms.

Set forth below are the Non-Performing Loan managers and corresponding clients:

Manager	Client(s)
Apollo EPF Management, L.P.	Apollo European Principal Finance Fund, L.P. Apollo European Principal Finance Fund (Feeder), L.P. (collectively, “ <u>EPF</u> ”)
Apollo EPF Management II, L.P.	Apollo European Principal Finance Fund II (Dollar A), L.P. Apollo European Principal Finance Fund II (Euro A), L.P. Apollo European Principal Finance Fund II (Master Dollar B), L.P. Apollo European Principal Fund II (Master Euro B), L.P. (collectively, “ <u>EPF II</u> ”)
Apollo EPF Management III, LLC	Apollo European Principal Finance Fund III, L.P.

5. European Credit – The European credit group includes funds, SIFs and managed accounts that focus on investment strategies in a variety of credit opportunities in Europe across a company’s capital structure, including senior secured loans and notes, mezzanine loans, subordinated notes, distressed and stressed credit and other idiosyncratic credit investments of companies established or operating in Europe, with a focus on Western Europe.

Set forth below are the European Credit managers and corresponding clients:

Manager	Client(s)
Apollo Credit Management (CLO), LLC	ALME Loan Funding 2013-1 Limited
Apollo Credit Management (Senior Loans), LLC	PPF Nominee 2 B.V.
Apollo Europe Management, L.P.	Apollo Investment Europe II, L.P. (“ <u>AIE II</u> ”)
Apollo European Credit Management, L.P.	Apollo European Credit Fund, L.P. Apollo European Credit Fund (Offshore), L.P. Apollo European Credit Master Fund, L.P.
Apollo European Long Short Management, LLC	Apollo European Long Short Fund, L.P.
Apollo European Senior Debt Management, LLC	A-A European Senior Debt Fund, L.P. A-A European Senior Debt Fund II, L.P.
Apollo Incubator Management, LLC	Apollo European Financials Credit Fund, L.P.

6. Single Investor Funds and Managed Accounts – Single Investor Funds (“SIFs”) and managed accounts are established to facilitate investments by third-party institutional investors

directly in Apollo Funds (as defined below) and other securities. SIFs and managed accounts may provide such investors with greater levels of transparency, liquidity and control over their investments.

The Apollo Credit Managers or one or more of their affiliates have entered into strategic partnerships directly or indirectly with investors that commit significant capital to a range of Apollo's platform of products, investment ideas and asset classes and over a duration that is generally longer than the term of a typical Client. Strategic partnership arrangements include Apollo granting certain preferential terms to such investors, including a waiver or reduction of Management Fees and blended Management Fee and carried interest rates that are lower than those applicable to or in the Clients in which such strategic partnership investors invest.

The preferential terms provided to strategic partnership investors are generally not subject to "most favored nation" provisions in the respective Client governing documents. For example, when a strategic partnership investor invests in a Client on the same general terms as other investors in that Client, but receives a lower blended Management Fee or carried interest rate because of the relationship of the strategic partnership investor to Apollo as whole, the lower blended fees (and any other preferential terms received by the strategic partnership investor) will not be subject to the Client's "most favored nation" provisions. In addition, strategic partnership investors are represented by members on certain Client advisory boards. Potential conflicts of interest involving members of a Client's advisory boards are discussed in Item 10.

Set forth below are the managers to the SIFs and managed accounts and their corresponding clients:

Manager	Client(s)
Apollo A-N Credit Management, LLC	Apollo A-N Credit Fund, L.P.
Apollo Arrowhead Management, LLC	Managed Account
Apollo Belenos Management, LLC	Managed Account
Apollo BSL Management, LLC	Managed Account

Apollo Union Street Management, LLC	Apollo Union Street Partners, L.P.
Apollo Zeus Strategic Management, LLC	Apollo Zeus Strategic Investments, L.P.
Apollo Kings Alley Credit Capital Management, LLC	Apollo Kings Alley Credit, L.P.

7. Athene Asset Management, L.P. – Athene Asset Management, L.P. (“AAM”) generally acts as investment adviser to Athene Holding Ltd. (“Athene Holding”) and certain of its insurance and reinsurance company subsidiaries, (collectively, the “Athene Group”), certain accounts of insurance companies that are reinsurance clients of the Athene Group and third party insurance company managed accounts. AAM is owned by Apollo Life Asset Ltd., a Cayman Islands exempted company (which is owned by Apollo Capital Management) and certain members of AAM’s management. AAM GP Ltd. is the general partner of AAM. AAM, either directly or through the use of subadvisers, including certain other Apollo Credit Managers and Apollo Managers (as defined in Item 10 below), invests primarily in fixed-income and alternative investments.

8. Apollo Co-Investment Capital Management, LLC – Apollo Co-Investment Capital Management, LLC is a wholly-owned subsidiary of Apollo Capital Management that serves as the investment manager for various co-investment vehicles.

As supervised persons of Apollo Capital Management, the Apollo Credit Managers intend to conduct their activities in accordance with the Advisers Act and the rules thereunder. Any employees of Apollo Credit Managers and other persons acting on their behalf are and shall be subject to the supervision and control of Apollo Capital Management.

In addition to advising the Apollo Credit Funds, the Apollo Credit Managers serve as investment managers to various managed accounts and co-investment vehicles structured to facilitate investments by affiliated and third party co-investors alongside Apollo Credit Funds (“Co-Investment Vehicles”). As discussed above, certain Apollo Credit Managers also serve as investment and/or collateral managers to CLOs, CDOs and other structured investment funds,

residential real estate finance companies, insurance and reinsurance companies, reinsurance accounts, and closed-end, non-diversified investment companies, which, together with the Apollo Credit Funds, Co-Investment Vehicles, Apollo Funds (as defined below), SIFs and managed accounts are referred to as “Clients.”

In addition to the foregoing, the Apollo Managers (as defined in Item 10 below), including the Apollo Credit Managers, serve as the investment managers to a number of special purpose vehicles through which several funds, SIFs and separately managed accounts managed by the Apollo Managers (collectively, the “Apollo Funds”) have invested. The Apollo Managers generally form special purpose vehicles to facilitate portfolio investments by Apollo Funds for tax, regulatory, or economic purposes.

Subject to the allocation considerations discussed in Item 6 below, the Apollo Credit Managers may offer opportunities for co-investment. Co-investment opportunities may be offered to persons or firms who Apollo Credit Managers or their affiliates believe will be of benefit to Clients. In addition, such persons or firms may provide a strategic sourcing or similar benefit to any of the Apollo Credit Managers, Clients, portfolio companies of Clients or their respective affiliates (each, a “Strategic Co-Investor”) or any limited partner, shareholder or other investor of any Client, or any other person (including partners, officers and employees and related parties and associates of the Apollo Credit Managers or their parent companies, an Apollo Credit Manager or its affiliates, portfolio investment management team members, consultants or advisors) (collectively, “Co-Investors”).

The Apollo Credit Managers and their affiliates may charge management fees (“Management Fees”) and other fees to, or receive carried interest from, such Co-Investors or Co-Investment Vehicles.

The Apollo Credit Managers do not invest in any of the Apollo Funds. However, Apollo’s principals, officers and employees and certain of Apollo’s affiliates have direct and indirect investments of their own capital in certain Apollo Funds through, for example, employee Co-Investment Vehicles, direct investments, deferred compensation agreements, performance allocation and carried interest.

Investment Advisory Relationship

The advisory relationship between each Client and the relevant Apollo Credit Manager is governed by the respective investment management agreement between the Client and the Apollo Credit Manager (each, a “Management Agreement”). The Management Agreements are generally negotiated between related parties and, as such, their terms, including the fees payable to the Apollo Credit Managers, may not be as favorable to the Clients as if they had been negotiated with an unaffiliated, unrelated third party.

The Apollo Credit Managers offer advice to Clients that invest in instruments that are consistent with the respective Client’s investment strategy and objective, including, without limitation:

• senior secured bank debt	• first lien and second lien debt
• subordinated debt	• mortgage securities

• real estate	• senior debt
• high-yield debt	• synthetic securities
• commercial loans, including performing and distressed, NPLs,	• bank loans
• trade and credit derivatives, including swaps	• direct financings
• equity	• structured investment products including residential mortgage-backed securities (“ <u>RMBS</u> ”), commercial mortgage-backed securities (“ <u>CMBS</u> ”), asset-backed securities (“ <u>ABS</u> ”), CLOs and CDOs.
• private fixed income	• life insurance-related products
• aircraft-related investments	• shipping-related investments
• energy-related investments	• distressed credit
• short positions (in debt or equity)	

In addition, some of the Apollo Credit Managers, either directly or indirectly through a special purpose vehicle, engage in total return swaps which allow Clients to derive the economic benefit of owning an asset without retaining legal ownership of such asset. Finally, in connection with certain investments, the Apollo Credit Managers employ hedging techniques designed to reduce the risks of adverse movements in interest rates, securities prices, and currency exchange rates.

Without prior consultation with Clients, the Apollo Credit Managers will provide investment management services to additional private pooled investment vehicles that are offered to investors on a private placement basis. In connection with providing investment management services, the Apollo Credit Managers are appointed as investment advisers with discretionary trading authorization for the investment vehicles. Similarly, the Apollo Credit Managers also provide discretionary or non-discretionary investment advisory services for managed accounts. Clients may also be solicited to invest in one or more other Apollo Funds.

Except in limited circumstances, the Apollo Credit Managers have full discretionary authority with respect to the investment decisions of their Clients; however, their advice is provided in accordance with the investment objectives and guidelines set forth in each Client’s governing documents, which may include, but is not limited to, the applicable offering memorandum, private placement memorandum, prospectus, shareholder report, or Management Agreement (the “Governing Documents”). Similarly, the Apollo Credit Managers’ investment decisions and advice with respect to a managed account, if any, will be in accordance with the investment objectives and guidelines in such managed account’s Management Agreement, as well as any other instructions provided by the managed account to the applicable Apollo Credit Manager.

The investments of the Apollo Credit Funds may be subject to certain diversification and geographic limitations set forth in the applicable Client’s Governing Documents. Further, the Apollo Credit Managers enter into side letters with certain limited partners of the Apollo Credit

Funds that impose further restrictions on investing in certain types of securities, countries, geographies or businesses with respect to such limited partner.

The information provided above about the investment advisory services provided by the Apollo Credit Funds is qualified in its entirety by reference to the relevant Client's applicable Governing Documents.

As of December 31, 2015, Apollo Capital Management manages \$123,303,648,919.24 on a discretionary basis and \$9,858,049,384.09 on a non-discretionary basis.

ITEM 5 Fees and Compensation

Management Fees

The Apollo Credit Managers and their affiliates receive Management Fees from Clients. The specific payment terms and other conditions of the Management Fees available to the Apollo Credit Managers are set forth in the applicable Governing Documents, side letters and/or fee agreements, and such fees are generally payable to the Apollo Credit Managers monthly, quarterly or annually in arrears as set forth in the applicable documents. However, certain funds, such as the Apollo Credit Opportunity Fund I, L.P., Apollo Credit Opportunity Fund II, L.P., Apollo Credit Opportunity Fund III LP, Apollo Credit Opportunity Fund (Offshore) III LP, SCRF III, the Apollo Total Return Fund, the Apollo Total Return Enhanced Fund, Apollo Energy Opportunity Fund LP and certain strategic partnerships, pay Management Fees monthly or quarterly in advance.

Management Fees are generally paid to the Apollo Credit Managers in one of two ways: by deducting such fees from the applicable Client Account or directly billing the Client.

Performance-Based Compensation

The Apollo Credit Managers and their affiliates also may receive performance-based compensation (e.g., carried interest and incentive fees). The specific payment terms and other conditions of the performance-based compensation available to the Apollo Credit Managers are also set forth in the Governing Documents, side letters and/or fee agreements. Each affiliate of the Apollo Credit Managers that serves as a general partner of an Apollo Credit Fund generally is entitled to receive the performance-based compensation from the relevant fund. Apollo ST Fund Management LLC and Apollo ST Debt Advisors LLC, however, receive the performance-based compensation directly from their Clients. All performance-based compensation payable to the general partners (or investment managers) of the Apollo Credit Funds will be consistent with the requirements of Section 205 of the Advisers Act and Rule 205-3 thereunder.

Generally, performance-based compensation payable to the applicable general partner or Apollo Credit Manager is payable quarterly, annually or more frequently in arrears on a deal-by-deal basis.

The general partners or similar persons of each Apollo Credit Fund structured as a hedge fund receive performance-based incentive fees ("incentive fees"), as opposed to carried interest

distributions. Incentive fees are generally calculated on an annual basis and take into account both net realized and unrealized capital appreciation of the net asset value of the applicable Apollo Credit Fund, subject to certain net loss carry-forward (known as a “high water mark”) and/or other hurdle provisions (such as a preferred return). Once realized, such fees are generally not subject to a clawback.

Management Fees, performance-based compensation and other fees paid by the Apollo Credit Funds to the Apollo Credit Managers are not generally negotiated, although the Apollo Credit Managers negotiate fees with strategic partnerships, managed accounts and limited partners or shareholders in certain limited circumstances. With respect to private investment funds that the Apollo Credit Managers raise in the future, certain limited partners or shareholders may seek to negotiate terms (including fees and expenses payable to the Apollo Credit Managers) through the negotiation of the limited partnership agreement, other similar documents or through side letters.

The limited partnership agreements of the Apollo Credit Funds generally provide that the general partner allocate capital from the capital accounts of limited partners to pay Management Fees and performance-based fees to the applicable Apollo Credit Manager and/or the general partner of the fund. The general partners of the Apollo Credit Funds generally may also elect to apply distributable proceeds from the sale of an investment to pay Management Fees.

The applicable general partner and/or the applicable Apollo Credit Manager generally may have the unilateral discretion to waive or modify the application of certain provisions of the Governing Documents for an Apollo Credit Fund with respect to an investor (including those related to fees, performance allocations, transparency, and withdrawals) without obtaining the consent of any other investor. The applicable general partner and Apollo Credit Manager generally waive all Management Fees and performance-based compensation for investments by Apollo principals and employees of the Apollo Credit Managers and their affiliates, as well as for their family members.

Certain collateral management fees for certain CLO and CDO Clients are payable only to the extent that funds are available in accordance with the priority of payments described in the CLOs’ and CDOs’ indentures. Apollo Credit Managers to CLOs and CDOs may also receive an incentive fee as set forth in the CLOs’ or CDOs’ indentures. Incentive fees are also only payable to the extent that funds are available for such purpose on each payment date in accordance with the priority of payments described in the CLOs’ or CDOs’ indentures.

Apollo Credit Managers may charge Clients fees for liquidation services and structuring services. For liquidation services, fees may be based on a percentage of the proceeds of the liquidation or a fixed fee. Structuring fees may be paid upon the closing of the formation of certain CLOs or CDOs.

Fees charged to managed accounts and SIFs are individually negotiated with the investor participating in the managed account or SIF and generally established pursuant to such account’s Management Agreement or other applicable Governing Documents.

Expenses Charged to Clients

Organizational Expenses. Each Client, subject to its Governing Documents, will typically pay or otherwise bear all fees, costs, expenses, and other liabilities incurred in connection with the formation and organization of, or sale of interests in, such Client, its general partner or similar person and/or investment manager, including commissions, costs, and all out-of-pocket legal, accounting, filing, capital raising, printing, electronic database, travel (which may include expenses for the use of private aircraft, first class or business class travel), accommodation, meal and other similar fees, costs and expenses (collectively, the “Organizational Expenses”).

Operating Expenses. In addition, each Client, subject to its Governing Documents, will typically pay or otherwise bear all of the direct and indirect fees, costs, expenses and other liabilities or obligations resulting from or arising in connection with its operations (collectively, the “Operating Expenses”). The Operating Expenses of a particular Client are set forth in its Governing Documents and/or through side letters and may include, without limitation, the following fees, costs and expenses related to or arising from:

- (i). the discovery, evaluation, investigation, development, acquisition or consummation, ownership, maintenance, monitoring, hedging or disposition of portfolio investments, which includes, without limitation:
 - brokerage commissions
 - clearing and settlement charges
 - private placement fees
 - syndication fees
 - solicitation fees
 - arranger fees
 - sales commissions
 - pricing and valuation fees (including appraisal fees)
 - research fees
 - underwriting commissions and discounts
 - interest and investment fees
 - transaction fees
 - breakup fees
 - investment banking fees
 - advisory fees
 - bank charges
 - other investment costs and expenses related to closing, execution and transaction costs
 - custodial, trustee, transfer agent, recordkeeping and other administrative fees
 - origination fees
 - commitment fees
 - rating agency fees
 - collateral management fees, facility fees, float fees or similar fees;

- (ii). services rendered to, or in connection with financing provided to, issuers of securities (such as arranger, brokerage, placement, syndication, solicitation, or underwriting, agency, origination, sourcing, structuring, collateral management or other fees, discounts, spreads, commissions and concessions) paid (1) to (x) any service provider affiliated with AGM, certain Clients and/or their portfolio companies who provide services to Clients and/or their portfolio companies, as well as third parties (each, an “Affiliated Service Provider”) or (y) another person with respect to services rendered by such Affiliated Service Provider or (2) by any portfolio investment or issuer of any securities that constitute a portfolio investment in respect of which a Client does not have control;
- (iii). any investments and/or securities that are managed by the general partner or manager of such Client or any of their respective affiliates (including an investment in another Client) that are acquired by such Client (including Management Fees, Operating Expenses, incentive allocation and/or carried interest) earned by any such person or that are otherwise borne by such investments and/or securities;
- (iv). any credit facility, guarantee, letter of credit or similar credit support or one or more other similar financing transactions involving any investment, including any interest arising out of such borrowings and indebtedness;
- (v). the evaluation of potential portfolio investments (irrespective of whether any such investment is ultimately consummated), (including any broken deal expenses and reverse breakup fees);
- (vi). attending conferences in connection with the evaluation of future portfolio investments or business sector opportunities (including the evaluation of potential portfolio investments, irrespective of whether any such investment is ultimately consummated);
- (vii). risk management assessments and analyses of such Client’s assets;
- (viii). any other expenses of investments that are not consummated, which may include certain advisory, transaction, closing, consulting and other similar fees paid to the manager of such Client or such manager’s affiliates and other persons;
- (ix). any travel-related expenses related to or arising from the discovery, evaluation, investigation, development, acquisition or consummation, ownership, maintenance, monitoring, hedging, or disposition of investments, including potential investments (which includes travel expenses for the use of private aircraft, first class or business class travel);
- (x). taxes and other governmental charges incurred or payable by such Client;
- (xi). the services of actuaries, accountants, advisers, auditors, administrators, brokers (including prime brokers), counsel, custodians, valuation experts and other service providers that provide services to, or with respect to, such Client, and legal

expenses incurred in connection with claims or disputes related to one or more actual, unconsummated or proposed investments;

- (xii). the services of professionals (including Apollo Investment Consulting, LLC (“Apollo Consulting”) and any industry executives, advisers, consultants, operating executives, subject matter experts or other persons acting in a similar capacity) who provide services to such Client or its investments or to issuers of securities;
- (xiii). obtaining research and other information for the benefit of such Client, including information service subscriptions, as well as expenses incurred to operate and maintain market information systems and information technology systems used to obtain such research and other information (such as phone and internet charges);
- (xiv). developing, implementing or maintaining computer software and technological systems for the benefit of such Client, its investors or its investments (including potential portfolio investments);
- (xv). maintaining such Client and any of its subsidiary entities, including fees, costs and expenses incurred in the organization, operation and restructuring of such subsidiary entities;
- (xvi). insurance allocated to such Client (including Apollo’s group insurance policy, general partner’s, directors’ and officers’ liability or other similar insurance policies, errors and omissions insurance, financial institution bond insurance and any other insurance for coverage of liabilities to any person that are incurred in connection with activities of such Client), litigation expenses, (including expenses incurred in connection with the investigation, prosecution, defense, judgment or settlement of litigation) and other extraordinary expenses (including fees, costs and expenses that are classified as extraordinary expenses under U.S. generally accepted accounting principles (“GAAP”));
- (xvii). preparation of all reports to such Client’s investors or advisory board (including all fees, costs and expenses incurred to audit such reports, provide access to a database or other internet forum and for any other operational, legal, secretarial or postage expenses relating thereto or arising in connection with the distribution of the same), and any other financial, tax, accounting or fund administration reporting functions (including expenses associated with the preparation of financial statements, tax returns, and Internal Revenue Service Schedules “K-1” or any successors thereto and the tax matters partner’s representation of such Client or its investors);
- (xviii). the holding of any meetings of the Client, including the Client’s investors, the Client’s advisory board, the Client’s board of directors or conflicts review agent (including expenses for airfare, accommodations, meals, events, entertainment and other similar fees, costs and expenses in connection with any such meetings);

- (xix). such Client's indemnification obligations (including any fees, costs and expenses incurred in connection with indemnifying covered persons consistent with such Client's Governing Documents, and advancing fees, costs and expenses incurred by any such covered persons in defense or settlement of any claim that may be subject to a right of indemnification under such Client's Governing Documents);
- (xx). compliance with any applicable law, rule or regulation or directive, including the European Union Alternative Investment Fund Manager Directive ("AIFMD") or any other regulatory requirement (including regulatory filings, "blue sky" filings and related out-of-pocket or other expenses of such Client, its general partner or similar person and/or investment advisor, including, but not limited to, Form PF filings and any compliance or filings related to any such law, regulation or directive) and expenses related to or in connection with any governmental inquiry, investigation, or proceeding involving such Client (including the amount of any judgments, settlements or fines paid in connection therewith), which includes legal fees, costs and expenses;
- (xxi). a default by a defaulting investor of such Client (but only to the extent not paid by the defaulting investor);
- (xxii). a sale, assignment, pledge or transfer of an investor's interest in such Client or an investor's withdrawal or admission or acquisition of interests as permitted under such Client's Governing Documents (but only to the extent not paid by the investor and/or the purchaser, assignee, pledgee or transferee, as applicable);
- (xxiii). any amendments, modifications, revisions or restatements to the Governing Documents of such Client or its general partner or similar person and/or investment advisor;
- (xxiv). distributions to investors;
- (xxv). such Client's borrowings and indebtedness (including the fees, costs and expenses incurred in obtaining lines of credit, loan commitments and letters of credit for the account of such Client), securing the same by mortgage, pledge or other lien on any assets of the Client or otherwise encumbering assets in connection with or in furtherance of the acquisition of all or a portion of or the financing of an investment;
- (xxvi). administering and operating such Client, preparing and maintaining the books and records of such Client, including internal costs that the manager of such Client may incur to produce such Client's official books and records, external costs in cases where the manager hires a third-party administrator to maintain such Client's official books and records and any costs of the manager to oversee and manage such third-party administrator and any special purpose vehicles, including fees and expenses incurred in the organization of special purpose vehicles;
- (xxvii). the dissolution, winding up and termination of such Client;

- (xxviii). such Client's feeder funds and subsidiary entities; and
- (xxix). such Client's investors that are feeder funds or conduit vehicles that are (A) formed for the purpose of investing in the Client, and (B) not affiliates of the Apollo Credit Managers.

The foregoing categories of fees, costs, expenses and other liabilities shall be Organizational Expenses and Operating Expenses, respectively, regardless of whether the person or entity providing or performing the service or output giving rise to such fees, costs, expenses or other liabilities is associated with the Client (such as the general partner (or similar person) of such Client, its investment adviser or any of their respective affiliates) or is a third party. Any person associated with the Client is entitled to reimbursement from such Client or its portfolio investment for any Operating Expenses or Organizational Expenses paid and/or incurred by them on behalf of such Client. Apollo Credit Managers have discretion to seek reimbursement for Organizational Expenses and Operating Expenses and may choose not to seek reimbursement from certain Clients. In addition, if any service provider provides services to a Client on the premises of an Apollo Credit Manager or affiliates, such Client may also be responsible for any overhead, rent or other fees, costs, and expenses charged by an Apollo Credit Manager or its affiliates in connection with the on-site arrangement.

All fees, costs and expenses incurred by Apollo Credit Manager employees for travel, accommodations, meals, events, entertainment and other similar fees, costs and expenses are subject to AGM's or the applicable subsidiaries' Travel & Expense Reimbursement Policies and Procedures.

The Apollo Credit Managers or their affiliates from time to time enter into arrangements with service providers that provide for fee discounts for services rendered to the Apollo Credit Managers and their affiliates. For example, certain law firms retained by Apollo Capital Management or one or more of its affiliates discount their legal fees for certain legal services, such as legal advice in connection with firm operational, compliance and related matters. To the extent such law firms also provide legal services to Clients with respect to such matters, such Clients also enjoy the benefit of such fee discount arrangements. Legal services rendered for investment transactions, however, are typically charged to the Apollo Credit Managers, their affiliates and Clients without a discount or at a premium. Legal fees for transactions that are not consummated are also typically charged at a discount.

Not all Clients will be subject to the same fees, costs and expenses. Certain clients may receive a reduction in Management Fees with respect to placement agent fees (on a dollar-for-dollar basis) to the extent a placement agent is used. Similarly, a Client may also seek to negotiate terms, including fees and expenses payable to the Apollo Credit Managers, through the negotiation of the applicable Governing Documents or through side letters and/or fee agreements.

Allocation of Expenses. The Apollo Credit Managers and their affiliates from time to time incur fees, costs and expenses on behalf of more than one Client or multiple Clients. To the extent such fees, costs and expenses are incurred for the account or benefit of more than one Client, each Client will typically bear an allocable portion of any such fees, costs, and expenses generally in proportion to the size of its investment in the activity or entity to which the expense

relates (subject to the terms of each Client's applicable Governing Documents) or in such other manner as the Apollo Credit Manager considers fair and equitable under the circumstances. Apollo Credit Managers endeavor to allocate such fees, costs and expenses on a fair and equitable basis over time. See also "Terms of Co-Investments" in Item 6 below. Notwithstanding the foregoing, the Apollo Credit Managers may in the future develop policies and procedures to address the allocation of expenses (including with respect to such insurance premiums) that differ from its current practice. In most cases, Apollo's Expense Allocation Steering Committee, which meets on a quarterly basis, is responsible for the overall expense allocations and the related methodologies for Apollo and the funds, accounts and investment vehicles managed by Apollo and its subsidiaries. For example, with respect to Apollo's group professional liability insurance policy, approximately 90% of the premiums are currently allocated among all Clients covered under such policy, while the remaining portion is borne by Apollo.

Apollo Investment Consulting, LLC ("Apollo Consulting"). As mentioned in "Operating Expenses" above, Clients bear the fees, costs or expenses of certain services provided by Apollo Consulting. Apollo Consulting is an affiliate of the Apollo Credit Managers that facilitates strategic arrangements with and may employ (including on a retainer basis) industry executives, advisers, consultants, operating executives, subject matter experts or other persons acting in a similar capacity who provide consulting and other services to Clients or their portfolio investments (including with respect to potential investments). Such arrangements are negotiated on an arms-length basis at the time of entry or employment (including on a retainer basis) by Apollo Consulting.

Clients for which Apollo Consulting or its employees or contractors provide services will typically pay or otherwise bear Apollo Consulting's fees, costs and expenses incurred in connection with its engagement of consultants and any other Operating Expenses (including its overhead expenses). In addition, to the extent these consultants serve as a board member or in a similar capacity of a portfolio investment, these consultants may receive multiple sources of compensation, including from both a Client and directly from a Client's portfolio investment for specific services provided with respect to that company (for example, fees received for serving as a director, trustee or in a similar capacity of the company). Consultants are entitled to retain those sources of compensation, and such compensation does not generally reduce the fees paid by a Client to Apollo Managers (as defined in Item 10 below). Further, the Apollo Credit Managers have sole discretion over determinations relating to the engagement of employees or representatives of Apollo Consulting or other consultants by a Client or any other portfolio investment.

Sales Charges. In addition, the Apollo Credit Managers have engaged, and may in the future, engage or cause the Apollo Credit Funds to engage, placement agents to market and sell interests or shares in Apollo Credit Funds to prospective investors. Apollo requires placement agents to have all appropriate licenses and registrations to conduct their business, including when applicable, to be registered as broker-dealers with the SEC and to be members of the Financial Industry Regulatory Authority. Certain Apollo Credit Funds impose a sales charge on subscriptions, on a disclosed basis, in order to compensate unaffiliated third parties who assist in obtaining subscriptions to such vehicles. In these cases, the applicable Apollo Credit Manager may elect to reduce its management fee to the extent any placement fees are borne by the Apollo

Credit Fund as contemplated by the applicable Governing Documents. Alternatively, the sales charge may be deducted from the subscription and will not be treated as part of the investor's capital contribution to the Apollo Credit Fund. See "Organizational Expenses" in Item 5 for further details. With respect to AIC, AFT and AIF, underwriting discounts and commissions (i.e., a sales load) for the offering of securities may be borne by shareholders.

Special Fees and Management Fee Offsets

The Apollo Credit Managers or their affiliates may receive consulting or monitoring fees, investment banking fees, advisory fees, breakup fees, directors' fees, closing fees and transaction fees related to the negotiation of the acquisition and financing of a portfolio investment, and similar fees (including bridge financing fees), whether in cash or in kind, including options, warrants and other non-cash consideration, in connection with certain Clients' respective actual or contemplated investments (collectively, "Special Fees"). Monitoring fees typically consist of recurring fees by an Apollo Credit Manager for certain consulting services provided to portfolio investments. In the event of an initial public offering, monitoring fees may continue to be paid so long as the applicable Client continues to hold an other than de minimis position in such portfolio investment. Depending on the Governing Documents of a Client or investor side letters and/or fee agreements, Special Fees generated in connection with a given investment may be applied (up to 100%) to reduce the Management Fees payable by the Client(s) that participated in that investment. In addition, where Special Fees are not applied 100% to reduce such Management Fees, the Apollo Credit Managers will not receive early termination fees or accelerated monitoring fees without the approval of the Client's advisory board or, in the absence of an advisory board, the investors or duly appointed representatives of the applicable Client (which may be sought from a single investor (for instance, in the case of a SIF) or a majority in interest of such investors).

For purposes of determining the reduction in Management Fees for any given Client with respect to a given investment, Special Fees (if any) are allocated *pro rata* among the participating Clients and any Co-Investors (including funds, separate accounts or Co-Investors managed, advised, sourced or placed by the Apollo Credit Managers or one or more of their affiliates) based on their respective proposed commitments to or shares of the capital provided for that investment (or, if the investment is not made, that would have been provided).

For any portion of Special Fees that is allocated to an underlying investor of a participating Client that does not bear a Management Fee (or any portion that is allocated to a Co-Investor that does not bear a Management Fee), such portion will not be applied to reduce the Management Fees payable by such Client (or Co-Investor).

Certain Clients' applicable Governing Documents, however, do not contemplate the allocation of Special Fees as described above. Apollo may elect to give such Clients the benefit of an offset. In such a case, certain Management Fee-bearing Clients and/or Co-Investors (or the Management Fee-bearing investors in a Client) will not be allocated more than their *pro rata* portion, as applicable.

The following fees paid to affiliates of Apollo Managers generally do not constitute Special Fees (and are, therefore, generally not applied to offset Management Fees):

- (i). fees that comprise or constitute Organizational and Operating Expenses as described above;
- (ii). salary, fees or other compensation of any nature paid by a portfolio investment to any individual (or to such Client's investment adviser or one of its affiliates with respect to such individual) who acts as an officer of or in an active management role at, such portfolio investment (including industry executives, advisors, consultants, operating executives, subject matter experts or other persons acting in a similar capacity engaged or employed by Apollo Consulting but excluding investment professionals employed by Apollo primarily engaged in the investment activities of Clients);
- (iii). any fees, costs or expenses paid to Apollo Consulting;
- (iv). fees, costs and expenses, such as arranger, brokerage, placement, syndication, solicitation or underwriting, agency, origination, commitment, facility, float, sourcing, structuring, collateral management, advisory or other fees, discounts, spreads, commissions and concessions, but not transaction fees for transaction advisory services, paid (1) to (x) any Affiliated Service Provider for services rendered or (y) another person for such services rendered by such Affiliated Service Provider, or (2) by any portfolio investment or issuer of any securities that constitute a portfolio investment in respect of which a Client does not have control;
- (v). amounts earned by or for the account of any other Client (directly or indirectly through an expense offset mechanism); and
- (vi). any fees, costs, expenses or other amounts or compensation earned by any person or entity in respect of investments and/or securities that are managed by the Apollo Credit Managers or any of their affiliates.

Generally, certain Special Fees may be paid to an Affiliated Service Provider, including, but not limited to, Apollo Global Securities, LLC; however, as described above, Affiliated Service Providers may also receive fees that do not constitute Special Fees and, therefore, not all fees received by any such Affiliated Service Provider will be applied to reduce Management Fees payable by Clients that participated in the investment.

ITEM 6

Performance-Based Fees and Side-by-Side Management

As discussed in Item 5 above, the Apollo Credit Managers and their affiliates often receive performance-based compensation (e.g., carried interest and incentive fees), Management Fees and other fees from Clients. Generally, although there are certain exceptions, each affiliate of an Apollo Credit Manager that serves as a general partner of an Apollo Credit Fund is entitled to receive performance-based compensation from such fund. The receipt of performance-based compensation from Clients creates an incentive for the Apollo Credit Managers to make more speculative investments on behalf of Clients than they might otherwise make in the absence of such performance-based compensation. Performance-based compensation also incentivizes the Apollo Credit Managers to overvalue assets in order to increase the amount of its performance-based compensation.

Similarly, the Apollo Credit Managers charge Management Fees to Clients that vary. Different Management Fees incentivize Apollo Credit Managers to dedicate increased resources and allocate more profitable investment opportunities or best investment ideas to Clients who are charged Management Fees (or performance-based compensation arrangements) that are more profitable for the Apollo Credit Managers. Further, the Apollo Credit Managers are incentivized to allocate investment opportunities to Clients who either pay carried interest or a higher carried interest percentage to their general partners or to Clients whose current performance does not require them to reimburse investors for losses attributable to prior unprofitable investments before distributing carried interest to their general partners.

The Apollo Credit Managers, however, have adopted and implemented policies and procedures described below to mitigate conflicts of interest relating to the management of multiple Clients with varying types of fee arrangements.

Investment Allocations

Allocation Among Clients. The Apollo Credit Managers are committed to allocating investment opportunities among their Clients in a manner that, over time, is on a fair and equitable basis and have established detailed policies and procedures to guide the determination of such allocations.

The AGM allocation policies and procedures have established:

(i) the AGM allocations committee (the “AGM Allocations Committee”) to, among other things: (A) review any opportunities involving potential third-party Co-Investors and any opportunities involving a multi-strategy managed account; (B) review the actions taken by sub-committees and conflicts of interest that cannot be resolved by sub-committees; and (C) review such conflicts that cannot be resolved by portfolio managers;

(ii) sub-committees to the AGM Allocations Committee (the “Allocations Sub-Committees”) to (A) review and approve proposed allocations of investment opportunities among Apollo business units; and (B) review the allocation of opportunities to Apollo Funds; and

(iii) allocation guidelines on which such committees may base their allocation decisions.

AAM’s allocations committee (“AAM Allocations Committee”) has overall responsibility for the allocation of investment opportunities for Clients of AAM.

Generally, an investment opportunity will be allocated to a Client if the opportunity reasonably falls within such Client’s mandate or is otherwise deemed suitable as determined by the relevant portfolio manager, investment committee, AGM Allocations Committee, AGM Allocations Sub-Committees, or the AAM Allocations Committee. If an investment opportunity falls within the mandate of, or is otherwise deemed suitable for, two or more Clients, and it is not possible to fully satisfy the investment interest of all such Clients, the investment opportunity will generally be allocated *pro rata* based on the size of each Client’s original investment interest determined generally based on each Client’s available capital or net asset value.

However, many other factors may influence order allocation decisions, including, without limitation:

- (i). the relative actual or potential exposure of any particular Client to the type of investment opportunity in terms of its existing investment portfolio;
- (ii). the investment objective of such Client;
- (iii). cash availability, suitability, Client instructions, whether a purchase is being made for a specific Client, permitted leverage and available financing for the investment opportunity (including, without limitation, taking into account the levels/rates that would be required to obtain an appropriate return);
- (iv). the likelihood of current income;
- (v). the size, liquidity and duration of the investment opportunity;
- (vi). the seniority of loan and other capital structure criteria;
- (vii). with respect to an investment opportunity originated by a third party, the relationship of a particular Client (or the portfolio manager) to or with such third party;
- (viii). tax reasons;
- (ix). regulatory reasons;
- (x). supply or demand for an investment opportunity at a given price level;
- (xi). a Client's risk or investment concentration parameters (including, without limitation, parameters such as geography, industry, issuer, volatility, leverage, liability duration or weighted average life, asset class type, or other similar risk metrics);
- (xii). whether the investment opportunity is a follow-on investment;
- (xiii). whether the vehicle is in the process of fundraising or is open to redemptions (in which case, notions of net asset value and available capital may be subjectively adjusted to account for anticipated inflows or redemptions);
- (xiv). Whether a Client's economic exposure has been swapped to or otherwise assumed by one or more other parties (e.g., in the case of a Cedent Company (as defined below in Item 10) and one or more reinsurers); and
- (xv). such other criteria as are reasonably related to a reasonable allocation of a particular investment opportunity to one or more Clients (e.g., in the case of a Client ramp-up period or when incubating a particular investment strategy or product).

In determining whether an investment opportunity falls within a Client's mandate, the relevant portfolio manager, investment committee, AGM Allocations Committee or an Allocations Sub-

Committees or the AAM Allocations Committee, as appropriate, may take into consideration that:

- (i). multiple Clients have investment objectives that overlap to greater or lesser degrees;
- (ii). the applicable legal documents of each Client disclaim to greater or lesser degrees the obligation to offer such Client investment opportunities that fall within its investment objective or mandate;
- (iii). Apollo endeavors to not systematically disadvantage any Client;
- (iv). the investment objective of a particular Client may change over time;
- (v). the ultimate character of an investment opportunity (*i.e.*, its risk/reward profile) may not become clear until a great deal of diligence and analysis has been completed by the portfolio manager pursuing such investment opportunity;
- (vi). investment opportunities that are outcomes of heavily-negotiated transactions are capable of being structured in a variety of ways, each of which presents its own particular risk/reward profile; and
- (vii). a Client may have more than one mandate.

There can be no assurance, however, that the application of the foregoing allocation policies will result in the allocation of a specific investment opportunity to a Client or that a Client will participate in all investment opportunities falling within its investment objective. Such considerations may also result in allocations of certain investments among Client accounts on other than a *pari passu* basis.

Please see Item 10 with respect to a limited exception to these allocation policies that may exist where AAM and other Apollo Managers invest in the same strategies for different Clients.

Allocation of Co-Investment Opportunities. The Apollo Credit Managers or their affiliates, in their discretion, may offer opportunities to co-invest alongside one or more Clients to Co-Investors in light of the considerations described above, or for Strategic Co-Investors. Such co-investments may be structured through Co-Investment Vehicles organized to facilitate such investments or for legal, tax, regulatory or other purposes.

The Apollo Credit Managers and their affiliates allocate co-investment opportunities among Co-Investors in any manner they deem appropriate, taking into account those factors that they deem relevant under the circumstances, including, but not limited to:

- (i). whether a prospective Co-Investor has expressed an interest in participating in co-investment opportunities (including, for example, by election in such investor's subscription agreement or side letter);

- (ii). the character or nature of the co-investment opportunity (*e.g.*, its size, structure, geographic location, relevant industry, tax characteristics, timing and any contemplated minimum commitment threshold);
- (iii). the level of demand for participation in such co-investment opportunity;
- (iv). the ability of a prospective Co-Investor to analyze or consummate a potential co-investment opportunity on an expedited basis; and
- (v). as noted above, whether a prospective Co-Investor is also a Strategic Co-Investor.

In any event, no person (including any limited partner, shareholder or other investor of any Client) other than a Client should have any expectation of receiving an investment opportunity or will be owed any duty or obligation in connection therewith, and Clients (and their respective limited partners, shareholders or other investors) should only have such expectations to the extent required by their Governing Documents (including, if applicable, their side letters).

Co-Investment Policy. The Apollo Credit Managers are under no obligation to provide co-investment opportunities and may offer a co-investment opportunity to one or more of the categories of Co-Investors described above without offering such opportunity to the other categories. Co-investments will generally be made, at the investment level, on economic terms substantially no more favorable to Co-Investors than those on which the Client invests and any such co-investment generally will be sold or otherwise disposed of at substantially the same time (and in the case of a partial disposition, in substantially the same proportion) as the Client's disposition of its interest in such investment and on economic terms at the investment level substantially no more favorable to such Co-Investors than to the Client.

Terms of Co-Investments. The Apollo Credit Managers or any of their affiliates may (or may not) in their discretion: (i) receive performance-based compensation, Management Fees or other similar fees from Co-Investors, and the Apollo Credit Managers or their affiliates may make an investment, or otherwise participate, in any vehicle formed to structure a co-investment to facilitate, among other things, receipt of such performance-based compensation, Management Fees or other similar fees; and (ii) collect customary fees in connection with actual or contemplated portfolio investments that are the subject of such co-investment arrangements

With respect to consummated co-investments, Co-Investors will bear their *pro rata* share of fees, costs and expenses related to the discovery, investigation, development, acquisition or consummation, ownership, maintenance, monitoring, hedging and disposition of their co-investments. With respect to a proposed co-investment that is not consummated, Co-Investors that commit to participate in such proposed co-investment will bear their proportionate share of any fees, costs or expenses that were incurred in connection with such proposed co-investment, including breakup fees or broken deal expenses. However, in instances where Co-Investors have not yet committed to the proposed co-investment and the co-investment is not consummated, any such fees, costs or expenses shall be considered Operating Expenses and be borne by the Client to the extent the applicable Governing Documents of such Client permit such treatment or where disclosure of such treatment was made to the investors in such Client prior to their investment

therein. To the extent such expenses cannot be borne by such Client, the investment manager to the applicable client shall bear these expenses.

In the event that Co-Investors participate in a co-investment through one or more Co-Investment Vehicles, they will generally also bear their *pro rata* share of the aggregate Organizational Expenses of all such vehicles. In those circumstances where such Co-Investors include one or more members of a portfolio investment's management group, such Co-Investors may receive compensation arrangements relating to the investment, including incentive compensation arrangements. Finally, some of the Co-Investors with whom Clients may co-invest have pre-existing investments with Apollo, and the terms of such pre-existing investments may differ from the terms upon which such persons may invest with Clients.

Over-Commitment. In order to facilitate an investment, an Apollo Credit Manager or one or more of its affiliates may make (or commit to make), or may cause one or more of their respective Clients to make (or commit to make), an investment that exceeds the desired amount with a view to selling a portion of such investment to Co-Investors or other persons prior to or within a period after the closing of the acquisition. In such event, Clients will bear the risk that any or all of the excess portion of such investment may not be sold or may only be sold on unattractive terms. As a consequence, the applicable Clients may bear the entire portion of any breakup fee or other fees, costs and expenses related to such investment including, but not limited to, breakup fees and hold a larger than expected portion of such investment and may realize lower than expected returns from such investment. The Apollo Credit Managers endeavor to address such risks by requiring such investments to be in the best interests of their Clients, regardless of whether any sell-down ultimately occurs. None of the Apollo Credit Managers or any of their affiliates will be deemed to have violated any duty or other obligation to Clients or any of their respective investors by engaging in such investment and sell-down activities.

Investment Valuation and Realization

The existence of the performance-based compensation and varying levels of Management Fees creates a potential conflict of interest in valuing investments and there will be situations in which the Apollo Credit Managers are potentially incentivized to influence or adjust the valuation of Client assets. For example, the Apollo Credit Managers could be incentivized to: (i) employ valuation methodologies that improve a Client's track record; (ii) minimize losses from investments that have experienced a permanent impairment that must be returned prior to an affiliate receiving a carried interest; or (iii) for certain Clients, employ valuation methodologies that give rise to a higher valuation in order to increase fees, such as in the case of a Management Fee that is calculated as a percentage of the value of such Client's assets. The Apollo Credit Managers have adopted the following policies to address these potential conflicts.

Valuation of Client Assets. Certain assets owned by or managed for Clients are those for which there is no, or only a limited, liquid market, and the fair value of such assets may not be readily determinable. There is no assurance that the value assigned to an investment at a certain time will accurately reflect the value that will be realized upon the eventual disposition of the investment, and a Client's performance could be adversely affected if such valuation

determinations are materially higher than the value ultimately realized upon the disposition of the investment.

Except as described below, Apollo Credit Managers seek to comply with GAAP and to apply Accounting Standards Codification 820 (“ASC 820”) and other relevant Financial Accounting Standards Board (“FASB”) statements and guidance to the valuation of their Clients’ assets and liabilities. Financial reporting that is compliant with GAAP is required to follow the requirements for valuation set forth in ASC 820, “Fair Value Measurements and Disclosures”, which defines and establishes a framework for measuring fair value under GAAP and expands financial statement disclosure requirements relating to fair value measurements. In particular, the Apollo Credit Managers seek to apply the ASC 820 requirement that the fair value of an asset must reflect any restrictions on the sale, transfer or redemption of such asset—a requirement which may result in the imposition of a discount when determining the fair values of assets that are subject to such restrictions. ASC 820 and other accounting rules applicable to investment funds and their assets are evolving, and additional FASB statements and guidance and additional provisions of GAAP that may be adopted in the future may impose additional or different specific requirements as to the valuation of assets and liabilities for purposes of GAAP-compliant financial reporting. Such changes may adversely affect Clients. For example, to the extent that the rules governing the determination of the fair market value of assets change, such changes may increase the cost of fair market valuations or reduce the availability of third party determinations of fair market value.

Generally, Apollo Credit Managers seek to apply GAAP when such fair value determinations are made, except as otherwise set forth in a Client’s applicable Governing Documents. For example, for certain Clients GAAP is not applied to the valuation of exchange-traded securities held (i) directly by Clients as portfolio companies or (ii) indirectly by Clients through special purpose vehicles or other entities not considered to be portfolio companies of such Clients. In those cases, the exchange-traded securities are valued for purposes of the calculation of the pro forma return ratio based on their average trading prices during the fifteen day period prior to and following the measurement date. Conversely, exchange-traded securities held by Clients indirectly through portfolio companies are valued in accordance with GAAP. There may be instances where GAAP is not applied, some examples of which are specified below.

Where a Client is a private equity style fund, the Client’s private equity-like assets may be valued at fair value or at an amount other than GAAP fair value (for example, historical cost) for financial statement reporting purposes unless the asset has suffered a permanent impairment in value for purposes of calculating fees and carried interest distributions. Valuing assets at other than GAAP valuations may result in the Apollo Credit Managers receiving higher (or lower) Management Fees than would otherwise be received if assets were valued at fair value. In addition, valuing assets at an amount other than fair value may result in the general partner of an Apollo Credit Fund receiving a higher (or lower) carried interest distribution or performance allocation than it would if assets are valued at fair value. If Client assets are valued at other than fair value, the Client’s Governing Documents generally disclose the applicable valuation methodology.

Notwithstanding the foregoing, the Apollo Credit Managers may determine in certain instances to assign to a particular asset a value, determined pursuant to the applicable Client’s Governing

Documents, that differs from the value assigned to such asset for financial reporting purposes. In particular, the Apollo Credit Managers do not necessarily apply GAAP when determining whether an asset's decline in value is to be treated as significant and permanent for the purposes of determining distributions (including distributions of carried interest) and Management Fees payable to or by its Clients or, as discussed further below, when valuing certain exchange-traded securities.

Accordingly, to the extent that GAAP would require any Client's assets or liabilities to be valued in a manner that differs from the terms of such Client's Governing Documents, such assets or liabilities will be valued: (i) in accordance with GAAP, solely for purposes of preparing the Client's GAAP-compliant audited financial statements; and (ii) in accordance with the applicable Governing Documents (without regard to any GAAP requirements relating to the determination of fair value) for all other purposes (including, without limitation, for purposes of determining distributions and allocating gains and losses).

For certain Clients, the carried interest paid to such Client's general partner is subject to an escrow in order to maintain a certain "pro forma return ratio." This ratio compares the amounts held in the escrow account, plus the fair value of all investments held by the Client, against unreturned capital contributions funded for investments, Management Fees, Operating Expenses, Organizational Expenses and placement fees.

Timing of Investment Realization. Distributions to the partners in the Apollo Credit Funds are generally calculated in a "deal-by-deal" waterfall and the general partner will not receive carried interest until the limited partners receive distributions equal to their share of writedowns not taken into account in prior distributions. This creates an incentive for the general partner and applicable Apollo Credit Manager to avoid writing down the value of assets that are not readily marketable or difficult to value, because the general partner will be in a position to receive a higher carried interest. In addition, in the case where distributions-in-kind are made to a Clients' investors, the general partner or applicable Apollo Credit Manager is incentivized to employ valuation methodologies that may give rise to a higher valuation of such assets. The Apollo Credit Managers have adopted written valuation policies and procedures intended to address potential conflicts of interests that arise in respect of the valuation of its Clients' assets.

Carried interest distributions to the general partner or similar person of an Apollo Credit Fund become payable earlier if profitable investments are liquidated before unprofitable investments because such a waterfall does not permit any distributions of carried interest until after the cumulative amount of distributions has covered any prior losses associated with unprofitable investments. Further, in the "catch-up" period that occurs after investors have received the applicable priority return (typically set at 8 percent per year, compounded annually), the general partner or similar person of such Apollo Credit Fund entitled to carried interest will typically receive between 80 and 100 percent of distributions until such time as it receives 20 percent of the fund's cumulative profits. During this period, the general partner or similar person is incentivized to bring realizations forward and lock in returns (and stop the accrual of the priority return); even though the investors might achieve a better overall return if the Apollo Credit Fund retained the investment for a longer period of time.

To mitigate this conflict, the Governing Documents of the Apollo Credit Funds generally contain a requirement that the general partner or similar person make a commitment to the capital of the fund and include a “clawback” requiring the general partner or similar person to return excess distributions to investors (often at the end of the term of the fund) in the event that the general partner or similar person receives more than its carried interest percentage of profits on an aggregate basis over the life of the fund, each of which tends to mitigate the foregoing conflicts. However, since any clawback owed to investors of an Apollo Credit Fund is typically calculated on an after-tax basis under the applicable Governing Documents, investors may not ultimately receive their full share of profits that they would have otherwise received had there been no excess distribution to the general partner or similar person throughout the term of an Apollo Credit Fund.

In addition, the Apollo Credit Managers are incentivized to hold on to investments that have poor prospects for improvement in order to receive ongoing Management Fees in the interim and, potentially, a more likely or larger carried interest distribution if such asset’s value appreciates in the future. This incentive is increased by the presence of clawbacks in certain Clients where the general partner or similar person is under an obligation to return to the Client’s investors any excess carried interest distributions received by such general partner or similar person upon the Client’s termination.

The Management Fees that the Apollo Credit Managers receive for services provided to certain Apollo Credit Funds are based on capital contributions as opposed to capital commitments. Because the Apollo Credit Managers will not receive Management Fees from such Apollo Credit Funds until capital is drawn, there is an incentive for the Apollo Credit Managers to invest such funds’ capital earlier than they would have if Management Fees were based on capital commitments.

Distribution in Kind. While the Governing Documents of a Client typically specify an investment period within which investments are to be consummated, there is generally more flexibility in the general partner’s or similar person’s discretion regarding when investments must be realized. In addition, a Client may make portfolio investments that may not be advantageously disposed of prior to such Client’s dissolution, either by expiration of its term or otherwise. Although the Apollo Credit Managers expect that investments will be disposed of prior to dissolution or be suitable for in-kind distribution at termination, Clients may be forced to sell, distribute, or otherwise dispose of portfolio investments at a disadvantageous time as a result of dissolution. Further, Clients’ Governing Documents do not typically impose a strict obligation on a Client’s general partner or liquidator to realize investments within a certain period of time after dissolution, and there can be no assurances with respect to the time frame in which the winding down and the final distribution of proceeds to investors will occur.

Subject to the Governing Documents of each Client, a Client may distribute interests or shares in a special purpose vehicle or liquidating trust, series, or other entity to an investor to hold portfolio investments that may not be suitable for in-kind distribution. Pending the disposition of portfolio investments from such trust, series, entity or vehicle, the shares or interests received by the investor may be subject to asset-based or performance-based fees and other expenses.

Since assets distributed in kind are typically illiquid in nature, the potential conflicts of interest described under “Valuation of Client Assets” above will also apply. Such investments may not be readily marketable or saleable and may have to be held by investors for an indefinite period of time. Widespread holding of portfolio investments, particularly of private illiquid securities, may also entail a significant administrative burden. In addition, the direct holding of certain investments may subject the holder to suit or taxes in jurisdictions in which such investments are located.

Reserves. The Governing Documents of most Clients provide that distributions, including final distributions, to investors are generally subject to reserves or holdbacks for estimated accrued expenses, liabilities and contingencies. In addition, investors would be required to return amounts distributed to them to, among other things, fund indemnification obligations. The applicable laws in certain jurisdictions may also require investors that received a distribution in error or in violation of such law to, under certain circumstances, re-contribute such distributions to the respective Clients.

ITEM 7

Types of Clients

The Apollo Credit Managers generally provide investment advice to pooled investment vehicles, SIFs, managed accounts and Company Act Clients. In addition, as discussed in Item 4 above, certain Apollo Credit Managers serve as investment advisers or collateral or administrative managers to CLOs, CDOs and other structured investment vehicles, residential real estate finance companies, insurance and reinsurance companies, reinsurance accounts, and closed-end, non-diversified investment companies.

The minimum investment for most Apollo Credit Funds is stated in the funds’ respective Governing Documents and is generally set at \$5 million. The general partners of the Apollo Credit Funds may generally waive the applicable minimum at their respective discretion. Similarly, the minimum investment amount for Company Act Clients is stated in each Company Act Client’s applicable Governing Documents.

Clients advised by Apollo ST Debt Advisers LLC generally do not have a minimum investment size.

SIFs and managed accounts include only institutional Clients with accounts in excess of \$50 million.

Generally, investors participating in Clients are required to meet certain suitability and net worth qualifications, such as (i) an “accredited investor” within the meaning of Rule 501 of Regulation D under the Securities Act of 1933, as amended (the “Securities Act”), (ii) a “qualified purchaser” as defined in Section 2(a)(51) of the Investment Company Act or (iii) a “knowledgeable employee” within the meaning of Rule 3c-5 of the Investment Company Act, depending on the applicable eligibility requirements of the respective Client. AFT, AIF and AIC, which are publicly traded companies, do not have suitability or net worth qualifications for investors.

ITEM 8

Methods of Analysis, Investment Strategies and Risk of Loss

The following is a summary of the investment strategies and methods of analysis employed by the Apollo Credit Managers on behalf of Clients. This summary should not be interpreted to limit in any way Apollo's investment activities. Apollo may offer any advisory services, provide advice with respect to any investment strategies and make any investments, including those that may not be described in this Brochure, that Apollo considers appropriate, subject to each Client's investment objectives and guidelines. Specific descriptions of such strategies and methods are included in each Client's Governing Documents. In the case of separate accounts managed by the Apollo Credit Managers, the investment strategies and methods of analysis employed on behalf of each managed account will be set forth in the Management Agreement between the managed account and the respective Apollo Credit Manager or in other related documents. There can be no assurance that the investment objectives of any Client will be achieved.

Methods of Analysis

The Apollo Credit Managers perform significant research into each prospective investment and disposition. Such research generally includes, among other things, a review of the company's financial statements, comparisons with similar public and private companies, and analyzing relevant industry data (such as information on customers and suppliers). In conducting such research, the Apollo Credit Managers may consult the following sources of information: financial newspapers and magazines, inspections of corporate activities, research materials prepared by others, corporate rating services, annual reports, prospectuses, filings with the SEC, company press releases, and any other material the Apollo Credit Managers deem relevant. For individual loans the Apollo Credit Managers may research credit history and for loan portfolios, the Apollo Credit Managers may research, among other things, payment and loss history, contractual terms, and interest income. The Apollo Credit Managers may engage the services of experts and consultants to supplement their research, including engaging expert networks. Apollo's procedures regarding the use of expert networks are addressed in Item 11, and the general risks associated with the use of expert networks are set forth below under the heading "Risk of Loss."

Participation in Clients is only suitable for investors who have knowledge and expertise in financial and business matters and are capable of evaluating the merits and risks of an investment in a Client. The acquisition of interests or shares in an Apollo Credit Fund and the investments made by the Apollo Credit Funds and other Clients are highly speculative and may involve the risk of total loss of an investor's capital.

Investment Strategies

Each Apollo Credit Fund's investment strategy is outlined in its applicable Governing Documents. Each Apollo SIF and managed account's strategy is outlined in its Management Agreement or similar Governing Documents. The Apollo Credit Managers' objective is to achieve attractive risk-adjusted returns across all economic cycles. On a firm-wide basis, Apollo's investment approach is value oriented, focusing on industries in which it has considerable knowledge and emphasizing downside protection and the preservation of capital.

Clients principally seek to make debt investments that offer a compelling risk/reward, are undervalued by the markets and/or are priced at attractive yields. The Apollo Credit Managers develop investment strategies based upon the following distinguishing characteristics of Apollo's firm-wide business:

(i) *Integrated Business Model with Strong Credit Expertise.* The Apollo Credit Managers and their affiliates rely on Apollo's partners' active participation in, and experience with, credit markets to gain understanding of transaction sourcing, investing, operating and exit opportunities. Apollo's private equity, credit and real estate businesses are operated on an integrated investment platform with no information barriers.

(ii) *Flexible Approach to Investing Across Market Cycles.* Apollo has consistently invested capital throughout economic cycles by focusing on opportunities that it believes are often overlooked by other investors. Its expertise in credit markets, focus on core industry sectors, and investment experience allows Apollo to respond quickly to changing environments. Apollo pays close attention to the cycles that the core industry sectors are experiencing and is opportunistic in entering and exiting investments when the risk/reward profile is in Apollo's favor.

Client strategies involve a high degree of uncertainty. The possibility of partial or total loss of capital will exist in connection with such strategies, and investors should not invest unless they can readily bear the consequences of such loss.

Risk of Loss

The following risk factors are those generally applicable to the Apollo Credit Managers' Clients. The Apollo Credit Managers' Clients principally invest in debt instruments, including senior secured debt, first lien and second lien debt, subordinated debt, real estate, high-yield debt, senior debt, commercial loans, synthetic securities and other financial instruments, trade and credit derivatives, structured securities and the material risks involved in investing in these types of securities are discussed below. However, additional risk factors, including risk factors that are specific to a particular Client's investment strategy, may be described in each Client's applicable Governing Documents.

No Assurance of Investment Returns. The Apollo Credit Managers cannot give Clients assurance that investments will generate returns or that returns will be commensurate with the risks of investing in the type of companies and transactions that fall within such Clients' individual investment objectives.

Substantial Fees and Expenses. Clients typically pay Management Fees, Organizational Expenses and Operating Expenses as set forth in their Governing Documents, whether or not they make any profits. While it is difficult to predict the future expenses of Clients, such expenses may be substantial. Please see Item 5 for additional information on fees and expenses.

Business and Market Risks. Investments may involve a high degree of business and financial risk, which could result in substantial loss to a Client. In particular, these risks could arise from changes in the financial condition or prospects of the entity in which the

investment is made, changes in national or international economic and market conditions, and changes in laws, regulations, fiscal policies, or political conditions of countries in which investments are made, including the risks of war and the effects of terrorist attacks on security operations. The possibility of partial or total loss of capital will exist.

General Market Risks. Recent legal and regulatory changes, and additional legal and regulatory changes that could occur during a Client's applicable term, may adversely impact Clients. The regulation of the US and non-US securities and futures markets and investment funds has undergone substantial change in recent years and such change may continue. The effect of such new regulations on Clients, while impossible to predict, could be substantial and adverse and may, directly or indirectly, subject Clients to increased capital requirements, fees and expenses, as well as limits on the types of investors they may solicit. The full effect of recent and future legislation cannot yet be known.

Laws and regulations, particularly those involving taxation, investment and trade, applicable to the activities of a Client can change quickly and unpredictably, and may at any time be amended, modified, repealed or replaced in a manner adverse to the Client's interests. It is impossible to predict what, if any, changes in regulation applicable to Clients or the Apollo Credit Managers, the markets in which they trade and invest or the counterparties with which they do business may be instituted in the future. Clients and/or the Apollo Credit Managers may be or may become subject to unduly burdensome and restrictive regulation.

In recent years, due to events in the financial markets, the financial services industry generally, and the activities of private funds and their managers in particular, have been subject to intense and increasing regulatory scrutiny in the United States and in other jurisdictions. Such scrutiny and accompanying regulatory changes may increase the exposure of Clients to potential liabilities and to legal, compliance and other related costs and may have an adverse effect on private funds generally, and in particular, on the ability of Clients to achieve their investment objectives. The private fund industry may continue to be adversely affected by the recent developments in the financial markets in the U.S. and abroad going forward, and any future legal, regulatory, or governmental action and developments in such financial markets and the broader global economy could have an adverse effect on the business of Clients, operations and performance.

The entire market or particular instruments traded on a market may decline even if earnings or other factors improve inasmuch as the prices of such instruments are subject to numerous economic, political, psychological and other factors that have little or no correlation to the performance of a particular company. A Client may elect to hedge against market movements or the credit or other risks of any particular portfolio investment, whether by means of a derivative or other financial product or instrument. To the extent that Clients engage in certain hedging transactions, there can be no assurances that such hedging will insulate such Client from risks, and hedging techniques, whether via a derivative or other product or instrument, may give rise to certain costs and additional risks, including a risk of the total loss of any amounts invested in hedging instruments.

Regulation and Enforcement; Litigation. Clients are subject to regulation by laws at local and national levels and in multiple jurisdictions, including foreign countries. Specific and general regulations addressing capital markets, including tax laws and regulations, whether in the United States or abroad, could increase the cost of acquiring, holding, or divesting portfolio investments, the profitability of investments, and the costs of operating the Clients. Additional regulation could also increase the risk of third-party litigation.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), among other things, granted regulatory authorities such as the Commodity Futures Trading Commission (the “CFTC”), the SEC and the Consumer Financial Protection Bureau (the “CFPB”) broad rulemaking and enforcement authority to implement and oversee various provisions of the Dodd-Frank Act, including comprehensive regulation of the over-the-counter derivatives and consumer finance markets. These expanded powers have resulted in rules that could adversely affect Clients or investments made by Clients.

Clients may be subject to state and federal regulation, borrower disclosure requirements, limits on fees and interest rates on some loans, state lender licensing requirements, and other regulatory requirements in the conduct of its business as an originator, lender, acquirer, or servicer of consumer and commercial loans. In circumstances in which a state license is required, the applicant may experience delays in obtaining licenses due to the application requirements and processes involved. Clients may also be subject to consumer disclosures and substantive requirements on consumer loan terms and other federal regulatory requirements applicable to consumer lending that are administered by the CFPB. These state and federal regulatory programs are designed to protect borrowers, not to protect investors in the Client. Compliance with these regulatory requirements imposes staffing, legal, compliance and other costs and administrative burdens.

In addition, there can be no assurance that the Clients, their general partners, the Apollo Credit Managers or any of their affiliates will avoid regulatory examination or enforcement actions. Even if an investigation or proceeding does not result in a sanction being imposed against an Apollo Credit Manager or any of its Affiliates, or such sanction is small in monetary amount, the Clients, their general partner, the Apollo Credit Managers and/or their respective affiliates may be subject to adverse publicity relating to the investigation, proceeding or imposition of such sanctions. There is also a risk that regulatory agencies in the United States and abroad will continue to adopt, change or enhance new or existing laws or regulations, which may result in additional regulatory scrutiny.

As has been reported in the press, the SEC has focused recently on the disclosure to investors of the acceleration of certain Special Fees. AGM provided information about this topic to the staff of the SEC in connection with the SEC’s periodic examination of AGM in 2013. AGM received an informal request for additional information from the staff of the SEC on this topic and certain ancillary issues. AGM is fully and voluntarily

cooperating with the informal requests and is in discussions with the SEC regarding a potential resolution of these matters.

Consumer lending is subject to greater regulatory complexity and regulatory attention than is commercial lending, and engaging in consumer lending results in higher staffing and administrative costs and regulatory and litigation risks. The applicable federal consumer financial laws include, among others, the Truth in Lending Act, the Equal Credit Opportunity Act, the Real Estate Settlement Procedures Act, the Fair Debt Collection Practices Act, the Fair Credit Reporting Act, privacy protections of Title V of the Gramm-Leach Bliley Act, and the Bank Secrecy Act, and their implementing regulations and related supervisory guidance and interpretations. States have additional consumer protection laws regulating financial transactions, such as usury and fee limits, and laws that are analogous to the above listed federal laws. Additional legislation and regulation could amend or increase Client obligations and regulatory oversight when engaging in consumer finance activities.

State and federal regulators and other governmental entities have authority to bring administrative enforcement actions or litigation to enforce compliance with applicable lending or consumer protection laws, with remedies that can include fines and monetary penalties, restitution to borrowers, injunctions to conform to law, or limitation or revocation of licenses and other remedies and penalties. In addition, lenders and servicers may be subject to litigation brought by or on behalf of borrowers for violations related to unfair or deceptive or, in the case of consumer borrowers, abusive practices. Failure to conform to applicable regulatory and legal requirements could be costly and could result in state or federal legal action seeking penalties or consumer redress or in a state or the CFPB prohibiting Clients from operating certain businesses within their jurisdictions.

Clients may also indirectly be affected by regulation of banks and other financial services firms with which the Clients do business, from which they obtain financing or other services, or to which they seek to sell interests in loan securitizations. The regulatory regimes applicable to financial services firms with which Clients do business may increase borrowing costs or limit the terms or availability of credit, affect the terms or pricing of loan securitizations, affect the collectability of loans, or have other indirect effects.

Title VII of the Dodd-Frank Act provided for a sweeping overhaul of the regulation of privately negotiated derivatives. The CFTC has been granted broad regulatory authority over “swaps,” which term has been defined in the Dodd-Frank Act and related CFTC rules to include derivatives. Title VII may affect Clients’ ability to enter into derivative transactions, may increase the costs in entering into such transactions, and/or may result in Clients entering into such transactions on less favorable terms than prior to effectiveness of the Dodd-Frank Act. For example, Clients may be required to clear certain interest rate hedging transactions by submitting them to a derivatives clearing organization. In addition, to the extent Clients are required to clear any such transactions, they will be required to, among other things, post margin in connection with such

transactions. The occurrence of any of the foregoing events may have an adverse effect on Clients' businesses and their financial returns.

Section 619 of the Dodd-Frank Act, more commonly known as the Volcker Rule, has been implemented by final interagency rules adopted in December 2013. Among other things, the Volcker Rule imposes new requirements on asset-backed securities and pooled investments in loans and other assets that U.S. banks and their affiliates are permitted to own. Although the conformance period for certain pre-2014 investments in private funds by banks has been extended to July 2017, the Volcker Rule may cause banks and their affiliates to divest existing holdings and limit new investments in non-conforming securities and thereby limit the marketability of asset-backed and pooled investments that do not meet the new requirements established by the Volcker Rule. This may result in reduced prices or illiquidity of portfolio assets.

These new and expanded regulations and regulatory powers may reduce returns to investors in consumer and commercial loan portfolios as a result of, among other things, additional compliance and administrative expenses, failure to obtain full repayment on portfolio loans, administrative enforcement actions and fines by state or federal regulators and civil litigation against holders of loans, and/or a reduction in the availability of appropriate loans for investment. Similarly, violations of law or regulation by the originators or servicers of consumer and commercial loans held directly or indirectly by investors could result in the originators or servicers being subject to administrative fines or penalties, borrower restitution obligations, or other consequences that could negatively impact investors in such loans.

In addition, certain Clients invest in distressed investments and, as a result, there is a possibility that certain of the Apollo Credit Managers will participate in restructuring activities. It is possible that certain Clients will become involved in litigation with respect to creditor disputes and similar issues among classes of claimants. Litigation entails expense and the possibility of counterclaims against such Clients including their general partners and respective Apollo Credit Managers, and ultimately, judgments may be rendered against a Client for which such Client does not carry insurance.

U.S. Risk Retention Rules

Under requirements promulgated under the Dodd Frank Act and similar European Union requirements, a "sponsor" or "securitizer" is generally required to retain at least 5% of the credit risk of the securitized assets it sponsors or securitizes ("Risk Retention Rules"). Apollo does not expect to serve as a sponsor or securitizer but may invest in securitizations sponsored by others, and contemplates participating in a structure that is a standalone asset management business capable of acting as a "sponsor" of U.S. CLOs and U.S. securitizations in its own right. There has been no explicit guidance regarding whether entities may be structured for this purpose and therefore the regulatory environment in which any such structure intends to operate is highly uncertain and it is possible that Apollo could be deemed to be a sponsor or a securitizer. Additionally, the impact of the Risk Retention Rules on the securitization market is unclear and such rules may negatively impact the value of CLOs, securitizations and the underlying assets.

Monetary Policy and Governmental Intervention. As part of the response to the 2008 global financial crisis, the U.S. Federal Reserve (the “Federal Reserve”) and global central banks, including the European Central Bank, have – in addition to other governmental actions to stabilize markets and seek to encourage economic growth – acted to hold interest rates to historic lows. It cannot be predicted with certainty when, or how, these policies will change, but actions by the Federal Reserve and other central bankers may have a significant effect on interest rates and on the U.S. and world economies generally, which in turn may affect the performance of the investments of Clients. Further financial crises may result in additional governmental intervention in the markets. In addition, the consequences of the extensive changes to the regulation of various markets and market participants contemplated by the legislation and increased regulation arising out of the financial crisis are difficult to predict or measure with certainty.

Non-U.S. Currency Risks. Certain Clients may make investments that are denominated in non-U.S. currency and therefore are subject to the risk that the value of a particular currency will change in relation to one or more other currencies, including generally the currency in which the books of the Client are kept and contributions and distributions generally will be made. Among the factors that may affect currency values are trade balances, the level of short term interest rates, differences in relative values of similar assets in different currencies, long-term opportunities for investment and capital appreciation and political developments. The Client will incur costs in converting investment proceeds from one currency to another. Apollo Credit Managers may, but are under no obligation to, employ hedging techniques to minimize these risks, although there can be no assurance that such strategies will be effective. Investments in any country in which U.S. dollars are not the local currency may be affected by such changes in the value of foreign exchange between the U.S. dollar and such currency. Such changes may have an adverse effect on the value, price or income of the investment to such prospective investors. There may also be foreign exchange regulations applicable to investments in non-U.S. currencies in certain jurisdictions.

Alternative Investment Fund Managers Directive. The Alternative Investment Fund Managers Directive (“AIFMD”) provides a framework for the European Union (“EU”) to regulate managers of alternative investment funds that are not Undertakings for the Collective Investment of Transferable Securities, but which are marketed or managed in the EU. It came into force on June 22, 2013, and was required to be implemented by member states (“EEA Member States”) of the European Economic Area (“EEA”), (in the case of EEA Member States that are not members of the EU, subject to AIFMD being incorporated into the EEA Agreement), by no later than July 22, 2013 (although some EEA Member States still have not met this deadline). Since then, AIFMD has restricted the extent to which Apollo Credit Funds can be marketed to potential investors in the EEA. The AIFMD imposes significant regulatory requirements on investment managers operating within the EEA, including with respect to conduct of business, regulatory capital, valuations, disclosures and marketing, and rules on the structure of remuneration for certain personnel. Alternative investment funds (i) organized outside of both the EU and those of the additional EEA Member States which have implemented AIFMD and (ii) in which interests are marketed under AIFMD within the EEA, are subject to

significant conditions on their operations. In the immediate future, such funds may be marketed only in certain EEA jurisdictions and in compliance with requirements to register the fund for marketing in each relevant jurisdiction and to undertake periodic investor and regulatory reporting including, among other items, the risk and portfolio profile of each Apollo Credit Fund which is marketed in that regulator's jurisdiction. Additional requirements and restrictions apply where Apollo Credit Funds invest in an EEA portfolio investment, including restrictions that may impose limits on certain investment and realization strategies, such as dividend recapitalizations and reorganizations. Such rules could potentially impose significant additional costs on the operation of Apollo's business or investments in the EEA and could limit Apollo's operating flexibility within the relevant jurisdictions. In some countries, additional obligations are imposed: for example, in Germany and Denmark, marketing of a non-EEA fund now also requires the appointment of one or more depositaries (with cost implications for the fund). Depending on the activities of each Apollo Credit Fund, additional restrictions on investment activities may also apply if they are to be marketed to EEA investors. Accessing EEA investors may be more difficult and Client costs may increase to reflect the additional burdens. In the longer term (mid 2016 at the earliest), non-EEA Apollo Credit Managers of non-EEA funds may be permitted to voluntarily seek authorization under, and comply with the more detailed requirements of, AIFMD. If Apollo registers a manager under the AIFMD, Apollo will have more freedom to promote relevant funds in the EEA, although this will be subject to full compliance with all the requirements of the AIFMD, which include (among other things) satisfying the competent authority of the robustness of internal arrangements with respect to risk management, in particular liquidity risks and additional operational and counterparty risks associated with short selling; the management and disclosure of conflicts of interest; the fair valuation of assets; remuneration of staff; the capital base of the manager and the security of depository/custodial arrangements.

FCPA Considerations. The Apollo Credit Managers are committed to complying with the U.S. Foreign Corrupt Practices Act ("FCPA") and other anti-corruption laws, anti-bribery laws and regulations, as well as anti-boycott regulations, to which they are subject. As a result, Clients may be adversely affected because of their unwillingness to participate in transactions that violate such laws or regulations. Such laws and regulations may make it difficult in certain circumstances for Clients to act successfully on investment opportunities and for portfolio companies to obtain or retain business.

In recent years, the U.S. Department of Justice and the SEC have devoted greater resources to enforcement of the FCPA. In addition, the United Kingdom has significantly expanded the reach of its anti-bribery laws. While the Apollo Credit Managers have developed and implemented policies and procedures designed to ensure strict compliance by the Apollo Credit Managers and their personnel with the FCPA, such policies and procedures may not be effective to prevent violations in all instances. In addition, in spite of the Apollo Credit Managers' policies and procedures, portfolio companies or other entities in which a Client's affiliates of portfolio companies, particularly in cases where a Client or another Apollo-sponsored fund or vehicle does not control such portfolio investment, may engage in activities that could result in FCPA violations. Any determination that an Apollo Credit Manager has violated the FCPA or

other applicable anticorruption laws or anti-bribery laws could subject it to, among other things, civil and criminal penalties, material fines, profit disgorgement, injunctions on future conduct, securities litigation and a general loss of investor confidence, any one of which could adversely affect the Apollo Credit Managers' business prospects and/or financial position, as well as a Client's ability to achieve its investment objective and/or conduct its operations.

Pay-to-Play Laws, Regulations and Policies. A number of U.S. states and municipal pension plans have adopted so-called "pay-to-play" laws, regulations or policies which prohibit, restrict or require disclosure of payments to (and/or certain contacts with) state officials by individuals and entities seeking to do business with state entities, including those seeking investments by public retirement funds. The SEC has adopted rules that, among other things, prohibit an investment adviser from providing advisory services for compensation to a government client for two years after the adviser or certain of its executives, employees or agents makes a contribution to certain elected officials or candidates. If any of the Apollo Credit Managers, any of their employees or affiliates or any service provider acting on their behalf fail to comply with such laws, regulations or policies, such non-compliance could have an adverse effect on Clients.

Possibility of Fraud and Other Misconduct of Employees and Service Providers. Misconduct by employees of the Apollo Credit Managers, service providers to Clients and/or their respective affiliates could cause significant losses to such Clients. Misconduct may include entering into transactions without authorization, the failure to comply with operational and risk procedures, including due diligence procedures, misrepresentations as to investments being considered by such Clients, the improper use or disclosure of confidential or material non-public information, which could result in litigation, regulatory enforcement or serious financial harm, including limiting the business prospects or future marketing activities of such Clients, and non-compliance with applicable laws or regulations and the concealing of any of the foregoing. Such activities may result in reputational damage, litigation, business disruption and/or financial losses to such Clients. The Apollo Credit Managers have controls and procedures through which they seek to minimize the risk of such misconduct occurring. However, no assurances can be given that the Apollo Credit Managers will be able to identify or prevent such misconduct.

Changes in Investment Focus. Clients may not be restricted in terms of the percentage of their capital that can be invested in a particular industry, geographical region or type of investment. While a Client's disclosure and/or Governing Documents generally contain a description of the types of investments that other Clients have historically made and/or information about Apollo's expectations with respect to such Client, many factors may contribute to changes in emphasis in the construction of such Client's portfolio, including changes in market or economic conditions or regulation as they affect various industries and changes in the political or social situations in particular countries. There can be no assurance that the investment portfolio of any Client will resemble the portfolio of any prior Client.

Lack of Liquidity of Investments. Clients' portfolio investments generally consist primarily of debt investments, including, but not limited to, bonds, senior secured loans, unsecured loans, second lien loans, debtor-in-possession financings, delayed drawdown loans and revolving bank loans. Loans are not generally traded on organized exchange markets but rather would typically be traded by banks and other institutional investors engaged in loan syndications. The liquidity of portfolio investments will therefore depend on the liquidity of this market. Trading in loans is subject to delays as transfers may require extensive and customized documentation, the payment of significant fees and the consent of the agent bank or underlying obligor. In addition, certain investments may be subject to legal or contractual restrictions or requirements that limit the Client's ability to transfer them or sell them for cash. The resulting illiquidity of these investments may make it difficult for a Client to sell such investments if the need arises. If a Client needs to sell all or a portion of its portfolio over a short period of time, it may realize significantly less value than the value at which it had previously recorded those investments. There can be no assurance that Clients will be able to generate returns for their investors or that the returns will be commensurate with the risks of investing in the types of instruments described herein. As noted above, there is a possibility of partial or total loss of capital as a result of such constraints.

Possible Lack of Diversification. Each Client may concentrate its portfolio investments by investing all of its assets in only a few issuers, industries or countries. By investing in a limited number of portfolio investments, the aggregate returns realized by a Client may be substantially affected by the unfavorable performance of a small number of such portfolio investments.

Leverage. Clients, in certain instances, borrow and utilize various other forms of leverage, and expect to operate with a significant leverage ratio. Although leverage presents opportunities for increasing a Client's total return, it has the effect of potentially increasing losses as well. If income and appreciation on investments made with borrowed funds are less than the cost of the leverage, the total return of the leveraging Client will decrease. Accordingly, any event which adversely affects the value of a portfolio investment would be magnified to the extent a Client is leveraged. The cumulative effect of the use of leverage by Clients in a market that moves adversely to such Clients' investments or in the event portfolio investments experience credit quality deterioration could result in a substantial loss to Clients that could be substantially greater than if such Clients were not leveraged. In addition, contractual demands by lenders to a Client to reduce its leverage may force such Client to sell investments on an emergency basis at prices less than those obtainable in a more orderly liquidation. To the extent that a creditor has a claim on a Client, such claim would be senior to the rights of an investor in the Client. As a result, if a Client's losses were to exceed the amount of capital invested, an investor could lose its entire investment.

Financing Arrangements. To the extent that a Client enters into financing arrangements in the future, such arrangements may contain provisions that expose it to particular risk of loss. For example, any cross-default provisions could magnify the effect of an individual default. If a cross-default provision were exercised, this could result in a substantial loss for a Client. Also, Clients may enter into financing arrangements that contain financial

covenants that could require them to maintain certain financial ratios. If a Client were to breach the financial covenants contained in any such financing arrangement, it might be required to repay such debt immediately, in whole or in part, together with any attendant costs, and the Client might be forced to sell some of its assets to fund such costs. Certain Clients may also be required to reduce or suspend distributions. Such financial covenants would also limit the ability of the Apollo Credit Manager or Client to adopt the financial structure (*e.g.*, by reducing levels of borrowing) that it would have adopted in the absence of such covenants. In addition, pursuant to the partnership agreements of certain Clients, the general partner is permitted to pledge the capital commitments of the limited partners to secure financing arrangements for the Client. The limited partners may be required to honor their capital commitments to permit the Client to pay debt rather than to make investments.

Investments in Distressed Securities and Restructurings. Certain Clients make investments in restructurings that involve companies that are experiencing or are expected to experience severe financial difficulties. These financial difficulties may never be overcome and may lead to uncertain outcomes, including causing a company to become subject to bankruptcy proceedings. Investments in a financially troubled company could, in certain circumstances, subject the applicable Client to additional liabilities that may exceed the value of the Client's original investment in the company. For example, under certain circumstances, a lender who has inappropriately exercised control of the management and policies of a debtor may have its claims subordinated or disallowed or may be found liable for damages suffered by parties as a result of such actions. In addition, under certain circumstances, payments to Apollo Credit Funds or distributions by Apollo Credit Funds to their investors may be reclaimed if any such payment or distribution is later determined to have been a fraudulent conveyance, a preferential payment or similar transaction under applicable bankruptcy and insolvency laws. Furthermore, investments in restructurings may be adversely affected by statutes related to, among other things, fraudulent conveyances, voidable preferences, lender liability and the bankruptcy court's discretionary power to disallow, subordinate or disenfranchise particular claims or re-characterize investments made in the form of debt as equity contributions.

Hedging Policies/Risks. In connection with certain investments, Clients employ hedging techniques designed to reduce the risks of adverse movements in interest rates, securities prices, commodities prices, currency exchange rates, as well as other risks. While such transactions may reduce certain risks, hedging transactions themselves entail other risks. Thus, while Clients may benefit from the use of these hedging mechanisms, unanticipated changes in interest rates, securities prices, commodities prices, currency exchange rates or other factors may result in a poorer overall performance for Clients that enter into hedging transactions.

Uncertainty of Financial Projections. As part of its due diligence of a potential investment, the Apollo Credit Manager for a Client investing in securities or interests in a company generally may do so on the basis of the company's financial projections. Projected operating results normally will be based primarily on management judgments. In all cases, projections are only estimates of future results that are based upon

assumptions made at the time that the projections are developed. There can be no assurance that the projected results will be obtained, and actual results may vary significantly from the projections. General economic conditions, which are not predictable, can have a material adverse impact on the reliability of such projections and the performance of any investment in such company.

Participation Interests. Certain Clients purchase participation interests in debt instruments that do not entitle the holder thereof to direct rights against the obligor. Participations held by a Client in a selling institution's portion of a debt instrument typically result in a contractual relationship only with such selling institution, not with the obligor. Clients generally have the right to receive payments of principal, interest and any fees to which they are entitled only from the selling institution selling the participation and only upon receipt by such selling institution of such payments from the obligor. In connection with purchasing participations, a Client generally will have no rights to enforce compliance by the obligor with the terms of the related loan agreement, and no rights of set-off against the obligor, and such Client may not benefit directly from the collateral supporting the debt instrument in which it has purchased the participation. As a result, Clients will assume the credit risk of both the obligor and the selling institution selling the participation. In the event of the insolvency of such selling institution, Clients may be treated as general creditors of such selling institution and may not benefit from any set-off between such selling institution and the obligor. When Clients hold a participation in a debt instrument, they may not have the right to vote to waive enforcement of any restrictive covenant breached by an obligor. In addition, if a Client does not vote as requested by the selling institution, it may be subject to repurchase of the participation at par. Selling institutions voting in connection with a potential waiver of a restrictive covenant may have interests different from those of the Client, and such selling institutions may not consider the interests of the Client in connection with their votes.

Synthetic Securities. Certain Clients invest in synthetic securities such as swaps (including total return swaps), synthetic swaps, over-the-counter transactions and other derivative instruments. Investments through the purchase of synthetic securities present risks in addition to those resulting from direct purchases of the underlying securities or assets. With respect to synthetic securities, Clients usually will have a contractual relationship only with the counterparty of such synthetic security and not the underlying obligor. The collapse of certain financial institutions may be indicative of increased counterparty risk with respect to, among other things, transactions involving synthetic securities. Additionally, the transparency of the financial statements issued by financial institutions, particularly with respect to the value of complex financial assets, has been called into question. Clients generally will have neither the right to enforce directly compliance by the underlying obligor, nor any voting or other consensual rights of ownership with respect to the underlying obligation. Clients will not benefit directly from any collateral supporting the underlying obligation and will not have the benefit of the remedies that would normally be available to a holder of such underlying obligation. In addition, in the event of the insolvency of the counterparty, Clients will be treated as general creditors of such counterparty and will not have any claim of title with respect to the underlying obligation. Consequently, Clients will be subject to the credit risk of the counterparty as well as that of the underlying obligor. As a result, concentrations of

synthetic securities entered into with any one counterparty will subject Clients to an additional degree of risk with respect to defaults by such counterparty as well as by the underlying obligor.

Collateralized Debt Obligations. Certain Clients invest in CDOs and CLOs. The portfolios may consist of CLO equity, multi-sector equity, trust preferred CDO equity and CLO mezzanine debt. CDO securities are subject to credit, liquidity and interest rate risks. The CDO debt purchased by Clients may be unrated or below investment grade, which means there is a greater possibility that adverse changes in the financial condition of an issuer or in general economic conditions or both may impair the ability of the related issuer or obligor to make payments of principal or interest. Such investments may be speculative. In addition, as a holder of CDO equity, Clients will have limited remedies available upon the default of the CDO. From time to time, the market for CDO transactions has been adversely affected by a decrease in the availability of senior and subordinated financing for transactions, in part in response to regulatory pressures on providers of financing to reduce or eliminate their exposure to such transactions. CDOs often invest in concentrated portfolios of assets. The concentration of a portfolio in any one industry would subject the related CDOs to a greater degree of risk with respect to economic downturns relating to such industry.

The value of the CDO securities owned by Clients generally will fluctuate with, among other things, the financial condition of the obligors or issuers of the underlying portfolio of assets of the related CDO ("CDO Collateral"), general economic conditions, the condition of certain financial markets, political events, developments or trends in any particular industry and changes in prevailing interest rates. Consequently, holders of CDO securities must rely solely on distributions on the CDO Collateral or proceeds thereof for payment in respect thereof. If distributions on the CDO Collateral are insufficient to make payments on the CDO securities, no other assets will be available for payment of the deficiency and following realization of the CDO securities, the obligations of such issuer to pay such deficiency will generally be extinguished. CDO Collateral may consist of high-yield debt securities, loans, ABS and other securities, which may be rated below investment grade (or of equivalent credit quality). High-yield debt securities generally are unsecured (and loans may be unsecured) and may be subordinated to certain other obligations of the issuer thereof. The lower ratings of high-yield securities and below investment grade loans reflect a greater possibility that adverse changes in the financial condition of an issuer or in general economic conditions or both may impair the ability of the related issuer or obligor to make payments of principal or interest. Such investments are speculative.

Issuers of CDO securities may acquire interests in loans and other debt obligations by way of sale, assignment or participation. The purchaser of an assignment typically becomes a lender under the credit agreement with respect to the loan or debt obligation; however, its rights can be more restricted than those of the assigning institution. In purchasing participations, an issuer of CDO securities will usually have a contractual relationship only with the selling institution and not the borrower. The CDO generally will have neither the right to directly enforce compliance by the borrower with the terms of the loan agreement, nor any rights of set-off against the borrower, nor any rights to

object to certain changes to the loan agreement agreed to by the selling institution. The CDO may not directly benefit from the collateral supporting the related loan and may be subject to any rights of set-off the borrower has against the selling institution. In addition, in the event of insolvency of the selling institution, under the laws of the states and the United States of America, the CDO may be subject to the credit risk of the selling institution as well as of the borrower.

Consumer Loans. Investments in consumer loans may be subject to particular risks related to nonperformance. Secured consumer loans may involve collateral that is too highly leveraged, or limited by rehabilitation needs or poor management. Nonperforming consumer loans may also involve loan modifications that could reduce the loan's principal or interest rate, among other options. Consumer bankruptcy may also render a consumer loan partially or fully uncollectable. Additionally, there may be a limited market for the sale of consumer loans, or the collateral of defaulted consumer loans. A limited secondary market could prevent the recovery of adequate value for these assets.

Investments in Subordinated Debt. Certain Client investments consist of loans or securities, or interests in pools of securities that are subordinated or may be subordinated in right of payment and ranked junior to other securities issued by, or loans made to, obligors. If an obligor experiences financial difficulty, holders of its more senior securities will be entitled to payments in priority to Clients. Some of Clients' asset-backed investments also may have structural features that divert payments of interest and/or principal to more senior classes of loans or securities backed by the same assets when loss rates or delinquency exceeds certain levels. This may interrupt the income Clients receive from such investments, which may lead to Clients having less income to distribute to their investors. If the obligors are highly leveraged or Clients invest in securities that are unrated or rated below investment grade, such investments are subject to additional risks, including an increased risk of default during periods of economic downturn, the possibility that the obligor may not be able to meet its debt payments, and limited secondary market support, among other risks.

Investments in Equity Securities. Certain Clients may hold investments in equity securities and equity-related security derivatives. Clients may choose to short the equity of an issuer when another technique is not available, most notably a bond or some other derivative. The value of these financial instruments generally will vary with the performance of the issuer and movements in the equity markets. As a result, Clients may suffer losses if they invest in equity instruments of issuers whose performance diverges from expectations or if equity markets generally move in a single direction and the Clients have not hedged against such a general move. Clients also may be exposed to risks that issuers will not fulfill contractual obligations such as, in the case of private placements, registering restricted securities for public resale. In addition, equity securities fluctuate in value in response to many factors, including the activities and financial condition of individual companies, geographic markets, industry market conditions, interest rates and general economic environments.

High Yield Securities. Certain Clients may invest in high yield securities. Such securities are generally not exchange-traded and, as a result, these instruments trade in

the over-the-counter marketplace, which is less transparent than the exchange-traded marketplace. In addition, the Client may invest in bonds of issuers that do not have publicly traded equity securities, making it more difficult to hedge the risks associated with such investments. High yield securities face ongoing uncertainties and exposure to adverse business, financial or economic conditions that could lead to the issuer's inability to make timely interest and principal payments. The market values of certain of these lower-rated and unrated debt securities tend to reflect individual corporate developments to a greater extent than do higher-rated securities that react primarily to fluctuations in the general level of interest rates, and tend to be more sensitive to economic conditions than are higher-rated securities. Companies that issue such securities are often highly leveraged and may not have available to them more traditional methods of financing. It is possible that a major economic recession could severely disrupt the market for such instruments and may have an adverse impact on the value of such instruments. In addition, it is possible that any such economic downturn could adversely affect the ability of the issuers of such securities to repay principal and pay interest thereon and increase the incidence of default of such instruments.

Interest Rate Risk. Changes in interest rates can affect the value of a Clients' investments in fixed income instruments. Increases in interest rates may cause the value of a Clients' investments to decline. Certain Clients may experience increased interest rate risk to the extent they invest, if at all, in lower-rated instruments, debt instruments with longer maturities, debt instruments paying no interest (such as zero coupon debt instruments) or debt instruments paying non-cash interest in the form of other debt instruments.

Portfolio Investment Ratings. Investments in the debt of companies include commercial loans, high-yield corporate or other debt obligations of both U.S. and non-U.S. obligors rated below investment grade and other investment instruments as described in Item 4 of this Brochure, which have greater credit and liquidity risk than more highly-rated obligations.

Downgrades and negative rating actions may occur with respect to the investments and, in such case, there is no requirement to sell any such investment. Investments with lower ratings will have greater credit, insolvency and liquidity risk than more highly-rated obligations and, therefore, a greater risk of loss. In addition to credit and liquidity risk, lower-rated obligations have greater volatility than more highly-rated obligations. Future periods of uncertainty in the United States economy may increase volatility and default rates.

Use of Expert Networks. In connection with the analysis of certain investment opportunities, the Apollo Credit Managers engage expert networks. Apollo has implemented procedures to address the risk that use of expert networks could result in investment professionals receiving material nonpublic information. However, because Apollo's business operates on an integrated platform without ethical screens or information barriers, if such controls should fail and an investment professional were to obtain material nonpublic information, then the Apollo Credit Managers may be

restricted in acquiring or disposing of investments on behalf of Clients, which could impact the returns generated for Clients.

Risks Applicable to Insurance Company Clients of AAM. In addition to certain of the risks identified above, insurance company Clients are subject to significant risks relating to the matching of assets and liability characteristics such as interest rate duration and weighted average life and to credit risk. If assumptions relating to these characteristics prove to be incorrect and an insurance company's assets and liabilities are not appropriately matched, such insurance company's financial condition could be adversely affected, which may have resulting economic and regulatory implications for the Client, AAM and/or Apollo. Furthermore, insurance company portfolios tend to have a significant amount of interest rate-sensitive instruments. Interest rates are highly sensitive to many factors, including governmental monetary policies and domestic and international economic and political conditions and other factors beyond AAM's control. Because of the unpredictable nature of losses that may arise under insurance liabilities, liquidity needs could be substantial and may increase at any time. Changes in interest rates could have an adverse effect on the value of an insurance company investment portfolio and future investment income. For example, changes in interest rates could expose such Clients to prepayment risks on MBS. Increases in interest rates will generally decrease the value of investments in fixed-income securities. If increases in interest rates occur during periods when a Client is required to sell investments to satisfy liquidity needs, such Client may experience investment losses. If interest rates decline, reinvested funds will earn less than expected.

Insurance company Clients are also exposed to significant credit risk on fixed income securities, including investments in investment grade and high-yield bonds. Issuers or guarantors of such fixed income securities may default on principal or interest payments owed, or the underlying collateral may default on such payments, causing an adverse change in cash flows. An economic downturn affecting the issuers or underlying collateral of these securities, a ratings downgrade affecting the issuers of such securities, or similar trends and issues could cause default rates of the fixed income securities in these portfolios to increase resulting in losses to shareholders of such insurance companies.

Cyber-Security Risk. Investment advisers, including Apollo, increasingly rely on information and technology systems to conduct their business. Such systems might in some circumstances be subject to cybersecurity incidents or similar events that could potentially result in damage or interruption to these systems, unauthorized access to sensitive transactional and personal information, intentional misappropriation, corruption or destruction of data, or operational disruption. Apollo maintains an information technology security policy and has implemented certain technical and physical safeguards intended to protect the integrity of its information and technology systems. Nonetheless, despite reasonable precautions, cybersecurity incidents could potentially occur, and might in some circumstances result in the failure to maintain the security, confidentiality or privacy of sensitive data. Cybersecurity incidents experienced by third party vendors or service providers may indirectly affect Clients. Cybersecurity risks can disrupt the ability to engage in transactional business, cause direct financial loss and affect the value of

assets in which Clients invest, harm Apollo's reputation, lead to violations of applicable laws, result in ongoing prevention, risk management and compliance costs, and otherwise affect business and financial performance.

ITEM 9

Disciplinary Information

Except as described below, there are no legal or disciplinary events required to be disclosed pursuant to this Item 9.

On August 23, 2016, without admitting or denying any wrongdoing, certain related persons of Apollo Capital Management, namely Apollo Management V, L.P., Apollo Management VI, L.P., Apollo Management VII, L.P. and Apollo Commodities Management, L.P. consented to the entry of an order to cease and desist from committing or causing any violations and future violations of Section 206(2) and 206(4) of the Advisers Act and Rules 206(4)-7 and 206(4)-8 thereunder. According to the SEC order, such related persons did not provide sufficient pre-commitment disclosure regarding the possibility of accelerating otherwise authorized fees upon termination of monitoring agreements with their portfolio companies, a related person did not adequately disclose that interest from a loan from a private equity fund to its general partner would be allocated to the general partner, such related persons did not adequately supervise a former senior partner's expense reimbursement practices and such related persons failed to adopt and implement policies and procedures reasonably designed to prevent violations of the Advisers Act and its rules. As part of the settlement, such related persons agreed to pay \$37,527,000 of disgorgement and \$2,727,552 of prejudgment interest to limited partners of its fund and a civil monetary penalty of \$12,500,000 to the SEC.

ITEM 10

Other Financial Industry Activities and Affiliations

Apollo Global Securities, LLC ("AGS")

Affiliated Broker Dealer. AGS, a Delaware limited liability company and broker dealer affiliated with the Apollo Managers (as defined in Item 10 below), is registered to perform the following services: (i) conduct private placements; (ii) underwriting; (iii) provide transaction advisory services; (iv) assist in merger and acquisition transactions; (v) conducting the purchase and sale of corporate debt securities and (vi) arrange loans. AGS's private placement services include placement of Apollo Funds and syndicating transactions for portfolio companies. Any engagement of AGS's services by a Client (subject to its Governing Documents) generally will not require approval from such Client's advisory board if the transaction is conducted on an arm's-length basis. AGS's underwriting services are typically provided to Apollo Clients' portfolio companies. Fees received by AGS in connection with these services are disclosed in the applicable Governing Documents. Generally, AGS's role in a syndication is that of a co-manager and not as lead underwriter. AGS may receive transaction fees in connection with providing transaction advisory services to Apollo portfolio companies. A portion of these transaction fees may be applied to reduce Management Fees of certain investors in certain Clients, as described in Item 4 above. Finally, AGS may act as a broker or dealer reselling corporate debt or equity securities to Clients under Rule 144A under the Securities Act or

otherwise assisting in structuring or facilitating the initial resales of debt or equity securities under Rule 144A under the Securities Act.

The relationship between the Apollo Credit Managers and their affiliates and AGS may give rise to conflicts of interest between the Apollo Credit Managers and (i) Clients with respect to whom AGS provides services or (ii) Clients who have an interest in any portfolio investment or investment vehicles to whom AGS provides services. Certain persons of the Apollo Credit Managers that are involved in providing portfolio management services to Clients on behalf of the Apollo Credit Managers also will be involved in the business and operations of AGS. Such management persons may face conflicts of interest in dedicating time and resources to Clients, which may have a detrimental effect on Client performance. Apollo addresses this conflict of interest by providing in its Code of Ethics that all supervised persons have a duty to act in the best interests of each Client and by providing training to supervised persons with respect to conflicts of interest and how such conflicts are resolved under Apollo's policies and procedures.

Furthermore, while AGS's services are primarily as described above (*i.e.*, to Apollo, its Clients and its Clients' portfolio companies), it is possible that, in the future, AGS may also provide services (including financing, capital market and advisory services) to third parties, including third parties that are competitors of the Apollo Credit Managers or one or more of their affiliates or any portfolio companies. The expansion of AGS's services in this manner would present additional conflicts of interest. For example, AGS may also act as placement agent or underwriter of securities for a third party that may be acquired by the Client (for example, a Co-Investment Vehicle). In the event that AGS provides services to third parties, it may be adverse to the interests of the Client or portfolio investments. AGS also may come into possession of information that AGS is prohibited from acting on (including on behalf of a Client) or disclosing to the Apollo Credit Managers or any of their affiliates as a result of applicable confidentiality requirements or applicable law, even though such action or disclosure would be in the best interest of a Client or portfolio investment.

Affiliated Loan Origination and/or Servicing Businesses

Affiliates of the Apollo Managers and certain Apollo Clients and/or their portfolio companies may be engaged in the loan origination and/or servicing businesses. In connection with their lending activities, such loan origination and/or servicing businesses may receive certain fees, including, arranger, brokerage, placement, syndication, solicitation or underwriting, agency, origination, sourcing, structuring, collateral management, advisory, commitment, facility, float or other fees, discounts, spreads, commissions and concessions, and other fees received as part of such loan origination and/or servicing businesses. Such fees may be charged on a cost reimbursement or on a cost-plus basis. The Client or the issuers of financial instruments held by the Client may acquire loans originated, structured, arranged and/or placed and/or arranged by such affiliated loan origination and/or servicing businesses and in respect of which such businesses receive fees. To the extent set forth in the governing documents of an Apollo Credit Fund, some or all of these fees will not be applied to reduce Management Fees or other fees payable by the Client or any of its investments or otherwise directly or indirectly benefit the Client or any of its investors. Such fees will otherwise be borne by the Client or by the issuers of financial instruments held by the Client.

AP Alternative Assets, L.P.

The Apollo Credit Managers are affiliated with AP Alternative Assets, L.P., a limited partnership registered under the laws of Guernsey (“AAA”), whose common units are traded on the Euronext in Amsterdam, the regulated market of Euronext N.V. under the symbol “AAA”. AAA invests its capital through, and is the sole limited partner of, AAA Investments, L.P. (“AAA Investments”). AAA Investments has substantially all of its capital invested in Athene Holding.

In accordance with the services agreement among AAA, AAA Investments, certain subsidiaries of AAA Investments and Apollo (“AAA Services Agreement”) affiliates of Apollo Capital Management receive a Management Fee for managing the assets of AAA Investments. The Management Fee was paid through December 31, 2014 and was waived for the balance of the term of the AAA Services Agreement, although services will continue through December 31, 2020.

AAA Investments’ initial \$400 million investment in Athene Holding is subject to carried interest, which will generally entitle affiliates of Apollo Capital Management to realize a portion of the profits generated by the investment (generally, a percentage of net realized gains). Carried interest from AAA Investments is paid in shares of Athene Holding (at fair market value) if there is a distribution in kind of shares of Athene Holding (unless such payment in shares would violate Section 16(b) of the U.S. Securities Exchange Act of 1934, as amended (the “Exchange Act”)), or paid in cash if AAA sells the shares of Athene Holding.

The Apollo Credit Managers’ affiliation with AAA and AAA Investments is subject to the conflicts of interest set forth below in this Item 10.

Affiliated Apollo Managers

1. Private Equity – Apollo Management, L.P. is an affiliate of Apollo Capital Management, L.P. that is primarily engaged in managing Apollo’s private equity business and controls the private equity managers as set forth in the table below (collectively, with Apollo Management, L.P., the “Apollo Private Equity Managers”). The Apollo Private Equity Managers generally seek to make investments through several strategies including traditional buyouts, distressed buyouts and debt investments, and corporate partner buyouts. In addition to the traditional, distressed and corporate partner buyout activities, the Apollo Private Equity Managers also maintain the flexibility to deploy capital of the private equity funds managed by Apollo in other types of investments such as the creation of new companies.

Set forth below are the Apollo Private Equity Managers, which are registered as investment advisers relying on Apollo Management, L.P.’s investment adviser registration with the SEC, and their corresponding clients:

Manager	Client(s)
Apollo Management IV, L.P.	Apollo Investment Fund IV, L.P. and its parallel funds and the alternative investment vehicles, feeder funds and special purpose vehicles of any of the foregoing

Manager	Client(s)
Apollo Management V, L.P.	Apollo Investment Fund V, L.P. and its parallel funds and the alternative investment vehicles, feeder funds and special purpose vehicles of any of the foregoing
Apollo Management VI, L.P.	Apollo Investment Fund VI, L.P. and its parallel funds and the alternative investment vehicles, feeder funds and special purpose vehicles of any of the foregoing
Apollo Management VII, L.P.	Apollo Investment Fund VII, L.P. and its parallel funds and the alternative investment vehicles, feeder funds and special purpose vehicles of any of the foregoing
Apollo Management VIII, L.P.	Apollo Investment Fund VIII, L.P. and its parallel funds and the alternative investment vehicles, feeder funds and special purpose vehicles of any of the foregoing
LeverageSource Management, LLC	LeverageSource V S.a.r.l. LeverageSource XI S.a.r.l. LeverageSource Holdings Series III (Lux) S.a.r.l.
Apollo Co-Investment Management, LLC	Various co-invest vehicles
Apollo Management Singapore Pte. Ltd.	AIF VII Singapore Pte. Ltd. Apollo VIII Singapore Pte. Ltd. AION Investments Singapore Private Limited Apollo Asia Private Credit Master Fund Pte. Ltd. Apollo Credit Singapore Pte. Ltd.
AP VIII Prime Security Services Management, LLC	AP VIII Prime Security Services Holdings, L.P.
Apollo Special Situations Management, L.P.	Apollo Special Situations Fund, L.P. and its parallel funds and the alternate investment vehicles, feeder funds and special purpose vehicles of any of the foregoing

2. Natural Resources – Apollo Commodities Management, L.P. is an affiliate of Apollo Capital Management, L.P. that is primarily engaged in managing Apollo’s natural resources business and controls the natural resources managers as set forth in the table below (collectively, with Apollo Commodities Management, L.P., the “Apollo Commodities Managers”). The Apollo Commodities Managers capitalize on private equity investment opportunities in the natural resources industry, principally in the metals and mining, energy and select other natural resources sectors.

Set forth below are the Apollo Commodities Managers, which are registered as investment advisers relying on Apollo Commodities Management, L.P.’s investment adviser registration with the SEC, and their corresponding clients:

Manager	Client(s)
Apollo Royalties Management, LLC	Managed Account that invests in oil and gas royalty interests across North America. Subadviser to AAM
Apollo Commodities Management, L.P. with respect to Series I	Apollo Natural Resources Partners, L.P. and its parallel funds and the alternative investment vehicles, feeder funds and special purpose vehicles of any of the foregoing
Apollo Commodities Management, L.P. with respect to Series IV	Apollo Natural Resources Partners II, L.P. and its parallel funds and the alternative investment vehicles, feeder funds and special purpose vehicles of any of the foregoing

3. Real Estate – Apollo Global Real Estate Management, L.P. is an affiliate of Apollo Capital Management, L.P. that is primarily engaged in managing Apollo’s real estate business and controls the real estate managers as set forth in the table below (collectively, with Apollo Global Real Estate Management, L.P., the “Apollo Real Estate Managers”). The Apollo Real Estate Managers generally seek to make investments that are integrated and coordinated with Apollo’s private equity and credit business segments. The Apollo Real Estate Managers take a broad view of markets and property types in targeting debt and equity investment opportunities, including the acquisition and recapitalization of real estate portfolios, platforms and operating companies and distressed for control situations.

Set forth below are the Apollo Real Estate Managers, which are registered as investment advisers relying on Apollo Global Real Estate Management, L.P.’s investment adviser registration with the SEC, and their corresponding clients:

Manager	Client(s)
2012 CMBS-I Management, LLC	2012 CMBS-I Fund, L.P.

The Apollo Credit Managers, Apollo Private Equity Managers, Apollo Commodities Managers and Apollo Real Estate Managers (collectively, the “Apollo Managers”) intend to conduct their activities in accordance with the Advisers Act and the rules thereunder. Any employees of the Apollo Managers and any other persons acting on their behalf are and shall be subject to the supervision and control of Apollo Capital Management, Apollo Management, L.P., Apollo Commodities Management, L.P. or Apollo Global Real Estate Management, L.P., as applicable.

Commodities-Related Registration

Apollo Structured Credit Recovery Advisors III LLC, the affiliated general partner of Apollo Structured Credit Recovery Fund III LP and Apollo Offshore Structured Credit Recovery Fund III Ltd., Apollo Structured Credit Recovery Management III LLC and Apollo A-N Credit Management, LLC are registered with the Commodities Futures Trading Commission as commodity pool operators.

Certain Conflicts of Interests in Providing Services to Clients

Multiple Clients and Other Apollo Clients. Certain inherent conflicts of interest arise from the fact that: (1) the Apollo Credit Managers provide investment management services to more than one Client; (2) Clients may have one or more overlapping investment objectives; and (3) the

Apollo Credit Managers are affiliated with other Apollo Managers that provide investment management services to Apollo Funds that also may have overlapping investment objectives. In addition, the investment strategies employed by the Apollo Credit Managers for current and future Clients and by Apollo Managers for other Apollo Funds could conflict with the strategies employed by the Apollo Credit Managers for current and future Clients, and may affect the prices and availability of the securities and other assets in which such Clients invest. An Apollo Credit Manager or another Apollo Manager also may advise Clients with conflicting investment objectives or strategies. These activities may adversely affect the prices and availability of other securities or instruments held by or potentially considered for one or more Clients.

As part of Apollo's integrated platform, certain management persons of the Apollo Credit Managers provide services to other pooled investment vehicles or investment companies sponsored by Apollo, including the Company Act Clients. By way of example, certain management persons of the Apollo Credit Managers that are involved in providing portfolio management services to Apollo Credit Funds have direct incentive compensation arrangements with other Apollo Funds that pay incentive fees to their general partners. Such management persons are incentivized to (i) dedicate additional time and resources to Apollo Funds with which such persons have a direct incentive compensation arrangement, and (ii) allocate attractive investment opportunities to such Apollo Funds instead of Apollo Credit Funds, each of which may have a detrimental effect on the performance of Apollo Credit Funds.

Apollo addresses these conflicts of interest by providing in its Code of Ethics that all supervised persons have a duty to act in the best interests of each Client, providing training to supervised persons with respect to conflicts of interest and how such conflicts are resolved under Apollo's policies and procedures, and through the implementation of the investment allocation procedures described above in Item 6.

Similarly, Apollo Credit Managers may also from time to time, and without notice, in-source and/or outsource to its affiliates and third parties, certain of its processes or functions to provide, among other things, investment accounting and risk management services.

Diverse Membership. Investors in Clients are expected to include taxable and tax-exempt entities and persons domiciled or organized in various jurisdictions and subject to different tax and regulatory regimes. When investors and Clients co-invest alongside each other, they may have conflicting investment, tax and other interests, relating to, among other things, the nature of investments made by the Client, the structuring or the acquisition of investments and the nature and timing of disposition of investments. As a result, conflicts of interest may arise in connection with decisions made by the Apollo Credit Managers including as to the nature and structure of investments that may be more beneficial for one type of investor than for another type of investor. The results of a Client's activities may affect individual investors differently, depending upon their individual financial and tax situations. For example, the timing of a cash distribution or of an event of realization of gain or loss and its characterization as long-term or short-term gain or loss may affect investors differently. In addition, Clients may make investments that may have a negative impact on related investments made by the investors in separate transactions. Also, if a Client were required to qualify as a venture capital operating company ("VCOC") or a real estate operating company ("REOC") for purposes of the Employee Retirement Income Security Act of 1974 ("ERISA"), this could restrict, at any given time, the

level of investment which the Client would be able to make in entities that do not qualify as operating companies and/or pursuant to which the Client was unable to attain management rights. In selecting, structuring and managing investments appropriate for Clients, the Apollo Credit Managers will consider the investment and tax objectives of the Client or Clients as a whole, not the investment, tax, or other objectives of any investor individually. However, there can be no assurance that a result will not be more advantageous to some investors than to others or to affiliates of the Apollo Credit Managers than to a particular investor.

Directors of Portfolio Companies. Additional conflicts of interest arise because Apollo partners, principals and employees (including personnel of the Apollo Credit Managers) may serve as directors of, or acquire observer rights with respect to, certain companies in which Clients invest. In the event an Apollo Credit Manager or a related person (i) obtains material non-public information in such capacity with respect to any such company or (ii) is subject to trading restrictions pursuant to the internal policies of such company, the Apollo Credit Managers may be prohibited from engaging in transactions with respect to the securities or instruments of such company. Such a prohibition may have an adverse effect on Clients. In addition to any fiduciary duties that Apollo partners, principals and employees owe to Clients, as directors of portfolio companies, these Apollo partners, principals and employees owe fiduciary duties to other owners of the portfolio companies, which may be other Clients, and to persons other than Clients.

In general, such director or similar positions are often important to Clients' (and any other Apollo Funds with a similar investment focus) investment strategies and may have the effect of enhancing the ability of the Apollo Credit Managers and their affiliates to manage investments. However, such positions may have the effect of impairing the ability of the Apollo Credit Managers to sell the related securities when, and upon the terms, they may otherwise desire. In addition, because of the potential conflicting fiduciary duties that Apollo partners, principals and employees owe to a portfolio investment, on one hand, and that the Apollo Credit Managers owe to the Clients, on the other hand, such positions may place the Apollo partners, principals and employees in a position where they must make a decision that is either not in the best interests of Clients or not in the best interests of the other owners of the portfolio investment. Should an Apollo partner, principal or employee make a decision that is not in the best interests of the other owners of a portfolio investment, such decision may subject one or more Apollo Credit Managers and Clients to claims that they would not otherwise be subject to as an investor, including claims of breach of the duty of loyalty, securities claims and other director-related claims. In general, Clients will indemnify the Apollo Credit Managers and their partners, principals and employees from such claims. In addition, the Apollo partners, principals and employees may make decisions for a portfolio investment that negatively impact returns received by a Client investing in the portfolio investment or in other investments or, conversely, an Apollo Credit Manager could make a decision that negatively impacts a portfolio investment and the returns for other Clients that may be invested in the portfolio investment. In addition, because of conflicting fiduciary duties, Apollo Credit Managers may be restricted in choosing investments for Clients, which could negatively impact returns received by the Client. For example, if an Apollo partner, principal or employee was to obtain material nonpublic information about another potential Client investment.

Standards of Care and Indemnification. The Governing Documents of most Clients contain provisions that, subject to applicable law, reduce or modify the duties that certain covered

persons would otherwise owe to such Client or its investors. Pursuant to the typical standard of care set forth in the exculpation and indemnification provisions in the applicable Governing Documents of most Clients, the Apollo Credit Managers and each of their affiliates (including AGM) and each officer, director, partner, member, manager, shareholder and employee of the foregoing, and each member of the advisory board, if applicable (including, solely in connection with matters relating to the advisory board, the investor and/or other person on whose behalf the advisory board member is serving), will be indemnified and held harmless from losses sustained from any act or omission in connection with Clients' activities, absent (among other things) bad faith, gross negligence, willful misconduct, fraud or willful or reckless disregard of their duties and may receive advances for any fees, costs and expenses incurred in the defense or settlement of any claim that may be subject to a right of indemnification. For example, in their capacity as directors of portfolio companies, the officers, directors, partners, members, managers, employees and shareholders of the Apollo Credit Managers or their respective affiliates may be subject to derivative or other similar claims brought by shareholders of such companies. The fees, costs and expenses (whether or not advanced) and other liabilities resulting from such indemnification obligations are generally Operating Expenses and will be paid or otherwise borne by Clients (including by satisfaction out of unpaid capital contributions of their respective limited partners, shareholders or other investors).

The application of the foregoing standards may result in investors in such Clients having a more limited right of action in certain cases than they would in the absence of such standards. As a result of these considerations, even though such exculpation and indemnification provisions in a Client's Governing Documents will not act as a waiver on the part of such Client's investors of any of their rights under applicable U.S. securities laws or other laws the applicability of which is not permitted to be waived, the application of the foregoing standards may result in such Client bearing significant financial losses even where such losses were caused by the negligence (even if heightened) of such covered persons. Such financial losses may have an adverse effect on the returns to the applicable Client's investors and, if the Client's assets are insufficient to satisfy such Client's indemnification obligations, its investors may be required to return amounts distributed to them, subject to any limitations set forth in such Client's Governing Documents.

Client Advisory Boards. Certain Clients have advisory boards that consist of representatives of certain investors in such Clients. Any approval or consent given by such advisory boards tends to be binding on such Clients and all of their investors. Advisory boards are also generally authorized to give approvals or consents required under the Advisers Act, including under Section 206(3) of the Advisers Act. To the extent that an investor is not represented by a member of a Client's advisory board, such investor will have no influence over matters submitted to the advisory board for approval. Although the Apollo Credit Managers have adopted policies and procedures designed to manage conflicts among Clients, members of the advisory boards may themselves have conflicts of interest that do not disqualify such members from voting or consenting to matters submitted for consideration or review to the advisory boards on which they serve. In addition, if the member has an interest adverse to the Apollo Credit Managers, it may not act in the best interest of the Client that it represents. While the Apollo Credit Managers may adopt policies or procedures to address such conflicts in the future, they have not done so to date, and it may not be possible to entirely eliminate such conflicts.

Information Barriers and the Restricted List. Apollo currently operates without ethical screens or information barriers that other firms implement to separate persons who make investment decisions from others who might possess material non-public information that could influence such decisions. In an effort to manage possible risks from Apollo's decision not to implement such screens, Apollo maintains a Code of Ethics, as described in Item 11, and provides training to supervised persons with respect to conflicts of interest and how such conflicts are resolved under Apollo's policies and procedures. In addition, Apollo's Compliance Department maintains a list of restricted securities as to which Apollo may have access to material non-public information and in which Clients are not permitted to trade without prior approval from the Compliance Department. In the event that any employee of Apollo obtains such material non-public information, the Apollo Credit Managers may be restricted in acquiring or disposing investments on behalf of Clients, which could impact the returns generated for Clients.

Notwithstanding the maintenance of restricted lists and other internal controls, it is possible that the internal controls relating to the management of material non-public information could fail and result in an Apollo Credit Manager, or one of its investment professionals, buying or selling a security while potentially in possession of material non-public information. Inadvertent trading on material non-public information could have adverse effects on the reputation of the Apollo Credit Managers, result in the imposition of regulatory or financial sanctions, and as a consequence, negatively impact the Apollo Credit Managers' ability to perform investment management services on behalf of Clients. In addition, while Apollo currently operates without information barriers on an integrated basis, Apollo could be required by certain regulations, or decide that it is advisable, to establish information barriers. In such event, Apollo's ability to operate as an integrated platform could also be impaired, which would limit the Apollo Credit Managers' access to Apollo personnel and impair their ability to manage Clients' investments in the manner in which they currently manage investments.

Investment Activity by Apollo and Affiliates. From time to time, various potential and actual conflicts of interest arise from the overall advisory, investment and other activities of the Apollo Credit Managers, their affiliates, and their personnel. The Apollo Credit Managers will endeavor to resolve conflicts with respect to investment opportunities in a manner they deem equitable to the extent possible under the prevailing facts and circumstances. The Apollo Credit Managers' affiliates invest, on behalf of themselves, in securities and other instruments that would be appropriate for, are held by, or may fall within the investment guidelines of a Client. The Apollo Credit Managers' affiliates give advice or take action for their own accounts that may differ from, conflict with, or be adverse to, advice given to or action taken for Clients. These activities may adversely affect the prices and availability of other securities or instruments held by or potentially considered for, one or more Clients. Potential conflicts also arise due to the fact that the Apollo Credit Managers' affiliates may have investments in some Clients but not in others, or may have different levels of investments in the various Clients, and that each of the Clients may pay different levels of fees.

Apollo, together with the Apollo Funds, engages in a broad range of business activities and invests in portfolio companies whose operations may be substantially similar to and/or competitive with the portfolio companies and other investments in which Clients have invested. The performance and operation of such competing businesses could conflict with and adversely affect the performance and operation of Clients' portfolio companies, and may adversely affect

the prices and availability of business opportunities or transactions available to such portfolio companies. Apollo will seek to resolve conflicts in a manner that Apollo determines in its sole discretion to be fair and equitable.

Investment Company Act of 1940 Restrictions. The Company Act may limit a Company Act Client's ability to enter into certain transactions with its affiliates. For example, a Company Act Client may be prohibited from buying or selling any security directly from or to any portfolio investment of an Apollo Credit Fund managed by an Apollo Credit Manager. In certain circumstances, however, a Company Act Client may purchase such portfolio investment's securities in the secondary market. As noted under "Investment Activity by Apollo and Affiliates," owning competing securities of the same issuer could create a conflict for the Apollo Credit Manager between the interests of the Company Act Client and the portfolio investment, in that the ability of the Apollo Credit Manager to recommend actions in the best interest of certain Company Act Clients might be impaired. Even despite compliance with the Company Act, potential conflicts of interest may arise in such transactions. The Company Act also prohibits certain "joint" or "principal" transactions with certain of Apollo's affiliates, which could include investments in the same portfolio investment (whether at the same or different times). These prohibitions may limit the scope of investment opportunities that would otherwise be available to certain Company Act Clients.

Capital Structure Investments. The Apollo Credit Managers have ongoing relationships with many companies whose securities have been acquired by, or are being considered for investment by, Clients. From time to time, an Apollo Credit Manager will acquire securities or other financial instruments of an issuer for one Client which are senior or junior securities or financial instruments of the same issuer that are held by, or acquired for, another Client or Apollo Fund (e.g., one Client may acquire senior debt while another Client or Apollo Fund may acquire subordinated debt). Conflicts of interest may arise in such circumstances. For example, in the event such issuer enters bankruptcy, the Client holding securities which are senior in bankruptcy preference may have the right to aggressively pursue the issuer's assets to fully satisfy the issuer's indebtedness to the Client, and as a fiduciary, the Apollo Credit Manager might have an obligation to pursue such remedy on behalf of such Client. As a result, another Client holding assets of the same issuer which are more junior in the capital structure may not have access to sufficient assets of the issuer to completely satisfy its bankruptcy claim against the issuer and may suffer a loss.

The Apollo Credit Managers recognize that conflicts arise under such circumstances and will endeavor to treat all Clients fairly and equitably. To that end, the Apollo Credit Managers have adopted procedures that are designed to enable the Apollo Credit Managers to address such conflicts and to ensure that Clients are treated fairly and equitably. No Client is permitted to acquire securities or other interests of a class that is senior or junior to a class of securities of an issuer already held by another Client unless such investment practice has been disclosed to such Client (for example, in the Governing Documents for each of the affected Clients, which will also contain appropriate risk and conflict disclosures).

Insurance Coverage. The Apollo Funds, other than the publicly traded funds managed by subsidiaries of Apollo, are covered under Apollo's professional liability insurance policy and do not separately maintain professional liability insurance. To the extent a claim arises relating to

any of the insureds during a policy period that erodes some or all of the limits under Apollo's policy, there will be less coverage, or potentially no coverage, available for all of the insureds under the policy for the remainder of the policy period.

Athene Asset Management, L.P. (f/k/a Athene Asset Management, LLC)

AAM is a subsidiary of Apollo Capital Management and is registered with the SEC as an investment adviser relying on Apollo Capital Management's investment adviser registration. AAM generally acts as investment adviser to the Athene Group, certain accounts of insurance companies that are reinsurance clients of the Athene Group and third party insurance company managed accounts.

AAM's Chief Executive Officer has equity ownership interests in, and is the Chief Executive Officer and Chief Investment Officer and a director of both AAM and Athene Holding. Certain other directors, officers and employees of AAM and AGM also hold ownership interests in Athene Holding, are eligible to receive equity incentives from Athene Holding, and/or have a portion of their incentive compensation determined by certain metrics based on the performance of Athene Holding. Such arrangements may create an incentive to favor Athene Group related Clients by, for example, allocating attractive investment opportunities to such Clients or dedicating additional time and resources to such Clients, each of which may have a detrimental effect on the performance of other Clients of AAM. Certain of the Athene Holding shares awarded to personnel of AAM vest based in part on the performance of Athene Holding, which may create an incentive to make more speculative investments on behalf of the Athene Group related Clients than such persons might otherwise make in the absence of such incentive compensation. AAM addresses this conflict of interest by providing in its Code of Ethics that all supervised persons have a duty to act in the best interest of each Client, providing training to supervised persons with respect to conflicts of interest and how such conflicts are to be resolved under Apollo's policies and procedures and by maintaining other written policies and procedures such as investment allocation procedures.

Additionally, Apollo controls (either directly or as a fiduciary on behalf of its Clients) 45% of the voting control over Athene Holding, and Apollo employees constitute a significant portion of the Board of Directors. Due to such voting structure, the potential exists for Apollo to cause members of the Athene Group to enter into transactions that may benefit Apollo (including AAM) at the possible detriment to Athene Holding's shareholders. In order to mitigate certain potential conflicts of interest that arise, a conflicts committee of the Board of Directors of Athene Holding ("AHL Conflicts Committee") has been established. The purpose of the Conflicts Committee is to review and provide consent to certain conflicts of interest regarding transactions involving Athene Holding and/or its subsidiaries, on the one hand, and Apollo and its affiliates, including AAM, on the other (alternatively, such consent can also be provided by a majority of the disinterested directors of Athene Holding's Board of Directors). Not all conflicts are subject to the approval of the AHL Conflicts Committee (for example, non-material transactions or transactions that are less likely to be on terms that are less advantageous to the Athene Group than can be obtained through arm's-length negotiations are not required to be reviewed by the AHL Conflicts Committee).

In addition to Management Fees payable by each Client, in certain instances, Athene Holding on behalf of certain of its subsidiaries and certain of the Athene Group's reinsurance clients has also agreed to pay additional fees and expenses not provided for in the applicable Management Agreement. AAM may also earn, with respect to certain investments, monitoring fees, carry, and, with respect to certain commercial mortgage loans, servicing fees related to the servicing of such mortgages. Such fees do not reduce any Management Fee that is otherwise payable to AAM, although AAM has and may continue to provide the Athene Group certain fee rebates or discounts that AAM does not provide to its other Clients.

AAM generally has the authority to hire subadvisers, including other Apollo Credit Managers and Apollo Managers, and to agree to the fees and other remuneration payable to such subadvisers, which fees are generally reimbursable to AAM and do not reduce fees otherwise payable to AAM. In connection therewith, AAM has hired (and may continue to hire) certain Apollo Managers to act as subadvisers for certain asset classes and may hire additional Apollo Managers in the future with respect to other asset classes. In connection with such services, certain Apollo Managers receive subadvisory fees and such fees are generally reimbursable by the Clients and/or by Athene Holding or certain of its subsidiaries in certain circumstances. In such instances, Apollo's fees may not be the lowest fees available for similar subadvisory or investment management services offered by Apollo Managers or unrelated advisors. If Client consent is required, or the Client does not permit, the appointment of such a subadviser, and/or the Client has not agreed to pay the fees and/or expenses of any such subadviser, AAM may manage the Client's account without the use of subadvisers, including Apollo affiliated investment advisers.

AAM has invested its Clients in, and in the future may invest its Clients in, alternative investments, including the Apollo Funds, and in investments that are originated or sponsored by other Apollo Credit Managers and Apollo Managers. Apollo may be entitled to receive various forms of consideration with respect to such investments, including Management Fees, portfolio fees, closing fees, performance fees (e.g. carried interest) and/or employment expense reimbursement and such fees may not be the lowest fees available for similar services offered by Apollo or unrelated advisors. Fees otherwise payable to AAM with respect to its management of Clients' accounts are not reduced by any fees paid or payable as a result of the payment of such consideration to affiliates of AAM.

From time to time, different investment teams of AAM and Apollo may invest in the same strategies for different Clients. Where Apollo Managers (other than AAM) source investment opportunities, allocations of such investment opportunities are generally made across all suitable Clients including, without limitation, Clients of AAM that are subject to subadvisory arrangements between AAM and such Apollo Manager. However, where AAM investment teams source a particular investment opportunity, AAM and Apollo investment teams generally function independently of each other and may not share such investment opportunities. As a result, in certain situations, Clients may compete for the same investment opportunities, potentially disadvantaging the competing Clients. Allocations to Clients in these situations may deviate from the general allocation policies described in Item 6.

In addition, certain Apollo Funds own the same or similar securities and other financial instruments that AAM has selected for its Clients. The Apollo Funds may acquire such securities

at different times and/or different prices than Athene Holding and its subsidiaries or other AAM Clients and may acquire different classes of securities of the same issuer (*e.g.*, an Apollo Fund owns subordinated debt and an AAM Client owns senior debt in an issuer or vice versa). Apollo and its affiliates may also make investments that are contrary to the investments made by Athene Holding and its subsidiaries and/or other AAM Clients (*e.g.*, Apollo may take a short position in a security in which Athene Holding or such other AAM Client holds a long position). This may give rise to conflicts of interest regarding the management strategy taken toward such securities held by Athene Holding or such other AAM Clients and the Apollo Funds.

Similarly, certain AAM Clients may acquire the same or similar securities and financial instruments at different times and/or different prices and may acquire different classes of securities of the same issuer. Certain AAM Clients may also make investments that are contrary to the investments made by other AAM Clients. This may also create a conflict of interest regarding the management strategy taken by AAM toward such securities held by such AAM Clients.

AAM acts as the investment manager for certain reinsurers within the Athene Group (each, an “Athene Reinsurer”) that have reinsured certain insurance liabilities issued by other members of the Athene Group and third party insurance companies (“Cedent Companies”) in reinsurance transactions. In general, such reinsurance arrangements are structured such that, as between the Cedent Company and the Athene Reinsurer (both of which may be clients of AAM), the Athene Reinsurer bears the risk of loss on, and is entitled to the gains generated from, the related reinsurance asset portfolio. In managing an account related to a reinsurance transaction, AAM takes into consideration the nature of the reinsurance relationship as a whole and may, in making investment and other portfolio decisions, view the economics and risks associated with the assets in such account as primarily the economics and risks of the applicable Athene Reinsurer regardless of whether title to such assets continues to be held by the Cedent Companies. The Athene Group may also provide certain accounting, risk and other information and guidance relating to Cedent Company accounts in connection with AAM’s management of such reinsurance related account.

With respect to valuation of assets of the Athene Group and Cedent Companies, such parties have agreed that fair valuation may be performed by Athene Holding or its subsidiaries, which fair valuations will be determined in accordance with Athene Holding’s policies and procedures which may differ from AAM’s valuation policies and procedures. Notwithstanding that Athene Holding or its subsidiaries may fair value assets of the Athene Group and Cedent Companies, AAM may independently perform its own fair valuation of such assets using its own valuation policies and procedures for any number of reasons, including, without limitation, in connection with cross trades between Clients.

AAM may from time to time, and without notice, in-source and/or outsource to its affiliates and third parties, certain of its processes or functions in connection with Client Accounts, and the Athene Group may provide a variety of services to AAM, such as, without limitation, risk management and investment accounting services AAM Clients. For example, certain books and records of AAM are maintained on behalf of AAM by the Athene Group.

MidCap FinCo Limited

MidCap FinCo Limited, a private limited company domiciled in Ireland, and its subsidiaries (collectively referred to as “MidCap Financial”) are managed by Apollo Capital Management pursuant to an Management Agreement. MidCap Financial launched in January 2015 and is focused on direct lending opportunities in the senior secured credit market across a diverse range of industries and asset classes. MidCap Financial includes the former operations and assets of MidCap Financial Holdings, LLC, a leading specialty finance firm focused on senior secured direct origination in the healthcare sector (“MidCap Holdings”). MidCap Holdings was primarily owned by AAA Investments (Co-Invest VII), L.P. (“AAA Co-Invest VII”) in which subsidiaries of Athene Holding were the only limited partners at the time of MidCap Holdings’ contribution by AAA Co-Invest VII to MidCap Financial pursuant to a transfer agreement on January 21, 2015.

MidCap Financial Services, LLC, a MidCap Financial subsidiary, provides sourcing, due diligence and portfolio management services to MidCap Financial pursuant to a services agreement.

MidCap Financial Services, LLC employs a team of more than 76 employees headquartered in Bethesda, Maryland, complete with asset management and back office infrastructure, systems and processes capable of full lender services.

Investment opportunities sourced for MidCap Financial may be appropriate for other Clients, and therefore, personnel from MidCap Financial Services, LLC and Apollo Capital Management may communicate from time to time about such investment opportunities. To address the conflict of interest that could arise from such an arrangement, Apollo Capital Management and MidCap Financial have enacted policies and procedures that are designed to monitor and address these potential conflicts.

Redding Ridge Asset Management, LLC (“RRAM”)

As described in Item 2, a number of entities that are affiliated with Apollo Capital Management provide services to RR Holdings and its wholly owned subsidiary RRAM. Interests in RR Holdings are held by Apollo Principal Holdings VII, L.P., a Delaware limited partnership and indirect subsidiary of AGM, certain private investment funds managed by subsidiaries of AGM and certain third party investors. RRAM primarily advises, and holds certain collateralized loan obligation securities, including “risk retention” interests in, pooled investment vehicles that are CLOs and related CLO Warehouses.

Services provided to RRAM by certain affiliates of Apollo Capital Management may include: (i) identifying potential investment opportunities within the specific investment and business strategies of the CLOs and CLO Warehouses in which RRAM manages; (ii) providing research, assessments and other information on potential investment opportunities; (iii) passing along information that was provided from third parties with respect to potential investment opportunities; (iv) providing middle, back-office and other administrative services including, but not limited to, supporting legal, tax, compliance and risk functions; and (v) providing advice and expertise related to the initial organization and structure of RRAM and its affiliates and

permission for RRAM to use the Apollo Capital Management's contacts at various institutions to effectively identify investors.

RRAM, RR Holdings and the CLOs and CLO Warehouses in which they invest will bear fees, costs or expenses in connection with these services. In consideration for providing such services, certain affiliates of Apollo Capital Management are entitled to service fees pursuant to service agreements with RRAM and incentive allocations pursuant to the RR Holdings limited partnership agreement. These affiliates are also entitled to be reimbursed for certain costs and expenses pursuant to such service agreements and the RR Holdings limited partnership agreement.

Affiliates of Apollo Capital Management share certain employees with RRAM. Conflicts of interest may arise from the fact that certain employees of affiliates of Apollo Capital Management are shared employees with RRAM and are involved in the management of advisory clients. Participation in specific investment opportunities may be appropriate at times for clients of both Apollo Capital Management's affiliates and RRAM. Investment programs with respect to CLOs and other financial instruments are expected to overlap. In light of the various relationships between RRAM and Apollo Capital Management and its affiliates, there may be an incentive for Apollo Capital Management and its affiliates to pursue investment opportunities in a way that is favorable to RRAM. Apollo Capital Management and RRAM have implemented allocation policies and procedures that are intended to, among other things, mitigate this potential conflict.

Apollo Credit Managers may invest in transactions as principal with respect to loans and securities or other investments that may be purchased, sold or held by RRAM. Any such affiliate transactions will be undertaken in accordance with applicable provisions of the Advisers Act. In connection with their ongoing management of currently existing CLOs, the Apollo Credit Managers may invest in CLOs and CLO Warehouses or loans in which RRAM also maintains an investment. The Apollo Credit Managers do not, however, currently anticipate sponsoring any new CLOs.

RRAM is also expected to perform limited services for Apollo Credit Management (CLO), LLC relating to the optimization (including, but not limited to, refinancings and "amends and extends") of existing CLOs that are managed by Apollo Credit Management (CLO), LLC.

Apollo Capital Management and Redding Ridge Asset Management have implemented policies and procedures, including physical and information barriers, between their respective businesses in order to mitigate the potential conflicts of interest that may arise in connection with their relationships.

The Lapithus Group

The Lapithus Group ("Lapithus") is a captive pan-European loan servicing and real estate asset management platform of Apollo, which serves investments owned by EPF, EPF II and other Apollo Funds. Lapithus is currently wholly owned by EPF II. Lapithus continues to provide services to EPF. It is also expected that, in the future, Lapithus may be engaged to perform loan

servicing functions on behalf of other Apollo Funds and accounts that invest in, among other things, European and non-European loan portfolios.

Apollo Asset Management Europe LLP and Apollo Asset Management Europe LLP

Apollo Asset Management Europe LLP and its subsidiary Apollo Asset Management Europe LLP (together, “AAME”), domiciled in the United Kingdom, comprise a European business segment of Apollo whose primary purpose will be to provide (1) a centralized asset management and risk function and (2) origination services (“Client Services”), to European clients in the financial services and insurance sectors that are owned by Apollo Funds and subsidiaries of Athene Holdings, and potentially to other European clients in the future. The Client Services are provided to clients either on a discretionary or advisory basis pursuant to services agreements. Currently, AAME provides Client Services to its clients jointly with Apollo Management International LLP (“AMI”), which is authorized and regulated by the UK Financial Conduct Authority (“FCA”). Effective February 24, 2016, AAME has been approved as an appointed representative of AMI by the FCA and it is expected that, in the future, AAME apply to the FCA for authorization to hold the relevant regulatory permissions to become the sole provider of the Client Services under the services agreements.

Family Offices

Our three managing partners have established family offices to provide investment advisory, accounting, administrative and other services to their respective family accounts (including certain charitable accounts) in connection with their personal investment activities unrelated to their investments in Apollo entities. Each of the family offices employs its own professional staff at its own expense, and each of them conducts its day-to-day operations independently of Apollo. The managing partners generally do not participate in decisions to invest in specific securities, but they do make decisions relating to allocations among strategies, asset classes, sectors and internal and external portfolio managers. If and when the managing partners do participate in a decision to invest in specific securities, the managing partners are required to obtain permission from Apollo’s Chief Compliance Officer or designee prior to investing in such securities. For this purpose, the managing partners generally have access to position-level data concerning the investments held in the family office accounts. The investment activities of the family offices, and the involvement of the managing partners in these activities, could give rise to potential conflicts between the personal financial interests of the managing partners and the interests of Clients (for example, if the family offices were to hold debt obligations or securities in a portfolio company in which a Client owned equity or subordinated debt and that was experiencing financial distress). AGM has adopted certain procedures designed to mitigate some of these potential conflicts (for example, by requiring investment professionals employed by the family offices to refrain from making direct investments in portfolio companies that are controlled by Clients or that are the subject of announced transactions involving Clients).

Other Related Persons

Related persons of the Apollo Credit Managers serve as sponsors or syndicators of limited partnerships. Apollo, and certain affiliates of Apollo, serve as general partners of Apollo Funds

and are regularly engaged in the business of sponsoring pooled investment vehicles and managed accounts. Conflicts of interest associated therewith are discussed above.

Selection of Service Providers

Except as may otherwise be provided under the terms of a Client's Governing Documents, the Apollo Credit Managers or one or more of their affiliates will generally select Clients' service providers and will determine the compensation of such providers without review by or the consent of an advisory board, the investors or an independent party. Clients, regardless of the relationship to the Apollo Credit Managers, their affiliates or the person performing the services, bear the fees, costs and expenses related to such services. This may create an incentive for an Apollo Credit Manager or an applicable affiliate to select an Affiliated Service Provider or to select service providers based on the potential benefit to the Apollo Credit Manager, rather than to Clients. For example, Apollo Capital Management may select service providers that use its or its affiliates' premises, for which Apollo Capital Management or one of its affiliates does not currently, but may in the future, receive overhead, rent or other fees, costs and expenses in connection with such on-site arrangement.

Apollo Capital Management or one or more of its affiliates may engage the same service provider to provide services to a Client that also provides services to Apollo Capital Management or any such affiliate, which creates a potential conflict of interest to the extent the interests of such parties are not aligned. For example, a law firm may at the same time act as legal counsel to a Client, its general partner or similar person, its investment advisor or other affiliates of Apollo Capital Management.

The Apollo Credit Managers and their affiliates address these conflicts of interest by using reasonable diligence to ascertain whether each service provider (including law firms) provides its service on a "best execution" basis, taking into account factors such as expertise, operational and regulatory controls, availability and quality of service and the competitiveness of compensation rates in comparison with other service providers satisfying the Apollo Credit Managers' or their affiliates' service provider selection criteria. In addition, in the event such service providers are affiliates of the Apollo Credit Managers (as opposed to third parties), the engagement of such providers must typically comply with the conditions applicable to affiliate transactions, if any, set forth in the Clients' Governing Documents.

ITEM 11

Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Code of Ethics

The Apollo Managers have adopted a Code of Ethics (the "Code") designed to ensure compliance with Rule 204A-1 under the Advisers Act. The Code applies to all partners, principals, directors, officers, employees and supervised persons of Apollo (each a "Covered Person"). The Apollo Managers strive to adhere to the highest industry standards of conduct based on principles of professionalism, integrity, honesty and trust. Accordingly, the Code incorporates the following general principles that all Covered Persons are expected to uphold:

- (i) Covered Persons must at all times place the interests of the Apollo Funds first;

- (ii) all personal securities transactions must be conducted in a manner consistent with the Code and any actual or potential conflicts of interest or any abuse of a Covered Person's position of trust and responsibility must be avoided;
- (iii) Covered Persons must not take inappropriate advantage of their positions;
- (iv) information concerning the identity of securities and financial circumstances of the Apollo Funds, including investors in Apollo Funds, must be kept confidential; and
- (v) independence in the investment decision-making process must be maintained at all times.

Finally, Covered Persons are required to comply with applicable federal securities laws at all times.

Personal Trading Restrictions

The Code requires that Covered Persons' personal investment activities comply with all applicable laws and regulations. In addition, Covered Persons are required to obtain prior approval for all securities transactions (including, but not limited to, investments in private placements and limited offerings) other than those involving: Government and municipal securities; exchange-traded funds and closed-end funds; mutual funds (*i.e.*, open-ended investment companies); variable annuities; commodities; and transactions in fully-managed accounts where Covered Persons or other Relevant Persons (as defined below) significantly contribute. Covered Persons are prohibited from purchasing securities in initial public offerings.

The Code provides that approval generally will not be granted for securities of companies on Apollo's Restricted List. Further, approval generally will not be granted for short sales and proposed securities transactions in securities of companies with a market capitalization for the outstanding equity on the date of trade of more than \$100 million and less than \$10 billion. This "market-capitalization band" may be changed from time to time.

Personal Securities Holdings and Transaction Reports

Subject to limited exceptions, each Covered Person must periodically submit to the Chief Compliance Officer or designee a report of the holdings and transactions in the accounts in which the following persons have a direct or indirect beneficial ownership interest or over which the following persons exercise any investment control, influence or discretion: (i) the Covered Person; (ii) any member of the Covered Person's immediate family and to whose support the Covered Person significantly contributes, which may include the Covered Person's spouse, children, stepchildren, grandchildren, parents, grandparents, stepparents, siblings, persons with whom a Covered Person has an adoptive or in-law relationship; or (iii) any other person a Covered Person significantly contributes. (Each individual identified in clauses (i) and (iii) a, "Relevant Person").

The holdings reports must contain, at a minimum: (i) the title and type of security, and, as applicable, the exchange ticker symbol or CUSIP number, number of shares and principal amount of each reportable security in which the Relevant Persons have any direct or indirect

beneficial ownership; (ii) the name of any broker, dealer or bank with which the Relevant Persons maintain an account in which any securities are held for the Relevant Person's direct or indirect benefit; (iii) if securities are held other than with a broker, dealer or bank, the location of the securities; and (iv) the date that the Covered Person submits the report to the Chief Compliance Officer or designee.

The transactions reports must contain, at a minimum: (i) the date of the transaction, the title and, as applicable, the exchange ticker symbol or CUSIP number, the interest rate and maturity date, the number of shares and the principal amount of each reportable security involved; (ii) the nature of the transaction (i.e., purchase, sale or any other type of acquisition or disposition); (iii) the price of the security at which the transaction was effected; (iv) the name of the broker, dealer, bank or other financial institution with or through which the transaction was effected; (v) if not effected through a broker, dealer or bank, the location of the securities and a description of how the transaction was effected; and (vi) the date that the Covered Person submits the report to the Chief Compliance Officer or designee.

Submission to the Chief Compliance Officer or designee of a duplicate copy of the most recent periodic financial institution statements of the Relevant Persons, will be sufficient to fulfill the Holdings and Transactions Report requirement if such financial institution statements include all required information for all securities. The Chief Compliance Officer or designee shall ensure that duplicate account information for all accounts of Relevant Persons is sent directly to the Chief Compliance Officer, designee or electronically through our Personal Trading Control Center, PTCC.

The Code requires each Covered Person to prepare or certify, on at least an annual basis, reports of securities holdings and transactions.

Material, Non-Public Information

The Code includes policies and procedures concerning "inside information" (the "Insider Trading Policies") that are designed to prevent the misuse of material, non-public information. Covered Persons are required to certify to their compliance with the Code, including the Insider Trading Policies, on a periodic basis. The Insider Trading Policies prohibit the Apollo Managers and Covered Persons from trading for Clients or themselves, or recommending trading, in securities of a company while in possession of material, non-public information ("Inside Information") about the company, and from disclosing such information to any person not entitled to receive it.

By reason of their various activities, Apollo Managers may have access to Inside Information and, as a result, be restricted from effecting transactions in certain investments that might otherwise have been initiated. For example, there may be certain cases where the Apollo Managers or their personnel receive Inside Information due to their various activities on behalf of Apollo Funds, which could result in either limited liquidity or in the Apollo Credit Managers or their personnel being prohibited from using such information for the benefit of Apollo Credit Funds. By way of another example, Apollo's investment professionals must obtain approval from Compliance prior to engaging any expert network and must send affirmations indicating that they did not receive material nonpublic information and that the expert did not breach any

duty of confidentiality. The Apollo Managers seek to minimize those cases whenever possible, consistent with applicable law and the Insider Trading Policies, but there can be no assurance that such efforts will be successful and that such restrictions will not occur. Apollo's investment professionals receive initial and annual training in the use of expert networks and paid consultants.

Other Provisions of the Code

Covered Persons are subject to additional standards of conduct relating to the use of funds and property, conflicts of interest and opportunities belonging to Clients, managing investments of related parties, and general standards of conduct including the conduct expected when dealing with Clients and the investors in Clients. In addition, Covered Persons are subject to Apollo's Anti-Money Laundering procedures. Covered Persons are required to certify periodically that they have complied with the terms of the Code. Violations of the Code are subject to the imposition of sanctions, up to and including termination.

A copy of the Code will be provided to any Client or prospective Client upon request.

Principal and Cross Transactions

The Apollo Credit Managers and their personnel do not purchase any securities for their own accounts from, or sell any securities for their own accounts to, Clients in a principal transaction.

Apollo Credit Managers may direct, from time to time and subject to applicable Client investment guidelines and restrictions, one Client to sell securities to another Client (or with other Apollo Funds) through an internal cross transaction. Cross transactions may be executed with the assistance of a broker-dealer or as an "internal cross" where the Clients' custodian(s) is instructed to book the transaction at a price determined in accordance with Apollo's valuation policies. No fees will be charged by Apollo or its affiliates to Clients in connection with the completion of a cross trade. In certain cases, cross trades may be viewed as principal transactions due to the ownership interest in the Client by Apollo.

Cross transactions and principal transactions give rise to conflicts of interest between Clients. For example, one Client could be advantaged to the detriment of another Client in the event that the securities being exchanged are not priced in a manner that reflects their fair value. In addition, the Apollo Credit Managers could use their investment authority to transfer unappealing securities from one Client to another Client.

Clients may also have the opportunity to engage in commercial or consumer loan transactions provided or sponsored by an affiliate of the Apollo Credit Managers. There may be potential conflicts of interest relating to these transactions.

To the extent that any cross transaction or affiliate transaction described above may be viewed as a principal transaction due to the ownership interest in the Client of an Apollo Credit Manager and its personnel, the Apollo Credit Manager will comply with the requirements of Section 206(3) of the Advisers Act and their internal policies and procedures. Specifically, the applicable Apollo Credit Manager's investment professionals must provide notice to, and obtain the approval of, the Chief Compliance Officer or designee, the Client's portfolio manager, and a

member of the legal and finance departments prior to executing a principal trade or cross trade. When reviewing a proposed principal trade or cross trade, the Chief Compliance Officer or designee shall confirm, among other things: (i) that such trade is allowed by the applicable Client's investment guidelines, (ii) that the Apollo Credit Manager's valuation procedures were followed when pricing the transaction, including obtaining a third-party valuation when appropriate, and (iii) in the case of principal trades, that notice of the specific trade was provided to the Client and written consent from the Client was obtained.

Potential Duties to AGM Shareholders

The Apollo Managers, including Apollo Capital Management and Apollo Management, are affiliates of AGM. The class A shares of AGM are publicly traded on the New York Stock Exchange. As a result, the Apollo Managers have duties or incentives relating to the interests of AGM's shareholders that may differ from, and that could conflict with, the interests of the Clients and their investors, such as conflicts arising from the allocation of expenses, fee offsets and investment opportunities (specifically, opportunities in the financial services industry). The Apollo Managers will endeavor to resolve such conflicts in a manner they deem fair and equitable to the extent possible under the prevailing facts and circumstances. The Apollo Managers will seek to allocate investment opportunities in the financial services industry between Apollo and Clients in accordance with their respective Governing Documents and will evaluate such opportunities in accordance with AGM's allocation policies and procedures. In the past, the application of such policies has resulted in the allocation by Apollo Managers of certain investment opportunities relating to the alternative investment management business to Apollo rather than to Clients (for example, the acquisition of other financial service businesses), and the Apollo Managers may allocate such opportunities in a similar manner in the future.

ITEM 12

Brokerage Practices

Execution

Portfolio transactions will be executed by brokers selected by the applicable Apollo Credit Manager in its absolute discretion. In placing portfolio transactions, the Apollo Credit Managers must use reasonable diligence to ascertain the "best" market price for all securities bought or sold in that market so that the price to the Apollo Funds is as favorable as possible under prevailing market conditions. The determinative factor is whether the transaction represents the best qualitative execution for the Client and not whether the lowest possible commission cost is obtained. The Apollo Credit Managers consider the full range of quality of the broker's service in selecting brokers to meet best execution obligations and may not pay the lowest commission rates available.

The Apollo Credit Managers generally take the following factors into account in selecting brokers for portfolio transactions:

- (i). the ability to effect prompt and reliable executions at favorable prices (including the applicable dealer spread or commission, if any);

- (ii). the operational efficiency with which transactions are effected, taking into account the size of order and difficulty of execution;
- (iii). the financial strength, integrity and stability of the broker;
- (iv). the broker firm's risk in positioning a block of securities;
- (v). the quality, comprehensiveness and frequency of available research services considered to be of value; and
- (vi). the competitiveness of commission rates in comparison with other brokers satisfying the Apollo Credit Managers' other selection criteria.

The Apollo Credit Managers are not required to weigh any of these factors equally.

The Apollo Credit Managers may invest on behalf of Clients in senior loans, debt securities, derivatives, hedges, and other instruments, which typically do not involve brokers or brokerage commissions, although an assignment fee is often charged by the administrative agent for a particular loan, and fees may be payable when buying and selling bank loans. The Apollo Credit Managers may buy or sell securities directly from or to dealers acting as principal at prices that include markups or markdowns and may buy securities from underwriters or dealers in public offerings at prices that include compensation of the underwriter or dealer.

Soft Dollars

The Governing Documents of certain Apollo Funds authorize the use of "soft dollars." The term "soft dollars" refers to the receipt by Apollo Managers of products and services provided by brokers without any cash payment by Apollo Managers, based on the volume of revenues generated from brokerage commissions for transactions executed for Apollo Funds. Apollo Managers do not enter into formal soft dollar arrangements with broker dealers. The Apollo Managers in the ordinary course may receive unsolicited research products and brokerage services from full service broker-dealers as part of their full range of services. Such unsolicited materials might benefit Clients and therefore may be construed as soft dollars.

Section 28(e) of the Exchange Act, provides a "safe harbor" to investment managers who use soft dollars generated by their advised accounts to obtain investment research and brokerage services that provide lawful and appropriate assistance to investment managers in the performance of their investment decision-making responsibilities. Although certain Apollo Managers have the discretion to use "soft dollars" to obtain services and products that would not be within the safe harbor afforded by Section 28(e) of the Exchange Act and for which it would otherwise be required to pay in cash, they have no plans to do so, and will notify the Apollo Funds of any change to that policy.

Consistent with Section 28(e) of the Exchange Act, research products or services obtained with soft dollars generated by one or more Clients may be used by an Apollo Credit Manager or another Apollo Manager to service one or more other Clients, including Clients that may not have paid for the benefits. Apollo Managers do not seek to allocate soft dollar benefits to Clients in proportion to the soft dollar credits each Client generates.

Where a product or service obtained with soft dollars provides both research and non-research assistance, Apollo Managers will make a good faith allocation of the cost which may be paid for with soft dollars. In making good faith allocations of costs between administrative benefits and research and brokerage services, a conflict of interest may exist because the allocation of beneficial services may benefit Apollo Managers in addition to Clients. Apollo Managers currently have no formal arrangements with broker-dealers with respect to soft dollars, but may receive unsolicited research from broker-dealers that execute trades on behalf of Clients.

Order Aggregation

If an Apollo Manager determines that the purchase or sale of the same security is in the best interest of more than one Client, the Apollo Manager may, but is not obligated to, aggregate orders in order to reduce transaction costs to the extent permitted by applicable law. When an aggregated order is filled through multiple trades at different prices on the same day, each participating Client will receive the average price with transaction costs allocated *pro rata* based on the size of each Client's participation in the order (or allocation in the event of a partial fill) as determined by the Apollo Manager. In the event of a partial fill, allocations generally will be made *pro rata* based on the initial order, but may be modified on a basis that the Apollo Manager deems to be appropriate, including, for example, in order to avoid odd lots or *de minimis* allocations. This may result in allocations of certain investments on other than a *pari passu* basis.

ITEM 13

Review of Accounts

The portfolio managers across the Clients managed by the Apollo Credit Managers engage in ongoing monitoring of each investment. In addition, the Apollo Credit Managers conduct thorough, periodic reviews of Client accounts in order to assess trends that may impact an individual investment's ability to generate cash, profitability, asset values, financing needs, potential liability and ability to service any debts.

The Apollo Investment Practices Committee (the "IPC") meets on a quarterly basis to review portfolio management, investment processes and related documents evidencing compliance with written policies and procedures for all Apollo Funds. Generally, the IPC provides oversight of issues relating to the investment and trading of Apollo Funds, such as allocations and best execution. The IPC ensures certain management reports and certifications are reviewed by members of Apollo's Compliance, Finance, Operations, Risk and Legal Departments.

The Apollo Credit Funds generally deliver newsletters to investors on a periodic basis. The newsletters summarize the performance of the applicable Apollo Credit Fund, and provide a market outlook, exposure information and the net asset value. The Apollo Credit Funds also generally deliver audited financial statements on an annual basis, within 120 days of the applicable Fund's fiscal year end.

ITEM 14

Client Referrals and Other Compensation

None of the Apollo Credit Managers compensate any person who is not a supervised person, including solicitors or placement agents, for Client referrals.

The Apollo Credit Managers enter into arrangements with, and compensate, solicitors for investor referrals to the Apollo Credit Funds. These solicitation arrangements will be fully disclosed to affected investors and will generally be consistent with the requirements of Rule 206(4)-3 under the Advisers Act, which only applies to the solicitation of Clients and not investors. Generally, the terms of such arrangements will vary but call for the Apollo Credit Manager to pay the solicitor a fee equal to a percentage of capital contributions, Management Fees, incentive fees, incentive allocations, or a combination of such contributions or fees borne by each investor introduced to an Apollo Credit Fund by the solicitor.

ITEM 15

Custody

Each Apollo Credit Fund and SIF is audited at least annually by an independent public accountant that is registered with, and subject to regular inspection by, the Public Company Accounting Oversight Board, and each Apollo Credit Fund and SIF distributes its audited financial statements on an annual basis to all investors no later than 120 days after the end of the applicable fund's fiscal year end.

AAM's Clients receive account statements on a quarterly or more frequent basis from their applicable custodians. Clients should carefully review those account statements and are urged to compare those account statements to other statements they may receive or have access to electronically, including statements provided by AAM, if any. AAM also has custody of Clients' funds and securities verified by actual examination at least annually by an independent public accounting firm at a time chosen by the accounting firm without prior notice to AAM ("Surprise Examination"). The accounting firm's report concerning the Surprise Examination is publicly available on Form ADV-E at the website provided on the cover page of this Brochure.

The Apollo Credit Managers generally are deemed to have custody of Client funds and securities where they have the authority to obtain Client funds or securities, for example because: (1) they have affiliated entities that act as (i) the general partner of a Client formed as a limited partnership or (ii) the managing member of a Client formed as a limited liability company; or (2) they have the authority to withdraw Client funds from an account or withdraw Client fees.

ITEM 16

Investment Discretion

For most accounts, the Apollo Credit Managers have full discretionary authority with respect to investment decisions, and their advice with respect to the Apollo Credit Funds is provided in accordance with the investment objectives and guidelines as set forth in the applicable offering documents. The offering documents of the Apollo Credit Funds generally place limitations on the Apollo Credit Managers regarding their management of the Apollo Credit Funds, including: (i) the number of portfolio investments that the Apollo Credit Funds may acquire; (ii) the size of

portfolio investments; (iii) the amount of leverage that the Apollo Credit Funds may use to acquire portfolio investments; and (iv) the percentage of portfolio investments acquired by the Apollo Credit Funds that are organized and operated primarily outside of the United States.

Limited partners in the Apollo Credit Funds may also negotiate with the general partners in side letter agreements for more specific limitations applicable to the limited partner, such as prohibited investments in specified countries. Apollo Capital Management is delegated the authority to consummate investments on behalf of the Apollo Credit Funds by the terms of the limited partnership agreements of the Apollo Credit Funds, and the Management Agreements entered into between the Apollo Credit Funds and the relevant Apollo Credit Manager.

Similarly, the Apollo Credit Managers' investment decisions and advice with respect to a managed account will be in accordance with the investment objectives and guidelines in such managed account's Management Agreement, as well as any other instructions provided by the Client to the applicable Apollo Credit Manager. For certain managed accounts, Apollo provides non-discretionary investment advice. Non-discretionary investment advice is also provided in accordance with the relevant account's Management Agreement as well as any other instructions provided by the Client to the applicable Apollo Credit Manager.

ITEM 17

Voting Client Securities

The Apollo Credit Managers have been delegated the authority to vote proxies regarding their Client accounts. The Apollo Credit Managers have conflicts of interest where they have a substantial business relationship with a company and the failure to vote in favor of company management could harm the Apollo Credit Managers' relationship with management. Conflicts also arise in the event a senior executive of a company and principal of Apollo has a significant personal relationship that could affect how the adviser would vote on a matter relating to the company.

The Apollo Credit Managers have adopted and implemented policies and procedures which they believe are reasonably designed to ensure that the Apollo Credit Managers vote proxies in the best interests of their Clients. For example, if an Apollo representative sits on the board of directors of a portfolio investment that is the subject of a proxy, the Chief Compliance Officer or designee will undertake a review prior to any vote by the proxy recipient to determine whether a material conflict of interest exists between the applicable Apollo Credit Manager and the interests of its Client or between such Apollo Credit Manager and the portfolio investment shareholders. In the event that a material conflict of interest is identified, the Chief Compliance Officer or designee will take such steps as he or she deems necessary in order to determine how to vote the proxy in the best interests of the Client, including, but not limited to, consulting with the legal department, outside counsel, a proxy consultant or the investment professionals responsible for the relevant portfolio investment. In each instance, when exercising their voting discretion, the Apollo Credit Managers seek to avoid any direct or indirect conflict of interest between their Clients and their voting decision.

Clients may request from the applicable Apollo Credit Manager a copy of the proxy voting policy and a record of how proxies have been voted.

ITEM 18
Financial Information

This Item 18 is not applicable. No Apollo Credit Manager is required to include a balance sheet for its most recent fiscal year, is aware of any financial condition reasonably likely to impair its ability to meet its contractual commitments to Clients, or has been the subject of a bankruptcy petition at any time during the past ten years.
