	<p>Current regulations place substantial limits on the ability of Applicant to execute principal trades for investment advisory clients, fixed income and certain other securities generally traded on a principal basis. Accordingly, trades involving such securities for clients of the programs described in this brochure generally are executed by dealers other than Applicant.</p> <p>Should it be in the best interest of the client to execute a principal trade, Applicant will provide the required disclosure to the client and obtain the client's consent prior to settlement of the trade. Dealers executing principal trades typically include a mark-up or spread in the net price at which the transaction is executed. As a result, such trades will include the payment or mark-ups or similar compensation to such unaffiliated dealers.</p> <p>Principal transactions in which Applicant buys or sells a security from its own inventory from or to a client, may be affected with investment advisory clients only after appropriate disclosure is made by Applicant and consent obtained from client. Significant conflicts of interest exist in principal transactions, including the possibility that the client could receive a better price if the trade were transacted in a non-principal capacity and Applicant's incentive to generate a profit by buying or selling from its own inventory. Unless otherwise specified, all executions must be effected through Applicant.</p> <p>As appropriate, transaction orders in the same security for clients may be aggregated (or "batched") for execution purposes. Such batching ordinarily will not affect commissions charged on such transactions. When the orders placed for two or more client accounts for the same security are batched but cannot be filled completely, Applicant will generally average price the transaction.
