SANCTUARY WEALTH ADVISORS LLC
Part 2A of Form ADV: Firm Brochure

600 Montgomery Street
11th Floor
San Francisco, CA 94111
(415) 291-2900 telephone
(415) 981-9416 fax
www.sanctuaryws.com

This Brochure provides information about the qualifications and business practices of Sanctuary Wealth Advisors LLC (“Sanctuary Wealth Advisors” or “the Firm”). If you have any questions about the contents of this Brochure, please contact us at the above listed telephone number. The information included in firm Brochure has not been approved or verified by the SEC or any state securities authority.

Additional information about Sanctuary Wealth Advisors is also available on the SEC’s website at www.advisorinfo.sec.gov. The Firm’s IARD# is 150212.

Any reference to Sanctuary Wealth Advisors being a “Registered Investment Advisor” simply means that the firm is registered as an investment advisor and does not imply a certain level of skill or training.

Date of this Brochure: August 29, 2014

Item 2: Material Changes

The following is a summary of material changes made to this Brochure since the Firm's previously filed Brochure dated May 13, 2014:

- Item 4 was updated to remove Britt Doyle from Gordian Wealth Advisors.
- Item 4 was updated to add GenCap Portfolio Management.
- Item 8 was updated to add the trading strategies managed by GenCap Capital Management, to add a new strategy offered by Mirador Capital Partners and to add several new strategies offered by Crosspoint Capital Management.

Item 17:	Voting Client Securities	23
Item 18:	Financial Information	23

Item 4: Advisory Business

A. Description of the Advisory Firm and Its Principal Owners

Sanctuary Wealth Advisors has been in business in the state of California since March 8, 2010 and is currently registered as an investment advisor with the SEC. The Firm is owned by its employees and Sanctuary Wealth Services LLC (“SWS”). Jeffrey Spears owns 90% of SWS.

B. Types of Advisory Services

Sanctuary Wealth Advisors provides advisory services for high net worth individuals and pension and profit sharing plans. These services are tailored to the individual needs of each client. Other types of services that Sanctuary Wealth Advisors may offer include portfolio management for individuals, small businesses and institutional clients, selection of other advisers, publication of periodicals or newspapers (primarily consisting of blog postings and whitepapers for which the Firm does not charge), financial planning, bookkeeping and investment consulting advice. Sanctuary Wealth Advisors also sponsors a wrap fee program (see Item 4D for more information).

A percentage of the investments made for clients of Sanctuary Wealth Advisors are managed by outside managers who have relationships with the Firm. Exceptions are mostly confined to legacy positions held by clients with pre-existing accounts or other sources.

Asset allocations may include exchange-listed securities, corporate debt securities (other than commercial paper), municipal securities, US government securities, mutual fund shares, exchange traded funds, options, investment partnerships investing in real estate or oil and gas interests, and other pooled and separately managed accounts (such as hedge funds). Investments for individual accounts are selected based on varying factors of suitability determined through multiple sources.

Use of Sub-Advisors:

As described above, Sanctuary Wealth Advisors recommends certain third party managers (“Sub Advisors”) to manage a portion of client assets on a discretionary basis. The determination of the Sub Advisors being recommended to clients is based on the client’s stated investment objectives.

Sub Advisors recommended by Sanctuary Wealth Advisors may be structured as managers of individual equity and/or debt securities, exchange traded funds, mutual funds, partnerships, corporations and/or limited liability companies. Sanctuary Wealth Advisors selects these Sub Advisors based on their ability to enhance the client’s portfolio values. When Sanctuary Wealth Advisors selects a Sub Advisor for a client, the Firm reviews the Sub Advisor’s Form ADV and disclosure Brochure and any material supplied by the Sub Advisor. With this information, Sanctuary Wealth Advisors seeks to understand the Sub Advisor’s investment strategies, past performance and risk results to the extent available. Sanctuary Wealth Advisors seeks to select Sub Advisors whose strategy’s stated investment objectives, alignment of interests, management style, performance, reputation, financial strength, reporting, pricing and research align with that of Sanctuary Wealth Advisors’ clients.

Clients who are recommended to Sub Advisors will sign a separate written agreement, which outlines the terms and conditions under which Sanctuary Wealth Advisors engages the Sub Advisor to manage the client’s assets. The client will also receive a copy of the Sub Advisor’s written disclosure Brochure in addition to Sanctuary Wealth Advisors’ disclosure Brochure.

Sanctuary Wealth Advisors monitors and reviews the account performance and the client’s investment objectives for all accounts, including those managed by Sub Advisors. The fee that Sanctuary Wealth Advisors receives for these accounts is based on a percentage of the market value of the assets being managed by the Sub Advisor(s).

Crosspoint Capital Management:

Advisors Michael Kress, Kyle Shealer and Anthony Cantando are dually registered employees of Sanctuary Securities and Sanctuary Wealth Advisors (together with SWS and Sanctuary Securities “Sanctuary”). Their services are provided within a business unit of Sanctuary under the name Crosspoint Capital Management (“CCM”). Messrs. Kress, Shealer and Cantando are each co-founders of the CCM business unit.

Gordian Wealth Advisors:

Advisors Elliott Elbaz and Michael Phippen are dually registered employees of Sanctuary Securities and Sanctuary Wealth Advisors (together with SWS and Sanctuary Securities “Sanctuary”). Their services are provided within a business unit of Sanctuary under the name Gordian Wealth Advisors (“GWA”). Mr. Elbaz is the founder of the GWA business unit; Mr. Phippen serves as its Director of Research.

Mirador Capital Partners

Advisors Don Garman, Carol Wikle, Jason Pfannenstiel, Dan Murray and Audrey Glafkides are dually registered employees of Sanctuary Securities and Sanctuary Wealth Advisors (together with SWS and Sanctuary Securities “Sanctuary”). Their services are provided within a business unit of Sanctuary under the name Mirador Capital Partners (“MCP”). Messrs. Garman and Pfannenstiel are each co-founders of the MCP business unit.

GenCap Portfolio Management

Advisor Stephen Bradley is a registered employee of Sanctuary Wealth Advisors, LLC. His services are provided under the name GenCap Portfolio Management (“GenCap”). Mr. Bradley is the founder of GenCap.

C. Client Tailored Advisory Services and Client Imposed Restrictions

Sanctuary Wealth Advisors provides advisory services for high net worth individuals and pension and profit sharing plans. These services are tailored to the individual needs of each client and are outlined in an Investment Policy Statement (“IPS”) that accompanies each client’s advisory agreement. The asset allocation process is tailored to each client’s specific needs and is generally implemented by selecting various money managers who manage portfolios in-line with the client’s investment objectives. Allocation models are agreed upon between the client and Advisor. High-level restrictions relating to broad categories, such as industry, sector, risk level, volatility, etc. may be accommodated; however, clients may not have the ability to request restrictions of specific securities. Ability to accommodate restrictions will depend on the selection of money managers agreed upon in the asset allocation process and will be documented in the IPS.

D. Wrap Free Programs

Sanctuary Wealth Advisors currently participates in a wrap fee program by providing portfolio management services. A wrap fee program is an investment program where you pay us, as the sponsor of the program, a single fee, which covers the costs of investment management, brokerage, custody and other services provided under this program. Sanctuary Wealth Advisors acts as a sponsor to this wrap fee program as well as the portfolio manager.

For client accounts that invest in the wrap fee program, Sanctuary Wealth Advisors presently offers the “Crosspoint Tactical Growth and Capital Preservation” investment management strategy. In

this strategy, Sanctuary Wealth Advisors uses technical measures provided by an independent service, such as historical price movements and statistical analysis of these price movements, and utilizes the positive or negative signals the issued by the independent service on the market as a whole. Sanctuary Wealth Advisors makes its investment decisions based on these signals, and invests in cash (i.e. money market funds) or equities accordingly. Once a signal to purchase equities is given, Sanctuary Wealth Advisors will follow a fundamental, disciplined approach to select a diversified portfolio of equities based on the research of several independent research sources.

For those accounts not invested in the wrap fee program, Sanctuary may utilize an alternative investment management strategy. Please see Section 8 (Methods of Analysis, Investment Strategies and Risk of Loss) for further details on investment management strategies.

Sanctuary Wealth Advisors charges a fee to clients based on a percentage of the client's total assets under management. Sanctuary Wealth Advisors may receive a portion of the wrap fee for its services.

E. Assets Under Management

Sanctuary Wealth Advisors has the following assets under management:

Discretionary Amount: \$554,000,000

Non-Discretionary Amount: \$195,000,000

Date Calculated: June 30, 2014

Item 5: Fees and Compensation

A. Fee Schedule

Sanctuary Wealth Advisors charges fees for its advisory services. These fees may be in the form of percentage of assets under management or fixed fees.

The annual fee shall be computed on the basis of the schedule set forth as follows (or as negotiated with the client) and shall be paid quarterly in advance:

<u>Assets Under Advisement</u>	<u>Fee</u>	<u>Category Max</u>	<u>Fee at Category Max*</u>
First \$5 million	0.95%	\$5 Million	0.950%
\$5 million to \$15 million	0.85%	\$15 Million	0.883%
\$15 million to \$25 million	0.75%	\$25 Million	0.830%
\$25 million to \$50 million	0.65%	\$50 Million	0.740%

Over \$50 million negotiable

*The Fee at Category Maximum is the figure used to calculate all the rate of all fees collected. If a client has \$15 million, the fees on the first \$5 million are 95bps, or \$48,500 and the fees on the next \$10 million (for a total of \$15 million) are 85 bps, or \$85,000. The total of \$133,500 in fees is 88bps or 0.883% on the entire \$15 million in assets under advisement.

Fees may be discounted on a case-by-case basis only with the approval of the supervisor.

B. Payment of Fees

Clients may elect to be billed for fees incurred or have fees paid automatically by being deducted from the account(s). This election is made in the client's advisory agreement. Clients electing to have fees deducted from the account(s) will receive monthly account statements that reflect and disclose the fee amount deducted from the account(s). Clients electing to be billed for fees incurred will receive bills quarterly. Please refer to Item 15 for full disclosure on billing practices. It is noted that lower fees for comparable services may be available from other sources.

C. Other Fees or Expenses

Clients may incur brokerage and other transaction costs in connection with the Firm's advisory services, such as custodian fees or mutual fund expenses. Any such fees will be disclosed to the client in the advisory agreement and on the monthly brokerage statements received by the client from the custodian. See Item 12 "Brokerage Practices" of this Brochure for more information pertaining to brokerage practices.

Fees for Sub Advisor Accounts:

The investment management fees charged by Sub Advisors recommended by Sanctuary Wealth Advisors, together with the fees charged by the corresponding designated broker-dealer/custodian of the client's assets, may be exclusive of, and in addition to, Sanctuary Wealth Advisors' investment advisory fee set forth above. As discussed above, the client may incur other additional fees than those charged by Sanctuary Wealth Advisors, the Sub Advisors, and corresponding broker-dealer and custodian.

Some Sub Advisor terms may vary from that of Sanctuary Wealth Advisors, as such, please refer to the Sub Advisor's ADV Part 2 disclosure brochure for specific terms relating to the Sub Advisor(s) with which you select through your relationship with Sanctuary Wealth Advisors.

D. Prepayment of Fees

The annual fee shall be computed on the basis of the schedule set forth above (or as negotiated with the client) and shall be paid quarterly in advance. Substantial additions to or withdrawals from the Account by the Client may be pro-rated on an equitable basis for the period the Assets involved were under management. In the event that a fee period under this Agreement is less than one full quarter, then the fee for the period shall be the product obtained by multiplying a full quarterly fee by a fraction, the numerator of which shall be the number of days this Agreement is in effect prior to the end of the calendar quarter and the denominator of which shall be 90.

Either party, for any reason, upon written notice, can terminate an investment advisory contract before its expiration date. If the advisory contract is terminated before the end of the billing period, the client will receive a refund for pre-paid fees for that billing period on a pro-rata basis.

If an advisory contract is terminated within 5 days of signing and delivery of this disclosure Brochure, no fees may be charged.

E. Outside Compensation

Sanctuary Wealth Advisors and its employees do not accept compensation for the sale of securities or other investment products, including asset-based sales charges or service fees from the sale of mutual funds.

Item 6: Performance-Based Fees and Side-By-Side Management

Sanctuary Wealth Advisors does not currently collect any performance-based fees and the Firm's standard advisory fee agreement does not anticipate performance-based fees.

Item 7: Types of Clients

Types of clients may include individuals, high net worth individuals, institutions, trusts, estates, charitable institutions, corporations, other business entities, pension and profit sharing plans, and other pooled investments, such as a family LLC.

Sanctuary Wealth Advisors requires that the minimum value of assets per client be one million dollars. This minimum may be waived with approval from the Firm's CEO.

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss**A. Methods of Analysis and Investment Strategies**

In certain instances, Sanctuary Wealth Advisors and/or its consultants perform fundamental analysis on historical and present data. Advisors implement both a bottom-up and top-down analysis, taking into consideration the overall state of the economy, interest rates, production, earnings and management. The main sources of information that advisors use include financial periodicals, inspections of corporate activities, corporate rating services, annual reports, prospectuses, filings with the Securities and Exchange Commission, company press releases and research materials prepared by others.

Fundamental analysis can be useful in making mid to long-term investment decisions. This type of analysis may not be as useful for investors with a short-term investment horizon. As fundamental analysis involves taking into consideration current social and economic factors, major, unanticipated events can change the expected outcome of investments that are based on this analysis type.

Crosspoint Capital Management:

In some instances, Sanctuary Wealth Advisors offers portfolios managed by Crosspoint Capital Management as follows:

Crosspoint Capital Management offers a suite of portfolios that fall under their Tactical Growth & Capital Preservation Strategy. The objective of the strategies are to align themselves with markets that are defined as being in a bullish, upward trend and to be positioned defensively in cash during a defined bearish, downward trend. The general investment methodology is consistent across each portfolio, while the specific types of investments purchased are unique to each portfolio. Crosspoint's philosophy is that disciplined, unemotional investment decisions that place equal importance on growing capital as avoiding major market downturns, will help investors generate enhanced risk-adjusted returns. A bullish or bearish position on the market is derived through technical measures which analyze price movements within the broader US equity markets. Each portfolio invests in its defined security type while the market stance is positive/bullish, and invests in cash (i.e. money market funds) while a negative/bearish stance is taken. These portfolios are not tax sensitive. Each of portfolio follows a disciplined,

unemotional, three step process for finding opportunities to grow capital in the US stock markets as follows:

- Step 1 – Weekly Market Sentiment: Every week, Crosspoint evaluates the market using the Crosspoint Market Sentiment Index (MSI) to determine a positive or negative stance on the market. By rigorously following the MSI, we are able to continually evaluate the risk-reward of being invested in the stock market versus protecting investment capital by being in cash during weak markets.
- Step 2
 - a. Portfolio Construction: If our MSI shows a positive market, we will construct a diversified portfolio based on the defined security type of each portfolio.
 - b. Move to Cash: If our MSI shows a negative market, each strategy will move the portfolio to a 100% cash position.
- Step 3 – Strong Sell Discipline: Each portfolio is actively managed using similar strict sell disciplines in attempt to mitigate overall market risk, as well as individual security risk. This avoids the common pitfall of becoming emotionally attached to a position.

A description of each strategy is as follows:

Crosspoint Tactical All-Cap Core Portfolio:

When a positive market signal is generated, the Crosspoint Tactical All-Cap Core Portfolio will invest in a diverse portfolio of 20-30 individual US listed equities, with the flexibility to purchase equities across all market capitalization. The actual quantity of stocks will be determined by the portfolio manager based on his best ability to determine a stock that is suitable for the portfolio. The strategy is an opportunistic, long-only strategy that utilizes a combination of technical and fundamental research to support the purchasing of each security in the portfolio. The strategy will follow a disciplined approach that applies technical thresholds that each security must meet, as well as liquidity minimums. The portfolio will apply fundamental research of several independent research sources as well as the portfolio manager's individual research findings to build a thesis for purchasing the position. Strict sell disciplines are in place for positions that drop 15-20% from cost, drop out of the top 20% of strongest performing stocks based on technical indicators, or there is a change in the fundamental outlook of a position.

Crosspoint Tactical Small-Cap Portfolio:

When a positive market signal is generated, the Crosspoint Tactical Small-Cap Portfolio will invest in a diverse portfolio of 40-60 individual US listed equities that have a market capitalization of less than \$4 Billion at the time of purchase. Stocks are allowed to go above \$4 Billion in market cap as long as it comes from capital appreciation. The actual quantity of stocks will be determined by the portfolio manager based on their best ability to determine a stock that is suitable for the portfolio at that given time. The strategy is an opportunistic, long-only strategy that puts an emphasis on technical analysis to determine positions that are purchased. The strategy will follow a disciplined approach that applies technical thresholds that each security must meet, as well as liquidity minimums. Strict sell disciplines are in place for positions that drop 15-20% from cost or drop out of the top 20% of strongest performing small-cap stocks based on technical indicators.

Crosspoint Tactical ETF Portfolio:

When a positive market signal is generated, the Crosspoint Tactical ETF Portfolio will invest in a diverse portfolio of 10 Exchange Traded Funds (ETFs). The selection of ETFs will be include

four general market index ETFs and six industry ETFs. The industry ETFs will represent the leading industries of that particular market. Crosspoint measures the strength of 130 industries. The portfolio will invest in six ETFs that represent a respective industry within the top 20% of industries ranked by our proprietary Industry Strength Scale. Not all industries have a suitable ETF available for purchase, thus allowing the portfolio manager flexibility in choosing a suitable security.

Crosspoint Tactical Focused Portfolio:

When a positive market signal is generated, the Crosspoint Tactical Focused Portfolio will invest in one ETF that represents a diverse group of strong technical stocks at that time. This strategy is reserved for current Crosspoint clients that would like to have an account managed using the Crosspoint methodology, but that particular account does not have the necessary level of assets to effectively employ one of the other portfolios.

Each portfolio may reinvest a portion or all of the assets in the event that the market signals an extremely oversold market condition. While these occurrences are rare, Crosspoint reserves the ability to opportunistically position the portfolios should this event arise. As there is a risk of loss of principal when investing in any security, the Crosspoint Tactical Growth & Capital Preservation Strategies strive to minimize this risk by using the technical signals to move from fully invested to investing in cash, or vice versa. If the strategy does not exit the broader market quickly enough in a bearish downturn, or conversely if the strategy is too slow in entering a bullish upturn, you may participate in that market movement to the extent if you had remained 100% invested or in cash. Principal loss may also occur due to the selection of the individual securities themselves because some individual securities may suffer losses, may not perform as well as the broader markets or may not perform as well as their peers.

Mirador Capital Partners:

In yet other instances, Sanctuary Wealth Advisors offers portfolios managed by Mirador Capital Partners as follows:

Garman Global Growth & Income Strategy (GGGI):

The GGGI was created in 1997 and uses a global asset allocation strategy to own stocks, bonds, cash, currency, and commodities. This portfolio is positioned to benefit when markets decline and shorts indices to achieve that goal. The portfolio's emphasis on risk-adjusted returns through market cycles helps avoid permanent capital loss.

This portfolio can hold 10-15% ETFs and/or mutual funds where appropriate. The strategy is not constrained by size, industry, or asset class. As a result, client funds can be moved to areas that offer the greatest opportunity based on prevailing market conditions.

Garman Closed-End Tactical Strategy (GCET):

The GCET portfolio invests in domestic and international equities and closed-end funds frequently trading at a discount to their Net Asset Value. The portfolio can focus on short-term opportunities. Due to higher concentrations of positions, the portfolio will likely experience more volatility than diversified portfolios. MCP will look for high conviction, out-of-consensus analyst calls or tactical situations that can produce short-term gains. The stated targets return equal to the S&P 500, with more income generation and somewhat less volatility.

Garman Aggressive Growth Fund (GAGF):

Aggressive investing often involves abandoning traditional measures of value, and instead seeks to capture the companies with the most exciting growth characteristics. MCP's proprietary, rules-based methodology ranks all assets against other assets, with the desired outcome of capturing the strongest assets at any given point in time.

With any aggressive style, individual ideas may not perform. MCP attempts to mitigate this by holding more positions with smaller portfolio weightings. Over time, this strategy allows the strongest stocks to grow until they are reduced by their sheer size. The portfolio has high turnover and should be avoided in taxable accounts or for investors who prefer longer holding periods. SWA only recommends this strategy for investors with experience and a strong tolerance for turnover and volatility.

Garman Income Opportunity Fund (GIOF):

Many studies have shown that dividend income is a valuable component of the total return from a stock investment. With the GIOF, MCP screens for companies with high current dividends. MCP also looks for companies with the track record and ability to raise their dividends. The strategy is managed for long-term capital gains and growth in income.

The portfolio is diversified within the 10 sectors of the S&P 500 and also includes global dividend payers. It is designed to complement MCP's other strategies and enhance income for any client who seeks greater cash return from their investments. The strategy is currently heavily weighted in Master Limited Partnerships (MLPs). This strategy combines the tax benefits of a limited partnership with the liquidity of publicly traded securities. Most MLPs are related to the production, processing, or transportation of oil, natural gas, and coal.

Mirador ETF Portfolio:

The Mirador ETF Strategy is designed to be a globally diversified, strategic, un-hedged lower cost alternative to our Actively Managed Strategies. It is rebalanced twice a year or as needed to keep the position limits intact. It is appropriate for investors with a long term time horizon and who prefer their portfolios to perform in line with the risk and return characteristics of the Global Stock Markets.

Independent Managers:

In yet other instances, Sanctuary Wealth Advisors outsources the due diligence and process for assisting in the selection money managers approved for use by the Firm's Advisors to a third party consultant contract service provider that provides wealth management solutions and consulting services to investment advisors on an outsourced basis. To be clear, this process refers to the selection of money managers approved for Advisors to recommend to their clients. Selection of money managers for each client is based on client specific needs and decided upon between the Advisor and client. Any such third party consultant must be approved by the Firm.

Methods of the independent managers referred by Sanctuary Wealth Advisors will vary.

Investment strategies used to implement any investment advice given to clients may include long and short-term purchases, trading, short sales, margin transactions and options writing.

Although Sanctuary Wealth Advisors, its consultants and the independent money managers referred by the firm conduct this analysis based on available historical and present data, any investments in securities involve risk of loss that clients should be prepared to bear.

Covered Call Strategy:

In yet other instances, Sanctuary Wealth Advisors offers a covered call writing strategy by Gordian Wealth Advisors. The investment objective is to provide investors with exposure to the large cap dividend paying domestic equity markets with a call option overlay for increased levels of income. Although the covered call strategy can be effective in any market condition, it is most effective during range bound market cycles.

The portfolio will contain approximately 15-20 names with diversified exposure across all sectors of the S&P 500. The investment process begins with a top down approach aimed at finding the relative value in each of the sectors of the S&P 500. Based on the investment team's current view of the equity markets, the portfolio will underweight/overweight sectors based on equity valuations and growth prospects over the next 12 months. The goal is to create a balanced portfolio that will closely correlate to the sector weightings of the S&P 500. The strategy will vary its exposure to individual sectors based on economic conditions and valuations, but at no time will any one sector represent more than 20% of the entire portfolio. The portfolio will also not double the exposure of any one sector relative to their weighting in the S&P 500. In addition, at no time will any single position represent more than 10% of the portfolio. The portfolio will not use leverage, nor will it invest in securities other than U.S. publically traded common stocks with market capitalizations over \$3 Billion. The portfolio will necessarily have approved money market funds that it invests in on the client's behalf due to the expected income from investments. The investment team uses several quantitative screens to identify potential candidates for the portfolio. The first and most important characteristic is a consistent and increasing dividend yield. The portfolio will target stocks with a current yield of 3% or higher, but will consider stocks with a lower yield if that security exhibits the ability to grow the dividend significantly. The portfolio will actively look for companies that have a long history of increasing the dividend through several market cycles. Sample screens that we run include companies that have an average growth pattern of quarterly dividend yields of 5% or greater over the past 36 quarters. In order to feel confident the companies can sustain paying their dividends, other screens are run to check the financial health of the company. These include, but are not limited to, improving revenue and earnings growth, strong cash flows, debt to equity ratios, and historically low valuations.

Covered call writing is a bullish, premium selling, strategy. Maximum profit occurs when the underlying stock is at or above the strike price of the option at time of expiration. The true risk in the strategy comes from owning the underlying stock. At the time of expiration, if the stock is lower, loss is calculated by subtracting the sale price of the underlying stock from the purchase price, and then adding back the premiums received by writing the calls during the time of ownership. Therefore, if an investor is comfortable owning the underlying stock, writing calls on the portfolio becomes an income strategy, and somewhat of a loss mitigation strategy and enhanced by the dividends the company pays on a quarterly basis. Depending on market conditions, covered calls will be written, or sold on the stocks typically 4-6 months out, providing 5-10% upside potential to the strike price. At the time of expiration, if the stock is above the strike price of the call option, a decision will be made on whether to roll the option to a higher strike price and keep the underlying stock, or allow the stock to be called away. If the stock price is below the strike and the investment team continues to believe the fundamentals of the company are strong, the investment team will write another option to collect more income and lower cost basis.

GenCap Portfolio Management:

In yet other instances, Sanctuary Wealth Advisors offers portfolios managed by GenCap Portfolio Management as follows:

GenCap Equity Income Risk Managed:

The investment objective of the Equity Income Risk Managed Portfolio is to provide dividend, spinoff and share buyback capital to the client while mitigated downside market exposure with equity ETF put options. Call options will be sold against principal to adjust cash flow appropriately for the expense of the downside protection. This strategy is comparable to a conservative balanced portfolio, with elements of fixed assets, cash flow and floating equity exposure all present.

The purpose of this portfolio is to receive income in a tax friendly manner. It seeks to receive cash in the form of dividends and buybacks, as well as principal from call selling. The portfolio is structured to be as interest rate risk neutral as possible, so that, contrary to traditional fixed income assets, very little principal will be at risk if interest rates move up. Conversely principal should also not appreciate with lower interest rates. The underlying portfolio will be the same model portfolio as the Cash Capture Portfolio.

There is an element of market risk, as the portfolio seeks to invest in publicly traded companies that generate positive cash flow to shareholders. The portfolio attempts to mitigate this risk using protective puts on commonly used indexes and ETF's. A second element of call selling seeks to raise capital from selling calls, and this strategy also acts as risk mitigation.

This strategy may be long or short both puts and calls. It does not seek to use margin, but margin may be used where appropriate.

GenCap Cash Capture Portfolio:

The investment objective of the Cash Capture portfolio is to provide dividend, spinoff and share buyback capital to the client. The portfolio seeks to invest in companies actively seeking ways to return capital to shareholders in a manner that is accretive to the value of their business. As dividends are typically not accretive unless clearly growing, this fund looks for other aspects of shareholder return that can augment the dividends paid back to shareholders. The portfolio will contain 25 to 35 publicly traded companies that actively return cash or stock to shareholders. The portfolio typically invests in large cap (\$25bn+) equities, but the minimum market capitalization for the portfolio is \$1bn. This portfolio seeks to take less risk than the overall S&P 500, with a return comparable to the S&P 500.

The portfolio is built to seek accretive capital appreciation from a company focus on cash return to shareholders. The portfolio seeks to invest in equities that have a record of strong dividend growth, paired with future share repurchases and spin-offs to further increase the total cash received by the portfolio. The current yield will not be the focus of the portfolio, the portfolio will look at the expected 12-24 months future yield and capital appreciation as the key metrics for investment.

GenCap Focused Equity Portfolio:

The investment objective of the Focused Equity Portfolio is to provide Capital Appreciation. The Portfolio seeks to invest in equities with an outsized positive return profile. The catalysts for future return may be varied, but generally are seen as substantial revenue growth, under-appreciated margin expansion, shareholder value unlocked through capital markets and company industry exposure. The portfolio is expected to be comparable to the Russell 3000, targeting aggressive return characteristics. The portfolio will consist of 20-27 names and the minimum market cap will be \$1bn.

The portfolio strategy is designed to identify companies with secular positive economics. We look for companies that have created the market in which they exist, are the leader in a market with significant investment and economic interest, or have the ability through mergers and

acquisitions (or the reverse) to fundamentally change their economic and financial position. This is done through a combination of factors, using return on equity, return on assets, asset growth, revenue growth, gross and operating margin expansion and future economic scale or scope benefits.

GenCap Focused Equity Risk Managed Portfolio:

The Investment objective of the Focused Equity Risk Managed Portfolio is to provide Capital appreciation with moderate risk mitigation. The portfolio seeks to emulate the Focused Equity portfolio with regard to equities, and will consider market hedging on S&P related instruments for substantial negative market moves. The risk mitigation will not be meaningful for small downward moves, but is intended to help protect against overall market moves of greater than 15%. This portfolio should have returns consistent with conservative equity returns, with lower risk characteristics than the S&P 500.

The portfolio is designed to follow the same foundation as the Focused Equity Portfolio. The portfolio seeks to mitigate the aggressive nature of the Equity Focused Portfolio only in the event of meaningful downside market movements. The fundamental thesis behind the hedge is that when public equity markets are bad, they are bad for safe large cap companies as well as risky and more speculative smaller companies. The portfolio will hedge its market risk with conservative equity indices and ETF's, but will not seek to be correlated to said indices in normal markets. The Focused Equity portfolio seeks to find aggressive capital appreciation, and in the event of a bear market, seeks to hedge itself on the believed tenet that regressions will approach one for all equity markets in bear markets. The Portfolio will at times be either long puts primarily on the SPY ETF, cost permitting, or long put calendar spreads primarily on the SPY ETF when cost does not permit just a long hedge against downward markets.

B. Material Risks

Asset allocations may include exchange-listed securities, corporate debt securities (other than commercial paper), municipal securities, US government securities, mutual fund shares, exchange traded funds, options, investment partnerships investing in real estate or oil and gas interests, and other pooled and separately managed accounts (such as hedge funds). Investments for individuals are selected based on varying factors of suitability determined through and investment objective questionnaire and client interactions.

Investment strategies used to implement any investment advice given to clients may include long and short-term purchases, trading, short sales, margin transactions and options writing.

Clients must understand that past performance is not indicative of future results. Therefore, current and prospective clients should never assume that future performance of any specific investment or investment strategy will be profitable. Investing in any type of security (including stocks, mutual funds, and bonds) involves risk of loss. Further, depending on the different types of investments there may be varying degrees of risk. **Clients need to be prepared to bear investment loss including loss of original principal.**

There are certain additional risks associated when investing in securities through an investment management program:

- **Market Risk** – Either the stock market as a whole, or the value of an individual company, does down resulting in a decrease in the value of client investments. This is also referred to as systemic risk.

- Interest Rate Risk – The risk that an investment’s value will change due to a change in interest rates. Such changes usually affect securities inversely.
- Equity (stock) market risk – Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. If you held common stock, or common stock equivalents, of any given issuer, you would generally be exposed to greater risk than if you held preferred stocks and debt obligations of the issuer.
- Company Risk - When investing in stock positions, there is always a certain level of company or industry specific risk that is inherent in each investment. This is also referred to as unsystematic risk and can be reduced through appropriate diversification. There is the risk that the company will perform poorly or have its value reduced based on factors specific to the company or its industry. For example, if a company’s employees go on strike or the company receives unfavorable media attention for its actions, the value of the company may be reduced.
- Options Risk - Options on securities may be subject to greater fluctuations in value than an investment in the underlying securities. Purchasing and writing put and call options are highly specialized activities and entail greater than ordinary investment risks.
- Fixed Income Risk - When investing in bonds, there is the risk that issuer will default on the bond and be unable to make payments. Further, individuals who depend on set amounts of periodically paid income face the risk that inflation will erode their spending power. Fixed-income investors receive set, regular payments that face the same inflation risk.
- ETF and Mutual Fund Risk – When investing in a an ETF or mutual fund, there are additional expenses based on your pro rata share of the ETF’s or mutual fund’s operating expenses, including the potential duplication of management fees. The risk of owning an ETF or mutual fund generally reflects the risks of owning the underlying securities the ETF or mutual fund holds. Leveraged and inverse ETFs may not be suitable for all investors and have unique characteristics and risks. Although there are limited occasions where a leveraged or inverse ETF may be useful for some types of investors, it is extremely important to understand that, for holding periods longer than a day, these funds may not give you the returns you may be expecting.
- Management Risk – The value of your investment with will vary with the success and failure of Sanctuary Wealth Advisors’ investment strategies, research, analysis and determination of portfolio securities. If the investment strategies do not produced the expected returns, the value of the investment may decrease.

Sanctuary Wealth Advisors’ primary strategy does not involve frequent trading of securities, rather, Sanctuary Wealth Advisors utilizes this asset allocation process to identify independent managers who implement investment strategies that are appropriate for the client’s individual situation and investment objectives. Disclosures of the risks of a specific investment strategy implemented by an independent manager are made to the client by the independent manager. This disclosure will be made in the Sub Advisor’s ADV Part 2 disclosure Brochure, which will discuss the Sub Advisor’s trading strategy.

C. Recommendations of Particular Types of Securities

Sanctuary Wealth Advisors’ primary strategy does not involve recommending primarily a particular type of security.

Item 9: Disciplinary Information

Sanctuary Wealth Advisors is required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of the firm or the integrity of the firm's management. Neither the Firm nor any of its management persons have any such events to disclose.

Item 10: Other Financial Industry Activities and Affiliations**A. Registration as a Broker-Dealer or Broker-Dealer Representative**

As mentioned in Item 4, Sanctuary Wealth Advisors is 100% owned by its employees and SWS. SWS also owns a broker-dealer firm, Sanctuary Securities, LLC ("Sanctuary Securities"). Sanctuary Wealth Advisors is managed by Jeffrey Spears, its Chief Executive Officer and Chief Compliance Officer, who is also registered as a representative of Sanctuary Securities.

B. Registration as a Futures Commission Merchant, Commodity Pool Operator or Commodity Pool Trading Advisor

Neither Sanctuary Wealth Advisors nor any of its management persons are registered as a futures commodity merchant, commodity pool operator or commodity pool trading advisor.

C. Material Relationships with Related Persons**Sanctuary Securities, LLC:**

As mentioned above SWS, the Firm's parent company, also owns a broker-dealer firm, Sanctuary Securities. Investments represented by the affiliated broker-dealer, Sanctuary Securities, may be purchased by the Sanctuary Wealth Advisors' advisory clients at their sole discretion. In these instances, compensation may be paid to the affiliated broker-dealer, which represents a conflict of interest. In an effort to mitigate this conflict, in no case will any form of compensation be paid to the Advisor so that the Advisor will remain un-conflicted in the advice he/she provides to clients of Sanctuary Wealth Advisors. Advisors of the Firm will receive no incentive to recommend a product represented by the affiliated broker-dealer versus any other product that may be recommended to the client.

Additionally, some Advisors may be dually registered with Sanctuary Wealth Advisors and Sanctuary Securities, in which case they will have the ability to execute brokerage transactions for advisory clients. Although this presents a conflict of interest, advisors will be obligated by their fiduciary responsibility to always act in the best interest of the client. In an effort to mitigate this conflict and ensure advisors are complying with their fiduciary responsibility, the firm has implemented a code of ethics (see Item 11) and has processes in place for the review and approval of brokerage activity by supervisory personnel. If a dually registered Advisor is receiving fees from a client based on their assets under management, he may not also receive commissions on any of those assets invested through the affiliated broker dealer. An Advisor who is dually registered as a broker dealer representative with Sanctuary Securities will only be permitted to receive commission payments for accounts opened on the brokerage platform.

Harvest Capital Strategies, LLC:

The Firm's parent company, Sanctuary Wealth Services, LLC, has received an investment from Harvest Capital Strategies, LLC, a Registered Investment Advisor who advises and is general partner of several pooled investment vehicles (i.e. hedge funds). Some of the funds managed by Harvest Capital Strategies, LLC will be approved investment solutions for advisory clients of the Firm. As this represents a conflict of interest, Advisors will be obligated by their fiduciary responsibility to always act in the best interest of the client. All investment recommendations to Funds managed by Harvest Capital Strategies will be reviewed by supervisory personnel.

Gordian Capital Management, LLC:

Advisors Elliott Elbaz and Michael Phippen are dually registered employees of Sanctuary Securities and Sanctuary Wealth Advisors (together with SWS and Sanctuary Securities "Sanctuary"). Their services are provided within a business unit of Sanctuary under the name Gordian Wealth Advisors, LLC ("GWA"). Mr. Elbaz is a co-founders of the GWA business unit; Mr. Phippen serves as its Director of Research.

Messrs. Elbaz and Phippen are also the principal owners and Managing Members of Gordian Capital Management, LLC ("GCM"). GCM is a Delaware limited liability company formed in December of 2011 and is a registered investment advisor in the state of California. GCM serves as general partner and investment adviser to a private investment fund (the "Fund").

The offering of investment advice by GCM is entirely separate and distinct from Messrs. Elbaz and Phippen's business with the Sanctuary companies. Clients of GCM are not clients of Sanctuary, and vice versa, in absence of a clear and written agreement to such effect.

Thomas Brady & Associates:

Certain Advisors may have a relationship with Mr. Matt McKenzie of Thomas Brady & Associates. Mr. McKenzie is a licensed life insurance agent with insurance agency Thomas Brady & Associates. Certain Advisors may have an arrangement in place with Mr. McKenzie where they may refer advisory clients of SWA to Mr. McKenzie for life insurance business. These Advisors would receive compensation in the form of a referral fee from Mr. McKenzie for referring the life insurance clients. As this represents a conflict of interest, Advisors will be obligated by their fiduciary responsibility to always act in the best interest of the client.

Baron Insurance Marketing Group LLC:

Certain Advisors may have a relationship with Ms. Haley Brooks of Baron Insurance Marketing Group LLC. Ms. Brooks is the CEO of and a licensed life insurance agent with Baron Insurance Marketing Group LLC. Certain Advisors may have an arrangement in place with Ms. Brooks where they may refer advisory clients of SWA to Ms. Brooks for life insurance business. These Advisors would receive compensation in the form of a referral fee from Ms. Brooks for referring the life insurance clients. As this represents a conflict of interest, Advisors will be obligated by their fiduciary responsibility to always act in the best interest of the client.

D. Selection of Other Investment Advisors and Compensation

In the event a client of Sanctuary Wealth Advisors allocates a portion of their assets to Gordian Capital Management or any of its funds, the client will have a separate agreement with GCM. Clients must refer to their agreement with GCM for GCM's fee arrangements. Clients of Sanctuary invested in GCM funds will not pay management fees in addition to the fees outlined their agreement with GCM however, investors in GCM funds may be charged performance fees in addition to the management fee charged pursuant to the agreement between the client and GCM. Information regarding performance fees charged by GCM is available to clients by GCM.

As the allocation of client assets into a proprietary product (as the GCM product is proprietary to Investment Advisor Representatives of Sanctuary through their dual registration with GCM) presents a conflict of interest, the client Advisor(s) will be obligated by their fiduciary responsibility to always act in the best interest of the client. In an effort to mitigate this conflict and ensure that Advisors are complying with their fiduciary responsibility, Sanctuary has implemented the following procedures pertaining to clients of Sanctuary who also enter into an agreement with GCM:

- There should be no placement fees paid for the allocation of client assets to GCM.
- Advisors should not “double dip” by charging management fees and advisory fees on the same dollar of assets.
- Clients of GCM who are not also clients of Sanctuary should not pay fees that are higher than the advisory fee grid of clients of Sanctuary. Having equal fee structures is the best way to resolve issues that can arise in fee driven conflicts.
- The expenses of the fund should not include indirect expenses that are functionally the responsibility of the RIA.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. Code of Ethics

Sanctuary Wealth Advisors has adopted a Code of Ethics to govern its ethical obligations regarding personal securities transactions pursuant to Rule 204A-1 under the Advisors Act. Sanctuary Wealth Advisors’ Code of Ethics addresses general standards regarding the Firm’s fiduciary duty to clients as well as personal trading guidelines, insider trading policy, and general ethical standards applicable to all associated persons. Sanctuary Wealth Advisors will provide a copy of its Code of Ethics to any client or prospective client upon request by contacting Jeffrey Spears at (415) 291-2900.

B. Recommendations Involving Material Financial Interest

Neither Sanctuary Wealth Advisors nor any of its related persons recommend to clients, or buys or sells for client accounts, securities in which the Firm or its associated persons have a material financial interest.

C. Investing in the Same Securities as Clients

Sanctuary Wealth Advisors does not generally trade in or recommend individual securities for its clients. As such, the Firm and its associated persons generally are not in a position of recommending a security to a client that would also be bought or sold for the Firm or its related persons. As discussed in the section outlining the Firm’s advisory services, the Firm recommends independent managers to its clients. These independent managers manage accounts for clients of Sanctuary Wealth Advisors in-line with their stated investment strategy and portfolio models. As the Advisors, employees and other related persons of Sanctuary Wealth Advisors do not have discretion over the trades of specific securities for the Firm’s client’s accounts that are utilizing the sub-advisor services, conflicts relating to employees trading in the same securities that clients may own are minimized.

Although the Firm and its Advisors aren't generally in position to recommend individual securities for its clients as described above, there are instances where this may occur. The Firm does not prohibit employees from trading in securities that are also recommended to its clients. This presents a conflict of interest. Any conflict that could arise from trading activity in the same securities by the Firm or its associated persons will be mitigated by the requirement for employees to comply with the Firm's code of ethics, which includes a requirement to disclose all holdings and trading activities.

If issues arise with regard to an Advisor's fiduciary obligation and/or violations of the Firm's Code of Ethics, it will be escalated to the Firm's Compliance Department.

D. Investing in Securities around the Same Time as Clients

As mentioned above, the Firm and its associated persons generally are not in a position of recommending a security to a client that would also be bought or sold for the Firm or its related persons; however there are instances where this may occur.

If this should occur, Sanctuary Wealth Advisors will generally transact client business before the business of its associated and/or related persons when similar securities are being bought or sold. In some instances block trades with average price allocations may be placed that include allocation to accounts belonging to both associated persons of the Firm and clients. The Firm will ensure that its associated persons or related accounts do not receive better pricing than its clients.

Item 12: Brokerage Practices

A. Factors in Selecting or Recommending Broker-Dealers

Sanctuary Wealth Advisors may recommend/require that clients establish brokerage accounts with one of the following registered broker-dealers to maintain custody of clients' assets and to effect trades for their accounts (collectively referred to herein as "Custodial Brokers"):

- Schwab Advisor Services division of Charles Schwab & Co., Inc.
- TD Ameritrade Institutional
- Pershing Advisor Solutions

Sanctuary Wealth Advisors recommends brokers for custodial purposes only. Sanctuary Wealth Advisors does not recommend brokers on a transaction basis. Such recommendations will take into account a number of factors, some of which are transaction fees, custodial fees charged by the broker for holding securities for the client, commission rates, interest charges on debit balances and interest credits on credit balances, quality of execution, and record-keeping and reporting capabilities. In recommending a broker, Sanctuary Wealth Advisors will attempt to minimize the total cost for all brokerage services paid by the client. However, it may be the case that a recommended broker charges a higher fee for a particular type of service, such as commission rates, than can be obtained from another broker. It may also be the case that the total costs of all services provided by the recommended broker may be higher than can be obtained at another broker. Sanctuary Wealth Advisors may determine in good faith that such total costs are reasonable in relation to the value of brokerage and research services provided by such broker, viewed in terms of Sanctuary Wealth Advisors' overall responsibilities to the client.

The final decision to custody assets with a Custodial Broker is at the discretion of the Advisor's clients, including those accounts under ERISA or IRA rules and regulations, in which case the

client is acting as either the plan sponsor or IRA accountholder. Sanctuary Wealth Advisors is independently owned and operated and not affiliated with the Custodial Brokers. The Custodial Brokers provide Sanctuary Wealth Advisors with access to their institutional trading and custody services, which are typically not available to retail investors of the Custodial Brokers. In certain instances these services generally are available to independent investment advisors on an unsolicited basis, at no charge to them so long as a total of at least \$10 million of the advisor's clients' assets are maintained in accounts at the Custodial Brokers. The Custodial Broker's services may include brokerage services that are related to the execution of securities transactions, custody, research, including that in the form of advice, analyses and reports, and access to mutual funds and other investments that are otherwise generally available only to institutional investors or would require a significantly higher minimum initial investment.

For Sanctuary Wealth Advisor client accounts maintained in their custody, the Custodial Brokers generally do not charge separately for custody services but are compensated by account holders through commissions or other transaction-related or asset-based fees for securities trades that are executed through the Custodial Brokers or that settle into Custodial Broker accounts.

The Custodial Brokers may also make available to Sanctuary Wealth Advisors other products and services that benefit Sanctuary but may not benefit its clients' accounts. . These benefits may include national, regional or Sanctuary-specific educational events organized and/or sponsored by the Custodial Brokers. Other potential benefits may include occasional business entertainment of personnel of Sanctuary by the Custodial Broker's personnel, including meals, invitations to sporting events, including golf tournaments, and other forms of entertainment, some of which may accompany educational opportunities. Other of these products and services assist Sanctuary in managing and administering clients' accounts. These include software and other technology (and related technological training) that provide access to client account data (such as trade confirmations and account statements), facilitate trade execution (and allocation of aggregated trade orders for multiple client accounts), provide research, pricing information and other market data, facilitate payment of Sanctuary's fees from its clients' accounts, and assist with back-office training and support functions, recordkeeping and client reporting. Many of these services generally may be used to service all or some substantial number of Sanctuary's accounts, including accounts not maintained at one of the Custodial Brokers. The Custodial Brokers may also make available to Sanctuary other services intended to help Sanctuary manage and further develop its business enterprise. These services may include professional compliance, legal and business consulting, publications and conferences on practice management, information technology, business succession, regulatory compliance, employee benefits providers, human capital consultants, insurance and marketing. In addition, the Custodial Brokers may make available, arrange and/or pay vendors for these types of services rendered to Sanctuary by independent third parties. The Custodial Brokers may discount or waive fees it would otherwise charge for some of these services or pay all or a part of the fees of a third-party providing these services to Sanctuary. While, as a fiduciary, Sanctuary Wealth Advisors endeavors to act in its clients' best interests, Sanctuary recommendation/requirement that clients maintain their assets in accounts at Custodial Brokers may be based in part on the benefit to Sanctuary of the availability of some of the foregoing products and services and other arrangements and not solely on the nature, cost or quality of custody and brokerage services provided by the Custodial Brokers, which may create a potential conflict of interest.

Soft Dollar Arrangements:

Sanctuary Wealth Advisors does not currently have and does not anticipate engaging in soft dollar arrangements.

Client Referrals for Brokerage Arrangements:

Sanctuary Wealth Advisors does not receive client referrals from broker-dealers or third parties for recommending clients, thus Sanctuary Wealth Advisors does not have any incentive to select or recommend a broker-dealer based on the Firm's interest in receiving client referrals. In the event a client wants to open a brokerage account in addition to his Advisory account with the Firm, the Firm and its Advisors may recommend the client use its affiliated broker dealer firm, Sanctuary Securities.

Directed Brokerage:

Sanctuary Wealth Advisors does not routinely recommend, request or require that a client direct the Firm to execute transactions through a specific broker-dealer and the Firm does not have directed brokerage arrangements.

B. Aggregating Trades for Client Accounts

For occasions when the Firm trades in individual securities in accounts managed in the same manner, the Firm will aggregate trades. The Firm will aggregate trades only when it is believed that to do so will be in the best interest of the effected accounts. When such trade aggregations occur, the objective is to allocate the executions in a manner which is deemed equitable to the accounts involved. In any given situation, the Firm will attempt to allocate trade executions in the most equitable manner possible.

Item 13: Review of Accounts

A. Periodic Reviews

Almost all client accounts will consist of custodied mutual funds and/or an allocation of a separately managed portfolio by an outside manager. Accounts are reviewed by the designated principal for trading activity and suitability. While the underlying securities within client accounts are continually monitored by the designated principal, these accounts are formally reviewed at least annually by the CCO or the Supervisor responsible for maintaining and servicing client relationships.

B. Factors that Trigger Other-than-Periodic Reviews

More frequent reviews may be triggered by material changes in variables such as the client's individual circumstances, or the market, political or economic environment. It is noted that the designated principal is currently Jeffrey Spears.

C. Reports to Clients

Clients receive month-end account statements showing activity and month end positions, and a year end tax statement detailing the previous year's taxable activity. This information will be prepared and sent to clients by the custodial broker-dealer(s) and/or a third party data aggregator. Clients may also choose to have online access to their accounts to view daily information.

Quarterly management reports, compiled by a third party data aggregator, will also be made available to clients. These reports are comprehensive and provide a review of all assets and

performance information for the client's whole portfolio as well as each sub-manager held in the client's portfolio.

All third party aggregators must be pre-approved by the Firm.

Item 14: Client Referrals and Other Compensation

Sanctuary Wealth Advisors' affiliated broker-dealer (affiliated by common ownership) may receive a fully disclosed commission if clients of the Firm, in their sole discretion, chose to use certain investment products represented by the affiliated broker-dealer. This presents a conflict of interest. The Firm's policy to mitigate this type of conflict is outlined in Item 10 above.

When recommending third party advisors to clients of Sanctuary Wealth Advisors, the Firm will ensure that the third party advisor is appropriately licensed prior to doing so.

Sanctuary Wealth Advisors has a referral agreement in place with other investment advisors. For clients referred to our wrap program through these agreements, Sanctuary Wealth Advisors shall pay up to 1.5% of the total wrap fee to an unaffiliated Registered Investment Advisor, or an Investment Advisor Representative of the Firm, for recommending our wrap fee program to a client. This compensation may be more than what would have been received if the client paid separately for investment advice, brokerage, and to other services. Therefore, the individual making the recommendation may have a financial incentive to recommend the wrap fee program to clients.

Sanctuary Wealth Advisors also has a referral arrangement in place with its affiliated broker-dealer, Sanctuary Securities, LLC. In this scenario, the solicitor would be a registered employee of Sanctuary Securities, LLC, and the solicitor's association with the investment adviser would be disclosed to prospective clients at the time of the solicitation. For clients referred to our wrap program through this arrangement, Sanctuary Wealth Advisors may pay up to 25% of the wrap fee to Sanctuary Securities, LLC.

Item 15: Custody

Sanctuary Wealth Advisors does not have custody of client funds or securities, except for authorized fee withdrawals. All client funds and securities will be custodied at a custodial broker-dealer and each client will have online access and will receive a monthly account statement directly from the custodian.

Sanctuary Wealth Advisors withdraws advisory fees directly from client accounts and as such, does comply with the following guidelines:

- The custodian will send monthly statements to the Firm's clients, which will reflect all disbursements for the account, including the amount of the advisory fees.
- Sanctuary Wealth Advisors will receive written authorization from its clients permitting the payment of fees directly from their accounts held by the custodian. This written authorization will be provided in the advisory account agreement signed by each client.

Item 16: Investment Discretion

Sanctuary Wealth Advisors does not accept discretionary trading authority to buy and sell individual securities, but customarily does have execution authority to allocate a client's account between independent managers selected by the client and to fire independent managers as appropriate. All execution authority will be limited solely to the allocation of a client's accounts to previously selected (by the customer) independent managers in the process of rebalancing the account as needed to remain in-line with the customer's investment objectives and stated allocations to each independent manager as outlined in the advisory agreement.

All execution authority will be assumed only with an executed limited power of attorney. This limited power of attorney is customarily a part of the client's advisory agreement.

Item 17: Voting Client Securities

Sanctuary Wealth Advisors does not accept authority to vote client securities. Advisors shall not vote or advise the client on voting proxies for securities held in client's accounts. Therefore, the client maintains exclusive responsibility for: (1) directing the manner in which proxies solicited by issuers of securities beneficially owned by client shall be voted, and (2) making all elections relative to any mergers, acquisitions, tender offers, bankruptcy proceedings or other type events pertaining to client's investment assets. Advisors and/or the clients shall instruct the client's qualified custodian to forward to client copies of all proxies and shareholder communications relating to the client's investment assets. Clients will receive their voting proxies or other solicitations directly from the custodian.

For accounts managed by sub-advisors, the proxy voting is dictated by the sub-advisor (and outlined in their ADV - either the sub-advisor will vote or proxies will be sent to the client to vote).

If a client has questions on any particular proxy or solicitation, they can contact their advisor.

Item 18: Financial Information**A. Prepayment of Fees**

Sanctuary Wealth Advisors does not require or solicit prepayment of more than \$1,200 in fees per client, six months or more in advance and therefore is not required to include a balance sheet with this Brochure.

B. Discretionary Authority

Sanctuary Wealth Advisors has discretionary authority over client assets in instances where the client approves such discretion. At this time, Sanctuary Wealth Advisors does not have any financial conditions that are likely to reasonably impair their ability to meet contractual commitments to clients.

C. Bankruptcy

Sanctuary Wealth Advisors has not been the subject of a bankruptcy petition at any time during the past ten years.
