### We believe that transparency, integrity and trust are the cornerstones to building that business.

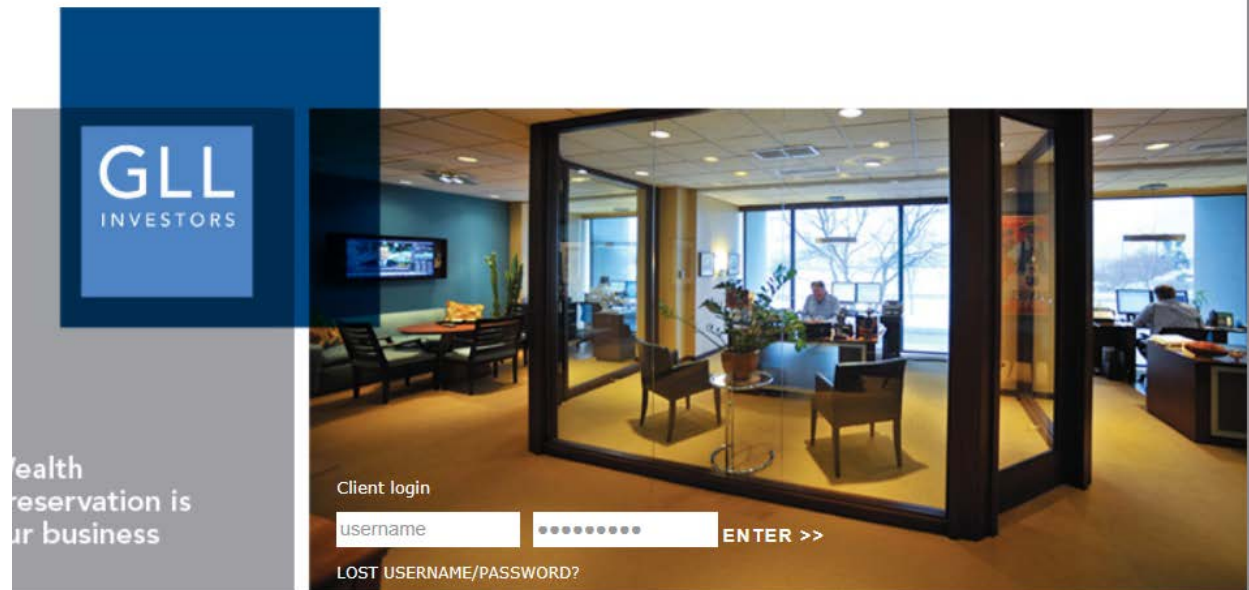

From the day GLL Investors opened in 1995, we have focused on protecting the assets entrusted to us by investors as a way to securing a healthy financial future. We assess risk constantly and operate on the principles of transparency and integrity that guide our business practices every day. We only do business with people who we know and trust.

GLL Investors is a fund manager currently managing four private funds. The firm is managed by W. Stephen Gilboy, President and Managing Member; Michael Newlander, Managing Member; and Jason Gilboy, Managing Member.

#### GLL Funds stand apart from many other alternative investments because we adhere to strict criteria. GLL funds must:

- operate as multi-manager funds (also referred to as "fund of funds") that invest substantially all of their capital in other hedge funds. GLL Funds are also permitted to make direct investments aside from placing capital with other hedge funds.
- seek stable, superior capital appreciation while attempting to reduce risk through diversification.
- generally diversify investments among multiple alternative investment strategies.
