ADVISORY BUSINESS

Raritan Valley Capital Management LLC (“RVCM”) is a Delaware limited liability company and was formed on September 24, 2014. RVCM is managed by QTrade Holdings L.P. and is wholly owned by QTrade Holdings L.P., which is principally owned by the Friedman Investment Trust (for which Barry Friedman and Brad Shalit act as co-trustees), through its ownership in JAHSB Investments LLC; Derrick Kaiser; and Llewellyn Jones.

Initially, RVCM intends to offer its discretionary investment management services to a single private investment fund (the “Fund”), but may in the future offer its services to one or more other clients, including other private investment funds, registered investment companies and/or separately managed client accounts. The terms, nature and scope of such advisory services may be negotiated by RVCM and the applicable client, based on the client’s specific financial and investment objectives, risks and goals. RVCM’s strategy utilizes algorithmic trading models primarily to trade the U.S. equities markets, while using equity index futures contracts to hedge its clients’ exposure. The specific investment objectives and strategies utilized by RVCM are described below. See “*Methods of Analysis, Investment Strategies and Risk of Loss.*”

RVCM has registered as an investment adviser in anticipation of having discretionary assets under management in excess of \$150 million within the next 120 days; however, as of the date hereof, RVCM does not advise any client assets on a discretionary basis.

FEES AND COMPENSATION

The Fund pays RVCM a performance-based fee and also pays RVCM a monthly management fee of an agreed upon dollar amount, which is meant to reimburse RVCM for identified expenses incurred, and a portion of shared resources of QTrade (as defined below) utilized, by RVCM in rendering advisory services on behalf of the Fund.

The amount of these fees and reimbursements was negotiated between the Fund and RVCM, and is set out in the investment advisory agreement between the Fund and RVCM. These fees and reimbursements may not reflect the fees or other costs that would be borne by other clients in the future. The types and amounts of fees payable in respect of a client of RVCM will be set forth in an investment advisory agreement between RVCM and the applicable client and may be negotiated based on a variety of factors, including, but not limited to, the size, composition and complexity of the client’s account, length and nature of RVCM’s relationship with the client, special services agreed upon with the client or other factors deemed relevant by RVCM. As RVCM has only a single client, and this brochure is intended to be delivered solely to “qualified purchasers,” as such term is defined in Section 2(a)(51)(A) of the Investment Company Act of 1940, RVCM is not required to publish a fee schedule in this brochure.

Other Fees and Expenses. RVCM’s clients will incur other expenses in connection with RVCM’s advisory services. RVCM’s fees do not include transaction fees, brokerage commissions, custody fees and other related costs and expenses that will be incurred by clients with respect to the transactions for their account.

Prepayment of Expenses. The Fund has agreed to prepay a specified dollar amount to RVCM as of the first day of each month during the term of its investment advisory agreement with RVCM to cover certain agreed-upon expenses. As agreed upon between the Fund and RVCM, this amount is not refundable.

PERFORMANCE BASED FEES AND SIDE-BY-SIDE MANAGEMENT

Initially, RVCM expects to have only a single client, which will pay RVCM a performance-based fee. As compensation for its advisory services to the Fund, RVCM will be entitled to receive a performance-based fee, as agreed between RVCM and the Fund. This performance-based compensation is calculated and payable annually as of the end of each year.

The amount of the performance-based fee was negotiated between the Fund and RVCM, and is set out in the investment advisory agreement between the Fund and RVCM. These fees may not reflect the fees or other costs that would be borne by other clients in the future. The amount and payment terms associated with any such fee may be subject to negotiation between RVCM and the client, as described above. See *“Fees and Compensation.”*

TYPES OF CLIENTS

Initially, RVCM expects to provide investment advice exclusively to an account of a single private investment fund operated by a third-party asset manager. The Fund is operated in reliance upon the exclusion from the definition of an “investment company” described in Section 3(c)(7) of the 1940 Act. In order to qualify for this exclusion, investment in the Fund is generally limited to U.S. persons who are “qualified purchasers,” as defined in Section 2(a)(51) of the 1940 Act, as well as non-U.S. persons and certain “knowledgeable employees” of the fund and/or fund manager. In general, the definition of “qualified purchaser” includes individuals with \$5,000,000 or more in “investments” (as defined by the SEC) and entities with \$25,000,000 or more in “investments,” as well as certain other specified categories of investors.

In the future, RVCM may determine to offer investment advisory services to various types of clients, including, but not limited to, high-net worth individuals, trusts and estates, institutional investors, corporations, private funds operated by RVCM or other third parties, registered investment companies and other business entities.

METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS

RVCM seeks to take advantage of opportunities primarily in the U.S. equities markets using its proprietary quantitative models, while seeking to hedge its market exposure using equity index futures contracts. RVCM’s trading approach generally employs statistical arbitrage, providing liquidity to markets and seeking to maximize portfolio return while taking into account portfolio risk and transaction costs. RVCM will collect and perform research on historical data in an effort to establish optimal trading parameters. RVCM will seek to trade a broad universe of NMS-listed securities, and expects that approximately 3,000 securities will pass its filters and requirements, based on a combination of liquidity, risk, correlation, industry, and other metrics.

RVCM's trading is expected to be primarily algorithmic, with the determinations to trade in and out of positions being automated in the ordinary course, taking into account real-time data. RVCM's trading positions are generally expected to be held for a period of several days, although more frequent turnover is possible. Risk management is also expected to be conducted on a real-time basis, with monitoring by RVCM's trading desk personnel. RVCM will use a quantitative approach to portfolio risk management, by way of a third-party risk management software tool, measuring and controlling multiple sources of risk, including market risk, factor risk and liquidity risk. RVCM generally intends to reconcile positions on a daily basis after each trading day's close, prior to each trading day's open, as well as periodically throughout the trading day.

Methods of Analysis

RVCM relies on a combination of quantitative analysis, internally generated alphas, and external market data obtained via subscription, in making investment decisions on behalf of the Fund. RVCM's Portfolio Manager, Paul Kornfeld, manages the research and analysis functions on behalf of RVCM.

Certain Risk Factors.

The identification of attractive investment opportunities is difficult and involves a significant degree of uncertainty. Potential clients should consider the following risks before engaging RVCM to manage their assets.

Equity Securities. RVCM expects to trade in equity securities on behalf of its clients. Common stock and similar equity securities generally represent the most junior position in an issuer's capital structure and, as such, generally entitle holders to an interest in the assets of the issuer, if any, remaining after all more senior claims to such assets have been satisfied. Holders of common stock generally are entitled to dividends only if and to the extent declared by the governing body of the issuer out of income or other assets available after making interest, dividend and any other required payments on more senior securities of the issuer. The value of equity securities may fluctuate in response to specific situations for each company, industry market conditions and general economic environments. RVCM may acquire long and short positions in listed common and preferred equities of issuers domiciled in developed countries. RVCM may invest in equity securities regardless of market capitalization, including micro- and small-cap companies. The securities of smaller companies may involve more risk and their prices may be subject to more volatility. RVCM may also invest in distressed equity securities, which are generally considered to be riskier, speculative and relatively illiquid.

Exchange-Traded Funds ("ETFs"). RVCM may invest in ETFs, both long and short, on behalf of its clients. ETFs are funds that track a particular basket or index of securities traded on a public exchange. ETF investments are subject to the risks arising from the portfolio of underlying stocks, including market and issuer risks, but may also present certain unique risks. It is possible for the value of ETFs to fall or to rise more slowly than the stock market as a whole even when stock prices in general are rising. In addition, the fees and expenses charged by such ETFs result in an additional level of fees and greater expense to clients than would be associated with direct investment.

Commodities and Futures Trading. RVCM expects to invest in equity index futures products for hedging purposes on behalf of its clients. Equity index futures are generally settled only in cash based on the value of the underlying composite index. Futures prices may be highly volatile, and can be influenced by a wide range of macro- and micro-economic variables. Futures trading also is subject to various regulatory limitations, including limitations on the maximum net long or net short positions that any trader (such as RVCM) may hold or control in particular futures contracts and limitations on daily price

movements, which could limit RVCN's ability to trade futures on behalf of its clients under certain circumstances. Because futures contracts are typically traded on "margin"—meaning that only a small portion of the total value of the futures contract must be posted with a broker to establish a futures position—a comparatively small commitment of cash or its equivalent may permit trading in futures contracts of substantially great value. As a result, price fluctuations may result in a contract profit or loss that is disproportionate to the amount of funds deposited as margin.

Effectiveness of Risk Reduction Techniques. RVCN may employ various risk reduction strategies designed to minimize the risk of its trading positions taken on behalf of client accounts. A substantial risk remains, nonetheless, that such strategies will not always be possible to implement and when possible will not always be effective in limiting losses. If RVCN analyzes market conditions incorrectly, or employs a risk reduction strategy that does not correlate well with RVCN's investments on behalf of its clients, such risk reduction techniques could result in a loss, regardless of whether the intent was to reduce risk or increase return. These risk reduction techniques may also increase the volatility of client accounts and/or result in a loss if the counterparty to the transaction does not perform as promised.

Market Neutral Strategies. The use of "market neutral" or "relative value" hedging or arbitrage strategies should in no respect be taken to imply that RVCN's strategy is without risk. Substantial losses may be recognized on "hedge" or "arbitrage" positions, and illiquidity and default on one side of a position can effectively result in the position being transformed into an outright speculation. Every market neutral or relative value strategy involves exposure to some second order risk of the market, such as the price spread between different classes of stock for the same underlying issuer.

General Risks of Arbitrage Transactions. RVCN's investments for its clients are expected to be based on statistical arbitrage strategies. The success of arbitrage strategies depends often on the ability to execute two or more simultaneous transactions at desired prices. Should such transactions not be executed simultaneously at the desired prices, losses may be incurred on both sides of the transaction. Additionally, separate costs are incurred on both sides of an arbitrage transaction, and substantial favorable price moves may be required before a profit can be realized. There can be no assurances that the hedging and arbitrage strategies used by RVCN will be successful. The market values of related financial instruments may not move in correlation with each other or in ways anticipated by RVCN, and intervening events may cause hedged positions not to perform as anticipated. A hedged position may perform less favorably in generally rising markets than an unhedged position.

Leverage. The low margin and collateral deposits required to trade equity index futures may permit an extremely high degree of leverage. In addition, RVCN may utilize broker-provided financing in its trading on behalf of clients. The degree of leverage that RVCN may utilize may not be limited to any predetermined level, but will be subject to applicable legal, regulatory or broker imposed leverage limitations, to the extent applicable. As a result of trading with a high degree of leverage, a relatively small price movement in a financial instrument's price may result in immediate and substantial losses to clients, and could result in the mandatory liquidation of certain positions if margin requirements are not satisfied. If a client is in a leveraged position, any losses would be more pronounced than if leverage were not used and, under particularly adverse circumstances, could exceed the client's capital under RVCN's management.

Turnover. Capital of RVCN's clients may be invested on the basis of short-term market considerations. The portfolio turnover rate of those investments may be significant, potentially involving substantial brokerage commissions and fees. These commissions and fees will reduce the applicable client's profits.

Short Sales. A short sale involves the sale of a financial instrument that a client does not own in the expectation of purchasing the same financial instrument (or a financial instrument exchangeable therefor)

at a later date at a lower price. To make delivery to the buyer, RVCN, on behalf of the client, often must borrow the financial instrument, and the client is obligated to return the financial instrument to the lender, which is accomplished by a later purchase of the financial instrument by the client's account. When a client makes a short sale of a financial instrument on a U.S. exchange, it must leave the proceeds thereof with a broker and it must also deposit with a broker an amount of cash or U.S. Government or other securities sufficient under current margin regulations to collateralize its obligation to replace the borrowed securities that have been sold. A short sale involves the risk of a theoretically unlimited increase in the market price of the financial instrument and a corresponding loss to the client. The extent to which RVCN engages in short sales on behalf of clients depends upon its investment strategy and perception of market direction. RVCN does not necessarily have a policy limiting the amount of capital it may deposit to collateralize clients' obligations to replace borrowed financial instruments sold short.

Reliance on Fundamental Analysis. RVCN may base its trading decisions, in whole or in part, on fundamental analysis. Fundamental trading methodologies consider factors, such as inflation, trade balances, inventories and interest rates, which do not have an impact on traditional technical trading systems, in an attempt to identify investment opportunities. To the extent that such factors provide mixed or conflicting signals, a fundamental trading program may not be able to detect and/or accurately predict price trends. There can be no guarantee that RVCN's fundamental analysis and trading methodologies will enable RVCN to accurately value the securities and other instruments in which the Fund or any client account advised by RVCN invests or that any anticipated price trends will materialize with respect to such investments.

Reliance on Quantitative Analysis. RVCN's investment strategies rely upon quantitative models and systems. Such models and systems may entail the use of sophisticated statistical calculations and complex computer systems, and there is no assurance that RVCN will be successful in carrying out such calculations correctly or that the use of these quantitative models and systems will not expose clients to the risk of significant losses. In addition, the analytical techniques used by RVCN cannot provide any assurance that clients will not be exposed to the risk of significant trading losses if the underlying patterns that form the basis for the quantitative models and systems employed by RVCN change in ways not anticipated by RVCN. The effectiveness of quantitative models and systems may diminish over time, and attempts to apply existing quantitative models and systems to new or different markets, strategies or financial products may prove ineffective.

To the extent that information regarding RVCN's positions or trades becomes or is required to be made publicly available, there is a material risk that other market participants may seek to reverse engineer RVCN's quantitative investment strategies from such public information. The use of RVCN's investment strategies by other persons, whether as a result of reverse engineering, "frontrunning" or other actions, may have a material adverse effect on the performance of RVCN's strategies.

Reliance on Qualitative Analysis. RVCN's investment strategies additionally rely additionally upon qualitative analysis. RVCN subjectively evaluates non-quantifiable factors, including quality of management, industry cycles, labor relations and strength of research and development not readily subject to measurement, and seeks to predict changes to value based on that data. To the extent that such factors provide mixed or conflicting signals, a qualitative analysis may not be able to detect and/or accurately predict price trends. There can be no guarantee that RVCN's subjective judgment will enable RVCN to accurately value securities and other instruments or anticipate price trends.

* * *

Investment in securities and other financial instruments involves certain significant investment risks, including loss of an investor's entire investment. The foregoing list of risk factors does not

purport to be a complete enumeration or explanation of the risks involved with RVCM's investment programs or an investment in any fund or account advised by RVCM. Prospective clients and investors must consult their own advisers before deciding whether to make such an investment.

DISCIPLINARY INFORMATION

RVCM is required to disclose all material facts regarding any legal or disciplinary events that would be material to a client's evaluation of RVCM or the integrity of RVCM's management. RVCM has no such information to report.

OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

RVCM is a wholly-owned subsidiary of QTrade Holdings L.P., a Delaware limited partnership, which has various subsidiaries and affiliates, including QTrade Capital Partners LLC, a New Jersey limited liability company, XYZ Financial Markets LLC, an New Jersey limited liability company, and QTrade Technologies LLC, a Delaware limited liability company. Such subsidiaries and affiliates (collectively, "QTrade") operate as a proprietary trading firm that implements high turnover statistical arbitrage strategies in various financial instruments.

RVCM's Portfolio Manager, Paul Kornfeld, is generally responsible for overseeing, developing and implementing the trading strategies used by RVCM on behalf of its clients, independently from the trading strategies developed and implemented for QTrade's proprietary trading operations. However, personnel of QTrade will assist Mr. Kornfeld in programming the trading algorithms utilized by RVCM and will also provide administrative and back-office services (such as operational, information technology, risk management and accounting services) to both firms. In addition, Barry Friedman, a principal of QTrade, is expected to be involved in RVCM's business operations, compliance and corporate direction, but will not be involved in day-to-day algorithm research and development. RVCM at all times retains independent investment discretion over its clients' assets, including determination of the investments to be made on behalf of its clients and the timing and price of transactions in their respective portfolios.

The sharing of personnel and resources between RVCM and QTrade creates certain potential conflicts of interest, as it could enable each firm to use investment information generated by personnel of the other firm to the disadvantage of the other firm or, if applicable, its clients (for example, by acting on an investment opportunity identified by the other firm, and thereby adversely impacting the price or availability of the opportunity for the other firm). Further, because of the overlap in beneficial ownership between RVCM and QTrade, principals of the firms could have an incentive to direct investment opportunities to QTrade (rather than RVCM) based upon the relative income generated by the opportunity (and, indirectly, received by such principals), rather than considering the appropriateness of the opportunities for the firms (or, in the case of RVCM, its clients).

RVCM and QTrade seek to address this potential conflict of interest in several ways. First, RVCM employs an independent Portfolio Manager whose compensation is derived solely from RVCM's performance (and not the performance of QTrade) and who has no involvement in the formulation of QTrade's investment strategies, reducing the portfolio manager's incentive to share trading information

with QTrade to the detriment of RVCM clients. Second, both firms employ separate algorithmic trading systems, including independent servers, independent market data feeds, independent 15c3-5 risk gateways, and independent order entry ports to the exchanges, such that the two firms will never intentionally interact with each other. Additionally, the chance of unintentional interaction is decreased due to the firms' differing investment holding horizons as well as the fact that both are primarily providing liquidity. Finally, the markets in which RVCM trades are generally liquid, public markets, and therefore it is not anticipated that the firms will regularly be in competition with one another for limited investment opportunities.

Other Clients. Although RVCM and its affiliates may manage investments on behalf of a number of accounts, investment decisions and allocations will not necessarily be made in parallel among all such accounts. Other accounts managed by RVCM, QTrade or their respective principals or affiliates may make investments and utilize investment strategies that may not be made or utilized by RVCM on behalf of all (or any) of its clients, and may take positions that are opposite those of all or some clients. Accordingly, the various accounts managed by RVCM, QTrade and their respective principals and affiliates may produce results that are materially different from those experienced by a particular client, and the records of any investment management activities that RVCM, QTrade and their respective principals and affiliates may engage in on behalf of such other accounts will not be available to any such client.

Other Activities of RVCM and Related Persons. As described above, certain key personnel of QTrade are also involved in the operations of RVCM. Although these individuals are expected to commit an appropriate amount of their business efforts to RVCM, they are not required to devote all of their time to the affairs of RVCM or of a particular client.

RVCM, QTrade, and the principals and affiliates of RVCM and QTrade, may engage in, invest in, participate in or otherwise enter into other business ventures of any kind, nature or description, alone or with others, including, without limitation, the management of or investment in other investment or trading accounts, entities or vehicles, and clients shall have no right in or to any such activities or the income or profits derived therefrom.

QTrade, and the principals and affiliates of RVCM and QTrade, may invest and trade for their own accounts, including in securities which are the same as or different or opposite from those traded or held by clients. As a result, QTrade, and the principals and affiliates of RVCM and QTrade, may from time to time have proprietary investments in securities in which a client may take a position, may trade and invest simultaneously with clients and may take investment positions that are different or opposite from the positions taken by clients. As a result, conflicts of interest may arise between clients and QTrade or the principals or affiliates of RVCM or QTrade with respect to matters such as the allocation of investment opportunities, purchases and sales of securities in connection with particular trading situations and allocation of personnel, resources and expenses. The records of trading by QTrade and the principals and affiliates of QTrade and RVCM generally will not be made available to clients, except to the extent required by law. However, trading by principals and personnel of RVCM will be subject to RVCM's Code of Ethics and personal trading policy, as described below in "*Code of Ethics, Participation or Interest in Client Transactions and Personal Trading*," which seeks to mitigate the conflicts described above. Among other things, RVCM's Code of Ethics requires employees to pre-clear certain securities transactions for their personal accounts with appropriate personnel of RVCM.

CODE OF ETHICS, PARTICIPATION OR INTEREST IN CLIENT TRANSACTIONS AND PERSONAL TRADING

RVCM has adopted a code of ethics (“Code of Ethics”) for all supervised persons of RVCM describing its high standard of business conduct, and fiduciary duty to its clients. The Code of Ethics includes provisions relating to the confidentiality of client information, a prohibition on insider trading, and personal securities trading procedures, among other things. All supervised persons at RVCM must acknowledge the terms of the Code of Ethics annually, or as amended. Clients or prospective clients may request a copy of RVCM’s Code of Ethics by contacting Heather Garson at (203) 861-8405.

As a matter of policy, RVCM does not knowingly cause clients to effect transactions in which such client purchases securities or other instruments from, or sells securities or other instruments to, RVCM or its principals or affiliates (i.e., principal trades) or another client (i.e., cross trades), or in which one of RVCM’s affiliates acts as broker for both RVCM’s client and the other party to the transaction (i.e., agency cross transactions).

RVCM may, in appropriate circumstances when deemed consistent with a client’s investment objectives, cause such client to purchase or sell securities in which QTrade, RVCM and/or their principals or affiliates, directly or indirectly, have a position or interest. See “*Other Financial Industry Activities and Affiliations – Other Activities of RVCM and Related Persons.*”

RVCM’s employees and persons associated with RVCM are required to follow RVCM’s Code of Ethics. Subject to satisfying this policy and applicable laws, officers, directors and employees of RVCM and its affiliates may be permitted to trade for their own accounts in securities which are recommended to and/or purchased for clients, as described above in “*Other Financial Industry Activities and Affiliations.*” The Code of Ethics is designed to assure that the personal transactions, activities and interests of the employees of RVCM will not interfere with (i) making decisions in the best interest of clients and (ii) implementing such decisions while at the same time allowing employees to invest for their own accounts. The Code of Ethics requires pre-clearance of certain transactions for the personal securities accounts of RVCM’s “access persons” by appropriate personnel of RVCM, and requires that the interests of clients be placed ahead of those of RVCM employees in their personal trading. Nonetheless, because the Code of Ethics in some circumstances would permit employees to invest in the same securities as clients, there is a possibility that employees might benefit from market activity by a client in a security held by an employee. Employee trading is regularly monitored under the Code of Ethics, in an effort to prevent conflicts of interest between RVCM and its clients.

BROKERAGE PRACTICES

RVCM does not select or recommend the brokers to be utilized by the Fund, and instead will execute trades on behalf of the Fund through the brokers agreed upon with the Fund. Because the Fund directs RVCM to use a particular broker for trading on the Fund's behalf, RVCM may be unable to achieve most favorable execution of the Fund's transactions, which could result in the Fund paying higher commissions on its trades.

Should RVCM select or recommend brokers for its clients in the future, it intends to establish policies for these practices at such time.

Aggregation and Allocation of Client Orders/Investments. As RVCM expects to have only a single advisory client at launch, it currently does not engage in the allocation of client orders. Should RVCM accept additional clients in the future, it intends to establish procedures for the aggregation of client orders at such time.

REVIEW OF ACCOUNTS

Account Reviews. The Fund has engaged a third-party fund administrator to provide day-to-day administrative and bookkeeping services to the funds. RVCM conducts daily trade reviews and reconciliations of the positions held by the Fund to the records of the Fund's brokers. These reviews are conducted by RVCM's Portfolio Manager, Paul Kornfeld, and its Chief Executive Officer, Barry Friedman. Procedures for the review of other client accounts will be determined at the time of engagement.

Client Reporting. RVCM furnishes written daily trade reports to the Fund's third-party administrator. Reporting obligations with respect to other client accounts will be determined at the time of engagement.

CLIENT REFERRALS AND OTHER COMPENSATION

RVCM currently has no arrangements whereby it receives an economic benefit from any person who is not a client for providing investment advice or other advisory services to clients, and does not directly or indirectly compensate any third-parties for client referrals.

CUSTODY

RVCM does not have custody of the funds or securities of the Fund. Should RVCM accept custody of client assets in the future, it intends to establish procedures for compliance with Rule 206(4)-2 of the Advisers Act at such time.

INVESTMENT DISCRETION

RVCM exercises discretionary authority over a designated account (or accounts) owned by the Fund, which will be granted at the outset of the advisory relationship under the terms of the Fund's investment advisory agreement with RVCM. This agreement grants a power of attorney in favor of RVCM to select the identity and amount of any investments to be bought or sold for the designated account(s) of the Fund; however, such discretion is to be exercised in a manner consistent with the stated investment objectives and restrictions included in the investment advisory agreement.

VOTING CLIENT SECURITIES

RVCM holds the authority to vote proxies on behalf of the Fund; however, it is generally not RVCM's practice to vote such proxies, as it is RVCM's view that the outcome of such corporate decisions related to the financial instruments in which the Fund invests typically does not materially impact the implementation of RVCM's investment strategies. RVCM will analyze on an annual basis the estimated costs associated with casting such proxies on behalf of the Fund against any estimated potential benefits of doing so, and reserves the right to vary this practice where it determines that doing so is in the best interests of the Fund, although it is not anticipated that RVCM will do so. Clients generally may not direct RVCM's vote in a particular solicitation. The Fund may request a copy of RVCM's proxy voting policies and procedures relating to the Fund and information about how RVCM voted any proxies on behalf of the Fund by contacting Barry Friedman at (908) 232-5693.

FINANCIAL INFORMATION

RVCM is required to provide certain financial information or disclosures about its financial condition. RVCM has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to its clients, and has not been the subject of a bankruptcy proceeding.

* * *
