www.chicagocapitalmanagement.com

March 29, 2018

This Brochure provides information about the qualifications and business practices of Chicago Capital Management, LLC (“Chicago Capital”). If you have any questions about the contents of this Brochure, please contact Chicago Capital at (312) 374-9000. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Chicago Capital is a registered investment adviser (“RIA”). Registration as an RIA does not imply any level of skill or training. The oral and written communications of an RIA provide you with information about which you determine to hire or retain an RIA.

Additional information about Chicago Capital is available on the SEC’s website at www.adviserinfo.sec.gov.

Item 2 – Material Changes

This Brochure, dated March 29, 2018, updates the Brochure filed on March 24, 2017. Item 2 requires Chicago Capital to provide a summary of material changes made to this Brochure as part of its annual amendment and interim amendments. In the Firm's view, material changes included in this annual amendment include updates to the following items:

- Item 4: Assets under management and Client Identification
- Item 5: Management Fee and Operating Expenses of the Fund
- Item 8: Strategy and Risk Management
- Item 15: Custody Rule

Chicago Capital's Brochure may be requested by contacting the firm's Chief Compliance Officer at (312) 374-9004.

Additional information about Chicago Capital is also available via the SEC's web site at www.adviserinfo.sec.gov.

Item 4 – Advisory Business

Founded in 1997 as an Illinois limited liability company, Chicago Capital currently provides investment advisory services to seven clients, six of which are pooled investment vehicles and one of which is an investment company; each a “Client” and collectively “Clients.”

Chicago Capital is the founder and investment manager of the following pooled investment vehicles which are private funds:

1. Chicago Capital Management, LP (“CCM LP”)
2. Chicago Capital Master Fund, Ltd. (“Master Feeder”)
3. Chicago Capital Onshore Fund, LLC (“Onshore Feeder”)
4. Chicago Capital Offshore Fund, Ltd. (“Offshore Feeder”)

The funds constitute an onshore/offshore master-feeder structure whereby the Onshore Feeder and Offshore Feeder invest all their assets in the Master Feeder which invests all its assets in CCM LP. Chicago Capital is the general partner of CCM LP and managing member of the Onshore Feeder. Two independent directors manage the Offshore Feeder and Master Feeder. For purposes of this Brochure, all four funds are collectively referred to as the “Fund.” Limited partners of CCM LP, members of the Onshore Feeder, and shareholders of the Offshore Feeder are collectively referred to as “Fund Investors.”

Chicago Capital serves as a sub-adviser to the following advisers and their respective pooled investment vehicles:

5. Prelude Capital Management, LLC / Prelude Opportunity Fund, LP (“Prelude”)
6. HFR Asset Management, LLC / HFR MA Chicago Capital Master Trust (“HFR”)

Chicago Capital serves as a sub-adviser to the following adviser and its respective investment company which is registered under the Investment Company Act of 1940 (“1940 Act”):

7. SilverPepper, LLC / SilverPepper Merger Arbitrage Fund (“SilverPepper”)

The three sub-advised clients are collectively referred to as “Sub-Advised Funds” unless specifically noted otherwise. Prospective investors of the Fund, prospective clients of Chicago Capital, and prospective investors of Sub-Advised Funds are referred to as “Prospects” unless specifically noted otherwise.

Chicago Capital does not tailor advice to individual Fund Investors. Therefore, Fund Investors may not impose investment restrictions on the Fund’s investments. Clients that delegate trading authority to Chicago Capital, such as the Sub-Advised Funds, may impose restrictions on their investments. Such restrictions are documented in the sub-advisory agreements mutually agreed upon by Chicago Capital and the Sub-Advised Funds. Chicago Capital does not participate in wrap fee programs.

As of December 31, 2017, Chicago Capital’s total net assets under management were \$164.7 million plus a \$45 million notional allocation, all of which were discretionary.

Item 5 – Fees and Compensation

Chicago Capital is compensated for its services by Clients in the form of asset-based fees (“Management Fee”) and performance-based fees/allocations (“Performance Fee”). Details of the relevant fee structures for Fund Investors, which may differ based on investment class and the initial investment amount, are outlined in the private offering documents of each respective fund. Fees paid by Sub-Advised Funds are negotiated on a Client by Client basis and may include Management Fees and/or Performance Fees. The specific manner in which fees are calculated and paid is established in a Client’s sub-advisory agreement with Chicago Capital. In regards to SilverPepper, Chicago Capital only receives a Management Fee for its services; it does not receive a Performance Fee. This fee arrangement is described in SilverPepper’s prospectus and Statement of Additional Information (“SAI”). All fees are subject to negotiation.

Chicago Capital receives a quarterly Performance Fee from the Fund based on net trading profits, if any, which are subject to the high-water marks of Fund Investors. To the extent applicable with respect to a Fund Investor, Chicago Capital receives a quarterly fixed Management Fee equal to 0.25% (1% per annum) of the total net asset value of the investment held by such Fund Investor (calculated after adjustment for reduced fees charged to different classes, if any, and before deducting any accrued but unpaid Performance Fees, any dividends paid during the quarter, and any withdrawals paid or payable during the quarter or at quarter-end). The Management Fee is payable quarterly in arrears, generally within five (5) days after the end of each calendar quarter based on the net asset value of the investment (as adjusted as described above) as of the last business day of the immediately preceding quarter. If a Fund Investor contributes to or withdraws from its investment other than at a calendar quarter-end, the Management Fee for such partial quarter will be prorated.

Chicago Capital may, in its sole discretion, reduce, waive or rebate the Management Fee with respect to any Fund Investor, including, without limitation, affiliates of Chicago Capital, in such case without entitling any other Fund Investor to the same or similar or identical reduction, waiver or rebate.

The Fund will pay all of its ordinary and extraordinary expenses, which may include, without limitation, legal, bookkeeping, accounting, auditing, recordkeeping, administration, computer and clerical expenses (including expenses incurred in preparing reports and tax information to the Fund Investors and regulatory authorities and expenses for specialized administrative services); printing and duplication expenses; investment related travel expenses, investment research expenses, market data, newswire and data processing expenses; brokerage commissions, bank charges, custody fees and borrowing costs; the expenses of the offering of interests and filing fees; annual registration fees; directors’ fees; directors’ and officers’ liability insurance; investment and operating expenses; and such other reasonable expenses necessary to perform the operation of the Fund as determined by the Fund in its sole discretion. The Fund will also pay any extraordinary expenses incurred (including taxes, indemnification costs, litigation costs, trade errors or damages). All expenses noted above incurred by Chicago Capital in connection with the exercise of its duties to the Fund are paid or reimbursed by the Fund.

Item 6 – Performance-Based Fees and Side-By-Side Management

As disclosed in Item 5, Chicago Capital accepts a Performance Fee from certain Clients. Such Performance Fees are calculated based on a percentage share of the net profits on, or capital appreciation of, the assets of the applicable Clients.

Performance Fees may create an incentive for Chicago Capital to make investments that are riskier or more speculative for Clients who pay a Performance Fee than Clients who only pay a Management Fee. Since Performance Fees are calculated on a basis that includes unrealized appreciation as well as realized appreciation, they may be greater than if they were based solely on realized gains.

Conflicts could exist between the allocation of investment opportunities to Clients. Conflicts may exist due to the availability of funds or buying power, capital activity, or restrictions defined in sub-advisory agreements. Chicago Capital has designed its procedures to provide fair and equitable allocation between its Clients. Since it endeavors at all times to put the interests of its Clients first as part of its fiduciary duty as an RIA, it takes the following steps to address any potential conflicts:

1. disclose to Clients and Prospects the existence of material conflicts of interest, including the potential for Chicago Capital and its employees to earn more compensation from some Clients than others;
2. collect, maintain and document accurate, complete and relevant Client background information to ensure Chicago Capital's services are appropriate for the Client's financial goals, objectives, and risk tolerance and that the Client is qualified to invest;
3. implement written policies and procedures for fair and consistent allocation of investment opportunities among Clients, subject to each Client's underlying strategy, cash availability, availability of interests in the underlying accounts and other appropriate considerations;
4. periodically compare holdings and performance of all Clients with similar strategies to identify significant performance disparities indicative of possible favorable treatment; and
5. educate employees regarding the responsibilities of a fiduciary, including the equitable treatment of all Clients, regardless of the fee arrangement.

Performance Fees will only be charged in accordance with the provisions of Rule 205-3 of the Investment Advisers Act of 1940 ("Advisers Act") and/or applicable state regulations.

Item 7 – Types of Clients

Generally, Chicago Capital's Clients include pooled investment vehicles and investment companies. The Fund is a pooled investment vehicle and considered a 'qualified client' under Rule 205-3 of the Advisers Act, as amended. Prelude and HFR are pooled investment vehicles and qualified clients. They are managed and privately offered by their respective advisers. SilverPepper is an investment company registered under the 1940 Act. Prospects of SilverPepper should refer to its prospectus and SAI.

The Fund is comprised of private funds that are not regulated under the 1940 Act, as amended because of Sections 3(c)(1) and 3(c)(7). The Fund imposes minimum investor qualification standards and minimum investment requirements. Except as may be permitted by Chicago Capital, the minimum required initial investment in the Fund is \$250,000 by qualified clients as defined by the securities law. Prospects should refer to the Fund's private offering documents and subscription documents for additional qualifications and requirements.

Item 8 – Methods of Analysis, Investment Strategies and Risk of Loss

Chicago Capital pursues its investment objective of achieving superior risk adjusted returns by employing a merger arbitrage strategy, although it may pursue other risk arbitrage and event driven strategies where it identifies opportunities. Chicago Capital's investment methodology integrates an intensely disciplined, process-driven research program, with efficient trading execution and risk management, to optimize security selection and investment timing. "Bottom-up" capital allocation allows Chicago Capital to concentrate its investments where it finds opportunity, and to dynamically reallocate capital as the opportunity set changes over time.

Chicago Capital's merger arbitrage investing strategy generally is long-short with a long bias and invests around various catalysts, primarily publicly announced merger situations, during specified time periods. Investments are made using the equity securities of issuers but may include any security within an issuer's capital structure, both underlying and derivative, to craft risk/reward distributions that provide the highest risk-adjusted returns over an anticipated range of security prices. In general, Chicago Capital will seek to profit from spread positions between two or more Financial Instrument positions. Other types of risk arbitrage include convertible arbitrage. Other types of event driven trades include litigation arbitrage, contests for corporate control, and restructurings, including spin-offs, stub trades, exchange offers, bankruptcies and recapitalizations. In each investing case, Chicago Capital defines a catalyst and a time frame, evaluates the risk/reward opportunities within the issuer's capital structure, and then establishes a position that attempts to hedge away all risks other than those associated with the intended catalyst. Trades generally are unwound once the catalyst has occurred or the time frame has lapsed.

Chicago Capital's risk management systems permit real-time examination of risk at the position, strategy, and portfolio level. Client specified risk guidelines and various stress scenarios are monitored by Chicago Capital. Liquidity and leverage risks are regularly evaluated. Hedging techniques are typically employed via short equity positions but may include other financial instruments such as equity swaps, interest rate instruments, corporate debt issuance and foreign exchange securities as needed.

Equity derivatives may be used to manage the overall volatility position of Clients' portfolios and to make investments where directional analysis coupled with event timing is critical. Chicago Capital maintains objective diversification in accordance with Clients' investment guidelines. Investments can be volatile on a mark-to-market basis as they are typically tied to very public catalysts that, prior to and during the event, often result in strong market reactions. For this reason, risk management is a critical step in the research process, and Chicago Capital spends considerable time calculating break prices, which help it in balancing portfolio volatility against the achievement of the highest risk adjusted returns.

Special risks are associated with the use of the above arbitrage techniques. The success of the arbitrage strategies depends on Chicago Capital's ability to identify overvalued and undervalued investment opportunities and to exploit price discrepancies in the capital markets. Identification and exploitation of

the arbitrage strategies to be pursued by Chicago Capital involves uncertainty. There can be no guarantee of a correlation between the price movements of different investments. A lack of correlation could result in a loss on both sides of such a transaction. In addition, a decision as to whether, when and how to use arbitrage strategies involves the exercise of skill and judgment that are different from those needed to select portfolio securities, and even a well-conceived transaction may be unsuccessful to some degree because of market behavior, currency fluctuations or interest rate trends. If Chicago Capital is incorrect in the strategies' forecasts regarding correlation, market values, interest rate trends or other relevant factors, the outcome of the strategies may result in the loss of capital. In addition, arbitrage strategies may result in greater portfolio turnover and, consequently, greater transactions costs and taxes.

Chicago Capital's investment advice depends on the judgment and analysis of its investment professionals. Should any of these professionals terminate their relationships with Chicago Capital, die, or become otherwise incapacitated for any period of time, Chicago Capital's Clients could experience losses.

The success of Chicago Capital's investment strategies may be affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws, developments in governmental regulation, and national and international political circumstances. These factors may affect the success of the businesses in which Chicago Capital's Client portfolio companies are engaged, as well as the markets for securities in those Client portfolio companies. Unexpected volatility or illiquidity could result in Client losses.

Chicago Capital's securities analysis method relies on the assumption that the companies whose securities Chicago Capital purchases and sells, the rating agencies that review these securities, and other publicly-available sources of information about these securities, are providing accurate and unbiased data. While Chicago Capital is alerted to indications that data may be incorrect, there is always a risk that Chicago Capital's analysis is incorrect.

Additional information concerning a Client's investment strategy and risk management is available in its respective private offering documents. There is no assurance the investment objectives will be achieved, and results may vary substantially over time. Investing in securities involves risk of loss that Clients should be prepared to bear.

Item 9 – Disciplinary Information

RIA's are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of Chicago Capital or the integrity of Chicago Capital's management. Chicago Capital has no information applicable to this Item.

Item 10 – Other Financial Industry Activities and Affiliations

Hydra Partners, LP ("Hydra") is an Illinois limited partnership founded in 2000. Its principal objective is to achieve growth of capital with consistent returns by trading and investing directly in private funds and other financial instruments. Hydra is managed by its general partner, Hydra Management, LLC ("Hydra LLC"), an Illinois limited liability company. The sole managing member of Hydra LLC is Steven Gerbel who is also the managing member of Chicago Capital. Hydra LLC receives a Management Fee from Hydra for its services.

Hydra is a Fund Investor and also invests in a Sub-Advised Fund whereby Chicago Capital sub-advises an account within a multi-strategy, multi-manager private fund. Per the terms of the arrangement, Hydra is a “special limited partner”. Performance Fees earned by Chicago Capital are remitted directly to Hydra.

Item 11 – Code of Ethics

Chicago Capital has adopted a Code of Ethics (“Code”) for all of its supervised persons describing its high standard of business conduct and fiduciary duty to its Clients. The Code includes provisions relating to the confidentiality of Client information, a prohibition on insider trading, a prohibition of rumor mongering, restrictions on the acceptance of significant gifts and the reporting of certain gifts and business entertainment items, and personal securities trading procedures, among other things. All supervised persons at Chicago Capital must acknowledge the terms of the Code annually or as amended.

Chicago Capital may, in appropriate circumstances, cause accounts it has management authority over to effect, and will recommend to investment advisory Clients or Prospects, the purchase or sale of securities in which Chicago Capital, its affiliates and/or Clients, directly or indirectly, have a position of interest. Chicago Capital’s employees and persons associated with Chicago Capital are required to follow the Code. Subject to satisfying this policy and applicable laws, employees of Chicago Capital and its affiliates may trade for their own accounts in securities which are recommended to and/or purchased for Chicago Capital’s Clients.

The Code is designed to assure that the personal securities transactions, activities and interests of the employees of Chicago Capital will not interfere with (i) making decisions in the best interests of Clients and (ii) implementing such decisions while, at the same time, allowing employees to invest for their own accounts. Under the Code, certain classes of securities have been designated as exempt transactions, based upon a determination that these would not materially interfere with the best interests of Chicago Capital’s Clients. In addition, the Code requires pre-clearance of many transactions and restricts trading in close proximity to Client trading activity. Nonetheless, because the Code in some circumstances would permit employees to invest in the same securities as Clients, there is a possibility that employees might benefit from market activity by a Client in a security held by an employee. Employee trading is continually monitored under the Code, and to reasonably prevent conflicts of interest between Chicago Capital and its Clients.

It is Chicago Capital’s policy that it will not affect any principal or agency cross securities transactions for Client accounts. Chicago Capital will also not cross trades between Client accounts. Principal transactions are generally defined as transactions where an adviser, acting as principal for its own account or the account of an affiliated broker-dealer, buys from or sells any security to any advisory Client. A principal transaction may also be deemed to have occurred if a security is crossed between an affiliated hedge fund and another Client account. An agency cross transaction is defined as a transaction where a person acts as an investment adviser in relation to a transaction in which the investment adviser, or any person controlled by or under common control with the investment adviser, acts as broker for both the

advisory Client and for another person on the other side of the transaction. Agency cross transactions may arise where an adviser is dually registered as a broker-dealer or has an affiliated broker-dealer.

Chicago Capital's Clients and Prospects may request a copy of the firm's Code of Ethics by contacting the Chief Compliance Officer.

Item 12 – Brokerage Practices

Chicago Capital may utilize multiple financial institutions, prime brokers, executing brokers, dealers, custodians and counterparties (collectively, the "Brokers"), subject to any restrictions imposed by its agreement with a Client. Clients have entered into margin arrangements with Brokers. Under these arrangements, the Clients may obtain more leverage to finance their trading activities than would otherwise be available under U.S. law. There can be no assurance that such Brokers will continue to permit Clients to utilize these arrangements in the future, and the lack of such arrangements may have a negative impact on Chicago Capital's ability to implement its trading strategies.

Clients may borrow money from Brokers to finance transactions and, accordingly, Clients may pledge assets held at such Brokers as collateral to secure such borrowings. The Brokers generally will hold such assets that are not fully paid for or that do not constitute excess margin on a commingled basis. However, Brokers are required to segregate all assets of a Client not pledged to secure borrowings. Financial instruments that are not excess margin held for a Client in a margin account may, with the Client's consent, be loaned or pledged to or by a securities firm within the limits of applicable law and regulation. Brokers have no discretion in relation to the investment of a Client's assets and will not participate in the management of the Client or otherwise be involved in the decision-making process.

A Client's securities transactions can be expected to generate brokerage commissions and other costs, all of which the Client, not Chicago Capital, will be obligated to pay. Chicago Capital has discretion, subject to any restrictions imposed by its agreement with a Client, to select different Brokers to be used for each financial instrument transaction for the Client and to negotiate the rates and commissions the Client will pay. In selecting Brokers to execute transactions, Chicago Capital need not solicit competitive bids and does not have an obligation to seek the lowest available commission cost. As part of the overall brokerage services that they may offer to Clients, certain Brokers may refer potential investors to the Client. Although the commission rates charged by such Brokers are represented as not reflecting such additional service, the commission rates charged by such Brokers may be higher or lower than the commission rates charged by other Brokers, and the Client, may be deemed to be paying for other products and services, such as the introduction of potential investors, provided by the Broker which are included in the commission rate.

Brokers will be selected generally on the basis of best execution which may be determined by considering, either provided by the Broker or paid for by the Broker to be provided by others, research and research-related products and services, and other products and services such as special execution capabilities, clearance, settlement, commission rates (and other transaction charges), net price, online pricing, block trading and block positioning capabilities, willingness to execute related or unrelated difficult transactions in the future, order of call, on-line access to computerized data regarding Clients' accounts, performance measurement data, consultations, technical data, recommendations, general

reports, financial strength and stability, efficiency of execution and error resolution, quotation services, the availability of stock to borrow for short trades, custody, recordkeeping and similar services.

Products or services may be in any form (*e.g.*, written, oral or on-line) and may include research products or services; clearance; settlement; on-line pricing and financial information; access to computerized data regarding Clients' accounts; performance measurement data and services; consultations; economic and market information; portfolio strategy advice; market, economic and financial data; statistical information; data on pricing and availability of securities; publications (including periodicals, magazines and newspapers); electronic market quotations; charges on borrowed funds; travel; conferences; memberships in professional associations; analyses concerning specific financial instruments, companies, governments or sectors; market, economic, political and financial studies and forecasts; industry and fund comments; technical data, recommendations and general reports; and expenses of any kind.

Chicago Capital does not currently participate in any soft dollar arrangements. However, if it were to engage in soft dollars it will not adhere to any rigid formula in making the selection of Brokers but will weigh a combination of criteria.

Chicago Capital may, but is not required to, aggregate sale and purchase orders of financial instruments with similar orders being made simultaneously for Clients, if, in its reasonable judgment, such aggregation is reasonably likely to result in an overall economic benefit to Clients based on an evaluation that they will benefit from relatively better purchase or sale prices, lower commission expenses or beneficial timing of transactions, or a combination of these and other factors. In many instances, the purchase or sale of financial instruments will be affected simultaneously for Clients. Such transactions may be made at slightly different prices, due to the volume of financial instruments purchased or sold. In such event, the average price of all financial instruments purchased or sold in such transactions may be determined by Chicago Capital in its sole discretion.

Item 13 – Review of Accounts

Chicago Capital's managers periodically monitor the underlying securities in Clients' accounts and review these positions on an ongoing basis. These positions are reviewed in the overall context of their investment objectives and guidelines as well as geopolitical and macroeconomic events. A more formal review may be triggered by changing market conditions, margining requirements and custodian holdings. Chicago Capital continually reviews and monitors Clients' holdings in accordance with the investment objectives as detailed in their respective agreements.

The Fund is audited annually by an independent certified public accountant that is both registered with and subject to regular inspection by the Public Companies Accounting Oversight Board ("PCAOB") and a copy of the audited financials are offered to each Fund Investor. Fund Investors are provided with applicable tax related information on an annual basis.

In addition to annual audited financials, Fund Investors receive monthly reports of the performance of the Fund, net of all fees. Monthly reports of the Fund are prepared and verified by the Fund's independent administrator. Chicago Capital provides monthly summary letters to Fund Investors that may address any key personnel changes, regulatory changes or events, material changes in investment strategy or risk management processes, changes of service providers, material changes to systems or processes and market and portfolio activity.

Chicago Capital's review, reporting, and other obligations for the Sub-Advised Funds are specified in each Client's mutually executed sub-advisory agreement with Chicago Capital.

Item 14 – Client Referrals and Other Compensation

Chicago Capital works with select third-party marketers who offer potential introductions of certain Prospects. As part of the overall marketing services that they offer to Chicago Capital, certain marketers may refer Prospects to Chicago Capital. For a current list of these marketers, please refer to ADV Part 1, Schedule D Item 7B(1).

Chicago Capital reserves the right to enter into additional, similar arrangements in the future. Although common, such referral arrangements do create a potential conflict of interest because, in theory, the referrer may be motivated, at least partially, by financial gain and not because Chicago Capital's services are the most suitable to the Prospect's needs. To address this potential conflict of interest, all Prospects are carefully screened to ensure that Chicago Capital's services are suitable to their investment needs, objectives and risk tolerance before any relationship is initiated.

Clients and Prospects should refer to the applicable private offering documents and subscription documents for additional information on potential conflicts of interest.

Item 15 – Custody

Chicago Capital does not accept physical custody of Clients' securities, funds, or assets. It manages the assets held in the Fund and Sub-Advised Funds and thus complies with the Custody Rule with respect to a pooled investment vehicle, the Fund. Notwithstanding the foregoing, Chicago Capital acknowledges that it may be deemed to have custody under applicable laws and rules. As such, it delivers the audited financial statements of the Fund to Fund Investors within 120 days of the end of the fiscal year.

Item 16 – Investment Discretion

Chicago Capital's agreement with the Fund generally grants it complete discretionary authority in the private offering documents to manage the Fund's investment portfolios without any specific limitations in writing. Chicago Capital's sub-advisory agreements with the Sub-Advised Funds grant Chicago Capital discretion to pursue its investment strategies subject to certain restrictions and criteria.

Item 17 – Voting Client Securities

Chicago Capital will vote proxies in the best interest of its Clients, typically with the goal of maximizing value for those Clients' portfolios. To that end, it endeavors to vote proxies in the manner that it determines in good faith will be the most likely to cause its Clients' investments to increase the most or decline the least in value.

Consideration is given to both the short and long-term implications of the proposal to be voted on when considering the optimal vote. Clients do not direct any voting. Clients may request a copy of Chicago Capital's proxy voting policy, as well as relevant proxy voting records, by making a written request to Chicago Capital at the address given on the cover page of this Brochure.

Chicago Capital votes each proxy on an issue by issue basis. For additional details regarding the proxy voting policy of a Client, please refer to its respective offering documents.

In regards to class actions, bankruptcies, and other legal proceedings, Chicago Capital, in general, will participate and act on behalf of the Fund, and applicable Clients, in class action proceedings involving companies whose securities are held by Clients. If, in its sole discretion, Chicago Capital determines that the benefits outweigh the costs, Chicago Capital will participate and distribute any benefit received upon settlement or otherwise to the Fund and applicable Client.

Item 18 – Financial Information

RIA's are required to provide certain financial information or disclosures regarding their financial condition in this Item. Chicago Capital has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to Clients and has not been the subject of a bankruptcy proceeding.
