

Part 2A Appendix 1 of Form ADV

Item 1. Cover Page

Oppenheimer & Co. Inc.
85 Broad Street
New York, NY 10004
www.opco.com

May 9, 2018

This wrap fee program brochure (the “Brochure”) provides information about the qualifications and business practices of Oppenheimer & Co. Inc., a registered investment adviser. If you have any questions about the contents of this Brochure, please contact James Capezzuto at james.capezzuto@opco.com.

The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (the “SEC”) or by any state securities authority.

Additional information about Oppenheimer & Co. Inc. also is available on the SEC’s website at: www.adviserinfo.sec.gov.

Registration as an investment adviser does not imply a certain level of skill or training.

Item 2. Material Changes

This appendix is an update for Oppenheimer & Co. Inc. (“Oppenheimer”) and does not include any material changes. This appendix was amended to expand upon disclosures made in the annual update.

Oppenheimer filed its most recent annual update to its Form ADV Part 2A on March 22, 2018.

You may request the most recent version of this Brochure by contacting James Capezzuto at james.capezzuto@opco.com.

Item 4. Services, Fees and Compensation

Oppenheimer & Co. Inc. (“Oppenheimer”) is the sponsor of the following wrap fee and other advisory programs:

OMEGA Services Program (“OMEGA”)
 OMEGA Retirement (“OMEGA Retirement”)
 Fahnstock Asset Management (“FAM”)
 Fahnstock Asset Management Retirement (“FAM Retirement”)
 Fahnstock Asset Management Fee Only Non Retirement (“FAM Fee Only”)
 Alpha Advisory Program (“Alpha”)
 Alpha Fee Only Retirement (“Alpha Retirement”)
 Alpha Fee Only Non Retirement (“Alpha Fee Only”)
 Preference Advisory Program (“Preference”)
 Preference Retirement Advisory Program (“Preference Retirement”)
 Advantage Advisory Program (“Advantage Advisory”)
 Advantage Advisory Retirement Program (“Advantage Advisory Retirement”)
 Portfolio Advisory Service Financial Advisor Discretion Program (“PAS Directed”)
 Portfolio Advisory Service Financial Advisor Discretion Retirement Program (“PAS Directed Retirement”)
 UMA Financial Advisor Discretion Program (“UMA FA Directed”)
 UMA Financial Advisor Discretion Retirement Program (“UMA FA Directed Retirement”)
 Investment Consulting and Execution Services
 Retirement Services
 Financial Planning

This Brochure provides information about the following programs: OMEGA, OMEGA Retirement, FAM Fee Only, FAM Retirement, Alpha Fee Only, Alpha Retirement, Preference, Preference Retirement, Advantage Advisory, Advantage Advisory Retirement, PAS Directed, PAS Directed Retirement, UMA FA Directed, and UMA FA Directed Retirement. Information about the following advisory programs: FAM, Alpha, Investment Consulting and Execution Services, Retirement Services, and Financial Planning is provided in the Oppenheimer & Co. Inc. Part 2A firm brochure; however certain programs are administered by an advisory affiliate under common control.

Clients in any of the programs described below that pay management fees in advance and terminate their agreement will receive a pro rata refund of fees. Clients may contact their Branch Office Manager to initiate the refund process.

Oppenheimer periodically reviews the fees charged its advisory clients, and makes adjustments to ensure fees are in accordance with the fee schedules described in this Brochure. The adjusted fees may be rounded up or down to the nearest basis point.

Advisory fees may be calculated based upon a different data feed than that used to generate account statements. The data feed will differ in its treatment of factors such as accrued interest and trades pending settlement. Oppenheimer retains a fee earned on cash deposits in the Advantage Bank Deposit Program. Oppenheimer retains fees earned on cash deposits for retirement accounts in the Advantage Bank Deposit Program.

When choosing an advisory program, clients should ask about other programs offered by Oppenheimer. Although there are differences in compensation structure among programs, there also are differences in the strategies and services provided. The OMEGA program has specific investment guidelines. Financial Advisors may recommend the Alpha program to investors who want their account to be more concentrated or to engage in short selling strategies, which are not permitted in OMEGA accounts. OMEGA, FAM and Alpha are programs in which the Financial Advisors of Oppenheimer provide discretionary management

services. Oppenheimer Asset Management Inc. (“OAM”), an affiliate of Oppenheimer, offers programs that provide management services from a variety of portfolio managers and managers of mutual funds. Branch Managers review and approve each advisory account for suitability before it is opened and review trading activity in advisory accounts that are managed on a discretionary basis by Financial Advisors.

Fee rates in various programs may be expressed as a fixed rate applying to all assets in the account, or as a schedule of rates applying to different asset levels, or “breakpoints.” If fees are expressed as a fixed rate and that fixed rate is greater than any tier rate set forth in the Program rate schedules below, you will pay the fixed rate across all assets regardless of tier discounts. When the fee is expressed as a schedule of rates corresponding to different breakpoints, discounts, if any, are negotiated separately for each breakpoint. As the value of the account assets reaches the various breakpoints, the incremental assets above each threshold are charged the applicable rates. The effective fee rate for the account in the program as a whole is then a weighted average of the scheduled rates, and may change with the account asset level.

OMEGA Services Program

Oppenheimer provides discretionary investment management services through the OMEGA program. The OMEGA program provides discretionary management services for equity, balanced and fixed income accounts. Portfolio management services are provided by Financial Advisors of Oppenheimer.

The annual fee schedule for OMEGA equity and balanced accounts is as follows:

- 3.00% of the value of an account up to \$250,000
- 2.75% on the next \$250,000
- 2.25% on the next \$500,000
- 1.75% on the next \$1,000,000
- 1.25% on the next \$3,000,000
- 1.00% on the balance over \$5,000,000

The annual fee schedule for OMEGA fixed income accounts is as follows:

- 1.25% of the value of an account up to \$500,000
- 1.00% on the next \$500,000
- 0.85% of the next \$1,000,000
- 0.75% on the next \$3,000,000
- The fee is negotiated on balances over \$5,000,000.

The annual fee schedule for OMEGA ETF accounts is as follows:

- 1.75% on the value of the account up to \$500,000
- 1.50% on the next \$500,000
- 1.00% on the next \$1,000,000

Fees for OMEGA accounts are billed quarterly in advance. Fees are negotiable depending on the size of the account, overall client relationship with Oppenheimer and the discretion of the client’s Financial Advisor.

The services that are provided for the fee include portfolio management, performance reporting, brokerage commissions for agency transactions executed by Oppenheimer and custody services provided by Oppenheimer.

Generally, fixed income securities transactions will be executed through broker-dealers other than Oppenheimer.

The OMEGA program may cost a client more or less than the cost of purchasing these services separately. The OMEGA wrap fee includes the cost of all brokerage transactions executed through Oppenheimer so an investment strategy with low trading volume could cost less in an account that charged brokerage commissions rather than a wrap fee.

In addition to the wrap fee, clients pay dealer markups or markdowns in principal transactions with broker dealers other than Oppenheimer, or commissions charged by broker dealers other than Oppenheimer, ADR agency processing fees, odd lot differentials, Exchange or SEC fees, transfer taxes and any other charges imposed by law. Assets held in the account in cash will be invested in deposit accounts ("Deposit Accounts") at certain participating banks in the Advantage Bank Deposit Program or, if the client elects not to participate in the Advantage Bank Deposit Program, in money market mutual funds. Shareholders in mutual funds bear their proportionate share of the expenses of the mutual fund. Oppenheimer retains fees earned on deposits in the Advantage Bank Deposit Program, but rebates any 12b-1 fees received by Oppenheimer. Oppenheimer retains fees earned on cash deposits for retirement accounts in the Advantage Bank Deposit Program.

Financial Advisors of Oppenheimer receive a portion of the fee paid by their clients in the OMEGA program. The amount of this compensation may be more than what the Financial Advisor would receive if the client participated in other programs or paid separately for investment advice, brokerage and other services. A Financial Advisor therefore may have a financial incentive to recommend the OMEGA program over other programs or services. Before an account is opened, a client completes a confidential profile.

OMEGA Retirement Plan

Oppenheimer is the sponsor of an OMEGA program for retirement plans that are governed by the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The Program is called OMEGA Retirement Plan. The OMEGA Retirement Plan program offers the same services as the OMEGA program. If any assets in a client's account in OMEGA Retirement Plan are invested in a mutual fund that pays 12b-1 fees to Oppenheimer, such payments will be rebated to the client by Oppenheimer.

The fee schedule is as follows:

Asset Value of Account	OMEGA Fee
On the First \$250,000	3.00%
On the Next \$250,000	2.75%
On the next \$500,000	2.25%
On the next \$1,000,000	1.75%
On the next \$3,000,000	1.25%
On the balance over \$5,000,000	1.00%

The fee payable to Oppenheimer is negotiable.

Preference Advisory and Preference Retirement Advisory Program

Oppenheimer is the sponsor of the Preference Advisory ("Preference") program. Financial Advisors of Oppenheimer provide non-discretionary investment management services to clients in the Preference

program. In addition to advisory services, the Preference program provides custody and execution services through Oppenheimer and performance reporting.

The annual fee for a Preference Advisory account is as follows:

Eligible Assets	Fee
First \$250,000	2.25%
Next \$250,000	1.8%
Next \$500,000	1.5%
Next \$2,000,000	1.3%
Above \$3,000,000	1.0%

For the Preference programs, the fee will be adjusted in the next billing period for each addition to or withdrawal from your Account of \$10,000 or more, net per day.

Fees for Preference accounts are billed quarterly in advance. Fees are negotiable depending on the size of the account, overall client relationship with Oppenheimer and the discretion of the client's Financial Advisor. In certain instances, clients may pay a flat fee without breakpoints, which may be higher than the fee schedule shown above. The Preference program is not meant for high frequency trading and if Oppenheimer deems an account has a high frequency account it may be removed from the program.

The fees charged for Preference accounts may cost a client more than it would cost to purchase these services separately. Clients can purchase ETFs and mutual funds in their brokerage accounts without paying an advisory fee to Oppenheimer but will pay the applicable sales charge. Any 12b-1 fees paid to Oppenheimer attributable to fund shares held in the client's Preference account are retained by the firm. This practice presents a conflict of interest and gives an FA incentive to recommend investments based on the compensation received, rather than on a client's needs.

In addition to the wrap fee, clients may pay dealer markups or markdowns in principal transactions with broker dealers other than Oppenheimer, or commissions charged by broker dealers other than Oppenheimer, ADR agency processing fees, odd lot differentials, Exchange or SEC fees, transfer taxes and any other charges imposed by law. Assets held in the account in cash will be invested in unaffiliated money market mutual funds. Shareholders in mutual funds bear their proportionate share of the expenses of the mutual fund.

Financial Advisors of Oppenheimer receive a portion of the fee paid by their clients in the Preference program and may receive other fees, credits and compensation. The amount of this compensation may be more than what the Financial Advisor would receive if the client participated in other programs or paid separately for investment advice, brokerage and other services. A Financial Advisor therefore may have a financial incentive to recommend the Preference program over other programs or services. Before a Preference account is opened, a client completes a confidential profile.

Preference Retirement

Oppenheimer is the sponsor of a Preference program for retirement accounts. The program is called Preference Retirement. The Preference Retirement program offers the same services with the same fee schedule as the Preference program. If any assets in a client's account are invested in a mutual fund that pays 12b-1 fees to Oppenheimer, such payments will be credited back to the account. The fee payable to Oppenheimer is negotiable.

If any mutual funds held in a client's Preference Retirement or IRA account pay 12b-1 distribution fees to Oppenheimer, those payments will be credited back to the client.

Non-discretionary Advantage Advisory Program and Advantage Advisory Retirement Program

The Oppenheimer Non-discretionary Advantage Advisory Program is a non-discretionary advisory program for unregistered alternative investment funds where Oppenheimer and associated registered representatives earn advisory fees paid by advisory clients in addition to any fees charged by the underlying funds. The advisory fee for the participation in the program is 1.50%.

Fahnestock Asset Management Retirement Plan Program

Oppenheimer is the sponsor of the Fahnestock Asset Management program for retirement plans ("FAM Retirement Plan"). In the FAM Retirement Plan program, Financial Advisors of Oppenheimer provide investment management services for equity, balanced and fixed income accounts for retirement plans.

The fee for accounts in FAM Retirement Plan is 2.50% of the value of assets in the account. Fees are negotiable based on the size of the account, the client's overall relationship with Oppenheimer, the level of client service and the discretion of the Financial Advisor. The program offers the same services as the Fahnestock Asset Management program that is described in Oppenheimer's Form ADV Part 2A brochure but has a different fee structure. If any assets in a client's account in FAM Retirement Plan are invested in a mutual fund that pays 12b-1 fees to Oppenheimer, such payments will be credited back to the client.

Fahnestock Asset Management Fee Only

Fahnestock Asset Management Fee Only ("FAM Fee Only") is an advisory program in which Financial Advisors of Oppenheimer provide discretionary investment management services for equity, balanced and fixed income portfolios.

The FAM Fee Only program charges an annual fee payable quarterly at a rate that ranges from 1.00% to 2.50% of the value of securities in a FAM Fee Only account. If any assets in a client's account in FAM Fee Only pay 12b-1 fees to Oppenheimer, such payments will be credited back to the client.

Fees are negotiable based on the size of the account, the client's overall relationship with Oppenheimer, the level of client service and the discretion of the client's Financial Advisor.

Portfolio Advisory Service Financial Advisor Discretion Program

Oppenheimer is the sponsor of the Portfolio Advisory Service Financial Advisor Discretion Program ("PAS Directed"). The PAS Directed program provides discretionary management services for mutual fund accounts. Portfolio management services are provided by Financial Advisors of Oppenheimer.

In PAS Directed, Oppenheimer develops asset allocation strategies and selects mutual funds and exchange traded funds ("funds") that appear to be compatible with a client's investment objectives and provides quarterly performance reporting. Financial Advisors of Oppenheimer will be available to clients for consultation regarding the administration of an account, client's financial situation and client's investment goals, policies and constraints and risk tolerance.

The annual fee for the PAS Directed program is as follows:

- 1.75% of the value of an account up to \$500,000
- 1.50% on the next \$500,000
- 1.25% on assets over \$1,000,000

Fees are billed quarterly in advance. Fees are negotiable depending on the overall client relationship and the discretion of the client's Financial Advisor. If any assets in a client's account are invested in a mutual fund that pays distribution fees to Oppenheimer, such payments will be retained by Oppenheimer.

In addition to the PAS Directed program fee, clients may be subject to charges imposed by law or by any funds including redemption charges. Shareholders in funds bear their proportionate share of the expenses of that fund. Any 12b-1 fees paid to Oppenheimer attributable to fund shares held in the client's PAS or PAS Directed account are retained by the firm. This practice presents a conflict of interest and gives an FA incentive to recommend investments based on the compensation received, rather than on a client's needs.

Financial Advisors of Oppenheimer receive a portion of the fee paid by their clients in the PAS Directed program. The amount of this compensation may be more than what the Financial Advisor would receive if the client participated in other programs or paid separately for investment advice, brokerage or other services. A Financial Advisor may have a financial incentive to recommend the PAS Directed program over other programs or services.

The PAS Directed program may cost a client more or less than the cost of purchasing these services separately.

PAS Directed - Retirement

Oppenheimer is the sponsor of a PAS Directed program for retirement plans that are governed by ERISA. The program is called PAS Directed-Retirement Plan. PAS Directed Retirement offers the same services as PAS Directed. The fee payable to Oppenheimer is negotiable.

Portfolio Advisory Service Financial Advisor Discretion Retirement Program Fees

Asset Value of Account	PAS Managed and PAS Directed Standard Fee
First \$500,000	1.75%
Next \$500,000	1.50%
Above \$1,000,000	1.25%

The PAS Directed program may cost a client more or less than the cost of purchasing these services separately. Any 12b-1 fees paid to Oppenheimer attributable to fund shares held in a client's PAS Directed account are rebated to the client.

UMA Financial Advisor Discretionary Program

Oppenheimer is the sponsor of the UMA Financial Advisor Directed Program ("UMA FA Directed"). The UMA FA Directed program provides discretionary management services for mutual fund, ETF and third-party manager model separate accounts. Portfolio management services are provided by Financial Advisors of Oppenheimer.

In UMA FA Directed, Financial Advisors of Oppenheimer develop asset allocation strategies and select mutual funds, exchange traded funds ("Funds") and third-party manager models that appear to be compatible with a client's investment objectives and provides quarterly performance reporting. Financial Advisors of Oppenheimer will be available to clients for consultation regarding the administration of an account, client's financial situation and client's investment goals, policies and constraints and risk tolerance.

The annual fee for the UMA FA Directed program is 3.00% on all assets and is negotiable.

Fees are billed quarterly in advance. Fees are negotiable depending on the overall client relationship and the discretion of the client's Financial Advisor. If any assets in a client's account are invested in a mutual fund that pays 12b-1 fees to Oppenheimer, such payments will be retained by Oppenheimer. This practice presents a conflict of interest and gives an FA incentive to recommend investment based on the compensation received, rather than on a client's needs.

OAM acts as overlay portfolio manager for UMA FA Directed accounts and exercises investment discretion with respect to model portfolio strategy changes. Clients pay OAM a separate fee for the overlay portfolio manager. Clients also pay UMA discretionary investment managers, which includes affiliated and un-affiliated advisors, or sub-managers a separate fee established by each manager.

In addition to the UMA FA Directed program fees described above, clients may be subject to the following: exchange charges imposed by regulation, ADR fees and expenses, commissions to the extent a third-party manager trades away from Oppenheimer and for mark-ups and mark-downs associated with fixed income and other principally traded securities; or charges by any Funds including redemption charges. Shareholders in funds bear their proportionate share of the expenses of that Fund.

Financial Advisors of Oppenheimer receive a portion of the fee paid by their clients in the UMA FA Directed program. The amount of this compensation may be more than what the Financial Advisor would receive if the client participated in other programs or paid separately for investment advice, brokerage or other services. A Financial Advisor may have a financial incentive to recommend the UMA FA Directed program over other programs or services.

UMA Financial Advisor Discretionary Retirement Program

Oppenheimer is also the sponsor of a UMA FA Directed program for retirement plans that are governed by ERISA. The program is called UMA FA Directed-Retirement Program. The UMA FA Directed-Retirement program offers the same services as the UMA FA Directed program described immediately above. To the extent that assets held in the account are invested in funds that pay 12b-1 fees to Oppenheimer, such payments are rebated to the client account. The fee payable to Oppenheimer is 3.00% on all assets and is negotiable and subject to the additional fees and expenses described in the UMA FA Directed program above.

The UMA FA Directed program may cost a client more or less than the cost of purchasing these services separately.

Alpha Fee Only (Retirement and non-Retirement fee only accounts)

Alpha is an advisory program in which Financial Advisors of Oppenheimer provide discretionary investment management services for equity, balanced and fixed income portfolios.

The fee for accounts in Alpha Retirement is a percentage of the value of assets in the account less the Credit Amount. Fees are negotiable based on the size of the account, the client's overall relationship with Oppenheimer, the level of client service and the discretion of the Financial Advisor. The program offers the same services as the Alpha program that is described in Oppenheimer's Form ADV Part 2A brochure but has a different fee structure. If any assets in a client's account in Alpha Retirement and Alpha Fee Only Non Retirement are invested in a mutual fund that pays 12b-1 fees to Oppenheimer, such payments will be rebated to the client. The maximum annual fee is 2.00%.

Cash Sweep Funds in OMEGA, Preference, FAM Retirement, FAM Fee Only, PAS Directed and Alpha Retirement programs.

Cash balances in the OMEGA, Preference, FAM Retirement, FAM Fee Only, PAS Directed and Alpha Retirement programs sponsored by Oppenheimer are invested automatically in certain participating banks in the Advantage Bank Deposit Program. Oppenheimer will receive a fee from each deposit bank. The amount of the fee paid to Oppenheimer will affect the interest rate paid on Deposit Accounts.

The fee payable to Oppenheimer may be as high as 5% of the household balances invested in the Advantage Bank Deposit Program. Oppenheimer retains fees earned on cash deposits for retirement accounts in the Advantage Bank Deposit Program.

Selection of Advisory Program by Retirement Plans

Oppenheimer Financial Advisors provide retirement plan clients with information about various advisory programs offered by Oppenheimer or its affiliate OAM. No representative of Oppenheimer or OAM has provided individualized advice or recommendations based on the particular needs of the retirement needs of the retirement plan regarding the selection of an advisory program. Such selection will be made by the retirement plan's Responsible Plan Fiduciary.

Item 5. Account Requirements and Types of Clients

The minimum for an OMEGA securities account is \$50,000 and \$10,000 for an account holding only mutual funds and ETFs.

The minimum for a Preference securities account is \$25,000 and \$10,000 for an account holding only mutual funds and ETFs. The minimum for a Preference bond account is \$100,000.

There is no minimum account size for FAM Retirement and FAM Fee Only programs.

There is no minimum account requirement for an Investment Consulting and Execution Services account.

The minimum for PAS Directed and PAS Directed Retirement is \$10,000.

The minimum for UMA FA Directed and UMA FA Directed Retirement is between \$10,000 and \$100,000 depending upon the security types and managers selected.

There is no minimum account size for Alpha Retirement program.

Oppenheimer may waive these minimums in its discretion.

Clients in the programs described herein include individuals, corporations, pooled investment vehicles, charitable organizations, trusts, pension and profit sharing plans and business entities.

Item 6. Portfolio Manager Selection and Evaluation

Financial Advisors of Oppenheimer must submit an application to become an OMEGA or a Preference portfolio manager. The application must be approved by the Financial Advisor's Branch Manager and by the OMEGA or Preference product manager. Approval is based on a review of the Financial Advisor's investment experience. All OMEGA portfolio managers receive training in portfolio management techniques before they open OMEGA accounts.

Financial Advisors of Oppenheimer must submit an application and meet certain minimum requirements to become a PAS Directed portfolio manager. The Consulting Group of OAM will approve the application after reviewing it and verifying the Financial Advisor's qualification.

Clients select the Oppenheimer Financial Advisor to manage their OMEGA or PAS Directed account or provide advisory services for their Preference account.

Before enrolling in one of these programs, clients must complete a client profile which includes personal and financial information about the client such as date of birth, expected retirement date, dependents and annual income. The profile also includes a section on the client's investment goals and risk tolerance. This section is designed to assess the client's investment goals, tolerance for volatility and risk. Clients also complete a new account form prior to establishing a brokerage account with Oppenheimer. Financial Advisors must submit an application to participate in the Preference Advisory program. The application must be approved by the Financial Advisor's Branch Manager and by the Product Management group. Branch Managers review Preference accounts for low trading activity or excessive trading activity and concentrated security positions.

Performance of OMEGA and PAS Directed accounts is provided to clients in a Quarterly Portfolio Review ("QPR"). Performance is measured on a total return, net basis and presented inclusive of reinvested dividends (after the deduction of management and other fees). The QPR is presented on a trade date basis, reflecting holdings as of the day transactions are executed.

Review of Client Accounts

The Product Management group and the Financial Advisor's Branch Manager review accounts in the Preference Advisory program for low activity. Financial Advisors are required to review accounts with clients on no less than a semi-annual basis and document the review. Product Management group may review a specific account, all Preference accounts in the branch or accounts of an individual Financial Advisor. In addition, Product Management may review trading or specific transactions within an account. The Product Management group monitors trading in OMEGA accounts on a daily basis to determine that securities purchased are eligible for the account. The Product Management group also monitors OMEGA accounts in an effort to ensure that they are not charged commissions and transactions are not executed on a principal basis with Oppenheimer. On a periodic basis, the Product Management group reviews accounts against diversification guidelines for the OMEGA Program.

In the PAS Directed program, the Financial Advisor monitors accounts and makes adjustments to allocations and/or investments as, or if, necessary based on the client's objectives. The Financial Advisor uses funds with which Oppenheimer currently has an active selling agreement and have been determined to be "program eligible". Fund eligibility is monitored on a periodic basis. PAS Directed portfolios are required to be broadly diversified, and allocation guidelines and trade restrictions are monitored by the Client Services Group of OAM. Frequent trading is not permitted in PAS Directed accounts, and is monitored by OAM. Portfolio suitability is also measured by an application program that is run before an account is opened or an allocation to PAS is made.

The Client Services Group of OAM performs the following periodic reviews:

OMEGA, PAS Directed and UMA FA Directed Accounts:

Average Price Control Accounts Reconciliation

A daily review is performed to reconcile block trades versus customer allocations in the trading control accounts. The purpose of the review is to identify and correct any differences to ensure client allocations are complete and accurate.

OMS Capacity Discrepancy Report

OMS Capacity Discrepancy alert is a daily alert that monitors the capacity of all order management system trades. The purpose of the report is to identify any trades not executed in an agency capacity so that they can be corrected.

Reorganization/Tender Notices

Clients receive quarterly written performance reports regarding their account. Quarterly performance reports include performance of the account for the most recent quarter end, year to date, and for past one, three and five year periods, if applicable, compared to three benchmark indexes. Clients also receive a monthly custodian statement from Oppenheimer for accounts that are custodied at Oppenheimer. The custodian statement shows each security held in the account and each transaction executed during the month as well as contributions to the account and withdrawals from the account during the month.

Preference Accounts:

With respect to Preference accounts, the Average Price Control Accounts Reconciliation described above is performed for fixed income trades. The OMS Capacity Discrepancy Report is also reviewed for Preference accounts.

Only Financial Advisors of Oppenheimer are eligible to act as portfolio managers to clients in the OMEGA and PAS Directed programs or to provide advice to clients in the Preference program. See Item 6 for information on how Oppenheimer approves and monitors OMEGA and PAS DIRECTED portfolio managers.

The Preference program provides non-discretionary management services. Advisory services are provided by Financial Advisors of Oppenheimer.

Clients may impose restrictions on investing in certain securities and types of securities. Accounts are managed to meet individual client needs and objectives.

Certain Oppenheimer Financial Advisors also manage accounts or provide advisory services that are not in the programs described herein. Financial Advisors may manage accounts in the Alpha program, a discretionary advisory program that charges commissions only, and the Fahnestock Asset Management program, a discretionary advisory program that charges an asset based fee and commissions, and FAM Fee Only, which charges an asset based fee. OMEGA accounts must meet the diversification requirements of the OMEGA program. Accounts in the Alpha and FAM programs may be managed according to more customized guidelines.

Activity in FAM Retirement, FAM Fee Only and Alpha Retirement program accounts is reviewed by the Financial Advisor's Branch Manager pursuant to specific written supervisory procedures that include unusual, suspicious or otherwise inappropriate activity utilizing various reports. Branch Managers review for potential conflicts between Financial Advisors and clients with respect to trading activity and outside business activities. Branch Managers review each account for suitability before it is opened and review trading activity in managed accounts that are managed on a discretionary basis

FAM Retirement, FAM Fee Only and Alpha Retirement program accounts may be reviewed more frequently if there is an unusual level of trading or pattern of trading.

FAM Retirement, FAM Fee Only and Alpha Retirement clients receive brokerage confirmations for all transactions (unless they have elected to waive receipt of confirmations) and monthly brokerage statements and a quarterly account statement.

Investment strategies for OMEGA accounts vary by Financial Advisor and include strategic asset allocation and tactical asset allocation. Equity and balanced accounts may use value, growth and momentum investing strategies.

All investments entail certain risks, both systemic and non-systemic. Investments and asset allocation recommendations made by Financial Advisors may include financial, market, inflation, interest rate, credit, and loss of principal risks. Financial Advisors generally attempt to moderate and manage these risks through diversification.

Investing in securities involves risk of loss that clients should be prepared to bear.

Non-discretionary Advantage Advisory Program and Advantage Advisory Retirement Program

The Alternative Investment Group (“AIG”) is responsible for overseeing the alternative investment offerings on the Platform. This includes initial investment due diligence for prospective managers to add to the Platform as well as ongoing due diligence to monitor the approved managers on the Platform. The due diligence process includes reviews of each manager’s investment strategy and process, team background and history, firm history, track record and business management. In addition, reference checks are conducted and a third party background search is ordered. AIG investigates any issues from the background search during additional meetings with the prospective manager. The operational due diligence team conducts an independent review of each manager’s operational policies and procedures.

Investing in alternative investment funds involves significant risks including lack of liquidity, lack of transparency and higher risk investment strategies that may expose an investor to lose all monies invested.

Conflicts specifically related to the Program are as follows: (i) incentive for Oppenheimer not to terminate an Investment Fund from the Approved Investment Funds List, or for an FA not to suggest a withdrawal from an Investment Fund, because of a resulting reduction in Advisory Fees, and (ii) for Oppenheimer not to terminate an Investment Fund from the Approved Investment Funds List where Oppenheimer provides brokerage or other services to the Investment Fund, out of concern for the possible loss of the brokerage and other service business in retaliation by the Investment Fund. Oppenheimer will act as an uncompensated placement agent for the Investment Funds in the Program.

The Alternative Investment Group (“AIG”) is responsible for overseeing the alternative investment offerings on the Platform. This includes initial investment due diligence for prospective managers to add to the Platform as well as ongoing due diligence to monitor the approved managers on the Platform. The due diligence process includes reviews of each manager’s investment strategy and process, team background and history, firm history, track record and business management. In addition, reference checks are conducted and a third party background search is ordered. AIG investigates any issues from the background search during additional meetings with the prospective manager. The operational due diligence team conducts an independent review of each manager’s operational policies and procedures.

Investing in alternative investment funds involves significant risks including lack of liquidity, lack of transparency and higher risk investment strategies that may expose an investor to losses exceeding the amount invested.

Conflicts specifically related to the Program are as follows: (i) incentive for Oppenheimer not to terminate an Investment Fund from the Approved Investment Funds List, or for an FA not to suggest a withdrawal from an Investment Fund, because of a resulting reduction in Advisory Fees, and (ii) for Oppenheimer not to terminate an Investment Fund from the Approved Investment Funds List where Oppenheimer provides brokerage or other services to the Investment Fund, out of concern for the possible loss of the brokerage and other service business in retaliation by the Investment Fund. Oppenheimer may receive placement

agent fees for the Investment Funds in the Program. FA compensation for the placement and or advice is differentiated between retirement and non-retirement accounts.

Methodologies and Strategies for OMEGA accounts

Financial Advisors who manage OMEGA accounts may use one or more of the following methods of analysis in managing client assets:

Fundamental Analysis. We may attempt to measure the intrinsic value of a security by looking at economic and financial factors (including the overall economy, industry conditions, and the financial condition and management of the company itself) to determine if the company is underpriced or overpriced.

Fundamental analysis may not attempt to anticipate market movements. This presents a potential risk, as the price of a security can move up or down along with the overall market regardless of the economic and financial factors considered in evaluating the stock.

Technical Analysis. We may analyze past market movements and apply that analysis to the present in an attempt to recognize recurring patterns of investor behavior and potentially predict future price movement.

Technical analysis does not consider the underlying financial condition of a company. This presents a risk in that a poorly-managed or financially unsound company may underperform regardless of market movement.

Quantitative Analysis. We may use mathematical models in an attempt to obtain more accurate measurements of a company's quantifiable data, such as the value of a share price or earnings per share, and predict changes to that data.

A risk in using quantitative analysis is that the models used may be based on assumptions that prove to be incorrect.

Qualitative Analysis. We may evaluate non-quantifiable factors such as quality of management, labor relations, and strength of research and development factors not readily subject to measurement, and predict changes to share price based on that data. A risk in using qualitative analysis is that our subjective judgment may prove incorrect.

Risks for all forms of analysis. Our securities analysis methods rely on the assumption that the companies whose securities we purchase and sell, the rating agencies that review these securities, and other publicly-available sources of information about these securities, are providing accurate and unbiased data. While we are alert to indications that data may be incorrect, there is always a risk that our analysis may be compromised by inaccurate or misleading information.

Investment Strategies

We may use the following strategy(ies) in managing OMEGA client accounts, provided that such strategy(ies) are appropriate to the needs of the client and consistent with the client's investment objectives, risk tolerance, and time horizons, among other considerations:

Long-term purchases. We may purchase securities with the idea of holding them in the client's account for a year or longer. Typically we employ this strategy when:

- we believe the securities to be currently undervalued, and/or
- we want exposure to a particular asset class over time, regardless of the current projection for this class.

A risk in a long-term purchase strategy is that by holding the security for this length of time, we may not take advantage of short-term gains that could be profitable to a client. Moreover, if our predictions are incorrect, a security may decline sharply in value before we make the decision to sell.

Short-term purchases. When utilizing this strategy, we purchase securities with the idea of selling them within a relatively short time (typically a year or less). We do this in an attempt to take advantage of conditions that we believe will soon result in a price swing in the securities we purchase.

Trading. We may purchase securities with the idea of selling them very quickly (typically within 30 days or less). We may do this in an attempt to take advantage of our predictions of brief price swings.

Utilizing a trading strategy creates the potential for sudden losses if the anticipated price swing does not materialize. Moreover, under those circumstances, we may be left with few options:

- having a long-term investment in a security that was designed to be a short-term purchase, or
- the potential of having to taking a loss.

In addition, because this strategy involves more frequent trading than does a longer-term strategy, there will be a resultant increase in brokerage and other transaction-related costs, as well as less favorable tax treatment of short-term capital gains.

Methodologies and Strategies for FAM Retirement, FAM Fee Only Alpha Fee Only and Alpha Retirement accounts

The investment strategies used in managing FAM Retirement, FAM Fee Only and Alpha Retirement program accounts vary depending on the Financial Advisor and may include strategic asset allocation and tactical asset allocation, value, growth and momentum investing for equity, balanced and fixed income accounts. Financial Advisors who manage FAM Retirement program accounts may use one or more of the following methods of analysis in managing client assets:

Fundamental Analysis. We may attempt to measure the intrinsic value of a security by looking at economic and financial factors (including the overall economy, industry conditions, and the financial condition and management of the company itself) to determine if the company is underpriced (indicating it may be an appropriate time to buy) or overpriced (indicating it may be an appropriate time to sell).

Fundamental analysis does not attempt to anticipate market movements. This presents a potential risk, as the price of a security can move up or down along with the overall market regardless of the economic and financial factors considered in evaluating the stock.

Technical Analysis. We may analyze past market movements and apply that analysis to the present in an attempt to recognize recurring patterns of investor behavior and potentially predict future price movement.

Technical analysis does not consider the underlying financial condition of a company. This presents a risk in that a poorly-managed or financially unsound company may underperform regardless of market movement.

Quantitative Analysis. We may use mathematical models in an attempt to obtain more accurate measurements of a company's quantifiable data, such as the value of a share price or earnings per share, and predict changes to that data. A risk in using quantitative analysis is that the models used may be based on assumptions that prove to be incorrect.

Qualitative Analysis. We may evaluate non-quantifiable factors such as quality of management, labor relations, and strength of research and development factors not readily subject to measurement, and predict changes to share price based on that data. A risk is using qualitative analysis is that our subjective judgment may prove incorrect.

Risks for all forms of analysis. Our securities analysis methods rely on the assumption that the companies whose securities we purchase and sell, the rating agencies that review these securities, and other publicly-available sources of information about these securities, are providing accurate and unbiased data. While we

are alert to indications that data may be incorrect, there is always a risk that our analysis may be compromised by inaccurate or misleading information.

Investment Strategies

We may use the following strategy(ies) in managing client accounts, provided that such strategy(ies) are appropriate to the needs of the client and consistent with the client's investment objectives, risk tolerance, and time horizons, among other considerations:

Long-term purchases. We may purchase securities with the idea of holding them in the client's account for a year or longer. Typically we employ this strategy when: we believe the securities to be currently undervalued, and/or we want exposure to a particular asset class over time, regardless of the current projection for this class.

A risk in a long-term purchase strategy is that by holding the security for this length of time, we may not take advantage of short-term gains that could be profitable to a client. Moreover, if our predictions are incorrect, a security may decline sharply in value before we make the decision to sell.

Short-term purchases. When utilizing this strategy, we purchase securities with the idea of selling them within a relatively short time (typically a year or less). We do this in an attempt to take advantage of conditions that we believe will soon result in a price swing in the securities we purchase.

Trading. We may purchase securities with the idea of selling them very quickly (typically within 30 days or less). We may do this in an attempt to take advantage of our predictions of brief price swings. Utilizing a trading strategy creates the potential for sudden losses if the anticipated price swing does not materialize. Moreover, under those circumstances, we may be left with few options: having a long-term investment in a security that was designed to be a short-term purchase, or the potential of having to taking a loss. In addition, because this strategy involves more frequent trading than does a longer-term strategy, there will be a resultant increase in brokerage and other transaction-related costs, as well as less favorable tax treatment of short-term capital gains.

Exchange Traded Funds and Other Similar Instruments

Shares of exchange traded funds ("ETFs") and other similar instruments may be purchased by OMEGA, Preference, FAM Retirement, FAM Fee Only and PAS FAD program accounts. An ETF is an investment company that is registered under the Investment Company Act of 1940 (the "1940 Act") that holds a portfolio of common stocks designed to track the performance of a particular index. ETFs sell and redeem their shares at net asset value in large blocks (typically 50,000 of its shares) called "creation units." Shares representing fractional interests in these creation units are listed for trading on national securities exchanges and can be purchased and sold in the secondary market in lots of any size at any time during the trading day.

Investments in ETFs and other instruments involve certain inherent risks generally associated with investments in a broadly-based portfolio of stocks including risks that the general level of stock prices may decline, thereby adversely affecting the value of each unit of the ETF or other instrument. In addition, an ETF may not fully replicate the performance of its benchmark index because of the temporary unavailability of certain index securities in the secondary market or discrepancies between the ETF and the index with respect to the weighting of securities or number of stocks held. Because ETFs and pools that issue similar instruments bear various fees and expenses, an account's investment in these instruments will involve certain indirect costs, as well as transaction costs, such as brokerage commissions. The portfolio manager considers the expenses associated with an investment in determining whether to invest in an ETF or other instrument.

Foreign Securities

All OMEGA, Preference, FAM and Alpha program accounts may invest in securities of foreign issuers and in depositary receipts, such as American Depositary Receipts (“ADRs”) that represent indirect interests in securities of foreign issuers.

Investments in foreign securities are affected by risk factors generally not thought to be present in the U.S. These factors include, but are not limited to, the following: varying custody, brokerage and settlement practices; difficulty in pricing; less public information about issuers of foreign securities; less governmental regulation and supervision over the issuance and trading of securities than in the U.S.; the unavailability of financial information regarding the foreign issuer or the difficulty of interpreting financial information prepared under foreign accounting standards; less liquidity and more volatility in foreign securities markets; the possibility of expropriation or nationalization; the imposition of withholding and other taxes on interest, dividends, capital gains or other income; adverse political, social or diplomatic developments; difficulties in invoking legal process abroad and enforcing contractual obligations; and the difficulty of assessing economic trends in foreign countries. Moreover, governmental issuers of foreign securities may be unwilling to repay principal and interest due, and may require that the conditions for payment be renegotiated. Investment in foreign countries also involves higher brokerage and custodian expenses than does investment in U.S. securities. Investments in foreign securities in their native currencies also introduces currency risk to the investment.

Risk Factors

The success of an investment program may be affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws and national and international political circumstances. These factors may affect the level and volatility of securities prices and the liquidity of a portfolio’s investments. Unexpected volatility or illiquidity could result in losses.

Risks of Equity Securities

The value of equity securities varies in response to the financial condition of individual companies and general market and economic conditions. Investments in companies with smaller market capitalizations generally are riskier than investments in larger more established companies. Prices of smaller companies may be more valuable than those of larger companies.

Volatility of Investment Results. As with any investment in equity securities, the value of an investment in any of the strategies employed by OMEGA, Preference, FAM Retirement, FAM Fee Only or Alpha Retirement program accounts and the total return on an investor’s investment are subject to the possibility that the portfolio of investments will experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect the securities markets generally, such as adverse changes in economic conditions, the general outlook for corporate earnings, interest rates or investor sentiment. Investments also may lose value because of factors affecting an entire industry or sector, such as increases in production costs, or factors directly related to a specific company, such as decisions made by its management.

Concentration of Portfolio. The various strategies executed in OMEGA, Preference, FAM Retirement, FAM Fee Only or Alpha Retirement program accounts may result in the concentration in a limited number of securities, or one security may constitute a significant percentage of a particular portfolio. A decline in the value of a security or securities in which an account holds a concentrated interest could substantially affect the value of the account overall.

Strategy May Not Be Successful. No guarantee or representation can be made that the investment strategy utilized on behalf of any client will be successful, that there will be profits, or that losses will be avoided.

The success of an investment program may be affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws and national and international political circumstances. These factors may affect the level and volatility of securities prices and the liquidity of a portfolio's investments. Unexpected volatility or illiquidity could result in losses.

Options. Certain FAM Retirement and Alpha Retirement accounts may trade options. Selling uncovered options involves a high degree of risk and is not suitable for all investors. In some cases losses can be unlimited. Suitability requirements include financial sophistication and the ability to withstand a loss of equity. The Options Clearing Corporation ("OCC") Disclosure Document entitled "Characteristics and Risks of Standardized Options" and supplement titled "Special Statement for Uncovered Option Writers" is provided to investors for additional information on risks of options.

Special Risks of Small and Mid-Capitalization Companies

Investments in companies with smaller market capitalization are generally riskier than investments in larger, well-established companies. Smaller companies often are more recently formed than larger companies and may have limited product lines, distribution channels and financial and managerial resources. These companies may not be well known to the investing public, may not have significant institutional ownership and may have cyclical, static or moderate growth prospects. There is often less publicly available information about these companies than there is for larger, more established companies, making value more difficult to analyze. The equity securities of small and mid-capitalization companies are often traded over-the-counter or on regional exchanges and may not be traded in the volume typical for securities that are traded on a national securities exchange. Consequently, these securities may be required to be sold over a longer period of time (and potentially at less favorable prices) than would be the case for securities of larger companies. In addition, the prices of the securities of small and mid-capitalization companies may be more volatile than those of larger companies.

Risks of Fixed Income Securities

There are risks associated with investing in bonds. These include risks related to interest rate movements (interest rate risk, spread risk and reinvestment risk), and the risk of credit quality deterioration (credit or default risk). Clients may lose all or some of their monies when investing in bonds and should be prepared to bear such losses.

Reinvestment Risk

Reinvestment risk is the risk that the cash flow received from a bond may be reinvested at a lower rate of return. Short-maturity bonds and callable bonds are the instruments most frequently associated with reinvestment risk. Callable bonds may subject the investors to reinvestment risk. Such bonds allow the issuer to repay the principal (with accrued interest) early. This gives the issuer the flexibility to refinance the debt if rates are low or declining. The timing of bond calls occurs precisely when investors do not want to receive their principal back, i.e., when they can only reinvest at either lower rates or in lower-quality securities. To compensate them for this reinvestment risk, investors in callables typically demand (and get) a higher interest rate as compared to non-callables.

Spread Risk

Spread risk is the risk associated with changes in yields between issuers, credit ratings, sectors and/or markets. For example, sector spreads are yield differences between similarly rated bonds of different sectors. AA rated bonds of financial firms may trade at much higher yields than similarly rated industrial bonds. This spread relationship may change substantially while general interest rates may remain unchanged.

Credit Risk

Credit or default risk is the risk that the issuer may be unable to make timely principal and interest payments on the bond. It is the critical determinant of a fixed income security's quality.

All fixed income securities have credit risk. US Treasury securities are generally considered to have the least credit risk of all fixed income investments. Most corporate bonds are rated by a nationally recognized statistical rating agency such as Standard & Poor's and Moody's. Standard & Poor's rates bonds from AAA (the best) to D (in default) with the ratings AAA, AA, A, and BBB considered to be "investment grade" and bonds rated BB, B, CCC, CC, C and D considered speculative grade. Generally the lower the rating the greater chance the obligor may not be able to repay their bonds in full and on time (default). Many factors contribute to the ultimate recovery of principal (and possibly back interest) should an issue default. Investors should pay particular attention to the issue's ranking in the capital structure of the issuer.

High yield (also called junk) bonds are bonds rated BB or lower. High yield fixed income securities are speculative investments and are subject to a very significant risk of default. Adverse changes in economic conditions or developments regarding the issuer are more likely to cause price volatility for issuers of high yield debt than would be the case for issuers of higher grade debt securities. In addition, the market for high yield debt may be less attractive than that of higher-grade debt securities. These bonds tend to have significantly higher price volatility so an investor selling a high yield bond prior to maturity may receive only a fraction of the original purchase price. Additionally, in the event of default bondholders may receive limited recoveries, if any.

Liquidity Risk

US Government bonds generally have the greatest liquidity, meaning that they can be purchased and sold quickly at prices very close to the inter-dealer market. At the other end of the liquidity spectrum are small issues of low rated bonds. As a result of regulatory changes affecting banks and broker-dealers, there may be less liquidity in the bond market.

Undervalued Securities

Portfolio managers may select fixed income securities that they believe are undervalued. A risk is that the portfolio manager's analysis of the issuer may be incorrect and the fixed income securities may be worth less than the portfolio manager believed them to be.

Risks of Alpha Retirement and Alpha Fee Only Accounts

Risk of Net-Long Bias

Alpha Retirement accounts may be managed with a "net -long bias," i.e., the dollar value of long positions in the account exceeds the dollar value of short positions. As a result, in a declining equity market environment, operating with a net-long bias could subject Alpha accounts to more downside volatility than would be the case if Alpha accounts had greater short exposure.

Short Selling

Alpha Retirement accounts may attempt to limit exposure to a possible market decline in the value of its portfolio securities through short sales of securities that the portfolio manager believes possess volatility characteristics similar to those being hedged or may "short" a security of a company if the portfolio manager believes the security is over-valued in relation to the issuer's prospects for earnings growth.

To affect a short sale, the account will borrow a security from a brokerage firm to make delivery to the buyer. The account is then obligated to replace the borrowed security by purchasing it at the market price at the time of replacement. The account will realize a gain if the borrowed security declines in price between the date of the short sale and the date on which the account replaces the security. The account will incur a loss if the price of the borrowed security increases between those dates. This loss can increase rapidly and without effective limit. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of any premium or interest the account may be required to pay in connection with a short sale. There is a risk that the borrowed securities would need to be returned to the brokerage firm on short notice. If a request for return of securities occurs at a time when other short sellers of the subject security are receiving similar requests, a “short squeeze” can occur, and the account might be compelled, at the most disadvantageous time, to replace borrowed securities previously sold short with purchases on the open market, possibly at prices significantly in excess of the price at which the securities were sold short.. The successful use of short selling may be adversely affected by imperfect correlation between movements in the price of the security sold short and the securities being hedged. Short selling may exaggerate the volatility of the account’s investment portfolio. Short selling may also produce higher than normal portfolio turnover and may result in increased transaction costs to the account. The account may also make short sales against-the box, in which it sells short securities it owns or has the right to obtain without payment of additional consideration. If the account makes a short sale against-the-box, it will be required to set aside securities equivalent in kind and amount to the securities sold short (or securities convertible or exchangeable into those securities) and will be required to hold those securities while the short sale is outstanding.

Proxy Voting

Oppenheimer votes proxies for securities held in accounts in certain programs only when directed by the client to do so. Oppenheimer has adopted policies with respect to the voting of proxies for client accounts, which are summarized below. Financial Advisors may vote proxies for certain client accounts using Proxy Edge.

Oppenheimer has engaged Glass Lewis & Co. Inc. (“Glass Lewis”) to provide research and advice on shareholder voting. Oppenheimer has reviewed and adopted Glass Lewis guidelines on proxy voting. Glass Lewis will submit its recommended vote to Oppenheimer and Oppenheimer will have the opportunity to accept or override the recommendation. For matters that are decided on a case by case basis or that are not covered by the Glass Lewis guidelines, a decision will be made by the Proxy Oversight Committee of Oppenheimer after consultation with Glass Lewis. Matters that are considered on a case-by-case basis include board risk management oversight, advisory votes on executive compensation, golden parachute arrangements, other compensation arrangements, and cumulative voting and anti-takeover measures.

Clients may request information on how Oppenheimer has voted proxies for their accounts and may request Oppenheimer’s Proxy Voting Policies and Procedures by contacting:

Oppenheimer & Co. Inc.
85 Broad Street, New York, NY 10004
Attn: Proxy Voting Department
212-885-4828

Oppenheimer does not vote proxies for securities held in Preference accounts or in other programs when not specifically directed to vote proxies. Clients will receive proxy materials from Oppenheimer as custodian with respect to any securities in those instances.

Item 7. Client Information Provided to Portfolio Managers

The client's questionnaire and a copy of the client's advisory agreement are sent to the Financial Advisor who manages or provides services to the account. If a client communicates any change in financial circumstances that would affect the management of the account, that information generally is provided by the client to the client's Financial Advisor.

Item 8. Client Contact with Portfolio Managers

Clients may contact their Financial Advisors at any time.

Item 9. Additional Information

Disciplinary Information

(1) On April 15, 2008, the NASD alleged that Oppenheimer executed short sale transactions and failed to report them to the trade reporting facility, formerly the NASDQ Market Center, with a short sale modifier. Oppenheimer accepted short sale orders in equity securities from another person, or effected a short sale in equity securities for its own account without borrowing the security or entering into a bona fide arrangement to borrow the security; or reasonable grounds to believe that the security could be borrowed so that it could be delivered on the date delivery is due; and documenting compliance with SEC Rule 203(B)(1) of Regulation SHO. Oppenheimer had failed to deliver positions in threshold securities at a registered clearing agency for 13 consecutive settlement days and failed to immediately thereafter close out the fail to deliver positions by purchasing securities of like kind and quantity. Oppenheimer continued to have failed to deliver positions, which it failed to close as required, in the securities at the registered clearing agency for consecutive settlement days until a later date.

Without admitting or denying the findings, Oppenheimer consented on April 15, 2008 to the described sanctions and to the entry of findings and was censured and fined \$25,000.00.

(2) On July 30, 2008, the NASD alleged that Oppenheimer failed to establish an adequate supervisor system, to monitor stock lending activity, and detect and prevent stock loan personnel from engaging in business dealings with finders in violation of Oppenheimer Policy. Without admitting or denying any allegations, Oppenheimer entered into a letter of acceptance waiver and consent (AWC) on July 30, 2008 and agreed to a censure and \$100,000.00 fine.

(3) On September 24, 2008, the NASD alleged that Oppenheimer failed to provide written notification disclosing to its customers its correct capacity in transactions. The firm transmitted to the Order Audit Trail System (OATS) Reports that contained inaccurate, incomplete or improperly formatted date. Oppenheimer reported riskless principal orders to OATS without using the correct reporting exception code. Oppenheimer made available a report on the covered orders in National Market System securities that it received for execution from any person that included incorrect order information for orders entered.

Without admitting or denying the findings, Oppenheimer consented on September 24, 2008 to the described sanctions and to the entry of findings and was censured and fined \$12,500.00.

(4) On February 24, 2009 the SEC instituted administrative proceedings against Oppenheimer based on its failure to supervise an employee, with a view to preventing and detecting the employee's violations of federal securities laws. The SEC alleged that Oppenheimer's employee provided a trader at another broker-dealer with secret gratuities and entertainment in exchange for an increase in order flow from the other broker-dealer to Oppenheimer for execution at prices that were favorable to Oppenheimer and detrimental to the other broker-dealer's customers. The two individuals exchanged several emails, but

because of a deficiency in Oppenheimer's email review procedures, none of its employee's emails were reviewed by Oppenheimer staff as required by Oppenheimer's electronic communications policy.

Oppenheimer consented to the entry of an order instituting administrative proceedings, making findings, and imposing remedial sanctions pursuant to section 15(B) of the Securities Exchange Act of 1934. Without admitting or denying these allegations Oppenheimer reviewed its policies, procedures and systems regarding the capture and reviewing of electronic communications by its employees and submitted a report to the Commission. Oppenheimer was censured and fined \$850,000.

(5) On June 30, 2009, the NASD alleged that Oppenheimer failed, within 90 seconds after execution, to transmit to the FINRA/NASDQ trade reporting facility last sale reports of transactions in Consolidated Quotation Services (CQS) securities that Oppenheimer was required to report. This conduct constitutes a pattern or practice of late reporting without exceptional circumstances in violation of NASD Rules 2110 and 4632(A). Without admitting or denying findings, Oppenheimer consented on June 30, 2009 to the described sanctions and to the entry of findings and was censured and fined \$7,500.00.

(6) On August 20, 2009, the Florida Office of Financial Regulation executed a stipulation and consent agreement in which Oppenheimer consented to an entry by the office that Oppenheimer failed to maintain adequate written supervisory procedures by not having any supervisory procedures addressing the borrowing of money by clients. On August 21, 2009, the Office entered a final order adopting the stipulation and consent agreement whereby Oppenheimer neither admitted nor denied the findings but agreed to cease and desist from future violations of Chapter 517, F.S. and was fined a \$5,000 administrative fee.

(7) On November 11, 2008, Massachusetts Securities Division ("MSD") alleged that Oppenheimer and Albert Lowenthal violated, inter alia, SECS.101 and 204(A)(2)(B), and 204(A)(2)(G) of the Uniform Securities Act. The violations were alleged to have arisen from Oppenheimer's marketing and sales of certain auction rate securities. The MSD characterized the alleged conduct associated with these actions as dishonest, fraudulent and unethical.

On February 26, 2010, Oppenheimer entered into a consent order with the MSD. Oppenheimer shall buy back illiquid auction rate securities from investors according to a three step redemption process over the course of a 12 month period, as outlined in the consent order. Oppenheimer shall also pay the MSD's investigative and administrative hearing costs in an amount totaling \$250,000.00 to the Secretary of the Commonwealth of Massachusetts.

(8) On October 12, 2010, Oppenheimer submitted an AWC to FINRA in which the firm was censured, fined \$57,500, ordered to pay \$17,879.51 plus interest in restitution to customers, and to revise its written supervisory procedures regarding best execution, trade reporting and sales transactions. The firm consented to the described sanctions and to the entry of findings that it purchased municipal securities for its own account from a customer and/or sold municipal securities for its own account to a customer at an aggregate price (including any markdown or markup) that was not fair and reasonable, taking into consideration all relevant factors, including the best judgment of the broker, dealer or municipal securities dealer as to the fair market value of the securities at the time of the transactions and of any securities exchanged or traded in connection with the transaction; the expense involved in effecting the transaction; the fact that the broker, dealer or municipal securities dealer is entitled to a profit; and the total dollar amount of the transactions. The findings stated that the firm failed to provide written notification disclosing to its customer its correct capacity in the transaction, that the commission was a markup/markdown or commission equivalent, and that when acting as a principal for its own account that it was a market maker in each security. The findings also stated that the firm transmitted reports to OATS that contained inaccurate, incomplete or improperly formatted data; specifically, the reports contained inaccurate order route reports, missing route reports or incorrect share quantities.

(9) On May 10, 2011, Oppenheimer submitted an AWC in which the firm was censured and fined \$100,000. Without admitting or denying the findings, the firm consented to the described sanctions and to the entry of findings that it failed to deliver official statements by the settlement date to numerous customers who purchased new issue municipal securities during the primary offering disclosure period. The findings stated that the firm failed to keep a record of deliveries of official statements to purchasers of new issue municipal securities, as MSRB Rule G-8(a)(xiii) required. The findings stated that the firm failed to enforce its WSPs pertaining to the firm's official statement delivery requirements to customers who purchased new issue municipal securities for secondary market transactions that occurred during the primary offering disclosure period, including those transactions in which the firm was not an underwriter nor part of the underwriting syndicate, as MSRB Rule G-32 required; and the firm's requirements to maintain various records pertaining to its obligations to deliver official statements to customers who purchased new issue municipal securities, including those transactions in which the firm was not an underwriter nor part of the underwriting syndicate, as MSRB Rule G-8 required.

(10) On January 31, 2012, Oppenheimer entered into a consent agreement with the State of New Hampshire Department of State Bureau of Securities Regulation (the "Bureau") regarding the sale of certain penny stocks to clients in New Hampshire. The Bureau alleged that Oppenheimer failed to prevent the solicited sale of unregistered penny stocks to New Hampshire residents and failed to supervise employees at its Portsmouth New Hampshire branch. Without admitting or denying the findings, Oppenheimer agreed to the entry of findings, the payment of a fine in the amount of \$125,000, the payment of costs of \$30,000 and to offer rescission to any New Hampshire clients who purchased such penny stocks. In addition, the branch manager of the Portsmouth branch agreed to voluntarily relinquish her position for a period of one year and Oppenheimer agreed to retain an independent consultant to review certain activities in the Portsmouth branch and to make certain written findings to the Bureau and to Oppenheimer.

(11) On March 29, 2012, Oppenheimer consented to an AWC with FINRA in which the firm was censured and fined \$18,000. Without admitting or denying the findings, the firm consented to the described sanctions and to the entry of findings that it failed, within 90 seconds after execution, to transmit to the Over- The-Counter Reporting Facility (OTCRF) last sale reports of transmissions in OTC equity securities, and failed to designate some of the last sale reports as late. The findings stated that the firm reported some last sale reports of transactions in OTC equity securities it was not required to report, and failed to report the correct execution time to the OTCRF in some last sale reports of transactions in designated securities.

(12) On December 21, 2012, the International Securities Exchange LLC (ISE) issue an AWC to Oppenheimer in which the firm was censured and fined \$60,000. Oppenheimer was alleged to have violated ISE Rule 415 (A) in 2010 when it submitted entries into the Large Options Position Report in which accounts with the same social security or tax id number had not been assigned an in concert number and in concert firm identification.

(13) On January 2, 2013, Oppenheimer submitted an AWC to FINRA in which the firm was censured and fined \$20,000. Without admitting or denying the findings, the firm consented to the described sanctions and to the entry of findings that its customer confirmations were inaccurate or incomplete, in that the firm failed to disclose the correct type of remuneration and failed to disclose that the price the customer received was an average price, failed to disclose the correct type of remuneration on customer confirmations, and failed, on one occasion, to disclose the correct type of remuneration and failed to disclose the correct capacity in which it acted. The findings stated that the firm transmitted reports to OATS that contained incorrect customer instruction flags or incorrect route reports. The findings also stated that the firm transmitted reports to the FNTRF that contained inaccurate data.

(14) On March 18, 2013, Oppenheimer was censured and fined \$5,000 by the CBOE. Oppenheimer failed to register the minimum number of individuals required to register as a Proprietary trader principal (TP) on Web CRD in violation of CBOE Exchange Rule 3.6A.

(15) On April 2, 2013, Oppenheimer submitted an AWC to FINRA in which the firm was censured, fined \$22,500 and ordered to pay \$1,290.58, plus interest, in restitution to customers. Without admitting or denying the findings, the firm consented to the described sanctions and to the entry of findings that in transactions for or with customers, it failed to use reasonable diligence to ascertain the best inter-dealer market, and failed to buy or sell in such market so that the resultant price to its customers was as favorable as possible under prevailing market conditions. The findings stated that the firm failed to show, on brokerage order memoranda, one or more of the correct execution time, the entry time, the correct entry time, the order size, the order type, and/or the terms and conditions. The findings also stated that the firm failed to preserve, for a period of not less than three years, the first two in an accessible place, brokerage order memoranda. The findings also included that the firm failed to report the correct execution time to the FNTRF in some last sale reports of transactions in designated securities.

(16) On July 15, 2013, Oppenheimer submitted an AWC to FINRA in which the firm was censured and fined \$17,500. Without admitting or denying the findings, the firm consented to the described sanctions and to the entry of findings that it executed orders for sales pursuant to SEC Rule 144 and failed to mark each as a short sale. The findings stated that the firm had a few fail-to-deliver positions at a registered clearing agency in an equity security that resulted from long-sale transactions, and failed to timely close out the fail-to-deliver positions by purchasing securities of like kind.

(17) On August 5, 2013, FINRA fined Oppenheimer \$1,425,000 for the sale of unregistered penny stock shares and for failing to have an AML compliance program to detect and report suspicious penny stock transactions. Oppenheimer was also required to retain an independent consultant to conduct a comprehensive review of the adequacy of Oppenheimer's penny stock and AML policies, systems and procedures. Oppenheimer agreed to the sanctions to resolve charges first brought against the firm in a FINRA complaint in May 2013.

(18) In December 2013, FINRA fined Oppenheimer \$675,000 for charging unfair prices in municipal securities transactions and for failing to have an adequate supervisory system. FINRA also ordered Oppenheimer to pay more than \$246,000 in restitution, plus interest, to customers who were charged unfair prices. Oppenheimer failed to detect the unfair prices charged. Oppenheimer's supervisory system was deficient because supervisory personnel relied solely on a surveillance report that only captured intra-day transactions to review the fairness of markups/markdowns in municipal securities transactions. From at least 2005 through June 30, 2009, if an Oppenheimer trader purchased municipal securities and held those securities in inventory for a day or longer, the subsequent sales to customers would not populate the firm's surveillance report or be subjected to a fair pricing review.

(19) On February 19, 2014, Oppenheimer submitted an AWC to FINRA in which the firm was censured and fined \$45,000. Without admitting or denying the findings, the firm consented to the described sanctions and to the entry of findings that it submitted transactions with inaccurate market center codes to the FINRA/ NASDAQ Trade Reporting Facility (FNTRF). The firm submitted transactions for which it failed to substantiate usage of the qualified contingent trade modifier. The findings stated that the firm reported inaccuracies on customer confirmations, including disclosing an inaccurate capacity, disclosing an inaccurate execution price, failing to disclose that these were average price transactions, inaccurately disclosing the compensation type as "commission equivalent" for agency trades, failing to disclose the firm was market maker in a security, inaccurately disclosing the compensation type as "commission" for principal trades.

(20) On October 29, 2014, Oppenheimer submitted an AWC to FINRA in which the firm was censured and fined \$10,000. Without admitting or denying the findings, Oppenheimer consented to the sanctions and to the entry of findings that it failed to report the correct trade execution time for transactions in TRACE-eligible securitized products and failed to show the correct execution time on the memoranda of brokerage orders.

(21) On November 3, 2014, Oppenheimer entered into an agreement with the SEC pursuant to which Oppenheimer was censured and fined \$61,200 and agreed to cease and desist from committing or causing any violations of Rule G-15(f) promulgated by the Municipal Securities Rulemaking Board (“MSRB”). In March 2014, Oppenheimer violated MSRB Rule G-15(f) by executing three sales transactions in the Puerto Rico bonds with customers in amounts below the \$100,000 minimum denomination of the issue.

(22) On January 6, 2015, Oppenheimer submitted an AWC in which the firm was censured and fined \$250,000. Without admitting or denying the findings, the firm consented to the sanctions and to the entry of findings that it failed to establish and maintain an adequate system to monitor, supervise and control its extension of margin loans for foreign sovereign debt. The findings stated that the firm’s WSPs did not address how to assess the risks of extending margin credit for foreign sovereign bonds. The findings also stated that the firm failed to dedicate sufficient supervisory resources to monitoring the risk of holding below-investment-grade foreign sovereign bonds. The firm’s exposure to below-investment-grade foreign sovereign bonds, almost all of which was issued by a single government, exceeded \$30 million. The firm’s failure to supervise placed its capital at risk as a default of one bond would therefore likely mean the default of all bonds. The findings also included that the firm failed to take sufficient steps to assess whether a ready market existed for below-investment-grade foreign sovereign bonds and that the debt was adequately secured, as the bonds at issue did not trade on a daily basis. As a result, the firm’s net capital calculation should have been reduced by approximately \$31 million since a deduction from net capital of 100 percent of carrying value is required for securities without a ready market. FINRA found that the firm failed to reasonably supervise the transfer of assets securing a margin loan from one party to another. The firm allowed the transfer to occur without taking adequate steps to determine whether the information provided on the LOA was sufficient.

(23) On January 27, 2015, Oppenheimer entered into an order with the Securities and Exchange Commission (“SEC”) pursuant to which Oppenheimer was censured and agreed to (i) pay \$10 million, comprised of \$4,168,400 in disgorgement, \$753,471 in prejudgment interest and \$5,078,129 in civil penalties; (ii) cease and desist from committing or causing any violations of Sections 15(a) and 17(a) of the Securities Exchange Act of 1934 (the “Exchange Act”) and Rules 17a-3 and 17a-8 adopted thereunder and of Section 5 of the Securities Act of 1933 (the “Securities Act”); and (iii) retain an independent consultant over a five-year period to conduct a review of Oppenheimer’s policies and procedures as they relate to compliance with Section 5 of the Securities Act, the Bank Secrecy Act, the Patriot Act, Oppenheimer’s AML program and the proper recognition of liabilities and expenses associated with foreign entities trading on behalf of customers and U.S. customers trading through foreign financial institutions. This settlement was based on Oppenheimer’s conduct relating to two separate customer accounts. The first account involved aiding and abetting a customer’s violation of the broker-dealer registration requirements under the Exchange Act, failure to file Suspicious Activity Reports to report potential misconduct by this customer and failure to properly report, withhold and recognize backup withholding taxes. The second account involved failure to respond to red flags and conduct an inquiry into whether a customer’s unregistered sales of penny stocks were exempt from Securities Act registration requirements and failure to reasonably supervise with a view toward detecting and preventing violations of the registration provisions. Oppenheimer also agreed to pay an additional \$10 million in civil penalties to settle a parallel action by the Treasury Department’s Financial Crimes Enforcement Network.

(24) On January 30, 2015, Oppenheimer consented to the sanctions and to the entry of findings that it failed to display immediately 31 customer limit orders in NASDAQ securities in its public quotation, when each such order was at a price that would have improved the firm’s bid or offer and the national best bid for the offer in each such security. The conduct violated the Securities Exchange Act Rule 604 of Regulation NMS. The firm was censured and fined \$7,500.

(25) On March 26, 2015, Oppenheimer entered into an AWC with FINRA pursuant to which Oppenheimer was censured and agreed to (i) pay a fine in the amount of \$2,500,000; (ii) make restitution totaling \$1,251,076 to certain customers and (iii) retain an independent consultant, not unacceptable to FINRA

staff, to conduct a comprehensive review of the adequacy of Oppenheimer's supervisory policies, systems and procedures and training relating to wire transfers, Form U4/U5 reporting and excessive trading. The AWC was based on Oppenheimer's failure to supervise a former Financial Advisor who misappropriated funds from his customers and excessively traded their accounts and failure to design or implement supervisory procedures to ensure that timely U4 and U5 filings were made.

(26) On June 18, 2015, Oppenheimer consented to the entry of an order by the SEC imposing remedial sanctions and a cease and desist order. The SEC alleged that Oppenheimer offered and sold municipal securities on the basis of materially misleading disclosure documents, in violation of Section 17(a)(2) of the Securities Act. Oppenheimer was required retain an independent consultant and other undertakings and was fined in the amount of \$400,000.

(27) On June 25, 2015, the firm agreed to pay \$685,000 to the Delaware Investor Protection Fund and agreed to certain undertakings. Without admitting or denying the findings, Oppenheimer agreed to develop and maintain policies, procedures and systems that reasonably supervise the activities of its broker-dealer agents, investment advisors and branch office managers, and ensure full compliance by its officer, agents, employees and representatives with their and Oppenheimer's responsibilities to their clients.

(28) On October 7, 2015, Oppenheimer submitted an AWC to FINRA in which the firm was censured and fined \$21,000. Without admitting or denying the findings, the firm consented to the sanctions and to the entry of findings that in transactions for or with a customer, the firm failed to use reasonable diligence to ascertain the best inter-dealer market, and failed to buy or sell in such market so that the resultant price to its customers was as favorable as possible under prevailing market conditions. These violations resulted in a total of \$109.15 in restitution.

(29) On October 19, 2015, Oppenheimer entered a stipulation and agreement with the director of the Securities Division of the New Mexico Regulation and Licensing Department resolving a notice of contemplated action dated November 20, 2014, captioned in the matter of Oppenheimer and Royce Simpson. The stipulation and agreement determined that the Division, while reviewing the trading activity for Bernalillo County from 2012 through 2013 determined that there may have been certain supervisory deficiencies at Oppenheimer in advising the Treasurer's Office of Bernalillo County during the period of time in question through Oppenheimer's agent, Royce Simpson. Oppenheimer disputes that claim as set forth in the Notice of Contemplated Action; further the stipulation and agreement was not intended to modify any of Oppenheimer's obligations under existing law. And in fact Oppenheimer made certain revisions in its internal policies involving the investment of public funds. Oppenheimer also remitted to the Division \$215,000 to be allocated to the investor education fund for the benefit of licensees and consumers within New Mexico. Oppenheimer also agreed to commit to a full implementation of improved supervisory procedures, which it already adopted for servicing political subdivisions throughout New Mexico. As a result, the Division released and discharged Oppenheimer from any and all claims and dismissed the notice of contemplated action with prejudice against Oppenheimer.

(30) On October 20, 2015, Oppenheimer entered into an offer of settlement with the Chicago Board Options Exchange, Inc. ("CBOE"). Oppenheimer was censured and fined \$20,000 for several instances of violations of Exchange Rule 3.6A in that Oppenheimer failed to properly register certain Associated Persons and its CCO.

(31) On November 24, 2015, Oppenheimer submitted an AWC to FINRA in which the firm was censured, fined \$15,000, and required to revise its WSPs. Without admitting or denying the findings, the firm consented to the sanctions and to the entry of findings that it failed to provide written notification disclosing to its customer the call date and dollar price of the call in transactions in municipal securities executed on the basis of a yield to call. The findings stated that the firm failed to provide written notification disclosing to its customer the correct next potential call date in transactions in continuously callable municipal securities executed on the basis of a yield to call. The firm provided written notification

improperly disclosing to its customer a yield to call in transactions in municipal securities with a variable interest rate and failed to provide written notification disclosing to its customer the correct lowest effective yield in a transaction in a municipal security. The findings also stated that the firm's supervisory system did not provide for supervision reasonably designed to achieve compliance with respect to applicable securities laws and regulations, and MSRB rules, concerning customer confirmations for municipal securities transactions.

(32) On December 22, 2015, Oppenheimer submitted an AWC to FINRA in which the firm was censured and fined \$225,000. Without admitting or denying the findings, the firm consented to the sanctions and to the entry of findings that it failed to reasonably supervise and to have an adequate supervisory system, including adequate WSPs, to address short positions in tax-exempt municipal bonds that resulted primarily from trading errors. The findings stated that as a result of these supervisory failures, the firm inaccurately represented to its customers holding municipal bonds that at least \$188,974.38 in interest that the firm paid to those customers was exempt from taxation. The firm did not hold the bonds on behalf of the customers and the interest that the customers received was paid by the firm and thus taxable as ordinary income. This resulted in the underpayment of not less than \$68,227.43 in federal income taxes. The findings also stated that the firm did not provide adequate guidance or oversight on how and when municipal short positions should be covered.

(33) On December 22, 2015, Oppenheimer submitted an AWC to FINRA in which the firm was censured, fined \$200,000, and required to offer rescission to the customers who purchased securities at either the original purchase price or the current fair market value, whichever is higher. Without admitting or denying the findings, the firm consented to the sanctions and to the entry of findings that it effected customer transactions in a municipal security in an amount lower than the minimum denomination of the issue, which were not subject to an exception under the rule. The findings stated that the firm failed to disclose all material facts concerning municipal securities transactions at or prior to the trade time. Specifically, it failed to inform its customers that the municipal securities transaction was in an amount below the minimum denomination of the issue.

(34) On May 4, 2016, the Securities Division of the Office of the Attorney General for South Carolina determined that Oppenheimer, without admitting or denying the findings, failed to detect and report the activities of a former registered representative and an unidentified representative relating to the representative's recommendation that a client invest in private investments from November 2005 through October 2008. Oppenheimer was fined \$150,000 and reimbursed costs of \$25,000.

(35) On June 7, 2016, Oppenheimer signed an AWC with FINRA in which FINRA alleged the firm sold leveraged, inverse and inverse-leveraged exchange-traded funds (non-traditional ETFs) to retail customers without reasonable supervision, and recommended non-traditional ETFs that were not suitable.

FINRA found the firm did not establish an adequate supervisory system to monitor the holding periods for non-traditional ETFs. The firm failed to employ any surveillance or exception reports to effectively monitor the holding periods for non-traditional ETFs, so certain retail customers held non-traditional ETFs in their accounts for weeks, months and sometimes years, resulting in substantial losses.

FINRA also found that Oppenheimer failed to conduct adequate due diligence regarding the risks and features of non-traditional ETFs and, as a result, did not have a reasonable basis to recommend these ETFs to retail customers. Similarly, Oppenheimer representatives solicited and effected non-traditional ETF purchases that were unsuitable for specific customers.

Oppenheimer neither admitted nor denied the charges, but consented to the entry of FINRA's findings and was fined \$2.25 million and ordered the firm to pay restitution of more than \$716,000 to affected customers.

(36) On July 19, 2016, the Michigan Department of Licensing and Regulatory Affairs, Corporations, Securities & Commercial Licensing Bureau entered into a Consent Agreement & Order In Lieu of Cease & Desist Proceedings with the firm to settle allegations of violations of the Michigan Uniform Securities Act

(2002), 2008 PA 551, as amended. The violations related to the firm's failure to register investment adviser representatives in Michigan. The agreement and order included a civil fine of \$900,000.

(37) On November 17, 2016, the firm was fined \$1.575 million and ordered to pay \$1.85 million to customers for failing to report required information to FINRA, failing to produce documents in discovery to customers who filed arbitrations, and for not applying applicable sales charge waivers to customers. The firm neither admitted nor denied the charges, but consented to the entry of FINRA's findings. FINRA found that over a span of several years, the firm failed to timely report to FINRA more than 350 required filings including securities-related regulatory findings, disciplinary actions taken by the firm against its employees, and settlements of securities-related arbitration and litigation claims. FINRA rules require firms to timely and accurately report required information, yet Oppenheimer's procedures did not provide direction to its employees on making these disclosures. On average, Oppenheimer made these filings more than four years late. The firm also failed to timely disclose that its then Anti-Money-Laundering Compliance Officer and another employee had received Wells notices from the SEC. The firm had revised its supervisory procedures as a result of a prior FINRA investigation but failed to adopt adequate procedures that addressed a specific obligation to report regulatory events involving its employees.

(38) On November 29, 2016, the firm signed an AWC with FINRA in which the firm was censured and fined \$20,000. Without admitting or denying the findings, the firm consented to sanctions and the entry of findings that it failed on 43 occasions to provide written notification disclosing to its customer the call date and dollar price of the call in 43 transactions in municipal securities executed on the basis of a yield to call. The findings stated that the firm failed on three occasions to provide written notification disclosing to its customers the correct lowest effective yield in three transactions in municipal securities and provided on one occasion written notification improperly disclosing to its customer a yield to call in one transition in a municipal security with a variable interest rate.

(39) On June 1, 2017, the firm signed an AWC with FINRA in which the firm was censured and fined \$20,000. Without admitting or denying the findings, the firm consented to sanctions and the entry of findings that it purchased municipal securities for its own account from a customer and/or sold municipal securities for its own account to a customer at aggregate price that was not fair and reasonable, in six transactions. The firm was also ordered to pay restitution to clients in the amount of \$10,301.44 plus interest.

Other Financial Industry Activities and Affiliations

Albert Lowenthal, Chairman, Mark Whaley, Executive Vice President, National Sales, Jeffrey Alfano, Chief Financial Officer and John Benedetto, EVP and Chief Operations Officer, are registered representatives of Oppenheimer but generally do not function in that capacity.

An affiliate of Oppenheimer is the managing member of several subsidiaries that act as investment adviser to registered investment companies and other pooled investment vehicles. These investment companies and pooled investment vehicles pay performance fees as well as management fees. Financial advisors receive a portion of the management fee and incentive fee paid by collective investment vehicles to affiliates of Oppenheimer and may have a financial incentive to recommend those collective investment vehicles.

Oppenheimer also is a registered broker dealer and full services investment firm as well as a registered investment adviser. Oppenheimer provides services such as investment banking, equity research, institutional sales, municipal finance and debt capital markets. Oppenheimer Trust Company, an affiliate of Oppenheimer, provides trust services to high net worth individuals, not for profit organizations and businesses. Oppenheimer Trust Company may recommend Oppenheimer advisory programs or products to its trust clients.

Mutual funds that may be purchased in any of the advisory programs mentioned herein do not pay any fees to Oppenheimer for participating in these programs. However, Advisers or distributors of mutual funds available in Oppenheimer advisory programs may pay for or reimburse for various costs relating to client and prospective client meeting sales and marketing materials and educational training and sales meetings held with Financial Advisors of Oppenheimer. These affiliates of mutual funds also may pay for the cost of reasonable entertainment in connection with Oppenheimer sponsored or client related events. Oppenheimer acts as the placement agent for the sale of interests in collective investment vehicles for which subsidiaries of OAM serve as investment advisor or general partner.

Mutual funds that are purchased in Oppenheimer advisory programs may have other business relationships with Oppenheimer such as institutional trading. Oppenheimer Financial Advisors do not consider any such relationships when determining whether or not to recommend a mutual fund for one of the advisory programs.

Mutual funds available in advisory programs also may be purchased by clients in their brokerage accounts but may include the applicable sales charge.

Certain fund companies pay Oppenheimer a mutual fund support fee for marketing, training operations and systems support with respect to mutual fund shares sold to clients in their Oppenheimer brokerage accounts.

Unit investment trusts ("UITs") may be purchased in fee based advisory accounts if purchased on an agency basis at a 50 basis point charge, none of which is paid to Oppenheimer. Purchases of UITs in fee based advisory programs are not taken into account for the payment of any volume bonuses by sponsors of UITs to Oppenheimer. Sponsors of UITs may have trading relationships with Oppenheimer. The existence of any such relationships is not a factor in the determination by a Financial Advisor to recommend the purchase of a UIT for an advisory program.

Financial Advisors of Oppenheimer receive compensation for the sale of interests in hedge funds recommended by its affiliate OAM out of payments made by the funds to Oppenheimer. Certain hedge funds make higher payments to Oppenheimer than other funds on the OAM hedge fund platform and accordingly, Financial Advisors who sell these funds receive higher payments than they receive from selling other hedge funds. This practice represents a conflict of interest and gives Oppenheimer and the Financial Advisor an incentive to recommend investment products based on the compensation received, rather than on a client's needs.

Oppenheimer as broker-dealer receives remuneration, compensation or other consideration for directing customer orders for securities to particular market centers for execution. Such consideration, if any, may take the form of credits against fees due such market centers, monetary payments, research, reciprocal agreements for the provision of order flow, products or services or other items of remuneration.

Oppenheimer as broker-dealer may also receive payment for routing the options orders to designated broker/dealers or market centers for execution. Compensation may be in the form of a per contract cash payment. The source and amount of any compensation received in connection with options transactions and any additional information concerning the options order flow payments will be furnished upon written request.

Research

Oppenheimer has procedures in place to avoid improper communications between Oppenheimer research employees and employees of other Oppenheimer departments including Financial Advisors of Oppenheimer. Oppenheimer Research employees are generally prohibited from, among other things:

- Discussing with any person outside of the Research Department and the Legal and Compliance Department any unpublished research reports, opinions or recommendations;
- Recommending the purchase or sale of, a security ahead of the issuance of research or changes to a view on a security;
- Recommending the purchase or sale of, a security of an issuer for any account while in possession of material non-public information on the issuer;
- Providing unpublished drafts of research reports for review or approval to any non-Research personnel;
- Providing unpublished drafts of research reports for review or approval to third parties, except pursuant to authorized gate-keeping procedures;
- Making any oral, written, or electronic communication, either internally or externally, that is inconsistent with an analyst's research, opinions or analysis; and
- Disclosing material changes to opinions, recommendations or price target to select persons prior to general publication.

Investment Banking

In order to prevent the improper use of material, non-public information from one part of Oppenheimer to another, Oppenheimer has created "information barriers" or "information walls" around each department that holds this information. Each business unit that regularly holds customer confidential information (such as investment banking) is on the "Private Side" of the information wall. In contrast, each business unit that does not hold confidential information is on the "Public Side" of the wall. Financial Advisors of Oppenheimer are considered to be on the "Public Side" of the wall. Employees on the Private Side of each information wall are prohibited from providing any material, non-public information to employees on the Public Side of the information wall.

Regulatory requirements prohibit Private Side investment banking personnel who are in possession of material, non-public information from discussing a pending transaction with individuals on the Public Side (or employees on the Private Side who do not have a "need to know"). Only those employees directly involved in or necessary to the due diligence process of an investment banking transaction are permitted to be brought "over the wall."

Payments from Other Investment Advisers

Oppenheimer receives compensation from other investment advisers for recommending those advisers or their products to clients. Oppenheimer also acts as a selling broker-dealer for interests in certain collective investment vehicles managed by other investment advisers. In addition, Financial Advisors who recommend other advisers or interests in collective investment vehicles receive a portion of the advisory compensation paid to Oppenheimer under these arrangements.

Code of Ethics

Oppenheimer has adopted a written Code of Ethics pursuant to Rule 204A-1 under the Investment Advisers Act of 1940. A copy of the Code of Ethics will be provided upon request to any client or prospective client. The purpose of the Code of Ethics is to set forth standards of conduct expected of advisory personnel and address conflicts, such as frontrunning, that arise from personal trading by advisory personnel. The Code of Ethics addresses these conflicts as follows:

1. Certain advisory personnel with access to the securities trading on behalf of advisory clients are deemed as "access persons";
2. These access persons of Oppenheimer are required to certify that they are in compliance with the Code of Ethics on an annual basis;

3. Access persons are also required to provide compliance personnel with brokerage accounts through which they conduct personal trading; and
4. Access persons are required to execute securities transactions on behalf of advisory accounts prior to or at a better price than any securities transactions in the same issuer for personal accounts. Note, however, that personal accounts established as advisory accounts are treated the same as other advisory accounts.

Oppenheimer and certain of its affiliates are engaged or may engage in investment activities for separate accounts for individuals and institutions or for their own accounts. These various accounts may from time to time purchase, sell or hold certain investments which are also being purchased, sold or held by other client accounts of Oppenheimer. For client accounts of Oppenheimer pursuing the same investment strategy, Oppenheimer will allocate investments among these accounts on an equitable basis, taking into account such factors as the relative amounts of capital available for new investments. Oppenheimer and its officers and employees devote as much of their time to the activities of its clients as Oppenheimer deems necessary and appropriate.

Oppenheimer effects transactions on an agency basis on behalf of its clients and as principal for its own account in those securities in which it makes a market. Oppenheimer may, on occasion, act as broker for an advisory client of Oppenheimer on one side and a client for whom it (or its affiliates) does not act as investment adviser on the other side of a securities transaction.

All clients are advised through clauses in the advisory contract that Oppenheimer is a broker-dealer and may have a position or interest in securities which are recommended or purchased for their accounts. In their capacity as registered representatives of Oppenheimer, Financial Advisors may indirectly receive a portion of client commissions paid to Oppenheimer.

Oppenheimer acts as the placement agent for the sale of interests in collective investment vehicles for which affiliates of Oppenheimer serve as investment adviser or general partner. Financial advisors of Oppenheimer receive a portion of the fees paid to the investment adviser or general partner with respect to client accounts in such funds.

A copy of this Code of Ethics may be obtained by contacting James Capezzuto at james.capezzuto@opco.com.

Client Referrals and Other Compensation

Securities, including shares of mutual funds that are held in any of the Programs mentioned herein, also may be purchased by clients in their brokerage accounts without an advisory fee but with the payment of the applicable sales charge.

Oppenheimer pays cash compensation for client referrals in accordance with Rule 206(4)-3 under the Investment Advisers Act of 1940 to registered investment advisers. Compensation paid is a percentage of the fee payable by the referred clients or a percentage of assets under management and may continue for the length of the client's advisory relationship with Oppenheimer.

Oppenheimer also compensates unaffiliated third parties such as other broker-dealers, accountants and consultants for client referrals in accordance with Rule 206(4)-3. Compensation paid is a percentage of the account assets under management or the fee payable by the referred clients' assets invested in various Oppenheimer advisory programs, investment partnerships or private funds sponsored by Oppenheimer (only if investor is qualified); or a percentage of commission fees for accounts maintained at Oppenheimer in connection with Oppenheimer's business as a broker-dealer. The client does not incur any additional fees as a result of such client referral arrangements.

Cash assets in the Advisory Programs are invested at certain participating banks in the Advantage Bank Deposit Program. The Advantage Bank Deposit Program is significantly more profitable to Oppenheimer than money market fund sweep vehicles. The fee payable to Oppenheimer may be as high as 5% of the household balances invested in the Advantage Bank Deposit Program. Oppenheimer retains fees earned on cash deposits for retirement accounts in the Advantage Bank Deposit Program.
